The Executive Direction account was created by the Consolidated Appropriations Act, 2008, and supports the salaries and expenses of various high-level management offices, including the immediate offices of the Secretary, Deputy Secretary, Chief Operating Officer, and Assistant Secretaries across the Department. The Budget proposes to restructure the Executive Direction account by removing the sub-function allocations to provide the Department with the flexibility needed to promptly respond to emerging issues or unanticipated needs as they arise throughout the year. The administrative burden and lack of flexibility afforded by the current sub-account structure outweighs the potential management benefits. The following table provides estimates of anticipated funding allocations by office:

Instead, salary and expense funds are distributed across multiple accounts, achieving greater transparency and accountability within the Department. Resources in this account reflect prior-year appropriations, funds for disaster-related administrative expenses, and otherwise unexpended amounts.

Initiated in 2010, the Transformation Initiative (TI) is an ongoing effort aimed at increasing the effectiveness of program and service delivery, facilitating an evidence-based approach to improving program outcomes, and enabling innovative approaches to address the nations housing and urban development problems. By aggregating limited transfers from HUD's program accounts, the Department can continue this integrated and cross-cutting effort to improve program performance. The 2012 Budget proposes to limit TI transfers to a maximum of 0.5 percent per program and no more than \$120 million in total. The Budget proposes to use these funds for three complimentary purposes: (1) research, evaluation and program metrics, (2) program demonstrations, and (3) technical assistance and capacity building. In 2012, HUD will also continue to invest in the modernization of information technology systems and execute planned projects with available resources, but no additional funding is requested for the TI Technology Initiative.

The Research, Evaluation and Program Metrics Initiative provides a predictable stream of funding for high quality research and evaluation that will inform sound policymaking. The initiative supplements Research and Technology appropriations that are mainly dedicated to funding housing data, such as the American Housing Survey. This initiative funds program evaluation and research that is needed to ensure that program funds are spent effectively, as well as to develop appropriate metrics to track program performance between evaluations. The systemic and scientific approach enabled by the Research initiative will highlight those programs that are effective and those that require reform, so that timely modifications can occur.

The Program Demonstrations Initiative enables HUD to design and execute a series of major research demonstrations that rigorously test new program innovations. Demonstrations can be used to explore fundamental questions about housing market dynamics and their impact on economic, social and environmental objectives. The demonstrations will improve programs, help State and local governments, non-profits, and for profit organizations to develop more effective strategies for housing and community and economic development, and improve the delivery and reduce the cost of public services.

Technical Assistance set-asides are no longer requested in individual HUD program accounts; instead, these amounts have been consolidated within TI. Traditionally, HUD has delivered program-oriented technical assistance to ensure that HUD grantees are fully aware of the rules governing the disparate programs. While awareness of rules is necessary, effective responses to urban and housing challenges increasingly require coordination and awareness of diverse areas of knowledge: housing finance as well as land use, energy efficiency as well as healthy homes, community development as well as transportation planning, and accessibility as well as job creation. The Technical Assistance

TRANSFORMATION INITIATIVE—Continued

and Capacity Building Initiative enables HUD to develop enhanced and focused support to deliver cross-program technical assistance for States, local governments, and other HUD grantees for integrated management and planning across programs and jurisdictions. Providing cross-cutting knowledge with program requirements will produce results while avoiding fraud, waste and abuse. In addition, HUD will support the launch of an inter-agency effort led by HUD and the Department of Commerce's Economic Development Administration (EDA). The initiative will help chronically distressed communities to better employ the Federal investments they already receive, promote high-impact strategies, and build the local capacity needed to execute those strategies. TI funds will be provided for technical assistance associated with this initiative and a National Resource Bank, a one-stop shop of experts that communities can draw upon for a full range of services, including fiscal reforms, re-purposing land use, and business cluster and job market analysis.

The following table illustrates the *maximum* possible transfers from HUD's programs into the Transformation Initiative account in 2012; it does not represent actual transfers.

MANAGEMENT OF LANDS AND RESOURCES—Continued

**Land resources.**—Provides for management of rangeland and forest resources; riparian areas; soil, water, and air activities; wild horses and burros; and cultural resources.

**Wildlife and fisheries management.**—Provides for maintenance, improvement, or enhancement of fish and wildlife habitats as part of the management of public lands and ecosystems.

**Threatened and endangered species management.**—Provides for protection, conservation, consultation, recovery, and evaluation of populations and habitats of threatened, endangered and special status animal and plant species.

**Recreation management.**—Provides for management and protection of recreational resource values, designated and potential wilderness areas, and collection and expenditure of recreation user fees.

**Energy and minerals management.**—Provides for management of onshore oil and gas, coal, geothermal resources and other leasable minerals; mineral materials activities; and the administration of encumbrances on the mineral estate on Federal and Indian lands. The Budget continues to fund oil and gas management activities through a combination of direct appropriations and offsetting collections generated from assessing fees for inspection and processing applications for permits to drill. Beginning in 2012, BLM will manage other renewable energy resources, such as wind and solar, from this activity. The 2012 President's Budget assumes higher offsetting collections from fees for conducting inspections in the Oil and Gas Management program.,

**Realty and ownership management.**—Provides for management and non-reimbursable processing of authorizations and compliance for realty actions and rights-of-way (including Alaska), administration of land title records and completion of cadastral surveys on public lands.

**Resource protection.**—Provides for management of the land use planning and National Environmental Policy Act processes, including monitoring activities. Also ensures the health and safety of users of the public lands through protection from criminal and other unlawful activities; the effects of hazardous material and/or waste; and physical safety hazards.

**Transportation and facilities maintenance.**—Provides for maintenance of administrative and recreation sites, roads, trails, bridges and dams, including compliance with building codes and standards and environmental protection requirements. These funds allow for the systematic management of facilities with critical health and safety concerns, and ensure the protection of natural and cultural resources and the environment.

**Land and resource information systems.**—Provides for the operation and maintenance of existing bureau-wide automated systems and for the development and bureau-wide implementation of Land and Resource Information Systems.

**Workforce and organizational support.**—Provides for the management of specified bureau business practices, such as human resources, Equal Employment Opportunity, financial resources, procurement, property, general use automated systems, and fixed costs.

**Communication sites.**—Provides for the processing of communication site use authorization requests.

**Mining law administration.**—Provides for exploration and development of minerals on public lands pursuant to the General Mining Law of 1872, including validity examinations, patent application reviews, enforcement of environmental and bonding requirements, and recordation of mining claims. Program costs are expected to be fully offset by claim maintenance and other fees in 2012.

**Challenge Cost Share (CCS).**—This program leverages non-Federal funding, in-kind services, and materials with Federal funding to conduct on-the-ground projects that improve conditions of the public lands. These conservation, restoration, and enhancement projects benefit forestry, range, riparian, fish, wildlife, threatened and endangered species, recreation, and cultural resources.

**National Landscape Conservation System (NLCS).**—Provides for the management of National Monuments, National Conservation Areas, and other Congressional conservation designations, key units in the NLCS. The program provides for the recurring operational (base) budgets of these NLCS units.

Permanent operating funds accounts include:

**Operations and maintenance of quarters.**—Funds in this account are used to maintain and repair BLM employee-occupied quarters from which rental charges are collected. Agencies are required to collect quarters rentals from employees who occupy Government-owned housing and quarters. This housing is provided only in isolated areas or where an employee is required to live on-site at a Federally owned facility or reservation.

**Forest ecosystems health and recovery.**—Funds in this account are derived from revenue generated from the Federal share of receipts from the sale of salvage timber from the Oregon and California grant lands, public domain lands, and Coos Bay Wagon Road lands. This account was established to allow BLM to more efficiently and effectively address forest health issues. Funds can be used for other forest health purposes, including release from competing vegetation and density control treatments.

**Timber sale pipeline restoration fund.**—This fund provides for the deposit and use of fees collected by BLM for sales of non-salvage timber pursuant to the timber salvage provisions of Public Law 104–19 and Public Law 105–83. Of the total deposited into this account, 75 percent is to be used for preparation of timber sales to fill the timber pipeline on lands administered by BLM, and 25 percent is to be expended on the backlog of recreation projects on BLM lands.

**Expenses, road maintenance deposits.**—Users of certain roads under BLM's jurisdiction make deposits for maintenance purposes. Moneys collected are appropriated for necessary road maintenance. Moneys collected on Oregon and California grant lands are available only for those lands (43 U.S.C. 1762(c), 43 U.S.C. 1735(b)).

**Federal Lands Recreation Enhancement Act, BLM.**—The Federal Lands Recreation Enhancement Act (FLREA) was enacted on December 8, 2004 as part of the Consolidated Appropriations Act for 2005. FLREA replaced the Recreation Fee Demonstration Program, and most current BLM sites have transitioned to the new program. All receipts collected under this authority are deposited to this account. BLM returns 100

percent of these receipts back to the site where the fees were generated. FLREA authorizes this program through 2014.

**Acquisitions in Deschutes, Oregon from land sale receipts.**—Pursuant to Public Law 105–221, the Oregon Public Lands Transfer Act, the Secretary of the Interior is authorized to use the proceeds from sales in Deschutes County to purchase environmentally sensitive lands.

**Operations and acquisitions in Nevada from land sale receipts.**—Pursuant to Public Law 105–263, 85 percent of receipts from sales of public domain lands in southern Nevada are used to acquire environmentally sensitive land in the State, implement certain conservation initiatives on Federal land in Clark County, Nevada, make capital improvements to areas administered by the National Forest Service, Fish and Wildlife Service, and BLM in Clark County, Nevada, and develop parks, trails, and natural areas in Clark County, Nevada.

**Lincoln County Land Sales Act.**—Public Law 106–298 authorizes the Secretary to dispose of certain lands in Lincoln County, Nevada, and distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the County; and 85 percent to an interest bearing account that is available for expenditure without further appropriation.

**White Pine County Land Sales Act.**—Public Law 109–432 authorizes the Secretary to dispose of certain lands in White Pine County, Nevada, distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the County; and 85 percent to an account that is available for expenditure without further appropriation for the management of archaeological resources, wilderness protection, recreation activities, preparation of a management plan, reimbursement for sale costs, and other purposes.

**Leases from Naval Petroleum Reserve No. 2.**—The 2005 Energy Policy Act established this fund for environmental investigation and restoration on that site. A portion of revenue from new leases on the site is authorized to be deposited to this account.

**BLM Permit Processing Improvement Fund.**—The 2005 Energy Policy Act established this pilot program. Fifty-percent of the rents from non-geothermal onshore mineral leases are authorized to be deposited in this fund through 2015 and used to increase BLM oil and gas permit processing.

**Geothermal Lease Revenue Fund.**—The 2005 Energy Policy Act established this fund. Twenty-five percent of geothermal bonuses, rents, and royalties were authorized to be deposited to this account through 2010 and used to expedite geothermal leasing activities. Unobligated balances are being spent to continue that work.

**Federal land disposal.**—The Federal Land Transaction Facilitation Act, P.L. 106–248 (114 Stat. 613), provides authority for BLM to sell public lands that were classified as suitable for disposal under resource management plans in effect at the time of enactment. This law provides that receipts from such sales may be used to acquire non-Federal lands with significant resource values that fall within the boundaries of areas now managed by DOI. This authority expires on July 25, 2011. All funds not obligated by July 25, 2010 were transferred to the Land and Water Conservation Fund.

**Owyhee Land Acquisition Account.**—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1039), provides that the Secretary may sell public land located within the Boise District of the Bureau of Land Management that, as of July 25, 2000, was identified for disposal in appropriate resource management plans. Amounts in the account shall be available to the Secretary, without further appropriation, to purchase land or interests in land in, or adjacent to, certain wilderness areas.

PERMANENT OPERATING FUNDS—Continued

*Washington County, Utah Land Acquisition Account.*—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1091), authorizes the sale of public land located within Washington County, Utah, that, as of July 25, 2000, has been identified for disposal in appropriate resource management plans. Amounts in the account shall be available to the Secretary, without further appropriation, to purchase land or interests in land in, or adjacent to, certain wilderness areas.

*Silver Saddle Endowment Account.*—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1114), requires Carson City to deposit twenty-five percent of the difference between what the Secretary of the Interior and the City paid for the 62 acre Bernhard parcel before the Secretary conveys the land to the City. Amounts deposited in the account established by paragraph (1) shall be available to the Secretary, without further appropriation, for the oversight and enforcement of a certain conservation easement.

*Carson City Special Account.*—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1113), authorizes the sale of 158 acres of public land described in the statute. Five percent of the proceeds are paid to the State of Nevada for use for public education. The remainder is deposited to this account and used to acquire environmentally sensitive land or an interest in environmentally sensitive land in Carson City; to cover the cost of surveys and appraisals; and to reimburse the Bureau of Land Management for administrative expenses.

*Reauthorize the Federal Lands Transaction Facilitation Act (FLTFA).*—The Administration's proposal includes eliminating the Act's July 2011 sunset date and allowing lands identified as suitable for disposal in recent land use plans to be sold using the FLTFA authority. FLTFA sales revenues would continue to be used to fund the acquisition of environmentally sensitive lands and the administrative costs associated with conducting sales.

*Terminate the BLM Permit Processing Improvement Fund.*—The 2005 Energy Policy Act (EPA) established a pilot program to improve oil and gas permit processing. To fund the pilot program, 50 percent of the rents from non-geothermal onshore mineral leases are authorized to be deposited into this account through 2015. The mandatory nature of this funding reduces the agency's administrative flexibility to reallocate funding between programs and field offices. The Administration will submit legislation to eliminate this fund starting in 2013. In the meantime, for fiscal year 2012, the Budget assumes the mandatory fund will continue, resulting in a reduced need for discretionary appropriations. In 2012, BLM will also continue to rely on the oil and gas permit processing fees imposed by appropriations language and credited as offsetting collections to the Management of Lands and Resources account.

**Miscellaneous permanent payments include:**

*Payments for Oregon and California and Coos Bay Wagon Road grant lands, receipts.*—The Secure Rural Schools and

Community Self-Determination Act of 2000 (P.L. 106-393), as amended by P.L. 110-343, provides annual transition payments to the 18 O&C counties. These payments are derived from revenues from federal activities on O&C lands in the previous fiscal year that are not deposited to permanent operating funds, supplemented by amounts from the General Fund when necessary. The Act, as amended, is structured to phase out these payments. In 2009 through 2011, Secure Rural Schools payments are a declining percentage of the payments made in 2006; the payment in 2009 is 90% of the amount paid in 2006, 2010 is 81%, and 2011 is 73%. In 2012, counties not opting to receive a portion of the discretionary USDA Forest Service payment to communities will receive funds authorized under the 1937 and 1939 statutes. Payments to the Oregon counties under the 1937 statute will be 50% of revenues from O&C grant lands. Payments under the 1939 statute are for lost tax revenue in two Oregon counties and are estimated to be 75% of all revenues from Coos Bay Wagon Road grant lands.

*Payments to States (proceeds of sales).*—States are paid five percent of the net proceeds from the sale of public land and public land products (31 U.S.C. 1305).

*Payments to States from grazing receipts, etc., public lands outside grazing districts.*—States are paid 50 percent of the grazing receipts from public lands outside of grazing districts (43 U.S.C. 315i, 315m).

*Payments to States from grazing receipts, etc., public lands within districts.*—States are paid 12.5 percent of grazing receipts from public lands inside grazing districts (43 U.S.C. 315b, 315i).

*Payments to States from grazing receipts, etc., public lands within grazing districts, miscellaneous.*—States are paid specifically determined amounts from grazing receipts derived from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

*Payments to counties, National Grasslands.*—Of the revenues received from the use of Bankhead-Jones Act lands administered by BLM, 25 percent is paid to the counties in which such lands are situated, for school and road purposes (7 U.S.C. 1012).

*Payments to Nevada from receipts on land sales.*—(A) Public Law 96-586 authorizes and directs the Secretary to sell not more than 700 acres of public lands per calendar year in and around Las Vegas, Nevada, the proceeds of which are to be used to acquire environmentally sensitive lands in the Lake Tahoe Basin of California and Nevada. Annual revenues are distributed to the State of Nevada (five percent) and the county in which the land is located (10 percent). (B) Public Law 105-263, as amended by P.L. 107-282, authorizes the disposal through sale of approximately 49,000 acres in Clark County Nevada, the proceeds of which are to be distributed as follows: a) five percent for use in the general education program of the State of Nevada; b) 10 percent for use by the Southern Nevada Water Authority for water treatment and transmission facility infrastructure in Clark County, Nevada; and c) the remaining 85 percent to be used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by NPS, FWS and BLM in Clark County, Nevada; develop a multi-species habitat plan in Clark County, Nevada; develop parks, trails and natural areas and implement other conservation initiatives in Clark County, Nevada; and reimburse BLM for costs incurred arranging sales and exchanges under the Act. (C) Public Law 106-298 authorizes the sale of certain lands in Lincoln County, Nevada. The proceeds of these sales are to be distributed as follows: a) five percent to the State of Nevada for general education purposes; b) 10 percent to Lincoln County for general purposes with emphasis on supporting schools; and

c) the remaining 85 percent to be used by the Secretary of the Interior to acquire environmentally sensitive lands in the State of Nevada, for identification and management of unique archaeological resources, for development of a multi-species habitat conservation plan in the county, and for other specified administrative purposes.

*Cook Inlet Region Inc. property.*—This account received funding appropriated by section 9102 of the fiscal year 1990 Department of Defense Appropriations Act for the acquisition of Federal real properties, improvements on such lands or rights to their use or exploitation, and any personal property related to the land purchased by the Cook Inlet Region, Incorporated as authorized by the provisions of section 12(b) of Public Law 94–204 (43 U.S.C. 1611). Funds are made available to BLM for administration and subsequent payment to accounts accepting Cook Inlet Region, Incorporated offers for Federal properties.

*State 5% Share, Carson City Land Sales.*—The 2009 Omnibus Public Land Management Act, Public Law 111–11 (123 STAT. 1113), requires that five percent of proceeds from the sale of 158 acres described in the statute shall be paid to the State of Nevada for general public education purposes.

The Helium Act Amendments of 1960, Public Law 86–777 (50 U.S.C. 167), authorized activities necessary to provide sufficient helium to meet the current and foreseeable future needs of essential government activities.

The Helium Privatization Act of 1996, Public Law 104–273, provides for the eventual privatization of the program and its functions. In 2012, the Helium program will consist of:

- continued storage and transmission of crude helium;
- complete disposal of helium refining facilities and other excess property not needed for storage and transmission of crude helium;
- oversight of the production of helium on Federal lands; and
- administration of in-kind and open market crude helium gas sale program.

The estimates assume that the helium program will continue full implementation of the Helium Privatization Act.

The 2012 Budget reflects the phased reorganization of the former Minerals Management Service (MMS), directed by the Department of the Interior through Secretarial Order No. 3299 on May 19, 2010. As part of the transition to a new organizational structure, DOI established the Bureau of Ocean Energy Management, Regulation and Enforcement (BOEMRE) and moved the revenue management responsibilities of MMS (previously the Minerals Revenue Management program), to a new entity, the Office of Natural Resources Revenue (ONRR), within the Office of the Secretary.

The BOEMRE is the designated steward of the mineral resources on the Outer Continental Shelf (OCS), managing the Nation's oil, natural gas, and other energy and mineral resources on the OCS. Under the Energy Policy Act of 2005, BOEMRE acquired the responsibility of implementing a renewable energy program that will allow leasing on the OCS for the development of renewable energy resources, such as wind, wave, and ocean current energy. The reorganization of the former MMS is expected to be completed by the start of fiscal year 2012 with the further split of BOEMRE into two independent bureaus: the Bureau of Ocean Energy Management (BOEM), which will handle leasing, environmental and resource analysis, and general OCS energy management responsibilities, and the Bureau of Safety and Environmental Enforcement (BSEE), which will be responsible for permitting OCS oil and gas development operations and enforcing safety and environmental requirements related to those operations.

The BOEMRE's mission is supported by a General Administration program, which is responsible for providing leadership, developing organizational capabilities, coordinating strategic planning, building infrastructure, securing resources, and assuring the delivery of services. Until the transition is complete, BOEMRE and ONRR will continue to share certain administrative funding and resources. A general provision has been included in the proposed DOI appropriations language to provide administrative flexibility for the transfer of funds between DOI accounts to facilitate an orderly reorganization process.

The Energy Policy Act of 2005 (P.L. 109-58) amends section 31 of the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1356 et seq.) to require that for each of the fiscal years 2007 through 2010, \$250,000,000 in OCS revenues be distributed annually to coastal States that have submitted approved coastal impact assistance plans. The formula for distribution is based on the amount of qualified OCS revenues generated off the coastline of each producing State. In addition, 35 percent of each State's al-

locable share is to be distributed to coastal political subdivisions based on population, coastline, and distance to applicable OCS leases. Beginning in fiscal year 2011, this program will be transferred from the Bureau of Ocean Energy Management, Regulation and Enforcement to the U.S. Fish and Wildlife Service.

The Gulf of Mexico Energy Security Act of 2006 opened some additional areas in the Gulf of Mexico for offshore oil and gas leasing, while maintaining moratoria on activities east of the Military Mission Line and within certain distances from the coastline of Florida. The Act provides that 37.5 percent of Outer Continental Shelf revenues from certain leases be distributed to four coastal States (Alabama, Louisiana, Mississippi, and Texas) based on a complex allocation formula and subject to an annual cap in later years. The receipts are available in the year following collection, and the funding provided is to be used primarily for

coastal protection and restoration activities. These payments are now administered by the Office of Natural Resources Revenue within the Department of the Interior's Office of the Secretary.

As of May 23, 1908 (16 U.S.C. 499), 25 percent of the revenues collected from onshore mineral leasing and production on national forest lands have been paid to the State in which the national forest resides. A State's payment is based on national forest acreage and when a national forest is situated in several States, an individual State payment is proportionate to its area within that particular national forest. These payments are now administered by the Office of Natural Resources Revenue within the Department of the Interior's Office of the Secretary.

**Environmental protection.**—This activity funds those functions that directly contribute to ensuring that the environment is protected during surface coal mining operations. It also addresses those activities that ensure that coal operators adequately reclaim the land after mining is completed.

Under this activity, OSM provides grants and support to States to operate enforcement programs on State and private lands under the terms of the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This activity also provides for the operation of enforcement programs on Federal and Indian lands, as well as Federal oversight of these regulatory programs.

**Technology development and transfer.**—This activity provides funding to enhance the technical skills that States and Indian Tribes need to operate their regulatory programs. It provides technical tools, such as the Applicant Violator System, to States and Indian Tribes to solve problems related to the environmental effects of coal mining and to fund technical studies to address specific coal mining issues.

**Financial management.**—This activity provides resources for managing, accounting, and processing collections and for pursuing delinquent civil penalties. This includes developing and maintaining information management systems that support these functions and enhance the agency's ability to deny new mining permits to applicants with unabated State or Federal violations.

**Executive direction and administration.**—This activity provides funding for executive direction, general administrative support,

and the acquisition of certain agency-wide common services, such as rent, telephones, and postage.

**Environmental restoration.**—This activity funds those functions that contribute to reclaiming lands affected by past coal mining practices.

This activity provides discretionary funding for the Federal reclamation program for watershed restoration projects, and for the evaluation of State and tribal reclamation programs that now receive mandatory funding for reclamation activities.

**Technology development and transfer.**—This activity provides funding to enhance the technical skills that the States and Indian tribes need to operate their reclamation programs. OSM conducts technical studies on mining and reclamation-related problems.

**Financial management.**—This activity provides funds to identify, notify, collect, and audit fees from coal operators for the Abandoned Mine Reclamation Fund. OSM seeks to maximize voluntary compliance with the SMCRA's reclamation fee provisions.

**Executive direction and administration.**—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services such as rent, telephones, and postage.

Public Law 109-432 authorizes mandatory Treasury payments to three United Mine Workers of America (UMWA) retiree health benefit plans (the Combined Benefit Fund, the 1992 Plan, and the 1993 Plan), to the extent that other Federal funding sources do not meet the plans' expenditure needs, subject to certain limitations. Interest earned on Abandoned Mine Land trust fund balances is available for transfer to cover funding shortfalls in the plans; unobligated balances in the fund are used to generate interest for this purpose.

ADMINISTRATIVE PROVISION

*With funds available for the Technical Innovation and Professional Services program in this Act, the Secretary may transfer title for computer hardware, software and other technical equipment to State and tribal regulatory and reclamation programs.*

**WATER AND SCIENCE**

BUREAU OF RECLAMATION

Appropriations to the Bureau are made from the General Fund and special funds. The source of funds are a) the General Fund, which funds other projects or programs. Among the projects funded from the General Fund are the Colorado River Basin Project and the Colorado River Storage Project; b) the Reclamation Fund, derived from repayments and other revenues from water and power users, receipts from the sale, lease, and rental of Federal lands, and certain oil and mineral revenues. Program activities that can be financed from the Reclamation Fund are those that directly benefit the 17 Western States and are for the purposes authorized under "Reclamation Law"; c) the Central Valley Project Restoration Fund, consisting of revenues from

project beneficiaries; and d) other sources such as the Colorado River Dam Fund, which generates revenue from the sale of Boulder Canyon power, and the recreation, entrance, and use fee account, consisting of fees collected pursuant to the Land and Water Conservation Fund Act of 1965, as amended. Non-Federal entities also advance funds for operation and maintenance and provide funds under the Contributed Funds Act. The Water and Related Resources account supports the development, management, and restoration of water and related natural resources in the 17 Western States. The account includes funds for operating and maintaining existing facilities to obtain the greatest overall level of benefits, to protect public safety, and to conduct studies on ways to improve the use of water and related natural resources. Work will be done in partnership and cooperation with non-Federal entities and other Federal agencies to reduce conflict, facilitate solutions to complex water issues and stretch limited water supplies. The American West is the fastest growing region of the country and faces serious water challenges. Adequate and safe water supplies are fundamental to the health, economy, security, and ecology of the country. With increased demands for water from growth and energy needs, amplified recognition of environmental water requirements, and the potential for decreased supplies due to drought and climate change, a water balance cannot be achieved without water conservation and water reuse. Federal leadership is critical to widespread acceptance and implementation of effective conservation and recycling techniques. In 2012, Reclamation will help address these issues through a water conservation initiative, which includes cost-shared grants for conservation and water and energy management improvement projects; basin-wide planning studies that will address the impacts of climate change; cooperative watershed management; and funding of water reuse and recycling projects through the Title XVI Water Reclamation and Reuse Program. Reclamation will also partner with States, tribes and local entities under the initiative to develop incentives and best practices for implementing water and energy conservation and water recycling projects.

