Ecological Services.—The Service conserves, protects, and enhances fish, wildlife, plants, and their habitat by working with private landowners, States, Tribes, non-governmental organizations, and other Federal agencies. These partnership activities help protect and recover species that are listed under the Endangered Species Act and work toward making the listing of additional species unnecessary. Financial assistance is provided to private landowners to restore or improve habitat for endangered species and other at-risk species. Technical assistance helps prevent or minimize adverse environmental effects of development projects. Contaminants are investigated, monitored, and assessed for effects on trust resources.

Habitat Conservation.—Through technical and financial assistance, the Service promotes the protection, conservation, and restoration of the Nation's fish and wildlife resources. These conservation activities are accomplished through a voluntary citizen and community based stewardship program with partners on private lands. Conserving the nation's coastal trust resources is accomplished through collaboration with others on public and private lands.

National Wildlife Refuge System.—The Service maintains the National Wildlife Refuge System consisting of 566 refuges, waterfowl production areas in 209 counties managed by 38 wetland management districts, 50 wildlife coordination areas, and seven national monuments. The National Wildlife Refuge System administers this network of land and waters to conserve and restore fish, wildlife, plants, and their habitats, for the benefit of present and future generations of Americans.

Conservation and Enforcement.—The Service directs and coordinates national migratory bird programs to protect and enhance populations and habitat of more than 1,000 species of birds. Grants and partnerships are key to these programs, such as Joint Ventures that implement the North American Waterfowl Management Plan. The Service Law Enforcement program investigates wildlife crimes, regulates wildlife trade, helps Americans understand and obey wildlife protection laws, and works in partnership with international, State, and Tribal counterparts to conserve wildlife resources. The Service, through the International Affairs Program, works with domestic and international partners to promote a coordinated strategy to protect, restore, and enhance the world's diverse wildlife and their habitats, with a focus on species of international concern.

Fish and Aquatic Conservation.—The Fish and Aquatic Conservation Program consists of a network of 72 National Fish Hatcheries, one historic National Fish Hatchery, nine Fish Health Centers, seven Fish Technology Centers, 65 Fish and Wildlife Conservation Offices, and the Aquatic Animal Drug Approval Partnership Program. Working with partners, the

program recovers, restores and maintains fish and other aquatic resources at self-sustaining levels; provides technical assistance to States, Tribes and others; and supports Federal mitigation programs for the benefit of the American public.

Cooperative Landscape Conservation.—Through a national network of Landscape Conservation Cooperatives (LCCs), and in cooperation with both Federal and non-Federal partners, the Service enhances its core capacity in biological planning and conservation design to address adaptive management problems affecting fish, wildlife, and plants. The budget does not include funding for this activity in FY 2018.

Science Support.—Science Support provides funding for applied science directed at high impact questions surrounding threats to fish and wildlife resources. This science provides needed information to inform regulatory and policy decisions to best manage species at healthy and sustainable levels across broader landscapes. The budget does not include funding for this activity in FY 2018.

General Operations.—Funding for the Service's general operations provides policy guidance, program coordination, and administrative services to all of the Fish and Wildlife Service's programs. The funds also support the National Conservation Training Center and projects through the National Fish and Wildlife Foundation to restore and enhance fish and wildlife populations.

The State and Tribal Wildlife Grants program provides funds to States, Commonwealths, the District of Columbia, and Territories primarily through a formula-based apportionment. Additionally, a competitive program uses a merit-based process to fund outcome-oriented, results-based projects. At the discretion of affected States, the competitive program may be used by regional associations of State fish and wildlife agencies. Tribes also receive funds through a national competitive award process. These funds are provided to stabilize, restore, enhance, and protect species and their habitat that are of conservation concern. Funding for State competitive grants is not included in the 2018 request.

Federal Land Acquisition funds are used to protect areas that have native fish or wildlife values and provide natural resource benefits over a broad geographical area. Funds in this account also cover acquisition management activities, such as title fees and land surveys. The U.S. Fish and Wildlife Service places emphasis on acquiring important fish, wildlife, and plant habitat for the conservation of listed endangered and threatened species, implementing the North American Waterfowl Management Plan, and

conserving migratory birds of conservation concern. The Federal Land Acquisition program uses alternative and innovative conservation tools, including conservation easements, and implements projects that have the input and participation of the affected local communities and stakeholders.

The Landowner Incentive Program provided cost-shared, competitive grants to States, Commonwealths, the District of Columbia, Territories, and Tribes to create, supplement or expand upon new or ongoing landowner incentive programs. These programs provided technical and financial assistance to private landowners to help them protect and manage imperiled species and their habitat, while continuing to engage in traditional land use or working conservation practices. The program was phased out in 2008 and minimal balances remain in this account.

Funds deposited into this account include import duties on arms and ammunition and receipts in excess of U.S. Postal Service expenses from the sale of Migratory Bird Hunting and Conservation Stamps, also known as Duck Stamps. These funds are used to acquire land and water for migratory bird refuges and waterfowl production areas. In addition, any funds reverted from the States within the Federal Aid in Wildlife Restoration Fund are available for this purpose. The Federal Duck Stamp Act (P.L. 113-264) increased the price of Duck Stamps from \$15 to \$25, with the \$10 increase to be dedicated to the acquisition of conservation easements for conservation of migratory birds.

Funds deposited into this account include direct appropriations and fines, penalties, and forfeitures collected under the authority of the Migratory Bird Treaty Act (16 U.S.C. 707). The North American Wetlands Conservation Fund supports wetlands conservation projects approved by the Migratory Bird Conservation Commission. Interest on obligations held in the Federal Aid in Wildlife Restoration Fund is also available for this purpose. In addition, a portion of receipts to the Sport Fish Restoration Account is also available for coastal wetlands conservation projects.

These projects help fulfill the habitat protection, restoration, and enhancement goals of the North American Waterfowl Management Plan and the Tripartite Agreement among Mexico, Canada, and the United States. These projects may involve partnerships with public agencies and private entities, with non-federal matching contributions, for the long-term conservation of habitat for migratory birds and other fish and wildlife, including species that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531).

Wetlands conservation projects include obtaining a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

The Cooperative Endangered Species Conservation Fund provides grants to States and U.S. territories for species and habitat conservation actions on non-federal lands, including habitat acquisition, conservation planning, habitat restoration, status surveys, captive propagation and reintroduction, research, and education for species that are listed or are candidates for listing, as threatened or endangered. These activities support recovery efforts and Habitat Conservation Plans in partnership with local governments and other interested parties to protect species. Appropriations to this account are financed by the Land and Water Conservation Fund and the Cooperative Endangered Species Conservation Fund. The latter is an unavailable receipt account that receives a transfer from the General Fund of the U.S. Treasury equal to five percent of receipts deposited to the Federal Aid in Wildlife and Sport Fish Restoration accounts plus Lacey Act receipts over \$500,000. Funds made available for grants from the two accounts are subject to annual appropriations authorized by Congress. Funding from the Land and Water Conservation Fund for land acquisition grants is not proposed in the 2018 request.

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes the Service to make payments to counties in which Fish and Wildlife Service fee lands are located from the revenues resulting from the sale of products from Service lands, less expenses for producing the revenue and activities related to revenue sharing. While direct appropriations have previously been used to supplement revenues, the 2018 Budget eliminates discretionary funding as formulas contained in the Act do not account for the economic benefits which refuges provide.

The Federal Lands Recreation Enhancement Act (FLREA) was passed on December 8, 2004, as part of the Omnibus Appropriations bill for 2005. Approximately 164 Fish and Wildlife Service sites collect entrance fees and other receipts. All receipts are deposited into a recreation fee account of which at least 80 percent is returned to the collecting site.

The recreation fee program demonstrates the feasibility of user generated cost recovery for the operation and maintenance of recreation areas, visitor services improvements, and habitat enhancement projects on Federal lands. Fees are used primarily at the site to improve visitor access, enhance public safety and security, address maintenance needs, enhance resource protection, and cover the costs of collection. Recreation fees are often used at Service sites to fund student interns and for various youth programs focusing on hunting, fishing, wildlife observation, wildlife photography, environmental education, and environmental interpretation. The 2018 Budget includes

appropriations language to reauthorize the program for one year, and proposes legislation to permanently authorize the recreational fee programs of the Departments of the Interior and Agriculture under FLREA.

The Federal Aid in Wildlife Restoration Act (16 U.S.C. 669 et seq.), also known as the Pittman-Robertson Wildlife Restoration Act, created a program to fund the selection, restoration, rehabilitation and improvement of wildlife habitat, hunter education and safety, and wildlife management research. Under the program, States, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds from an excise tax on sporting arms and ammunition, handguns, and a tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

The Wildlife and Sport Fish Restoration Programs Improvement Act (P.L. 106-408) amends the Pittman-Robertson Wildlife Restoration Act and authorizes a Multistate Conservation Grant Program, as well as the Firearm and Bow Hunter Education and Safety Program that provides grants to the States.

The Energy Policy Act (P.L. 109-58) amends section 31 of the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1356 et seq.) to require that for each of the fiscal years 2007 through 2010, \$250,000,000 in OCS revenues be distributed annually to coastal States that have submitted approved coastal impact assistance plans. The formula for distribution is based on the amount of qualified OCS revenues generated off the coastline of each producing State. In addition, 35 percent of each State's allocable share is to be distributed to coastal political subdivisions based on population, coastline, and distance to applicable OCS leases. In FY 2011, this program was transferred from the Bureau of Ocean Energy Management, Regulation, and Enforcement to the Fish and Wildlife Service.

The Federal Aid in Sport Fish Restoration Act, also known as the Dingell-Johnson Sport Fish Restoration Act (16 U.S.C. 777 et seq.), created a fishery resources, conservation, and restoration program funded by excise taxes on fishing equipment and certain other sport fish related products and fuel.

The Wildlife and Sport Fish Restoration Programs Improvement Act (P.L. 106-408) amends the Dingell-Johnson Sport Fish Restoration Act

and authorizes a Multistate Conservation Grant Program. It also provides funding for several fisheries commissions and the Sport Fishing and Boating Partnership Council.

The Sport Fish Restoration Act specifies that the net deposits made into the Sport Fish Restoration and Boating Safety Trust Fund, minus the distributions for administrative expenses for the Fish and Wildlife Service and the United States Coast Guard, special commissions, and the Boating Council, be distributed to support the following:

The Coastal Wetlands Planning, Protection, and Restoration Act (16 U.S.C. 3951 et seq.).—18.673 percent of net deposits, or amounts collected in small engine fuels excise taxes as provided by 26 U.S.C. 9504(b), whichever is greater, are to be made available and distributed as follows: 70 percent to the U.S. Army Corps of Engineers for priority project and conservation planning activities in Louisiana; 15 percent to the Fish and Wildlife Service for coastal wetlands conservation grants; and 15 percent to the Fish and Wildlife Service for wetlands conservation projects per the North American Wetlands Conservation Act (16 U.S.C. 4407).

Boating Safety Programs.—17.315 percent of net deposits are to be made available to the United States Coast Guard for State recreational boating safety programs.

Boating Infrastructure Improvement.—4 percent of net deposits are to be made available to the Secretary of the Interior to make grants to 1) States, as determined through a competitive award process, for the development and maintenance of facilities for transient non-trailerable recreational vessels 26 feet or longer or 2) States, Commonwealths, the District of Columbia and Territories, as determined through a competitive award process, to carry out projects for the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities, as well as for educational programs on proper disposal of sewage. Not more than 75 percent of the 4 percent shall be available for grants under either of the award processes referenced in this paragraph.

National Outreach and Communications Programs.—2 percent of net deposits are to be made available to the Secretary of the Interior to develop national and State outreach plans to promote safe fishing and boating opportunities and the conservation of aquatic resources.

Grants to States.—58.012 percent of net deposits are provided to the States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the District of Columbia for up to 75 percent of the cost of approved projects including: research into fisheries problems, surveys and inventories of fish populations, acquisition and improvement of fish habitat, and provision of access for public use and \$3 million is reserved for Multistate Conservation Activities.

The National Park Service administers 417 units and over 84.7 million acres of land in 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, Samoa, and the Northern Marianas. In FY 2016, park visits totaled 324 million. This annual appropriation funds the operation of areas and facilities administered under the National Park System through two budget activities. Funds within this appropriation are available for one year, with the exception of repair and rehabilitation funds and funds for the cooperative restoration of the Everglades, which are both available

for two years. In addition, this account contains reimbursable activity such as recovery of costs associated with special use permits.

The first activity, Park Management, covers the management and operation of park areas, and is divided into five subactivities that represent functional areas:

Resource stewardship.—Encompasses resource management operations that provide for the protection and preservation of unique natural, cultural, and historical features of units of the National Park System.

Visitor services.—Includes operations that provide orientation, educational, and interpretive programs to enhance the visitor's park experience. It also provides for the efficient management of commercial services for the benefit of visitors and the protection of resources.

Park protection.—Provides for the protection of park resources, visitors, and staff. Funding supports law enforcement operations, including the United States Park Police, that reduce vandalism and other destruction of park resources, safety, and public health operations.

Facility operations and maintenance.—Encompasses the maintenance and protection of buildings, other facilities, lands, and other government investments.

Park support.—Covers the management, supervision, and administrative operations for park areas and partnerships.

The second activity, External Administrative Costs, funds costs which are largely determined by organizations outside the National Park Service and for which funding requirements are less flexible. The requirements for these costs are mandated in accordance with applicable laws. To promote the efficient performance of the National Park Service, these costs are most effectively managed on a centralized basis.

Centennial Challenge funds are used to complete projects with partner donations. All Federal funds must be matched on a 50/50 basis, derived from non-Federal sources in the form of cash, assets, or a pledge of donation guaranteed by an irrevocable letter of credit. Projects are administered under existing NPS partnership authorities. The National Park Service Centennial Act (P.L. 114-289) established a National Park Centennial Challenge Fund for signature projects and programs related to visitor services facilities and trail maintenance, funded through offsetting collections exceeding \$10 million from America the Beautiful Senior Pass.

The National Recreation and Preservation appropriation covers a broad range of activities relating to outdoor recreation planning, preservation of natural, cultural and historic resources, and environmental compliance. These programs provide a central point at the Federal level for recreation and preservation planning; the coordination of Federal and State policies, procedures and guidelines; and the administration of technical and financial assistance to international, Federal, State, and local governments and private organizations. This appropriation is comprised of the following seven budget activities:

Recreation Programs.—Provides technical assistance to State and local governments and transfers surplus Federal real property to local governments for recreation uses. The Fiscal Year 2018 Budget proposes to transfer Recreation Programs from its own activity to the Natural Programs activity as a separate program component.

Natural Programs.—Increases river and trail opportunities through Rivers, Trails, and Conservation Assistance, State and local technical assistance and Chesapeake Bay Gateway and Water Trails grants; creates river conservation and recreational opportunities that are compatible with continuing and future operations of hydropower facilities, fulfills National Park Service responsibilities under the Federal Power Act, and protects park resources through the Hydropower Recreation Assistance Program; and manages the National Natural Landmark program. The Federal Lands to Parks program is proposed for transfer to this activity from Recreation Programs in the Fiscal Year 2018 Budget.

Cultural Programs.—Manages the National Register of Historic Places; reviews and certifies applications for Federal Tax Credits for Historic Preservation as a reimbursable activity; conducts cultural resources management planning through the National Historic Landmarks program, the Historic American Buildings Survey, the Historic American Engineering Record and the Historic American Landscapes Survey programs; and advances the application of science and technology in historic preservation and provides information distribution and skills training in the preservation and conservation of the Nation's significant historic and cultural resources through the National Center for Preservation Technology and Training. Grant administration is proposed for transfer to this activity in the Fiscal Year 2018 Budget. This program element will support the American Battlefield Protection Program Assistance Grants program, the Japanese American Confinement Site Grants program, and the Native American Graves Protection and Repatriation Grants program.

Environmental Compliance and Review.—Provides review and commentary on environmental impact statements, Federal licensing, permit applications, and other actions that may impact areas of National Park Service jurisdiction.

Grants Administration.—Provides administrative expenses associated with the Historic Preservation Fund grant programs, the Native American Graves Protection and Repatriation Grants program, the Japanese American Confinement Sites Grants, and the American Battlefield Protection Program Assistance Grants. The Fiscal Year 2018 Budget proposes to transfer Grants Administration from its own activity to the Cultural Programs activity as a separate program component.

International Park Affairs.—Coordinates international assistance programs and the exchange and support functions that complement the Service's domestic role.

Heritage Partnership Programs.—Provides financial and technical assistance to Congressionally designated national heritage areas, managed by private or State organizations to promote the conservation of natural, historic, scenic, and cultural resources. The Fiscal Year 2018 Budget does not request funding for financial assistance for this program.

URBAN PARK AND RECREATION FUND

The Urban Park Recreation Recovery Act of 1978 authorizes matching grants and technical assistance to eligible economically distressed urban communities to revitalize and improve recreation opportunities. Last funded in FY 2004, minimal balances remain.

The Construction appropriation provides support to several National Park Service mission goals, including preserving park resources, providing for visitor enjoyment, and improving organizational effectiveness. In addition, this account contains activity related to reimbursable agreements.

The Construction appropriation is composed of five budget activities: *Line item construction.*—This activity provides for the construction, rehabilitation, and replacement of facilities needed to accomplish the management objectives approved for each park.

Special programs.—This activity includes Emergency and Unscheduled Projects, Employee Housing, Dam Safety, and Equipment Replacement.

Construction planning.—This activity includes the project planning function to prepare working drawings, specification documents, and contracts needed to construct or rehabilitate National Park Service facilities.

CONSTRUCTION—Continued

Construction program management and operations.—This activity provides centralized design and engineering management services, as well as contracting services for park construction projects.

Management planning.—Under this activity, funding is used to prepare and update Unit Management Plans. The plans guide National Park Service actions for the protection, use, development, and management of each park unit. Funding also is used to conduct studies of alternatives for the protection of areas that may have potential for addition to the National Park System and for environmental impact planning and compliance.

The Land Acquisition and State Assistance appropriation uses funding derived from the Land and Water Conservation Fund to support National Park Service land acquisition activities and provide grants to States for the purchase and development of land for outdoor recreation activities. The appropriation is composed of the following budget activities:

Acquisition Management.—Provides for the administration of land acquisitions throughout the National Park System, ensuring compliance with existing guidelines and laws and provides for the administration of American Battlefield Protection Program Acquisition Grants.

Federal land acquisition.—Provides for the acquisition of land and interests in land to preserve and protect, for public use and enjoyment, the historic, scenic, natural, and recreational values of congressionally authorized areas within the National Park System. Funds are also used for matching grants for the purchase of Revolutionary War, the War of 1812, and Civil War Battlefield lands by non-Federal entities. Funding for major land acquisition projects is not requested for Fiscal Year 2018.

State conservation grants administration.—Provides for the administration of matching grants to States and through States to local governments, for the acquisition and development of public outdoor recreation areas and facilities.

State conservation grants.—Provides matching grants to States and local units of government for the acquisition and development of land and facil-

ities that provide the public access to new opportunities to engage in outdoor recreation. The program includes both traditional formula and competitive grant programs for States. Appropriated funding for this program is not requested for Fiscal Year 2018 in anticipation of estimated increases in GOMESA lease revenue.

Outer Continental Shelf Oil Lease Revenues.—The Gulf of Mexico Energy Security Act of 2006 (P.L. 109–432) allows a portion of the revenue collected from certain oil and gas leases in the Gulf of Mexico Outer Continental Shelf (OCS) to be deposited to the Land and Water Conservation Fund and distributed to States in accordance with the Land and Water Conservation Act of 1965. The National Park Service portion of the revenue is 12.5 percent of total qualified OCS revenues. These new OCS receipts became available for expenditure as mandatory funding beginning in 2009. The Consolidated Appropriations Act, 2016 (P.L. 114–113) permits the use of up to three percent of the amounts authorized to be disbursed for costs of administration. FY 2017 is the first year of revenue sharing for Phase II leases authorized by GOMESA.

LAND ACQUISITION AND STATE ASSISTANCE
(Legislative proposal, subject to PAYGO)

Gulf of Mexico Energy Security Act (GOMESA) funding — The Budget proposes to repeal the allocation formulation for Land and Water Conservation Fund State Grants and payments to Gulf Coast states (TX, LA, MS, and AL) established by the Gulf of Mexico Energy Security Act of 2006 (P.L. 109–432). The allocated formula for LWCF State Grants will be replaced by a comparable fixed annual mandatory appropriation of \$90 million in FY 2018, increasing to \$125 million in FY 2022 and each year thereafter, to be derived from the Land and Water Conservation Fund.

Recreation Fee Program.—The National Park Service and other land management agencies operate a fee program that allows parks and other units to collect admission and user fees in accordance with the Federal Lands Recreation Enhancement Act (FLREA). FLREA was passed on December 8, 2004, as part of the Omnibus Appropriations Act, 2005, which authorized this program through 2014. Section 133 of the Continuing Appropriations and Military Construction, Veterans Affairs, and Related Agencies Appropriations Act, 2017, and Zika Response and Preparedness Act (P.L. 114–223) extended FLREA through fiscal year 2018. The Administration proposes appropriations language to extend the authorization for one year and a legislative proposal to permanently reauthorize the Department of the Interior's and the Department of Agriculture's recreation fee programs in fiscal year 2018. Net proceeds are used for high-priority visitor service and facility maintenance projects throughout the National Park System. Up to 80 percent may be retained for use by the collecting park and the remainder retained for discretionary, Servicewide use by the National Park Service Director. Proceeds from the sale of the America the Beautiful passes, which allow access to all public lands that charge fees

RECREATION FEE PERMANENT APPROPRIATIONS—Continued

for a year, are distributed among the Federal land management agencies which offer them for sale, including the National Park Service, the Bureau of Land Management, the U.S. Fish and Wildlife Service, the Bureau of Reclamation and the U.S. Forest Service, as determined by the Secretaries of the Department of the Interior and the Department of Agriculture in accordance with P.L. 108–447. The National Park Service Centennial Act (P.L. 114–289) established in the National Park Foundation a Second Century Endowment for NPS projects and activities, funded through off-setting collections from the first \$10 million collected in each fiscal year, generated from the America the Beautiful Senior Pass.

Deed-restricted parks fee program.—Park units where admission fees may not be collected by reason of deed restrictions retain any other recreation fees collected and use them for certain park operation purposes in accordance with P.L. 105–327. This law applies to Great Smoky Mountains National Park, Lincoln Home National Historic Site, and Abraham Lincoln Birthplace National Historic Site.

Transportation systems fund.—Fees charged for public use of transportation services at parks are retained and used by each collecting park for costs associated with the transportation systems in accordance with section 501 of P.L. 105–391.

Payment for tax losses on land acquired for Grand Teton National Park.—Revenues received from fees collected from visitors are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (16 U.S.C. 406d-3).

The Historic Preservation Fund appropriation includes grant programs to facilitate the preservation of the Nation's historic and cultural resources. This appropriation provides grants-in-aid to States, Territories, and Indian Tribes. Grants-in-aid to States and local governments require a 40 percent funding match; grants to Tribes do not require matching funds. In addition to the traditional grants-in-aid described above, the account includes competitive grant programs. This includes grants for the survey and nomination of properties associated with communities currently underrepresented in the National Register and as National Historic Landmarks, and grants to

preserve the sites and stories of the Civil Rights Movement. Funding for Competitive Grants is not requested in the Fiscal Year 2018 Budget.

Park concessions franchise fees.—Franchise fees for concessioner activities in the National Park System are deposited in this account and used for certain park operations activities in accordance with section 407 of P.L. 105–391. By law, 20 percent of franchise fees collected are used to support activities throughout the National Park System and 80 percent are retained and used by each collecting park unit for visitor services and for purposes of funding high-priority and urgently necessary resource management programs and operations. The National Park Service Centennial Act, P.L. 114–289, establishes a new concessions contracting authority within NPS for providing visitor services and establishes a revolving fund from funds received from these contracts to be used for the management, operation, constructions and maintenance of commercial visitor services and facilities.

Concessions improvement accounts.—National Park Service agreements with private concessioners providing visitor services within national parks can require concessioners to deposit a portion of gross receipts or a fixed sum of money in a separate bank account. A concessioner may expend funds from such an account with the approval of the park superintendent for improvements to facilities that directly support concession visitor services but would not otherwise be funded through the appropriations process. Concessioners do not accrue possessory interests from improvements funded through these accounts.

Park buildings lease and maintenance fund.—Rental payments for leases to use buildings and associated property in the National Park System are deposited in this account and used for infrastructure needs at park units in accordance with section 802 of P.L. 105–391.

Operation and maintenance of quarters.—Revenues from the rental of Government-owned quarters to park employees are deposited in this account and used to operate and maintain the quarters.

Glacier Bay National Park resource protection.—Of the revenues received from fees paid by tour boat operators or other permittees for entering Glacier Bay National Park, 60 percent are used for certain activities to protect resources of the Park from harm by permittees in accordance with section 703 of Division I of P.L. 104–333 (110 Stat. 4185).

Filming and photography special use fees.—The National Park Service is authorized to retain fees collected from issuing permits to use park lands and facilities for commercial filming, still photography, and similar activities. Activities authorized for funding include acquisition of emergency response equipment to prevent harm to aquatic park resources from permittees and studies to quantify the impact of permittees' activities on wildlife and other natural resources of the park.

Contributions to US Park Police annuity benefits.—Necessary costs of benefit payments to annuitants under the pension program for United States Park Police officers hired prior to January 1, 1984, established under P.L. 85–157, are paid from the General Fund of the Treasury to the extent the payments exceed deductions from salaries of active duty employees in the program. Permanent funding for such payments was provided in the De-

OTHER PERMANENT APPROPRIATIONS—Continued

The Operation of Indian Programs appropriation consists of a wide range of services and benefits provided primarily to Federally-recognized Indian Tribes, Alaskan Native groups, and individual American Indians and Alaska Natives, to fulfill Federal trust and treaty responsibilities and support tribal self-determination and nation building.

This account covers expenses associated with the following activities:

Tribal Government.—This activity promotes the sovereignty of Federally-recognized Tribes by supporting and assisting them in the development and maintenance of strong and stable governments capable of administering quality programs and developing economies. This activity also provides for the maintenance of Bureau of Indian Affairs (BIA) roads and bridges.

Human services.—This activity provides funding for social services, welfare assistance, and Indian child welfare. The objective of this activity

OPERATION OF INDIAN PROGRAMS—Continued

is to improve the quality of life for individual Indians who live on or near Indian reservations and to protect children, the elderly, and disabled from abuse and neglect.

Trust: Natural resources management.—This activity provides for the management, development, protection, and resilience of Indian trust land and natural resource assets and related treaty rights. Natural resource programs in Indian Country include agriculture, forestry, water, fish, wildlife, and parks.

Trust: Real estate.—This activity promotes cooperative efforts with landowners for the optimal utilization, development, and enhancement of trust and restricted Federal Indian-owned lands. The activity includes general real estate services, probate, land title and records, environmental compliance, and other trust services and rights protection.

Education.—This activity supports Bureau of Indian Education (BIE) funded elementary and secondary school operations, other education programs for elementary-aged Indian children, tribal post-secondary schools, scholarships and adult education programs, education program management, and operations and facilities maintenance. The BIE-funded schools include 169 elementary and secondary BIE- and tribally-run schools, 14 dormitories, two post-secondary schools, and operating grants to eligible tribal colleges and universities.

Public safety and justice.—This activity funds law enforcement activities in Indian Country in over 25 States. Programs under this activity include investigative, police, and detention services; tribal courts; fire protection; and facilities maintenance.

Community and economic development.—This activity promotes the economic vitality of American Indians and Alaska Natives through Job Placement and Training, Economic Development, and Community Development. This activity also provides assistance for renewable and conventional energy and hard mineral development for the economic benefit of the Tribes and individual Indian allottees.

Executive direction and administrative services.—This activity supports the management of BIA's and BIE's finance, budget, acquisition, and property functions, as well as information technology resources, personnel services, facilities management, payment of GSA and direct rentals, and intra-governmental payments. Significant portions of Indian Affairs activities are executed under contracts or compacts with Federally-recognized Tribes to run tribal and Federal programs. Funding also supports BIA or BIE oversight and technical assistance for these activities in central and regional offices.

This appropriation funds a program to consolidate fractional interests in Indian lands and assist land owners with estate planning. Funds are used to purchase small interests in parcels of lands from willing individual Indian landowners and convey those interests to the tribe on whose reservation the land is located. Consolidation of these interests is expected to reduce the Government's costs for managing Indian lands and promote economic opportunity on these lands. This program is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106–462), the American Indian Probate Reform Act of 2004 (P.L. 108–374), and other authorities. No funding is requested in 2018 in this account. Implementation of the Individual Indian Money Account Litigation Settlement (P.L. 111–291, Title I) to address fractionation is in a separate account in the Office of the Secretary.

Donations and contributed funds.—The Secretary of the Interior may accept donations of funds or other property, and may use the donated property in accordance with the terms of the donation in furtherance of any program authorized by other provision of law for the benefit of Indians (25 U.S.C. 451).

ADMINISTRATIVE PROVISIONS

The Bureau of Indian Affairs may carry out the operation of Indian programs by direct expenditure, contracts, cooperative agreements, compacts, and grants, either directly or in cooperation with States and other organizations.

Notwithstanding 25 U.S.C. 15, the Bureau of Indian Affairs may contract for services in support of the management, operation, and maintenance of the Power Division of the San Carlos Irrigation Project.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs for central office oversight and Executive Direction and Administrative Services (except executive direction and administrative services funding for Tribal Priority Allocations, regional offices, and facilities operations and maintenance) shall be available for contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994 (Public Law 103-413).

In the event any tribe returns appropriations made available by this Act to the Bureau of Indian Affairs, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Education, other than the amounts provided herein for assistance to public schools under 25 U.S.C. 452 et seq., shall be available to support the operation of any elementary or secondary school in the State of Alaska.

No funds available to the Bureau of Indian Education shall be used to support expanded grades for any school or dormitory beyond the grade structure in place or approved by the Secretary of the Interior at each school in the Bureau of Indian Education school system as of October 1, 1995, except that the Secretary of the Interior may waive this prohibition to support expansion of up to one additional grade when the Secretary determines such waiver is needed to support accomplishment of the mission of the Bureau of Indian Education. Appropriations made available in this or any prior Act for schools funded by the Bureau shall be available, in accordance with the Bureau's funding formula, only to the schools in the Bureau school system as of September 1, 1996, and to any school or school program that was rein-

stated in fiscal year 2012. Funds made available under this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 1141 of the Education Amendments of 1978 (25 U.S.C. 2021)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau-funded schools sharing a campus with a charter school and performing functions related to the charter school's operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code.

Notwithstanding any other provision of law, including section 113 of title I of appendix C of Public Law 106–113, if in fiscal year 2003 or 2004 a grantee received indirect and administrative costs pursuant to a distribution formula based on section 5(f) of Public Law 101–301, the Secretary shall continue to distribute indirect and administrative cost funds to such grantee using the section 5(f) distribution formula.

Funds available under this Act may not be used to establish satellite locations of schools in the Bureau school system as of September 1, 1996, except that the Secretary may waive this prohibition in order for an Indian tribe to provide language and cultural immersion educational programs for non-public schools located within the jurisdictional area of the tribal government which exclusively serve tribal members, do not include grades beyond those currently served at the existing Bureau-funded school, provide an educational environment with educator presence and academic facilities comparable to the Bureau-funded school, comply with all applicable Tribal, Federal, or State health and safety standards, and the Americans with Disabilities Act, and demonstrate the benefits of establishing operations at a satellite location in lieu of incurring extraordinary costs, such as for transportation or other impacts to students such as those caused by busing students extended distances: Provided, That no funds available under this Act may be used to fund operations, maintenance, rehabilitation, construction or other facilities-related costs for such assets that are not owned by the Bureau: Provided further, That the term "satellite school" means a school location physically separated from the existing Bureau school by more than 50 miles but that forms part of the existing school in all other respects.

Under the Mineral Leasing Act, States receive fifty-percent of Federal revenues generated from mineral production occurring on Federal lands within that State's boundaries. Alaska is the exception, receiving a 90 percent share of receipts from Federal mineral leasing in that State (exclusive of the National Petroleum Reserve-Alaska). To partially cover the costs of administering the Federal mineral leasing program, the Bipartisan Budget Act permanently amended the Mineral Leasing Act (MLA) to deduct two percent from the required payments to States under the Act. These payments are administered by Interior's Office of Natural Resources Revenue.

Arctic National Wildlife Refuge development. —The Administration proposes legislation to open the coastal plain (the "1002 area") of the Arctic National Wildlife Refuge (ANWR) for oil and gas leasing, expected to generate \$1.8 billion over ten years for the U.S. Treasury. The Budget assumes lease sales would begin around 2022/2023, allowing adequate time for the completion of appropriate environmental reviews and an updated assessment of the state of the oil and gas markets and lease bidding potential prior to scheduling specific lease sales. Additional lease sale(s) would be held in the 2026/2027 timeframe. Revenues would be shared equally with the State of Alaska, with most of the savings over the next ten years derived from bonus bids paid during the lease sales. Additional revenues would be generated in the future from royalties.

