# FEDERAL AVIATION ADMINISTRATION

#### **OPERATIONS**

# (AIRPORT AND AIRWAY TRUST FUND)

The agreement includes \$10,025,852,000 for the operations of the Federal Aviation Administration (FAA), to remain available until September 30, 2018. Of the total amount provided, \$9,173,000,000 is to be derived from the airport and airway trust fund. Funds are distributed in the bill by budget activity.

The following table compares the agreement to the levels proposed in the budget request by activity:

	Budget Request	Agreement
Air Traffic Organization	7,539,785,000	7,559,785,000
Aviation Safety	1,286,982,000	1,298,482,000
Commercial Space Transportation	19,826,000	19,826,000
Finance and Management	771,342,000	771,342,000
NextGen and Operations Planning	60,155,000	60,155,000
Security and Hazardous Materials Safety	107,161,000	107,161,000
Staff Offices	209,101,000	209,101,000
Total	9,994,352,000	10,025,852,000

*Funding availability and transfer authority.*—The agreement provides two-year funding availability for the entire operations account. This funding flexibility is provided to enhance assurance of continuity of air traffic operations during the annual transition from one fiscal year to the next. In addition, the agreement includes funding transfer authority of five percent among the activities in this account. This transfer authority is provided to meet emerging requirements as FAA works to accelerate the modernization of the Nation's air traffic control system.

*Operations funding.*—The agreement includes \$20,000,000 above the budget request for the air traffic organization. This funding level fully supports the air traffic operational workforce, including the hiring and training of new controllers to fill critical positions. The increase above the budget request is provided to accelerate the safe integration of Unmanned Aerial Vehicles (UAVs) into the national airspace (NAS).

Aviation safety.—The agreement provides \$11,500,000 above the budget request for aviation safety activities. Of this amount, \$10,000,000 is provided to accelerate the safe integration of UAVs into the NAS; and \$1,500,000 is provided for six additional full time equivalent (FTE)

positions to support the certification of new technologies and advance FAA's organizational delegation authorization (ODA) efforts and strengthen safety oversight.

The agreement provides FAA with the resources it needs to work with industry to achieve the goal of full utilization of ODA to improve the effectiveness and efficiency of product certification. FAA is directed to ensure that an ODA can conduct all specified activities authorized and approved by FAA in their procedures manual. When requested by an ODA, FAA is directed to conduct a review of ODA limitations and remove limitations that FAA determines, through risk analysis, are associated with low and medium risk activities. These efforts should include all FAA field office activities for the type certification and delivery of new aircraft including the Aircraft Certification Office, Aircraft Evaluation Group, and Manufacturing Inspection District Offices. FAA's plan to expand the ODA performance scorecard to all ODAs nationally should be aligned with objectives to facilitate full utilization of ODAs by all FAA offices.

FAA is commended for continuing to strengthen international aviation safety cooperation and improve the flow of aviation products globally through strategic engagement with the European Aviation Safety Agency (EASA), Transport Canada Civil Aviation (TCCA), and National Civil Aviation Agency of Brazil (ANAC). These activities should result in streamlined validation and acceptance of type certificates and approvals among these authorities. FAA is directed to ensure that the efficiency of foreign validations is consistent with the terms of the Bilateral Agreement and to assist U.S. companies that experience significant delays.

The full budget request is provided for Commercial Space Transportation, Finance and Management, NextGen and Operations Planning, Security and Hazardous Materials Safety, and Staff Offices.

The agreement provides \$159,000,000 for the contract tower program.

The agreement includes language preventing the elimination of the Contract Weather Observers (CWO) program, therefore a report is not required.

The agreement directs FAA to develop a plan updating the controller staffing model for en route centers no later than one year after enactment.

The agreement directs FAA to review current policies concerning reporting and data collection standards for severe allergic reactions aboard aircraft. The FAA shall submit the

results of the review to the House and Senate Committees on Appropriations no later than 180 days after enactment of this Act.

The agreement directs FAA to regularly report to the House and Senate Committees on Appropriations on the NextGen Advisory Committee's objectives for the implementation of airspace modernization programs.