This fund was established to carry out the provisions of the Central Valley Project Improvement Act—to provide funding from project beneficiaries for habitat restoration, improvement and acquisition, and other fish and wildlife restoration activities in the Central Valley Project (CVP) area of California. Resources are derived from donations, revenues from voluntary water transfers and tiered water pricing. The account is also financed through additional mitigation and restoration payments collected on an annual basis from project beneficiaries.

This fund receives funding (user fees and repayment receipts) from the Friant Division long-term contractors and other Federal and non-Federal sources to implement the provisions described in the Settlement (Settlement) for the National Resources Defense Council (NRDC) et al. v. Rodgers lawsuit. The Settlement's two primary goals are: 1) To restore and maintain fish populations in "good condition" in the main stem of the San Joaquin River below Friant Dam to the confluence of the Merced River, including naturally reproducing and self-sustaining populations of salmon and other fish; and 2) To reduce or avoid adverse water supply impacts to all of the Friant Division long-term contractors that may result from the Interim Flows and Restoration Flows provided for in the Settlement.

The U.S. Geological Survey (USGS) provides research and scientific information to support the mission of the Department of the Interior (Interior) and its science requirements. The USGS also works in collaboration with other Federal, State, and tribal

cooperators to conduct research and provide scientific data and information concerning natural hazards and environmental issues pertaining to the water, land, geologic, and biological resources of the Nation. The 2012 Budget realigns the USGS budget along its science mission areas and continues science programs that generate relevant, objective information for natural resource managers and for communities throughout the Nation and engages in partnerships with universities, research institutions, and major public and private laboratories.

**Ecosystems.**—The USGS Ecosystems mission area monitors and inventories biological resources and ecological systems; provides scientific information for the management of biological resources and their habitats; predicts the consequences of environmental change and the effects of alternative management actions on plants, animals, and their habitats; conducts the high priority ecological and biological research needed by Interior land management bureaus; and operates the Cooperative Research Unit program, a university-based fish and wildlife research program focusing on graduate education and training of future natural resource professionals.

**Climate and Land Use Change.**—The USGS Climate and Land Use Change mission area undertakes scientific research, monitoring, remote sensing, modeling, and forecasting to address the effects of climate and land use change on the Nation's natural resources. The resulting research and products are provided as the scientific foundation upon which policymakers, natural resource managers, and the public make informed decisions about the management of natural resources.

**Energy, Minerals, and Environmental Health.**—The USGS Energy, Minerals, and Environmental Health mission area includes scientific activities that support natural resource security; environmental, wildlife, and human health; land and resource management; and economic development. The mission area provides scientific information for assessments and research on mineral and energy resource potential, production and consumption, and the environmental effects of extraction and use in the United States and around the world. The mission area also provides information and tools to decision makers and the public regarding environmental contaminants, including impacts on susceptible ecosystems and implications for human, wildlife and fish health.

**Natural Hazards.**—The USGS plays a critical role in providing policymakers and the public with a clear understanding of potential threats from natural hazards, societal vulnerability to these threats, and strategies for achieving resilience to earthquakes, volcanic eruptions, landslides, floods, hurricanes, solar storms, tsunamis, and wildfires. The USGS Natural Hazards mission area is working with its partners and stakeholders to define and mitigate risks, build understanding of natural hazard processes, and characterize the potential impact and consequences on human activity, health, the economy, and the environment. This mission area includes USGS activities that characterize and assess coastal and marine processes, conditions, change and vulnerability.

**Water Resources.**—The USGS is the primary Federal science agency for water information. To fulfill this responsibility, the USGS Water Resources mission area produces data, analyses, assessments, and methodologies to support Federal, State, tribal, and local government decisions on effectively managing water resources for domestic, agricultural, commercial industrial, recreational, and ecological uses; protecting and enhancing water resources for human health, aquatic health, and environmental quality; minimizing loss of life and property as a result of water-related natural hazards, such as floods, droughts, and land movement; and contributing to wise physical and economic devel-

opment of the Nation's resources for the benefit of present and future generations.

**Core Science Systems.**—The USGS Core Science Systems mission area conducts fundamental research and provides data about the Earth, its complex processes, and its natural resources. These activities provide the Nation with natural science information to support response planning for natural hazards and to manage natural resources. Core Science Systems produces geological, geophysical, and geochemical maps and three-dimensional geologic frameworks that provide critical data for sustaining and improving the quality of life and economic vitality of the Nation, and creates the informatics framework and provides scientific content needed for the understanding and stewardship of our Nation's biological, geologic, and geospatial resources.

**Administration and Enterprise Information.**—The USGS Administration and Enterprise Information mission area provides Bureau-wide executive direction and coordination, business administration and financial management, and management of information technology infrastructure, processes and systems.

**Facilities.**—The USGS Facilities mission area provides safe, functional workspace, state of the art labs, and facilities for the USGS to accomplish its scientific mission. The mission area provides rental payments and operation and maintenance for properties; deferred maintenance and capital improvement for existing assets; and construction to renovate or build new facilities.

**Reimbursable program.**—Reimbursements from non-Federal sources are from States, Tribes, and municipalities for: cooperative efforts and proceeds from sale to the public of copies of photographs and records; proceeds from sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from foreign countries and international organizations for technical assistance. Reimbursements from other Federal agencies are for mission-related work performed at the request of the financing agency.

The National Land Imaging account is being created in 2012 to fund land imaging and remote sensing activities conducted by the U.S. Geological Survey. Program components include development, operations, and maintenance of the Landsat satellites and ground systems, now and in the future, to ensure continuity of Landsat data. While a separate Treasury account, the effort will be managed as a component of the USGS Climate and Land Use Change mission area.

**Ecological Services.**—The Service conserves, protects, and enhances fish, wildlife, plants, and their habitat by working with private landowners, States, Tribes, non-governmental organizations, and other Federal agencies. These partnership activities help protect and recover species that are listed under the Endangered Species Act and work towards making the listing of additional species unnecessary. Financial assistance is provided to private landowners to restore or improve habitat for endangered species and other at-risk species. Technical assistance helps prevent or minimize adverse environmental effects of development projects. Contaminants are investigated, monitored, and assessed for effects on trust resources.

**National Wildlife Refuge System.**—The Service maintains the National Wildlife Refuge System consisting of 554 refuges, waterfowl production areas in 206 counties that are managed by 38 wetland management districts, and 50 coordination areas. The National Wildlife Refuge System administers this network of more than 150 million acres of land and waters to conserve and restore fish, wildlife, plants, and their habitats, within the United States for the benefit of present and future generations of Americans.

**Migratory Bird Management, Law Enforcement, and International Affairs.**—The Service directs and coordinates national migratory bird programs to protect and enhance populations and habitat of more than 900 species of birds. Grants and partnerships are key to these programs, such as the Joint Ventures that implement the North American Waterfowl Management Plan. The Service Law Enforcement program investigates wildlife crimes, regulates wildlife trade, helps Americans understand and obey wildlife protection laws, and works in partnership with international, State, and Tribal counterparts to conserve wildlife resources. The Service, through the International Affairs Program, works with private citizens, local communities, State and Federal agencies, foreign governments, and non-governmental organizations in the U.S. and internationally to promote a coordinated domestic and international strategy to protect, restore, and enhance the world's diverse wildlife and their habitats, with a focus on species of international concern.

**Fisheries.**—The Fisheries Program consists of 71 National Fish Hatcheries, nine Fish Health Centers, seven Fish Technology Centers, 65 Fish and Wildlife Conservation Offices, and a Historic National Fish Hatchery. Working with partners, the Fisheries Program recovers, restores and maintains fish and other aquatic resources at self-sustaining levels; provides technical assistance

to States, Tribes and others; and supports Federal mitigation programs for the benefit of the American public.

**Cooperative Landscape Conservation and Adaptive Science.**—Through a national network of Landscape Conservation Cooperatives (LCCs), the Service enhances its core capacity in biological planning and conservation design to strategically address the problems fish and wildlife will face in the future. These LCCs, in cooperation with both Federal and non-Federal partners, will conduct the planning necessary to implement effective on-the-ground strategies and actions to help fish and wildlife adapt to future challenges. The information gathered will also help to define clear conservation objectives, inform conservation management decisions, focus management actions where they will have the most effect on the landscape, and supply scientific knowledge and expertise needed most by the Service and its partners.

**General operations.**—Funding for the Service's general operations provides policy guidance, program coordination, and administrative services to all fish and wildlife programs. The funds also support the National Conservation Training Center, and projects through the National Fish and Wildlife Foundation to restore and enhance fish and wildlife populations.

The State and Tribal Wildlife Grants program provides funds to States, Commonwealths and Territories primarily through a formula-based apportionment. Additionally, a sizable competitive program uses a merit-based process to fund the best outcome-oriented, results-based projects. Tribes also receive funds through a national competitive award process. These funds are provided to stabilize, restore, enhance, and protect species and their habitat that are of conservation concern, thereby avoiding the costly and time-consuming process that occurs when habitat is degraded or destroyed and species populations plummet.

Federal Land Acquisition funds are used to protect areas that have native fish or wildlife values and provide natural resource benefits over a broad geographical area. Funds in this account also cover acquisition management activities, such as title fees and land surveys. The Service places emphasis on acquiring important fish, wildlife and plant habitat for the conservation of listed endangered and threatened species. The Land Acquisition program uses alternative and innovative conservation tools, including conservation easements, and implements projects that have the input and participation of the affected local communities and stakeholders.

Funds deposited into this account include direct appropriations and fines, penalties, and forfeitures collected under the authority of the Migratory Bird Treaty Act (16 U.S.C. 707) and interest on obligations held in the Federal Aid in Wildlife Restoration Fund. The North American Wetlands Conservation Fund supports wetlands conservation projects approved by the Migratory Bird Conservation Commission. A portion of receipts to the Sport Fish Restoration Account is also available for coastal wetlands conservation projects.

These projects help fulfill the habitat protection, restoration and enhancement goals of the North American Waterfowl Management Plan and the Tripartite Agreement among Mexico, Canada, and the United States. These projects may involve partnerships with public agencies and private entities, with non-Federal matching contributions, for the long-term conservation of habitat for migratory birds and other fish and wildlife, including species that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531).

Wetlands conservation projects include the obtaining of a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

The Cooperative Endangered Species Conservation Fund provides grants to States and U.S. territories for species and habitat conservation actions on non-federal lands, including habitat acquisition, conservation planning, habitat restoration, status surveys, captive propagation and reintroduction, research, and education for species that are listed, or species that are candidates for listing, as threatened or endangered. These activities support recovery efforts and Habitat Conservation Plans in partnership with local governments and other interested parties to protect species. Appropriations to this account are financed by the Land and Water Conservation Fund and by a permanent fund that receives a transfer of General Funds of the U.S. Treasury. This permanent fund receives a transfer equal to five percent of receipts deposited to the Federal Aid in Wildlife and Sport Fish Restoration accounts plus Lacey Act receipts over \$500,000. Funds made available for grants from the permanent account are subject to annual appropriations authorized by Congress.

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes revenues through the sale of products from Service lands, less expenses for producing revenue and activities related to revenue sharing. The Fish and Wildlife Service makes payments to counties in which Service fee lands are located. While direct appropriations have previously been used to supplement revenues, the 2012 budget eliminates discretionary funding as formulas contained in the Act do not account for the economic benefits which refuges provide.

The Federal Lands Recreation Enhancement Act (FLREA) was passed on December 8, 2004, as part of the Omnibus Appropriations bill for 2005. Approximately 200 Fish and Wildlife Service sites collect entrance fees and other receipts. All receipts are deposited into a recreation fee account of which at least 80 percent is returned to the collecting site.

The recreation fee program demonstrates the feasibility of user generated cost recovery for the operation and maintenance of recreation areas, visitor services improvements, and habitat enhancement projects on federal lands. Fees are used primarily at the site to improve visitor access, enhance public safety and security, address maintenance needs, enhance resource protection, and cover the costs of collection. Recreation fees are often used at Fish and Wildlife sites to fund student interns and for various youth programs focusing on hunting, fishing, wildlife observation, wildlife photography, environmental education and environmental interpretation. FLREA authorizes this program through 2014.

The Federal Aid in Wildlife Restoration Act, now known as the Pittman-Robertson Wildlife Restoration Act, created a program to fund the selection, restoration, rehabilitation and improvement of wildlife habitat, hunter education and safety, and wildlife management research. Under the program, States, Puerto Rico,

Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds from an excise tax on sporting arms and ammunition, handguns, and a tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106-408) amends the Pittman-Robertson Wildlife Restoration Act and authorizes a Multistate Conservation Grant Program and a firearm and bow hunter education and safety enhancement program that provides grants to the States.

The Energy Policy Act of 2005 (P.L. 109-58) amends section 31 of the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1356 et seq.) to require that for each of the fiscal years 2007 through 2010, \$250,000,000 in OCS revenues be distributed annually to coastal States that have submitted approved coastal impact assistance plans. The formula for distribution is based on the

amount of qualified OCS revenues generated off the coastline of each producing State. In addition, 35 percent of each State's allocable share is to be distributed to coastal political subdivisions based on population, coastline, and distance to applicable OCS leases. Beginning in fiscal year 2011, this program will be transferred from the Bureau of Ocean Energy Management, Regulation and Enforcement to the U.S. Fish and Wildlife Service.

The Federal Aid in Sport Fish Restoration Act, now known as the Dingell-Johnson Sport Fish Restoration Act (as modified by the Wallop-Breaux and other amendments), created a fishery resources, conservation, and restoration program funded by excise taxes on fishing equipment, and certain other sport fish related products.

Since 1992, the Sport Fish Restoration Account has supported coastal wetlands grants pursuant to the Coastal Wetlands Planning, Protection and Restoration Act (P.L. 101-646). Additional revenue from small engine fuel taxes was provided under the Surface Transportation Extension Act of 1997 and again by the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users, enacted for 2006 through 2009. Reauthorization is pending.

The Coastal Wetlands Planning, Protection and Restoration Act is funded through the Dingell-Johnson Sport Fish Restoration Act, which requires an amount equal to 18.5 percent of net deposits into the Sport Fish Restoration and Boating Safety Trust Fund, or amounts collected in small engine fuels excise taxes as provided by 26 U.S.C. 9504(b), whichever is greater, to be distributed as follows: 70 percent shall be available to the Corps of Engineers for priority project and conservation planning activities in Louisiana; 15 percent shall be available to the Fish and Wildlife Service for coastal wetlands conservation grants; and 15 percent to the Fish and Wildlife Service for wetlands conservation projects under Section 8 of the North American Wetlands Conservation Act (P.L. 101-233).

The Clean Vessel Act authorizes the Secretary of the Interior to make grants to States, in specified amounts as determined through a competitive award process, to carry out projects for

the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities. The Dingell-Johnson Sport Fish Restoration Act, as amended, provides for the transfer of funds from the Sport Fish Restoration and Boating Trust Fund to the Sport Fish Restoration Account for use by the Secretary of the Interior to carry out the purposes of this Act and for use by the Secretary of Homeland Security for State recreational boating safety programs (46 USC 13106(a)(1)). The Sportfishing and Boating Safety Act of 1998 authorizes the Secretary of the Interior to develop national and State outreach plans to promote safe fishing and boating opportunities and the conservation of aquatic resources, as well as to make grants to States for developing and maintaining sewage disposal facilities and other boating facilities for recreational vessels.

Assistance is provided to States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the District of Columbia for up to 75 percent of the cost of approved projects including: research into fisheries problems, surveys and inventories of fish populations, acquisition and improvement of fish habitat and provision of access for public use.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106-408) amends the Dingell-Johnson Sport Fish Restoration Act and authorizes a Multistate Conservation Grant Program and provides funding for several fisheries commissions and the Sport Fishing and Boating Partnership Council.

The National Park Service administers 394 areas and 84.4 million acres of Federal land in 49 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, Samoa, and the Northern Marianas. Since 2008, park visits have totaled over 285 million annually. This annual appropriation funds the operation of individual units of the National Park System through two budget activities. Funds within this appropriation are available for one year, with the exception of repair and rehabilitation funds and funds for the cooperative restoration of the Everglades, which are both funded for two years.

The first activity, Park Management, covers the management and operation of park areas, and is divided into five subactivities that represent functional areas:

**Resources stewardship.**—Encompasses resource management operations that provide for the protection and preservation of the unique natural, cultural, and historical features of units in the National Park System.

**Visitor services.**—Includes operations that provide orientation, educational, and interpretive programs to enhance the visitor's park experience. It also provides for the efficient management of concession contracts, commercial use authorizations, and franchise fees for the benefit of visitors and the protection of resources.

**Park protection.**—Provides for the protection of park resources, visitors, and staff. Funding supports law enforcement operations that reduce vandalism and other destruction of park resources, safety and public health operations, and the operations of the United States Park Police.

**Facility operations and maintenance.**—Encompasses the maintenance and protection of buildings, other facilities, lands required to accommodate visitor use, and other government investments.

**Park support.**—Covers the management, supervision, and administrative operations for park areas and partnerships.

The second activity, External Administrative Costs, funds costs which are largely determined by organizations outside the National Park Service and for which funding requirements are therefore less flexible. The requirements for these costs are mandated in accordance with applicable laws. To promote the efficient performance of the National Park Service, these costs are most effectively managed on a centralized basis.

The Construction appropriation is composed of five budget activities:

**Line item construction.**—This activity provides for the construction, rehabilitation, and replacement of facilities needed to accomplish the management objectives approved for each park. Projects are categorized as facility improvement, utility systems rehabilitation, historic preservation, or natural resource preservation.

**Special programs.**—This activity includes Emergency and Un-scheduled Projects, the Seismic Safety of National Park System Buildings Program, Employee Housing, Dam Safety, and Equipment Replacement.

**Construction planning.**—This activity includes the project planning function in which funds are used to prepare working drawings, specification documents, and contracts needed to construct or rehabilitate National Park Service facilities.

**Construction planning management and operations.**—This activity complies with the National Academy of Public Adminis-

tration recommendations to base fund construction program management through offices in Washington, D.C. and Denver, CO. The NPS design center located in Harpers Ferry, WV is also under this activity.

**Management planning.**—Under this activity, funding is used to prepare and update Unit Management Plans. The plans guide National Park Service actions for the protection, use, development, and management of each park unit. Funding is also used to conduct studies of alternatives for the protection of areas that may have potential for addition to the National Park System and for environmental impact planning and compliance.

The Land Acquisition and State Assistance appropriation uses funding derived from the Land and Water Conservation Fund to support NPS land acquisition activities and provide grants to States for the purchase and development of land for outdoor recreation activities. The appropriation is composed of the five following budget activities:

**Federal land acquisition administration.**—Provides for the administration of land acquisitions throughout the National Park System, ensuring compliance with existing guidelines and laws.

**Federal land acquisition.**—Provides for the acquisition of land and interests in land to preserve and protect, for public use and enjoyment, the historic, scenic, natural, and recreational values of congressionally authorized areas within the National Park System. Funds are also used for matching grants for the purchase of Civil War Battlefield lands by non-Federal entities.

**State conservation grants administration.**—Provides for the administration of matching grants to States and through States to local governments, for the acquisition and development of public outdoor recreation areas and facilities.

**State conservation grants.**—This activity provides matching grants to States and local units of government for the acquisition and development of land and facilities that will provide the public access to new opportunities to engage in outdoor recreation.

**Outer Continental Shelf Oil Lease Revenues.**—The Gulf of Mexico Energy Security Act of 2006 (P.L. 109-432) allows a portion of the revenue collected from oil and gas leasing activities in qualified areas just becoming available for leasing in the Outer Continental Shelf (OCS) to be deposited to the Land and Water Conservation Fund (LWCF) and distributed to states in accordance with the Land and Water Conservation Act of 1965. The National Park Service portion of the revenue is 12.5 percent of total qualified OCS revenues. These new OCS receipts became available for expenditure as mandatory funding beginning in 2009. The Omnibus Appropriations Act, 2009, (P.L. 111-8) permits the use of up to three percent of the amounts authorized to be disbursed for costs of administration.

**Recreation Fee Program.**—The National Park Service and other land management agencies operate a fee program that allows parks and other units to collect admission and user fees in accordance with the Federal Lands Recreation Enhancement Act (FLREA). FLREA was passed on December 8, 2004, as part of the Omnibus Appropriations Act, 2005, and authorizes this pro-

gram through 2014. Net proceeds are used for high-priority visitor service and facility management projects throughout the National Park System. By law, up to 80 percent may be retained for use by the collecting park and the remainder retained for discretionary, Servicewide use by the National Park Service Director. Also by law, up to 15 percent of proceeds may be used for administration, overhead, and indirect costs related to the program. Proceeds from the sale of the America the Beautiful passes, which allow access to all public lands that charge fees for a year, are distributed between the Federal land management agencies which offer them for sale, including the National Park Service, the Bureau of Land Management, the U.S. Fish and Wildlife Service, the Bureau of Reclamation and the U.S. Forest Service, as determined by the Secretaries of the Department of the Interior and the Department of Agriculture in accordance with Public Law 108-447.

**Deed-restricted parks fee program.**—Park units where admission fees may not be collected by reason of deed restrictions retain any other recreation fees collected and use them for certain park operation purposes in accordance with Public Law 105-327. This law applies to Great Smoky Mountains National Park, Lincoln Home National Historic Site, and Abraham Lincoln Birthplace National Historic Site.

**Transportation systems fund.**—Fees charged for public use of transportation services at parks are retained and used by each collecting park for costs associated with the transportation systems in accordance with section 501 of Public Law 105-391.

**Educational expenses, children of employees, Yellowstone National Park.**—Revenues received from the collection of short-term recreation fees to the park are used to provide education facilities to pupils who are dependents of persons engaged in the administration, operation, and maintenance of Yellowstone National Park (16 U.S.C. 40a).

**Payment for tax losses on land acquired for Grand Teton National Park.**—Revenues received from fees collected from visitors are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (16 U.S.C. 406d-3).

**Park concessions franchise fees.**—Franchise fees for concessioner activities in the National Park System are deposited in this account and used for certain park operations activities in accordance with section 407 of Public Law 105–391. By law, 20 percent of franchise fees collected are used to support activities throughout the National Park System and 80 percent are retained and used by each collecting park unit for visitor services and for purposes of funding high-priority and urgently necessary resource management programs and operations.

**Concessions improvement accounts.**—National Park Service agreements with private concessioners providing visitor services within national parks can require concessioners to deposit a portion of gross receipts or a fixed sum of money in a separate bank account. A concessioner may expend funds from such an account with the approval of the park superintendent for improvements to facilities that directly support concession visitor services, but would not otherwise be funded through the appropriations process. Concessioners do not accrue possessory interests from improvements funded through these accounts.

**Park buildings lease and maintenance fund.**—Rental payments for leases to use buildings and associated property in the National Park System are deposited in this account and used for infrastructure needs at park units in accordance with section 802 of Public Law 105–391.

**Operation and maintenance of quarters.**—Revenues from the rental of Government-owned quarters to park employees are deposited in this account and used to operate and maintain the quarters.

**Delaware Water Gap, Route 209 operations.**—Fees collected for use of Route 209 within the Delaware Water Gap National Recreation Area by commercial vehicles are used for management, operation, and maintenance of the route within the park as authorized by Public Law 98–63 (97 Stat. 329), section 117 of Public Law 98–151 (97 Stat. 977) as amended by Public Law 99–88 (99 Stat. 343), and section 702 of Division I of Public Law 104–333 (110 Stat. 4185). The appropriation was reauthorized in fiscal year 1997 by Public Law 104–333 and in fiscal year 2006 by Public Law 109–156.

**Glacier Bay National Park resource protection.**—Of the revenues received from fees paid by tour boat operators or other permittees for entering Glacier Bay National Park, 60 percent are used for certain activities to protect resources of the Park from harm by permittees in accordance with section 703 of Division I of Public Law 104–333 (110 Stat. 4185).

**Filming and photography special use fees.**—The National Park Service is authorized to retain fee receipts that are collected from issuing permits to use park lands and facilities for commercial

filming, still photography, and similar activities. Activities authorized for funding include acquisition of emergency response equipment to prevent harm to aquatic park resources from permittees and studies to quantify the impact of permittees' activities on wildlife and other natural resources of the park.