Flood control payments to States are shared according to the Flood Control Act of 1936 (33 U.S.C. 701 et seq.) which provides that 75 percent of revenue collected be shared with the State in which it was collected. These funds are to be expended as the State legislature may prescribe for the benefit of the public schools and roads in the county from which the

revenue was collected, or for defraying other expenses of county government. These expenses include public obligations of levee and drainage districts for flood control and drainage improvements. Payments are administered by Interior's Office of Natural Resources Revenue.

As of May 23, 1908 (16 U.S.C. 499), 25 percent of the revenues collected from onshore mineral leasing and production on national forest lands have been paid to the State in which the national forest resides. A State's payment is based on national forest acreage. Where a national forest is situated in several States, an individual State payment is proportionate to its area within that particular national forest. These payments are administered by Interior's Office of Natural Resources Revenue.

The Energy Policy Act of 2005 (P.L. 109-58) amended section 20 of the Geothermal Steam Act of 1970 (30 U.S.C. 1019 et seq.) to provide that for the revenues collected from geothermal leasing, 50 percent of the revenues are to be paid to the State and 25 percent are to be paid to the county in which the leased lands or geothermal resources are located. These payments are administered by Interior's Office of Natural Resources Revenue. The Administration proposes legislation which would change the allocation to eliminate the 25 percent payments to counties.

Repeal geothermal payments to counties.—The Budget proposes legislation to repeal Section 224(b) of the Energy Policy Act of 2005, and permanently discontinue the 25 percent geothermal lease revenue sharing payments to counties. The legislation proposes to restore the traditional 50/50 Federal-State revenue sharing arrangement. This proposal is estimated to generate savings of \$37 million over ten years to the U.S. Treasury.

Repeal Gulf of Mexico Energy Security Act payments.—The Budget includes a legislative proposal to repeal payments to four coastal States (Alabama, Louisiana, Mississippi, and Texas) and their local governments under the Gulf of Mexico Energy Security Act of 2006 (GOMESA, P.L. 109–432) beginning in FY 2019. This proposal is expected to generate \$3.5 billion over ten years for the U.S. Treasury. Federal waters belong to all Americans, so the returns from development should come back to all taxpayers. As part of this proposal, the current allocation formula directing revenue to Land and Water Conservation Fund State Grants would be changed to provide a comparable annual mandatory appropriation of \$90 million in FY 2018, increasing to \$125 million in FY 2022 and each year thereafter, to be derived from the Land and Water Conservation Fund.

Title IV of the Department of the Interior and Related Agencies Appropriation Act, 1998 (P.L. 105–83) established the Environmental Improvement and Restoration Fund account. As required by law, 50 percent of the principal and 50 percent of the interest from the Alaska Escrow account are deposited into the Environmental Improvement and Restoration Fund. The law requires that the corpus of the Fund be invested. Twenty percent of the interest earned by the Fund is permanently appropriated to the Department of Commerce, and the unappropriated balance of interest remains in the Fund. At this time, no budget authority is requested.

The Individual Indian Money Account Litigation Settlement (P.L. 111–291) established this Fund to provide Indian land owners with an additional incentive to sell their fractionated interests, given that the market value associated with highly fractionated interests will be quite low in many cases. Not more than \$60 million may be transferred from the Trust Land Consolidation Fund to this Fund for higher education scholarships for American Indians and Alaska Natives to be administered as described in the settlement agreement.

The Individual Indian Money Account Litigation Settlement (P.L. 111–291) established a new trust land consolidation Fund for the buy-back and consolidation of fractionated interests in parcels of land from individual Indian landowners. The Fund also covers administrative costs to undertake the process of acquiring fractionated interests and associated trust reform activities not to exceed 15 percent of the Fund. The acquisition of fractionated interests is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106–462), and the American Indian Probate Reform Act of 2004 (P.L. 108–374). The Settlement provides additional authority for the acquisition of interests held by persons who cannot be located after engaging in extensive efforts to notify them and locate them for a five-year period. The Settlement was finalized on November 24, 2012 and in accordance with the terms of the legislation, these funds remain available for ten years from the date of the Settlement.

TRUST TERRITORY OF THE PACIFIC ISLANDS

Until October 1, 1994, the United States exercised jurisdiction over the Trust Territory of the Pacific Islands according to the terms of the 1947 Trusteeship Agreement between the United States and the Security Council of the United Nations. These responsibilities were carried out by the Department of the Interior.

The Department of the Interior is seeking no additional appropriations for the Trust Territory of the Pacific Islands. Compacts of Free Association have been implemented with the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau.

Remaining funds in the Trust Territory of the Pacific Islands account are being used to improve basic economic information and financial management capabilities in the insular areas; address compact impact related issues; and also for brown tree snake control.

COMPACT OF FREE ASSOCIATION

For grants and necessary expenses, \$3,286,000, to remain available until expended, as provided for in sections 221(a)(2) and 233 of the Compact of Free Association for the Republic of Palau; and section 221(a)(2) of the Compacts of Free Association for the Government of the Republic of the Marshall Islands and the Federated States of Micronesia, as authorized by Public Law 99-658 and Public Law 108-188.

Note.—A full-year 2017 appropriation for this account was not enacted at the time the budget was prepared; therefore, the budget assumes this account is operating under the Further Continuing Appropriations Act, 2017 (P.L. 114-254). The peoples of the Republic of the Marshall Islands, the Federated States of Micronesia and the Republic of Palau approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (P.L. 99-239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia. Payments began in 1987 and continued through 2003 when the original economic assistance package expired. The Compact of Free Association Amendments Act of 2003, P.L. 108-188, continues financial assistance to the Federated States of Micronesia and the Republic of the Marshall Islands through 2023. The Compact of Free Association for the Republic of Palau was enacted on November 14, 1986 as P.L. 99-658, and was implemented on October 1, 1994. While the financial assistance provisions under the Compact of Free Association with the Republic of Palau were set to expire on September 30, 2009, subsequent appropriations in 2010 through 2017 have continued financial assistance to Palau at 2009 levels.

Under the 1994 U.S.-Palau Compact of Free Association and the related 2010 Compact Review Agreement (CRA), the United States agreed to provide economic assistance to the Government of Palau. The Compact provides significant strategic value to the United States in achieving national security objectives through the exclusive U.S. access to Palau's land, water and air space. The Budget request for the Department of Defense includes \$123.9 million to bring the CRA into force and satisfy the outstanding commitment to Palau. This funding will be transferred to the Department of the Interior.

The mission of the Office of Inspector General is to promote excellence, accountability and integrity in the programs, operations and management of the Department of the Interior. The Office focuses on providing the Secretary and Congress timely and relevant information regarding the Department's most serious management and program challenges, with a special concentration on high-risk areas vulnerable to fraud, waste, and mismanagement. The Office is responsible for independently and objectively identifying risks and vulnerabilities that directly impact, or could impact, the Department's ability to accomplish its mission. The Office is required to keep the Secretary and Congress fully and currently informed about problems and deficiencies relating to the administration of departmental programs and operations. Effective implementation of this mandate addresses the public's demand for greater accountability and integrity in the administration of government programs and operations and the demand for programs that work better, cost less, and get the results Americans care about most.

The Indian Gaming Regulatory Act established the National Indian Gaming Commission as an independent federal regulatory agency within the Department of the Interior. The purpose of the IGRA and the NIGC is to support and promote tribal economic development, self-sufficiency and strong tribal governments through the operation of gaming on Indian lands. The Commission collaborates with tribes to monitor and regulate gaming activities conducted on Indian Lands to ensure that gaming operations are conducted with integrity and that tribes are the primary beneficiaries of gaming revenues. IGRA authorizes the Commission to assess and collect fees on tribal gaming revenues to cover agency operating costs.

P.L. 94-565 (31 U.S.C. 6901-07), as amended, authorizes payments in lieu of taxes ("PILT payments") to counties and other units of local government for lands within their boundaries administered by the Bureau of Land Management, the U.S. Forest Service, the National Park Service, the Fish and Wildlife Service, and certain other agencies. The PILT payment formula is based on a number of factors, including the amount of Federal land within an eligible unit of local government, its population, and certain other Federal payments the local government may receive.

Since the inception of the PILT program in 1977 through FY 2007, PILT funding was subject to annual appropriations. The Emergency Economic Stabilization Act of 2008 provided a five-year (FYs 2008-2012) mandatory funding stream for PILT at the full authorization levels calculated using the existing PILT formula. The Moving Ahead for Progress in the 21st

PAYMENTS IN LIEU OF TAXES—Continued

Century Act (P.L. 112–141) extended the mandatory authorization through 2013, and the Agricultural Act of 2014 (P.L. 113–79) extended the mandatory authorization through 2014. The Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year 2015 and the Consolidated and Further Continuing Appropriations Act (P.L. 113–235) extended PILT payment authority through 2015 with a combination of discretionary and mandatory funds. The Consolidated Appropriations Act of 2016 (P.L. 114–113) provides discretionary PILT funding under the Office of the Secretary, Departmental Operations account to extend payment authority through 2016. The FY 2018 Budget proposes discretionary funding for PILT payments.

The Comprehensive Environmental Response, Compensation and Liability Act, as amended (42 U.S.C. Section 9601 et seq.) requires responsible parties, including Federal landowners, to investigate and clean up releases of hazardous substances. The Central Hazardous Materials Fund is used to fund remedial investigations and cleanups of hazardous waste sites for which the Department of the Interior is liable. The program also has authority to collect and retain amounts recovered from responsible parties within this account.

The FY 2018 Budget proposes the orderly drawdown of the Central Hazardous Materials program's annual appropriations. The Department proposes to develop an implementation plan in 2018 to fund program management staff and remedial investigations and cleanups using amounts recovered from responsible parties rather than annual discretionary appropriations.

Under the Natural Resource Damage Assessment and Restoration Fund (Restoration Fund), natural resource damage assessments are performed to provide the basis for claims against responsible parties for the restoration of injured natural resources. Funds are appropriated to conduct damage assessments, provide restoration support, prepare for response to potential inland oil spills, and for program management. In addition, funds will be received for the restoration of damaged resources and other activities and for natural resource damage assessments from responsible parties through

cooperative assessment agreements, negotiated settlements, or other legal actions by the Department of the Interior. Responsible parties may also provide in-kind services to restore injured natural resources.

Restoration activities include: 1) the replacement and enhancement of affected resources; 2) acquisition of equivalent resources and services; and, 3) long-term environmental monitoring and research programs directed to the prevention, containment, and amelioration of hazardous substances and oil spill sites.

The Restoration Fund operates as a Department-wide program, incorporating the interdisciplinary expertise of its various bureaus and offices. Natural resource damage assessments and the restoration of injured natural resources are authorized by the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 *et seq.*), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 *et seq.*), the Oil Pollution Act of 1990 (33 U.S.C. 2701 *et seq.*), and the Act of July 27, 1990 (16 U.S.C. 19jj *et seq.*). Since 1992, amounts received by the United States from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest.

EXXON VALDEZ RESTORATION PROGRAM

The Budget reflects the receipts, transfers, and mandatory spending by the Department of the Interior associated with the civil and criminal settlements resulting from the 1989 Exxon Valdez oil spill in the Prince William Sound and surrounding areas. Funding from the settlements, including interest, is provided to Federal and State of Alaska natural resource trustee agencies to restore the natural resources and services damaged by the spill. The Exxon Valdez Oil Spill Trustee Council consists of three State and three Federal trustees who oversee restoration of the injured ecosystem through the use of civil settlement funds. The criminal settlement funds are managed separately by the Federal and Alaska State governments, but are coordinated with the Council.

Preparedness.—Funds the non-emergency and predictable aspects of the Department's wildland fire program, including the initial attack suppression action on wildfires. Preparedness includes readiness, operational planning, oversight, procurement, training, supervision, and deployment of wildland fire suppression personnel and equipment prior to wildland fire occurrence, and rural fire readiness, in which assistance is provided to local cooperators to enhance their capacity to protect remote communities and natural resources. It also includes activities related to program monitoring and evaluation, and integration of fire into land-use planning.

Suppression Operations.—Funds the emergency and unpredictable aspects of the Department's wildland fire management program. Suppression operations include the total spectrum of management actions taken on wildland fires in a safe, cost-effective manner, considering public benefits and values to be protected consistent with resource objectives and land management plans. Emergency actions taken during and immediately following a wildfire to stabilize the soil and structures to prevent erosion, floods, landslides, and further resource damage are included in this activity. Generally,

emergency stabilization actions may be performed within one year of containment of a fire, however, exceptions to this time limit are allowed under certain circumstances. In FY 2010 through 2016, funding for the ten-year average of inflation-adjusted suppression obligations was split between the FLAME Wildfire Suppression Reserve Fund and this appropriation. The 2018 Budget request proposes to fund 100 percent of the ten-year average within the Wildland Fire Management account and discontinue funding requests in the FLAME Wildfire Suppression Reserve Fund. The FLAME account will be closed out as current balances in the account are drawn down. The DOI and Forest Service wildland fire management programs will continue to strengthen oversight and accountability of suppression spending and use risk management principles to guide decision-making at the strategic, program, and operational levels.

Fuels Management.—The 2018 Budget proposes to establish the Fuels Management program as a budget activity, elevating it from its current position as a subactivity under Other Operations. The Fuels Management program conducts treatments aimed at mitigating risk to communities and their values, including areas in the wildland urban interface. This activity may also conduct treatments that improve the integrity and resilience of our forests and rangelands. The Fuels Management activity will contribute community adaption to fire and improve the ability to safely and appropriately respond to wildfire. Funding for the Fuels Management activity covers the planning, operational aspects, and monitoring of fuels treatments. The program will utilize such treatment methods as prescribed fire, mechanical, chemical, and biological treatments or a combination of methods.

Other Operations.—Funds all other aspects of the wildland fire management program, which includes Fire Facilities Construction and Maintenance, Burned Area Rehabilitation, and Joint Fire Science. The Fire Facilities Construction and Maintenance program funds construction and maintenance of facilities to house firefighters and equipment used in wildland firefighting and fuels management activities. The 2018 Budget proposes to discontinue funding for the Fire Facilities Construction and Maintenance program. In the future, funding for these facilities will appear in the Department's fire-related bureaus' construction and deferred maintenance budgets. The Burned Area Rehabilitation program begins the restoration process for lands and resources damaged by wildland fires that would not return to fire adapted conditions without intervention. Soil stabilization and the introduction of native and other desirable plant species are employed for up to three years, or up to five years under certain circumstances, following containment of a fire to return severely-burned areas to appropriate fire regimes and resource conditions. The Joint Fire Science subactivity funds the Department's share of the Joint Fire Science program, an interagency partnership that sponsors and delivers applied research to assist field managers with fuels treatment, post-fire rehabilitation, smoke management and many other related topics.

In 2010 through 2016, amounts in the FLAME Fund included the portion of the ten-year average of suppression obligations, adjusted for inflation, intended to support the most severe, complex, and threatening fires. The Secretary may permit transfers from this account to cover these extreme fire events. The Secretary may also transfer funds in the event DOI has exhausted its suppression resources due to an active fire season. In FY 2018, the Budget proposes to discontinue funding requests in the FLAME Fund. All funding for suppression activities is requested in the Wildland Fire Management account. The FLAME account will be closed out as current balances are drawn down.

The Working Capital Fund finances services and activities that can be performed more effectively and efficiently in a centralized manner, including business services provided by the Interior Business Center (IBC), formerly the National Business Center. Activities financed through the fund include information technology and security, systems hosting and help desk services, Departmental news and information, aircraft services, central reproduction, supplies and health services, and safety and health initiatives. Departmental administrative systems hosted within the Fund include the Federal Personnel and Payroll System and the Financial and Business Management System (FBMS). The IBC provides financial management, acquisition, and human resources services as well as payroll services to other agencies as one of the Government-wide shared service providers selected by OPM. Through the National Indian Program Training Center, a component of DOI University, the Working Capital Fund provides training courses and other services related to Indian culture, law and programs to Federal government employees. The appropriated portion of the Working Capital Fund includes funding for FBMS operations and maintenance, Interior's Service First operating efficiency initiatives, the care and management of the Department's cultural collections, and activities related to improving the Department's cybersecurity capabilities.

Funding for the Justice Information Sharing Technology (JIST) account will provide for corporate investments in information technology (IT). Under the control of the DOJ Chief Information Officer, this centralized fund ensures that investments in information sharing technology are well-planned and aligned with the Department's overall IT strategy and enterprise architecture. The current major initiatives/projects are described below.

Cybersecurity.—Enhancing cybersecurity remains a top priority for the Department and its leadership as DOJ supports a wide range of missions that include national security, law enforcement, prosecution, and incarceration. For each of these critical missions, the systems that support them must be secured to protect the confidentiality of sensitive information, the availability of data and workflows crucial to mission execution, and the integrity of data guiding critical decision-making.

IT Transformation.—IT Transformation is a long-term, multiyear commitment that implements shared IT infrastructure for the Department and shifts investments to the most efficient computing platforms, including shared services and next generation storage, hosting, networking, and facilities. This directly supports the Federal CIO's 25 Point Plan to Reform Federal IT Management and the Portfolio Stat (PSTAT) process, and aligns the Department's IT operations with the Federal Data Center Consolidation and Shared First initiatives. Work on these initiatives began in 2012, and consists of the following projects: a) e-mail consolidation; b) data center

consolidation; c) mobility and remote access; and d) desktops. In 2018, DOJ will continue to leverage Schedule A hiring authority with a goal of bringing on board private sector IT subject matter experts to progress IT transformation already underway within OCIO. These experts, with varied skill sets from data architects, application hosting, and business intelligence, will assist OCIO and component customers in moving forward on respective IT initiatives in support of the DOJ mission. Additionally, the OCIO will leverage U.S. Digital Service expertise in its effort to drive innovation in key IT management areas, such as with Digital Acquisition Innovation Labs. OCIO will also continue to leverage its authority under FITARA, through the Department's IT Investment Review Council (DIRC) and Investment Review Board (DIRB), and through the TechStat process, to ensure that all Department IT projects and initiatives are meeting expected milestones and remain within project scope and budget.

Policy, Planning and Oversight.—JIST funds the Office of the CIO and the Policy & Planning Staff (PPS), which supports CIO management in complying with the Clinger-Cohen Act, the Federal Information Technology Acquisition Reform Act (FITARA), and other applicable laws, rules, and regulations for federal information resource management. Within OCIO, PPS develops, implements, and oversees an integrated approach for effectively and efficiently planning and managing DOJ's information technology resources, including the creation of operational plans for JIST and monitoring the execution of funds against those plans. PPS is responsible for IT investment management including portfolio, program, and project management. The investment management team manages the Department's IT investment and budget planning processes; develops and maintains the Department's general IT program policy and guidance documents; and coordinates the activities of the DIRB DIRC. In addition, PPS performs reviews to examine planned IT acquisitions and procurements to ensure alignment with the Department's IT strategies, policies, and its enterprise road map.

This program includes the Office of the Pardon Attorney (OPA) and the Executive Office for Immigration Review (EOIR). The Pardon Attorney receives, reviews, and prepares recommendations to the President for all petitions for executive clemency (i.e., commutation of sentences and pardons, submitted by persons convicted of Federal crimes). EOIR was created on January 9, 1983 through an internal Department of Justice (DOJ) reorganization that combined the Board of Immigration Appeals (BIA) with the Immigration Judge function. In addition to establishing EOIR as a separate agency within DOJ, this reorganization made the Immigration Courts independent of the agency charged with enforcement of Federal immigration laws. Under delegated authority from the Attorney General, EOIR conducts immigration court proceedings, appellate reviews, and administrative hearings. The Office of the Chief Administrative Hearing Officer was added in 1987. EOIR is headed by a Director, appointed by the Attorney General, who oversees 58 Immigration Courts nationwide, BIA, and the headquarters organization located in Falls Church.

The Office of the Inspector General (OIG) was statutorily established in the Department of Justice on April 14, 1989. The OIG investigates alleged violations of criminal and civil laws, regulations, and ethical standards arising from the conduct of the Department's employees. The OIG provides leadership and assists management in promoting integrity, economy, efficiency, and effectiveness within the Department and in its financial, contractual, and grant relationships with others. By statute, the OIG also reports to the Attorney General, the Congress, and the public on a semiannual basis regarding its significant activities.

The Audit function is responsible for independent audits and reviews of Department organizations, programs, functions, computer security and information technology systems, and financial statement audits. The Audit

function also conducts or reviews external audits of expenditures made under Department contracts, grants, and other agreements.

The Investigations function investigates allegations of civil rights violations, bribery, fraud, abuse and violations of other laws, rules, and procedures that govern Department employees, contractors, and grantees. This function also develops these cases for criminal prosecution, civil action, or administrative action. In some instances, the OIG refers allegations to components within the Department and requests notification of their findings and of any disciplinary action taken.

The Evaluation and Inspections function conducts analyses and makes recommendations to decision makers for improvements in Department programs, policies, and procedures. In addition, this function also conducts shorter and more time-sensitive reviews and evaluations to provide managers with early warnings about possible program deficiencies.

The Oversight and Review function investigates allegations of significant interest to the American public and the Congress, and of vital importance to the Department.

The Office of the General Counsel provides legal advice to OIG management and staff. It also drafts memoranda on issues of law; prepares administrative subpoenas; represents the OIG in personnel, contractual, ethical, and legal matters; and responds to Freedom of Information Act requests.

The Management and Planning function provides advice to OIG senior leadership on administrative and fiscal policy, and assists OIG components in the areas of budget formulation and execution, security, personnel, training, travel, procurement, property management, information technology, computer network communications, telecommunications, records management, quality assurance, internal controls, and general support.

The following Department legal activities are financed from this appropriation:

Supreme Court proceedings and appellate matters.—The Office of the Solicitor General conducts substantially all litigation on behalf of the United States and its agencies in the Supreme Court of the United States, approves decisions to appeal and seek further review in cases involving the United States in the lower Federal courts, and supervises the handling of litigation in the Federal appellate courts.

General tax matters.—The mission of the Tax Division is to enforce the nation's tax laws fully, fairly, and consistently, through both criminal and civil litigation, in order to promote voluntary compliance with the tax laws, maintain public confidence in the integrity of the tax system, and promote the sound development of the law.

Criminal matters.—The Criminal Division develops, enforces, and supervises the application of all Federal criminal laws, except those specifically assigned to other divisions. The mission of the Criminal Division is to identify and respond to critical and emerging national and international criminal threats, and to lead the enforcement, regulatory, and intelligence communities in a coordinated nationwide response to reduce those threats.

Claims, customs, and general civil matters.—The Civil Division represents the Federal Government in civil litigation to defend Federal statutes, regulations, and policies, and to avoid payment of unjustified monetary claims. It also investigates and pursues perpetrators of financial, economic, health care, and other forms of fraud to recover billions of dollars owed to the Federal Government. Examples of non-monetary litigation include the defense of thousands of challenges to immigration enforcement decisions and to Federal activities involving counterterrorism, as well as enforcement of consumer protection laws.

Environment and natural resource matters.—The Environment and Natural Resources Division enforces the Nation's civil and criminal environmental laws and defends environmental challenges to Government action. Additionally, the Division represents the United States in virtually all matters concerning the use and development of the Nation's natural resources and public lands, wildlife protection, Indian rights and claims, worker safety, animal welfare, and the acquisition of Federal property.

Legal opinions.—The Office of Legal Counsel provides written opinions and oral advice in response to requests from the Counsel to the President, the various agencies of the executive branch, and offices within the Department, including the offices of the Attorney General and Deputy Attorney General.

Civil rights matters.—This program enforces the Nation's Federal civil rights laws. Through the enforcement of a wide range of anti-discrimination laws, the Division gives meaning to our Nation's promise of equal opportunity. The Division works to uphold and defend the civil and constitutional rights of all individuals, particularly some of the most vulnerable members of our society. The Division enforces Federal statutes that prohibit discrimination and provide a remedy for constitutional violations.

INTERPOL Washington.—This program is the United States National Central Bureau and designated representative to INTERPOL on behalf of the Attorney General. Its mission includes, but is not limited to, facilitating

international police cooperation; transmitting criminal justice, humanitarian, and other law enforcement related information between U.S. law enforcement authorities and their foreign counterparts; and coordinating and integrating information for investigations of an international nature.

Reimbursable programs.—This reflects reimbursable funding for the following:

Civil Division.—For litigating cases under the National Childhood Vaccine Injury Act, and for litigating a number of extraordinarily large cases on behalf of the United States;

Criminal Division.—For activities related to healthcare fraud and drug prosecutions, international training programs, and asset forfeiture related activities;

Environment and Natural Resources Division.—From numerous client agencies for personnel, automated litigation support, and litigation consultant services for a variety of environmental, natural resource, land acquisition, and Native American cases, including from the Environmental Protection Agency (EPA) for Superfund enforcement litigation; and,

Civil Rights Division.—For activities related to the Division's Complaint Adjudication Office and Health Care Fraud activities.

The Antitrust Division administers and enforces antitrust and related statutes. This program primarily involves the investigation of suspected violations of the antitrust laws, the conduct of civil and criminal proceedings in the Federal courts, and the maintenance of competitive conditions.

The Department of Justice Antitrust Division and the Federal Trade Commission (FTC) are responsible for reviewing corporate mergers to ensure they do not promote anticompetitive practices. Revenue collected from pre-merger filing fees, known as Hart-Scott-Rodino (HSR) fees, are collected by the FTC and split evenly between the two agencies. In 2018, the Antitrust Division will continue to collect filing fees for pre-merger notifications and will retain these fees for expenditure in support of its programs.

The Federal Government is represented by a United States Marshal in each of the 94 judicial districts. The primary mission of the United States Marshals Service (USMS) is to protect, defend, and enforce the American justice system by securing Federal court facilities and ensuring the safety of judges and other court personnel; apprehending fugitives and non-compliant sex offenders; exercising custody of Federal prisoners, and providing for their security and transportation from arrest to incarceration; ensuring the safety of protected government witnesses and their families; executing Federal warrants and court orders; managing seized assets acquired through illegal means; and providing custody, management, and disposal of forfeited assets. The USMS is the principal support force in the Federal judicial system and an integral part of the Federal law enforcement community.

Other Federal funds are derived from the Administrative Office of the U.S. Courts for the Judicial Facility Security Program, the Assets Forfeiture Fund for seized assets management and disposal, the Fees and Expenses of Witnesses appropriation for protected witnesses' security and relocation, the Organized Crime Drug Enforcement Task Force Program for multi-agency drug investigations, and the Office of National Drug Control Policy and the Centers for Disease Control for security services. Non-Federal funds are derived from State and local governments for witness protection and the transportation of prisoners pursuant to State writs, as well as fees collected from service of civil process and sales associated with judicial orders.

The Federal Prisoner Detention (FPD) account is responsible for the costs associated with the care of Federal detainees in the custody of the United States Marshals Service (USMS). The USMS must ensure the safe, secure, and humane confinement of persons in its custody while allowing unimpeded prisoner transportation operations. The FPD account provides for the care of Federal detainees in private, State, and local facilities, which includes housing, subsistence, transportation, medical care, and medical guard service.

For 2018, FPD requests funding for housing, medical, and transportation costs associated with the projected USMS detention population. The Federal Government utilizes various methods to house detainees. Detention bed space for Federal detainees is acquired to maximize efficiency and effectiveness for the Government through: 1) Federally-owned and managed detention facilities, where the Government has paid for construction and operation of the facility (funded in the Federal Bureau of Prisons' (BOP) account); 2) Intergovernmental Agreements (IGAs) with State and local jurisdictions, whose excess prison and jail bed capacity is utilized and paid via a daily rate; and 3) Private performance-based contract facilities, where a daily rate is paid. Over three-quarters of the USMS's Federally detained population will likely be housed in State, local, and private facilities.

The USMS continues to look for efficiencies and cost reductions through process and infrastructure improvements. The costs associated with these efforts are funded from the FPD account. Improvements to date include implementation of eDesignate, which was developed to provide a more efficient workflow between the U.S. Courts, the USMS, and the BOP; establishment of Regional Transfer Centers and Ground Transfer Centers to accelerate the movement of prisoners to a designated BOP facility; and increased use of detention alternatives by providing funding to the Federal Judiciary to support alternatives to pretrial detention, such as electronic monitoring, halfway house placement, and drug testing and treatment. The USMS will continue to identify issues and develop solutions to drive further efficiencies.

The Community Relations Service (CRS) is an Agency of the Department of Justice that provides assistance to State and local communities in the prevention and resolution of tension, violence, and civil disorders relating to actual or perceived discrimination on the basis of race, color, or national origin. The Service also works with communities to employ strategies to prevent and respond to violent hate crimes committed on the basis of actual or perceived race, color, national origin, gender, gender identity, sexual orientation, religion, or disability. CRS helps local leaders, including community members, law enforcement, government officials, and affected parties, work together on a voluntary basis to develop locally defined and locally implemented solutions. As a result, CRS builds community capacity to manage conflicts and create permanent mechanisms that communities can use to independently resolve future conflicts. By empowering communities to prevent hate violence and address tension associated with alleged discrimination, CRS helps law enforcement, community leaders, and city officials avoid costly litigation, preserve scarce resources, protect public safety, and ultimately enhance community stability.

Title II of the James Zadroga 9/11 Health and Compensation Act of 2010 (P.L. 111-347) reopened the September 11th Victim Compensation Fund (VCF), extending eligibility for compensation associated with physical harm stemming from debris removal and extending the deadline for claims associated with harms not discovered before the Fund's original deadline. The VCF was established by the Air Transportation Safety and System Stabilization Act (P.L. 107-42) as an alternative to litigation, and had terminated operations in 2004 after making compensation payments of more than \$7 billion to survivors of 2,880 persons killed in the September 11, 2001 terrorist attacks and to 2,680 individuals who were injured in the attacks and subsequent rescue efforts.

The James Zadroga 9/11 Health and Compensation Act of 2010 reopened the VCF and made \$2.775 billion available for the settlement of claim determinations issued on or before December 17, 2015. After all claims in this group were resolved, roughly all remaining funds (approximately \$813 million) became available in the new Victims Compensation Fund. The Victims Compensation Fund is available for the settlement of claim determinations issued after December 17, 2015.

The Comprehensive Crime Control Act of 1984 established the Assets Forfeiture Fund (AFF) as a repository for forfeited cash and the proceeds of sales of forfeited property under any law enforced and administered by the Department of Justice in accordance with 28 U.S.C. 524(c). Authorities of the AFF have been amended by various public laws enacted since 1984. Under current law, authority to use the AFF for certain investigative expenses shall be specified in annual appropriations acts. Expenses necessary to seize, detain, inventory, safeguard, maintain, advertise, or sell property under seizure are funded through a permanent, indefinite appropriation. In addition, beginning in 1993, other general expenses of managing and operating the assets forfeiture program are paid from the permanent, indefinite portion of the AFF. Once all expenses are covered, the balance is maintained to meet ongoing expenses of the program. Excess unobligated balances may also be allocated by the Attorney General in accordance with 28 U.S.C. 524(c)(8)(E).

The Interagency Crime and Drug Enforcement (ICDE) account primarily funds the Organized Crime Drug Enforcement Task Forces (OCDETF) Program. Along with the participation of its seven member Federal law enforcement agencies, in cooperation with State and local investigators, and with prosecutors from the U.S. Attorneys' Offices and the Criminal Division, OCDETF focuses on targeting and destroying major domestic and transnational criminal organizations who engage in high level drug trafficking, violence and money laundering, as well as national emerging drug threats such as heroin and other related criminal activities. The Program performs the following activities:

Investigation.—This activity includes resources for direct investigative, intelligence and support activities of OCDETF's multi-agency task forces, focusing on the disruption and dismantlement of major transnational criminal organizations (TCO) engaged in both the highest level of drug trafficking and money laundering and other crimes that threaten national and economic security. This activity also includes resources for the OCDETF Fusion Center (OFC). The OFC is a multi-agency intelligence center whose mission is to analyze fused law enforcement financial and human intelligence information, and produce actionable intelligence for use by OCDETF member agencies to disrupt and dismantle those criminal organizations, and their supporting financial structures, posing the greatest illegal drug threat to the United States. Organizations participating under the Investigations function are the Drug Enforcement Administration, Federal Bureau of Investigation, Internal Revenue Service, Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Coast Guard, U.S. Marshals Ser-

vice, and Homeland Security Investigations. OCDETF also maintains 12 co-located Strike Forces. The Interagency Crime and Drug Enforcement account also supports transnational organized crime investigations through the International Organized Crime Intelligence and Operations Center (IOC-2). IOC-2 is a multi-agency intelligence center with a mission to significantly disrupt and dismantle those international criminal organizations posing the greatest threat to the United States. Multiple Federal agencies participate in IOC-2 activities and related investigations. For 2018, ICDE seeks \$5.343 million in operational funding to address the impacts of violence and illicit drugs on our nation driven by TCOs.

Prosecution.—This activity includes resources for the prosecution of cases generated through the investigative efforts of task force agents. Litigation efforts are intended to dismantle in their entirety those major transnational criminal organizations engaged in the highest level of drug trafficking, violence, and money laundering, most notably by targeting the leaders of these organizations. This includes activities designed to secure the seizure and forfeiture of the assets of these enterprises. Participating agencies are the U.S. Attorneys and the Department of Justice's Criminal Division. For 2018, ICDE seeks \$418,000 in additional prosecutorial resources to address the impacts of violence and illicit drugs.