The agreement directs the GAO to submit a report to the House and Senate Committees on Appropriations on the importance of collegiate aviation flight training operations. The report shall assess: the total capacity of collegiate aviation flight training programs in the United States to meet the needs of the nation to train commercial pilots, the footprint of collegiate aviation flight training operations at the airports in the United States, whether infrastructure beyond that necessary for operations of commercial air carriers is needed at airports with collegiate aviation flight training operations, and the cost of additional infrastructure if such infrastructure is warranted. Additionally, the report should identify available funding sources and recommendations for improving technical and financial assistance to airports to construct such infrastructure.

#### FACILITIES AND EQUIPMENT

### (AIRPORT AND AIRWAY TRUST FUND)

The agreement includes \$2,855,000,000 for FAA facilities and equipment. Of the total amount available, \$486,000,000 is available until September 30, 2017 and \$2,369,000,000 is available until September 30, 2019.

ADS-B services and WAAS GEOs	150,300,000	(provided in operational lines)
SUB-TOTAL ALL ACTIVITIES	2,838,000,000	2,855,000,000

The agreement provides \$32,800,000 for separation management portfolio, including \$7,000,000 above the budget request to advance space-based automatic dependent surveillance-broadcast (ADS-B) technology.

The agreement provides \$11,500,000 for on demand NAS portfolio, including \$3,000,000 above the budget request to continue to develop and implement an integrated Cyber Testbed at the FAA Technical Center.

The agreement provides \$43,800,000 for System-Wide Information Management (SWIM), an increase of \$15,000,000 above the budget request. The additional funding for SWIM will accelerate FAA's ability to share traffic and weather data with airlines and other users of our national airspace. The Committee makes this investment with the understanding that both the FAA and its NextGen partners put a high priority on sharing data over SWIM's secure and reliable architecture.

The agreement provides \$9,000,000 for VHF Omnidirectional Radio Range (VOR) with Distance Measuring Equipment (DME), an increase of \$2,000,000 above the budget request to address the rationalization and recapitalization of aging en route navigational aids. These additional funds are provided to expedite the issuance of a request for proposals to implement a service-based procurement for Very High Frequency (VHF), Omni-Directional Range (VOR) and Tactical Air Navigation (TACAN) systems during fiscal year 2017, and to accelerate the selection of a final contract.

FAA budget documents report high numbers of reimbursable positions, but it is unclear whether those employees perform reimbursable work for the majority of their time on duty. The FAA is directed to reclassify positions, as appropriate, in order to ensure that the classification of positions as reimbursable or direct accurately reflects employees' work.

Telecommunications carriers have signaled their intention of discontinuing Time-Division Multiplexing (TDM) based connections. FAA should prepare to adopt Internet Protocol (IP) connections across all national airspace system infrastructure, and it should utilize

both near and long term strategies to manage this transition without impacts to air traffic services. Funding provided for two FAA programs – Surveillance Interface Modernization and Flight Interfacility Data Interface – will support the transition from TDM to IP telecommunications. FAA is encouraged to consider existing technology solutions that may be implemented while it continues to plan for modernization strategies.

Of this amount, \$3,650,000 is provided to the NextGen integrated laboratories, in partnership with NASA laboratories, to provide for proofs of concept supporting the integration of UAS into the national airspace. This effort will ensure interoperability with national airspace systems through the Unmanned Traffic Management system, which will create an air traffic control network for UAS that will have the capability to communicate with existing NAS infrastructure. In addition to the amount provided for UAS Research, \$10,000,000 is directed to support the expanded role of the Center of Excellence in the areas of UAS research, including cybersecurity, agricultural applications, beyond visual line of sight technology, counter-UAS detection technology, and continuation of air and ground collision studies. Furthermore, the Center of Excellence shall establish a UAS safety research facility to study appropriate safety standards for UAS and to develop and validate certification standards for such systems. Even with this additional funding, private sector contributions to the Center will likely continue to outmatch Federal investment.

The agreement provides a total of \$43,187,000 for research related to environmental sustainability, of which \$16,013,000 is for environment and energy, and \$27,174,000 is for NextGen—Environmental research aircraft technologies, fuels, and metrics. The total level of funding supports the CLEEN program, as well as the Center of Excellence for alternative jet fuels and environment. The FAA is directed to use the increase in funding for the Center of

Excellence, resulting in a total of \$2,000,000 for the Center. The committee further directs the FAA to coordinate with NASA and the Departments of Energy and Agriculture to continue research and development activities into the development and deployment of jet fuels as outlined in section 911(a) of Public Law 112-95, including feedstock logistics and all aspects of supply chains from feedstock through final combustion.