**Contributions to U.S. Park Police annuity benefits.**—Necessary costs of benefit payments to annuitants under the pension program for United States Park Police officers hired prior to January 1, 1984, established under Public Law 85–157, are paid from the General Fund of the Treasury to the extent the payments exceed deductions from salaries of active duty employees in the program. Permanent funding for such payments was provided in the Department of the Interior and Related Agencies Appropriations Act, 2002. Before 2002, such payments were funded from appropriations made annually to the National Park Service.

The Operation of Indian Programs appropriation consists of a wide range of services and benefits provided primarily to Federally-recognized Indian Tribes, Alaskan Native groups, and individual American Indians and Alaska Natives that fulfill Federal trust responsibility and implement Federal Indian policy.

This account covers expenses associated with the following activities:

*Tribal Government.*—This activity promotes the sovereignty of Federally-recognized Tribes by supporting and assisting them in the development and maintenance of strong and stable governments capable of administering quality programs and developing economies. This activity also provides for the maintenance of BIA roads and bridges.

*Human services.*—This activity provides funding for social services, housing improvement, welfare assistance, and Indian child welfare. The objective of this activity is to improve the quality of life for individual Indians who live on or near Indian reservations and to protect the children, elderly, and disabled from abuse and neglect.

*Trust: Natural resources management.*—This activity provides for the management, development, and protection of Indian trust land and natural resource assets. Natural resource programs in Indian country include agriculture, forestry, water, fish, wildlife, and parks.

*Trust: Real estate.*—This activity promotes cooperative efforts with landowners for the optimal utilization, development, and enhancement of trust and restricted Federal Indian-owned lands. The activity includes general real estate services, probate, land title and records, environmental compliance, and other trust services and rights protection.

*Education.*—This activity supports Bureau of Indian Education (BIE) Tribal elementary and secondary school operations, other education programs for elementary-aged Indian children, Tribal post-secondary schools, education program management, and facilities maintenance. The BIE-funded schools include 169 elementary and secondary BIE- and Tribally-run schools, 14 dormitories, two post-secondary schools, and operating grants to eligible Tribal colleges and universities.

*Public safety and justice.*—This activity funds law enforcement activities on approximately 56 million acres of Indian country in 35 States. Programs under this activity include investigative, police, and detention services; Tribal courts; fire protection; and facilities maintenance.

*Community and economic development.*—This activity promotes the economic vitality of American Indians and Alaska Natives through Job Placement and Training, Economic Development, and Community Development. This activity also provides assistance for renewable and conventional energy and hard mineral development for the economic and social benefit of the tribes and individual Indian allottees.

*Executive direction and administrative services.*—This activity supports the management of BIA's and BIE's finance, budget, acquisition, and property functions, as well as information technology resources, personnel services, facilities management, payment of GSA and direct rentals, and intra-governmental payments.

Significant portions of Indian Affairs activities are executed under contracts or compacts with Federally-recognized Tribes to

run Tribal and Federal programs. Funding also supports BIA or BIE oversight and technical assistance for these activities in central and regional offices.

This appropriation funds a program to consolidate fractional interests in Indian lands and assist land owners with estate planning. Funds will be used to purchase small interests in parcels of lands from willing individual Indian landowners and convey those interests to the tribe on whose reservation the land is located. Consolidation of these interests is expected to reduce the Government's costs for managing Indian lands and promote economic opportunity on these lands. This program is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106-462), the American Indian Probate Reform Act of 2004 (P.L. 108-374), and other authorities. No funding is requested in 2012.

*Donations and contributed funds.*—The Secretary of the Interior may accept donations of funds or other property, and he may use the donated property in accordance with the terms of the donation in furtherance of any program authorized by other provision of law for the benefit of Indians (25 U.S.C. 451).

ADMINISTRATIVE PROVISIONS

The Bureau of Indian Affairs may carry out the operation of Indian programs by direct expenditure, contracts, cooperative agreements, compacts and grants, either directly or in cooperation with States and other organizations.

Notwithstanding 25 U.S.C. 15, the Bureau of Indian Affairs may contract for services in support of the management, operation, and maintenance of the Power Division of the San Carlos Irrigation Project.

Appropriations for the Bureau of Indian Affairs (except the Revolving Fund for Loans Liquidating Account, Indian Loan Guaranty and Insurance Fund Liquidating Account, Indian Guaranteed Loan Financing Account, Indian Direct Loan Financing Account, and the Indian Guaranteed Loan Program account) shall be available for expenses of exhibits.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs for central office oversight and Executive Direction and Administrative Services (except executive direction and adminis-

trative services funding for Tribal Priority Allocations, regional offices, and facilities operations and maintenance) shall be available for contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994 (Public Law 103-413).

In the event any federally recognized tribe returns appropriations made available by this Act to the Bureau of Indian Affairs, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau, other than the amounts provided herein for assistance to public schools under 25 U.S.C. 452 et seq., shall be available to support the operation of any elementary or secondary school in the State of Alaska.

Appropriations made available in this or any other Act for schools funded by the Bureau shall be available only to the schools in the Bureau school system as of September 1, 1996. No funds available to the Bureau shall be used to support expanded grades for any school or dormitory beyond the grade structure in place or approved by the Secretary of the Interior at each school in the Bureau school system as of October 1, 1995. Funds made available under this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 1146 of the Education Amendments of 1978 (25 U.S.C. 2026)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau-funded schools sharing a campus with a charter school and performing functions related to the charter schools operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code.

Notwithstanding any other provision of law, including section 113 of title I of appendix C of Public Law 106-113, if in fiscal year 2003 or 2004 a grantee received indirect and administrative costs pursuant to a distribution formula based on section 5(f) of Public Law 101-301, the Secretary shall continue to distribute indirect and administrative cost funds to such grantee using the section 5(f) distribution formula.

This appropriation supports the functions of the Office of the Secretary of the Interior, including executive -level leadership, policy, guidance, and coordination of the responsibilities carried out by its bureaus and offices. In addition, the appropriation supports programmatic functions carried out by the Office of the Secretary including mineral revenue collections, the Take Pride in America program, the Department's quasi-judicial and appellate responsibilities, and the Office of Valuation Services, formerly known as consolidated appraisal services. The appropriation also provides for workers and unemployment compensation payments for former Bureau of Mines employees.

*Office of Natural Resources Revenue (ONRR).*—On September 30, 2010, as part of a broader restructuring of the former Minerals Management Service (MMS), the Department reorganized the mineral revenue management functions of MMS and shifted these functions to a new office within the Office of the Secretary. The Office of Natural Resources Revenue seeks to ensure that the Nation's Federal and Indian mineral revenues are accurately reported and paid in compliance with laws, regulations, and lease terms. Revenues collected by ONRR represent one of the largest sources of non-tax revenue to the Federal Government. ONRR disburses mineral revenues to States, the Office of the Special Trustee for American Indians, other Federal agencies, and the General Fund of the United States Treasury. Until the reorganization of the former MMS is complete, ONRR will continue to share certain administrative funding and resources with the successor bureau to MMS, the Bureau of Ocean Energy Management, Regulation and Enforcement. A general provision has been included in the proposed DOI appropriations language to provide administrative flexibility for the transfer of funds between DOI accounts to facilitate an orderly reorganization process.

Through ONRR, the Administration will continue to implement mineral revenue collection reforms, including the termination of the royalty-in-kind (RIK) program and the implementation of recommendations from GAO, the Department's Inspector General, and others. To solidify its reform of the RIK program, the Administration will also propose legislation to repeal all Federal authorities to accept future royalties in-kind (rather than in cash).

MINERAL LEASING AND ASSOCIATED PAYMENTS  
(Legislative proposal, subject to PAYGO)

States receive 50 percent of Federal revenues generated from mineral production occurring on Federal lands within that State's boundaries. To partially cover the costs of administering the Federal mineral leasing program, the Budget proposes to amend the Mineral Leasing Act (MLA) to deduct two percent from the required payments to States under the Act. Until 2000, the Department (acting through the former Minerals Management Service) was authorized to deduct a certain amount from State mineral revenue payments based on an assessment of the Federal Government's costs to manage and oversee mineral leasing and production. This was commonly referred to as "net receipts sharing," or NRS. The NRS authority was repealed in 2000, during a time of Federal budget surpluses. Since FY 2008, Congress has annually required a two-percent deduction from each

year's State payments as part of the Interior, Environment, and Related Agencies Appropriations Acts. This two-percent deduction (equivalent to one percent of total mineral revenues) is a simpler form of net receipts sharing that addresses concerns raised about the administrative complexity of the original NRS process. The Administration proposes continuing net receipts sharing through the appropriations process in 2012. Separate authorizing legislation to amend the Mineral Leasing Act would make this change in the Federal-State revenue allocation permanent starting in 2013.

Title IV of the Department of the Interior and Related Agencies Appropriation Act, 1998 (P.L. 105-83) established the Environmental Improvement and Restoration Fund account. As required by law, 50 percent of the principal and 50 percent of the interest from the Alaska Escrow account are deposited into the Environmental Improvement and Restoration Fund. The law requires that the corpus of the Fund be invested. Twenty percent of the interest earned by the Fund is permanently appropriated to the Department of Commerce and the unappropriated balance of interest remains in the fund. At this time, no budget authority is requested.

The Individual Indian Money Account Litigation Settlement (P.L. 111-291) establishes this fund to provide Indian land owners with an additional incentive to sell their fractionated interests, given the fact that the market value associated with highly fractionated interests will be quite low in many cases. Not more than \$60 million may be transferred from the Trust Land Consolidation Fund to this fund for higher education scholarships for American Indians and Alaska Natives to be administered as described in the settlement agreement.

The Individual Indian Money Account Litigation Settlement (P.L. 111-291) establishes a new trust land consolidation fund for the buy-back and consolidation of fractionated interests in parcels of land from individual Indian landowners. The fund covers administrative costs to undertake the process of acquiring fractionated interests and associated trust reform activities. The acquisition of fractionated interests is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106-462), and the American Indian Probate Reform Act of 2004 (P.L. 108-374). The proposed settlement provides additional authority for the acquisition of interests held by persons who cannot be located after engaging in extensive efforts to notify them and locate them for a five-year period.

Flood control payments to States are shared according to the Flood Control Act of 1936 (33 U.S.C. 701 et seq.) which provides that 75 percent of revenue collected be shared with the State in which it was collected. These funds are to be expended as the State legislature may prescribe for the benefit of the public schools and roads in the county from which the revenue was collected or for defraying any of the expenses of county government. These expenses include public obligations of levee and drainage districts for flood control and drainage improvements.

The Energy Policy Act of 2005 (P.L. 109-58) amended section 20 of the Geothermal Steam Act of 1970 (30 U.S.C. 1019 et seq.). The amendment provides that for the revenues collected from geothermal leasing, 50 percent of the revenues are to be paid to the State and 25 percent are to be paid to the county in which the leased lands or geothermal resources are located. In addition, the remaining Federal revenues received during the first five fiscal years following enactment of the Energy Policy Act, after excluding funds paid to State and county governments, are deposited into a separate Treasury account for use by DOI in the implementation of the Geothermal Steam Act of 1970 and the Energy Policy Act of 2005. The authority to make the payments to counties for fiscal year 2010 was withdrawn by P.L. 111-88, along with the last year's revenue allocation for the DOI geothermal program fund. The geothermal payments to counties for fiscal year 2010 were subsequently restored by P.L. 111-212.

Terminate geothermal payments to counties. The Budget proposes to repeal the 25 percent geothermal lease revenue sharing payments to counties established by the Energy Policy Act of 2005 (P.L. 109-58) and return to the traditional 50/50 Federal-State revenue sharing arrangement. States have the flexibility to allocate their share of revenue from Federal leases to counties, if appropriate.

Until October 1, 1994, the United States exercised jurisdiction over the Trust Territory of the Pacific Islands according to the terms of the 1947 Trusteeship Agreement between the United States and the Security Council of the United Nations. These responsibilities were carried out by the Department of the Interior.

The Department of the Interior is seeking no additional appropriations for the Trust Territory of the Pacific Islands. Compacts of Free Association have been implemented with the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau.

Remaining funds in the Trust Territory of the Pacific Islands account will be used to meet final transition responsibilities of the United States. Outlays will continue as provided by the Compacts of Free Association and appropriation laws and will be reported as Trust Territory expenditures until such time as the activities cease.

DEPARTMENTAL MANAGEMENT—ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are included in the schedule of the parent appropriation as follows:

- Environmental Protection Agency: "Hazardous Subsistence Superfund".
- Office of the Special Trustee for American Indians: "Federal Trust Programs".
- Interior: Natural Resources Damage Assessment: "Natural Resources Damage Assessment Fund".

COMPACT OF FREE ASSOCIATION

For grants and necessary expenses, \$3,054,000, to remain available until expended, as provided for in sections 221(a)(2) of the Compact of Free Association for the Republic of Palau; and section 221(a)(2) of the Compacts of Free Association for the Government of the Republic of the Marshall Islands and the Federated States of Micronesia, as authorized by Public Law 99-658 and Public Law 108-188.

Note.—A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111-242, as amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution.

INSULAR AFFAIRS

The Secretary of the Interior is charged with the responsibility of promoting the economic and political development of those insular areas which are under U.S. jurisdiction and within the responsibility of the Department of the Interior. The Secretary originates and implements Federal policy for the U.S. territories; guides and coordinates certain operating programs and construction projects; provides information services and technical assistance; coordinates certain Federal programs and services provided to the freely associated states, and participates in foreign policy and defense matters concerning the U.S. territories and the freely associated states.

The peoples of the Republic of the Marshall Islands, the Federated States of Micronesia and the Republic of Palau approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (Public Law 99-239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia. Payments began in 1987 and continued through 2003 when the original economic assistance package expired. The Compact of Free Association Amendments Act of 2003, Public Law 108-188, continues financial assistance to the Federated States of Micronesia and the Republic of the Marshall Islands through 2023. The Compact of Free Association for the Republic of Palau was enacted on November 14, 1986 as P.L. 99-658, and was implemented on October 1, 1994. While the Compact of Free Association with the

Republic of Palau was set to expire on September 30, 2009, P.L. 111-88 extended the terms of the Compact by one year. The U.S. and the Government of Palau completed negotiation of a revised Compact of Free Association funding agreement in September 2010 and the \$250 million legislative proposal is awaiting Congressional approval.

The mission of the Office of Inspector General is to promote excellence, accountability and integrity in the programs, operations and management of the Department of the Interior. The Office's focus in assisting the Secretary and the Congress is to target resources toward developing solutions for the Department's most serious management and program challenges, and toward high-risk areas vulnerable to fraud, waste, abuse and mismanagement. The Office is responsible for independently and objectively identifying risks and vulnerabilities that directly impact, or could impact, the Department's ability to accomplish its mission. The Office is required to keep the Secretary and the Congress fully and currently informed about problems and deficiencies relating to the administration of departmental programs and operations. Effective implementation of this mandate addresses the public's demand for greater accountability and integrity in the administration of government programs and operations and the demand for programs that work better, cost less, and get the results about which Americans care most.

Tribal trust funds are deposited into a consolidated account in the U.S. Treasury pursuant to: (1) general or specific acts of Congress; and (2) Federal management of Tribal real properties, the titles to which are held in trust for the Tribes by the United States. These funds are available to the respective Tribal groups for various purposes, under various acts of Congress, and may be subject to the provisions of Tribal constitutions, bylaws, charters, and resolutions of the various Tribes, bands, or groups.

Commencing with 2000, most Tribal trust funds, including special funds, managed by the Office of the Special Trustee for American Indians were reclassified as non-budgetary. Ownership of these funds did not change, nor did the Federal Government's management responsibilities; changes were made for presentation purposes only. Some Tribal trust funds remain budgetary, in either this Tribal Special Fund or the Tribal Trust Fund presented later in this section. Most of the assets of these funds are in investments held outside Treasury.

The following accounts are included in the Tribal Special Fund: Tribal Economic Recovery Fund; Three Affiliated Fort Berthold Trust Fund; Standing Rock Trust Fund; Papago Cooperative Fund; Ute Tribe Trust Fund; Pyramid Lake Indian Reservation Trust Fund; San Luis Rey Water Authority Trust Fund; Cochiti Wetfields Solution; and Southern Arizona Water Rights Settlement Act. More detailed information on specific account data is provided in the budget justification for the Office of the Special Trustee for American Indians.

Under the Natural Resource Damage Assessment and Restoration Fund (Restoration Fund), natural resource damage assessments will be performed in order to provide the basis for claims against responsible parties for the restoration of injured natural resources. Funds are appropriated to conduct damage assessments, provide restoration support, and for program management. In addition, funds will be received for the restoration of damaged resources and other activities and for natural resource damage assessments from responsible parties through negotiated settlements or other legal actions by the Department of the Interior. Responsible parties may also provide in-kind services to restore injured natural resources.

Restoration activities include: 1) the replacement and enhancement of affected resources; 2) acquisition of equivalent resources and services; and, 3) long-term environmental monitoring and research programs directed to the prevention, containment, and amelioration of hazardous substances and oil spill sites.

The Restoration Fund operates as a Department-wide program, incorporating the interdisciplinary expertise of its various bureaus and offices. Natural resource damage assessments and the restoration of injured natural resources are authorized by the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 *et seq.*), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 *et seq.*), the Oil Pollution Act of 1990 (33 U.S.C. 2701 *et seq.*), and the Act of July 27, 1990 (16 U.S.C. 19jj *et seq.*). Since 1992, amounts received by the United States from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest.

**EXXON VALDEZ RESTORATION PROGRAM**

The Budget reflects the receipts, transfers, and mandatory spending by the Department of the Interior associated with the civil and criminal settlements resulting from the 1989 *Exxon Valdez* oil spill in the Prince William Sound and surrounding areas. Funding from the settlements, including interest, is provided to Federal and Alaska State natural resource trustee agencies to restore the natural resources and services damaged by the spill. The *Exxon Valdez* Oil Spill Trustee Council consists of 3 State and 3 Federal trustees who oversee restoration of the injured ecosystem through the use of civil settlement funds. The criminal settlement funds are managed separately by the Federal and Alaska State governments, but are coordinated with the Council.

The original civil settlement with the Exxon Corporation included a re-opener provision valid from September 2002 to September 2006, which provided an opportunity for the Trustee governments to claim up to an additional \$100 million for natural resource injury that could not have been known or anticipated at the time of settlement. In late 2006, the Trustee governments issued a demand letter for \$92 million to the ExxonMobil Corporation, as well a comprehensive restoration project plan for the clean up of lingering oil. Negotiations with ExxonMobil await completion of additional scientific studies.

The civil settlement and interest earned to date total roughly \$1 billion, of which \$166 million remains, outside the Treasury. The balance is managed on behalf of the Trustee Council by the State of Alaska, (*Exxon Valdez* Investment Fund), with funds earmarked for future habitat acquisition and protection and for marine research and ecological monitoring in the spill zone.

**Preparedness.**—funds the non-emergency and predictable aspects of the Department's wildland fire program, including the initial attack suppression action on wildfires. Preparedness includes readiness, operational planning, oversight, procurement, training, supervision, and deployment of wildland fire suppression personnel and equipment prior to wildland fire occurrence. It also includes activities related to program monitoring and evaluation, and integration of fire into land-use planning.

**Suppression Operations.**—funds the emergency and unpredictable aspects of the Department's wildland fire management program. Suppression operations include the total spectrum of management actions taken on wildland fires in a safe, cost-effective manner, considering public benefits and values to be protected and consistent with resource objectives and land management plans. Emergency actions taken during and immediately following a wildfire to stabilize the soil and structures to prevent erosion, floods, landslides, and further resource damage are included in this activity. Emergency stabilization actions may be performed within one year of containment of a fire. Funding for the ten-year average of inflation-adjusted suppression obligations is split between the FLAME Wildfire Suppression Reserve Fund and this appropriation. The DOI and Forest Service wildland fire management programs will continue to strengthen oversight and accountability of suppression spending and use risk management principles to guide decision-making at the strategic, program, and operational levels.

**Other operations.**—funds all other aspects of the wildland fire management program designed to reduce the risk of damage resulting from catastrophic wildland fires. Programs include hazardous fuels reduction, fire facilities construction and maintenance, post-fire rehabilitation of burned areas, and applied research. The hazardous fuels reduction program includes the planning, all operational aspects, and monitoring of treatments to reduce fuel loads and promote ecosystem health in forests and rangelands. Methods for fuels reduction include prescribed fire, mechanical, chemical, and biological treatments or a combination of methods. In 2012, all hazardous fuels project funding will be allocated using the Hazardous Fuel Prioritization Allocation System, which ranks and prioritizes allocations based on factors such as fire risk, efficiency of treatments, and effectiveness of

treatment. The fire facilities program funds construction and maintenance of facilities to house firefighters and equipment used in wildland firefighting and hazardous fuels reduction. Facilities funded in this activity include crew quarters, warehouses, fire caches, dispatch centers, fire stations, engine storage, and aviation bases. The burned area rehabilitation program begins the restoration process for lands and resources damaged by wildland fires that would not return to fire adapted conditions without intervention. Soil stabilization and the introduction of native and other desirable plant species are employed for up to three years following containment of a fire to return severely-burned areas to appropriate fire regimes and resource conditions. The joint fire science subactivity funds the Department's share of the Joint Fire Science program, an interagency partnership to sponsor applied research to assist field managers in fire suppression, fuels treatment, and post-fire rehabilitation.

The mission of the National Drug Intelligence Center (NDIC) is to provide strategic drug-related intelligence, document and computer exploitation support, and training assistance to the drug control, public health, law enforcement, and intelligence communities of the United States in order to reduce the adverse effects of drug trafficking, drug abuse, and other drug-related criminal activity.

NDIC produces strategic drug intelligence for the Department of Justice (DOJ) and national-level policymakers. This intelligence identifies, analyzes, and prioritizes threats, thereby enhancing policy- and decision-makers' ability to formulate effective, cost-efficient resource allocation and funding decisions that ultimately save taxpayer money. It also facilitates the development of sound strategies, initiatives, policies, and regulations to counter threats and promotes effective, intelligence-driven decision-making in support of the Attorney General's priorities. Reports published by NDIC include annual threat assessments such as the National Drug Threat Assessment, regional drug threat assessments for DOJ's Organized Crime Drug Enforcement Task Forces (OC-DETF) program, and market analyses for High Intensity Drug Trafficking Areas (HIDTA). NDIC also produces requested and ad-hoc intelligence reports on topics that address Southwest Border developments, gangs, money laundering, and other drug-related issues. At the request of DOJ, NDIC also produces non-drug strategic intelligence. For example, NDIC produced an assessment that examined national-level trends regarding child exploitation. Consumers of NDIC strategic intelligence include Members of Congress, DOJ officials, and other intelligence and law enforcement professionals.

NDIC provides operational support to DOJ components through its Document and Media Exploitation (DOMEX) program. NDIC DOMEX supports high-level investigations and prosecutions through the analysis of seized documents and electronic media. This analysis enhances investigations through the identification of unknown leads, associations, and assets and advances prosecutions through the identification and presentation of evidence of criminal activity, the development of prosecutorial exhibits, and the provision of expert trial testimony. DOJ entities supported by NDIC DOMEX include OCDETF, DEA, FBI, U.S. Attorneys' Offices, and the Bureau of Alcohol, Tobacco, Firearms and Explosives. To a lesser extent, NDIC DOMEX supports other agencies including HIDTA offices, the U.S. Department of Homeland Security, U.S. Immigration and Customs Enforcement, U.S. Food and Drug Administration, and the United States Postal Inspection Service.

The NDIC training program supports DOJ components and other law enforcement and intelligence agencies by developing and honing attendees' drug intelligence analysis skills. Attendees of NDIC training include federal, state, local, and tribal law enforcement as well as U.S. National Guard personnel. Additionally, NDIC provides training on its in-house developed Real-time Analytical Intelligence Database, or RAID. RAID is a relational database that facilitates the analysis and fusing of data from multiple sources to identify common links or unusual patterns. U.S. law enforcement and intelligence personnel are the primary recipients of this software and training.

In consideration of the 2012 funding level, the Department is reviewing how best to use NDIC's personnel and resources and fill any gaps in counternarcotics, organized crime, or other areas.

Funding for the Justice Information Sharing Technology (JIST) account will provide for corporate investments in information technology. This centralized fund, under the control of the DOJ Chief Information Officer, will ensure that investments in information sharing technology are well-planned and aligned with the Department's overall information technology (IT) strategy and enterprise architecture, and that all DOJ components are able to operate in a technologically unified environment, particularly with respect to preventing terrorist attacks on the United States. The current major initiatives/projects are described below.

**Joint Automated Booking System.**—The Joint Automated Booking System (JABS) is a Department of Justice information sharing project that provides data to the FBI's Integrated Automated Fingerprint Identification System (IAFIS) through an automated process for the collection and transmission of fingerprint, photographic, and biographical data. The mission of JABS is to: (1) improve the booking process through automation; (2)

enable agencies to share and exchange arrest information; and (3) maintain a federal offender tracking system.

**Justice Consolidated Office Network (JCON) Office Automation.**—JCON provides a reliable and robust common office automation platform for several Departmental components. The cornerstone of the project is the JCON Standard Architecture, which defines the IT computing framework, including networked workstations, servers, and printers; a common set of core applications (e-mail, word processing, etc.); and a basic set of system administration tools.

**JCON S/TS Program.**—The JCON Secret/Top Secret (S/TS) Program provides a seamless, Department-wide IT infrastructure for electronically sharing, processing, and storing classified information. JCON S/TS is a reliable, secure system which allows attorneys, intelligence analysts, law enforcement staff, and managers to exchange classified electronic data within and between components on a real-time basis.