The mission of the FBI is to protect the American people and uphold the Constitution of the United States. The FBI's mission priorities are to:

- Protect the U.S. from terrorist attacks;
- Protect the U.S. against foreign intelligence operations and espionage;
- Protect the U.S. against cyber-based attacks and high-technology crimes;
- Combat public corruption at all levels;
- Protect civil rights;
- Combat domestic and transnational criminal organizations and enterprises;
- Combat major white-collar crime; and
- Combat significant violent crime.

The foundation of the FBI's budget strategy is supported by the FBI's mission, vision, and strategic objectives. At the heart of the FBI's strategy is the vision statement: Ahead of the threat through leadership, agility, and integration. The FBI aims to be ahead of the threat in two different ways. First, the FBI's goal is to continuously evolve to anticipate and mitigate existing threats. Second, the FBI needs to be able to recognize and address threats that it has not yet seen.

The FBI is headed by a Director, who is appointed by the President and confirmed by the Senate. FBI Headquarters, located in Washington, DC, provides centralized operational, policy, and administrative support to FBI investigations. The FBI operates 56 field offices in major U.S. cities and 355 resident agencies (RAs) throughout the country. RAs are satellite offices that allow the FBI to maintain a presence in and serve local communities. The FBI also operates over 60 Legal Attaché (Legat) offices and over 20 sub-offices in 70 foreign countries around the world. Additionally, there are several specialized facilities and analytical centers within the FBI that are located across the country, such as the Criminal Justice Information Services Division in Clarksburg, WV; the Terrorist Explosive Device Analytical Center and Hazardous Devices School in Huntsville, AL; and the FBI Academy and Laboratory at Quantico, VA.

A number of FBI activities are carried out on a reimbursable basis. For example, the FBI is reimbursed for its participation in Interagency Crime and Drug Enforcement programs, and by other Federal agencies for certain intelligence and investigative services such as pre-employment background inquiries and fingerprint and name checks. The FBI is also authorized to conduct fingerprint and name checks for certain non-federal agencies.

For 2018, the FBI is requesting a total of \$8.723 billion, to include \$117.6 million in program enhancements for Cyber, Foreign Intelligence and Insider Threat, Going Dark/Investigative Technology, Physical Surveillance, Transnational Organized Crime, Violent Crime Reduction, Biometrics Technology Center (BTC) Operations and Maintenance (O&M), and the National Instant Criminal Background Check System (NICS). The request

The Drug Enforcement Administration's (DEA) mission is to enforce the controlled substances laws and regulations of the United States. DEA's major focus is the disruption and dismantlement of Priority Target Organizations (PTOs)—domestic and international drug trafficking and money laundering organizations having a significant impact on drug availability in the United States. DEA emphasizes PTOs with links to organizations on the Attorney General's Consolidated Priority Organization Target

(CPOT) list, which represents the "Most Wanted" drug trafficking and money laundering organizations believed to be primarily responsible for the United States' illicit drug supply, including heroin. DEA also considers it a high priority to target the financial infrastructure of major drug trafficking organizations, and members of the financial community who facilitate the laundering of their proceeds. From the beginning of 2005 through 2016, DEA denied drug traffickers \$37.5 billion in revenue through the seizure of both assets and drugs, including \$4.1 billion in 2016. In addition to keeping drugs and drug-related violence out of the United States, DEA plays a vital role in the areas of national and border security.

DEA has 221 domestic offices organized in 21 divisions throughout the United States. Internationally, DEA has 90 offices in 69 countries and is responsible for coordinating and pursuing U.S. drug investigations abroad. Federal, State, local, and international partnerships continue to play an important role in DEA's enforcement efforts. For nearly 43 years, DEA has led a task force program that today includes approximately 2,500 task force officers participating in 200 task forces. DEA's Special Operations Division (SOD) and the El Paso Intelligence Center (EPIC) are vital resources for Federal, State, and local law enforcement. Additionally, through the Office of National Security Intelligence (ONSI), DEA ensures that national security information obtained in the course of conducting its drug law enforcement mission is expeditiously shared with the Intelligence Community (IC).

DEA's activities are divided into three decision units:

Domestic Enforcement.—Through effective enforcement efforts and associated support functions, DEA disrupts and dismantles the leadership, command, control, and infrastructure of major drug trafficking syndicates, criminal organizations, and violent drug trafficking groups that threaten the United States. This decision unit contains most of DEA's resources, domestic enforcement groups, State and local task forces, other Federal and local task forces, intelligence groups, and all the support functions essential to accomplishing their mission. DEA's objectives for Domestic Enforcement include:

- Identifying and targeting the national/regional organizations most responsible for the domestic distribution and manufacture of illicit drugs;

- Systematically disrupting or dismantling targeted organizations by arresting/convicting their leaders and facilitators, seizing and forfeiting their assets, targeting their money laundering operations, and destroying their command and control networks; and,

- Working with international offices to dismantle domestic organizations directly affiliated with Transnational Criminal Organizations.

International Enforcement.—DEA works with its foreign counterparts to attack the vulnerabilities in the leadership, production, transportation, communications, finance, and distribution sectors of major international drug trafficking organizations. DEA's objectives for International Enforcement include:

- Identifying and targeting the most significant international drug and chemical trafficking organizations;

- Disrupting and dismantling the networks, financial infrastructures, operations, and resource bases of targeted international drug and chemical trafficking organizations; and

- Preventing drug trafficking organizations from funding terrorist organizations and activities.

State and Local Assistance.—DEA provides clandestine laboratory training, and meets the hazardous waste cleanup needs of the U.S. law enforcement community. DEA supports State and local law enforcement with assistance and training so that State and local agencies can better address the methamphetamine threat in their communities and reduce the impact that methamphetamine has on the quality of life for American citizens. As a result, DEA's nationwide contracts, container program, and established training programs allow DEA to provide State and local clandestine lab cleanup and training assistance in a cost-effective manner.

In 2018, DEA requests \$20.965 million for increased heroin-related enforcement efforts and to target violent Transnational Criminal Organizations

who supply large quantities of drugs to our cities. DEA is also requesting non-personnel funding to enhance its current enforcement strategy to combat violent crime associated with the Attorney General's newly created Taskforce on Crime Reduction and Public Safety.

Public Law 102-395 established the Diversion Control Fee Account in 1993. Fees charged by the Drug Enforcement Administration (DEA) under the Diversion Control Program are set at a level that ensures the recovery of the full costs of operating this program. By carrying out the mandates of the Controlled Substances Act (CSA), DEA ensures that adequate supplies of controlled drugs are available to meet legitimate medical, scientific, industrial, and export needs, while preventing, detecting, and eliminating diversion of these substances to illicit traffic. The CSA requires physicians, pharmacists, and chemical companies to register with the DEA in order to distribute or manufacture controlled substances or listed chemicals. The registrant community, physicians, prescribers, and pharmacists, can be seen as the first line of defense against the opioid epidemic now facing the United States. The engagement and education of these community members can help in reducing the overprescribing of opioids and the prevention of abuse and illicit use. Investigations conducted by the Diversion Control Program (DCP) fall into two distinct categories: the diversion of legitimately

manufactured pharmaceutical controlled substances and the diversion of controlled chemicals (List I and II) used in the illicit manufacture of controlled substances. DEA's objectives for diversion control include:

—Identifying and targeting those responsible for the diversion of pharmaceutical controlled substances through traditional investigation and cybercrime initiatives to systematically disrupt and dismantle those entities involved in diversion schemes;

—Supporting the registrant population with improved technology, including e-commerce and customer support, while maintaining cooperation, support, and assistance from the regulated industry;

—Educating the public on the dangers of prescription drug abuse and proactive enforcement measures to combat emerging drug trends; and,

—Ensuring an adequate and uninterrupted supply of pharmaceutical controlled substances and listed chemicals to meet legitimate medical, commercial, and scientific needs.

In 2018, DEA requests \$9.414 million and 55 positions (including 10 Special Agents) to identify, target, disrupt, and dismantle the individuals and organizations responsible for the illicit manufacture and distribution of pharmaceutical controlled substances in violation of the CSA, as well as to provide outreach, education, and support to the growing registrant population. Further, in support of the Administration's Executive Order Establishing the Commission on Combating Drug Addiction and the Opioid Crisis, DEA proposes using \$20 million of the fees collected in support of the DCP to address the opioid crisis along multiple fronts, including: training, outreach, and liaising with partners and registrants; enforcement and analysis; and prescription drug disposal and diversion prevention. In addition, DEA requests \$2.452 million to expand and enhance the enforcement component of the DCP. The request will fund 20 attorney positions, which will serve as Special Assistant U.S. Attorneys (SAUSAs) in targeted Federal judicial districts. The positions will be reallocated from existing vacancies within the DCP. Currently, the SAUSA program is in the Notice of Proposed Rulemaking stage and will begin as a pilot.

The Bureau of Alcohol, Tobacco, Firearms, and Explosives (ATF) is the U.S. law enforcement Agency dedicated to protecting our Nation from the illicit use of firearms and explosives in violent crime and acts of terrorism. ATF protects our communities from violent criminals and criminal organizations by investigating and preventing the illegal use and trafficking of firearms, the illegal use and improper storage of explosives, acts of arson and bombings, and the illegal diversion of alcohol and tobacco products. ATF regulates the firearms and explosives industries from manufacture and/or importation through retail sale to ensure that Federal Firearms Licensees (FFLs) and Federal Explosives Licensees (FELs) and permittees conduct business in compliance with all applicable laws and regulations. For 2018, ATF requests \$3.5 million to improve ballistic collection capabilities for State and local law enforcement in support of the Department's violent crime reduction strategy; \$4 million to support the timely and effective registration of restricted weapons under the National Firearms Act (NFA) while upholding the constitutional rights of the American people; and \$6.5 million to provide additional office space, equipment used in operations, and State and local partner training in support of ATF's National Integrated Ballistics Information Network (NIBIN).

Federal Prison Industries, Inc. (FPI), was created by the Congress in 1934 and is a wholly-owned Government corporation. Its mission is to employ and train Federal inmates through a diversified work program providing products and services to other Federal agencies. These operations are conducted in a self sustaining manner so as to maximize meaningful inmate employment opportunities and minimize the effects of competition on private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

FPI operates as a revolving fund and does not receive an annual appropriation. The majority of revenues are derived from the sale of products and services to other Federal Departments, agencies, and bureaus. Operating expenses such as the cost of raw materials and supplies, inmate wages, staff salaries, and capital expenditures are applied against these revenues resulting in operating income or loss, which is reapplied toward operating costs for future production. In this regard, FPI makes capital investments in buildings and improvements, machinery, and equipment as necessary in the conduct of its industrial operation.

In order to increase inmate work opportunities, FPI continues to explore opportunities with commercial customers. In the Consolidated and Further Continuing Appropriations Act, 2012 (P.L. 112–55), FPI received two new authorities to increase inmate employment. The first enables FPI to recapture work that would otherwise be performed outside of the United States, also known as repatriation. The second authorized FPI to participate in the Prison Industries Enhancement Certification Program (PIECP), which allows FPI to partner with commercial businesses under a strict set of conditions to manufacture and sell prison-made goods in interstate commerce.

The 2018 Budget requests \$111 million for the Office of Justice Programs' (OJP) Research, Evaluation, and Statistics appropriation. This appropriation includes programs that provide grants, contracts, and cooperative agreements for research, development, and evaluation; develop and disseminate of quality statistical and scientific information; and nationwide support for law enforcement agencies.

Through leadership, funding, and technical support, OJP plays a significant role in the research and evaluation of new technologies to assist law enforcement, corrections personnel, and courts in protecting the public, and guides the development of new techniques and technologies in the areas of crime prevention, forensic science, and violence and victimization research. The research and statistical data compiled by OJP staff are used at all levels of Government to guide decision making and planning efforts related to law enforcement, courts, corrections, and other criminal justice issues. Grants, technical assistance, and national leadership provided by OJP have supported efforts to provide and improve assistance to the Nation's Federal, State, local, and tribal law enforcement and criminal justice agencies.

Research, Development, and Evaluation Program.—The National Institute of Justice (NIJ) serves as the research and development agency of the Department of Justice, as authorized by 42 U.S.C. 3721-3723. The mission of NIJ is to advance scientific research, development, and evaluation to enhance the administration of justice and public safety by providing objective, independent, evidence-based knowledge, and tools to meet the challenges of crime and justice, particularly at the State and local levels. NIJ research, development, and evaluation (RD&E) efforts support practitioners and policy makers at all levels of Government.

Planned activities include but are not limited to: 1) Social science research addressing, among other topics: human trafficking; evaluation of anti-gang programs; policing; crime and justice; elder abuse; and demonstration field experiments in reentry and probation; 2) Provision of criminal justice-focused technology assistance to units of State, local and tribal Government;

3) Criminal justice research infrastructure investments including funding for the National Criminal Justice Reference Service and the National Archive of Criminal Justice Data; 4) Development of equipment performance standards and conduct of compliance testing to help ensure the safety and effectiveness of the equipment used by criminal justice agencies, such as body armor, restraints, holsters, and video systems; and 5) Development of new tools and technologies for law enforcement, corrections, and forensic applications, including those aimed at improving officer safety, knowledge management, and community supervision. The 2018 Budget proposes \$36 million for the Research, Development, and Evaluation Program.

Forensic Science Improvement.—Continuous improvement is needed in the forensic sciences, which are crucial to ensuring the accuracy of evidence presented in criminal justice trials. The 2018 Budget proposes \$4 million for this program. Of this amount, \$3 million will be transferred by NIJ to NIST for measurement science and standards in support of forensic science.

Criminal Justice Statistics Program.—The Bureau of Justice Statistics (BJS) serves as the principal statistical Agency within the Department of Justice, as authorized by 42 U.S.C. 3721–3735, and assists State, local, and tribal Governments in enhancing their statistical capabilities. It disseminates high quality information and statistics to inform policy makers, researchers, criminal justice practitioners, and the general public. The Criminal Justice Statistics Program encompasses a wide range of criminal justice topics, including: 1) victimization; 2) law enforcement; 3) prosecution; 4) courts and sentencing; 5) corrections; 6) recidivism and reentry; 7) tribal justice statistics; 8) justice expenditures and employment; 9) international justice systems; and 10) drugs, alcohol, and crime. In addition to collecting and analyzing statistical data, BJS administers the State Justice Statistics Program for the Statistical Analysis Centers (SACs). SACs have been established in all States and most Territories to centralize and integrate criminal justice statistical functions. Through financial and technical assistance to the State SACs, BJS promotes efforts to coordinate statistical activities within the States and conducts the research as needed to estimate the impact of legislative and policy changes. The SACs also serve in a liaison role, assisting BJS with data gathering from respondent Agencies within their States. The 2018 Budget proposes \$41 million for the Criminal Justice Statistics Program.

Regional Information Sharing System (RISS).—RISS is a National criminal intelligence system operated by and for State and local law enforcement agencies. The RISS regional centers facilitate information sharing and communications to support member Agency investigative and prosecution efforts by providing state-of-the-art investigative support and training, analytical services, specialized equipment, secure information-sharing technology, and secure encrypted email and communications capabilities to over 6,000 municipal, county, State, and Federal law enforcement agencies nationwide. The 2018 Budget proposes \$30 million for this program.

The 2018 Budget requests \$940.5 million for the Office of Justice Programs' (OJP) State and Local Law Enforcement Assistance appropriation. Of this amount, \$73 million is derived by transfer from the Crime Victims Fund. The grant and payment programs supported by this account help American communities address high-priority criminal justice concerns such as violent crime, criminal gang activity, illegal drugs, and law enforcement officer safety. These programs, coupled with training and technical assistance activities, assist State, local, and tribal law enforcement, courts, criminal justice agencies, and faith-based and community organizations in preventing and addressing violent crime, protecting the public, and ensuring that those convicted of crimes are held accountable for their actions. OJP State and Local Law Enforcement Assistance funding will be used to support programs such as:

Adam Walsh Act Program.—This program helps State, local, and tribal jurisdictions to develop and enhance sex offender registration and notification systems that are in compliance with the Sex Offender Registration and Notification Act through discretionary grants and technical assistance. The 2018 Budget proposes \$20 million for this program.

Byrne Justice Assistance Grants (JAG).—The Byrne Justice Assistance Grants program awards grants to State and local Governments to support a broad range of activities that prevent and control crime, including: law enforcement programs; prosecution and court programs; prevention and education programs; corrections and community corrections programs; drug treatment programs; and planning, evaluation, and technology improvement programs. The 2018 Budget proposes \$332.5 million for this program. Several well-known OJP programs, including the Body Worn Camera Partnership Program; Bulletproof Vest Partnership Program; the VALOR Initiative, a program that promotes officer safety; and the Smart Policing and Prosecution programs, are funded as carve-outs under the Byrne JAG program.

Victims of Trafficking.—This program supports comprehensive and specialized services for human trafficking victims as well multidisciplinary taskforces to identify, investigate, and prosecute these types of cases. The 2018 Budget proposes \$45 million for this program.

Residential Substance Abuse Treatment (RSAT).—The Residential Substance Abuse Treatment program for State prisoners helps States and units of local Government develop, implement, and improve residential substance abuse treatment programs in correctional facilities, and establish and maintain community-based aftercare services for probationers and parolees. Ultimately, the program's goal is to help offenders become drug-free and learn the skills needed to sustain themselves upon return to the community. The 2018 Budget proposes \$12 million for this program.

National Criminal History Improvement Program (NCHIP).—This program provides grants, training, and technical assistance that help States and Territories improve the quality, timeliness, and immediate accessibility of criminal history and related records. These records play a vital role in supporting the National Instant Criminal Background Check System (NICS) and helping Federal, State, local, and tribal law enforcement investigate crime and promote public safety. The 2018 Budget proposes \$53 million for this program.

Prison Rape Prevention and Prosecution Program.—This program supports efforts to implement the National Prison Rape Elimination Act (PREA) Standards and provides grants, training, and technical assistance to both grantees and the corrections field at large. This program also supports the development of a National set of measures by the Bureau of Justice Statistics (BJS) describing the circumstances surrounding incidents of sexual assault in correctional institutions. The data

The 2018 Budget proposes \$10 million for this program.

Veterans Treatment Court Program.—This program provides grants, training, and technical assistance to State, local, and tribal Governments to support the creation and development of veterans treatment courts to serve veterans struggling with addiction, serious mental illness, and/or co-occurring disorders. The 2018 Budget proposes \$6 million for this program.

Prescription Drug Monitoring Program.—The purpose of the Harold Rogers Prescription Drug Monitoring Program (PDMP) is to enhance the capacity of regulatory and law enforcement agencies to collect and analyze controlled substance prescription data. The 2018 Budget proposes \$12 million for this program.

National Sex Offender Public Website.—This program supports the maintenance and continued development of the Dru Sjodin National Sex Offender Public Website, which links the State, Territory, and tribal sex offender registries. The 2018 Budget proposes \$1 million for this program.

Justice Reinvestment Initiative.—Justice reinvestment is a data-driven approach to improve public safety, reduce corrections and related criminal justice spending, and reinvest savings in effective strategies that can decrease crime and strengthen neighborhoods. The initiative provides technical assistance and competitive financial support to States, counties, cities, and tribal authorities that are either currently engaged in justice reinvestment activities or are preparing to undertake such work. The 2018 Budget proposes \$22 million for this program.

Second Chance Act Program.—The Second Chance Act Program provides grants to establish and expand various adult and juvenile offender reentry programs and funds reentry-related research. The 2018 Budget proposes \$51,000,000 for this program.

Homicide Reduction Initiative.—This initiative is designed to use promising and evidence-based practices to address the urgent problem of domestic violence-related homicides by identifying high-risk offenders and providing an enhanced coordinated response to assist victims. For 2018, \$4,000,000 will be made available from the Grants to Encourage Arrest Policies Program.

Domestic Violence Firearms Lethality Reduction.—This initiative will identify and implement promising practices to improve the response of law enforcement, prosecutors, courts, and victim service providers in addressing the safety of victims in cases involving firearms. Demonstration projects will be funded in approximately 5 jurisdictions. For 2018, \$4,000,000 will be made available from the Grants to Encourage Arrest Program.

Sexual Assault Services Program.—This program provides funding for states and territories, tribes, state sexual assault coalitions, tribal coalitions, and culturally specific organizations. Overall, the purpose of this program is to provide intervention, advocacy, accompaniment, support services, and related assistance for adult, youth, and child victims of sexual assault, family and household members of victims, and those collaterally affected

VIOLENCE AGAINST WOMEN PREVENTION AND PROSECUTION PROGRAMS—Continued by sexual assault. The 2018 Budget proposes \$35,000,000 for this program.

Rural Domestic Violence Program.—This program enhances the safety of child, youth and adult victims of domestic violence, dating violence, sexual assault, and stalking by supporting projects uniquely designed to address and prevent these crimes in rural jurisdictions. The 2018 Budget proposes \$34,000,000 for this program.

Grants to Reduce Violence Crimes Against Women on Campus.—The Campus Program develops and strengthens victim services in cases involving violent crimes against women on campuses, and aims to strengthen security and investigative strategies to prevent and prosecute violent crimes against women on campuses. The 2018 Budget proposes \$20,000,000 for this program, of which \$8,000,000 is for a demonstration initiative to improve campus responses to sexual assault, dating violence, and stalking, which will include the use of campus climate surveys and will not be subject to the restrictions of section 304(a)(2).

Legal Assistance for Victims Grant Program.—The Legal Assistance Program increases the availability of civil and criminal legal assistance in order to provide effective aid to victims who are seeking relief in legal matters arising as a consequence of abuse or violence. The 2018 Budget proposes \$45,000,000 for this program.

Enhanced Training and Services to End Violence Against and Abuse of Women Later in Life.—This program provides or enhances training and services to address elder abuse, neglect, and exploitation, including domestic violence, dating violence, sexual assault, or stalking, involving victims who are 50 years of age or older. The 2018 Budget proposes \$5,000,000 for this program.

Education and Training to End Violence Against and Abuse of Women with Disabilities Grant Program.—The Disabilities Grant Program builds the capacity of jurisdictions to address domestic violence, dating violence, stalking and sexual assault against individuals with disabilities through the creation of multi-disciplinary teams. The 2018 Budget proposes \$6,000,000 for this program.

Consolidation of Youth-Oriented Programming.—This consolidated grant program consolidates the purpose areas of four programs under one competitive program. The four programs included in the consolidation include: Services to Advocate for and Respond to Youth, Grants to Assist Children and Youth Exposed to Violence, Engaging Men and Youth in Preventing Domestic Violence, and Supporting Teens through Education. This consolidation allows OVW to leverage resources for maximum impact in communities by funding comprehensive projects that include both youth service and prevention components. The 2018 Budget proposes \$11,000,000 for this program.

Indian Country-Sexual Assault Clearinghouse.—This funding will support the establishment and maintenance of a national clearinghouse on the sexual assault of American Indian and Alaska Native women. This project will offer a one-stop shop for tribes to request free on-site training and technical assistance. The 2018 Budget proposes \$500,000 for this program.

National Resource Center on Workplace Response.—The Violence Against Women Act of 2005 provided for an award to establish and operate a national resource center on workplace responses to assist victims of domestic and sexual violence. The center will provide information and assistance to employers and labor organizations to better equip them to respond to victims. The 2018 Budget proposes \$500,000 for this program.

Grants to Support Families in the Justice System.—This funding will provide comprehensive support to victims of domestic violence and child sexual abuse and their families in family law matters in the civil justice system, including safe visitation and exchange services, improved court responses, and legal assistance to victims, protective parents, and their children. This program represents a consolidation of the Safe Havens and Court Training and Improvements program. The 2018 Budget proposes \$16,000,000 for this program.

Tribal Special Domestic Violence Criminal Jurisdiction.—This grant program for tribal governments was first authorized in the Violence Against Women Reauthorization Act of 2013 (VAWA 2013). VAWA 2013 included an historic provision that recognizes the inherent power of "participating tribes" to exercise "special domestic violence criminal jurisdiction" over both Indians and non-Indians who assault Indian spouses, intimate partners, or dating partners, or who violate protection orders, in Indian country. To support tribes that chose to participate, the Act authorizes funding to strengthen tribal criminal justice systems, provide indigent defense counsel, develop appropriate jury pools, and assist victims. The 2018 Budget proposes \$2,500,000 for this program.

Rape Survivor Child Custody Act Program.—Directs the Attorney General to make grants to states that have in place a law that allows the mother of any child that was conceived through rape to seek court-ordered termination of the parental rights of her rapist with regard to that child, which the court shall grant upon clear and convincing evidence of rape. The 2018 Budget proposes \$2,500,000 for this program.

For 2018, funding requested for this account also will support Analysis and Research on Violence Against Indian Women, a program that is administered by the Office of Justice Programs and supports comprehensive research on violence against Native American women. The 2018 Budget proposes \$1,000,000 for this program.

Programs supported by the Crime Victims Fund provide compensation to victims of crime and survivors; support appropriate victims' services programs and victimization prevention strategies; and build capacity to improve response to crime victims' needs and increase offender accountability. The Fund was established to address the need for victim services programs, and to assist state, local, and tribal governments in providing appropriate services to their communities. The Fund is financed by collections of fines, penalty assessments, and bond forfeitures from defendants convicted of Federal crimes. The 2018 Budget proposes to provide \$3,000,000,000 from collections and balances for crime victim compensation, services, and related needs. Of this amount, the Budget proposes to use \$25,000,000 for Vision 21, which provides supplemental victims services and other victim-related programs and initiatives in areas like: research, legal services, capacity building, national and international victim assistance, and a new set-aside of five percent for grants and other assistance to Indian tribes to improve services and justice for victims of crime. Further, of the amounts available for obligation in 2018, \$445,000,000 is for transfer to the Office on Violence Against Women and \$165,000,000 is for transfer to the Office of Justice Programs. Up to three percent of funds available from the fund for obligation may be made available to the National Institute of Justice and the Bureau of Justice Statistics for research, evaluation, or statistical purposes related to crime victims and related programs.

Enacted in 2014, the Workforce Innovation and Opportunity Act (WIOA) is the primary authorization for this appropriation account. The Act is intended to provide job seekers and workers with the labor market information, job search assistance, and training they need to get and keep good jobs, and to provide employers with skilled workers. Funds appropriated for this account generally are available on a July to June program year basis, and include substantial advance appropriation amounts. This account includes:

Adult employment and training activities.—Grants to provide financial assistance to States and territories to design and operate training and employment assistance programs for adults, including low-income individuals and public assistance recipients.

Youth activities.—Grants to support a wide range of activities and services to prepare low-income youth for academic and employment success, including summer and year-round jobs. The program links academic and occupational learning with youth development activities.

Dislocated worker employment and training activities.—Grants to provide reemployment services and retraining assistance to individuals dislocated from their employment. The Budget provides funding for National Dislocated Worker Grants specifically targeted to communities in the Appalachian region.

Native Americans.—Grants to Indian tribes and other Native American groups to provide training, work experience, and other employment-related services to Native Americans.

Reintegration of Ex-Offenders.—Supports activities authorized under the Second Chance Act to help individuals exiting prison make a successful transition to community life and long-term employment through mentoring, job training, and other services. Using the authority of section 169 of the WIOA, the Department also provides competitive grants for a range of young ex-offenders and school dropouts, particularly those in high-poverty, high-crime areas with similar services. The Administration intends to devote funds to test and replicate evidence-based strategies for young ex-offenders. The Department of Labor will continue to coordinate closely with the Department of Justice and other relevant Agencies in carrying out the Ex-Offender program.

Apprenticeship Grants.—Activities that support Registered Apprenticeship programs at the state and local levels through a range of activities, such as state-specific outreach strategies, partnerships, economic development strategies, and expanded access to apprenticeship opportunities for under-represented populations through pre-apprenticeships and career pathways.

YouthBuild.—Grants that impart education and occupational skills to program participants by providing them with academic training and occupational skills training, providing a clear path into a chosen career field.

Technical Assistance.—Technical assistance activities to support WIOA implementation.

Established in 1964 as part of the Economic Opportunity Act and authorized by the Workforce Innovation and Opportunity Act of 2014 (P.L. 113–128, Title 1, Subtitle C, section 141), Job Corps is the nation's largest federally-funded, primarily residential, training program for at-risk youth. Job Corps operates centers in all 50 states, Puerto Rico, and the District of Columbia. Job Corps provides economically disadvantaged youth with academic, career technical and marketable skills to enter the workforce, enroll in post-secondary education, or enlist in the military.

Job Corps serves and trains approximately 50,000 participants each year while emphasizing the attainment of academic credentials which include: a High School Diploma (HSD) or General Educational Development (GED) and career technical credentials, industry-recognized certifications, state licensures, and pre-apprenticeship credentials. These portable credentials provide for long-term attachment to the workforce and economic mobility as Job Corps graduates advance through their careers. Furthermore, these

credentials ensure that program graduates have gained the skills and knowledge necessary to effectively compete in today's workforce.

Large and small businesses, nonprofit organizations, Native American organizations and Alaskan Native corporations manage and operate the majority of the Job Corps centers through contractual agreements with the Department of Labor, while the remaining centers are operated through an interagency agreement with the U.S. Department of Agriculture. In 2015, Job Corps opened two new centers in New Hampshire and Wyoming, the last two States without Job Corps centers. Job Corps participants must be economically disadvantaged youth, ages 16–24, and meet one or more of the following criteria: basic skills deficient; a school dropout; homeless, a runaway, or a foster child; a parent; or in need of additional education, vocational training, or intensive counseling and related assistance in order to participate successfully in regular schoolwork or to secure and hold employment.

The 2018 Budget will close chronically low-performing centers, saving funds and focusing the program on the operation of centers that have proven that they can successfully educate and prepare youth for jobs. The Budget also proposes to prioritize the enrollment of youth who are at least 20 years old, for whom the program has been proven to be more effective.

Unemployment compensation.—State administration amounts provide administrative grants to State agencies that pay unemployment compensation to eligible workers and collect State unemployment taxes from employers. These agencies also pay unemployment benefits to former Federal personnel and ex-servicemembers as well as trade readjustment allowances to eligible individuals. State administration amounts also provide administrative grants to State agencies to improve the integrity and financial stability of the unemployment compensation program through a comprehensive performance management system, UI Performs. The purpose is to effect continuous improvement in State performance and implement activities designed to reduce errors and prevent fraud, waste, and abuse in the payment of unemployment compensation benefits and the collection of unemployment taxes. National activities relating to the Federal-State unemployment insurance programs are conducted through contracts or agreements with the State agencies or non-State entities. A workload contingency reserve is included in State administration to meet increases in the costs of administering the program resulting from increases in the number of unemployment claims filed and paid. The appropriation automatically provides additional funds whenever unemployment claims workloads increase above levels specified in the appropriations language.

Employment service.—The public employment service is a nationwide system providing no-fee employment services to job-seekers and employers. State employment service activities are financed by grants provided by formula to States. Funding allotments are provided annually on a Program Year basis beginning July 1 and ending June 30 of the following year.

Employment service activities serving national needs are conducted through specific reimbursable agreements between the States and the Federal Government under the Wagner-Peyser Act, as amended, and other legislation. States also receive funding under this activity for administration of the Work Opportunity Tax Credit, as well as for amortization payments for those States that had independent retirement plans prior to 1980 in their State employment service agencies.

Years are program years running from July 1 of the year indicated through June 30 of the following year.

Foreign Labor Certification.—This activity provides for the administration and operation of the foreign labor certification programs within the Employment and Training Administration. Under these programs, U.S. employers that can demonstrate a shortage of qualified, available U.S. workers and that there would be no adverse impact on similarly situated U.S. workers may seek the Secretary of Labor's certification as a first step in the multi-agency process required to hire a foreign worker to fill critical

permanent or temporary vacancies. Major programs include the permanent, H-2A temporary agricultural, H-2B temporary non-agricultural, and H-1B temporary highly skilled worker visas. The account is divided into Federal and State activities.

Federal Administration.—Federal Administration provides leadership, policy, budget, program operations including staffing (Federal and contractors), information technology, three national processing center facilities, and operational direction to Federal activities supporting the effective and efficient administration of foreign labor certification programs.

State grants.—Provides grants to State workforce agencies in 54 States and U.S. territories funding employment-related activities required for the administration of Federal foreign labor certification programs. Includes State Workforce Agency posting and circulation of job orders and other assistance to employers in the recruitment of U.S. workers, processing of employer requests for prevailing wage determinations for the permanent and temporary programs, State safety inspection of housing provided by employers to workers, and State development of prevailing wage and prevailing practice surveys used to set wages and standards in a defined geographic area.

American Job Centers.—These funds are used to support the joint Federal-State efforts to improve the comprehensive American Job Center system authorized under WIOA. This system provides workers and employers with quick and easy access to a wide array of enhanced career development and labor market information services. A portion of these funds supports a joint initiative between the Employment and Training Administration and the Office of Disability Employment Policy to improve the accessibility and accountability of the public workforce development system for individuals with disabilities.

National Agricultural Workers Survey fee.—The Department of Labor conducts the National Agricultural Workers Survey (NAWS), which collects information annually about the demographic, employment, and health characteristics of the U.S. crop labor force. The information is obtained directly from farm workers through face-to-face interviews.

The Budget proposes authorizing legislation to establish and retain fees to cover the costs of operating the foreign labor certification programs, which ensure that employers proposing to bring in immigrant workers have checked to ensure that American workers cannot meet their needs and that immigrant workers are being compensated appropriately and not disadvantaging American workers. The ability to charge fees for these programs would give the Department of Labor a more reliable, workload-based source of funding for this function (as the Department of Homeland Security has), and would ultimately eliminate the need for discretionary appropriations. The proposal includes the following: 1) charge employer fees for its prevailing wage determinations; 2) charge employer fees for its permanent labor certification program; 3) charge employer fees for H-2B non-agricultural workers; and 4) retain and adjust the H-2A agricultural worker application fees currently deposited into the General Fund. The fee levels, including possible expedited processing fees, would be set via regulation to ensure that the amounts are subject to review. Given DOL OIG's important role in investigating fraud and abuse, the proposal also includes a mechanism to provide funding for OIG's work to oversee foreign labor certification programs.

This account provides for general fund financing of extended unemployment benefit programs under certain statutes. It is also the mechanism used to make general fund reimbursements for some or all of the benefits and administrative costs incurred for temporary Federal programs. These funds

are transferred from the Payments to the Unemployment Trust Fund account to a receipt account in the Unemployment Trust Fund (UTF) so that resources may be transferred to the Employment Security Administration Account in the UTF for administrative costs or to the Extended Unemployment Compensation Account in the UTF for benefit costs.

Short Time Compensation (STC), also known as work sharing, is a layoff aversion strategy that enables workers to remain employed and employers to retain their trained staff during times of reduced business activity. The Middle Class Tax Relief and Job Creation Act of 2012 codified and expanded the definition of STC. Under the STC program, workers receive a percentage of the unemployment benefits they would have received if totally unemployed based upon the percentage of reduction in their hours of work. States that had been operating an STC program before enactment of the Act had two and a half years to amend their laws to conform to the new definition (the deadline for conformity was August 2014). As an incentive for states to enact state STC programs and promote the use of STC, the Act provided for 100 percent reimbursement of STC benefit costs paid under state law for up to 156 weeks, or three years (reimbursement was subject to sequestration). Grant funding was also available to states whose permanent STC laws meet the new Federal definition (the application deadline was December 31, 2014).

This account provides mandatory general revenue funding for a temporary program established under the American Recovery and Reinvestment Act of 2009 (Public Law 111-5) and subsequently extended. This program paid a supplement of \$25 on every week of unemployment compensation. It was last extended in Public Law 111-157 and paid benefits through its December 7, 2010, with a phaseout period. As a result of adjudications, benefits continue to be paid but are minimal.

ADVANCES TO THE UNEMPLOYMENT TRUST FUND AND OTHER FUNDS

For repayable advances to the Unemployment Trust Fund as authorized by sections 905(d) and 1203 of the Social Security Act, and to the Black Lung Disability Trust Fund as authorized by section 9501(c)(1) of the Internal Revenue Code of 1986; and for nonrepayable advances to the revolving fund established by section 901(e) of the Social Security Act, to the Unemployment Trust Fund as authorized by 5 U.S.C. 8509, and to the "Federal Unemployment Benefits and Allowances" account, such sums as may be necessary, which shall be available for obligation through September 30, 2019.

This appropriation makes available funding for repayable advances (loans) to two accounts in the Unemployment Trust Fund (UTF): the Extended Unemployment Compensation Account (EUCA) which pays the Federal share of extended unemployment benefits, and the Federal Unemployment Account (FUA) which makes loans to States to fund unemployment benefits. In addition, the account has provided repayable advances to the Black Lung Disability Trust Fund (BLDTF) when its balances proved insufficient to make payments from that account. The BLDTF now has authority to borrow directly from the Treasury under the trust fund debt restructuring provisions of Public Law 110-343. Repayable advances are shown as borrowing authority within the UTF or the BLDTF, and they do not appear as budget authority or outlays in the Advances to the Unemployment Trust Fund and Other Funds account.

This appropriation also makes available funding as needed for nonrepayable advances to the Federal Employees Compensation Account (FECA) to pay the costs of unemployment compensation for former Federal employees and ex-servicemembers, and to the Federal Unemployment and Benefits and Allowances (FUBA) account to pay the costs of benefits and services under the Trade Adjustment Assistance for Workers (TAA) program. These advances are shown as budget authority and outlays in the Advances account. The 2014 appropriations language included new authority for non-repayable advances to the revolving fund for the Employment Security Administration Account (ESAA) in the Unemployment Trust Fund. In turn, this revolving fund may provide repayable, interest-bearing advances to the ESAA account if it runs short of funds, and the borrowing authority will enable ESAA to cover its obligations despite seasonal variations in the account's receipts.

Advances were needed for the FUA and EUCA accounts in fiscal year 2014, and the Department estimates that no advances will be necessary in 2017 and 2018. Detail on the nonrepayable advances is provided above; detail on the repayable advances is shown separately in the UTF account.

To address the potential need for significant, and somewhat unpredictable advances to various accounts, the Congress appropriates such sums as necessary for advances to all of the potential recipient accounts. The fiscal year 2018 request continues this authority.

PROGRAM ADMINISTRATION

For expenses of administering employment and training programs, \$104,378,000, together with not to exceed \$49,887,000 which may be expended from the Employment Security Administration Account in the Unemployment Trust Fund.

Note.—A full-year 2017 appropriation for this account was not enacted at the time the budget was prepared; therefore, the budget assumes this account is operating under the Further Continuing Appropriations Act, 2017 (P.L. 114-254). The amounts included for 2017 reflect the annualized level provided by the continuing resolution.

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund (UTF). The UTF has one account for the railroad unemployment insurance system but for the Federal-State unemployment insurance system there are 57 separate accounts: one for each of the 50 states, three jurisdictions (District of Columbia, Puerto Rico, Virgin Islands) and four federal accounts. The state and jurisdiction accounts receive funds from a state unemployment insurance payroll tax which is used to pay benefits. The Federal Unemployment Tax Act (FUTA) payroll tax provides funds for two of the Federal accounts - the Employment Security Administration Account (ESAA) and the Extended Unemployment Compensation Account (EUCA) while the remaining two, the Federal Unemployment Account (FUA) and the Federal Employee Compensation Account (FECA) are revolving accounts.

Except for FECA balances, funds on deposit in the UTF accounts are invested in Government securities until needed for payment of benefits or administrative expenses. FUTA is deposited in the ESAA which retains 80 percent of the deposit and pays the costs of Federal and State administration of the unemployment insurance system, veterans' employment services, surveys of wages and employment, foreign labor certifications and about 97 percent of the costs of the Employment Service. The other 20 percent of FUTA is transferred to EUCA which pays for certain extended benefit (EB) payments. During periods of high State unemployment, there is a stand-by program of EB, financed one-half by State unemployment taxes and one-half by the FUTA payroll tax.

The UTF also provides repayable advances (loans) to the States and jurisdictions from FUA when the balances in their individual accounts are insufficient to pay benefits. Federal accounts in the UTF may receive repayable advances from the general fund when they have insufficient balances to make advances to States, pay the Federal share of extended unemployment benefits, or pay for State and Federal administrative costs.

The Federal Employees Compensation Account (FECA) in the UTF provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel, Postal Service employees, and ex-servicemembers. In turn, the various Federal agencies reimburse FECA for benefits paid to their former employees. FECA is not funded out of Federal unemployment taxes. Any additional resources necessary to assure that the FECA account can make the required payments to States are provided from the Advances to the Unemployment Trust Fund and Other Funds appropriation.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the UTF, and receipts from a tax on railroad payrolls are deposited into the program's account in the UTF to meet expenses.

Minimum Solvency Standard.—Since the end of the most recent recession, many states continue to struggle to maintain adequate Unemployment Insurance (UI) Trust Fund balances. The Budget includes a proposal to add a minimum solvency standard in the UI program to help address the challenge states face in maintaining sufficient balances in their Unemployment Trust Fund accounts. This proposal would strengthen states' incentive to adequately fund their UI systems by making states that fail to maintain an Average High-Cost Multiple (AHCM) of 0.5 for two consecutive January

firsts subject to FUTA tax credit reductions under the same schedule that states which go below a zero trust fund balance face currently.

UI Program Integrity Package.—The Budget includes a package of program integrity proposals similar to those included in the proposed Unemployment Compensation Program Integrity Act, which the Department sent to Congress last year in response to the UI program's three consecutive years of high improper payment rates. Specifically, the package includes the following proposals:

Require states to use SIDES.—This proposal will require state UI agencies to use the State Information Data Exchange System (SIDES) to exchange information with employers concerning reasons for a claimant's separation from employment.

Require states to cross-match against the NDNH.—This proposal will require state UI agencies to use the National Directory for New Hires in their claims to better identify individuals continuing to claim unemployment compensation after returning to work, one of the leading root causes of UI improper payments.

Allow the Secretary of Labor to establish UI corrective actions.—This proposal will allow the Secretary of Labor to require states to implement corrective action measures for poor state performance in the UI program, helping to reduce improper payments in states with the highest improper payment rates. Currently, the Secretary has very limited options to require state UI agencies to take actions to respond to poor performance and high improper payment rates.

Require states to cross-match with SSA's prisoner database.—Under current law, state UI agencies' use of cross-matches is permissible and the Social Security Administration's (SSA) Prisoner Update Processing System (PUPS) is currently only used by some states for UI verification. Requiring states to cross-match claims against the PUPS or other repositories of prisoner information will help identify those individuals ineligible for benefits due to incarceration and reduce improper payments.

Allow states to retain 5 percent of UI overpayments for program integrity use.—This proposal will allow States to retain 5 percent of overpayment recoveries to fund program integrity activities in each state's UI program. This provides an incentive to states to increase detection and recovery of improper payments and provides necessary resources to carry out staff-intensive work to validate crossmatch hits as required by law.

Require states to use penalty and interest collections solely for UI administration.—This proposal will require states to deposit all penalty and interest payments collected through the UI program into the state's Unemployment Trust Fund account and require the funds be used for improving state administration of the UI program and reemployment services for UI claimants. States with high improper payment rates would be required to use a portion of the funds for program integrity activities. Currently, states have discretion to use these funds for non-UI purposes.

Reemployment Services and Eligibility Assessments (RESEA).—The Budget includes a proposal to make the RESEA program a permanent program that states are required to operate in conjunction with their UI program. It will provide mandatory funding to states to provide RESEAs for the one-half of UI claimants profiled as most likely to exhaust benefits and for transitioning veterans receiving Unemployment Compensation for Ex-military Members (UCX) benefits. Funding for this proposal will begin in 2019; discretionary funding for these activities is provided in 2018.

Offset Overlapping UI and Disability Insurance Benefits.—The Budget includes a proposal to reduce an individual's entitlement to a Disability Insurance benefit in any month in which the individual also receives an unemployment compensation benefit.

Paid Parental Leave.—The Budget includes a proposal to establish a Federal-state paid parental leave benefit program within the unemployment insurance (UI) program that would begin in 2020. The program will provide six weeks of benefits for mothers, fathers, and adoptive parents. The benefit

is provided to help families recover from childbirth and to bond with their new children.

The Pension Benefit Guaranty Corporation (PBGC) is a Federal corporation established under the Employee Retirement Income Security Act of 1974, as amended. It guarantees payment of basic pension benefits earned by more than 40,000,000 American workers in two separate insurance programs. The single-employer program protects about 30,000,000 workers and retirees in over 22,000 pension plans. The multiemployer program protects over 10,000,000 workers and retirees in about 1,400 pension plans. The Corporation receives no funds from general tax revenues. Operations are financed by insurance premiums paid by companies that sponsor defined benefit pension plans, investment income, and assets from terminated plans. PBGC is requesting \$522,917,000 in spending authority for administrative purposes in 2018. The request includes costs for increased cybersecurity and a repeat of the 2017 request for funds available over five years to support the acquisition of a new PBGC headquarters lease as a full-year appropriation had not been enacted at the time the budget was produced.

Protecting Multiemployer Participants.—The Budget will include proposed changes to PBGC's premiums that would raise \$21,248,000,000 over the budget window.

Specifically, the Budget proposes to create a variable-rate premium (VRP) and an exit premium in the multiemployer program. A multiemployer VRP would require plans to pay additional premiums based on their level of underfunding- as is done in the single-employer program. An exit premium assessed on employers that withdraw from a plan would compensate the insurance program for the additional risk imposed on it when employers exit. Premium rate changes would be phased-in over the ten year Budget window. PBGC would have limited authority to design waivers for some or all of the variable rate premium assessed to terminated plans or ongoing plans that are in critical status, if there is a substantial risk that the payment of premiums will accelerate plan insolvency resulting in earlier financial assistance to the plan. Aggregate waivers for a year would be limited to 25% of anticipated total multiemployer variable rate premiums for all plans.

The Budget also calls for the repeal of provisions accelerating fiscal year 2026 premiums into fiscal year 2025 and repeals the requirement for certain multiemployer premium revenues to be held in non-interest bearing investments. The Budget will instead accelerate premium payments in both the single and multiemployer programs from fiscal year 2028 into fiscal year 2027.

Plan Preservation Efforts.—PBGC works to preserve plans and keep pension promises in the hands of the employers who make them. When companies undertake major transactions that might threaten their ability to pay pensions, PBGC negotiates protections for their pension plans. Last year, PBGC worked with dozens of companies, both in bankruptcy and otherwise, to preserve their plans that were at risk. In 2016, PBGC:

—Helped to protect 55,000 people by encouraging companies to keep their plans when they emerged from bankruptcy;

—Negotiated almost \$3,000,000,000 in financial assurance to protect more than 367,000 people in plans at risk; and

—Conducted reviews of plan sponsor calculations for plans that end through standard terminations, resulting in almost 940 participants receiving corrected benefit amounts totaling \$4,500,000.

Stepping in to Insure Pensions When Plans Fail.—When plans do fail, PBGC steps in to ensure that a portion of benefits continue to be paid. Over the years, PBGC has become responsible for almost 1,500,000 people in nearly 4,800 failed plans. In 2016, PBGC:

—Paid \$5,700,000,000 to almost 840,000 retirees in more than 4,700 failed single-employer plans;

—Provided \$113,000,000 in financial assistance to 65 multiemployer pension plans covering the benefits of 59,000 participants (an additional 27,000 workers in these multiemployer plans will receive guaranteed benefits when they retire) over the past year; and

—Assumed responsibility for more than 46,000 people in 76 trustee single-employer plans

Single-employer benefit payments.—The single-employer program protects about 30,000,000 workers and retirees in about 22,000 pension plans. Under this program, a company may voluntarily seek to terminate its plan, or PBGC may voluntarily seek to terminate its plan, or PBGC may seek termination. The PBGC must seek termination when a plan cannot pay current benefits. A plan that cannot pay all benefits may be ended by a "distress" termination, but only if the employer meets tests proving severe financial distress, such as proving that continuing the plan would force the company to go out of business. If a terminated plan cannot pay at least the PBGC-guaranteed level of benefits, PBGC uses its funds to ensure that guaranteed benefits are paid. A sponsor may terminate a plan in a "standard" termination only if plan assets are sufficient to pay all benefits. In a standard termination, the sponsor closes out the plan by purchasing annuities from an insurance company or by paying benefits in a lump sum.

Multiemployer financial assistance.—The multiemployer insurance program protects over 10,000,000 workers and retirees in about 1,400 pension plans. Multiemployer pension plans are maintained under collective bargaining agreements involving unrelated employers, generally of the same industry. If a PBGC insured multiemployer plan is unable to pay guaranteed benefits when due, the PBGC will provide the plan with financial assistance (a loan to the plan) to continue paying guaranteed benefits.

Investment management fees.—PBGC contracts with professional financial services corporations to manage Trust Fund assets in accordance with an investment strategy approved by PBGC's Board of Directors. Investment management fees are determined by the amount of assets under management. They are a direct, programmatic expense required to maintain the Trust Fund which supports single-employer benefit payments.

Consolidated Administrative Budget.—PBGC's administrative budget comprises all expenditures and operations that support:

- Benefit payments to pension plan participants
- Financial assistance to distressed multiemployer pension plans
- Stewardship and accountability

These operations include premium collections, pre-trusteeship work, efforts to preserve pension plans, recovery of assets from former plan sponsors, and pension insurance program protection activities. This area also covers the expenditures that support activities related to trusteeship; plan asset management (excluding investment management fees) and trust accounting; as well as benefit payments and administration services. Finally, this area includes the administrative functions covering procurement, fin-

ancial management, human resources, facilities management, communications, legal support, and information technology infrastructure. These funds support the operations of the Pension and Plan Sponsor Advocate as well as the Inspector General and funding to support the required functions and efforts of that office, including training and participation in Council of the Inspector Generals on Integrity and Efficiency (CIGIE) activities.

The 2018 Budget proposes changes to PBGC premiums that would raise \$21 billion. The Budget proposes to create a new variable rate premium (VRP) and an exit premium in the multiemployer program, estimated to raise an additional \$16 billion in premium revenue over the budget window. This level of additional multiemployer premium revenue is expected to be sufficient to fund the multiemployer program for the next 20 years. In addition, the Budget proposes to accelerate the plan year 2027 payment date for both single and multiemployer premiums by one month while reversing a prior change in the payment date for plan year 2025 premiums.

In 2010, the Department of Labor abolished the Employment Standards Administration (ESA) to streamline administration of the programs. As the Department was reinvigorating its enforcement of worker protection laws, this reorganization supported the Administration's Worker Protection efforts by eliminating redundant management efforts by elevating program issues directly to the Secretarial level. It also reflected the importance of these programs and increased enforcement supporting the Secretary's Worker Protection goals. The Consolidated Appropriations Act, 2012 (P.L. 112-74) accepted the Administration's proposal to replace the appropriation for the Employment and Standards Administration by four individual appropriations for the component agencies and offices previously under the heading "Employment Standards Administration Salaries and Expenses." In the 2014 Budget, funding was requested separately for the Office of Workers' Compensation Programs, Wage and Hour Division, Office of Federal Contract Compliance Programs, and Office of Labor-Management Standards.

Federal Employees' Compensation Act benefits.—The Federal Employees' Compensation Act program provides monetary and medical benefits to Federal workers who sustain work-related injury or disease. Not all benefits are paid by the program, since the first 45 days of disability are usually covered by keeping injured workers in pay status with their employing agencies (the continuation-of-pay period). A workers' compensation case is created following the receipt of an injury report or claim for occupational disease. In 2018, the FECA Program projects to create 110,300 cases for Federal workers or their survivors; 17,500 Federal employees are projected to submit initial wage-loss claims; and 40,000 are projected to receive long-term wage replacement benefits for job-related injuries, diseases, or deaths. Most of the costs of this account are charged back to the beneficiaries' employing agencies.

Longshore and harbor workers' compensation benefits.—Under the Longshore and Harbor Workers' Compensation Act, as amended, the Federal Government pays from direct appropriations one-half of the increased benefits provided by the amendments for persons on the rolls prior to 1972. The remainder is provided from the special fund which is financed by private employers, and is assessed at the beginning of each calendar year for their proportionate share of these payments.

Energy Employees' Compensation Act benefits.—The Department of Labor is delegated responsibility to adjudicate and administer claims for benefits under the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA). In July 2001, the program began accepting claims from employees or survivors of employees of the Department of Energy (DOE) and of private companies under contract with DOE who suffer from a radiation-related cancer, beryllium-related disease, or chronic silicosis as a result of their work in producing or testing nuclear weapons. The Act authorizes a lump-sum payment of \$150,000 and reimbursement of medical expenses.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108-767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered under section 5 of the Radiation Exposure Compensation Act. Benefit payments under Part E began in 2005.

Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA) administration.—Under Executive Order 13179 the Secretary of Labor is assigned primary responsibility for administering the EEOICPA program, while other responsibilities have been delegated to the Departments of Health and Human Services (HHS), Energy (DOE), and Justice (DOJ). The Office of Workers' Compensation Programs (OWCP) in the Department of Labor (DOL) is responsible for claims adjudication, and award and payment of compensation and medical benefits. DOL's Office of the Solicitor provides legal support and represents the Department in claimant appeals of OWCP decisions. HHS is responsible for developing individual dose reconstructions to estimate occupational radiation exposure, and developing regulations to guide DOL's determination of whether an individual's cancer was caused by radiation exposure at a DOE or atomic weapons facility. DOE is responsible for providing exposure histories at employment facilities covered under the Act, and other employment information. DOJ assists claimants who have been awarded compensation under

the Radiation Exposure Compensation Act to file for additional compensation, including medical benefits, under EEOICPA.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108–767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered by the Radiation Exposure Compensation Act. Administrative expenses for Part E are covered through indefinite, mandatory appropriations provided in P.L. 108–767.

The Carl Levin and Howard P. "Buck" McKeon national Defense Authorization Act of 2015 (P.L. 113–291) amended EEOICPA to include Section 3687, creating the Advisory Board on Toxic Substances and Worker Health to advise the Secretary of Labor (as delegated by Executive Order 13699) with respect to technical aspects of the EEOICPA program. The Advisory Board is charged with advising the Secretary on four statutorily-specific technical issues related to EEOICPA: DOL's site exposure matrices; medical guidance for claims examiners; evidentiary requirements for claims under subtitle B related to lung disease; and the work of industrial hygienists and staff physicians and consulting physicians to ensure quality, objectivity, and consistency.

Title IV of the Federal Mine Safety and Health Act authorizes monthly benefits to coal miners disabled due to coal workers' pneumoconiosis (black lung), and to their widows and certain other dependents. Part B of the Act assigned the processing and paying of claims filed between December 30, 1969 (when the program originated) and June 30, 1973 to the Social Security Administration (SSA). P.L. 107–275 transferred Part B claims processing and payment operations from SSA to the Department of Labor's Office of Workers' Compensation Programs. This change was implemented on October 1, 2003.

This fund was established to provide for the accumulation of funds to meet the Panama Canal Commission's obligations to defray costs of workers' compensation which will accrue pursuant to the Federal Employees' Compensation Act (FECA). On December 31, 1999, the Commission was dissolved as set forth in the Panama Canal Treaty of 1977; however, the liability of the Commission for payments beyond that date did not end with its termination. The establishment of this fund, into which funds were deposited on a regular basis by the Commission, was in conjunction with the transfer of the administration of the FECA program from the Commission to the Department of Labor, effective January 1, 1989.

The trust fund consists of all monies collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act of 1981, as amended by the Consolidated Omnibus Budget Reconciliation Act of 1985, in the form of an excise tax on mined coal. These moneys are expended to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability. In addition, the fund pays all administrative costs incurred in the operation of Part C of the Black Lung program. The fund is administered jointly by the Secretaries of Labor, Treasury, and Health and Human Services. The Emergency Economic

Stabilization Act of 2008, enacted on October 3, 2008, authorized restructuring of the Black Lung Disability Trust Fund (BLDTF) debt by (1) extending the current coal excise tax rates of \$1.10 per ton on underground-mined coal and \$0.55 per ton on surface-mined coal until December 31, 2018; (2) providing a one-time appropriation for the BLDTF to repay the market value of parts of the outstanding repayable advances and accrued interest; and (3) refinancing the remainder of the outstanding debt through the issuance of zero-coupon bonds, to be retired using the BLDTF's annual operating surplus until all of its remaining obligations have been paid.

The trust funds consist of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and—pursuant to an annual assessment of the industry—for the general expenses of the fund under the Longshore and Harbor Workers' Compensation Act (LHWCA), as amended.

These trust funds are available for payments of additional compensation for second injuries. When a second injury is combined with a previous disability and results in increased permanent partial disability, permanent total disability, or death, the employer's liability for benefits is limited to a specified period of compensation payments, after which the fund provides

SPECIAL WORKERS' COMPENSATION EXPENSES—Continued

continuing compensation benefits. In addition, the fund pays one-half of the increased benefits provided under the LHWCA for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

The Wage and Hour Division enforces the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act (FLSA), the Migrant and Seasonal Agricultural Worker Protection Act (MSPA), the Family and Medical Leave Act (FMLA), certain provisions of the Immigration and Nationality Act (INA), the wage garnishment provisions in Title III of the Consumer Credit Protection Act (CCPA), and the Employee Polygraph Protection Act (EPPA). The Division also determines prevailing wages and enforces employment standards under various Government contract wage standards, including the Davis-Bacon and Related Acts (DBRA) and the McNamara-O'Hara Service Contract Act (SCA). Collectively, these labor standards cover most private, state, and local government employment. They protect over 135,000,000 workers in more than 7,300,000 establishments throughout the United States and its territories.

OFCCP administers Executive Order 11246, as amended, which prohibits employment discrimination on the basis of race, religion, color, sex, and/or national origin; Section 503 of the Rehabilitation Act of 1973, as amended, and the Americans with Disabilities Act of 1990 (ADA), as amended, which prohibit employment discrimination against individuals with disabilities; and the Vietnam Era Veterans' Readjustment Assistance Act of 1974, as amended, which prohibits employment discrimination against protected veterans. OFCCP monitors contractors' compliance through reporting requirements and compliance evaluations. The 2018 Budget proposes merging OFCCP into the Equal Employment Opportunity Commission (EEOC), creating one agency to combat employment discrimination. OFCCP and EEOC will work collaboratively to coordinate this transition to the EEOC by the end of FY 2018. This builds on the existing tradition of operational coordination between the two agencies. The transition of OFCCP and integration of these two agencies will reduce operational redundancies, promote efficiencies, improve services to citizens, and strengthen civil rights enforcement.

The Office of Labor-Management Standards (OLMS) receives and discloses reports of unions, union officers and employees, employers, labor consultants and others in accordance with the Labor Management Reporting and Disclosure Act (LMRDA), including union financial reports and employer and consultant activity reports; audits union financial records and investigates possible embezzlements of union funds; conducts union officer election investigations; supervises reruns of union officer elections pursuant to voluntary settlements or after court determinations that elections were not conducted in accordance with the LMRDA; and administers the statutory program to certify employee protection provisions under various Federally-sponsored transportation programs. In 2018, OLMS plans continued efforts to advance transparency and financial integrity protections, primarily through audits, investigations and compliance assistance efforts. OLMS will ensure that Federally sponsored transportation grants are processed in a timely manner providing requisite protection to employees against adverse impacts as a result of federal assistance.

Safety and Health Standards.—This activity provides for the protection of workers' safety and health through development, promulgation, review, and evaluation of occupational safety and health standards and guidance, as specified under the Occupational Safety and Health Act of 1970 (OSH Act). Before any standard is proposed or promulgated, a determination is made that: (1) a significant risk of serious injury or health impairment exists; (2) the standard will reduce this risk; (3) the standard is economically and technologically feasible; and (4) the standard is economically and technologically feasible when compared with alternative regulatory proposals providing equal levels of protection. This activity also ensures, through the SBREFA process, that small business concerns are taken into account in the process of developing standards.

Federal Enforcement.—This activity provides for ensuring the protection of employees through the enforcement of workplace standards promulgated under the OSH Act, through the physical inspection of worksites, and by providing guidance on how to comply with the requirements of OSHA standards. Enforcement programs are targeted to the investigation of imminent danger situations and employee complaints, investigation of fatal and catastrophic accidents, programmed inspections of firms with injury

and illness rates that are above the national average, and special emphasis inspections for serious safety and health hazards. OSHA's enforcement strategy ranges from a selective targeting of inspections and related compliance activities to specific high hazard industries and worksites.

Whistleblower Programs.—This activity provides for the enforcement of twenty-two whistleblower protection statutes, including Section 11(c) of the OSH Act, which prohibits any person from discharging or in any manner retaliating against any employee because the employee has exercised rights under the Act, including complaining to OSHA and seeking an OSHA inspection, participating in an OSHA inspection, and participating or testifying in any proceeding related to an OSHA inspection. In addition to the OSH Act, this activity includes administration of twenty-one other whistleblower protection statutes that protect employees who report violations of various airline, commercial motor carrier, consumer product, environmental, financial reform, food safety, health care reform, nuclear, pipeline, public transportation agency, railroad, maritime, automotive manufacturing, and securities laws.

State Programs.—This activity supports states in assuming responsibility for administering occupational safety and health programs under State Plans approved by the Secretary. Under section 23 of the OSH Act, grants matching up to 50 percent of total program costs are made to States that meet the Act's criteria for establishing and implementing State programs that are at least as effective as the Federal OSHA program. State programs, like Federal OSHA, provide a mix of enforcement, outreach, training, and compliance assistance activities.

Technical Support.—This activity provides support for OSHA's emergency response activities, including responses to oil spills, hurricanes, tornados, and other natural or man-made disasters. This activity provides specialized technical expertise and advice in support of a wide range of program areas, including construction, standards setting, variance determinations, compliance assistance, and enforcement. Areas of expertise include laboratory accreditation, industrial hygiene, occupational health nursing, occupational medicine, chemical analysis, equipment calibration, safety engineering, environmental impact statements, technical and scientific databases, computer-based outreach products, and emergency preparedness.

Federal Compliance Assistance.—This activity supports a range of training, outreach, and cooperative programs that provide compliance assistance for employers and employees in protecting workers' safety and health, with particular emphasis on high-hazard industries, small business, and other hard-to-reach workers. OSHA works with employers and employees through cooperative programs such as the Voluntary Protection Programs that recognize employers with exemplary safety and health programs, and Alliances and Strategic Partnerships that commit organizations to collaborative efforts with OSHA. This activity also provides assistance to federal agencies in implementing and improving their job safety and health programs. Occupational safety and health training is provided at the OSHA Training Institute and affiliated Education Centers throughout the country. Compliance and technical assistance materials are prepared and disseminated to the public through various means, including the Internet.

State Compliance Assistance: Consultation Grants.—This activity supports 90 percent federally funded cooperative agreements with designated State agencies to provide free on-site consultation to small and medium-sized employers upon request. State agencies tailor workplans to specific needs in each State while maximizing their impact on injury and illness rates in smaller establishments in high-hazard industries. These projects offer a variety of services, including safety and health program assessment and assistance, hazard identification and control, and training of employers and their employees.

Safety and Health Statistics.—This activity supports information technology infrastructure, management of information, OSHA's webpage and web-based compliance assistance services, and the statistical basis for OSHA's programs and field operations. These are provided through an integrated data network and statistical analysis and review. OSHA administers and maintains the recordkeeping system that serves as the foundation for

SALARIES AND EXPENSES—Continued

the BLS survey on occupational injuries and illnesses and provides guidance on recordkeeping requirements to both the public and private sectors.

Executive direction and administration.—This activity supports executive direction, planning and evaluation, management support, legislative liaison, interagency affairs, federal agency liaison, administrative services, and budgeting and financial control.

Enforcement.—The enforcement strategy in 2018 will be an integrated approach toward the prevention of mining accidents, injuries, and occupational illnesses. This includes inspection of mines and other activities as mandated by the Federal Mine Safety and Health Act of 1977 (Mine Act), as amended by the Mine Improvement and New Emergency Response Act of 2006 (MINER Act), special emphasis initiatives that focus on persistent safety and health hazards, promulgation of federal mine safety and health standards, investigation of serious accidents, and on-site education and training. The desired outcome of these enforcement efforts is to prevent

death, disease, and injury from mining and promote safe and healthful workplaces for the Nation's miners.

Office of Assessments.— This activity assesses and collects civil monetary penalties for violations of safety and health standards and manages MSHA's accountability, special enforcement, and investigation functions.

Educational Policy and Development.— This activity develops and coordinates MSHA's mine safety and health education and training policies, and provides classroom instruction at the National Mine Health and Safety Academy for MSHA personnel, other governmental personnel, and the mining industry.

Technical Support.— This activity applies engineering and scientific expertise through field and laboratory forensic investigations to resolve technical problems associated with implementing the Mine Act and the MINER Act. Technical Support administers a fee program to approve equipment, materials, and explosives for use in mines and performs field and laboratory audits of equipment previously approved by MSHA. It also collects and analyzes data relative to the cause, frequency, and circumstances of mine accidents.

Program Evaluation and Information Resources (PEIR).— This activity provides program evaluation and information technology resource management services for the agency.

Program Administration.— This activity performs general administrative functions and is responsible for meeting performance requirements and developing MSHA's performance plan and Annual Performance Report.

Under the JVA, grants are allocated to States according to the statutory formula to support Disabled Veterans' Outreach Program (DVOP) specialists and Local Veterans' Employment Representatives (LVERs).

Disabled Veterans' Outreach Program specialists (38 U.S.C. 4103A) provide intensive services to meet the employment needs of eligible veterans. DVOP specialists place maximum emphasis on assisting veterans with significant barriers to employment, or other populations defined by the Secretary or through appropriations language.