**Law Enforcement Information Sharing Program.**—The Law Enforcement Information Sharing Program (LEISP) is a Department-wide strategy to facilitate the sharing of information about terrorism, criminal activity, and threats to public safety. LEISP will implement the information technology tools needed to facilitate timely, appropriate, and secure sharing of information across the law enforcement community.

**Unified Financial Management System.**—The Unified Financial Management System will allow the Department of Justice to streamline and standardize business processes and procedures across components, providing secure, accurate, timely, and useful financial and procurement data to program managers, and to produce component and Department level financial statements.

**Cyber Security Program.**—The Cyber Security Program provides the Department of Justice with an effective security structure to counter current and emerging cyber threats and to ensure that our agents, attorneys, and intelligence analysts can continue using the Department's IT systems and networks to support their missions without significant interruption of service resulting from cyber attacks.

Resources are requested to support the Department of Justice's law enforcement wireless communications program in order to provide federal law enforcement agents with reliable and secure tactical communications services and to make more efficient use of radio spectrum as required by 47 U.S.C. 903(d)(1). Wireless communications efforts will address tactical communications shortcomings across the nation, with a particular emphasis on major metropolitan areas and other regions that are potential targets for terrorism or other significant crime. Requested resources fund operations and maintenance of the tactical communications systems; exploration of new, more efficient communications systems; promotion of communications interoperability by federal law enforcement and homeland security personnel; and management and operating requirements of the Wireless Program Management Office.

This program includes the Office of the Pardon Attorney (OPA) and the Executive Office for Immigration Review (EOIR). The Pardon Attorney receives, reviews, and prepares recommendations to the President for all petitions for executive clemency, i.e., commutation of sentences and pardons, submitted by persons convicted of Federal crimes. The Executive Office for Immigration Review contains 59 Immigration Courts and the Board of Immigration Appeals. EOIR was established January 1, 1983, to improve the immigration hearing and appeal process.

DETENTION TRUSTEE—Continued

The Office of the Federal Detention Trustee (OFDT) is mandated to oversee detention programs and improve and coordinate detention activities for the Departments of Justice and Homeland Security. The Federal Detention Trustee (the Trustee) reports to the Deputy Attorney General on detention activities, policy, and detainee population. The Trustee's primary responsibility is to ensure operational effectiveness and the efficient expenditure of appropriated funds while ensuring the safe, secure, and humane confinement of persons in the custody of the United States Marshals Service (USMS). The Trustee's role encompasses the care of Federal detainees in private, state, and local facilities, and includes housing, subsistence, transportation, medical care, and medical guard service. The Trustee also manages the Justice Prisoner and Alien Transportation System (JPATS) and ensures equality among participating agencies while allowing unimpeded prisoner transportation operations.

For 2012, OFDT requests funding for housing, medical, transportation, and program oversight costs associated with the anticipated increase in the detainee population. Further, the Trustee will continue to work with state and local governments and private service providers to maintain adequate detention capacity to house detained individuals charged with Federal offenses awaiting trial or sentencing. The Federal Government utilizes various methods to house detainees. Detention bed space for Federal detainees is acquired to maximize efficiency and effectiveness for the Government through: (1) Federally-owned and managed detention facilities, where the Government has paid for construction and operation of the facility (funded in the Federal Bureau of Prisons' (BOP) account); (2) Intergovernmental Agreements (IGAs) with state and local jurisdictions, whose excess prison and jail bed capacity is utilized and paid via a daily rate; and (3) Private performance-based contract facilities, where a daily rate is paid. Based on anticipated growth in the Federal detention population, over three-quarters of the USMS's Federally detained population will likely be housed in state, local, and private facilities.

The Trustee has proven successful in achieving efficiencies and cost reductions and avoidance in detention through process and infrastructure improvements. Through coordinated efforts, OFDT has successfully: developed and implemented eDesignate to provide a more efficient workflow between the U.S. Courts, the USMS, and the BOP; facilitated the establishment of Regional Transfer Centers and Ground Transfer Centers to accelerate the movement of prisoners to a designated BOP facility; and increased the use of detention alternatives by providing funding to the Federal Judiciary to support alternatives to pretrial detention, such as electronic monitoring, halfway house placement, and drug testing and treatment. OFDT continues to work with its partners to identify issues and develop solutions to drive further efficiencies.

The Office of the Inspector General (OIG) was statutorily established in the Department of Justice on April 14, 1989. The OIG investigates alleged violations of criminal and civil laws, regulations, and ethical standards arising from the conduct of the Department's employees. The OIG provides leadership and assists management in promoting integrity, economy, efficiency, and effectiveness within the Department and in its financial, contractual, and grant relationships with others. Also by statute, the OIG reports to the Attorney General, Congress, and the public on a semiannual basis regarding its significant activities.

The Audit function is responsible for independent audits and reviews of Department organizations, programs, functions, computer security and information technology systems, and financial statement audits. The Audit function also conducts or reviews external audits of expenditures made under Department contracts, grants, and other agreements.

The Investigations function investigates allegations of civil rights violations, bribery, fraud, abuse and violations of other laws, rules and procedures that govern Department employees, contractors, and grantees. This function also develops these cases for criminal prosecution, civil action, or administrative action. In some instances the OIG refers allegations to components within the Department and requests notification of their findings and of any disciplinary action taken.

The Evaluation and Inspections function conducts analyses and makes recommendations to decisionmakers for improvements in Department programs, policies, and procedures. In addition, this function also conducts shorter and more time-sensitive reviews and evaluations to provide managers with early warnings about possible program deficiencies.

The Oversight and Review function investigates allegations of significant interest to the American public and Congress and of vital importance to the Department.

The Executive Direction and Control function provides program direction for the OIG. Responsibilities include policy development, legal counsel, congressional affairs, planning, budget, finance, personnel, procurement, automated data processing, security, and general support services.

The Federal Government is represented in each of the 94 judicial districts and the District of Columbia Superior Court by a United States Marshal. The primary missions of the United States Marshals Service (USMS) are protection of the Federal judiciary, protection of witnesses, execution of warrants and court orders, and custody and transportation of unsentenced prisoners. The USMS is the principal support force in the Federal judicial system and an integral part of the Federal law enforcement community.

For 2012, \$1.5 million is requested to support the Domestic Communications Assistance Center (DCAC), which will address issues relating to the "Going Dark" initiative. Also proposed is \$14.5 million in program offsets, to include general administrative efficiencies and a cancellation of prior year unobligated balances.

**Reimbursable program.**—Federal funds are derived from the Administrative Office of the U.S. Courts for the court security program, the Office of the Federal Detention Trustee for the housing and transportation of USMS prisoners in non-Federal facilities, the Assets Forfeiture Fund for seized assets management, the Organized Crime Drug Enforcement Task Force Program for multi-agency drug investigations, and the Office of National Drug Control Policy and the Centers for Disease Control for security services. Non-Federal funds are derived from state and local governments for witness protection and the transportation of prisoners pursuant to state writs, as well as fees collected from service of civil process and sales associated with judicial orders.

The Community Relations Service (CRS) is an agency of the Department of Justice that provides assistance to state and local communities in the prevention and resolution of tension, violence, and civil disorders relating to actual or perceived discrimination on the basis of race, color, or national origin. The Service also works with communities to employ strategies to prevent and respond to alleged violent hate crimes committed on the basis of actual or perceived race, color, national origin, gender, gender identity, sexual orientation, religion or disability. CRS helps local leaders, including community members, law enforcement, and government officials, and affected parties work together on a voluntary basis to develop locally defined and locally implemented solutions. As a result, CRS builds community capacity to manage conflicts and create permanent mechanisms so communities can independently resolve future conflicts. By empowering communities to prevent hate violence and address tension associated with alleged discrimination, CRS helps law enforcement, community leaders and city officials avoid costly litigation, preserve scarce resources, protect public safety, and ultimately en-

Title II of the James Zadroga 9/11 Health and Compensation Act of 2010 (P.L. 111-347), reopens the September 11 Victim Compensation Fund (VCF), extending eligibility for compensation associated with physical harm stemming from debris removal and extending the deadline for claims associated with harms not discovered before the Fund's original deadline. The VCF was established by the Air Transportation Safety and System Stabilization Act (P.L. 107-42) as an alternative to litigation, and had terminated operations in 2004 after making compensation payments of more than \$7 billion to survivors of 2,880 persons killed in the September 11, 2001 terrorist attacks and to 2,680 individuals who were injured in the attacks and subsequent rescue efforts. The James Zadroga 9/11 Health and Compensation Act of 2010 makes available up to \$2.775 billion for settlement of new claims through the VCF.

*United States trustee system fund.*—The United States trustees supervise the administration of bankruptcy cases and private trustees in the Federal Bankruptcy Courts and litigate against fraud and abuse in the system by debtors, creditors, attorneys, bankruptcy petition preparers, and others. The Bankruptcy Judges, U.S. Trustees and Family Farmer Bankruptcy Act of 1986 (Public Law 99-554) expanded the pilot trustee program to a twenty-one region, nationwide program encompassing 88 judicial districts. (Bankruptcy cases filed in Alabama and North Carolina are administered by the Administrative Office of the U.S. Courts.) The Bankruptcy Abuse Prevention and Consumer Protection Act of 2005 (Public Law 109-8) expanded United States trustees' existing responsibilities to include means testing, credit counseling/debtor education, and debtor audits. User fees that are assessed offset the annual appropriation.

The Comprehensive Crime Control Act of 1984 established the Assets Forfeiture Fund, into which forfeited cash and the proceeds of sales of forfeited property are deposited. Authorities of the fund have been amended by various public laws enacted since 1984. Under current law, authority to use the fund for certain investigative expenses shall be specified in annual appropriation acts. Expenses necessary to seize, detain, inventory, safeguard, maintain, advertise or sell property under seizure are funded through a permanent, indefinite appropriation. In addition, beginning in 1993, other general expenses of managing and operating the assets forfeiture program are paid from the permanent, indefinite portion of the fund. Once all expenses are covered, the balance is maintained to meet ongoing expenses of the program. Excess unobligated balances may also be allocated by the Attorney General in accordance with 28 U.S.C. 524(c)(8)(E).

The Organized Crime Drug Enforcement Task Forces (OCDETF) Program consists of a nationwide structure of nine regional prosecutor-led, intelligence driven task forces that combine the resources and expertise of its seven member federal law enforcement agencies, in cooperation with state and local investigators and with prosecutors from the U.S. Attorneys' Offices and the Criminal Division, to target and destroy major narcotic-trafficking and money-laundering organizations. The task forces perform the following activities:

**Investigation.**—This activity includes resources for direct investigative, intelligence and support activities of the task forces, focusing on the disruption and dismantlement of the highest level drug trafficking and money laundering organizations that affect the U.S. drug supply and fuel the attendant violence. Organizations participating under the Investigations function are the Drug Enforcement Administration, Federal Bureau of Investigation, Internal Revenue Service, Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Coast Guard, U.S. Marshals Service, and U.S. Immigration and Customs Enforcement.

**Prosecution.**—This activity includes resources for the prosecution of cases generated through the investigative efforts of task force agents. Litigation efforts are intended to dismantle drug trafficking and money laundering organizations in their entirety, most notably by targeting the leaders of these organizations. This includes activities designed to secure the seizure and forfeiture of the assets of these enterprises. Participating agencies are the U.S. Attorneys, and the Department of Justice's Criminal Division.

The following represents the distribution of obligations from this account among participating agencies:

At the request of the Attorney General, the OCDETF member agencies, with input from the Intelligence Community, developed the Consolidated Priority Organization Target (CPOT) list, which identifies those significant international drug trafficking and money laundering organizations most responsible for the illegal drug supply to the United States. In 2010, the CPOT list included 59 international targets and 775 OCDETF investigations target-

ing organizations linked to CPOT organizations. The CPOT strategy seeks to incapacitate the foreign-based organization heads, their domestic transportation and smuggling systems, their regional and local distribution networks, and their financial operations, thereby interrupting the flow of drugs into the United States and diminishing the capacity of the CPOT organizations to reconstitute themselves. The strategy aims to ensure that OCDETF funding is being used as effectively and efficiently as possible. In addition to CPOTs, OCDETF also prioritizes cases linked to Regional Priority Organization Targets (RPOTs), whose drug activities have a significant impact on the particular drug threats facing one or more of the nine OCDETF regions. OCDETF's commitment to pursuing priority targets is evident from the steady increase in the percentage of cases linked to these targets. During 2010, 16 percent of OCDETF's active investigations were linked to a CPOT, while 18 percent were linked to RPOTs.

In 2010, OCDETF initiated 1,194 new cases, 146 more than OCDETF's 2009 actual total of 1,048. OCDETF district and regional coordination groups are working to ensure that only those investigations that meet the standards established for OCDETF cases are approved and the quality of these new investigations clearly reflects OCDETF's commitment to pursue the most significant drug trafficking and money laundering organizations.

The 2012 request includes an enhancement of \$9.3 million to bolster OCDETF's efforts to disrupt and dismantle the major Mexican drug cartels operating along the Southwest Border of the United States. These illegal organizations are responsible for smuggling drugs, funneling guns, and illicit drug proceeds back into Mexico. They are largely responsible for the escalation of drug related violence on the Southwest Border. Also, proposed is \$536,000 in program offsets, to include general administrative and IT efficiencies.

The mission of the FBI is to protect the United States from terrorist and foreign intelligence activities; to uphold the law through the investigation of violations of federal criminal law; to provide leadership and assistance to federal, state, local, and international law enforcement agencies; and to perform these responsibilities in a manner that is responsive to the needs of the public and is faithful to the Constitution of the United States.

Protecting America in the current challenging national security and criminal environment requires that the FBI refocus its priorities; realign its workforce to address these priorities; and improve management policies and operating procedures to enhance flexibility, agility, effectiveness, and accountability. The FBI's strategic priorities are, in order:

- Protect the United States from terrorist attack,
- Protect the United States against foreign intelligence operations and espionage,
- Protect the United States against cyber-based attacks and high technology crimes,
- Combat public corruption at all levels of government,
- Protect civil rights,
- Combat transnational and national criminal organizations and enterprises,
- Combat major white-collar crime,
- Combat significant violent crime,
- Support federal, state, county, municipal, and international partners,
- Upgrade technology to successfully perform the FBI's mission.

FBI investigations and operations are conducted through a network of 56 major field offices, 387 smaller field offices (resident agencies), and three information technology centers located throughout the United States; the FBI Academy and engineering complex at Quantico, Virginia; a fingerprint identification and criminal justice information services center in Clarksburg, West Virginia; over 60 foreign liaison posts; and FBI Headquarters in Washington, D.C.

A number of FBI activities are carried out on a reimbursable basis. For example, the FBI is reimbursed for its participation in Interagency Crime and Drug Enforcement programs and by other federal agencies for certain investigative services, such as pre-employment background inquiries and fingerprint and name checks. The FBI is also authorized to conduct fingerprint and name checks for certain non-federal agencies.

For 2012, the FBI proposes \$131.5 million in program enhancements. These enhancements support national security, intelli-

gence, information technology and information sharing. Highlights of these initiatives include: (1) enhanced national security and intelligence capabilities; (2) enhanced surveillance capabilities; (3) additional Indian Country investigations; and (4) enhanced computer intrusions investigative capabilities. Further, program offsets and general administrative efficiencies totaling \$43.5 million are proposed.

The Drug Enforcement Administration's (DEA) mission is to enforce the controlled substances laws and regulations of the United States. DEA's major focus is the disruption and dismantlement of Priority Target Organizations (PTOs)—domestic and international drug trafficking and money laundering organizations having a significant impact upon drug availability in America. DEA emphasizes PTOs with links to organizations on the Attorney General's Consolidated Priority Organization Target (CPOT) list, which represents the "Most Wanted" drug trafficking and money laundering organizations believed to be primarily responsible for the United States' illicit drug supply. DEA places a high priority on targeting the financial infrastructure of major drug trafficking organizations and members of the financial community who facilitate the laundering of their proceeds. From 2005 to 2010, DEA denied to drug traffickers a cumulative total of \$15.8 billion in revenue through the seizure of both assets and drugs. In addition to keeping drugs and drug-related violence out of the United States, DEA plays a vital role in the areas of national and border security.

The resources requested in 2012 will allow DEA to build upon its recent accomplishments. According to DEA's analysis of cocaine seizures, DEA's efforts have had a significant impact on the domestic drug market. From January 2007 to June 2010, the price per pure gram of cocaine has increased 88.2 percent while purity decreased 30.5 percent. Factors contributing to these favorable results include DEA's Drug Flow Attack Strategy; DEA-led operations such as Operation All Inclusive; Mexico's increased pressure on traffickers; extraditions from Mexico and Colombia; DEA coalitions with host nation counterparts; and the denial of drug trafficking revenue.

DEA's activities are divided into three main decision units:

**Domestic Enforcement.**—Through effective enforcement efforts and associated support functions, DEA disrupts and dismantles the leadership, command, control, and infrastructure of major drug syndicates, criminal organizations, and violent drug trafficking groups that threaten the United States. This decision unit contains most of DEA's resources, including domestic enforcement groups, state and local task forces, other federal and local task forces, intelligence groups, and all the support functions essential to accomplishing their mission. Strategic objectives have been established as follows:

- Identify and target the national/regional organizations most responsible for the domestic distribution and manufacture of illicit drugs;

- Systematically disrupt or dismantle targeted organizations by arresting/convicting their leaders and facilitators, seizing and forfeiting their assets, targeting their money laundering operations, and destroying their command and control networks; and,

- Work with international offices to dismantle domestic organizations directly affiliated with international cartels.

**International Enforcement.**—DEA works with its foreign counterparts to attack the vulnerabilities in the leadership, production, transportation, communications, finance, and distribution sectors of major international drug trafficking organizations. Strategic objectives include:

- Identify, prioritize, and target the most significant international drug and chemical trafficking organizations;

- Disrupt and dismantle the networks, financial infrastructures, operations, and the resource bases of targeted international drug and chemical trafficking organizations; and,

- Prevent drug trafficking organizations from funding terrorist organizations and activities.

**State and Local Assistance.**—DEA responds to clandestine laboratory training requirements, hazardous waste cleanup, and cannabis eradication/suppression needs of the U.S. law enforcement community. DEA supports state and local law enforcement with methamphetamine-related assistance and training, which allows state and local agencies to better address the methamphetamine threat in their communities and reduce the impact that methamphetamine has on the quality of life for America's citizens. By teaching and assisting others in the techniques of clandestine laboratory drug enforcement, hazardous waste cleanup, and cannabis eradication/suppression, DEA is able to expand drug enforcement across the United States in a very cost-effective manner. The strategic objectives are to:

- Provide clandestine methamphetamine laboratory training to state and local law enforcement officers;

- Assist state and local law enforcement with efforts to clean up hazardous waste from clandestine methamphetamine laboratories; and,

- Assist local efforts to control the production of cannabis.

DEA also receives funding through reimbursable agreements. The primary reimbursements to DEA are for the Organized Crime Drug Enforcement Task Forces (OCDETF) Program and the Department of Justice's (DOJ) Assets Forfeiture Fund.

For 2012, a total of \$2.4 million in program enhancements is requested under Salaries and Expenses to support high priority DOJ initiatives. Of this amount, an increase of \$900,000 is requested to support the Intelligence Community and national security priorities, and an increase of \$1.5 million is requested to address the challenges posed by emerging communications technologies as part of DOJ's Going Dark Initiative. Funding will be used to develop custom intercept solutions and support the operations of the Domestic Communications Assistance Center.

Also proposed is a total of \$47.1 million in program offsets, to include general administrative efficiencies and program reductions and eliminations.

In addition to these program changes, a cancellation of \$30.0 million in prior year unobligated balances is proposed.

DEA's general long-term goal supports DOJ's efforts to reduce illegal drug availability. DEA accomplishes its general long-term goal by disrupting or dismantling identified PTOs. The measures below reflect DEA's focus on PTOs and those PTOs linked to organizations on the Attorney General's CPOT list.

Public Law 102-395 established the Diversion Control Fee Account in 1993. Fees charged by the Drug Enforcement Administration under the Diversion Control Program are set at a level that ensures the recovery of the full costs of operating this program. By carrying out the mandates of the Controlled Substances Act (CSA), DEA ensures that adequate supplies of controlled drugs are available to meet legitimate medical, scientific, industrial, and export needs, while preventing, detecting, and eliminating diversion of these substances to illicit traffic. The CSA requires physicians, pharmacists, and chemical companies to register with the DEA in order to distribute or manufacture controlled substances or listed chemicals. Investigations conducted by DEA's Diversion Control Program fall into two distinct categories: the diversion of legitimately manufactured pharmaceutical controlled substances and the diversion of controlled chemicals (List I and II) used in the illicit manufacture of controlled substances. Strategic objectives include:

- Identify and target those responsible for the diversion of pharmaceutical controlled substances through traditional investigation and cyber crime initiatives to systematically disrupt and dismantle those entities involved in diversion schemes;

- Support the registrant population with improved technology, including e-commerce and customer support, while maintaining cooperation, support and assistance from the regulated industry;

- Educate the public on the dangers of prescription drug abuse and taking proactive enforcement measures to combat emerging drug trends; and,

- Ensure an adequate and uninterrupted supply of pharmaceutical controlled substances and listed chemicals to meet legitimate medical, commercial, and scientific needs.

For 2012, an increase of \$30.9 million and 124 positions is requested to support regulatory and enforcement activities of the Diversion Control Program. Funding will be used for rent, task

sure that Federal Firearms Licensees (FFLs) and Federal Explosives Licensees (FELs) and permittees conduct business in compliance with all applicable laws and regulations.

Federal Prison Industries, Inc. (FPI), was created by Congress in 1934 and is a wholly-owned Government corporation. Its mission is to employ and train federal inmates through a diversified work program providing products and services to other federal agencies. These operations are conducted in such a manner as to maximize meaningful inmate employment opportunities and minimize the effects of competition on private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

FPI strives to provide additional industrial employment opportunities at existing and planned institutions.

FEDERAL PRISON INDUSTRIES, INCORPORATED—Continued

**Budget program.**—Federal Prison Industries, Inc. operations are entirely self-sustaining and no appropriations are required for its operations. The amounts used by the Corporation for administrative expenses are subject to a congressional limitation. Information regarding this limitation is provided separately following this account.

**Financing program.**—Revenues are derived entirely from the sale of products and services to other federal agencies. Operating expenses are applied against these revenues resulting in operating income or loss. Earnings surplus to the needs of the manufacturing operations, capital improvements, and cash reserves are used to pay accident compensation.

**Operating results.**—To date, Federal Prison Industries, Inc. has returned to the Treasury a total of \$82 million of retained income in excess of the Corporation's needs. No contributions from budget authority have been made to offset deficits for non-revenue producing outlays since the inception of the fund.

The 2012 Budget requests \$178,500,000 for the Office of Justice Programs' (OJP) Justice Assistance appropriation. This appropriation includes programs that provide grants, contracts, and cooperative agreements for research, development and evaluation; development and dissemination of quality statistical and scientific information; victim services for children; and nationwide support for law enforcement agencies.

Through leadership, funding, and technical support, OJP plays a significant role in the research and evaluation of new technologies to assist law enforcement, corrections personnel, and courts in protecting the public, and guides the development of new techniques and technologies in the areas of crime prevention, forensic science, and violence and victimization research. The research and statistical data compiled by OJP staff are used at all levels of government to guide decision making and planning efforts related to law enforcement, courts, corrections, and other criminal justice issues. Grants, technical assistance, and national leadership provided by OJP have supported efforts to provide and improve assistance to the Nation's federal, state, local, and tribal law enforcement and criminal justice agencies.

*Research, Evaluation, and Demonstration Program.*—The National Institute of Justice (NIJ) serves as the research and development agency of the Department of Justice, as authorized by 42 U.S.C. 3721–3723. The mission of NIJ is to advance scientific research, development, and evaluation to enhance the administration of justice and public safety by providing objective, independent, evidence-based knowledge, and tools to meet the challenges of crime and justice, particularly at the state and local levels. NIJ research, development, and evaluation (RD&E) efforts support practitioners and policy makers at all levels of government.

NIJ focuses its resources in program areas where federal assistance will generate the greatest benefit. During strategic and budgetary planning, NIJ emphasizes RD&E activities in the following major program areas: (1) State and Local Law Enforcement; (2) Forensic Science; (3) Crime Prevention; (4) Violence and Victimization; and (5) Corrections and Courts.

JUSTICE ASSISTANCE—Continued

RD&E efforts funded by NIJ concentrate on practical and effective approaches to improving crime and delinquency prevention, crime control, and the administration of justice. NIJ research funding supports the development of new standards and tools for criminal justice practitioners; testing of innovative concepts, equipment, and program models in the field; development of new knowledge through research on crime, justice systems, violence and victimization issues; and evaluation of existing programs and responses to crime. Information generated by NIJ research activities is actively disseminated to numerous targeted audiences across the United States, including policymakers, program partners, and Federal, state, local, and tribal justice agencies.

In 2012, NIJ will continue its important work in forensic sciences (including DNA) in support of effective crime investigation and prosecution. NIJ also plans to make research investments aligned with administration priorities, including: preventing youth violence through research, development, testing, and evaluation; combating illicit drugs and crime; improving the justice system, including problem-solving courts; crime prevention; maintaining effective support programs for ex-offenders through community corrections and prisoner reentry; addressing electronic crime; addressing crime and security at America's borders; preventing delinquency and building effective justice processes for youthful offenders; and improving law enforcement, including effective information-sharing technologies and strategies. The 2012 Budget proposes \$55,000,000 for the Research, Evaluation and Demonstration Program.