Local Veterans' Employment Representatives (38 U.S.C. 4104) conduct outreach to employers, employer associations, and business groups to promote the advantages of hiring veterans. LVERs also facilitate employment, training, and placement services provided to veterans under the applicable State employment service delivery system, including American Job Centers by educating all workforce partner staff on current employment initiatives and programs for veterans. In addition, each LVER provides reports to the manager of the State employment service delivery system and to the State Director for Veterans Employment and Training (38 U.S.C. 4103) regarding the State's compliance with Federal law and regulations with respect to special services and priorities for eligible veterans.

Transition Assistance Program (TAP).—This program provides employment workshops for separating service members and their spouses in the continental U.S. and at major overseas installations to prepare these individuals for entry into the civilian workforce and job market. Its primary goal is to expedite and facilitate the transition from military to civilian employment. VETS coordinates with the Departments of Defense, Veterans Affairs, and Homeland Security to provide transition services to military service members separating from active duty. TAP is implemented worldwide and provides labor-market and employment-related information and other services to separating service members and their spouses. TAP now includes an optional two-day Career Technical Training Track (CTTT)

VETERANS EMPLOYMENT AND TRAINING—Continued

workshop, for transitioning service members interested in technical careers. This program is conducted consistent with the existing TAP Interagency Memorandum of Understanding.

Federal management.—VETS' Federal management budget activity supports the Federal administration of 38 U.S.C. §§ 41, 42, and 43. This allows VETS to carry out programs such as the Jobs for Veterans State Grants and develop policies to provide employment and training opportunities designed to meet the needs of veterans (38 U.S.C. 4102–4115). It also enables VETS to discharge its responsibilities to administer, interpret, and help enforce the Uniformed Services Employment and Reemployment Rights Act of 1994 (USERRA), 38 U.S.C. §§ 4301–4335, in which it provides technical assistance and investigates complaints received from veterans and service members who believe their employment and reemployment rights were violated. In addition, this budget activity enables VETS to investigate complaints received from preference eligibles who believe their veterans' preference rights in Federal hiring pursuant to the Veterans' Employment Opportunities Act of 1998 (VEOA), 5 U.S.C. § 3330a, were violated. VETS' Federal Contractor Program (VETS-4212) is also supported under this activity, pursuant to 38 U.S.C. § 4212. These responsibilities involve administering a system whereby Federal contractors submit reports setting forth their affirmative action efforts to hire and retain eligible veterans in their employ.

Resources under this activity are also used to evaluate the job training and employment assistance services provided to veterans under the Jobs for Veterans State Grants (38 U.S.C. 4102A(b)(5)), and the Homeless Veterans Reintegration Program (Section 738 of the Stewart B. McKinney Homeless Assistance Act (MHAA) of July 1987, and amended by Section 5 of the Homeless Veterans Comprehensive Assistance Act (HVCAA of 2001)). This budget activity supports field activities and personnel who provide technical assistance to grantees to ensure they meet negotiated and mandated performance goals and other grant provisions.

This budget activity also supports the oversight and development of policies for TAP (10 U.S.C. 1144 and 38 U.S.C. 4113). The activity funds outreach and education efforts, such as job fairs, that raise the awareness of employers about the benefits of hiring veterans. The activities of the Advisory Committee for Veterans Employment, Training, and Employer Outreach (38 U.S.C. 4110) also are supported.

National Veterans' Employment and Training Services Institute.—The National Veterans' Training Institute (NVTI) supplies competency-based training to Federal and State providers of services to veterans (38 U.S.C. 4109). NVTI also provides training for VETS personnel. NVTI is administered through a contract and supported by dedicated funds. NVTI ensures that these service providers receive a comprehensive foundation so they can effectively assist job-seeking veterans.

Homeless Veterans' Reintegration Program.—The Homeless Veterans' Reintegration Program (HVRP) (38 U.S.C. 2021) provides grants to States or other public entities, as well as to non-profits, including faith-based organizations. Grant awards enable grantees to operate employment programs to reach out to homeless veterans assist in reintegrating homeless veterans into meaningful employment within the labor force and to stimulate the development of effective service delivery systems that will address the complex problems facing homeless veterans. VETS partners with the Departments of Veterans Affairs and Housing and Urban Development to promote multi-agency-funded programs that integrate the different services needed by homeless veterans. HVRP grants are provided for both urban and rural areas.

Departmental Support Systems.—This activity represents a permanent, centralized IT investment fund for the Department of Labor managed by the Chief Information Officer. The fund supports enterprise-wide IT security enhancements that facilitate a centrally managed IT environment with increased risk mitigation parameters to protect the integrity of DOL data and network availability. These efforts are achieved through several new and ongoing projects mandated by executive and congressional directives.

IT Infrastructure Modernization.—This Chief Information Officer-managed activity funds the effort to transform nine major independently funded and managed IT infrastructure silos at the sub-agency level into a unified IT infrastructure. The unified infrastructure will be centrally managed and

provide all agencies with general purpose business productivity tools, a shared environment for common data sources, and the underlying IT services to support it.

Federal Funds

ALL OTHER GENERAL FUND PROPRIETARY RECEIPTS INCLUDING BUDGET CLEARING ACCOUNTS

The Budget proposes authorizing legislation to establish and retain fees to cover the costs of operating the foreign labor certification programs, which ensure that employers proposing to bring in immigrant workers have checked to ensure that American workers cannot meet their needs and that immigrant workers are being compensated appropriately and not disadvantaging American workers. The ability to charge fees for these programs would give the Department of Labor a more reliable, workload-based source of funding for this function (as the Department of Homeland Security has), and would ultimately eliminate the need for discretionary appropriations. The proposal includes the following: 1) charge employer fees for its prevailing wage determinations; 2) charge employer fees for its permanent labor certification program; 3) charge employer fees for H-2B non-agricultural workers; and 4) retain and adjust the H-2A agricultural worker application fees currently deposited into the General Fund. The fee levels, including possible expedited processing fees, would be set via regulation to ensure that the amounts are subject to review. Given DOL OIG's important role in investigating fraud and abuse, the proposal also includes a mechanism to provide funding for OIG's work to oversee foreign labor certification programs.

DEPARTMENT OF STATE AND OTHER INTERNATIONAL PROGRAMS

The Department of State, the U.S. Agency for International Development (USAID) and other international programs help to advance the national security interests of the United States by building a more democratic, secure, and prosperous world. The FY 2018 Budget supports core activities while refocusing attention on the highest priorities and strategic objectives. These include: investing in critical embassy security and maintenance needs in order to safeguard Federal employees overseas; meeting our commitment to Israel; supporting U.S. national security in efforts to defeat ISIS; asserting U.S. influence as we lead in addressing humanitarian crises; fostering opportunities for U.S. economic interests by combatting corruption and ensuring a level playing field for American businesses; and ensuring effectiveness and accountability to the U.S. taxpayer. The FY 2018 Budget proposes to reduce or end direct funding for international programs and organizations whose missions do not substantially advance U.S. foreign policy interests. The Budget also renews attention on the appropriate U.S. share of international spending at the United Nations, at the World Bank, and for many other global issues where the U.S. currently pays more than its fair share. Additionally, this budget request focuses on making the Department of State and USAID leaner, more efficient, and more effective, and streamlines international affairs agencies more broadly through the elimination of Federal funding to several smaller agencies. The FY 2018 Budget will allow the State Department and USAID to support their core missions, while ensuring the best use of American taxpayer dollars in ways that advance national security as we work to build a more prosperous and peaceful world.

Diplomatic and Consular Programs (D&CP) are financed by this appropriation, fees for services, and reimbursements from other agencies (including for administrative and other services provided by the Department of State). As in previous years, two-year funding is requested for this account, except for funds requested for Worldwide Security Protection (WSP), which are to remain available until expended. D&CP is the Department of State's primary operating account and funds a broad range of activities from policy setting, planning and design, to implementation and operations and maintenance. The 2018 request includes base funding for the State Department operations in Iraq, Afghanistan, Pakistan, and other High Threat Posts (HTP). The balance of the funding requested for operations in Iraq, Afghanistan, Pakistan, and other HTP is included in the Overseas Contingency Operations (OCO) account request for the D&CP account.

Funds are requested in the following categories:

Human Resources.—This category supports American salaries at overseas and domestic United States diplomatic missions, including Department of State employees carrying out security protection activities. Professional development and training is a continuous process by which the Department ensures that its professionals have the skills, experience and judgment to fulfill its functions at all levels. Training programs are designed to provide employees with the specific functional area and language skills needed for the conduct of foreign relations in the Department and abroad. This activity also supports the management, recruitment, and performance evaluation of Foreign and Civil Service employees (including efforts to attract a diverse applicant pool) and locally employed staff.

Overseas Programs.—This category provides funding for the operational programs of all the regional bureaus of the Department of State, which are responsible for managing United States foreign policy through bilateral and multilateral relationships. Funds made available for 2018 will support 275 United States embassies, consulates, and other diplomatic posts worldwide. Resources for this activity are used to provide for: the political and economic reporting and analysis of interests to the United States; the representation of U.S. diplomatic and national interests to countries abroad; and the bilateral and multilateral negotiation of U.S. foreign policy objectives, including the hosting of and participation in various international conferences, meetings and other multilateral activities in the United States and abroad. Resources in this appropriation support the conduct of international informational programs of the United States. These resources are used to define, explain and advocate U.S. policies abroad and to seek to increase knowledge and understanding among foreign audiences of U.S. society and its values. This activity also encompasses medical programs for the Department of State, the Foreign Service and other U.S. Government departments and agencies overseas. Centralized funding for travel and transportation of effects associated with the assignment, transfer, home leave and separation of the Department's personnel and dependents is also included in this activity. This category also supports reconstruction and stabilization activities of the Conflict Stabilization Operations (CSO) Bureau.

Diplomatic Policy and Support.—This category supports the operational programs of the functional bureaus of the Department of State, which includes providing overall policy direction, coordination, and program management among United States missions abroad in pursuit of regional and global foreign policy objectives, including the hosting of various international conferences and meetings in the United States and abroad. Resources also fund the management of U.S. participation in arms control, nonproliferation, and disarmament negotiations and other verification and compliance activities, in addition to funds otherwise available for such purposes. The information management activity in D&CP includes resources that are used for the creation, collection, processing, use, storage, and disposition of information required for the formulation and execution of foreign policy and for the conduct of daily business. Components of the information management activity include: telecommunications, information security, information system services, pouch, mail and publishing services for both unclassified and classified information. These activities include domestic and overseas execution of Department programs, such as budget and financial management, contracting and procurement, domestic facilities and vehicles, and rental payments to GSA.

Security Programs.—This category provides for the operation of security programs, including for Worldwide Security Protection (WSP) and the Bureau of Diplomatic Security, to protect diplomatic personnel, overseas diplomatic missions, residences, domestic facilities and information. The salaries paid to Department employees who carry out the security protection function worldwide are included in the Human Resources program activity. This activity identifies resources that are used in meeting security and counterterrorism responsibilities, both foreign and domestic. Programs covered in this activity include but are not limited to: security operations; engineering services, which are related to the technical defense of U.S. Government personnel and establishments abroad against electronic and physical attack; homeland security related activities; protection of Department personnel and foreign dignitaries; and physical security operations.

The Consular and Border Security Programs account (CBSP) uses revenue from consular fees and surcharges to fund programs and activities, consistent with applicable statutory authorities. These fees and surcharges include Machine Readable Visa (MRV) fees, Western Hemisphere Travel Initiative (WHTI) surcharges, Passport Security surcharges, Immigrant Visa Security surcharges, Diversity Visa Lottery fees, Affidavit of Support fees, and Expedited Passport fees. In FY 2017 and prior years, these fees were credited in the Diplomatic and Consular Programs account as spending authority from offsetting collections. The FY 2018 President's Budget proposes a new standalone account to display fee-funded consular programs independent of the larger Diplomatic and Consular Programs account be-

CONSULAR AND BORDER SECURITY PROGRAMS—Continued

gining in Fiscal Year 2019. This change will enable the Department to provide greater transparency and accountability in financial reporting on these fees and surcharges, facilitate budget estimates for these fees and surcharges, and more easily make the information available to users of budget information and other stakeholders. Section 7049 of the general provisions provides the legislative language to establish the new account and transfer authority to accounts under the heading Administration of Foreign Affairs.

These consular fees and surcharges support an array of activities that are vital to ensuring strong U.S. border security, including routine and emergency services for U.S. citizens overseas; the issuance of secure passports to U.S. citizens at 29 passport facilities and a partner network of more than 8,000 passport acceptance facilities domestically; the adjudication of visa applications; the prevention and detection of fraud involving visas and passports; and the Department's information technology programs. Together with the Department of Homeland Security, the Department of Justice, the Intelligence Community, Department of the Treasury, and the law enforcement community, the Department has built a layered visa and border security screening system that rests on training, technological advances, biometric innovations and expanded data sharing.

This appropriation provides funding for international exchange programs authorized by the Mutual Educational and Cultural Exchange Act of 1961, as amended, to support U.S. foreign, economic, and security policy objectives and to assist in the development of friendly, sympathetic, and peaceful relations between the United States and other countries. These goals are addressed by building increased mutual understanding through international exchange and professional development activities. Programs under this appropriation include:

Academic Programs.—Includes the J. William Fulbright Educational Exchange Program, which provides U.S. and foreign students, teachers, scholars, and administrators the opportunity to pursue degrees, teach, and conduct research in foreign and U.S. universities. Academic Programs also include English language programming and educational advising services. English language programs help train and develop foreign teachers of English, send Americans overseas to teach English and train instructors, teach English to disadvantaged students, and provide language learning materials and resources. Educational advising programming supports outreach to foreign students across the world to assist in the process of applying to U.S. universities. Additional academic programs such as the Benjamin A. Gilman International Scholarship Program provide opportunities for American participants with financial needs to study abroad.

Professional/Cultural Exchanges.—Includes exchanges linking U.S. and foreign participants in multiple fields directly tied to U.S. foreign policy goals. The International Visitor Leadership Program brings thousands of foreign leaders to the United States for intensive short-term professional exchanges to meet and confer with their American counterparts, gaining first-hand knowledge about U.S. society, culture and democratic values. Citizen Exchanges Program participants partner with an extensive network of organizations and experts from across the United States to conduct professional fellowships as well as arts, sports, and high school exchange programs focused on current and future leaders.

Youth Leadership Initiatives.—Includes programs targeting young private, public, and civil sector leaders in Africa, Southeast Asia and the Americas.

Program and Performance.—Provides resources and opportunities to ECA exchange program alumni to build on participant exchange experience, developing growing and active alumni association networks. Funds also support on-going program performance measurement and independent evaluations.

Exchanges Support.—Includes all domestic staff, overseas Regional Language Officers and support costs managed by ECA; as well as government-wide exchanges coordination.

Under the direction of the Secretary of State, the overall mission of the Bureau of Overseas Buildings Operations (OBO) is to provide U.S. diplomatic and consular missions abroad with safe, secure, and functional facilities that support the foreign policy objectives of the United States. Specific program functions include: providing guidance to posts, the regional bureaus and other foreign affairs agencies on the renovation, construction and operations of facilities; providing expert space and facilities planning; managing and overseeing the design, construction, and renovation of mission facilities; incorporating security features into overseas and domestic facilities; and ensuring the security of facilities during construction or renovation. In addition, OBO is responsible for establishing standards and policies for overseas housing, developing, in conjunction with posts, effective maintenance programs for post facilities, and monitoring and reporting the inventory of maintenance and backlog requirements. OBO also ensures the safety of the building occupants through the development of fire/life safety and accessibility compliance programs.

In 2018, the Department will manage the fourteenth year of the Capital Security Cost Sharing (CSCS) Program. This program has two main goals: accelerating the construction of new safe, secure and functional embassy and consulate compounds, and providing an incentive for all United States Government agencies to right-size their presence overseas through the use of cost-sharing. The \$2.2 billion program is consistent with the Benghazi Accountability Review Board's recommended funding level for the construction of new secure facilities overseas. Funding sources include ESCM regular base, the FY 2017 Security Assistance Appropriations Act, inter-agency contributions, and consular fee revenues.

The 2018 request continues the Maintenance Cost Sharing (MCS) Program to provide critically needed renovation, construction and repair of overseas facilities, to provide adequate working conditions for multi-agency staffs,

EMBASSY SECURITY, CONSTRUCTION, AND MAINTENANCE—Continued

and protect the U.S. taxpayer investment. MCS and CSCS are funded within a combined \$2.2 billion program in FY 2018.

The objective of the Asset Management Program is to obtain the best use of diplomatic and consular properties overseas through sale of surplus or underutilized properties and reinvestment of the proceeds in properties that provide a greater return to the U.S. Government and/or improve the safety of mission personnel. In lieu of appropriated resources, OBO uses asset sales proceeds for long-term capital investment to minimize the growth of U.S. Government leasehold requirements (through property acquisition) or to address a high-priority need for new construction or fit-out of leased space.

This appropriation also provides for capital expenditures necessary to preserve, maintain, repair, and plan for buildings owned or leased by the Department of State overseas.

The Taiwan Relations Act (Public Law 96–8) requires programs with respect to Taiwan to be carried out by or through the American Institute in Taiwan (AIT). AIT supports U.S. interests by promoting U.S. exports, economic and commercial services, and cultural and information exchange; facilitating military sales; providing consular related services for Americans and the people on Taiwan; and on behalf of the Department of State and various U.S. Government agencies, carrying out liaison with Taiwan's counterpart organizations.

The Department contracts with AIT to conduct commercial, cultural, and other relations with the people of Taiwan. Consular related expenses for AIT are funded with fee revenue from the Border Security Program.

The current appropriation finances any unfunded liability created by new or liberalized benefits, new groups of beneficiaries, and salary increases. The 2018 permanent appropriation provides a supplemental payment to the fund for disbursements attributable to the Foreign Service Pension System; and unfunded interest along with liability from military service for the Foreign Service Retirement and Disability System. In addition, the appropriation also finances the annual balance of the Foreign Service normal cost not met by employee and employer contributions. The amount of the appropriation is determined by the annual evaluation of the Fund balance derived from current statistical actuarial data, which includes inflationary cost-of-living adjustments.

The Foreign Service National Defined Contributions Fund (FSN DCF) is an after-employment benefit plan for Locally Employed Staff (LE Staff) working for the Department of State and other Foreign Affairs agencies. The purpose of the fund is to accumulate and distribute U.S. Government (USG)-funded contributions for end-of-service benefits for LE Staff in countries where U.S. missions have determined that participation in the local social security system (LSSS) is not in the public interest of the USG. The Department determines which countries are eligible to participate in the fund. Upon separation, payments under this Plan shall be made consistent with the host country law, including any court order affecting payments to participants, unless decided otherwise by the Department.

This fund, authorized by sections 13 and 23 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2684), finances on a reimbursable basis certain administrative services, such as printing and reproduction, editorial material, motor pool, operations and dispatch agencies operations, inter-agency cooperative administrative support services, acquisition services, information technology support, medical services, aviation services, special issuance passport services, and expenses of carrying out the Foreign Missions Act, including any acquisitions of property under the authority of the Foreign Missions Act.

Using the Working Capital Fund, the International Cooperative Administrative Support Services (ICASS) program was fully implemented in 1998. ICASS restructures overseas administrative support activities to allow more decision-making and managerial participation by all participating agencies, more equitable cost distribution, and incentives for efficient provision of services. Under ICASS, each agency represented at an overseas post chooses the services it wishes to receive and pays a proportional share of the cost of those services. Working through inter-agency councils at each overseas post, all agencies have a say in determining post administrative budgets and defining service standards, as well as reviewing costs and vendor performance.

The fund, as authorized by section 151 of Public Law 102-138 (22 U.S.C. 4012a), is maintained by annual government contributions from the Department's Diplomatic and Consular Programs (D&CP) account (including Program Direct, Public Diplomacy and Worldwide Security Protection resources), Consular Affairs (CA) Consular and Border Security Program (CBSP) fees, the International Narcotics Control and Law Enforcement (INCLE) account, and International Cooperative Administrative Support Services (ICASS) working capital fund that includes both State's D&CP and other agencies shares. Eligible local staff include former United States Agency for International Development (USAID) ICASS employees who were consolidated into the Department. The Department of State funds and manages its own FSNLTF separate and apart from any separation pay that may be provided by other agencies to non-State Locally Employed Staff (LE Staff).

This appropriation provides the U.S. share of operating expenses for ten treaty-based international fisheries commissions and organizations, two international marine science organizations, one whaling commission, the Arctic Council and the Antarctic Treaty Secretariat, as well as funding regional sea turtle and shark conservation, and travel expenses of non-government U.S. commissioners and their advisors. These commissions and organizations coordinate scientific studies of shared fish stocks and other living marine resources and their habitats and establish common management measures to be implemented by member governments based on their results. Many also oversee the allocation of fishing rights to their members. In addition, the Great Lakes Fishery Commission carries out a program to eradicate the invasive, parasitic sea lamprey. The marine science organizations coordinate international research on valuable fisheries, oceanography, and marine ecosystems and the results are publicly disseminated and used to advise member governments on fisheries and marine science policy.

The first phase of the President's Emergency Plan for AIDS Relief (PEPFAR), from 2004 to 2008, was the largest ever global public health initiative by a single country to fight the HIV/AIDS epidemic. Funding was appropriated in the Global HIV/AIDS Initiative account for this purpose through 2007. Beginning in 2008, funds were appropriated in the Global Health and Child Survival (now Global Health Programs) account, and will continue to be requested in that account.

The Global Health Programs account funds health-related foreign assistance for the Department of State (DOS) and the U.S. Agency for International Development (USAID). Global health programs seek to improve health outcomes by increasing impact through strategic integration and coordination; strengthening and leveraging multilateral institutions; encouraging country ownership and investing in country-led plans; building sustainability through health systems strengthening; improving metrics, monitoring and evaluation; and promoting research, development and innovation.

Global Health Programs-State.—The Global Health Programs (GHP-State) account supports the goal of controlling the HIV/AIDS epidemic through the President's Emergency Plan for AIDS Relief (PEPFAR). The 2018 Budget requests \$4.975 billion in the GHP-State account. PEPFAR is led by the Office of the Global AIDS Coordinator in DOS, which draws upon the expertise and experience of other USG partners such as the U.S. Agency for International Development (USAID), the Department of Health

GLOBAL HEALTH PROGRAMS—Continued

and Human Services, the Department of Defense, and the Peace Corps to align resources and expertise to the fight against global AIDS. Programs work through expanded partnerships to build capacity for effective, innovative, country-led, and sustainable services, and to create a supportive and enabling policy environment for combating HIV/AIDS, including as part of the broader USG and country-level health and development approach. In addition, PEPFAR supports implementation of strong monitoring and evaluation systems to set benchmarks for outcomes and programmatic efficiencies through regularly assessed planning and reporting processes to ensure goals are being met. PEPFAR programs support strategic, scientifically sound investments to rapidly scale up core HIV/AIDS prevention, care, and treatment interventions within the context of strengthened health systems, particularly in terms of human resources in nations with severe health worker shortages and lack of service delivery capacity. PEPFAR integrates its efforts with important programs in other areas of global health as well as other areas of development, including the areas of education, gender equity, and economic development. A contribution of \$1.125 billion to the Global Fund to Fight AIDS, Tuberculosis and Malaria is included in the GHP-State request.

Global Health Programs-USAID.—The 2018 Budget requests \$1.506 billion in the GHP-USAID account for a comprehensive and integrated approach to improve global health outcomes. USAID, working in partnership with foreign governments, local private sector and non-governmental organizations, and public-private partnerships, will build capacity, strengthen health systems, and promote sustainable integrated health care for vulnerable populations. Funding includes activities that support the goal of ending preventable child deaths in synergy with malaria and nutrition activities, addressing such issues as micronutrient deficiencies and community management of acute malnutrition. Activities will also address the threat of other infectious diseases such as tuberculosis and multi-drug resistant tuberculosis, and neglected tropical diseases in developing countries. In addition, the Budget proposes to make a portion of remaining Ebola emergency funding available to control malaria (\$250 million) and other emerging infectious diseases (\$72.5 million).

Overseas Assistance.—The majority of the Migration and Refugee Assistance (MRA) account addresses the protection and assistance needs of refugees, conflict victims, stateless persons, and vulnerable migrants worldwide. Funds primarily support the programs of international organizations, including the United Nations High Commissioner for Refugees (UNHCR), the International Committee of the Red Cross (ICRC), the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA), and the International Organization for Migration (IOM), as well as non-governmental organizations (NGOs).

Humanitarian Migrants to Israel.—These funds assist humanitarian migrants resettling in Israel.

US Refugee Admissions.—MRA funds overseas processing, transportation, and initial placement for refugees and certain other categories of special immigrants resettling in the United States. These activities are carried out primarily by NGO partners and IOM.

Administrative Expenses.—These funds finance the salaries and operating expenses in Washington, D.C. and overseas for the Bureau of Population, Refugees, and Migration. International Narcotics Control and Law Enforcement (INCLE) supports the safety and security of the United States through bilateral, regional, and global programs that mitigate security threats posed by illicit trafficking in narcotics, persons, and wildlife, and other pernicious forms of transnational crime. Programs bolster partner countries' criminal justice systems, including their ability to cooperate effectively with U.S. law enforcement, strengthen law enforcement and judicial capabilities, counter drug flows, combat transnational crime, and address the underlying conditions, such as corruption and weak rule of law, that foster state fragility and spur irregular migration to the United States. The 2018 INCLE budget supports Presidential policy priorities, including efforts to defeat ISIS, its affiliates, and other terrorist organizations by strengthening law enforcement and other criminal justice institutions in key countries as well as efforts to protect the safety of the United States and its citizens by combating transnational crime and trafficking, in alignment with Executive Order 13773, Enforcing Federal Law with Respect to Transnational Criminal Organizations and Preventing International Trafficking. The 2018 budget also continues important regional security initiatives such as the Central America Regional Security Initiative (CARSI), the Central Asia Counternarcotics Initiative, and the Caribbean Basin Security Initiative (CBSI), and maritime law enforcement in the South China Sea.

Established by the Millennium Challenge Act of 2003, the Millennium Challenge Corporation (MCC) has the statutory goal of providing assistance

MILLENNIUM CHALLENGE CORPORATION—Continued

to the poorest countries in the world to promote economic growth, eliminate extreme poverty, and strengthen good governance, economic freedom, and investments in people. Since its inception, MCC has signed 33 compacts and 26 threshold program agreements, totaling nearly \$12 billion. These investments help foster stability through economic growth and poverty reduction in partner countries. MCC encourages policy reforms by working with only those countries that have created the conditions for growth by ruling justly, investing in their people, and committing to economic freedom, with a particular emphasis on fighting corruption and maintaining democratic rights. Countries develop their poverty reduction proposals in broad consultation with their own civil society and MCC. MCC's evidence-based approach leads to compacts that specifically define the implementation responsibilities of partner countries, including financial accountability and transparent and fair procurement practices, and require measurable results to ensure that MCC assistance is used responsibly and effectively.

In order to streamline accounts and ensure the most effective use of foreign assistance funding, the 2018 budget incorporates funding and programs previously requested under the Economic Support Fund (ESF) and Development Assistance (DA) accounts within the new Economic Support and Development Fund (ESDF). The request prioritizes and focuses foreign assistance in regions and on programs that advance our national security while also continuing to assert U.S. leadership and influence, foster economic opportunities for U.S. business, and ensure efficiency, effectiveness, and accountability to the U.S. taxpayer. Programs will help countries of strategic importance meet near and long-term political, economic, development, and security needs.

The Pakistan Counterinsurgency Capability Fund (PCCF) was designed to build the counterinsurgency capabilities of Pakistan's security forces engaged in operations against militant extremists in the Federally Administered Tribal Areas (FATA) and Khyber-Pakhtunkhwa. While the counterinsurgency purpose underlying the PCCF account and the maintenance of close U.S. Pakistani military ties remain important Administration priorities, these needs have been met through other accounts, including Foreign Military Financing (FMF) and International Military Education and Training (IMET), since the FY 2014 Request.

The Global Security Contingency Fund (GSCF) permits the Department of State and the Department of Defense to combine resources and expertise to address emergent challenges and opportunities. The GSCF can be used to provide military and other security sector assistance to enhance a country's national-level military or other security forces' capabilities to conduct border and maritime security, internal defense, and counterterrorism operations, or to participate in or support military, stability, or peace support operations, consistent with U.S. foreign policy and national security interests. The GSCF can also be used to provide assistance to the justice sector (including law enforcement and prisons), rule of law programs, and stabilization efforts in cases where civilian providers are challenged in their ability to operate. Assistance programs under this account are collaboratively developed by the Department of State and the Department of Defense. The fund allows direct contributions from each Department to be transferred into the fund for implementation by the most appropriate agency in a given situation, be it State, Defense, the U.S. Agency for International Development, or others. The GSCF authority expires on September 30th, 2017 for new programming, but activities initiated under GSCF prior to that date continue to be implemented.

The Foreign Military Financing Direct Loan Program (FMFDLP) Account is a program account established pursuant to the Federal Credit Reform Act (FCRA) of 1990, as amended, to provide the funds necessary for the subsidy element of loans. As required by the Federal Credit Reform Act of 1990, this non-budgetary account records all cash flows to and from the Government resulting from direct loans for foreign military financing obligated in 1992 and after. The foreign military financing credit program provides loans that finance sales of defense articles, defense services, and design and construction services to foreign countries and international organizations. The amounts in this account are a means of financing and are not included in budget totals. Expenditures from this account finance the subsidy element of direct loan disbursements and are transferred into the Foreign Military Financing Direct Loan Financing (FMFDLF) Account to make required loan disbursements for approved FMS or commercial sales. The FMFDLF is a financing account used to make disbursements of Foreign Military Loan funds for approved procurements and for subsequent collections for loans after September 30, 1991. The account uses permanent borrowing authority from the U.S. Treasury combined with transfers of appropriated funds from the Foreign Military Financing Direct Loan Program (FMFDLP) Account to make required disbursements to loan recipient country borrowers for approved procurements. Receipts of debt service collections from borrowers are used to repay borrowings from U.S. Treasury.

The Foreign Military Loan Liquidating Account (FMLLA) is a liquidating account that records all cash flows to and from the Government resulting from direct loans obligated and loan guarantees for foreign military financing committed prior to 1992. This account is shown on a cash basis and reflects the transactions resulting from loans provided to finance sales of defense articles, defense services, and design and construction services to foreign countries and international organizations. No new loan disbursements are made from this account. Certain collections made into this account are made available for default claim payments. The Federal Credit Reform Act (FCRA) provides permanent indefinite authority to cover obligations for default payments if the liquidating account funds are otherwise insufficient. All new foreign military financing credit activity in 1992 and after (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year) is recorded in corresponding program and financing accounts.

As required by the Federal Credit Reform Act of 1990, the Military Debt Reduction Financing (MDRF) Account is a non-budgetary financing account that records all cash flows to and from the Government resulting from restructuring foreign military loans. The amounts in this account are a means of financing and are not included in budget totals. It is an account established for the debt relief of certain countries as established by Public Law 103-87, Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1994, Section 11, Special Debt Relief for the Poorest, Most Heavily Indebted Countries. The MDRF buys a portfolio of loans from the FMLLA, thus transferring the loans from the FMLLA Account to the MDRF Account.

The Clean Technology Fund (CTF) is a program under the Climate Investment Funds (CIFs) that aims to catalyze large-scale low-emission private and public investments in key developing country sectors by financing the incremental costs of commercially available cleaner technologies over conventional alternatives. The United States fulfilled its \$2.0 billion pledge to the CIFs in FY 2016 and does not intend to provide further contributions.

The Strategic Climate Fund (SCF) is a suite of three programs under the Climate Investment Funds (CIFs) to pilot innovative approaches and scaled-up activities aimed at addressing specific climate change-related challenges in developing countries. The SCF is one of the two multilateral CIFs, the other being the Clean Technology Fund. The United States fulfilled its \$2.0 billion pledge to the CIFs in FY 2016 and does not intend to provide further contributions. Programs under the SCF include the Pilot Program

for Climate Resilience (PPCR), which supports activities to improve resilience to climate change impacts in poor countries; the Forest Investment Program (FIP), which supports the protection of forests in developing countries through improved governance and forest management and by addressing the drivers of deforestation; and the Program for Scaling Up Renewable Energy in Low Income Countries (SREP), which supports clean energy projects to demonstrate their viability in poor countries.

The Global Agriculture and Food Security Program (GAFSP) is a multi-donor trust fund called for by G-20 leaders in 2009 to fund projects that support the agricultural investment plans of poor countries. GAFSP, which is administered by the World Bank, leverages the expertise and implementing structures of other multilateral institutions such as IFAD, the World Bank, and the regional development banks.

As of end-April 2017, GAFSP's public sector window has awarded \$1.18 billion in grant financing to 31 low-income countries in Africa, Asia, and Latin America to help smallholder farmers and their families increase their income and strengthen their nutritional outcomes. These grants were funded from contributions from Australia, the Bill and Melinda Gates Foundation, Canada, Ireland, South Korea, Spain, the United Kingdom, and the United States. The private sector window, which provides financing to small and medium-sized agribusinesses, has approved \$226.4 million of investments as of end-December 2016, funded from contributions from Canada, Japan, the Netherlands, the United Kingdom, and the United States.