**Criminal Justice Statistics Program.**—The Bureau of Justice Statistics (BJS) serves as the primary statistical arm of the Department of Justice, as authorized by 42 U.S.C. 3721–3735, and assists state, local, and tribal governments in collecting and analyzing justice statistics. It disseminates quality information and statistics to inform policy makers, researchers, criminal justice practitioners, and the general public. The Criminal Justice Statistics Program collects, analyzes and publishes data on a wide range of criminal justice topics, including: (1) victimization; (2) law enforcement; (3) prosecution; (4) courts and sentencing; (5) corrections; (6) tribal justice; (7) justice expenditures and employment; (8) international justice systems; and (9) drugs, alcohol, and crime.

In addition to research activities, BJS administers the State Justice Statistics Program for the Statistical Analysis Centers (SACs). SACs have been established in all states and most territories to centralize and integrate criminal justice statistical functions. Through financial and technical assistance to the state SACs, BJS promotes efforts to coordinate statistical activities within the states and conducts the research as needed to estimate the impact of legislative and policy changes. The SACs also serve in a liaison role, assisting BJS with data gathering from respondent agencies within their states.

Further, the Criminal Justice Statistics Program will expand upon its base of research in 2012 with research in a number of areas including: (1) victimization via the redesign the National Criminal Victimization Survey (NCVS), which is the sole continuous source of national information for the many topics related to crime and victimization rates for the Administration and Congress, state and local law enforcement, and the research community; (2) law enforcement; (3) adjudication and sentencing; (4) corrections; (5) recidivism and reentry; and (6) studying American Indians in the criminal justice system. The 2012 Budget proposes \$57,500,000 for the Criminal Justice Statistics program.

**Missing and Exploited Children Program.**—This program, authorized by the Missing Childrens Assistance Act of 1984 (42

U.S.C. 5771, as amended) and administered by OJP's Office of Juvenile Justice and Delinquency Prevention, supports efforts to prevent the abduction and exploitation of children. The 2012 Budget proposes \$60,000,000 for this program, including funding for the Internet Crimes Against Children and AMBER Alert Programs.

**State and Local Assistance Help Desk and Diagnostic Center.**—The Center will assist state, local, and tribal governments, nonprofit organizations, and other potential OJP partners. The 2012 Budget proposes \$6,000,000 for this program.

The 2012 Budget requests \$1,173,500,000 for the Office of Justice Programs' (OJP) State and Local Law Enforcement Assistance appropriation. This appropriation account includes programs that establish and build on partnerships with state, local, and tribal governments, and faith-based and community organizations. These programs provide federal leadership on high-priority criminal justice concerns such as violent crime, criminal gang activity, illegal drugs, information sharing, and related justice system issues. OJP's formula and discretionary grant programs, coupled with training and technical assistance activities, assist law enforcement agencies, courts, local community partners, and other components of the criminal justice system in preventing and addressing violent crime, protecting the public, and ensuring that offenders are held accountable for their actions.

For 2012, funding requested for this account will support the following initiatives:

**Byrne Justice Assistance Grants (JAG).**—The Byrne Justice Assistance Grants program awards grants to state and local governments to support a broad range of activities that prevent and control crime based on local needs and conditions, including: law enforcement programs; prosecution and court programs; prevention and education programs; corrections and community corrections programs; drug treatment programs; and planning, evaluation, and technology improvement programs. The 2012 Budget proposes \$519,000,000 for this program. Of this total, \$30,000,000 is for bulletproof vests and other law enforcement safety assistance, and \$2,000,000 is for the State and Local Anti-Terrorism Training program.

**State Criminal Alien Assistance Program (SCAAP).**—The State Criminal Alien Assistance Program provides federal payments to states and localities that incurred correctional costs for incarcerating illegal aliens. The 2012 Budget proposes \$136,000,000 for this program.

**Victims of Trafficking.**—The primary goal of the Victims of Trafficking program is to empower local law enforcement to better identify and rescue trafficking victims. An important secondary goal is the interdiction of trafficking in its various forms, whether it is forced prostitution, indentured servitude, peonage, or other forms of forced labor. The 2012 Budget proposes \$10,000,000 for this program.

**Residential Substance Abuse Treatment (RSAT).**—The Residential Substance Abuse Treatment program for state prisoners helps states and units of local government develop, implement, and improve residential substance abuse treatment programs in correctional facilities, and establish and maintain community-based aftercare services for probationers and parolees. Ultimately, the program's goal is to help offenders become drug-

The Office of Community Oriented Policing Services (COPS) administers grant programs to assist law enforcement agencies in improving public safety through the implementation of community policing strategies in jurisdictions of all sizes across the country. Community policing represents a shift from more traditional law enforcement and focuses on proactive collaborative efforts and the use of problem-solving techniques to prevent and respond to crime, social disorder, and fear of crime. COPS provides funding to state, local, and tribal law enforcement agencies and other public and private entities to hire and train community policing professionals, acquire and deploy cutting-edge crime-fighting technologies, and develop and test innovative policing strategies.

The 2012 Budget requests \$669,500,000 for programs to be administered by COPS, including these initiatives:

**Hiring Grants.**—The hiring program provides funding to state, local and tribal law enforcement agencies to hire additional sworn law enforcement officers to be deployed in community policing activities. The initiative will continue to support the Administration's goal of hiring 50,000 law enforcement officers nationwide. The 2012 Budget proposes \$600,000,000 for this program. Within this amount, \$50,000,000 will be dedicated towards the hiring of non-sworn law enforcement personnel in order to permit the redeployment of sworn officers to community policing duties, \$42,000,000 will be dedicated towards the hiring of tribal law enforcement officers, and \$20,000,000 will be available for a college loan repayment program for new officers as an added incentive for highly-skilled college graduates who might not otherwise consider careers in the challenging law enforcement field.

**Police Integrity.**—This program funds innovative community policing strategies that enhance trust between the police and their communities. By strengthening trust, police and communities have more opportunities to build partnerships and engage in proactive problem-solving activities to fight crime, reduce the fear of crime, and improve the quality of life. The 2012 Budget proposes \$10,000,000 for this program.

**Community Policing Development.**—This program provides funding for training and technical assistance, and a variety of innovative and knowledge resource products that support the integration of community policing strategies throughout the law enforcement community to enable officers and community members to more effectively address emerging law enforcement and community issues. The 2012 Budget proposes \$20,500,000 for this program. Within this amount, \$2,500,000 is for a training and technical assistance program for law enforcement on domestic radicalization issues.

**Indian Country.**—This program provides funding and resources to meet the public safety needs of law enforcement and advance community policing in Native American communities. The 2012 Budget proposes \$20,000,000 for this program.

**Secure Our Schools.**—This program awards grants to state, local and tribal law enforcement agencies to provide improved security at schools or on school grounds. Funding can be used to install metal detectors, locks, lighting, and other deterrent measures in schools, for security assessments, and for security training of personnel and students. The 2012 Budget proposes \$10,000,000 for this program.

**Child Predator Prosecution.**—This program provides grants to help locate, arrest and prosecute child sexual predators and

exploiters, and enforce state sex offender registration laws. The 2012 Budget proposes \$9,000,000 for this program.

The Budget also requests \$40,330,000 for salaries and expenses in the Office of Justice Programs Salaries and Expenses account for transfer to this account. This funding is required to effectively and efficiently administer new grants provided for in the 2012 budget request, to maintain and monitor active grants awarded in prior fiscal years, and to remain compliant with legislative requirements and Administration directives.

The 2012 Budget requests \$280,000,000 for the Office of Justice Programs' (OJP) Juvenile Justice Programs appropriation. This appropriation account includes programs that support state, local and tribal community efforts to develop and implement effective and coordinated prevention and intervention juvenile programs. Such programs are designed to: reduce juvenile delinquency and crime, and improve the juvenile justice system so that it protects public safety, holds offenders accountable, and provides treatment and rehabilitative services tailored to the needs of juveniles and their families.

The Nation's youth face an ever changing set of problems and barriers to successful lives. As a result, OJP is constantly challenged to develop enlightened policies and programs to address the needs and risks of those youth who enter the juvenile justice system. OJP remains committed to leading the nation in efforts addressing these challenges, which include: preparing juvenile offenders to return to their communities following release from secure correctional facilities; dealing with the small percentage of serious, violent, and chronic juvenile offenders; helping states address the disproportionate confinement of minority youth; and helping children who have been victimized by crime and child abuse.

**Juvenile Justice System Incentive Grants.**—The goal of this new initiative is to consolidate funding targeting juvenile justice improvements into a competitive program that rewards or incentivizes states for progress against key indicators for the juvenile justice system, including (but not limited to): engagement in community-based juvenile strategic planning, implementation of evidence-based strategies and practices, employment of diversion strategies, and reduction of disproportionate minority contact. The new program will be open only to states achieving compliance with the requirements of the Juvenile Justice and Delinquency Prevention Act. The 2012 Budget proposes \$120,000,000 for this program.

**Youth Mentoring.**—The Youth Mentoring program support faith- and community-based, nonprofit, and for-profit agencies in the enhancement and expansion of existing mentoring strategies and programs, as well as assistance to develop, implement, and pilot test mentoring strategies and programs designed for youth in the juvenile justice, reentry, and foster care systems. In addition, OJP supports training and technical assistance to the sites to assist with adapting existing mentoring approaches to meet the needs of the target populations and to identify and maintain partnerships. The 2012 Budget proposes \$45,000,000 for this program. Of this total, \$5,000,000 is for Domestic Radicalization grants to work with youth in disaffected or disengaged communities.

**Title V Local Delinquency Prevention Incentive Grants Program.**—The Title V program provides resources through state advisory groups to units of local government for a broad range of delinquency prevention programs and activities to benefit youth who are at risk of having contact with the juvenile justice system. The 2012 Budget proposes \$62,000,000 for this program.

**Victims of Crime Act (VOCA).**—The Improving Investigation and Prosecution of Child Abuse Program supports training and technical assistance to professionals involved in investigating, prosecuting, and treating child abuse. This program also supports the development of Children's Advocacy Centers and/or multi-disciplinary teams designed to prevent the inadvertent revictimization of an abused child by the justice and social service systems in their efforts to protect the child. The 2012 Budget proposes \$20,000,000 for this program.

**Community-Based Violence Prevention Initiatives.**—Based on the violence reduction work of several cities and public health research of recent years, OJP will provide funding for community-based strategies that focus on street-level outreach, conflict mediation, and the changing of community norms to reduce violence, particularly shootings. The 2012 Budget proposes \$15,000,000 for this program.

**Gang and Youth Violence Prevention and Intervention Initiative.**—The Gang and Youth Violence Prevention and Intervention Initiative will fund communities, localities, and state programs that support a multi-strategic, coordinated approach to gang prevention, intervention, suppression, and reentry in targeted communities. This initiative also aims to enhance and support evidence-based multimodal direct service programs that target both youth at-risk of gang membership, as well as, gang involved youth. The 2012 Budget proposes \$12,000,000 for this program.

**National Forum on Youth Violence Prevention Initiative.**—This forum was created for participating localities to share challenges and promising strategies with each other and to explore how federal agencies can better support local efforts to curb youth and gang violence. The 2012 Budget proposes \$6,000,000 for this program to assist in the expansion of the number of cities participating from six to 18.

The 2012 Budget is requesting \$83,300,000 for the Office of Justice Programs' Public Safety Officers Benefits (PSOB) appropriation, of which \$67,000,000 is a permanent indefinite (mandatory) appropriation for death benefits and \$16,300,000 is a discretionary appropriation for disability and education benefits. Created in 1976, the PSOB program oversees three types of benefits:

**Death Benefits .—**The Death Benefits program provides a one-time financial benefit to survivors of public safety officers whose deaths resulted from injuries sustained in the line of duty.

Programs supported by the Crime Victims Fund focus on providing compensation to victims of crime and survivors; supporting appropriate victims' services programs and victimization prevention strategies; and building capacity to improve response to crime victims' needs and increase offender accountability. The Fund was established to address the need for victim services programs, and to assist state, local, and tribal governments in providing appropriate services to their communities.

The Fund is financed by collections of fines, penalty assessments, and bond forfeitures from defendants convicted of Federal crimes. The 2012 Budget proposes to provide \$850,000,000 from collections and balances for crime victim compensation, services, and related needs. Of this amount, the Budget also proposes to use \$135,000,000 for discretionary grants to aid victims of domestic violence and violence against women, including \$100,000,000 for grants to support domestic violence shelters, transitional housing assistance, and other services, and \$35,000,000 for sexual assault services grants.

Enacted in 1998, the Workforce Investment Act (WIA) is the primary authorization for this appropriation account. WIA expired on September 30, 2003. The Act is intended to provide workers with the information, advice, job search assistance, and training they need to get and keep good jobs; and to provide employers with skilled workers. Funds appropriated for this account generally are available on a July- to- June program year basis, and substantial advance appropriation amounts are provided. This account includes:

**Adult employment and training activities.**—Grants to provide financial assistance to States and territories to design and operate training and employment assistance programs for adults, including low-income individuals and public assistance recipients.

**Dislocated worker employment and training activities.**—Grants to provide reemployment services and retraining assistance to individuals dislocated from their employment.

**Youth activities.**—Grants to support a wide range of activities and services to prepare low-income youth for academic and employment success, including summer jobs. The program links academic and occupational learning with youth development activities.

**Workforce Innovation Fund.**—Contributions of \$69 million from Adult activities, \$94 million from Dislocated Worker activities, and \$74 million from Youth activities will help support a \$379 million Workforce Innovation Fund for competitive grants to test innovative strategies and replicate evidence-based practices in the workforce system. The Fund will support cross-program collaboration and bold systemic reforms to improve education and employment outcomes for participants. A portion of these funds may be used for Pay for Success bonds to engage social investors, the Federal government, and a State or local community to collaboratively finance effective interventions. The Departments of Labor and Education will jointly administer the Fund, which is described in the Title V General Provisions.

**Green Jobs.**—These funds will support research, labor exchange, and job training projects that help prepare workers for careers related to renewable energy and energy efficiency.

**Reintegration of Ex-Offenders.**—Supports activities authorized under the Second Chance Act to help individuals exiting prison make a successful transition to community life and long-term employment through mentoring, job training, and other services. The Department of Labor will coordinate closely with the Department of Justice in carrying out this program.

**Native Americans.**—Grants to Indian tribes and other Native American groups to provide training, work experience, and other employment-related services to Native Americans.

**Migrant and Seasonal Farmworkers.**—Grants to public agencies and nonprofit groups to provide training and other employability development services to economically disadvantaged youth and families whose principal livelihood is gained in migratory and other forms of seasonal farmwork.

**National programs.**—Provides evaluation resources and program support for WIA activities and nationally administered programs for segments of the population that have special disadvantages in the labor market.

**Workforce Data Quality Initiative.**—Competitive grants to support the development of longitudinal data systems that integrate education and workforce data to provide timely and accessible information to consumers, policymakers, and others.

The Office of Job Corps supports the administration and management of the Job Corps program. Established in 1964 as part of the Economic Opportunity Act and authorized by the Workforce Investment Act of 1998 (P.L. 105–220, Title 1, Subtitle C, section 141), Job Corps is an intensive educational and career technical training program for disadvantaged youth who need and can benefit from these training services in order to become more employable, responsive, and productive citizens.

The program serves more than 60,000 participants and operates in a primarily residential setting at 125 centers in 48 states, the District of Columbia and the Commonwealth of Puerto Rico. A new center in Florida is scheduled to open in July 2011, and four new centers are currently under design or construction in Wisconsin, Iowa, New Hampshire and Wyoming. Large and small corporations and nonprofit organizations manage and operate 97 of the Job Corps centers through contractual agreements with the Department of Labor, while the other 28 centers are operated through an interagency agreement with the U.S. Department of Agriculture. Job Corps participants must be economically disadvantaged youth, ages 16–24, and who meet one or more of the following criteria: basic skills deficient; a school dropout; homeless, a runaway, or a foster child; a parent; or in need of additional education, vocational training, or intensive counseling and related assistance in order to participate successfully in regular school-work or to secure and hold employment.

The 2012 Budget continues an initiative to reform and improve Job Corps, by setting high standards for centers and taking quick and decisive action to address problems in the program's performance.

Community Service Employment for Older Americans (CSEOA), authorized by Title V of the Older Americans Act as amended in 2006 (P.L. 109-365), is a federally-sponsored community service employment and training program for unemployed low-income individuals, ages 55 and older. The program, known as the

Senior Community Service Employment Program (SCSEP), offers participants work-based community service training at non-profit or governmental agencies, so that they can gain on-the-job experience and prepare to enter or re-enter the workforce. The 2012 Budget proposes transferring SCSEP to the Department of Health and Human Services to improve coordination between SCSEP and other senior-serving programs administered by the Administration on Aging and to help the program better fulfill its dual goals of fostering individual economic self-sufficiency and promoting useful opportunities in community service.

The Trade Adjustment Assistance (TAA) Community College and Career Training program is authorized by the Health Care and Education Reconciliation Act of 2010 (P.L. 111-152), which provides \$500 million annually in fiscal years 2011-2014 for competitive grants to eligible institutions of higher education. The program aims to improve education and employment outcomes for community college and other students, helping more Americans prepare to succeed in growing occupations. Funding will allow expansion and improvement of education and training programs that can be completed in 2 years or less, result in skills and credentials necessary for high-wage, in-demand jobs, and are suited for workers who are eligible for training under the TAA for Workers program. Grants will support institutions that use evidence to design program strategies, are committed to using data for continuous improvement, and facilitate evaluation that can build evidence about effective practices. The Department is implementing this program in cooperation with the Department of Education.

This account funds the Trade Adjustment Assistance (TAA) for Workers program, which provides weekly cash benefits, training, job search and relocation allowances, and employment and case

management services to certain workers displaced by international trade. The account also funds the Alternative Trade Adjustment Assistance (ATAA) and the Reemployment Trade Adjustment Assistance (RTAA) programs that provide wage insurance payments for certain older workers who become reemployed at lower wages than the wages paid in their pre-layoff employment.

The TAA for Workers program was reauthorized through December 31, 2010, under the Trade and Globalization Adjustment Assistance Act of 2009 (TGAAA) and extended through February 12, 2011 under the Omnibus Trade Act of 2010. Under the TGAAA, workers covered by petitions for the TAA program filed before May 18, 2009, continued to receive the benefits and services, including ATAA, in accordance with the TAA provisions that were in effect prior to these amendments (see Section 1891(b) of the TGAAA). Petitions filed on or after May 18, 2009, are considered under expanded group eligibility provisions (e.g., workers in the service sector will be eligible) and the covered workers may be eligible for enhanced services and benefits, including additional weeks of cash benefits while in training and for the RTAA program. Applications filed on or after February 13, 2011, will be reviewed and administered under prior law, as if the amendments made under the TGAAA had never been enacted.

The Administration proposes legislation to reauthorize and extend the Trade Adjustment Assistance (TAA) for Workers program. The American Recovery and Reinvestment Act of 2009 (Public Law 111–5) amended TAA to expand eligibility to service

FEDERAL UNEMPLOYMENT BENEFITS AND ALLOWANCES—Continued

The Omnibus Trade Act of 2010 (Public Law 111–344) extended the Recovery Act provisions for petitions filed prior to February 13, 2011, and extended the application of prior TAA law through February 12, 2012.

**Unemployment compensation.**—State administration amounts provide administrative grants to State agencies that pay unemployment compensation to eligible workers and collect State unemployment taxes from employers. These agencies also pay unemployment benefits to former Federal personnel and ex-service-members as well as trade readjustment allowances to eligible individuals. State administration amounts also provide administrative grants to State agencies to improve the integrity and financial stability of the unemployment compensation program through a comprehensive performance management system, UI Performs. The purpose is to effect continuous improvement in State performance and related activities designed to assess and reduce errors and prevent fraud, waste, and abuse in the payment of unemployment compensation benefits and the collection of unemployment taxes. National activities relating to the Federal-State unemployment insurance programs are conducted through contracts or agreements with the State agencies or with non-State entities. A workload contingency reserve is included in State administration to meet increases in the costs of administration resulting from increases in the number of claims filed and claims paid. The appropriation automatically provides additional funds whenever unemployment claims workload increases above levels specified in the appropriations language.

The request for additional funding for in-person reemployment and eligibility assessments of claimants of unemployment compensation builds upon the success of a number of States in reducing improper payments and speeding reemployment using these assessments. Because most unemployment claims are now filed by telephone or Internet, in-person assessments conducted in the One-Stop Career Centers can help determine continued eligibility for benefits and adequacy of work search, verify the identity of beneficiaries where there is suspicion of possible identity theft, and provide referral to reemployment assistance to those who need additional help. The \$60 million requested for reemployment and eligibility assessments is estimated to provide benefit savings of \$237 million. It is important that this integrity initiative and other new enforcement investments be fully funded. To ensure full funding of reemployment and eligibility assessments, the Administration proposes to protect the dollars requested for these activities in the appropriations process through allocation adjustments, a mechanism that has been used by past Administrations and Congresses. Allocation adjustments are increases in the ceiling or allocation for annual appropriations, but these increases would be granted only if the base level for reemployment and eligibility assessments was funded at \$10 million and if the use of the funds was clearly restricted to the specified purpose.

**Employment service.**—The public employment service is a nationwide system providing no-fee employment services to job-seekers and employers. State employment service activities are financed by grants provided by formula to States. Funding allotments are provided annually on a Program Year basis beginning July 1 and ending June 30 of the following year.

Employment service activities serving national needs are conducted through specific reimbursable agreements between the States and the Federal Government under the Wagner-Peyser Act, as amended, and other legislation. States also receive funding under this activity for administration of the Work Opportunity Tax Credit, as well for amortization payments for those States that had independent retirement plans prior to 1980 in their State employment service agencies.

**Workforce Innovation Fund.**—The SUIESO account will contribute \$61 million to a \$379 million Workforce Innovation Fund for competitive grants to test innovative strategies and replicate evidence-based practices in the workforce system. The fund will support cross-program collaboration to improve education and employment outcomes for participants. The Departments of Labor and Education will jointly administer the fund, which is described in more detail in the Title V General Provisions.

**Foreign Labor Certification.**—This activity provides for the administration of the foreign labor certification programs within

STATE UNEMPLOYMENT INSURANCE AND EMPLOYMENT SERVICE  
OPERATIONS—Continued

the Employment and Training Administration. Under these programs, U.S. employers that can demonstrate a shortage of qualified, available U.S. workers and that there would be no adverse impact on similarly situated U.S. workers may seek the Secretary of Labor's certification as a first step in the multi-agency process required to hire a foreign worker to fill critical permanent or temporary vacancies. Major programs include the permanent, H-2A temporary agricultural, H-2B temporary non-agricultural and temporary highly skilled worker visas. The account is divided into Federal and State activities.

**Federal Administration.**—Federal Administration provides leadership, policy, and operational direction to Federal activities supporting the effective and efficient administration of foreign labor certification programs.

**State grants.**—Provides grants to State labor agencies in 54 States and U.S. territories funding employment-related activities required for the administration of Federal foreign labor certification programs. Includes State Workforce Agency posting and circulation of job orders and other assistance to employers in the recruitment of U.S. workers, processing of employer requests for prevailing wage determinations for the permanent and temporary programs, state processing of H-2A agricultural and H-2B non-agricultural temporary labor certification applications, State safety inspection of housing provided by employers to workers, and State development of prevailing wage and prevailing practice surveys used to set wages and standards in a defined geographic area.

**One-stop career centers.**—These funds are used to support the joint Federal-State efforts to improve the comprehensive One-Stop system created under WIA. This system provides workers and employers with quick and easy access to a wide array of enhanced career development and labor market information services. A portion of these funds supports a joint initiative between the Employment and Training Administration and the Office of Disability Employment Policy to improve the accessibility and accountability of the public workforce development system for individuals with disabilities.

This account provides for general fund financing of extended unemployment benefit programs under certain statutes. Under the Emergency Unemployment Compensation law enacted in Public Law (P.L.) 102-164, as amended, there continues to be general fund financing for administrative costs related to any extended benefits paid under the optional, total unemployment rate trigger created in that law. This account is also used to make general fund reimbursements for some or all of the benefits and administrative costs incurred under the new Emergency Unemployment Compensation program (first enacted in P.L. 110-252 and expanded and extended several times, most recently in P.L. 111-312). These funds are transferred to a receipt account in the Unemployment Trust Fund (UTF) so that resources may be transferred to the Employment Security Administration Account in the UTF for administrative costs or to the Extended Unemployment Compensation Account in the UTF for benefit costs.

This account makes available funding for repayable advances (loans) to two accounts in the Unemployment Trust Fund (UTF): the Extended Unemployment Compensation Account (EUCA) which pays the Federal share of extended unemployment benefits, and the Federal Unemployment Account (FUA) which makes loans to States to fund unemployment benefits. In addition, the account has provided repayable advances to the Black Lung Disability Trust Fund (BLDTF) whenever its balances proved insufficient to make payments from that account. The BLDTF now has authority to borrow directly from the Treasury under the trust fund debt restructuring provisions of Public Law 110-343. Repayable advances are shown as borrowing authority within the UTF or the BLDTF, and they do not appear as budget authority or outlays in the Advances to the Unemployment Trust Fund and Other Funds account.

This account also makes available funding as needed for nonrepayable advances to the Federal Employees Compensation Account (FECA) to pay the costs of unemployment compensation for former Federal employees and ex-servicemembers, and to the Federal Unemployment and Benefits and Allowances (FUBA) account to pay the costs of benefits and services under the Trade Adjustment Assistance for Workers (TAA) program. These advances are shown as budget authority and outlays in the Advances account.

Advances were needed for the FUA, EUCA, and FECA accounts in fiscal year 2010 and are projected to continue. Detail on the nonrepayable advances to FECA is provided above; detail on the repayable advances is shown separately in the UTF account.

To address the potential need for significant, and somewhat unpredictable, advances to various accounts, Congress appropriates such sums as necessary for advances to all of the potential recipient accounts. The fiscal year 2012 request continues this authority.

PROGRAM ADMINISTRATION

For expenses of administering employment and training programs, \$106,533,000, together with not to exceed \$53,349,000, which may be expended from the Employment Security Administration Account in the Unemployment Trust Fund.

Note.—A full-year 2011 appropriation for this account was not enacted at the time the budget was prepared; therefore, this account is operating under a continuing resolution (P.L. 111-242, as amended). The amounts included for 2011 reflect the annualized level provided by the continuing resolution.

The 2012 Budget proposes legislation to establish fees for new applications under the permanent and H-2B temporary foreign labor certification programs. The Budget also proposes legislation to allow the Department to retain fees for new applications under the H-2A temporary labor certification program and modify the fee to cover program costs. The fees would offset the State and Federal costs of administering these programs and once fully implemented would greatly reduce or eliminate the need for appropriations for this purpose. Upon enactment of the fees, requests for funding in the Foreign Labor Certification administration account would be reviewed and adjusted.

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund (UTF). All State and Federal unemployment tax receipts are deposited into the UTF, and invested in Government securities until needed for benefit payments or administrative expenses. State payroll taxes pay for all regular State unemployment benefits. The Federal unemployment tax (FUTA) pays the costs of Federal and State administration of the unemployment insurance system, veterans' employment services, surveys of wages and employment, and about 97 percent of the costs of the Employment Service. In addition, the Federal tax pays for certain extended benefit payments. During periods of high State unemployment, there is a stand-by program of extended benefits (EB), financed one-half by State unemployment taxes and one-half by the FUTA payroll tax, which are also paid out of the UTF. The American Recovery and Reinvestment Act (Public Law 111-5), and subsequent legislation, has temporarily made EB 100 percent federally financed. Temporary Federal extended benefit programs, including the current Emergency Unemployment Compensation program, are also funded from the Unemployment Trust Fund, either by the Federal tax or by reimbursement from Federal general revenues. The UTF also provides repayable advances (loans) to the States when the balances in their individual State accounts are insufficient to pay benefits. Federal accounts in the UTF may receive repayable advances from the general fund when they have insufficient balances to make advances to States or to pay the Federal share of extended unemployment benefits.

The Federal Employees Compensation Account (FECA) in the Trust Fund provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel, Postal Service employees, and ex-servicemembers. In turn, the various Federal agencies reimburse FECA for benefits paid to their former employees. FECA is not funded out of Federal unemployment taxes. Any additional resources necessary to assure that the FECA account can make the required payments to States will be provided from the Advances to the Unemployment Trust Fund and Other Funds account.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the Unemployment Trust Fund, and receipts from a tax on railroad payrolls are deposited into the Trust Fund to meet expenses.

*Legislative proposal to strengthen the unemployment insurance safety net.*—The economic downturn has severely tested the adequacy of States' unemployment insurance (UI) systems, forcing the majority of States to borrow to continue paying benefits. These debts are now being repaid through additional taxes on employers, which undermine much-needed job creation. To provide short-term relief to employers in these States, the 2012

Budget will propose a suspension of interest on State UI borrowing in 2011 and 2012 along with a suspension of the FUTA credit reduction, which is an automatic debt repayment mechanism. To address the need for States to return their unemployment trust funds to solvency, the Budget will also propose to increase the FUTA taxable wage base to \$15,000 starting in 2014, to index it, and to reduce the FUTA tax rate. States with lower wage bases will need to adjust their UI tax structures. This package will encourage States to put their UI systems on a firmer financial footing for the future, while preventing unnecessary burden on employers in the short term as the economy recovers.

The Budget includes two legislative proposals for later transmittal that affect spending from the Unemployment Trust Fund.

One proposal will create incentives for States to expand use of the Short-Time Compensation (STC) program. The STC program, also known as work sharing, promotes job retention and prevents workers from being laid off. Work sharing is a voluntary employer program designed to help employers maintain their staff by reducing the weekly hours of their employees, instead of temporarily laying off workers, when the employer is faced with a temporary slowdown in business. Workers with reduced hours under an approved STC plan receive a partial unemployment check to supplement the reduced paycheck. The Administration's proposal will provide temporary Federal financing of STC benefits for those States that have an STC law that meets certain guidelines. It will also create a temporary Federal program that will be available in other States and provide implementation funds for States to operate the program and conduct outreach to employers to expand use of STC.

The other legislative proposal is a multi-part legislative initiative to strengthen the financial integrity of the Unemployment Insurance (UI) system and to encourage the early reemployment of UI beneficiaries. The proposal builds upon the enactment of two key components of last year's UI integrity proposal that expanded collection of delinquent UI overpayments and employer taxes through garnishment of Federal tax refunds and improved the accuracy of hiring data in the National Directory of New Hires. The Budget proposal will boost States' ability to recover benefit overpayments and deter tax evasion schemes by permitting them to use a portion of recovered funds to expand enforcement efforts in these areas, including identification of misclassified employees. In addition, the proposal would require States to impose a monetary penalty on UI benefits fraud, which would be used to reduce overpayments, and to prohibit the non-charging of benefits to employers' UI accounts if they are found to be at fault when their actions lead to overpayments. The proposal would also improve the utility and accuracy of hiring data in the National Directory of New Hires by requiring employers to report rehires of employees who have been laid off. These efforts to strengthen the financial integrity of the UI system and encourage early reemployment of UI beneficiaries will keep State UI taxes down and improve the solvency of the State trust funds.

This wholly-owned government corporation established under the Employee Retirement Income Security Act of 1974, as amended, works to preserve defined benefit pension plans and administers mandatory insurance programs to prevent loss of pension benefits under private, defined benefit pension plans. PBGC currently protects the retirement of 44 million Americans in more than 27,500 ongoing pension plans.

The 2012 Budget proposes to give the PBGC Board the authority to adjust premiums and directs them to take into account the risks that different sponsors pose to their retirees and PBGC. This proposal will both encourage companies to fully fund their

pension benefits and ensure the agency's continued financial soundness. The Budget calls for giving the PBGC Board premium-setting authority beginning in 2014, and requires a gradual phase-in of any increases.

**Plan Preservation Efforts.**—PBGC tries, first, to preserve plans and keep pension promises in the hands of the employers who make them. When companies undertake major transactions that might threaten their ability to pay pensions, PBGC negotiates protections for their pension plans. Last year PBGC negotiated with dozens of companies, both in bankruptcy and otherwise, to preserve their plans. These efforts played an important part in helping as many as 250,000 people who would have lost their pensions to keep them.

Similarly, when major layoffs or plant closures threaten a plan's viability, PBGC steps in to negotiate protection for the plan. In FY 2010, PBGC secured an additional \$250 million for participants in 20 companies' pension plans. Since 2006, PBGC has negotiated with sponsors for added protection totaling more than \$644 million, strengthening the pensions of more than 76,000 workers and retirees.

**Stepping in to Insure Pensions When Plans Fail.**—When plans do fail, PBGC steps in to ensure that a portion of benefits continue to be paid. Over the years, PBGC has become responsible for almost 1.5 million people in 4,200 failed plans. Every month, on average, PBGC pays \$467 million for the pensions of 801,000 retirees. PBGC is also responsible for future payments to almost 700,000 who have not yet retired. During FY 2010, PBGC assumed responsibility for 109,000 additional workers and retirees in 172 failed plans, and made 8.5 million payments totaling \$5.6 billion.

**Budget activities:**

**Single-employer benefit payments.**—The single-employer program protects about 33.8 million participants. Under this program, a company may voluntarily seek to terminate its plan, or PBGC may seek termination. The PBGC must seek termination when a plan cannot pay current benefits. A plan that cannot pay all benefits may be ended by a "distress" termination, but only if the employer meets tests proving severe financial distress, such as proving that continuing the plan would force the company to go out of business. If a terminated plan cannot pay at least the PBGC-guaranteed level of benefits, PBGC uses its funds to ensure that guaranteed benefits are paid. A sponsor may terminate a plan in a "standard" termination only if plan assets are sufficient to pay all benefits. In a standard termination, the sponsor closes out the plan by purchasing annuities from an insurance company or by paying benefits in a lump sum. After a standard termination, the PBGC guarantee ends.

**Multiemployer financial assistance.**—The multiemployer insurance program protects about 10.4 million participants. Multiemployer pension plans are maintained under collectively bargained agreements involving unrelated employers, generally of the same industry. If a PBGC-insured multiemployer plan is unable to pay guaranteed benefits when due, the PBGC will provide the plan with financial assistance to continue paying guaranteed benefits, in the form of a loan to the plan.

**Pension insurance activities.**—This part of the administrative budget includes premium collections, purchase of U.S. Treasury securities using premium receipts, pre-trusteeship work, efforts to preserve pension plans, recovery of assets from former plan sponsors, and pension insurance program protection activities.

**Pension plan termination.**— This part of the administrative budget includes all activities related to trusteeship; plan asset

management, investment and accounting; as well as benefit payments and administration services.

**Operational support.**—This part of the administrative budget includes the administrative, information technology infrastructure, and other shared program support for both PBGC's insurance and plan termination activities.

**Financing.**—The primary sources of financing are investment income, insurance premiums paid by sponsors of ongoing covered plans, plan assets from failed plans, and recoveries from sponsors of failed plans. When an underfunded single-employer pension plan is terminated, PBGC takes over the assets of those plans. In FY 2010, PBGC assumed \$1.8 billion in assets from failed plans, and recovered additional assets of \$246 million from plan sponsors to help pay for benefits.

**Operating results.**—The following tables show the status of PBGC's trust funds and PBGC's operating results.

In FY 2010, the Department of Labor abolished the Employment Standards Administration (ESA) to streamline administration of the programs. As the Department is reinvigorating its enforcement of worker protection laws, this reorganization supports the Administration's Worker Protection efforts by eliminating redundant management efforts by elevating program issues directly to the Secretarial level. It also reflects the importance of these programs and increased enforcement supporting the Secretary's Worker Protection goals. In the 2012 Budget, funding previously requested for the component agencies and offices under the heading "Employment Standards Administration Salaries and Expenses" is requested separately for the Office of Workers' Compensation Programs, Wage and Hour Division, Office of Federal Contract Compliance Programs, and Office of Labor-Management Standards. The appropriation for the Employment Standards Administration is proposed to be replaced by four individual appropriations for the Agencies remaining after reorganization of these programs.

**Federal Employees' Compensation Act benefits.**—The Federal Employees' Compensation Act program provides monetary and medical benefits to Federal workers who sustain work-related injury or disease. Not all benefits are paid by the program, since the first 45 days of disability are usually covered by keeping injured workers in pay status with their employing agencies (the continuation-of-pay period). In 2012, 126,000 injured Federal workers or their survivors are projected to file claims; 49,000 are projected to receive long-term wage replacement benefits for job-related injuries, diseases, or deaths. Most of the costs of this account are charged back to the beneficiaries' employing agencies.

**Longshore and harbor workers' compensation benefits.**—Under the Longshore and Harbor Workers' Compensation Act, as

amended, the Federal Government pays from direct appropriations one-half of the increased benefits provided by the amendments for persons on the rolls prior to 1972. The remainder is provided from the special fund which is financed by private employers, and is assessed at the beginning of each calendar year for their proportionate share of these payments.

The 2012 Budget incorporates longstanding General Accounting Office, Congressional Budget Office, and Labor Inspector General recommendations, amending FECA to convert prospectively retirement-age beneficiaries to a retirement annuity-level benefit, establish an up-front waiting period for benefits, streamline claims processing, permit the Department of Labor to recapture compensation costs from responsible third parties, authorize DOL to cross-match FECA records with Social Security records to reduce improper payments, and make other changes to improve and update FECA. The 2012 reform legislation will also include a provision to allow DOL to add an administrative surcharge to the amount billed to Federal agencies for their FECA compensation costs, thereby shifting FECA administrative costs from DOL to Federal agencies in proportion to their usage. If enacted, the surcharge would not be applied until Fiscal Year 2013 to give agencies an opportunity to plan for the change. The legislation

*Energy Employees' Compensation Act benefits.*—The Department of Labor is delegated responsibility to adjudicate and administer claims for benefits under the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA). In July 2001, the program began accepting claims from employees or survivors of employees of the Department of Energy (DOE) and of private companies under contract with DOE who suffer from a radiation-related cancer, beryllium-related disease, or chronic silicosis as a result of their work in producing or testing nuclear weapons. The Act authorizes a lump-sum payment of \$150,000 and reimbursement of medical expenses.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108-767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered under section 5 of the Radiation Exposure Compensation Act. Benefit payments under Part E began in 2005.

*Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA) administration.*—Under Executive Order 13179 the Secretary of Labor is assigned primary responsibility

for administering the EEOICPA program, while other responsibilities have been delegated to the Departments of Health and Human Services (HHS), Energy (DOE), and Justice (DOJ). The Office of Workers' Compensation Programs (OWCP) in the Department of Labor (DOL) is responsible for claims adjudication, and award and payment of compensation and medical benefits. DOL's Office of the Solicitor provides legal support and represents the Department in claimant appeals of OWCP decisions. HHS is responsible for developing individual dose reconstructions to estimate occupational radiation exposure, and developing regulations to guide DOL's determination of whether an individual's cancer was caused by radiation exposure at a DOE or atomic weapons facility. DOE is responsible for providing exposure histories at employment facilities covered under the Act, and other employment information. DOJ assists claimants who have been awarded compensation under the Radiation Exposure Compensation Act to file for additional compensation, including medical benefits, under EEOICPA.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108-767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered by the Radiation Exposure Compensation Act. Administrative expenses for Part E are covered through indefinite, mandatory appropriations provided in P.L. 108-767.

Title IV of the Federal Mine Safety and Health Act authorizes monthly benefits to coal miners disabled due to coal workers' pneumoconiosis (black lung), and to their widows and certain other dependents. Part B of the Act assigned the processing and paying of claims filed between December 30, 1969 (when the program originated) and June 30, 1973 to the Social Security Administration (SSA). P.L. 107-275 transferred Part B claims processing and payment operations from SSA to the Department of Labor's Office of Workers' Compensation Programs. This change was implemented on October 1, 2003.

This fund was established to provide for the accumulation of funds to meet the Panama Canal Commission's obligations to defray costs of workers' compensation which will accrue pursuant to the Federal Employees' Compensation Act (FECA). On December 31, 1999, the Commission was dissolved as set forth in the Panama Canal Treaty of 1977; however, the liability of the Commission for payments beyond that date did not end with its termination. The establishment of this fund, into which funds were deposited on a regular basis by the Commission, was in conjunction with the transfer of the administration of the Federal Employees' Compensation Act (FECA) program from the Commission to the Department of Labor, effective January 1, 1989.

The trust fund consists of all monies collected from the coal mine industry under the provisions of the Black Lung Benefits

Revenue Act of 1981, as amended by the Consolidated Omnibus Budget Reconciliation Act of 1985, in the form of an excise tax on mined coal. These moneys are expended to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability. In addition, the fund pays all administrative costs incurred in the operation of Part C of the Black Lung program. The fund is administered jointly by the Secretaries of Labor, Treasury, and Health and Human Services. The Emergency Economic Stabilization Act of 2008, enacted on October 3, 2008, authorized restructuring of the Black Lung Disability Trust Fund (BLDTF) debt by (1) extending the current coal excise tax rates of \$1.10 per ton on underground-mined coal and \$0.55 per ton on surface-mined coal until December 31, 2018; (2) providing a one-time appropriation for the BLDTF to repay the market value of parts of the outstanding repayable advances and accrued interest; and (3) refinancing the remainder of the outstanding debt through the issuance of zero-coupon bonds, to be retired using the BLDTF's annual operating surplus until all of its remaining obligations have been paid.

The Patient Protection and Affordable Care Act (PPACA) of 2010 reinstated two provisions of the Black Lung Benefits Act that had been removed in 1981 for claims filed on or after January 1, 1982. These provisions include: automatic entitlement to benefits for survivors of miners who had been awarded benefits at the time of their death and a presumption that a miner who has at least 15 years of qualifying coal mine employment and has a totally disabling lung condition has pneumoconiosis even in the absence of a negative x-ray.

The trust funds consist of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and—pursuant to an annual assessment of the industry—for the general expenses of the fund under the Longshore and Harbor Workers' Compensation Act (LHWCA), as amended.

These trust funds are available for payments of additional compensation for second injuries. When a second injury is combined with a previous disability and results in increased permanent partial disability, permanent total disability, or death, the employer's liability for benefits is limited to a specified period of compensation payments, after which the fund provides continuing compensation benefits. In addition, the fund pays one-half of the increased benefits provided under the LHWCA for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

The Wage and Hour Division enforces the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act (FLSA), the Migrant and Seasonal Agricultural Worker Protection Act (MSPA), the Family and Medical Leave Act, certain provisions of the Immigration and Nationality Act (INA), the wage garnishment provisions in Title III of the Consumer Credit Protection Act, and the Employee Polygraph Protection Act. The Division also determines prevailing wages and enforces employment standards under various Government contract wage standards. In 2012, approximately 200,000 persons are expected to be aided under the FLSA through securing agreements with firms to pay back wages owed to their workers. In government contract compliance actions, about 22,000 persons will be aided through securing agreements to pay wages owed to workers. Under MSPA, approximately 1,400 investigations will be completed. In the course of all on-site investigations, investigators will routinely check for employer compliance with child labor standards, and approximately 1,000 targeted child labor investigations will be conducted.

The Office of Federal Contract Compliance Programs (OFCCP) enforces equal employment opportunity and nondiscrimination requirements of Federal contractors and subcontractors. In particular, OFCCP enforces: Executive Order 11246, which prohibits employment discrimination on the basis of race, sex, religion, color, and national origin; Section 503 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 (through a memorandum of understanding with the Equal Employment Opportunity Commission), which prohibit employment discrimination against individuals with disabilities; and the Vietnam Era Veterans Readjustment Assistance Act of 1974, as amended, which prohibits employment discrimination against certain protected veterans. OFCCP programs cover close to 100,000 work-sites with a total workforce of 12 million persons. OFCCP monitors contractors' compliance through compliance evaluations and reporting requirements. Specifically, OFCCP will complete 3,675 compliance evaluations, with a focus on both supply and service construction reviews. OFCCP will continue to shift its outreach strategy from being contractor-centric to worker-focused, which will strengthen its enforcement capacity in the process. In addition, the agency will also ensure that contractors and subcontractors are provided linkages to recruitment sources for hiring and advancement of minorities, women, protected veterans, and individuals with disabilities.

**Safety and Health Standards.**—This activity provides for the protection of workers' safety and health through development, promulgation, review, and evaluation of occupational safety and health standards and guidance, as specified under the Occupational Safety and Health (OSH) Act of 1970. Before any standard is proposed or promulgated, a determination is made that: (1) a significant risk of serious injury or health impairment exists; (2) the standard will reduce this risk; (3) the standard is economically and technologically feasible; and (4) the standard is economically and technologically feasible when compared with alternative regulatory proposals providing equal levels of protection. This activity also ensures, through the SBREFA process, that small business concerns are taken into account in the process of developing standards.

**Federal Enforcement.**—This activity provides for ensuring the protection of employees through the enforcement of workplace standards promulgated under the Occupational Safety and Health (OSH) Act of 1970, through the physical inspection of worksites, and by providing guidance on how to comply with the requirements of OSHA standards. Enforcement programs are targeted to the investigation of imminent danger situations and employee complaints, investigation of fatal and catastrophic accidents, programmed inspections of firms with injury-illness rates that are above the national average, and special emphasis inspections for serious safety and health hazards. OSHA's enforcement strategy complies from a selective targeting of inspections and related compliance activities to specific high hazard industries and worksites.

**Whistleblower Programs.**—This activity provides for the enforcement of Section 11(c) of the OSH Act, which prohibits any person from discharging or in any manner retaliating against any employee because the employee has exercised rights under the Act, including complaining to OSHA and seeking an OSHA inspection, participating in an OSHA inspection, and participating or testifying in any proceeding related to an OSHA inspection. This activity also includes the administration of twenty other whistleblower statutes, protecting employees who report violations of various airline, commercial motor carrier, consumer product, environmental, financial reform, health care reform, nuclear, pipeline, public transportation agency, railroad, maritime, and securities laws.

**State Programs.**—This activity supports states in assuming responsibility for administering occupational safety and health programs under State OSHA plans approved by the Secretary. Under section 23 of the OSH Act, grants matching up to fifty percent of total program costs are made to States that meet the Act's criteria for establishing and implementing State OSHA programs that are at least as effective as the Federal program. State programs, like their Federal counterparts, provide a mix of enforcement, outreach, training, and compliance assistance activities.

**Technical Support.**—This activity provides specialized technical expertise and advice in support of a wide range of program areas, including construction, standards setting, variance determinations, compliance assistance, and enforcement. Areas of expertise include laboratory accreditation, industrial hygiene, occupational

SALARIES AND EXPENSES—Continued

health nursing, occupational medicine, chemical analysis, equipment calibration, safety engineering, environmental impact statements, technical and scientific databases, computer-based outreach products, and emergency preparedness.

**Federal Compliance Assistance.**—This activity supports a range of training, outreach, and cooperative programs that provide compliance assistance for employers and employees in protecting workers' safety and health, with particular emphasis on small business, immigrant, and other high risk and hard-to-reach workers. OSHA works with employers and employees through Voluntary Protection Programs that recognize and promote effective safety and health management partnerships that focus on the development of extended cooperative relationships and alliances that commit organizations to collaborative efforts with OSHA. This activity also provides assistance to federal agencies in implementing and improving their job safety and health programs. Occupational safety and health training is provided at the OSHA Training Institute and affiliated Education Centers throughout the country. Compliance and technical assistance materials are prepared and disseminated to the public through various means, including the Internet.

**State Compliance Assistance: Consultation Grants.**—This activity supports 90 percent Federally funded cooperative agreements with designated State agencies to provide free on-site consultation to small employers upon request. State agencies tailor workplans to specific needs in each State while maximizing their impact on injury and illness rates in smaller establishments. These projects offer a variety of services, including safety and health program assessment and assistance, hazard identification and control, and training of employers and their employees.

**Compliance Assistance: Training Grants.**—This activity supports safety and health grants to organizations that provide training, education, technical assistance, and develop educational materials for employers and employees. These grants address safety and health education needs related to specific high-risk topics and industries identified by the agency.

**Safety and Health Statistics.**—This activity supports information technology infrastructure, management of information, and the statistical basis for OSHA's programs and field operations. These are provided through an integrated data network, and statistical analysis and review. OSHA administers and maintains the recordkeeping system that serves as the foundation for the BLS survey on occupational injuries and illnesses and provides guidance on recordkeeping requirements to both the public and private sectors.

**Executive direction and administration.**—This activity supports executive direction, planning and evaluation, management support, legislative liaison, interagency affairs, federal agency liaison, administrative services, and budgeting and financial control.

**Enforcement.**—The enforcement strategy in 2012 will be an integrated approach toward the prevention of mining accidents, injuries, and occupational illnesses. This includes inspection of mines and other activities as mandated by the Federal Mine Safety and Health Act of 1977 (Mine Act), as amended by the Mine Improvement and New Emergency Response Act of 2006 (MINER Act), special emphasis initiatives that focus on persistent safety and health hazards, promulgation of federal mine safety and health standards, investigation of serious accidents, and on-site education and training. The desired outcome of these enforce-

ment efforts is to reduce accidents, fatalities, and occupational illness in the mining industry.

**Assessments.**—This activity assesses and collects civil monetary penalties for violations of safety and health standards.

**Educational policy and development.**—This activity develops and coordinates MSHA's mine safety and health education and training policies, and provides classroom instruction at the National Mine Health and Safety Academy for MSHA personnel, other governmental personnel, and the mining industry. States provide mine health and safety training materials, and provide technical assistance through the State Grants program.

**Technical support.**—This activity applies engineering and scientific expertise through field and laboratory forensic investigations to resolve technical problems associated with implementing the Mine Act and the MINER Act. Technical support administers a fee program to approve equipment, materials, and explosives for use in mines and performs field and laboratory audits of equipment previously approved by MSHA. It also collects and analyzes data relative to the cause, frequency, and circumstances of mine accidents.

**Program evaluation and information resources (PEIR).**—This activity provides program evaluation and information technology resource management services for the agency.

**Program administration.**—This activity performs general administrative functions and is responsible for meeting the requirements of the Government Performance and Results Act (GPRA) and developing MSHA's performance plan and Annual Performance Report.

*Jobs for Veterans State grants.*—The Jobs for Veterans Act (JVA) of 2002 provides the foundation for this budget activity. The JVA requires the Veterans Employment and Training Service (VETS) to act on behalf of the Secretary in the promulgation of policies and regulations that ensure maximum employment and training opportunities for veterans and priority of service for veterans within the State workforce delivery system for employment and training programs funded in whole or in part by the U.S. Department of Labor. Under the JVA, resources are allocated to States to support Disabled Veterans Outreach Program (DVOP) specialists and Local Veterans' Employment Representatives (LVERs).