The United States is the largest of 10 donors to GAFSP, having contributed \$645.2 million since GAFSP's inception. The United States contributed \$475 million towards the initial GAFSP pledge in 2009. In 2012, the U.S. pledged to contribute \$1 for every \$2 dollars in new contributions from other donors over the period of the pledge, up to a maximum of \$475 million. No new funding is required in 2018.

The International Bank for Reconstruction and Development (IBRD) is the arm of the World Bank that provides financing to creditworthy middle-income countries to promote inclusive economic growth and reduce poverty. Middle-income countries—home to over 70 percent of the world's poor—rely on the IBRD for financial resources and strategic advice to meet their development needs. Working across a range of sectors, including agriculture, sustainable infrastructure, health and nutrition, and education, the IBRD supports long-term human and social development needs that private creditors do not finance. During its 2016 fiscal year, the IBRD approved \$29.7 billion in loans and technical assistance. Latin America and the Caribbean (27 percent) and Europe and Central Asia (24 percent) received the largest portion of the IBRD's new lending, followed by East Asia and Pacific (17 percent) and Middle East and North Africa (17 percent). The United States is the largest shareholder in the IBRD, with a 15.8 percent share of total voting power, followed by Japan and China. The United States is the only country with veto power over amendments to the Articles of Agreement.

Global Environment Facility

The Global Environment Facility (GEF) is one of the largest dedicated funders of projects to improve the global environment, providing grants to address issues related to conservation, including wildlife trafficking, oceans, land degradation, chemical pollution and other environmental concerns. The GEF benefits the U.S. economy and environment by addressing many external environmental problems that affect our domestic health, safety, and prosperity; in addition, U.S. companies and consultants from many states have been involved in GEF projects overseas. The sixth replenishment to the GEF (GEF-6) began on July 1, 2014 and will conclude on June 30, 2018. The 2018 Budget requests \$102.4 million for the GEF towards the fourth of four installments to GEF-6.

International Finance Corporation

The International Finance Corporation (IFC) is the private sector focused part of the World Bank Group. Established in 1956, it promotes private sector development in developing countries by making loans and equity investments in private sector projects, mobilizing private capital alongside its own resources, and providing advisory and technical assistance services. In its 2016 fiscal year, the IFC approved \$11.1 billion from its own resources, and mobilized an additional \$7.7 billion from other sources, for 344 projects. More than 29 percent of IFC projects were located in the poorest countries (those eligible for funding from the World Bank's IDA) in 2016. IFC investments in 2016 were spread across the globe, with the largest recipient regions being Latin America and the Caribbean (24 percent), East Asia and the Pacific (21 percent), and Europe and Central Asia (19 percent). The top sectors for IFC investment in 2016 were financial markets (40 percent), infrastructure (16 percent), and agribusiness and forestry (10 percent).

Treasury requests \$1,097 million for the International Development Association (IDA) in support of IDA programs over the eighteenth replenishment (IDA-18; FY 2018-FY 2020), including towards the first of three installments to IDA-18.

CONTRIBUTION TO THE INTERNATIONAL DEVELOPMENT ASSOCIATION—Continued

IDA is the part of the World Bank that supports the growth and development of the world's 75 poorest countries. IDA works across a wide range of sectors including education, basic health, clean water and sanitation, the environment, infrastructure, and agriculture. Because countries receiving IDA financing are too poor to attract sufficient capital to support their urgent development needs, they depend on low-cost loans and grants to create jobs, build critical infrastructure, increase agricultural productivity, provide energy, and invest in the health and education of future generations. IDA's goal is to help countries reduce poverty and achieve higher levels of growth and institutional capacity. Over time, IDA's support helps countries finance their development needs through domestic revenues and borrowing at non-concessional rates. Since its inception, IDA has provided half a trillion dollars for investments in over 100 countries. As of the beginning of IDA-18, 36 countries once eligible for IDA assistance have graduated and no longer receive concessional support from IDA. Of the \$16.2 billion approved in IDA's 2016 fiscal year, more than half—\$8.7 billion—went to countries in sub-Saharan Africa. Countries in the South Asia region received \$4.7 billion, and \$2.3 billion went to countries in the East Asia and Pacific region. Eight percent of IDA's resources were provided as grants to fragile states and other countries at risk of debt distress in IDA's 2016 fiscal year.

Multilateral Debt Relief Initiative

Launched in 2006 at the urging of the United States, the Multilateral Debt Relief Initiative (MDRI) provides 100 percent cancellation of eligible debt to the concessional financing windows of the World Bank and the African Development Bank. Countries receive MDRI benefits after completing the reforms under the Heavily Indebted Poor Countries (HIPC) Initiative and demonstrating a track record of improved economic policy performance. The purpose of this debt reduction is to free up more resources in well-performing low-income countries for poverty-reducing expenditures in areas such as health, education, and rural development. MDRI requires donors to compensate IDA for the cancelled debt on a dollar-for-dollar basis according to the payment schedules of the original loans. IDA calculates donors' MDRI commitments at the start of each three-year replenishment cycle according to a burden-sharing percentage. Each donor's commitments to MDRI at IDA must be met within the three-year replenishment period to avoid a negative impact on IDA's financial capacity. With a 20.1 percent burden share, the U.S. share of the cost of MDRI under IDA-18 (FY 2018-FY 2020) is \$593 million.

The Multilateral Investment Guarantee Agency (MIGA) is a member of the World Bank Group designed to encourage the flow of foreign private investment to and among developing countries by issuing guarantees against non-commercial risks and carrying out investment promotion activities. In 2016, MIGA issued a total of \$4.3 billion in guarantees for projects in developing countries. Negotiations on MIGA's first general capital increase (GCI) were completed in 1998. The United States committed to contribute a total of \$30 million in paid-in capital and nearly \$140 million in callable capital over three years. The GCI decision included commitments from MIGA on a range of policy issues of substantial importance to the United

States, including environment, information disclosure, labor, and the creation of an inspection function for greater accountability and transparency. In 2000, the Administration sought and received congressional authorization for the United States' full participation in the MIGA GCI.

The Inter-American Development Bank (IDB) is the largest source of development financing for 26 countries in Latin America and the Caribbean, a strategically significant and economically important region for the United States where 73 million people live in poverty. In 2016, the IDB approved \$9.3 billion in financing for 86 sovereign-guaranteed projects. About 38 percent of commitments targeted small and vulnerable borrowing countries, such as El Salvador, Guyana, Honduras, and Jamaica. The IDB works in a range of sectors and commits roughly half of its funding to support infrastructure through projects in water and sanitation, transportation and energy. The other half is split between capacity building, including reform of government operations and financial markets, and social sectors, including social investment, health, and education. Given the IDB's significant response to the global financial crisis, in 2010, shareholders approved the ninth general capital increase (GCI-9) to ensure that the IDB had the resources necessary to assist countries that suddenly found themselves shut off from global capital markets. As part of the GCI-9 resolution, the IDB established a special grant facility for Haiti that will receive income transfers totaling \$2 billion from the IDB through 2020. This facility provides Haiti with critical resources to support its long-term development agenda. The United States is the largest shareholder in the IDB, with 30 percent of total shareholding, enabling the United States to wield significant influence over major decisions about the direction of the IDB.

Inter-American Investment Corporation

The Inter-American Investment Corporation (IIC), a member of the Inter-American Development Bank Group established in 1984, promotes development of the private sector in Latin America and the Caribbean. It is a legally autonomous entity whose resources and management are separate from those of the IDB itself. In 2016, the Structured and Corporate Finance

Department of the IDB was consolidated within the IIC, expanding the IIC's mandate from a focus on small- and medium-sized enterprises to include financing for private infrastructure and corporate entities. Until IIC is fully capitalized through additional contributions from some shareholders and net income transfers from the IDB, a portion of IIC's approvals will be booked on the IDB's balance sheet. In 2016, the IIC approved 162 projects totaling \$2.2 billion, booking \$443 million in new approvals to its own balance sheet and \$1.8 billion on the IDB's balance sheet. Since its inception, the IIC has approved a total of \$6 billion in financing.

The Asian Development Bank (AsDB) Group promotes broad-based sustainable economic growth and development, poverty alleviation, and regional cooperation and integration in the Asia-Pacific region. It has two main financing windows: 1) the Asian Development Bank's "hard-loan" window (known as the Ordinary Capital Resources (OCR) window); and 2) the Asian Development Fund's (AsDF) "soft-loan" window, which provides grants and lends at concessional rates to the region's poorest nations. Effective January 2017, AsDB now provides concessional loans to eligible countries through the OCR window, while the AsDF only provides grants to the region's poorest countries that are at moderate or severe risk of debt distress.

Asian Development Bank

The AsDB provides long-term loans at market rates to 23 middle-income Asian countries that lack the resources to finance their national economies and build critical infrastructure. The AsDB also supports private sector development with technical assistance, loans, guarantees, and direct equity investments in viable private sector projects with strong development im-

pacts. In 2016, the AsDB approved \$14.4 billion for projects and leveraged another \$14.1 billion in co-financing from official and commercial sources. Through its lending, the AsDB supports the construction of critical infrastructure, the expansion of private enterprise, and sustainable economic growth. The majority of AsDB assistance is for investments in transportation, energy, finance, industry and trade, with water supply, municipal infrastructure, agriculture and natural resources, and public sector management also receiving significant funding. The AsDB is financed through capital contributions from donors, income earned on its loan and investment portfolios and bond issuances. In April 2009, donors approved the AsDB's fifth general capital increase (GCI-V), which tripled the AsDB's capital base to \$165 billion. GCI-V was necessary to enable the AsDB to maintain an adequate level of lending after it increased lending to assist developing Asian countries to withstand the effects of the global financial crisis.

Asian Development Fund

Treasury requests \$47.4 million in support of AsDF programs over the eleventh replenishment (AsDF-12; FY 2018-FY 2021), including towards the first of four installments to AsDF-12.

The AsDF currently provides grants to 18 of the poorest countries in Asia and the Pacific that face moderate or high risk of debt distress, including Afghanistan and Burma. It focuses on supporting inclusive, sustainable economic growth, as well as regional cooperation and integration. Water, energy, and transportation infrastructure compose 48 percent of all AsDF projects, while financial sector deepening, agriculture, and health projects make up the remainder of AsDF grants. The AsDF also invests in cross-cutting activities, such as connecting entrepreneurial training with financing for small and medium-sized enterprises. In 2016, the Board approved \$3.2 billion in concessional loans and grants for AsDF-eligible countries. Cumulatively, AsDF has provided over \$50 billion for projects in developing member countries. As a result of the merger of AsDF's lending assets into the ordinary capital resources of AsDB on January 1, 2017, AsDF now provides only grants. In recent years, the United States has focused attention within AsDF on countries where support aligns with U.S. national security priorities.

The African Development Bank Group comprises 1) the African Development Bank (AfDB), which lends at market-linked rates to middle-income African countries and Africa's private-sector; and 2) the African Development Fund (AfDF), which provides grants and concessional loans to the poorest African countries. The AfDF account includes a portion of the U.S. commitment to the Multilateral Debt Relief Initiative (MDRI).

African Development Bank

Treasury requests \$32.4 million for the purchase of 2,170 shares towards the seventh of eight installments under the AfDB's Sixth General Capital Increase (GCI-6).

The AfDB provides public sector financing at market-linked rates to 20 middle-income African countries, and provides loans, equity investments, lines of credit, and guarantees to support private sector investments in all 54 African member countries. The AfDB had \$8.5 billion in lending approvals in 2016, approximately seventy percent of which was for public sector projects and thirty percent for private sector projects. Over forty percent of AfDB approvals are for infrastructure, including energy, transportation, communication, and water and sanitation. Other key sectors include finance, agriculture, and governance. The United States is the largest non-regional shareholder at the AfDB, with 6.6 percent of total shareholding, and the second-largest shareholder after Nigeria.

African Development Fund

Treasury requests \$171.3 million in support of AfDF programs over the fourteenth replenishment (AfDF-14; FY 2018-FY 2020), including towards the first of three installments to AfDF-14.

The AfDF is the AfDB Group's concessional lending window, providing grants and highly concessional loans to the poorest countries in Africa, of which nearly half are fragile or conflict-affected states. In 2016, the AfDF provided \$1.9 billion in financing, technical assistance, and capacity-building activities to the 38 eligible countries. Many AfDF recipient countries are African economies that are becoming new, emerging markets and growing U.S. trading partners, while other AfDF recipient countries remain trapped in fragility, conflict, and poverty, are highly vulnerable to both internal and external shocks, and are in need of special assistance to achieve basic levels of service delivery. The AfDF is one of the largest official financiers of infrastructure in sub-Saharan Africa, committing approximately half of its funding to national and regional infrastructure projects, in sectors such as energy, transport, and water and sanitation. The remainder of its funding is devoted to governance, agriculture and food security, and human capital development (e.g., health and education). The AfDF also sets aside special funding for regional projects and fragile and transitioning states; in total, approximately half of its resources are directed to fragile states.

Multilateral Debt Relief Initiative

Launched in 2006 at the urging of the United States, MDRI provides 100 percent cancellation of eligible debt to the concessional financing windows of the World Bank and the AfDB. Countries receive MDRI benefits after

completing the reforms under the HIPC Initiative and demonstrating a track record of improved economic policy performance. The purpose of this debt reduction is to free up more resources in well-performing low-income countries for poverty-reducing expenditures in areas such as health, education, and rural development. MDRI requires donors to compensate AfDF for cancelled debt under MDRI on a dollar-for-dollar basis according to the payment schedules of the original loans. Similar to IDA, AfDF calculates donors' MDRI commitments at the start of each three-year replenishment cycle according to a burden-sharing percentage. Donor commitments must be met within the three-year replenishment period to avoid a negative impact on the AfDF's commitment capacity. At 11.8 percent burden share, the U.S. share of the cost of MDRI under AfDF-14 (FYs 2018–2020) is \$74 million.

Created in 1990, the European Bank for Reconstruction and Development (EBRD) supports market-oriented economic reform and democratic pluralism, predominately through private-sector lending and investments. Its original field of operation in the countries of Central and Eastern Europe and the former Soviet Union was expanded in 2012 to aid in the transitions of key countries in the Middle East and North Africa. In April 1996, shareholders approved a doubling of the EBRD's capital base to EUR 20 billion (approximately \$24 billion). In 2012, the United States provided \$1.25 billion in callable capital to increase the capital base to EUR 30 billion and support increased demands resulting from the 2008 financial crisis.

The North American Development Bank (NADB) finances environmental infrastructure projects that have been certified by the U.S.-Mexico Border Environmental Cooperation Commission (BECC). BECC is NADB's sister institution and is designed to assist border states and local communities in identifying projects on both sides of the U.S.-Mexico border. To enhance efficiency and strengthen the environmental mandate of the NADB, the BECC is in the process of integrating with the NADB. In 2016, the NADB provided \$102.4 million in loans and grants in renewable energy, water and wastewater, air quality, storm drainage and urban infrastructure projects. As of December 2016, NADB had approved \$2.0 billion in loans.

Under its charter, the United States and Mexico contributed equally to NADB's capital—\$450 million in paid-in capital and \$2.55 billion in callable capital for a total capital base of \$3 billion. The current general capital increase would double NADB's capital base to \$6 billion. There is no new funding requested for NADB in FY 2018 due to budget constraints.

CONTRIBUTION TO ENTERPRISE FOR THE AMERICAS MULTILATERAL INVESTMENT FUND

The Multilateral Investment Fund (MIF), administered by the Inter-American Development Bank, provides grants, loans and equity investments to support private-sector development in Latin America and the Caribbean, with a focus on creating opportunities for poor and vulnerable populations. Grants and loans are used for technical assistance to identify innovative markets, products and business processes, investments in human capital, and business infrastructure and development. In 2016, the MIF approved 74 projects totaling \$86 million. Since its inception in 1992, the MIF has approved over 1,750 projects, for which the MIF provided approximately \$2 billion.

The United States has contributed \$624 million to the MIF since 1992. Negotiations concluded on a new replenishment in March 2017. The United States will not contribute to this round of funding, but will retain influence over past and new contributions through the legacy resources remaining from past contributions. The United States achieved its key objectives in the most recent negotiations: significantly increasing contributions from Latin American and Caribbean donors, strengthening the focus on poor and vulnerable populations, and increasing the efficiency of MIF operations.

Treasury requests \$30 million for the third of three installments towards the International Fund for Agricultural Development's tenth replenishment (IFAD-10).

IFAD was established in 1977 as a multilateral financial institution focused on promoting rural agricultural development and food security in poorer countries. IFAD's specific mandate is to help rural small-scale producers and subsistence farmers increase their productivity and incomes, improve food security, and integrate them into larger markets.

Pursuant to OTA's authorizing statute, OTA provides technical assistance to facilitate the implementation of policy, management, and administrative reforms in the areas of budget, revenue, government debt, financial institutions and financial enforcement to developing and transition countries. This assistance supports U.S. foreign policy and national security objectives.

The 2018 Budget includes \$25.5 million to fund full-time resident technical assistance advisors, intermittent advisors, and program-related administrative costs. The appropriation will support technical assistance programs in Asia, the Middle East, Africa, Latin America, and the Caribbean. It will enable the provision of technical assistance to developing and transition countries to strengthen the capacity of finance ministries, central banks, and other government institutions to manage public finances and oversee the financial sector. Technical assistance projects support efficient revenue collection, well-planned and executed budgets, judicious debt management, sound banking systems, and strong controls to combat corruption and economic crimes, including terrorist financing. The appropriation will also support Treasury's work to strengthen the financial underpinnings for infrastructure development. OTA will continue to coordinate its activities with the Department of State, USAID, and other relevant U.S. Government agencies as well as international financial institutions, and other bilateral donors when determining where its technical assistance program can have the greatest positive impact.

The International Organizations and Programs (IOP) account is used to provide non-assessed contributions to UN-affiliated and other international organizations and programs. In FY 2018, the Budget seeks to reduce or end direct funding to international organizations whose missions do not substantially advance U.S. foreign policy interests, are duplicative, or are

not well-managed. The FY 2018 Budget does not request funds for the IOP account.

Funds for debt restructuring are periodically needed to help countries reduce the burden of unsustainable debts, thereby establishing a sounder footing for economic growth. Debt relief and restructuring can be fundamental to helping countries stabilize their economies, restart economic growth, and alleviate poverty and instability. Through the Paris Club and programs such as the Heavily Indebted Poor Countries (HIPC) Initiative, countries that have demonstrated a commitment to economic reforms can benefit from debt restructuring. These programs have provided authority and appropriations to reschedule and/or reduce debt repayments to the U.S. Government.

Development Assistance Programs.—The Development Assistance (DA) account has been used to invest in partnerships that support ending extreme poverty and promoting resilient, democratic societies around the world. In an effort to streamline accounts and ensure the most effective use of foreign assistance funding, the 2018 Budget eliminates the DA account and incorporates funding for selected countries and programs previously requested under the Economic Support Fund (ESF) and DA accounts within the new Economic Support and Development Fund account. The 2018 Budget frees up funding for rebuilding the U.S. military and pursuing critical domestic priorities by focusing foreign assistance in regions and on sectors that advance our national security and our goal of defeating ISIS and other transnational terrorist groups, while also continuing to support key strategic partners and allies, foster economic opportunities for U.S. businesses, and ensure efficiency, effectiveness, and accountability to the U.S. taxpayer.

Prior to 2008, funds were appropriated to the Child Survival and Health Programs account to support activities that address family planning/reproductive health; child survival and maternal health, including activities directed at vulnerable children and the primary causes of morbidity and mortality, polio, micronutrients and iodine deficiency; preventing and treating infectious diseases such as malaria and tuberculosis; and reducing HIV transmission and the impact of the HIV/AIDS pandemic in developing countries. Additional funding for HIV/AIDS was appropriated in the Global HIV/AIDS Initiative account for this purpose through 2007. Beginning in 2008, funds for these activities were appropriated in the Global Health and Child Survival (now Global Health Programs) account, and will continue to be requested in that account.

The purpose of the Assistance for Europe, Eurasia and Central Asia (AEECA) account was to support programs to foster the democratic and economic transitions of the countries of Southeastern Europe and the independent states that emerged from the dissolution of the Soviet Union, as well as related efforts to address social sector reform and combat transnational threats in these countries. From 2013 through 2015, funding for the programs formerly funded through AEECA were included in the Economic Support Fund (ESF), International Narcotics Control and Law Enforcement (INCLE), and Global Health Programs (GHP) accounts. In 2016, Congress reinstated the AEECA account for those programs funded with ESF and INCLE; however the 2018 request proposes funding all of these programs through the Economic Support and Development Fund, INCLE, and GHP accounts.

The International Disaster Assistance (IDA) account provides funds to save lives, reduce human suffering, and mitigate and prepare for natural and complex emergencies overseas. Specifically, these funds provide for the management of humanitarian assistance, rehabilitation, disaster risk reduction, transition to development assistance programs, as well as emergency food interventions. Humanitarian relief interventions include,

but are not limited to, shelter, emergency health and nutrition, the provision of safe drinking water. Emergency food responses include interventions such as local and regional purchase of food near crises, the provision of U.S. commodities, food vouchers, or cash transfers and complementary activities that support the relief, recovery and resilience of populations affected by food crises. IDA programs target the most vulnerable populations who are affected by the shock of a disaster, including those who are internally displaced.

This request includes \$690.3 million, including \$279.6 million for the U.S. Agency for International Development (USAID) Office of U.S. Foreign Disaster Assistance and \$410.6 million for the USAID Office of Food for Peace for emergency food responses. (See the IDA account in the Overseas Contingency Operations section for information about the IDA-OCO funding request in FY 2018.)

The FY 2018 budget request eliminates the P.L. 480 Title II account. Providing emergency food aid through IDA has been shown to allow more appropriate and on average more cost effective assistance than Title II food aid. The IDA request will ensure that all food assistance programs are appropriate to local needs and will increase overall effectiveness.

The Budget also proposes to authorize use of a portion of the remaining emergency funding appropriated in FY 2015 for the Ebola response in West Africa (Public Law 113–325) to control malaria and other emerging infectious diseases. In FY 2018, \$322.5 million of these unobligated balances would be made available for these purposes. (See the Global Health Programs account for additional information.)

The Transition Initiatives (TI) account addresses opportunities and challenges facing conflict-prone countries and those countries making the transition from the initial crisis stage of a complex emergency to sustainable development and democracy. Programs are focused on advancing peace and stability, including promoting responsiveness of central governments to local needs, civic participation programs, media programs raising awareness of national issues, addressing underlying causes of instability, and conflict resolution measures. Recent country examples where TI funds were used include Nigeria, Somalia, Honduras, Syria, Burma, and Ukraine.

TI funding provides core operational funds for the Office of Transition Initiatives within the U.S. Agency for International Development Bureau for Democracy, Conflict, and Humanitarian Assistance.

The Fund, authorized by section 635(m) of the Foreign Assistance Act of 1961, finances on a reimbursable basis the costs associated with providing administrative support to other agencies under the International Cooperative Administrative Support Services (ICASS) program overseas. Under ICASS, each agency pays a proportional share of the cost of those services they have agreed to receive. Working through inter-agency councils

at post, all agencies have a say in determining which services the USAID mission will provide, defining service standards, reviewing costs, and determining funding levels. The Fund is also used for deposit of rebates from the use of Federal credit cards, the deposits then being made available for start-up costs at new ICASS service-provider missions and technical support to missions currently providing services.

As required by the Federal Credit Reform Act of 1990, this account records, for the Development Credit Authority, the subsidy costs associated with direct loans obligated and loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program and legacy USAID credit programs. The subsidy amounts are estimated on a net present value basis; the administrative expenses are estimated on a cash basis.

In 2018, the U.S. Agency for International Development (USAID) will use the Development Credit Authority (DCA) transfer authority to support

DEVELOPMENT CREDIT AUTHORITY—Continued

DCA projects in every region of the globe and every economic sector targeted by USAID. DCA augments grant assistance by mobilizing private capital in developing countries for sustainable development projects. Credit assistance under DCA is principally intended for use where a development activity is financially viable, where borrowers are creditworthy, and where there is true risk sharing with private lenders.

In 2018, the request for \$60 million in DCA transfer authority will continue to support the flow of credit to microfinance institutions, small and medium enterprises, and agribusinesses. DCA will also take advantage of more developed municipal capacity and capital markets to expand successful sub-sovereign financing models developed in Asia and Eastern Europe. The request for \$9.1 million in credit program administrative expenses will fund the total cost of development, implementation, and financial management of the DCA program, as well as the continued administration of USAID's legacy credit portfolios.

As part of the Administration's plans to move the Nation towards fiscal responsibility, to redefine the proper role of the Federal Government, and

to prioritize rebuilding the military and making critical investments in the Nation's security, the Budget proposes to eliminate funding for several independent agencies, as well as funding to support new loans and guarantees at the Overseas Private Investment Corporation. The Budget requests \$60.8 million to manage the agency's remaining \$22 billion portfolio and initiate orderly wind-down activities.

As part of the Administration's plans to move the Nation towards fiscal responsibility, to redefine the proper role of the Federal Government, and to prioritize rebuilding the military and making critical investments in the Nation's security, the Budget proposes to eliminate funding for several independent agencies, as well as funding to support new loans and guarantees at the Overseas Private Investment Corporation. Therefore, no subsidy funding is requested in FY 2018.

The Peace Corps will provide direct and indirect support to Americans serving as Volunteers in approximately 65 countries worldwide in 2018, including the necessary safety and security provisions for Volunteers, trainees, and staff. The 2018 budget supports recruitment, screening, and placement of Peace Corps trainees and sustains new and existing Volunteers to have approximately 7470 Americans enrolled in the Peace Corps by the end of 2018. The Volunteers help fill the trained manpower needs of developing countries and encourage self-sustaining development of skilled manpower. The Peace Corps also promotes mutual understanding between the peoples of the developing world and the United States and focuses the attention of the American people on the benefits of community service. Peace Corps Volunteers work primarily in the areas of agriculture, community economic development, education, environment, health and HIV/AIDS, and youth.

The Peace Corps Office of Inspector General provides independent oversight in accordance with the Inspector General Act of 1978, as amended. Through audits, evaluations and investigations the office prevents and detects waste, fraud, abuse and mismanagement; provides advice and

assistance to agency management; and promotes efficiency, effectiveness and economy in agency programs and operations.

This account transfers funds to the operating expense account for the Peace Corps to finance upward adjustments of recorded obligations because of foreign currency fluctuations. Transfers are made as needed to meet disbursement requirements in excess of funds otherwise available for obligation adjustment. Net gains resulting from favorable exchange rates are returned to this account and are available for subsequent transfer when needed. The account is replenished through the utilization of a special transfer authority that allows the Peace Corps to withdraw unobligated balances from the operating expenses account from prior years as long as the authorized limit of \$5 million is not exceeded at the time of the transfer.

The United States participates in the International Monetary Fund (IMF) through a quota subscription, denominated in Special Drawing Rights (SDRs). Under reforms to IMF quotas decided in 2010 and implemented by the IMF in early 2016 after Congress passed the necessary legislation ratifying the reforms, the U.S. quota at the IMF increased by SDR 40,871,800,000 (approximately \$55 billion using the current exchange rate) to SDR 82,994,200,000 (approximately \$112 billion using the current exchange rate). Quotas are the main metric used by the Fund to assign voting shares and to determine countries' contributions to the IMF's general resources and access to IMF financing.

The use of the U.S. quota resources by the IMF constitute an exchange of monetary assets and does not result in net budget outlays. When the United States transfers dollars or other reserve assets to the IMF under the U.S. quota subscription, the United States receives an equal, offsetting, and interest-bearing claim on the IMF, which is reflected as an increase in U.S. international monetary reserves. The U.S. reserve position in the IMF is readily available to meet a U.S. balance-of-payments financing need.

In 2010, G-20 Leaders and the IMF membership decided on a set of quota and governance reforms designed to enhance IMF effectiveness. The United States successfully achieved its negotiating priorities during this process: (1) a U.S. quota increase with a corresponding equivalent rollback in U.S. participation in the IMF's New Arrangements to Borrow (NAB) for no change in overall U.S. financial participation in the IMF; and (2) preservation of U.S. veto power in the IMF.

Title IX of The Department of State, Foreign Operations, and Related Programs Appropriations Act, 2016 (Public Law 114-113) directs that the budgetary authority and outlays of the 2016 quota increase be recorded on a present value basis with a fair value premium added to the discount rate. In addition, under the Act, the 2009 quota increase is also now executed on a present value basis.

For additional information, see the account entitled "United States Quota IMF Direct Loan Program Account", which addresses the 2009 appropriation, and on the budgetary treatment of the IMF, including the use of

present value, see the Budget Concepts chapter of Analytical Perspectives volume.

The Supplemental Appropriations Act, 2009 (Public Law 111-32) provided authorization and appropriations for an increase in the U.S. quota to the IMF by the dollar equivalent of SDR 4,973,100,000 (about \$6.7 billion using the current exchange rate). This increase in the U.S. quota entered into effect on March 25, 2011.

While the U.S. quota in the IMF is not a credit program, the Supplemental Appropriations Act of 2009 directed that the 2009 appropriation to increase the U.S. quota in the IMF be scored on a credit reform basis, per the Federal Credit Reform Act of 1990, as amended (FCRA), with an additional adjustment to the discount rate for market risk. The application of FCRA by operation of law to the 2009 quota appropriation was a significant change in the budgetary treatment of the U.S. quota to the IMF that only applied to the 2009 appropriations. Pursuant to Title IX of The Department of State, Foreign Operations, and Related Programs Appropriations Act, 2016 (Public Law 114-113), the 2009 direction to apply FCRA rules no longer applies to the 2009 quota appropriation, and the account was closed in 2016.

The General Arrangements to Borrow (GAB) were established in 1962 by 10 industrial countries, including the United States, as a means of supplementing the IMF's quota resources to forestall or cope with an impairment of the international monetary system. GAB participants decided in early 1983 to increase their financial commitments to the GAB from approximately SDR 6.3 billion to SDR 17 billion (about \$17.9 billion at that time), with the U.S. share rising from SDR 1.9 billion to approximately SDR 4.25 billion (about \$5.7 billion using the current exchange rate).

In January 1997, the Executive Board of the IMF approved the creation of the New Arrangements to Borrow (NAB), which is a standing arrangement among certain IMF members to supplement the IMF's quota resources as needed to forestall or cope with an impairment of the international monetary system or to deal with an exceptional situation that poses a threat to the stability of the system. The NAB became effective on November 17, 1998, and was activated for the first time in December 1998 to finance an IMF arrangement for Brazil. The IMF repaid the NAB participants in March 1999. From 1999 through March 2011 the NAB was not activated.

By the end of 2016, following reduction of the NAB as part of the 2010 IMF reforms (see the account entitled "United States Quota, International Monetary Fund"), 38 countries and institutions participated in the NAB for a total of SDR 181 billion (about \$244 billion), of which the U.S. share was approximately SDR 28 billion (about \$38 billion). The IMF began a six-month NAB activation period in October 2015, and deactivated the NAB in February 2016, before the end of the six-month period. As of end-2016, the IMF had accessed SDR 6.2 billion (about \$8.3 billion) of the U.S. arrangement under the NAB.

The sum of U.S. resources made available to the IMF under the NAB and GAB cannot exceed the total U.S. NAB participation.

With respect to this account, resources provided by the United States under the GAB and NAB constitute an exchange of monetary assets and do not result in any net budgetary outlays because such transactions result in an equivalent increase in U.S. international reserve assets in the form of an equal, offsetting, interest-bearing claim on the IMF. U.S. claims on the IMF under the GAB and NAB are readily available to meet a U.S. balance-of-payments financing need.

In 2010, G-20 Leaders and the IMF membership decided on a set of quota and governance reforms designed to enhance IMF effectiveness. The United States successfully achieved its negotiating priorities during this process: (1) a U.S. quota increase with a corresponding equivalent rollback in U.S. participation in the IMF's NAB for no change in overall U.S. financial participation in the IMF; and (2) preservation of U.S. veto power in the IMF.

Title IX of The Department of State, Foreign Operations, and Related Programs Appropriations Act, 2016 (Public Law 114–113) rescinds SDR 40,871,800,000 from U.S. participation in the NAB. The Act also directs that the budget authority and outlays of the NAB rescission be recorded on a present value basis with a fair value premium added to the discount rate. In addition, under the Act, the 2009 NAB increase is also now executed on a present value basis.

For additional information, see the account entitled "Loans to IMF Direct Loan Program Account", which addresses the 2009 appropriation, and for the budgetary treatment of the IMF, including the use of present value, see the Budget Concepts chapter of Analytical Perspectives volume.

At a Summit in London in April 2009, G-20 Leaders committed to expand participation and increase the size of the New Arrangements to Borrow (NAB) by up to \$500 billion to restore global confidence and ensure the IMF has adequate resources to play its central role in resolving and preventing the spread of international economic and financial crises. As part of this decision, the United States committed to increase its participation in the NAB by up to \$100 billion, which required congressional action. The Supplemental Appropriations Act, 2009 (Public Law 111–32) provided authorization and appropriations for an increase in the United States participation in the NAB by up to SDR 75 billion. This SDR amount was subject, as a practical matter, to the public commitment to an increase by up to \$100 billion. This increase in the U.S. participation in the NAB, equivalent to SDR 62.4 billion, entered into effect on March 11, 2011.