Disabled Veterans Outreach Program specialists (38 U.S.C. 4103A) provide intensive services to meet the employment needs of eligible veterans. DVOPs place maximum emphasis on helping economically or educationally disadvantaged veterans. Priority of service (38 U.S.C. 4215) is given to special disabled veterans, other disabled veterans, and other eligible veterans.

Local Veterans' Employment Representatives (38 U.S.C. 4104) conduct outreach to employers as well as assist veterans in gaining employment by conducting job search workshops and establishing job search support groups. LVERs also facilitate employment, training, and placement services provided to veterans under the applicable State employment service delivery system, including One-Stop Career Centers. In addition, each LVER provides reports to the manager of the State employment service delivery system and to the State Director for Veterans Employment and Training (38 U.S.C. 4103) regarding the State's compliance with Federal law and regulations with respect to special services and priorities for eligible veterans.

*Transition Assistance Program.*—This program provides employment workshops for departing service members in the continental U.S. and at major overseas installations. VETS coordinates with the Departments of Defense, Veterans Affairs, and Homeland Security to provide transition services to military service members separating from active duty. TAP is implemented worldwide and provides labor-market and employment-related information and other services to separating service members and their spouses. The goal of TAP is to expedite and facilitate the transition from military to civilian employment.

*Federal management.*—VETS' Federal management budget activity carries out programs and develops policies to provide veterans the maximum employment and training opportunities (38 U.S.C. 4102-4103A) and to investigate complaints received under the Uniformed Services Employment and Reemployment Rights Act (USERRA) (38 USC 4322). Veterans' Preference activities, which are intended to assist veterans in obtaining Federal employment (39 U.S.C. 4214), are also supported under this activity.

Resources under this activity are also used to evaluate the job training and employment assistance services provided to veterans under the Jobs for Veterans State Grants (38 USC 4102A), the Homeless Veterans Reintegration Program (Section 738 of the Stewart B. McKinney Homeless Assistance Act (MHAA) of July 1987, and amended by Section 5 of the Homeless Veterans Comprehensive Assistance Act (HVCAA of 2001), and the Veterans Workforce Investment Program (Section 168, Workforce Investment Act, P.L. 105-220). This budget activity supports field activities and personnel who provide technical assistance to

grantees to ensure they meet negotiated and mandated performance goals and other grant provisions.

This budget activity also supports the oversight and development of policies for the Transition Assistance Program (10 USC 1144 and 38 USC 4113). The activity funds outreach and education efforts, such as job fairs, that raise the awareness of employers about the benefits of hiring veterans. The activities of the Advisory Committee for Veterans Employment, Training, and Employer Outreach (38 USC 4110) also are supported. The REALifeLines initiative facilitates timely and comprehensive employment services to our Nation's severely wounded and injured veterans.

**National Veterans' Employment and Training Services Institute.**—The National Veterans' Training Institute (NVTI) supplies competency-based training to Federal and State providers of services to veterans (38 U.S.C. 4109). NVTI also provides training for Veterans Employment and Training Service personnel. NVTI is administered through a contract and supported by dedicated funds. NVTI ensures that these service providers receive a comprehensive foundation so they can effectively assist job-seeking veterans.

**Homeless Veterans' Reintegration Program.**—The Homeless Veterans' Reintegration Program (HVRP) (38 U.S.C. 2021) provides grants to States or other public entities, as well as to non-profits, including faith-based organizations. Grant awards enable grantees to operate employment programs to reach out to homeless veterans and help them become employed. VETS partners with the Departments of Veterans Affairs and Housing and Urban Development to promote multi-agency-funded programs that integrate the different services needed by homeless veterans. HVRP grants are provided for both urban and rural areas.

**Veterans' Workforce Investment Program.**—The Veterans' Workforce Investment Program (VWIP) (Section 168 of P.L. 105–220) provides competitive grants geared toward training and retraining to create employment opportunities for veterans in high-skill occupations, and to meet employer demands.

The Information Technology Modernization account is a new account which addresses the following two activities:

**Departmental Support Systems.**—This activity represents a permanent, centralized IT investment fund for the Department of Labor managed by the Chief Information Officer. The fund is used to support process improvements, modernization, and enhancements to Departmental common universal support processes and systems, as well as enterprise-wide programs for effective IT management and decision making, including government-wide e-Gov initiatives.

**IT Infrastructure Modernization.**—This Chief Information Officer-managed activity funds the effort to transform nine major independently funded and managed IT infrastructure silos at the sub-agency level into a unified IT infrastructure. The unified infrastructure will be centrally managed and provide all agencies with general purpose business productivity tools, a shared environment for common data sources, and the underlying IT services to support it.

Diplomatic and Consular Programs are financed by this appropriation, fees for services, and reimbursements from other agencies (including for administrative and other services provided by the Department of State). As in previous years, two-year funding is requested for this account, except for funds requested for Worldwide Security Protection (WSP), which is to remain available until expended. This account is the Department of State's primary operating account and funds a broad range of activities from policy setting, planning and design, to implementation and operations and maintenance. The 2012 request includes base funding for the State Department operations in Iraq, Afghanistan, and Pakistan that are supported by the Diplomatic and Consular Programs (D&CP) account. The balance of the funding requested for operations in Iraq, Afghanistan, and Pakistan is included in the Overseas Contingency Operations (OCO) account request for the D&CP account.

Funds are requested in the following categories:

**Human Resources.**—This activity supports American salaries at overseas and domestic United States diplomatic missions, including Department of State employees carrying out security protection activities. The professional development and training activity is a continuous process by which the Department ensures that its professionals have the skills, experience and judgment to fulfill its functions at all levels. Training programs are designed to provide employees with the specific functional

area and language skills needed for the conduct of foreign relations in the Department and abroad. This activity also supports the management, recruitment, and performance evaluation of Foreign and Civil Service employees (including efforts to attract a diverse applicant pool) and locally employed staff.

**Overseas Programs.**—This activity provides funding for the operational programs of all the regional bureaus of the Department of State, which are responsible for managing United States foreign policy through bilateral and multilateral relationships. Funds made available for 2012 will support 267 United States embassies, consulates, and other diplomatic posts worldwide. Resources for this activity are used to provide for: the political and economic reporting and analysis of interests to the United States; the representation of U.S. diplomatic and national interests to countries abroad; and the bilateral and multilateral negotiation of U.S. foreign policy objectives, including the hosting of and participation in various international conferences, meetings and other multilateral activities in the United States and abroad. Resources in this appropriation support the conduct of international informational programs of the United States. The resources in this activity are used to define, explain and advocate U.S. policies abroad and to seek to increase knowledge and understanding among foreign audiences of U.S. society and its values. This activity also encompasses medical programs for the Department of State, the Foreign Service and other U.S. Government departments and agencies overseas. Services are provided in Washington, D.C. as well as at missions worldwide, covering more than 90,000 employees, dependents and local hires. Centralized funding for travel and transportation of effects associated with the assignment, transfer, home leave and separation of the Department's personnel and dependents is also included in this activity.

**Diplomatic Policy and Support.**—This activity supports the operational programs of the functional bureaus of the Department of State, which includes providing overall policy direction, coordination, and program management among United States missions abroad in pursuit of regional and global foreign policy objectives, including the hosting of various international conferences and meetings in the United States and abroad. Resources also fund the management of U.S. participation in arms control, nonproliferation, and disarmament negotiations and other verification and compliance activities, in addition to funds otherwise available for such purposes. This activity, supported by fees for consular services, also encompasses overseas American citizen services; the issuance of passports to U.S. citizens both here and abroad; visa adjudication and prevention and detection of visa fraud; and implementation of a coordinated strategy to improve consular systems and processes in support of U.S. border security, including sharing data with the Department of Homeland Security, the Department of Justice, the Intelligence Community, the Treasury Department, and the law enforcement community. The information management activity in D&CP includes resources that are used for the effective and efficient creation, collection, processing, transmission, dissemination, use, storage, and disposition of information required for the formulation and execution of foreign policy and for the conduct of daily business. Its requirements are driven by the informational needs of the President, the Secretary of State, the Department and its 267 missions, and other Government agencies overseas. Components of the information management activity include: telecommunications; classified information handling; unclassified data and word processing; pouch, mail, and publishing services; administration of an electronic and archival records management program; document classification

and declassification; information security; information technology capital planning; and provision of information management services. Administration and staff activities are also included in this area. These activities include domestic and overseas administrative services directly related to Department programs, such as:

—The direction and control of administration and management operations, and reviewing and setting resource levels and priorities for various programs and bureaus financed by this appropriation.

—The budgeting, financial planning, and fiscal operations for bureaus and offices financed by this appropriation.

—The contracting and procurement of services and supplies, maintenance and repair of equipment and property (including the operation and routine maintenance of property directly leased or owned by the Department), vehicle operation, and shipping and customs services.

—Centralized funding for travel and transportation of effects associated with the assignment, transfer, home leave, and separation of the Department's personnel and dependents.

—Rental payments to the General Services Administration for domestic space occupied by the Department.

**Security Programs.**—This activity provides for the operation of security programs, including for Worldwide Security Protection (WSP) and the Bureau of Diplomatic Security, to protect diplomatic personnel, overseas diplomatic missions, residences, domestic facilities and information. The salaries paid to Department employees who carry out the security protection function worldwide are included in the Human Resources program activity. Under the direction of the Secretary of State, the overall mission of the Bureau of Overseas Buildings Operations (OBO) is to provide U.S. diplomatic and consular missions abroad with safe, secure, and functional facilities that support the foreign policy objectives of the United States. Specific program functions include: providing guidance to posts, the regional bureaus and other foreign affairs agencies on the renovation, construction and operations of facilities; providing expert space and facilities planning; managing and overseeing the design, construction, and renovation of mission facilities; incorporating security features into overseas and domestic facilities; and ensuring the security of facilities during construction or renovation. In addition, OBO is responsible for establishing standards and policies for overseas housing, developing, in conjunction with posts, effective maintenance programs for post facilities, and monitoring and reporting the inventory of maintenance and backlog requirements. OBO also ensures the safety of the building occupants through the development of fire/life safety and accessibility compliance programs.

In 2012, the Department will collect charges for the eighth year of the Capital Security Cost Sharing Program (CSCSP). The CSCSP has two main goals: accelerating the construction of approximately 150 new safe, secure and functional embassy and consulate compounds over fourteen years (2005–2018), at a cost of approximately \$17.5 billion, and providing an incentive for all United States Government agencies to right-size their presence overseas.

While over 20,000 U.S. government employees have been moved to safer, more secure facilities, over 45,000 remain in older, aging facilities, many of which cannot be replaced for many years. The 2012 request includes authority to implement a Maintenance Cost Sharing Program (MCSP) to provide critically needed renovation, construction and repair of overseas facilities, to provide adequate working conditions for multi-agency staffs, and

protect the US taxpayer investment. Under this proposal, a portion of the CSCSP funds would be used to maintain overseas facilities in 2012 .

The objective of the Asset Management Program is to obtain the best use of diplomatic and consular properties overseas through sale of surplus or underutilized properties and reinvestment of the proceeds in properties that provide a greater return to the U.S. Government and/or improve the safety of mission personnel. In lieu of appropriated resources, OBO uses asset sales proceeds for long-term capital investment to minimize the growth of U.S. Government leasehold requirements (through property acquisition) or to address a high-priority need for new construction or fit-out of leased space.

This appropriation also provides for capital expenditures necessary to preserve, maintain, repair, and plan for buildings owned or leased by the Department of State overseas or in the United States, including the renovation of the Harry S Truman building where required.

This fund, authorized by sections 13 and 23 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2684), finances on a reimbursable basis certain administrative services, such as printing and reproduction, editorial material, motor pool operations and dispatch agencies operations, inter-agency cooperative administrative support services, acquisition services, information technology desktop support, and expenses of carrying out the Foreign Missions Act, including any acquisitions of property under section 204(f) of the State Department Basic Authorities Act of 1956 (22 U.S.C. 4304(f)).

Using the Working Capital Fund, the International Cooperative Administrative Support Services (ICASS) program was fully implemented in 1998. ICASS restructures overseas administrative support activities to allow more decision-making and managerial participation by all participating agencies, more equitable cost distribution, and incentives for efficient provision of services. Under ICASS, each agency represented at an overseas post chooses the services it wishes to receive and pays a proportional share of the cost of those services. Working through inter-agency councils at each overseas post, all agencies have a say in determining post administrative budgets and defining service standards, as well as reviewing costs and vendor performance.

This appropriation provides the U.S. share of operating expenses for ten treaty-based international fisheries commissions and organizations, two international marine science organizations, one whaling commission, and the Antarctic Treaty Secretariat, as well as funding regional sea turtle conservation, and travel expenses of non-government U.S. commissioners and their advisors. These international fisheries and whaling commissions coordinate scientific studies of shared fish stocks and other living marine resources and establish common management measures to be implemented by member governments based on their results. Many also oversee the allocation of fishing rights to their members. In addition, the Great Lakes Fishery Commission carries out a program to eradicate the invasive, parasitic sea lamprey. The marine science organizations coordinate international research on valuable fisheries, oceanography, and marine ecosystems and the results are publicly disseminated and used to advise member governments on fisheries and marine science policy.

The Global Health and Child Survival account funds health-related foreign assistance for the Department of State and the U.S. Agency for International Development (USAID), representing the majority of funds provided for the President's Global Health Initiative (GHI). The GHI seeks to improve health outcomes by adopting a women, girls, and gender-equity approach to health; increasing impact through strategic integration and coordination; strengthening and leveraging multilateral institutions; encouraging country ownership and investing country-led plans; building sustainability through health systems strengthening; improving metrics, monitoring and evaluation; and promoting research, development and innovation.

*Global Health and Child Survival—State.*—Within the GHI, the Global Health and Child Survival-State (GHCS—State) account supports the fight against global HIV/AIDS through the President's Emergency Plan for AIDS Relief (PEPFAR). The 2012 Budget requests \$5.642 billion in the GHCS—State account, which forms the bulk of PEPFAR funding (\$7.2 billion in total). PEPFAR is led by the Office of Global AIDS Coordinator in the

State Department, which partners with agencies such as the U.S. Agency for International Development (USAID), the Department of Health and Human Services, the Department of Defense, and the Peace Corps for program implementation. Programs work through expanded partnerships to build capacity for effective, innovative, country-led, and sustainable services, and to create a supportive and enabling policy environment for combating HIV/AIDS, including as part of the broader USG and country-level health and development approach. In addition, PEPFAR supports implementation of strong monitoring and evaluation systems to identify best practices, determine progress toward goals, and ensure compliance with PEPFAR policies and strategies. PEPFAR programs support scaling up HIV/AIDS prevention, care, and treatment services within the context of strengthened health systems, particularly in terms of human resources in nations with severe health worker shortages and lack of service delivery capacity. As part of the GHI, PEPFAR is linking its efforts to important programs in other areas of global health as well as other areas of development, including the areas of education, gender equity, and economic development. A contribution to the Global Fund to Fight AIDS, Tuberculosis and Malaria (the Global Fund) is included in the GHCS—State request.

*Global Health and Child Survival—USAID.*—The 2012 Budget requests \$3.1 billion in the GHCS—USAID account for a comprehensive and integrated approach to global health programs as outlined in the GHI. USAID, working in partnership with foreign governments, local private sector and non-governmental organizations, and public-private partnerships, will build capacity, strengthen health systems, and promote sustainable integrated health care for more people. Funding includes activities that promote family planning/reproductive health, child survival and maternal health, polio, nutrition activities in coordination with the Feed the Future Initiative on food security to address such issues as micronutrients and iodine deficiency, as well as activities directed at vulnerable children, and reducing HIV transmission and the impact of the HIV/AIDS pandemic in developing countries. Funding is also requested to address the threat of other infectious diseases such as tuberculosis, malaria, influenza and other pandemic diseases, and neglected tropical diseases in developing countries.

The Millennium Challenge Account is administered by an independent U.S. Government corporation, the Millennium Challenge Corporation (MCC), that has the specific strategic goal of reducing poverty through growth in some of the poorest countries in the world. MCC was established on January 23, 2004, and has signed 22 compacts totaling over \$7.8 billion. These investments help foster stability through economic growth and poverty reduction in partner countries. MCC encourages policy reforms by working with only those countries that have created the conditions for growth by ruling justly, investing in their people, and committing to economic freedom, with a particular emphasis on fighting corruption. Countries develop their poverty reduction proposals in broad consultation with their own civil society and MCC. MCC compacts specifically define the implementation responsibilities of partner countries, including financial accountability and transparent and fair procurement practices, and require measurable results to ensure that MCC assistance is used responsibly and effectively. The President's 2012 Budget request assumes passage of legislative changes needed to maximize the impact of MCC assistance through more innovative approaches to the provision of that assistance.

This account supports U.S. foreign policy objectives by providing economic assistance to allies and countries in transition to democracy, supporting Middle East peace efforts, increasing stability in conflict/post conflict environments, and financing economic stabilization programs, frequently in a multi-donor context. Key objectives include:

1) Supporting strategically significant friends and allies through assistance designed to increase the role of the private sector in the economy, reduce government controls over markets, enhance job creation, and improve economic growth.

2) Developing and strengthening institutions necessary for sustainable democracy. Typical areas of assistance include technical assistance to administer and monitor elections, capacity-building for non-governmental organizations, judicial training, and women's participation in politics. Assistance is also provided to support the transformation of the public sector to encourage democratic development, including training to improve public administration; promote decentralization; and strengthen local governments, parliaments, independent media and non-governmental organizations.

3) Strengthening the capacity of partner governments to manage the human dimension of transitions out of instability and to help sustain the neediest sectors of the population during the transition period.

This account also includes funding for alternative development programs.

The Foreign Military Financing Direct Loan Program (FMFDLP) Account is a program account established pursuant to the Federal Credit Reform Act (FCRA) of 1990, as amended, to provide the funds necessary for the subsidy element of loans. As required by the Federal Credit Reform Act of 1990, this non-budgetary account records all cash flows to and from the Government resulting from direct loans for foreign military financing obligated in 1992 and after. The foreign military financing credit program provides

loans that finance sales of defense articles, defense services, and design and construction services to foreign countries and international organizations. The amounts in this account are a means of financing and are not included in budget totals. Expenditures from this account finance the subsidy element of direct loan disbursements and are transferred into the Foreign Military Financing Direct Loan Financing (FMFDLF) Account to make required loan disbursements for approved FMS or commercial sales. The FMFDLF is a financing account used to make disbursements of Foreign Military Loan funds for approved procurements and for subsequent collections for loans after September 30, 1991. The account uses permanent borrowing authority from the U.S. Treasury combined with transfers of appropriated funds from the Foreign Military Financing Direct Loan Program (FMFDLP) Account to make required disbursements to loan recipient country borrowers for approved procurements. Receipts of debt service collections from borrowers are used to repay borrowings from U.S. Treasury.

The Foreign Military Loan Liquidating Account (FMLLA) is a liquidating account that records all cash flows to and from the Government resulting from direct loans obligated and loan guarantees for foreign military financing committed prior to 1992. This account is shown on a cash basis and reflects the transactions resulting from loans provided to finance sales of defense articles, defense services, and design and construction services to foreign countries and international organizations. No new loan disbursements are made from this account. Certain collections made into this account are made available for default claim payments. The Federal Credit Reform Act (FCRA) provides permanent indefinite authority to cover obligations for default payments if the liquidating account funds are otherwise insufficient. All new foreign military financing credit activity in 1992 and after (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year) is recorded in corresponding program and financing accounts.

As required by the Federal Credit Reform Act of 1990, the Military Debt Reduction Financing (MDRF) Account is a non-budgetary financing account that records all cash flows to and from the Government resulting from restructuring foreign military loans. The amounts in this account are a means of financing and are not included in budget totals. It is an account established for the debt relief of certain countries as established by Public Law 103-87, Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1994, Section 11, Special Debt Relief for the Poorest, Most Heavily Indebted Countries. The MDRF buys a portfolio of loans from the FMLLA, thus transferring the loans from the FMLLA Account to the MDRF Account.

The Clean Technology Fund (CTF) is an ongoing multibillion dollar effort to reduce the growth of emissions in developing countries by catalyzing large-scale private sector investments through financing the additional costs of commercially available cleaner technologies over dirtier, conventional alternatives. By funding the extra cost of the cleaner technology, the CTF incentivizes cleaner projects that leverage development bank financing, and attract new investor capital into low carbon sectors. The CTF, one of the two multilateral Climate Investment Funds, leverages the capital bases and country program expertise of the Multilateral Development Banks. To receive funding, eligible countries need to first develop credible national investment plans that identify key high-emissions sectors where targeted projects could stimulate low carbon growth and the scalable uptake of clean technologies. Since 2009, the CTF's governing committee has endorsed 14 such plans with a combined CTF funding envelope of \$4.3 billion and total planned investments of over \$40 billion. More specifically, the committee has approved nearly \$1.4 billion for the first 19 projects in these plans, which will mobilize total investments of over \$11 billion.

The Strategic Climate Fund (SCF), one of two multilateral Climate Investment Funds (CIFs), is a suite of three programs to pilot innovative approaches and scaled-up activities aimed at specific climate change-related challenges in developing countries. The Pilot Program for Climate Resilience (PPCR) helps the most vulnerable populations in very poor countries better prepare for and respond to the unavoidable effects of climate change through innovative development plans, strategies, and projects. The PPCR pilot programs are for Bangladesh, Bolivia, Cambodia, Mozambique, Nepal, Niger, Tajikistan, Yemen, Zambia, the Caribbean region (Dominica, Grenada, Haiti, Jamaica, Saint Lucia, Saint Vincent and the Grenadines) and the Pacific region (Papua New Guinea, Samoa, and Tonga). The Forest Investment Program (FIP) helps protect our global forests by reducing deforestation in developing countries through improved governance and forest management, and by addressing the drivers of deforestation. The FIP pilot programs are Brazil, Burkina Faso, Democratic Republic of Congo, Ghana, Indonesia, Laos, Mexico, and Peru. The Program for Scaling-Up Renewable Energy in Low Income Countries (SREP) will demonstrate the economic, social and environmental viability of low carbon development pathways in very poor countries. The SREP pilot programs are for Ethiopia, Honduras, Kenya, Maldives, Mali, and Nepal.

Persistent hunger remains an economic, development, and political challenge in many developing countries—as seen during the 2008 food price crisis. Without greater investment by developing countries and donors to address food insecurity, a significant reduction in the number of undernourished people (currently estimated by the United Nations' Food and Agriculture Organization at nearly 1 billion) is unlikely, with serious implications for poverty reduction efforts and political stability in these countries.

In response to this challenge and commitments made by leaders at the G-8 Summit in L'Aquila, Italy and the G-20 Summit in Pittsburgh in 2009, the United States and other donors (Australia, Canada, Spain, South Korea, and the Gates Foundation) established a new multi-donor trust fund — the Global Agriculture and Food Security Program (GAFSP) — in 2010 with initial pledges totaling nearly \$1 billion. The fund's public sector window helps finance the agricultural development strategies of developing countries that have demonstrated their commitment to a strategic approach for achieving lasting improvements in the food security of their populations. The fund, which is administered by the World Bank, leverages the technical expertise of other multilateral institutions such as the International Fund for Agricultural Development and the regional development banks. GAFSP received requests for funding from 25 low-income countries in 2010 and awarded grants totaling \$337 million to eight of those countries (Bangladesh, Ethiopia, Haiti, Mongolia, Niger, Rwanda, Sierra Leone, and Togo). Additional grant awards are anticipated to be made in 2011, depending on additional donor contributions. (The U.S. multi-year pledge is \$475 million). A private sector window, which will provide financing to small and medium-sized agribusinesses and small-holder farmers, will also become operational in 2011.

The fund incorporates a number of innovative design features including in-depth impact evaluations on a significant percentage of all the projects financed by GAFSP, an inclusive governance structure that provides potential recipient countries and civil society organizations with a strong role in fund governance, and an open and transparent application process that relies on inde-

pendent evaluations by a group of experts in agriculture and development issues.

The International Bank for Reconstruction and Development (IBRD or World Bank) provides financing and technical assistance to support infrastructure investment and policy reform. The IBRD operations are designed to promote sustainable economic growth, reduce poverty, and raise living standards, including through targeted investments in infrastructure, basic human needs, private-sector development, and core policy reforms. During 2010, the IBRD made new commitments of \$44.2 billion and gross disbursements of approximately \$28.9 billion. Since its establishment in 1945, the IBRD has made loans totaling almost \$525

billion. The 2012 Budget provides \$117.4 million for the first of five installments for the International Bank for Reconstruction and Development (IBRD) General Capital Increase (GCI). Absent the GCI, the Banks lending capacity would fall due to increased lending levels during the global financial crisis.

##### Global Environment Facility

The IBRD acts as Trustee for the Global Environment Facility (GEF) Trust Fund. The GEF provides partial funding for developing country projects designed to provide global environmental benefits by reducing greenhouse gas emissions, protecting international waters, promoting biodiversity conservation, reducing persistent organic pollutants and ozone depleting substances, and preventing and controlling desertification and deforestation. With its highly specific focus on global environmental issues, where both costs and benefits are shared across international borders, the GEF occupies an important niche in the system of international development institutions. Its basic mission is to support capacity building and innovative and cost-effective investments whose design and environmental benefits can be duplicated (and financed) elsewhere. Since its inception in 1991, the GEF has allocated over \$9.2 billion in grants, leveraging over \$40 billion in co-financing, to support more than 2,700 projects in over 165 countries.