While the U.S. participation in the NAB is not a credit program, the Supplemental Appropriations Act, 2009 (Public Law 111–32), directed the 2009 increase in the U.S. participation in the NAB to be scored on a Federal Credit Reform Act (FCRA) basis, including an adjustment to the discount rate for market risk. The application of FCRA by operation of law to the 2009 NAB appropriation was a significant change in the budgetary treatment of the U.S. participation in the NAB that only applied to the 2009 appropriations. Pursuant to Title IX of The Department of State, Foreign Operations, and Related Programs Appropriations Act, 2016 (Public Law

114–113), the 2009 direction to apply FCRA rules no longer applies to the 2009 quota appropriation, and the account was closed in 2016.

The Special Defense Acquisition Fund (SDAF) helps to better support coalition and other U.S. partners participating in U.S. overseas contingency and other operations; and expedite the procurement of defense articles for provision to foreign nations and international organizations. The 2018 request reflects \$900 million in new SDAF obligation authority, to be funded by offsetting collections. In 2018, offsetting collections will be derived from SDAF sales of stock as well as other receipts consistent with section 51(b) of the Arms Export Control Act. The 2018 request will support advance purchases of high-demand equipment that has long procurement lead times, which is often the main limiting factor in our ability to provide coalition partners with critical equipment to make them operationally effective in a timely manner. Improving the mechanism for supporting U.S. partners is a high priority for both the Departments of State and Defense.

The Fixing America's Surface Transportation (FAST) Act (Public Law 114-94) was enacted on December 4, 2015. Among the new provisions included in this Act, is the establishment of a new National Surface Transportation and Innovative Finance Bureau (the Bureau) within the Office of the Secretary of Transportation that will align, coordinate, and consolidate aspects of the U.S. Department of Transportation's (USDOT) existing surface transportation innovative finance programs within the new Bureau. The FAST Act calls for the Bureau to fulfill a number of specific responsibilities, including the following: Provide assistance and communicate best practices and financing and funding opportunities to entities eligible under USDOT infrastructure finance programs; Administer the application process for USDOT infrastructure finance programs; Administer the application process for a new Nationally Significant Freight and Highway Projects program; Reduce uncertainty and delays related to environmental reviews and permitting, as well as project delivery and procurement risks and costs for projects financed by the USDOT infrastructure finance programs and the new Nationally Significant Freight and Highways Projects programs; Increase transparency and the public availability of information regarding projects financed by the USDOT infrastructure finance programs and the new Nationally Significant Freight and Highway Projects program; and Promote best practices in procurement for projects financed by the USDOT infrastructure finance programs and the new Nationally Significant Freight and Highway Projects program by developing benchmarks related to procurement. The Bureau will build on a number of actions that USDOT has taken to advance these goals, including the establishment of USDOT's Build America Transportation Investment Center in 2014 as a single point of contact and coordination for states, municipalities and project sponsors looking to utilize federal transportation expertise, apply for federal transportation credit programs, and explore ways to access private capital through public private partnerships. Notably, in their explanatory statement of the FAST Act, Congressional conferees explicitly recognized the accomplishments of the Administration's Build America Investment Initiative to increase infrastructure investment and economic growth. To assist with establishing the Bureau, the FAST Act provides the Secretary with certain authorities to redirect personnel and budgetary resources, if necessary, to support the establishment and effectiveness of the Bureau. These authorities are available for two years, expiring in December 2017. The Administration is proposing extending these authorities to allow full implementation of the Bureau. The FAST Act requires that, within 90 days of enactment and in 90-day intervals thereafter, USDOT report to Congress on how these authorities are being implemented, and any additional legislative actions that may be needed. The Bureau is managed by an Executive Director reporting to the Under Secretary of Transportation for Policy. The FAST Act also established a new Council on Credit and Finance (the Council) chaired by the Deputy Secretary, which is charged with the review and approval of innovative finance applications, making recommendations to the Secretary, and reviewing approved projects on a regular basis. The Council builds on the Credit Council that USDOT had previously established through administrative measures.

The Federal Aviation Reauthorization Act of 1996 (P.L. 104-264) authorized the collection of user fees for services provided by the Federal Aviation Administration (FAA) to aircraft that neither take off nor land in the United States, commonly known as overflight fees. The Act permanently appropriated the first \$50 million of such fees for the Essential Air Service (EAS) program and rural airport improvements. In addition, the FAA Modernization and Reauthorization Act (P.L. 112-95) requires that, in any fiscal year, overflight fees collected in excess of \$50 million will be available to carry out the EAS program. The 2018 Budget proposes to reform the EAS program and rely only on mandatory funding.

Through 1997, the Essential Air Service (EAS) program was funded from the Airport and Airway Trust Fund. Starting in 1998, the Federal Aviation Administration reauthorization funded it as a mandatory program supported by overflight fees under the Essential Air Service and Rural Airport Improvement Fund. In addition to mandatory funding supported by overflight fees, direct appropriations from the Airport and Airway Trust Fund to Payments to Air Carriers have been enacted every year beginning in 2002 to meet the needs of the essential air service program. The 2018 Budget proposes to reform the EAS program; no discretionary funding is requested in 2018.

For 2018, the Budget requests \$9,891 million for Federal Aviation Administration (FAA) operations. These funds will be used to continue to promote aviation safety and efficiency. The Budget provides funding for the Air Traffic Organization (ATO) which is responsible for managing the air traffic control system. As a performance-based organization, the ATO is designed to provide cost-effective, efficient, and, above all, safe air traffic services. The Budget also funds the Aviation Safety Organization which ensures the safe operation of the airlines and certifies new aviation products. In addition, the request also funds regulation of the commercial space transportation industry, as well as FAA policy oversight and overall management functions.

The fund provides direct support for the aviation insurance program (chapter 443 of title 49, U.S. Code). In December 2014, Congress sunset part of the aviation insurance program. Specifically, Congress returned U.S. air carriers to the commercial aviation market for all of their war risk insurance coverage by ending the FAA's authority to provide war risk insurance for a premium. Pursuant to 49 U.S.C. 44305, the FAA may provide insurance without premium at the request of the Secretary of Defense or the head of a department, agency, or instrumentality designated by the President when the Secretary of Defense or the designated head agrees to indemnify the Secretary of Transportation against all losses covered by the insurance. The "non-premium" aviation insurance program is authorized through December 31, 2018.

Enacted on February 17, 2009, the American Recovery and Reinvestment Act of 2009 (Recovery Act) provided \$27.5 billion from the General Fund to the Federal Highway Administration (FHWA), of which \$26.6 billion was apportioned to States based on formulas described in the Recovery Act and \$0.9 billion was allocated to programs identified in the Recovery Act, including the Indian Reservation Roads Program, Park Roads and Parkway Program, Forest Highway Program, Refuge Roads Program, Disadvantaged Business Enterprise Bonding Assistance, Territorial Highway Program, Puerto Rico Highway Program, and the Ferry Boat Discretionary Program. Administrative oversight funds were available through September 30, 2012 and all other funds were available through September 30, 2010. The FHWA Recovery Act funds have been used to invest in transportation, environmental protection, and other infrastructure that will provide longer term economic benefits to the Nation. The Recovery Act funds augmented existing investments, authorized by the Safe, Accountable, Flexible, Efficient Transportation Equity Act of 2005: A Legacy for Users, enabled States, regional, and local governments to accelerate to completion a number of highway infrastructure projects planned or underway. Since the Recovery Act was enacted in February 2009, more than 42,000 miles of pavement across the United States have been improved. As of September 30, 2015, States have expended 100% of Recovery Act obligations. As of September 30, 2015 Recovery Act funds are cancelled and are no longer available for expenditure. No new budget authority is requested for FY 2018.

The appropriations authorized DOT to pay subsidy and administrative costs, not to exceed \$300 million, of projects eligible for Federal credit assistance under Chapter 6 of Title 23 United States Code. In 2012, \$45 million was provided for TIGER discretionary grants as part of the 2012 DOT appropriation act to pay subsidy and administrative costs.

The Federal-Aid Highway Act of 1968 authorized the establishment of a right-of-way revolving fund. This fund was used to make cash advances to States for the purpose of purchasing right-of-way parcels in advance of highway construction and thereby preventing the inflation of land prices from significantly increasing construction costs. The purchase of right-of-way is an eligible expense of the Federal-Aid Highway program.

This program was terminated by the Transportation Equity Act for the 21st Century of 1998, but will continue to be shown for reporting purposes as loan balances remain outstanding. No new budgetary resources are requested in FY 2018.

The Highway Revenue Act of 1956, as amended, provides for the transfer from the General Fund to the Highway Trust Fund of revenue from the motor fuel tax and certain other taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be transferred. In turn, appropriations are authorized from this fund to meet expenditures for Federal-aid highways and other programs as specified by law. To address long-standing insolvency issues, the 2018 Budget proposes to show a reduction of outlays to only those that can be supported by available revenues over the ten-year window.

The following Status of Funds table presents the status of Highway Trust Fund.

Cash balances.—The Status of Funds table begins with the unexpended balance on a "cash basis" at the start of the year. The table shows the amount of cash invested in Federal securities at par value and the amount of cash on hand, i.e., uninvested balance. Next, the table provides the amounts of cash income and cash outlays during each year to show the cash balance at the end of each year.

Revenues.—The Budget presentation includes estimated receipts from existing Highway Trust Fund excise taxes, which would continue to be deposited into the Highway and Mass Transit Accounts of the Highway Trust Fund in the same manner as current law.

General Fund Transfers.—The Moving Ahead for Progress in the 21st Century Act (Public Law 112-141) authorized transfers into the Highway Trust Fund of \$2.4 billion from the Leaking Underground Storage Tank (LUST) Trust Fund in 2012, \$6.2 billion from the General Fund in 2013, and \$12.6 billion from the General Fund in 2014. The Highway and Transportation Funding Act of 2014 (Public Law 113-159) authorized transfers into the Highway Trust Fund of \$1.0 billion from the LUST Trust Fund in FY 2014, and \$9.8 billion from the General Fund in 2014. The Surface Transportation and Veterans Health Care Choice Improvement Act of 2015 (Public Law 114-41) authorized the transfer into the Highway Trust Fund of \$8.068 billion from the General Fund of the Treasury in 2015. This transfer was not subject to sequestration. The Fixing America's Surface Transportation (FAST) Act (Public Law 114-94) authorized the transfer into the Highway Trust Fund of \$70.0 billion from the General Fund of the Treasury in 2016. This transfer was not subject to sequestration. The FAST Act authorized the transfer of \$100 million into the Highway Trust Fund from the LUST Trust Fund in both FY 2017 and FY 2018. The FY 2017 transfer was subject to sequestration.

The Federal-aid Highways (FAH) program is designed to aid in the development, operations, and management of an intermodal transportation system that is economically efficient, environmentally sound, provides the foundation for the Nation to compete in the global economy, and moves people and goods safely. All programs included within FAH are proposed to be financed from the Highway Account of the Highway Trust Fund, and most are distributed via apportionments and allocations to States. Liquidating cash appropriations are subsequently requested to fund outlays resulting from obligations incurred under contract authority.

FEDERAL-AID HIGHWAYS—Continued

The Federal Highway Administration's (FHWA) 2018 budget consists of the following programs: Highway Safety Improvement Program; National Highway Freight Program; National Highway Performance Program; Surface Transportation Block Grant Program; Congestion Mitigation and Air Quality Improvement Program; Metropolitan Transportation Planning Program; Federal Lands and Tribal Transportation Programs; Nationally Significant Freight and Highway Projects; Transportation Infrastructure Finance and Innovation Act (TIFIA) Program; Research, Technology and Education Program; and Federal Allocation Programs.

Highway Safety Improvement Program.—The performance-based Highway Safety Improvement Program (\$2.6 billion) provides funding to significantly reduce traffic fatalities and serious injuries on all public roads, including non-State-owned public roads and roads on Tribal land. FHWA, through national leadership and innovation, focuses on improving the safety of roadway infrastructure on all public roads. The program provides a data- and performance-driven strategic approach to improving traffic safety to reduce fatalities and serious injuries. It strengthens coordination among all highway safety modes, including National Highway Traffic Safety Administration (NHTSA) and Federal Motor Carrier Safety Administration (FMCSA), in conjunction with all Department safety initiatives. It continues the requirement that each State utilize a Strategic Highway Safety Plan. This statewide, coordinated safety plan provides a comprehensive framework for establishing statewide goals, objectives, and performance targets while ensuring the effective use of safety-focused funding. The Highway Safety Improvement Program includes a \$235 million targeted set-aside, the Railway-Highway Crossings Program, to fund safety improvements to reduce the number of fatalities, injuries, and crashes at public grade crossings.

National Highway Freight Program.—The National Highway Freight Program (\$1.2 billion), is a formula program established by the FAST Act that will provide States with necessary funds for vital projects that will improve the movement of freight on the National Highway Freight Network, which is comprised of the 41,500-mile Primary Highway Freight System, all other Interstates not on the PHFS, and other State-identified critical rural and urban corridors. The FAST Act requires all States using formula dollars to complete a multimodal State Freight Plan.

National Highway Performance Program.—The National Highway Performance Program (\$23.3 billion) is a formula-based program that focuses significant Federal resources for the following purposes: to support the condition and performance of the National Highway System (NHS); to support the construction of new facilities on the NHS; and to ensure that investments of Federal-aid funds in highway construction support progress toward the achievement of performance targets for the NHS. The program includes performance management features, holds States accountable for achieving performance targets, and provides flexibility to States for making transportation investment decisions. The 220,000-mile NHS is comprised of rural and urban roads serving major population centers, international border crossings, intermodal transportation facilities, and major travel destinations. The NHS includes the Interstate System, all principal arterials, intermodal connectors, and other roads important to mobility, commerce, national defense, and intermodal connectivity. The NHS provides mobility to the vast majority of the Nation's population and almost all of its commerce, supports national defense, and promotes intermodal connectivity.

Surface Transportation Block Grant Program.—The Surface Transportation Block Grant Program (\$11.7 billion) provides flexible funding that may be used by States and localities for projects to preserve and improve the condition and performance on any Federal-aid highway, bridge and safety projects on any public road, and facilities for non-motorized transportation. The flexible nature of this program allows States to direct funding to areas of greatest need while also fostering innovation. This program gives State transportation agencies the ability to target funding to State and local priorities. States will identify projects for funding in consultation

with local transportation officials in rural areas and in cooperation with the Metropolitan Planning Organization (MPO) in metropolitan areas.

Congestion Mitigation and Air Quality Improvement Program.—The Congestion Mitigation and Air Quality (CMAQ) Improvement Program (\$2.4 billion) will help States, local governments, and private-sector sponsors reduce highway congestion and harmful emissions, and assist many areas in reaching attainment of the National Ambient Air Quality Standards (NAAQS). The CMAQ program provides a flexible funding source for State and local governments to fund transportation projects and programs that are designed to help localities meet the requirements of the Clean Air Act and its amendments, and help reduce regional congestion on transportation networks. CMAQ investments support transportation projects that are designed to reduce the emissions from mobile sources in areas that have been designated as in nonattainment or in maintenance of the NAAQS by the Environmental Protection Agency.

Metropolitan Transportation Planning Program.—The Metropolitan Transportation Planning Program (\$343 million) provides funds for use by Metropolitan Planning Organizations (MPOs) for multimodal transportation planning and programming in metropolitan areas. Metropolitan planning activities include: the collection and analysis of data on demographics, trends, and system performance; travel demand and system performance forecasting; identification and prioritization of transportation system improvement needs; and coordination of the planning process and decision-making with the public, elected officials, and stakeholder groups. The planning process will provide consideration for projects that increase safety, support economic vitality, increase accessibility, mobility, and connectivity, protect and enhance the environment, emphasize the preservation of existing infrastructure, and increase security of the transportation system.

Federal Lands and Tribal Transportation Programs.—The Federal Lands and Tribal Transportation Programs (\$1.1 billion) provide funding for transportation projects on Federal and Tribal lands for construction and engineering projects that will: provide multi-modal access to basic community services including safer all-weather access to schools and healthcare facilities for 567 federally-recognized sovereign Tribal governments; improve multi-modal access to recreational areas on federal lands; and expand economic development in and around federal and Tribal lands while preserving the environment and reducing congestion.

Nationally Significant Freight and Highway Projects.—The Nationally Significant Freight and Highway Projects (\$900 million) program is a discretionary grant program, established by the FAST Act, for major freight and highway projects that will improve the safety, efficiency, and reliability of the movement of freight and people. Through the advancement of construction-ready projects, this program will enhance the Nation's freight movement.

Transportation Infrastructure Finance and Innovation Act (TIFIA) Program.—The TIFIA Program (\$285 million) provides contract authority to cover the subsidy cost of providing credit assistance for nationally or regionally significant transportation projects. The TIFIA Program leverages Federal dollars in a time of scarce budgetary resources, facilitating private participation in transportation projects and encouraging innovative financing mechanisms that help advance projects sooner. This program offers flexible repayment terms and attracts private capital to facilitate transportation projects that would otherwise go unfunded.

Research, Technology, and Education Program.—The Research, Technology, and Education (RT&E) Program (\$418 million) provides for a comprehensive, nationally-coordinated research, technology, and education program that will advance the Department of Transportation's goals, while accelerating innovation delivery and technology implementation. FHWA research, development and technology activities include: a highway research and development program; a technology and innovation deployment program; an intelligent transportation systems program; and a training and education program. The RT&E Program supports activities in the areas of safety, infrastructure preservation, operations, environmental sustainability,

and policy. FHWA is in a unique leadership position to identify and address issues that require high-risk, long-term research, and research on emerging issues of national significance. FHWA's leadership role is necessary to build effective partnerships to maximize the investment in the transportation system. The entire innovation lifecycle is covered under the RT&E Program umbrella from agenda setting to the deployment of technologies and innovations.

Federal Allocation Programs.—This categorization consists of funding (\$404 million) for several important programs: Emergency Relief; Territorial and Puerto Rico Highway Program; Construction of Ferry Boats and Ferry Terminal Facilities; On-the-Job Training; Disadvantaged Business Enterprise; and Highway Use Tax Evasion Projects. The Emergency Relief Program has been funded through a recurring annual authorization of \$100 million since 1972. Emergency Relief funding assists Federal, State, Tribal, and local governments with the expense of repairing serious damage to Federal-aid, Tribal, and Federal Lands highways resulting from natural disasters or catastrophic failures. The Territorial and Puerto Rico Highway Program provides funding for critical highway programs in Puerto Rico and the four territories of American Samoa, the Commonwealth of the Northern Mariana Islands, Guam, and the United States Virgin Islands. The Construction of Ferry Boats and Ferry Terminal Facilities program provides funding for the construction of ferry boats and ferry terminal facilities which will improve connectivity between NHS segments, provide travel mode options, and reduce congestion. The On-the-Job Training program provides funding for developing, conducting, and administering surface transportation and technology training, including skill improvement programs and job readiness. The Disadvantaged Business Enterprise program provides funding for developing, conducting, and administering training and assistance programs to increase the proficiency of minority businesses to compete, on an equal basis, for contracts and subcontracts. The Highway Use Tax Evasion Projects program provides funding to the Internal Revenue Service, other Federal agencies, and the States to carry out intergovernmental enforcement efforts along with training and research to reduce evasion of payment of motor fuel and other highway use taxes, which are the principal sources for Federal and State highway funding.

SEC. 123. None of the funds made available in this Act to the Department of Transportation may be used to provide credit assistance unless not less than 3 days before any application approval to provide credit assistance under sections 603 and 604 of title 23, United States Code, the Secretary of Transportation provides notification in writing to the following committees: the House and Senate Committees on Appropriations; the Committee on Environment and Public Works and the Committee on Banking, Housing and Urban Affairs of the Senate; and the Committee on Transportation and Infrastructure of the House of Representatives: Provided, That such notification shall include, but not be limited to, the name of the project sponsor; a description of the project; whether credit assistance will be provided as a direct loan, loan guarantee, or line of credit; and the amount of credit assistance.

Notwithstanding the

original period of availability of funds to be obligated under this section, such funds and associated obligation limitation shall remain available for obligation for a period of 3 fiscal years after the fiscal year in which the Secretary of Transportation is notified. The Federal share of the cost of a project carried out with funds made available under this section shall be the same as associated with the earmark.

(b) In this section, the term "earmarked amount" means—

(1) congressionally directed spending, as defined in rule XLIV of the Standing Rules of the Senate, identified in a prior law, report, or joint explanatory statement, which was authorized to be appropriated or appropriated more than 10 fiscal years prior to the current fiscal year, and administered by the Federal Highway Administration; or

(2) a congressional earmark, as defined in rule XXI of the Rules of the House of Representatives identified in a prior law, report, or joint explanatory statement, which was authorized to be appropriated or appropriated more than 10 fiscal years prior to the current fiscal year, and administered by the Federal Highway Administration.

(c) The authority under subsection (a) may be exercised only for those projects or activities that have obligated less than 10 percent of the amount made available for obligation as of October 1 of the current fiscal year, and shall be applied to projects within the same general geographic area within 50 miles for which the funding was designated, except that a State or territory may apply such authority to unexpended balances of funds from projects or activities the State or territory certifies have been closed and for which payments have been made under a final voucher.

(d) The Secretary shall submit consolidated reports of the information provided by the States and territories each quarter to the House and Senate Committees on Appropriations.

FEDERAL MOTOR CARRIER SAFETY ADMINISTRATION

The Federal Motor Carrier Safety Administration (FMCSA) was established within the Department of Transportation by the Motor Carrier Safety Improvement Act of 1999 (P.L. 106–159). Prior to this legislation, motor carrier safety responsibilities were under the jurisdiction of the Federal Highway Administration.

FMCSA's mission is to promote safe commercial motor vehicle operation and reduce truck and bus crashes. The agency accomplishes this mission by reducing fatalities and property losses associated with commercial motor vehicles through education, regulation, enforcement, and research and innovative technology, thereby achieving a safer and more secure transportation environment. FMCSA is also responsible for enforcing Federal motor carrier safety and hazardous materials regulations for all commercial vehicles entering the United States along its southern and northern borders.

Motor Carrier Safety Grants support States to conduct compliance reviews, identify and apprehend traffic violators, conduct roadside inspections, and support safety audits on new entrant carriers. Using take-down funds, the Federal Motor Carrier Safety Administration (FMCSA) also supports States by conducting training for State agency personnel to accomplish motor carrier safety objectives. In addition, FMCSA reviews State commercial driver's license (CDL) oversight activities to prevent unqualified drivers from being issued CDLs, and actively engages with industry and other stakeholders through Innovative Technology programs to improve the safety and productivity of commercial vehicles and drivers. The Motor Carriers Safety Grants account maintains the Agency's individual grants under the Compliance, Safety and Accountability Program.

The Operations and Programs account provides the necessary resources to support program and administrative activities for motor carrier safety. The Federal Motor Carrier Safety Administration (FMCSA) will continue to improve safety and reduce severe and fatal commercial motor vehicles crashes by raising the bar to entry into the commercial motor vehicle industry, by requiring operators to maintain standards to remain in the industry, and by removing high-risk carriers, vehicles, drivers and service providers from operation. Funding supports nationwide motor carrier safety and consumer enforcement efforts, including the continuation of the Compliance, Safety and Accountability Program; regulation and enforcement of movers of household goods, and Federal safety enforcement activities at the borders to ensure that foreign-domiciled carriers entering the U.S. are in compliance with FMCSA Regulations. Resources are also provided to fund regulatory development and implementation, investment in research and technology, and safety outreach and education. The 2018 funding request reflects FMCSA's requirements to fund critical safety and operational facility improvements at border and domestic posts, fund important safety and safety mission support training for FMCSA staff, and to support the effective implementation of FMCSA's programs through the implementation of FMCSA's Program Integration Office.

The Vehicle Safety programs support activities to reduce highway fatalities, prevent injuries, and reduce their associated economic toll by research into, and implementation of, Federal motor vehicle safety standards. NHTSA's research areas include biomechanics, crash avoidance and mitigation technologies, and vehicle safety issues related to fuel efficiency and alternative fuels. NHTSA's Operation and Research programs fund a broad range of initiatives, including promulgation of Federal motor vehicle safety standards for motor vehicles and safety related equipment; automotive fuel economy standards required by the Energy Policy and Conservation Act, as amended by the Energy Independence and Security Act of 2007; international harmonization of vehicle standards; and consumer information on motor vehicle safety, including the New Car Assessment Program. NHTSA conducts compliance programs for motor vehicle safety and automotive fuel economy standards; investigations of safety-related motor vehicle defects; enforcement of Federal odometer law; support of enforcement of State odometer law; and safety recalls when warranted. Motor vehicle safety research and development supports NHTSA programs through the collection and analysis of crash data to identify safety problems, development of alternative solutions, and assessments of costs, benefits, and effectiveness. Research continues on standards and technologies to improve vehicle crashworthiness and crash avoidance, with emphasis on reducing crashes through vehicle-to-vehicle communication system and active safety technologies.

The Highway Safety Research and Development programs support research, demonstrations, technical assistance, and national leadership for

OPERATIONS AND RESEARCH—Continued

highway safety programs conducted by State and local governments, and various safety associations and organizations. These programs emphasize alcohol and drug countermeasures, driver and passenger occupant protection, traffic enforcement and justice services, emergency medical and trauma care systems, traffic records and licensing, State and community evaluation, motorcycle rider safety, pedestrian and bicycle safety, pupil transportation, young and older driver safety, and development of improved accident investigation procedures.

NHTSA will continue its efforts to further quantify the magnitude and nature of the emerging problem of distracted driving, assess the impact of distraction on driver behavior and driving performance, and inform public attitudes and opinions about distraction. In addition, NHTSA will continue to analyze the impact of product design on the potential for driver distraction, and assess how to effectively manage driver workload to reduce distraction.

NHTSA will continue to operate the National Driver Register's Problem Driver Pointer System, which helps to identify drivers who have been suspended for or convicted of serious traffic offenses, such as driving under the influence of alcohol or other drugs. Finally, NHTSA will improve its vital data collection and analysis which form the basis of its research, rulemaking, and performance measurement activities.

The National Highway Traffic Safety Administration (NHTSA) provides grants to States for activities related to the promotion of highway traffic safety. The Fixing America's Surface Transportation (FAST) Act provided multi-year surface transportation authorization legislation. For the 2018 Budget the agency is projected to receive \$597,629,000 for these grant programs. Under Section 402, the agency supports State highway safety programs, approved by the Secretary, which are designed to reduce traffic accidents and the resulting deaths, injuries and property damage. The agency will continue to implement and promote the use of performance measures and targets as a condition of approval in these programs and to ensure efficient and effective use of funds. NHTSA also will use dedicated funds from the program to support high visibility enforcement campaigns in the States that promote the use of seat belts and the reduction of drunk driving. Under Section 405, the agency will make grant awards to States that focus on specific national priority traffic safety areas aimed at reducing highway deaths and injuries. The agency will make grants to States that develop qualifying plans and complying laws in accordance with the statutory criteria. The focus areas under the grant program include occupant protection, state traffic safety information system improvements, impaired driving countermeasures, distracted driving, motorcyclist safety, state graduated driving licensing and non-motorized safety programs.

For FY 2016, \$50 million was appropriated under the Railroad Safety Grants heading to be equally distributed to Railroad Safety Infrastructure Improvement Grants and Railroad Safety Technology Grants. The Fixing America's Surface Transportation (FAST) Act of 2015 (P.L. 114-94) repealed the Railroad Safety Infrastructure Improvement Grants program and did not authorize new funding for the Railroad Safety Technology Grants program. No new funds are requested for this account for FY 2018. FRA is requesting funding under the FAST Act authorized Consolidated Rail Infrastructure and Safety Improvements program, which largely encompasses the recipient and project eligibilities contained in the FY 2016 funded program.

Funding requested in the Railroad Research and Development Program is focused on improving railroad safety. It provides scientific and engineering support for the Federal Railroad Administration's rail safety enforcement and rulemaking efforts. It also identifies and develops emerging technologies for the rail industry to adopt voluntarily. The outcomes of the research and development reduced accidents and incidents. In addition to improving safety, the program contributes significantly towards activities to achieve and maintain a state of good repair and promote job creation and economic growth.

The program focuses on the following areas of research:

Track Program.—Reducing derailments due to track related causes.

Rolling Stock Program.—Reducing derailments due to equipment failures, to minimize the consequences of derailments, and to minimize hazardous material releases.

Train Control and Communication.—Reducing train to train collisions and train collisions with objects on the line and at grade crossings.

Human Factors Program.—Reducing accidents caused by human error.

Railroad System Issues Program.—Prioritizing Research and Development projects on the basis of relevance to safety risk reduction and other DOT goals.

Funds are used to redevelop the Pennsylvania Station in New York City, which involves renovating the James A. Farley Post Office building as Moynihan Station. Funding for this project was included in the Grants to the National Railroad Passenger Corporation appropriation in 1995 through 1997, and the Northeast Corridor Improvement Program in 1998. In 2000, FRA received an advance appropriation of \$20 million for 2001, 2002, and 2003. In 2001, the Congress specified that the \$20 million advance appropriation for the Farley Building be used exclusively for fire and life safety initiatives. In FY 2016, \$40 million was transferred from the Federal Transit Administration's Hurricane Sandy funding into this account for

The National Railroad Passenger Corporation (Amtrak) was established in 1970 through the Rail Passenger Service Act. Amtrak is operated and managed as a for-profit corporation. Amtrak is not an agency or instrument of the U.S. Government, although since the railroad's creation FRA has provided it annual grants for operating, capital, and debt service costs.

Prior to 2006, FRA received annual appropriations in this account for grants to Amtrak. However, several one-time appropriations or funding transfers since 2006 have been directed to this account, including \$1.3 billion in funds under the American Recovery and Reinvestment Act of 2009, \$112 million from the Disaster Relief Appropriations Act of FY 2013 (P.L. 113-2) for recovery efforts from Super storm Sandy, and a \$185 million transfer from the Federal Transit Administration for the Hudson Yards disaster resiliency project in New York City. No new funds are requested for this account in fiscal year 2018.

From 2006 to 2016, the Federal Railroad Administration received appropriations to this account to make quarterly grants to the National Railroad Passenger Corporation (Amtrak) for the operation of intercity passenger rail. The FAST Act authorized two new appropriations accounts for Amtrak—Northeast Corridor grants and National Network grants—which first received funding in Fiscal Year 2017. The Administration proposes to continue funding Amtrak under the new FAST Act account structure. No new funds are requested for this account in 2018.

This competitive grant program encourages state participation in passenger rail service. Under this program, a State or States may apply for grants for up to 50 percent of the cost of capital investments necessary to support improved intercity passenger rail service that either requires no operating subsidy or for which the State or States agree to provide any needed operating subsidy. To qualify for funding, States must include intercity passenger rail service as an integral part of statewide transportation planning as required under 23 U.S.C. 135. Additionally, the specific project must be on the Statewide Transportation Improvement Plan at the time of application.

No new funds are requested for this account in fiscal year 2018.

The Railroad Safety Technology Program is a competitive grant program for the deployment of train control technologies to passenger and freight rail carriers, railroad suppliers, and State and local governments. Projects may include the deployment of train control technologies, train control component technologies, processor-based technologies, electronically controlled pneumatic brakes, rail integrity inspection systems, rail integrity warning systems, switch position indicators and monitors, remote control power switch technologies, track integrity circuit technologies, and other new technologies that improve the safety of railroad systems.

FRA has given priority to projects that make technologies interoperable between railroad systems; accelerate the deployment of train control technology on high risk corridors, such as those that have high volumes of hazardous materials shipments, or over which commuter or passenger trains operate; or benefit both passenger and freight safety and efficiency.

No new funds are requested for this account for fiscal year 2018. The FAST Act did not authorize new funding for the Railroad Safety Technology Grants program. FRA is requesting funding under the FAST Act authorized Consolidated Rail Infrastructure and Safety Improvements program, which largely encompasses the recipient and project eligibilities contained in the Railroad Safety Technology Grants program.

The Transportation Equity Act of the 21st Century of 1998 established the Railroad Rehabilitation and Improvement Financing (RRIF) loan and loan guarantee program. The Safe, Accountable, Flexible, Efficient Transportation Equity Act of 2005: A Legacy for Users, changed the program to allow FRA to issue direct loan and loan guarantees up to \$35,000,000,000, and it required that no less than \$7,000,000,000 be reserved for projects primarily benefiting freight railroads other than Class I carriers. The program was expanded by the Rail Safety Improvement Act of 2008 and again by the Fixing America's Surface Transportation Act in 2015. The funding may be used: (1) to acquire, improve, or rehabilitate intermodal or rail equipment or facilities, including track, components of track, bridges, yards, buildings, or shops; (2) to refinance debt; or (3) to develop and establish new intermodal or railroad facilities, (4) to reimburse

related planning and design expenses; (5) and to finance (by December 2019) certain economic development related to passenger rail stations. For 2016, \$1.96 million was made available to assist Class II and Class III railroads in covering RRIF loan application expenses. No new funds are requested for this account for fiscal year 2018.

ADMINISTRATIVE PROVISIONS

SEC. 150. None of the funds provided to the National Railroad Passenger Corporation may be used to fund any overtime costs in excess of \$35,000 for any individual employee: Provided, That the President of Amtrak may waive the cap set in the previous proviso for specific employees when the President of Amtrak determines such a cap poses a risk to the safety and operational efficiency of the system: Provided further, That the President of Amtrak shall report to the House and Senate Committees on Appropriations each quarter of the calendar year on waivers granted to employees and amounts paid above the cap for each month within such quarter and delineate the reasons each waiver was granted: Provided further, That the President of Amtrak shall report to the House and Senate Committees on Appropriations by March 1, 2018, a summary of all overtime payments incurred by the Corporation for 2017 and the three prior calendar years: Provided further, That such summary shall include the total number of employees that received waivers and the total overtime payments the Corporation paid to those employees receiving waivers for each month for 2017 and for the three prior calendar years.

SEC. 151. Notwithstanding section 1302 of title 40, United States Code, the Federal Railroad Administration may lease to others or enter into contracts, for such consideration, and subject to such terms and conditions, as it determines to be in the best interests of the government, for a term of up to 20 years for the continued operation and maintenance and capital reinvestment of the Transportation Technology Center near Pueblo, Colorado.

FEDERAL TRANSIT ADMINISTRATION

The Federal Transit Administration (FTA) provides grant funding to State and local governments, public and private transit operators and other recipients to enhance public transportation across the United States. FTA programs fund the construction of new public transit systems, purchase and maintain transit vehicles and equipment, subsidize limited public transit operations, support regional transportation planning efforts, and improve technology and service methods critical to the delivery of public transportation. In 2015, a new five year surface transportation authorization law was enacted—Fixing America's Surface Transportation Act or the FAST

Act. The FAST Act provides steady and predictable funding for five years and a renewed focus on reinvesting in and modernizing transit assets to help bring transit systems throughout the country into a state of good repair.

FTA's budget proposal builds on the successes of the previous authorization of MAP-21 and includes new features in the FAST Act. The account structure is generally comparable to FTA's funding under MAP-21, except where Congress consolidated programs in other accounts and moved them into the Transit Formula Grants account. The Administration proposes \$11.2 billion for FTA in 2018. This proposal includes \$9.7 billion to support FTA's base formula programs that provide assistance to transit agencies in both urban and rural areas, with an additional investment in programs improving the state of good repair of rail transit and recapitalizing bus and bus facilities through a new discretionary grant program. The Administration proposes \$1.2 billion in new budget authority for Capital Investment Grants, to support new fixed guideway investments as well as projects aimed at improving or restoring the core capacity of existing fixed guideway systems.

The table below presents actual funding enacted for 2016, 2017 annualized CR, and the requested 2018 funding. Additional detail is provided in the program budget schedules that follow.

The 2018 Budget request includes \$1.2 billion for the Capital Investment Grants account to increase the capacity of local transit networks and to meet ridership demands in communities across the nation. These objectives of this program are accomplished by supporting the construction of new fixed guideway systems or extensions to fixed guideways, corridor-based bus rapid transit systems, and core capacity improvement projects. These projects include heavy rail, light rail, commuter rail, bus rapid transit, ferries, and streetcar systems. FTA allocates resources to grantees through a multi-year, multi-step competitive process. Prior to funding, each project is required to obtain an acceptable rating under a set of statutorily defined criteria that examine project merit and local financial commitment.

The Public Transportation Emergency Relief Program helps transit agencies restore needed transportation services immediately following disaster events. Both capital and operating costs are eligible for funding following an emergency; however, this program does not replace the Federal Emergency Management Agency's capital assistance program. FTA administers the \$10.9 billion supplemental appropriation (adjusted to \$10.2 billion after sequestration and the transfer of funds to the Office of the In-

PUBLIC TRANSPORTATION EMERGENCY RELIEF PROGRAM—Continued
spectator General and the Federal Railroad Administration) provided by the Disaster Relief Appropriations Act, 2013 (Public Law 113–2) following Hurricane Sandy through this account. The Hurricane Sandy funds are only available for emergency relief, recovery and resiliency projects in the areas impacted by Hurricane Sandy. No funds are requested in this account for 2018.

The Technical Assistance and Standard Development program enables FTA to provide technical assistance to the public transportation industry and to develop standards for transit service provision, with an emphasis on improving access for all individuals and transportation equity. Through this program, FTA is able to assist grantees to more effectively and effi-

ciently provide public transportation and administer Federal funding in compliance with the law.

The American Recovery and Reinvestment Act of 2009 provided \$6.9 billion to fund transit capital assistance to create jobs to bolster the American economy. Transit capital assistance was provided through urbanized area formula grants, non-urbanized area formula grants, and discretionary Tribal Transit grants. Funds were used for eligible capital projects, preventive maintenance, and to purchase buses and rail rolling stock. Funds were also used for a new discretionary grant program, Transportation Investments in Greenhouse Gas and Energy Reduction, to increase the use of environmentally sustainable operations in the public transportation sector. This schedule shows the obligation and outlay of remaining amounts made available for administration and oversight of these formula apportionments and discretionary grant awards and the associated capital and preventive maintenance projects and vehicle procurements.

FTA's 2018 budget request builds upon the successes of the previous authorization, MAP-21, which provided two years of stable funding for transit programs. The account structure is generally comparable to FTA's funding under MAP-21. The Transit Formula Grants account is funded from the Mass Transit Account of the Highway Trust Fund.

Transit Formula Grants funds can be used for transit capital purposes including bus and rail car purchases, facility repair and construction, as well as maintenance, and where eligible, planning and operating expenses. These funds help existing transit systems provide safe and reliable transportation options, and promote economically vibrant communities. The 2018 Budget request includes \$9.733 billion for Transit Formula Grants. The 2018 formula grant program structure includes:

Urbanized Area Formula.—\$4.727 billion. For formula grants to urbanized areas with populations of 50,000 or more. Funds may be used for any transit capital purpose. Operating costs continue to be eligible expenses for all urban areas under 200,000 in population; and, in certain circumstances, operating costs may be eligible expenses in urban areas with populations over 200,000. Additionally, Urbanized Area grants may be used to support Job Access and Reverse Commute activities.

State of Good Repair Grants.—\$2.594 billion. For a formula-based capital maintenance program to restore and replace aging transportation infrastructure through reinvestment in existing fixed guideway systems and buses on high occupancy vehicle (HOV) lanes.

Rural Area Formula.—\$646 million. For formula grants to provide funds for capital, planning and operating assistance grants for transit service implemented by States in rural areas with populations of less than 50,000. Funding may also be used to support intercity bus service. Additionally, Rural Area grants may be used to support Job Access and Reverse Commute activities. Within this amount, \$30 million in formula funds and \$5 million in discretionary grant funds will support the Public Transportation on Indian Reservations program and \$20 million will support the Appalachian Development Public Transportation Assistance Formula Program.

TRANSIT FORMULA GRANTS—Continued

Growing States and High Density States.—\$553 million. For funds that are divided between the Urban and Rural Area programs based on the legislative funding formula for this program.

Enhanced Mobility of Seniors and Individuals with Disabilities.—\$274 million. Supports local governments and public and private transportation providers that serve special needs of these specific transit-dependent populations beyond traditional public transportation services, including complementary paratransit service.

Bus and Bus Facilities Grants.—\$747 million. For formula funding and discretionary funding to replace, rehabilitate, and purchase buses and related equipment, and to construct bus-related facilities States may use these funds to supplement Urbanized Area and Rural Area formula grant programs. Funding also supports low and zero emission bus and bus facilities.

Bus Testing Facility.—\$3 million. Funding supports a facility where all new bus models purchased using FTA capital assistance will be tested for compliance with performance standards for safety, structural integrity, reliability, performance (including braking performance) maintainability, emissions, noise and fuel economy. FTA must develop a Pass/Fail rating system for buses. FTA grantees will not be able use Federal funds to purchase buses that do not receive a "pass" rating.

Planning Programs.—\$136 million. Funding supports cooperative, continuous, and comprehensive transportation infrastructure investment planning. The program requires that all Metropolitan Planning Organizations (MPOs), and States, develop performance-driven, outcome-based transportation plans.

Transit Oriented Development Pilot.—\$10 million. This pilot program funds planning for projects that support transit-oriented development associated with new fixed-guideway and core capacity improvement projects.

National Transit Institute.—\$5 million. To fund projects that enable FTA to partner with higher education to develop and provide training and educational programs to transit employees and others engaged in providing public transit services.

National Transit Data Base (NTD).—\$4 million. For operation and maintenance of the NTD, a database of nationwide statistics on the transit industry, which FTA is legally required to maintain under 49 U.S.C. 5335(a)(1)(2). NTD data serves as the basis for FTA formula grant apportionments and is used to track the condition and performance of our Nation's transit infrastructure.

Public Transportation Innovation.—\$28 million. This program provides assistance for projects and activities to advance innovative public transportation research, demonstration, deployment and development and testing, evaluating and analyzing low or no emission vehicle components intended for use in low or no emission vehicles.

Technical Assistance and Workforce Development.—\$9 million. The Oil Pollution Act of 1990 requires the preparation of spill response plans by operators that store, handle or transport oil to minimize the environmental impact of oil spills and to improve public and private sector response. The Pipeline and Hazardous Materials Safety Administration (PHMSA) reviews response plans submitted by operators of onshore oil pipelines to ensure the plans comply with PHMSA regulations. These plans also must be regularly updated by the operator and submitted for review by PHMSA. PHMSA also seeks to improve oil spill preparedness and response through data analysis, spill monitoring, mapping pipelines in areas unusually sensitive to environmental damage, and advanced technologies to detect and prevent leaks from hazardous liquid pipelines. These and related activities are funded in part by the Oil Spill Liability Trust Fund.

The Maritime Security Program provides direct payments to U.S. flag ship operators engaged in foreign commerce to partially offset the higher operating costs of U.S. registry. The purpose of the program is to establish and sustain a fleet of active ships that are privately owned, commercially viable, and militarily useful to meet national defense and other emergency sealift requirements. Participating operators are required to make their ships and commercial transportation resources available upon request by the Secretary of Defense during times of war or national emergency. Commercial transportation resources include ships, logistics management services, port terminal facilities, and U.S. citizen merchant mariners to crew both commercial and government-owned merchant ships. The Maritime Administration requests \$ 210 million for the Maritime Security program.

The Maritime Guaranteed Loan (Title XI) program provides for a full faith and credit guarantee of debt obligations issued by U.S or foreign ship owners to finance or refinance the construction, reconstruction, or reconditioning of U.S. flag vessels or eligible export vessels in U.S. shipyards; or for a full faith and credit guarantee of debt obligations issued by U.S. shipyard owners to finance the modernization of shipbuilding technology at shipyards located in the United States.

As required by the Federal Credit Reform Act of 1990, this account also includes the subsidy costs associated with loan guarantee commitments made in 1992 and subsequent years which are estimated on a present value basis. This program is proposed for elimination in FY 2018 and no program or administrative funds are requested. However, the management of the existing loan portfolio which has \$1.5 billion in loan guarantees and approximately 32 guarantee contracts will be managed under the MARAD Operations & Program account within the Operations & Training appropriation.

SEC. 181. Appropriations contained in this Act for the Department of Transportation shall be available for services as authorized by 5 U.S.C. 3109, but at rates for individuals not to exceed the per diem rate equivalent to the rate for an Executive Level IV.

SEC. 182. (a) No recipient of funds made available in this Act shall disseminate personal information (as defined in 18 U.S.C. 2725(3)) obtained by a State department of motor vehicles in connection with a motor vehicle record as defined in 18 U.S.C. 2725(1), except as provided in 18 U.S.C. 2721 for a use permitted under 18 U.S.C. 2721.

(b) Notwithstanding subsection (a), the Secretary shall not withhold funds provided in this Act for any grantee if a State is in noncompliance with this provision.

SEC. 183. Funds received by the Federal Highway Administration and Federal Railroad Administration from States, counties, municipalities, other public authorities, and private sources for expenses incurred for training may be credited respect-

ively to the Federal Highway Administration's "Federal-Aid Highways" account and to the Federal Railroad Administration's "Safety and Operations" account, except for State rail safety inspectors participating in training pursuant to 49 U.S.C. 20105.

SEC. 184. None of the funds made available in this Act to the Department of Transportation may be used to make a loan, loan guarantee, line of credit, or grant unless the Secretary of Transportation notifies the House and Senate Committees on Appropriations not less than 3 full business days before any project competitively selected to receive a discretionary grant award, any discretionary grant award, letter of intent, loan commitment, loan guarantee commitment, line of credit commitment, or full funding grant agreement totaling \$1,000,000 or more is announced by the department or its modal administrations from—

SEC. 185. Rebates, refunds, incentive payments, minor fees and other funds received by the Department of Transportation from travel management centers, charge card programs, the subleasing of building space, and miscellaneous sources are to be credited to appropriations of the Department of Transportation and allocated to elements of the Department of Transportation using fair and equitable criteria and such funds shall be available until expended.

SEC. 188. Funds appropriated in this Act to the modal administrations may be obligated for the Office of the Secretary for the costs related to assessments or reimbursable agreements only when such amounts are for the costs of goods and services that are purchased to provide a direct benefit to the applicable modal administration or administrations.

SEC. 406. No funds in this Act may be used to support any Federal, State, or local projects that seek to use the power of eminent domain, unless eminent domain is employed only for a public use: Provided, That for purposes of this section, public use shall not be construed to include economic development that primarily benefits private entities: Provided further, That any use of funds for mass transit, railroad, airport, seaport or highway projects, as well as utility projects which benefit or serve the general public (including energy-related, communication-related, water-related and wastewater-related infrastructure), other structures designated for use by the general public or which have other common-carrier or public-utility functions that serve the general public and are subject to regulation and oversight by the government, and projects for the removal of an immediate threat to public health and safety or brownfields as defined in the Small Business Liability Relief and Brownfields Revitalization Act (Public Law 107–118) shall be considered a public use for purposes of eminent domain.

SEC. 407. None of the funds made available in this Act may be transferred to any department, agency, or instrumentality of the United States Government, except pursuant to a transfer made by, or transfer authority provided in, this Act or any other appropriations Act.

SEC. 408. No funds appropriated pursuant to this Act may be expended by an entity unless the entity agrees that in expending the assistance the entity will comply with sections 2 through 4 of the Act of March 3, 1933 (41 U.S.C. 10a-10c, popularly known as the "Buy American Act").

SEC. 409. No funds appropriated or otherwise made available under this Act shall be made available to any person or entity that has been convicted of violating the Buy American Act (41 U.S.C. 10a-10c).

Trillions of dollars are accounted for and processed by the Department of the Treasury's information technology (IT) systems and therefore they are a constant target for sophisticated threat actors. To more proactively and strategically protect Treasury systems against cybersecurity threats, the Budget proposes a centralized Cybersecurity Enhancement Account. The account supports Department-wide and Bureau-specific investments for critical IT improvements including the systems identified as High Value Assets. Furthermore, the centralization of funds will allow Treasury to more nimbly respond in the event of a cybersecurity incident as well as leverage enterprise-wide services and capabilities across the components of the Department.

The Office of Inspector General (OIG) conducts audits and investigations designed to promote integrity, efficiency, and effectiveness in programs and operations within the Department and across the OIG's jurisdiction, as well as to keep the Secretary and the Congress fully and currently informed of problems and deficiencies in the administration of such programs and operations. The OIG conducts audits and investigations of Treasury programs and operations except those under jurisdictional oversight of the Treasury Inspector General for Tax Administration and the Special Inspector General for the Troubled Asset Relief Program. Additionally, the Treasury Inspector General functions as Chair of the Council of Inspectors General on Financial Oversight. Finally, the Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies of the Gulf Coast States Act (RESTORE Act) tasked the OIG with oversight of all projects, programs, and operations of the Gulf Coast Restoration Trust Fund (Trust Fund), which extends to the Gulf Coast Ecosystem Restoration Council.

The 2018 request for the OIG will be used to fund critical audit, investigative, and other mission support activities to meet the requirements of the Inspector General Act, and a number of other statutes including, but not limited to: 1) Cybersecurity Act of 2015; 2) Dodd-Frank Wall Street Reform and Consumer Protection Act; 3) Federal Information Security Management Act (FISMA); 4) Government Management Reform Act; 5) Improper Payments Elimination and Recovery Act; 6) Digital Accountability and Transparency Act of 2014; 7) Federal Deposit Insurance Act; 8) Small Business Jobs Act of 2010; and 9) RESTORE Act. Specific mandates include audits of the Department's financial statements, the Department's compliance with FISMA, the Department's actions in implementing cybersecurity information sharing, and failed insured depository institutions regulated by Treasury. With the resources available after mandated requirements are met, the OIG will conduct audits and reviews of the Department's highest risk programs and operations such as: 1) cyber threats; 2) efforts to promote spending transparency and to prevent and detect improper payments; 3) anti-money laundering and terrorist financing/Bank Secrecy

Act enforcement; 4) management of Treasury's authorities intended to support and improve the economy, including administration of the Trust Fund. The OIG will also respond to stakeholder requests.

The Office of Audit expects to complete 100 percent of statutory audits by the required deadline and to complete 74 audit products in 2018. The Office will continue to provide oversight, on a reimbursable basis, of the Small Business Lending Fund. The program was created by the Small Business Jobs Act of 2010 and assigned to the Department of the Treasury for management and execution.

In 2018, the OIG Office of Investigations will continue to investigate all reports of fraud, waste, and abuse and other criminal activity impacting Treasury programs and operations, such as financial programs including Treasury grants where fraud involving improper payments are found. The Office of Investigations will continue proactive efforts to detect, investigate, and deter electronic crimes and other threats to Treasury's physical and IT critical infrastructure and will continue current efforts to aggressively investigate, close, and refer cases for criminal prosecution, civil litigation, or corrective administrative action in a timely manner.

The Treasury Inspector General for Tax Administration (TIGTA), an independent office within the Department of the Treasury, provides oversight of the Internal Revenue Service (IRS), the IRS Chief Counsel and the IRS Oversight Board. TIGTA conducts audit, investigative, inspection and evaluation services that promote economy, efficiency, and integrity in the administration of the Internal Revenue laws. TIGTA protects the public's confidence in the tax system by conducting investigations of allegations of IRS employee misconduct, protecting IRS facilities and data, and investigating allegations of bribery or impersonation of the IRS. TIGTA is also responsible for identifying and recommending strategies to address IRS management challenges and implementing the Department's priorities.

In 2018, TIGTA's Office of Investigations (OI) will concentrate on three core areas: 1) employee integrity; 2) employee and infrastructure security; and 3) external attempts to corrupt tax administration. As the principal law enforcement agency responsible for protecting the integrity of Federal tax administration, OI protects the IRS's ability to process approximately 245 million tax returns and collect over \$3.3 trillion in annual revenue for the Federal Government.

In 2018, TIGTA's Office of Audit (OA) will focus on the major management and performance challenges confronting the IRS by prioritizing statutory audit coverage and high-risk audit work. The statutory coverage will include audits mandated by the IRS Restructuring and Reform Act of 1998 and other statutory authorities and standards involving cybersecurity, taxpayer privacy and rights, and financial management. The core of TIGTA's audit work will continue to focus on high-risk tax administration areas such as: 1) improving enforcement of tax laws to increase revenue; 2) minimizing identity theft opportunities and enhancing the efficiency of the IRS; and 3) monitoring the IRS's progress in achieving its strategic goals. Audits will address areas of concern to the Congress, the Secretary of the Treasury,

and the IRS Commissioner. OA's 2016 highlights include issuing 89 audit reports, and generating approximately \$14.6 billion in potential financial benefits.

In 2018, TIGTA's Office of Inspections and Evaluations (I&E) will conduct strategic reviews of tax administration problems, as well as responsive, timely, and cost-effective inspections and evaluations of challenging areas in IRS programs. I&E's oversight includes inspecting IRS's compliance with established system controls and operating procedures and evaluating IRS operations for high-risk systemic inefficiencies.

The Terrorism Risk Insurance Program Reauthorization Act of 2015 (P.L. 114-1) reauthorized and revised the program established by the Terrorism Risk Insurance Act (TRIA) of 2002 (P.L. 107-297). The 2015 Act extended the Terrorism Risk Insurance Program for six years, through December 31, 2020, and made several program changes to reduce the Federal liability associated with Federal payments of terrorism risk insurance losses. The Budget baseline includes the estimated Federal cost of providing payments in connection with terrorism risk insurance losses. There have been no prior payments under the Program. While the Budget does not forecast any specific payment triggering events, the Budget includes estimates representing the weighted average of payments over a full range of possible scenarios, most of which include no notional payment triggering events and some of which include notional triggering events of varying magnitude. Relying upon this methodology, the Budget baseline projects net spending of \$37 million for 2018, \$446 million over the 2018-2022 period, and \$519 million over the 2018-2027 period.

The mission of the Treasury Forfeiture Fund (Fund) is to affirmatively influence the consistent and strategic use of asset forfeiture by law enforcement bureaus that participate in the Fund to disrupt and dismantle criminal enterprises. The Fund supports Federal, state, and local law enforcement's use of asset forfeiture to punish and deter criminal activity. Proceeds from non-tax forfeitures made by participating bureaus of the Department of the Treasury and the Department of Homeland Security are deposited into the Fund. Such proceeds are available to pay or reimburse certain costs and expenses related to seizures and forfeitures that occur pursuant to laws enforced by the bureaus and other expenses authorized by 31 U.S.C. 9705. Forfeiture proceeds can also be used to fund Federal law enforcement-related activities based on requests from Federal agencies and evaluation by the Secretary of the Treasury.

The Budget proposes to permanently cancel \$876 million of unobligated balances. The Budget also proposes to return \$39 million from a judicial settlement to the General Fund of the Treasury, made unavailable to the Fund by the Consolidated Appropriations Act, 2016 (P.L. 114-113).

The Office of Financial Research (OFR) and the Financial Stability Oversight Council (Council), whose expenses are paid for out of the Financial Research Fund, were established under the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Act) (P.L. 111-203).

The OFR was established to serve the Council, its member agencies, and the public by improving the quality, transparency, and accessibility of financial data and information, by conducting and sponsoring research related to financial stability, and by promoting best practices in risk management. The OFR is an office within the Department of the Treasury.

The Council is comprised of 10 voting members, including all Federal financial regulators, and five non-voting members. The Secretary of the Treasury serves as Chair of the Council. The Council's purpose is to identify risks to the financial stability of the United States, promote market discipline, and respond to emerging threats to the stability of the U.S. financial system.

As required under Section 210(n)(10) of the Act, the Council's expenses also include reimbursement of certain reasonable expenses incurred by the

FINANCIAL RESEARCH FUND—Continued

Federal Deposit Insurance Corporation in implementing Orderly Liquidation Authority, provided by Title II of the Act. These expenses are treated as expenses of the Council, and are estimated at \$5 million in 2017 and \$4 million in 2018.

The OFR and the Council were funded through transfers from the Board of Governors of the Federal Reserve System until July 20, 2012. Subsequently, the OFR and the Council have been funded through assessments on certain bank holding companies with total consolidated assets of \$50 billion or greater and nonbank financial companies supervised by the Board of Governors. Expenses of the Council are considered expenses of, and are paid by, the OFR. Projected fees and assessments are estimates and may change.

As directed in the Executive Order on Core Principles for Regulating the U.S. Financial System, the Secretary of the Treasury, in consultation with the heads of the member agencies of the Council, is conducting a thorough review of the extent to which existing laws, regulations, and other Governmental policies promote (or inhibit) these Core Principles. The Financial Research Fund is being evaluated as part of that review.

Individual Federal income tax returns include an optional Federal income tax designation of \$3 that an individual may elect to be paid to the Presidential Election Campaign Fund (PECF). The Department of the Treasury collects the income tax designations and makes distributions from the PECF to qualified presidential candidates and, starting in 2014, to the Pediatric Research Initiative Fund at the National Institutes of Health (NIH). Money for the public funding of presidential election campaigns can only come from the PECF; if the PECF were to exhaust its fund balances, no other public funding could be used.

The Federal Election Commission administers the public funding program, determining which candidates are eligible, the amount to which they are entitled, and auditing their use of funds. Current uses of the PECF are provided below.

Matching Funds for Presidential Primary Candidates — Upon certification by the Federal Election Commission and based on a demonstration of broad national support, adherence to spending limits, and other qualifications, every eligible presidential primary candidate is entitled to receive \$250 in Federal matching funds for the first eligible \$250 of private contributions received from an individual. The private contributions must be received after the beginning of the calendar year immediately preceding the election year through the end of the calendar year of the election.

Candidates for General Elections — By statute, eligible candidates of each major party in a presidential election are entitled to equal payments in an amount that may not exceed \$20 million (adjusted for inflation since 1974) per party. Eligibility for this funding depends on meeting several criteria, such as agreeing to limit spending to amounts specified by campaign finance laws. In addition, candidates from new parties, minor parties, and non-major parties who receive in excess of 5 percent of the popular vote may be entitled to a pro rata portion of the major party amount in the general election.

Nominating Party Conventions — On April 3, 2014, the President signed into law the Gabriella Miller Kids First Research Act, P.L. 113-94. This Act amended the Internal Revenue Code to terminate the entitlement of any political party to a payment from the PECF for a presidential nominating convention. The Act also mandated the transfer of amounts in the PECF

for nominating party conventions to a 10-Year Pediatric Research Initiative Fund at NIH and authorized appropriations for the Fund.

Under the law creating the Exchange Stabilization Fund (ESF), section 10 of the Gold Reserve Act of 1934, as amended, codified at 31 U.S.C. 5302, the Secretary of the Treasury, with the approval of the President, is authorized to deal in gold, foreign exchange, and other instruments of credit and securities, as the Secretary considers necessary, consistent with U.S. obligations in the International Monetary Fund (IMF) regarding orderly exchange arrangements and a stable system of exchange rates. All earnings and interest accruing to the ESF are available for the purposes thereof. Transactions in Special Drawing Rights (SDRs) and U.S. holdings of SDRs are administered by the fund. By law, the fund is not available to pay administrative expenses.

Since 1934, the principal sources of the fund's income have been earnings on investments held by the fund, including interest earned on fund holdings of U.S. Government securities.

The amounts reflected in the 2017 and 2018 estimates entail only projected net interest earnings on ESF assets. The estimates are subject to considerable variance, depending on changes in the amount and composition of assets and the interest rates applied to investments. In addition, these estimates make no attempt to forecast gains or losses on SDR valuation or foreign currency valuation.

Section 1603 of the American Recovery and Reinvestment Act of 2009 requires the Secretary of the Treasury to make payments in lieu of tax credits to entities that place in service specified energy property. In the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010 (P.L. 111-312), section 707(a) extended for one year, through 2011, the time within which certain eligible property must be placed in service or start construction. In some cases, if construction began in 2009, 2010, or 2011, the payment can be claimed for property placed in service before 2013, 2014, or 2017, depending on the type of property. This account presents the estimated disbursements.

In general, projects that meet the eligibility criteria for the investment tax credit (ITC) are eligible for the payments. These projects include qualified renewable energy facilities that meet the eligibility criteria for the production tax credit (PTC) and have elected to instead claim the ITC. An entity receiving a Section 1603 payment for specified energy property may not also claim the ITC or the PTC with respect to the same property.

The Community Development Financial Institutions (CDFI) Fund promotes economic and community development through investment in and assistance to CDFIs, which include community development banks, credit unions, loan funds, and venture capital funds, in order to expand the availability of financial services and affordable credit for underserved populations, including distressed urban, rural, Native American, Native Hawaiian, and Alaska Native communities.

The 2018 Budget eliminates new program funding for discretionary programs including the Bank Enterprise Award Program (BEA Program), CDFI Program, the Native American CDFI Assistance Program (NACA Program), and the Healthy Food Financing Initiative (HFFI). The 2018 Budget requests \$14 million in administrative funding to support management of the CDFI Bond Guarantee Program (BGP) and the New Markets Tax Credit Program, as well as on-going certification and compliance monitoring for all programs including the BEA Program, CDFI Program, NACA Program and HFFI.

The CDFI Fund's BGP supports CDFI lending and investment activity by providing a source of long-term capital in low-income and underserved communities. The proceeds of guaranteed bonds spur job creation among small businesses and entrepreneurs, and provide needed financing for infrastructure development projects such as charter schools and affordable housing. The Budget proposes to extend the program's authorization, with an annual guarantee level not to exceed \$500 million. The Budget also proposes reforms to the CDFI BGP to increase participation and ensure credit-worthy CDFIs have access to this important source of capital while continuing to maintain strong protections against credit risk. The CDFI BGP will continue to operate at no budgetary cost for new issuances.

The Emergency Economic Stabilization Act of 2008 (EESA) (P.L. 110-343) authorized the establishment of the Troubled Asset Relief Program (TARP) and the Office of Financial Stability (OFS) to purchase and insure certain types of troubled assets for the purpose of providing stability to and preventing disruption in the economy and financial system and protecting taxpayers. The Act gave the Secretary of the Treasury broad and flexible authority to purchase and insure mortgages and other troubled assets, as well as inject capital by taking limited equity positions, as needed to stabilize the financial markets. This account provides for the administrative costs of OFS, which oversees and manages TARP.

As authorized by the Emergency Economic Stabilization Act of 2008 (EESA) (P.L. 110-343) and required by the Federal Credit Reform Act of 1990, as amended, this account records the subsidy costs associated with Troubled Asset Relief Program (TARP) direct loans obligated and loan guarantees (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year). The subsidy amounts are estimated on a present value basis using a risk-adjusted discount rate, as required by EESA.

The authority to make new financial commitments via TARP expired on October 3, 2010, under the terms of EESA. However, Treasury can continue to execute commitments entered into before October 3, 2010. For more details, please see the Budgetary Effects of the Troubled Asset Relief Program chapter in the Analytical Perspectives volume.

The subsidy amounts are estimated on a present value basis using a risk-adjusted discount rate, as required by EESA.

The authority to make new financial commitments via TARP expired on October 3, 2010, under the terms of EESA. However, Treasury can continue to execute commitments entered into before October 3, 2010. The Making Home Affordable (MHA) initiative was launched in March 2009 under the authority of sections 101 and 109 of the Emergency Economic Stabilization Act of 2008, as amended (EESA) (P.L. 110-343). The centerpiece of MHA is its first lien modification program, the Home Affordable Modification Program (HAMP), which offers affordable and sustainable mortgage modifications to responsible homeowners at risk of losing their homes to foreclosure. In December 2015, the Consolidated Appropriations Act, 2016 (P.L. 114-113) codified the current application deadline of December 31, 2016, for MHA programs. Additionally, state housing finance agencies in 18 states and the District of Columbia that have been most heavily impacted by the housing crisis have been allocated a total of \$9.6 billion under EESA through the Hardest Hit Fund (HHF) to initiate locally-tailored foreclosure prevention programs. The Consolidated Appropriations Act, 2016, extended Treasury's authority under EESA to incur certain obligations for the HHF through December 31, 2017, and granted Treasury the authority to obligate an additional \$2 billion in funds to HHF states. Funds under EESA also support a Federal Housing Administration (FHA) refinance program that allows overleveraged homeowners to refinance into a new FHA-insured loan if their existing mortgage holders agree to a short refinance and to write down principal. The Office of the Special Inspector General for the Troubled Asset Relief Program (SIGTARP) was established by section 121 of the Emergency Economic Stabilization Act of 2008 (EESA) (P.L. 110-343). SIGTARP is a Federal law enforcement agency that targets financial institution crime and is an independent watchdog protecting taxpayer dollars that fund TARP. Protecting taxpayer dollars and TARP programs drives SIGTARP's mission.

In 2018, SIGTARP will continue to conduct criminal investigations into any parties suspected of a crime related to TARP. SIGTARP will also audit to identify costly waste, abuse, risk of fraud, and inefficiency.

SIGTARP received an initial appropriation of \$50 million in permanent, indefinite budget authority in EESA. The Public-Private Investment Program Improvement and Oversight Act of 2009 (12 U.S.C. 5231a) provided \$15 million in supplemental funding to conduct audits and investigations of TARP programs designed to restart the asset-backed securities markets. Since 2010, SIGTARP has received annual appropriations to fund its operations.

The 2018 Budget requests \$20 million for SIGTARP, a reduction of 50 percent from the 2017 annualized CR level. Less than 1 percent of TARP investments remain outstanding, the application periods for the Federal Housing Administration Refinance program and Making Home Affordable initiative have ended, and nearly 80 percent of Housing Finance Agency Hardest Hit Fund disbursements have occurred.

SPECIAL INSPECTOR GENERAL FOR THE TRIOUBLED ASSET RELIEF PROGRAM
SALARIES AND EXPENSES

For necessary expenses of the Office of the Special Inspector General in carrying out the provisions of the Emergency Economic Stabilization Act of 2008 (Public Law 110-343), \$20,297,000.

Note.—A full-year 2017 appropriation for this account was not enacted at the time the budget was prepared; therefore, the budget assumes this account is operating under the Further Continuing Appropriations Act, 2017 (P.L. 114-254). The amounts included for 2017 reflect the annualized level provided by the continuing resolution.