In 2010, donor governments agreed on the fifth replenishment of the GEF. During the replenishment negotiations, the United States achieved important policy reforms to improve the GEF's overall effectiveness, particularly with regard to country-owned business plans for GEF funding and resource allocation. The 2012 Budget includes \$143.8 million for the second of four scheduled installments of GEF-5.

##### CONTRIBUTION TO THE INTERNATIONAL DEVELOPMENT ASSOCIATION

For payment to the International Development Association by the Secretary of the Treasury, \$1,358,500,000, to remain available until expended.

For payment to the International Development Association by the Secretary of the Treasury for costs incurred under the Multilateral Debt Relief Initiative, \$167,000,000, to remain available until expended.

The International Development Association (IDA) is a member of the World Bank Group and provides concessional development financing and grants to the world's poorest nations. These countries are primarily in Sub-Saharan Africa and South Asia, but also in Latin America, Eastern Europe, and the former Soviet Union. IDA's primary goal is to help recipient countries achieve sustained economic growth and poverty reduction, and particularly to meet the exceptional development challenges faced by Africa within its broad commitment to support all the world's poor countries. IDA is the single largest source of multilateral lending extended on concessional terms to developing countries. Projects have to meet the same economic, financial, and environmental standards as other World Bank projects. IDA resources for new lending are provided primarily by new donor contributions through 3-year replenishments, and are augmented by earnings, payments of existing loans, and transfers of income from the non-concessional windows of the World Bank.

During 2010, IDA made new commitments of \$14.6 billion. Since its establishment, IDA has made commitments totaling \$234 billion. The largest regional share of 2010 IDA resources, 49 percent, went to Africa.

Under the 16th replenishment (IDA-16), IDA will provide total resources for prospective new commitments of \$49.2 billion over the mid-2011 through mid-2014 period. Through the IDA-16 replenishment negotiations, U.S. leadership secured a number of commitments for reform. These include reforms to strengthen IDA's financial model, ensure resources for crisis-impacted and post conflict countries, and sharpen IDA's focus on development impact and results. IDA-16's internal loan reflows will be boosted by accelerating repayment of IDA credits by graduates like China, and by employing somewhat less concessional financing terms for higher income IDA-blend countries that also have access to the Banks non-concessional lending window. IDA-16 will establish a crisis response window to provide resources for countries hit by natural disasters (e.g. Haiti) and severe, exogenous economic shocks. In IDA-16, supplemental assistance for post-conflict countries will be extended, on a case-by-case basis, beyond the current 10-year limit, providing critical resources for countries like Afghanistan. The IDA-16 Results Measurement Framework will expand the use of common core sector indicators which can be measured across countries. IDA-16 will also include a stronger framework for project impact evaluation to improve accountability and inform the deployment of limited development resources.

The 2012 Budget includes \$1,358.5 million for the first of three scheduled installments under IDA-16. The U.S. pledge for IDA-16 is \$4,705.5 billion over three years and is based on the reform commitments described above.

#### Multilateral Debt Relief Initiative

In June 2005, the Group of 8 (G-8) major industrial countries proposed the Multilateral Debt Relief Initiative (MDRI) whereby

IDA would cancel 100 percent of its debt claims on countries that reach the Heavily Indebted Poor Countries (HIPC) completion point. The HIPC initiative entails coordinated action by governments and international financial institutions to reduce the external debt burdens of HIPC countries to sustainable levels. The MDRI goes further by providing irrevocable debt stock reduction so as to free up additional resources for poverty reducing expenditures. Under the MDRI, donors have committed to compensate the World Bank Group dollar for dollar for the MDRI-related foregone reflows over a 50-year MDRI period (2004 to 2054). The 2012 Budget provides \$91 million to meet the remainder of our IDA-15 portion of our MDRI commitment and \$76 million as a first payment for the IDA-16 portion of our MDRI commitment.

The Multilateral Investment Guarantee Agency (MIGA) is a member of the World Bank Group. MIGA is designed to encourage the flow of foreign private investment to and among developing countries by issuing guarantees against noncommercial risks and carrying out investment promotion activities. During World Bank 2010, MIGA issued 28 guaranteed contracts, with a maximum aggregate contingent liability of \$1.5 billion. Since MIGA's inception, estimated foreign direct investment facilitated totals more than \$87 billion, as of June 30, 2010. Negotiations on MIGA's first General Capital Increase (GCI) were completed in 1998. The United States committed to contribute a total of \$30 million in paid-in capital and nearly \$140 million in callable capital over three years. The agreement included commitments from MIGA on a range of policy issues of substantial importance to the United States, including environment, information disclosure, labor, and creation of an inspection function for greater accountability and transparency. In 2000, the Administration sought and received congressional authorization for the United States' full participation in the MIGA GCI. No request is being made for MIGA for 2012.

The Inter-American Development Bank (IDB) promotes sustainable economic growth and productivity, poverty reduction, private sector development, and good governance in Latin America and the Caribbean through loans and technical assistance. During 2010, the IDB approved \$12.6 billion in loans. Since its inception, the IDB has approved a total of \$198 billion. The IDB provides financing through: 1) the Ordinary Capital window that lends at market-based rates, and 2) the Fund for Special Operations (FSO), which provides financing on concessional terms to the region's poorest nations.

The 2012 Budget provides \$102.0 million for the first of five installments for the Inter-American Development Bank's (IDB) Ninth General Capital Increase (GCI). The United States used this opportunity afforded by the capital increase negotiations to consolidate key institutional reforms and improve the strategic direction of the IDB in assuring sound finances, effective management and governance, safeguards, transparency and accountability, disclosure, and focus on core missions including the needs of the poorest populations.

## Inter-American Investment Corporation

The Inter-American Investment Corporation (IIC), established in 1984, is a member of the Inter-American Development Bank Group, whose purpose is to promote development of private small and medium sized enterprises (SMEs) in Latin America and the Caribbean. It is a legally autonomous entity whose resources and management are separate from those of the Inter-American Development Bank itself. Through direct loans and equity investments in SMEs as well as through lending to private financial intermediaries, the IIC helps SMEs in the region to access the medium/long-term capital necessary to start-up, expand, or modernize their operations. During 2010, the IIC approved 51 projects totaling \$376 million. Since its inception, the IIC has approved 650 projects for a total amount of \$4.0 billion.

The 2012 Budget provides \$20.4 million to clear remaining U.S. arrears to the IIC. The deadline to pay for subscribed shares from the 1999 capital increase expired March 31, 2008 (the original deadline was October 31, 2007, but the IIC granted the United States an extension). Despite reluctance by IIC membership to

extend the deadline further, the United States was able to successfully broker another extension in which the United States would pay 10 percent of its arrears in 2010, 45 percent of its arrears in 2011 and 45 percent of its arrears in 2012. A failure to meet this financing deadline would result in the reduction of shareholding in the IIC to 22 percent (from 25 percent).

The Asian Development Bank Group promotes broad-based sustainable economic growth and development, poverty alleviation, and cooperation in the Asia/Pacific region. It has two main financing windows: 1) the Asian Development Bank's "hard-loan" window (known as the Ordinary Capital Resources window or OCR), and 2) the Asian Development Fund (AsDF) the "soft-loan" window which lends at concessional rates to the region's poorest

nations. and for the ninth replenishment of the Asian Development Fund (known as AsDF10) in May 2008.

In 2010, the AsDB Group lent roughly \$10 billion from its hard-loan window and extended an estimated \$3.2 billion in AsDF loan and grant resources. Since its founding in 1966, the AsDB has committed approximately \$166 billion in loans. In addition, the AsDB Group has made cumulative private sector loans, guarantees, and equity investments of over \$12.6 billion. In 2010, the AsDB Group extended \$1.6 billion in private sector assistance in the form of loans, equity investments, guarantees, and syndications. None of this important work would be possible without the ongoing support of shareholders and donors, including the United States.

**Asian Development Bank**

The 2012 Budget provides \$106.6 million for the second of five scheduled paid-in capital contributions to the AsDB's fifth General Capital Increase. The hard-loan window of the Asian Development Bank is funded through periodic capital contributions from shareholders, against which the bank borrows in international capital markets. The United States completed negotiations on the fifth General Capital Increase in May 2009. This capital increase (GCI V) achieved key reform priorities for the United States, including upgrading the AsDB's policies on environmental safeguards, strengthening the AsDB's internal controls, and modernizing its risk management practices. Other key achievements include commitments to professionalize human resources, and ensuring adequate resources for U.S. foreign policy priorities in the region. The United States was also able to achieve a higher level of contribution from the bank's net income to the Asian Development Fund. The U.S. pledged a paid-in capital contribution of \$533 million over five years for this agreement.

**Asian Development Fund**

The 2012 Budget also provides \$115.25 million for the third of four scheduled contributions under AsDF10. This replenishment achieved key priorities for the United States. The AsDF established a grants window, following the example of the International Development Association and the African Development Fund. During the AsDF10 period, grants are expected to reach \$2.75 billion, or 25 percent of total AsDF10 operations. The AsDF continues to strengthen the use of the performance-based allocation system in determining resource levels to borrowing countries. The AsDF10 agreement also solidified a comprehensive results management system to measure and guide the AsDB's operations and lending programs. Finally, the AsDF has prioritized operations for reconstruction and development in Afghanistan, which will receive \$1.1 billion in resources, all in the form of grants. The U.S. has pledged \$461 million over four years for the AsDF-10, the same contribution as that pledged during the last replenishment cycle.

The African Development Bank group is composed of 1) the African Development Bank (AfDB), which lends at prevailing rates to middle income countries and private sector borrowers in middle- and low- income countries, and 2) the African Development Fund (AfDF), which provides grants and concessional loans to the poorest African countries.

**African Development Bank**

In 2010, the AfDB approved new projects, programs, and equity investments amounting to about \$4.46 billion. Since its first operations in 1967, AfDB has financed projects, programs, and equity investments amounting to about \$52 billion. The 2012 Budget includes \$32.4 million for the first of eight payments for the sixth general capital increase for the African Development Bank (GCI-6).

In May 2010, AfDB Governors agreed on a 200 percent general capital increase to support an increase in the AfDB's sustainable lending capacity from \$1.8 billion per year to \$5 billion per year. As GCI-6 was negotiated, the U.S. played a major role in securing the following set of reforms to the AfDB's finances and operations: (1) Updating its liquidity policy and borrowing constraints created about \$4 billion in additional lending headroom and will permit more effective leveraging of new capital. (2) A 20 basis point increase in loan charges will better cover loan-related administrative costs. (3) A new, comprehensive financial model will better integrate decisions on loan pricing, administrative expenses, net

income allocation (including increased transfers to the Banks concessional window) and capital adequacy. (4) At least 40 percent of private sector operations will benefit low-income countries. (5) Significant strengthening of risk management functions will safeguard AfDB resources, with particular attention to risks associated with private sector operations in low-income countries with weak investment climates. (6) Capacity for investigations and audits will grow, commensurate with the loan portfolio. (7) The Bank extended its results framework from a previous focus exclusively on the AfDF to now also include the work of the AfDB. (8) The Bank is updating the content and accessibility of information on its web site, which will include publicizing a list of firms and individuals found to have engaged in wrongdoing in MDB-financed development projects. (9) The AfDB is reviewing its disclosure policy and practice to meet the highest standards applied by other MDBs. This will include strengthening the presumption of disclosure by eliminating the positive list and emphasizing a limited negative list.

#### African Development Fund

The AfDF approved \$2.04 billion for new projects and programs in 2010. Since its first operations in 1974, cumulative AfDF financing totals an estimated \$35 billion. The Budget provides \$195 million for the first of three installments of the U.S. contribution to the twelfth replenishment of the African Development Fund (AfDF-12), which covers the period from 2012 to 2014.

In September 2010, the United States and other donor countries reached agreement on AfDF-12, which will provide approximately \$3 billion per year in development financing for low-income countries in Africa. The United States has been a leading voice for policy reforms to maximize the AfDF's development effectiveness. In addition to the Bank-wide policy reforms agreed as part of the general capital increase, the following policies were negotiated for AfDF-12: (1) AfDF will employ rigorous performance metrics to allocate the large majority of its resources. Country allocations will continue to be based on Country Policy and Institutional Assessment scores (a broad measure of the strength of governance), performance on the AfDF project portfolio, population, and per capita income, with the country performance metrics receiving the highest weight. Resources in the regional operations set-aside will be allocated based on a new performance scorecard. Supplemental assistance through the fragile states facility will be allocated through a formula based on PBA country allocations. (2) The Bank will build upon the significant progress it has already made on quality and results reforms. This will include more frequent reporting on results using an expanded set of common core sector indicators that can be measured across countries, stronger quality control on project design and country strategy development, and a revitalized independent evaluation group. (3) Budget support lending will be capped at 25 percent of total AfDF lending. (4) AfDF resources set aside for regional operations will increase to 20 percent of AfDF-12 resources (from 17.5 percent in AfDF-11), recognizing the Bank's strength in this area and the importance of regional integration to building markets and boosting economic growth on the continent. (5) The Bank's environmental and social safeguards policy will be reviewed and strengthened through a process involving input from civil society organizations.

#### Multilateral Debt Relief Initiative

In June 2005, the Group of 8 (G-8) major industrial countries proposed the Multilateral Debt Relief Initiative (MDRI) whereby the Africa Development Fund (AfDF) would cancel 100 percent of its debt claims on countries that reach the Heavily Indebted Poor Countries (HIPC) completion point. The HIPC initiative

entails coordinated action by governments and international financial institutions to reduce the external debt burdens of HIPC countries to sustainable levels. The MDRI goes further by providing irrevocable debt stock reduction so as to free up additional resources for poverty reducing expenditures. Under the MDRI, donors have committed to compensate the African Development Bank Group "dollar for dollar" for the MDRI-related foregone AfDF reflows over a 50-year MDRI period (2004 to 2054). The 2012 Budget provides \$7.5 million as a first payment toward the AfDF MDRI commitment.

#### CONTRIBUTION TO THE EUROPEAN BANK FOR RECONSTRUCTION AND DEVELOPMENT

The European Bank for Reconstruction and Development (EBRD) supports market-oriented economic reform and democratic pluralism through predominately private sector lending and investments in the nations of Central and Eastern Europe and the former Soviet Union. The United States and other shareholders signed the articles of agreement of the EBRD on May 29, 1990, and the Bank officially began operating on April 15, 1991. In April 1996, shareholders approved a doubling of the EBRD's capital base from EUR 10 billion to EUR 20 billion (approximately \$24 billion) which went into effect in April 1997. As of the end of 2010, approximately 75 percent of the Bank's portfolio was in the private sector. Since its inception, the EBRD has provided over \$65 billion in financing for over 2,800 operations, contributing to investments in the region worth over \$205 billion.

In May 2010, the EBRD's Board of Governors approved a 50 percent increase in the EBRD's capital which is structured as a transfer of \$1.39 billion (EUR 1 billion) from reserves to paid-in capital, and a temporary increase of \$12.5 billion (EUR 9 billion) in callable capital. EBRD will use this augmented capital to support a temporary expansion of lending and investment in response to the regional effects of the financial crisis.

For 2012, the Administration is seeking authorization to contribute \$1.25 billion (EUR 900 million), as the U.S. pro-rata contribution to a temporary increase in the EBRD's callable capital. Funding the U.S. share of the temporary increase in callable capital requires congressional authorization, but not an appropriation.

#### NORTH AMERICAN DEVELOPMENT BANK

The North American Development Bank (NADBank) provides financing for environmental infrastructure projects in the U.S.-Mexico border region. A portion of its capital also finances NAFTA-related community adjustments and investment projects in both countries. Under NADBank's charter, the United States and Mexico contributed equally to NADBank's capital, a total contribution of \$450 million in paid-in capital and \$2.55 billion in callable capital. There is no paid-in request for 2012.

NADBank finances environmental infrastructure projects that have been certified by the U.S.-Mexico Border Environmental Commission (BECC), an institution designed to assist States and local communities on both the U.S. and Mexican side in coordinating border projects.

As of December 2010, NADBank had approved \$791.41 million in loans for 60 projects and \$89.79 million in grants for 39 projects. The Bank has also administered \$564.65 million in EPA-funded grants to 92 projects in Mexico and the United States.

## NORTH AMERICAN DEVELOPMENT BANK—Continued

The total investment value of all the projects to which it provides or administers funding is approximately \$3.45 billion.

The Multilateral Investment Fund (MIF), administered by the Inter-American Development Bank, provides grants and loans to support private-sector development and finance and labor sector reforms in Latin America and the Caribbean. Special consideration is given to reforms that encourage private foreign direct investment and promote privatization. Grants and loans are used for technical assistance to identify and resolve investment constraints, for investment in human capital, and for business infrastructure and development.

During 2010, the MIF approved 100 projects totaling \$116 million. Since its inception in 1992, the MIF has approved 1,567 projects, of which the MIF contribution totaled more than \$1.79 billion.

The United States made a commitment to the MIF in 1992 amounting to \$500 million. Negotiations were completed in early 2005 for the first replenishment of the MIF with a United States commitment of \$150 million to be paid in six equal annual installments. The United States achieved its key objectives in these negotiations: a strengthened commitment to measurable results, increasing efficiency, maintaining a focus on grants, allocating resources to maximize innovation, reforming Inter-American Development Bank procurement, and instituting a sunset clause. Grant funding will be about 75 percent of all funding approvals.

The 2012 Budget provides \$25.0 million for the sixth and last installment payment for the first replenishment of the MIF (MIF II).

The International Fund for Agricultural Development (IFAD) was established in 1977 as a multilateral financial institution focused on promoting rural agricultural development and food security in poorer countries. IFAD's specific mandate is to assist rural small-scale producers and subsistence farmers to increase their productivity and incomes, improve food security, and help integrate them into larger markets.

The 2012 Budget provides \$30 million for the third of three scheduled contributions under IFAD's eighth replenishment (IFAD-8). In December 2008, negotiations were concluded on IFAD-8 and the U.S. pledged a total of \$90 million which will leverage resources to provide a \$3 billion work program over the three-year replenishment period 2010–2012. The U.S. exercised leadership to achieve key objectives, including human resources reform to improve the institution's staff profile, incentive structure, and increase the proportion of operational staff; continued application of a strong performance-based allocation system; a five-tiered results framework; clear measures to enhance the independence of the internal audit function including consultation on hiring and removal of the internal auditor; and a commitment

for IFAD to develop comprehensive environment, natural resources and climate change policies.

This account provides technical assistance to other countries in support of U.S. foreign policy objectives and in support of the responsibilities of the U.S. Treasury Department to formulate, conduct and coordinate the international financial policies of the United States. Pursuant to OTA's authorizing statute, technical assistance provided through this account facilitates key short- and medium-term reforms in developing countries, specifically

in the policy and management areas of budget, revenue, government debt, financial institutions and financial enforcement.

The proposed appropriation will fund full-time resident technical assistance advisors, intermittent advisors, and program-related administrative costs. The appropriation will support technical assistance programs: in Asia, the Middle-East, Africa, Latin America, and the Caribbean. It will enable continued technical assistance to developing and transition countries to strengthen their capacity to manage public finances through efficient revenue collection, well-planned and executed budgets, judicious debt management, fundamentally sound banking systems, and strong controls to combat corruption and economic crimes, including terrorist financing. It will also support Treasury's work to strengthen financial infrastructure and combat terrorist financing in national security priority countries, where long-term stability will depend on strong financial governance. The Treasury Department will continue to coordinate activities with international financial institutions, USAID, the Department of State, and other relevant U.S. Government agencies when determining where its technical assistance program can have the greatest positive impact.

The Global Fund to Fight AIDS, Tuberculosis and Malaria (Global Fund) account exists to obligate and disburse U.S. contributions to the Global Fund which come from appropriations within the Departments of State and Health and Human Services. The United States was a driving force in the creation of the Global Fund, a public-private partnership developed to finance country-led effort to fight the three diseases, and the U.S. government made the founding pledge of \$200 million to the Global Fund in May 2001. The Global Fund became a non-profit foundation under Swiss law in January 2002, and the Global Fund Board approved the first grants in April of that year.

The purpose of the Global Fund is to attract, manage, and disburse resources through a public-private partnership that make a sustainable and significant contribution to the reduction of infections, illness and death, thereby mitigating the impact of HIV/AIDS, tuberculosis and malaria in countries in need. The Global Fund pursues an integrated and balanced approach to prevention, treatment, care and support. The innovative Global Fund model finances programs developed by the recipient countries themselves in line with national strategic health plans and priorities. The requirement that all areas of society with a stake in public health be involved in the proposal development process, including civil society and private sector, ensures strong and comprehensive programs. The Global Fund works through efficient, effective disbursement mechanisms, based on grant performance, minimizing transaction costs and operating in a transparent and accountable manner based on clearly defined responsibilities.

As of December 17, 2010, there have been more than \$29.8 billion in pledges and \$18.2 billion in contributions to the Global Fund from developed and developing country governments, foundations, corporations, innovative financing mechanisms, and individuals. The U.S. government is the largest donor, with more than \$9.5 billion in pledges and more than \$5.1 billion in contributions. The 2012 request includes \$1.3 billion for the Global Fund, including \$1 billion from the Global Health and Child Survival account and \$300 million from the National Institutes of Health/National Institute of Allergy and Infectious Diseases.

The 2012 Budget provides \$15 million for Treasury implementation of the Tropical Forest Conservation Act (TFCA) which authorizes debt relief for low and middle income countries to support conservation of tropical forests.

TFCA received strong bipartisan support and was signed into law in 1998. Modeled after the Enterprise for the Americas Initiative (EAI), P.L. 105–214, as amended, it allows the Administration to reduce outstanding concessional U.S. Agency for International Development and P.L. 480 debt stocks to support conservation of tropical forests in eligible developing countries. Seventeen TFCA debt reduction agreements have been concluded with 14 countries: Bangladesh, Belize, El Salvador, Peru (two agree-

ments), the Philippines, Colombia, Jamaica, Panama (two agreements), Paraguay, Guatemala, Botswana, Costa Rica (two agreements), Indonesia and Brazil. In total, these agreements will generate over time more than \$260 million to support forest conservation.

*Development Assistance Programs.*—The U.S. Agency for International Development (USAID) uses these funds to promote transformational development in developing countries working in partnership with foreign governments, local private sector and non-governmental organizations, and public-private partnerships. These programs enable our foreign partners to implement the often difficult political, economic and other systemic changes that must occur to achieve sustainable development. These programs help a country become more self reliant by sustaining economic and social progress.

*Promoting economic growth.*—Funding supports trade and investment programs to increase the capacity of developing countries to participate effectively in the global trading system, comply with trade agreements, improve food security, mitigate the effects of and build resilience to the impacts of global climate change, improve business climates, and raise productivity. Development Assistance programs also support economic reforms, help create new job opportunities, expand access to market information, improve the knowledge and skills of entrepreneurs and workers, and support robust agricultural and natural resource management programs.

*Governing justly and democratically.*—Funding supports countries to strengthen their rule of law and respect for human rights, encourage open and competitive political processes, promote the development of a politically active civil society, and encourage more transparent and accountable government institutions.

*Investing in people.*—Funding helps to develop human capital through programs such as improved and expanded access to basic education, especially for girls and women, and higher education and training to expand the skilled human capital base that is needed for development.

*Peace and security.*—Funding for conflict mitigation and reconciliation activities are designed to meet the unique needs of fragile or crisis prone countries to establish a foundation for longer-term development by promoting reconciliation, supporting peace processes, and providing support for addressing the root causes of violence through peace building programs.

*USAID Forward Initiatives.*—Funding will support initiatives on innovation, evaluation, and science and technology, changing the way USAID develops and brings innovations to scale, uses scientific advancements, and evaluates its work. The Development Innovation Ventures (DIV) program invests resources in testing and scaling-up innovative and high-return development projects. Science and technology funding supports a series of partnerships and Grand Challenges for Development to bring the power of science to bear on major development problems. Evaluation funds support a rebuilding of USAID's capacity for performance monitoring and rigorous evaluation.

The International Disaster Assistance (IDA) account provides funds to save lives, reduce human suffering, and mitigate and prepare for natural and complex emergencies overseas. Specifically, these funds provide for the management of humanitarian assistance, rehabilitation, disaster risk reduction, and transition to development assistance programs. Humanitarian relief interventions include, but are not limited to, shelter, emergency health and nutrition, and the provision of safe drinking water.

IDA programs target the most vulnerable populations that are affected by the shock of the disaster including those that are internally displaced.

The request includes \$300 million for emergency food security, which will be used for local and regional purchase of food and other interventions, such as cash voucher and cash transfer programs to facilitate access to food.

The Transition Initiatives (TI) account addresses opportunities and challenges facing conflict-prone countries and those countries making the transition from the initial crisis stage of a complex emergency to sustainable development and democracy. Programs are focused on advancing peace and stability, including promoting responsiveness of central governments to local needs, civic participation programs, media programs raising awareness of national issues, addressing underlying causes of instability, and conflict resolution measures. Recent country examples where TI funds were used include Afghanistan, Pakistan, Haiti, Yemen, Sudan, Kyrgyzstan, and Zimbabwe.

TI funding provides core operational funds for the Office of Transition Initiatives within the U.S. Agency for International Development Bureau for Democracy, Conflict, and Humanitarian Assistance.

The Fund, authorized by section 635(m) of the Foreign Assistance Act of 1961, finances on a reimbursable basis the costs associated with providing administrative support to other agencies under the International Cooperative Administrative Support Services (ICASS) program overseas. Under ICASS, each agency pays a proportional share of the cost of those services they have agreed to receive. Working through inter-agency councils at post, all agencies have a say in determining which services the USAID mission will provide, defining service standards, reviewing costs, and determining funding levels. The Fund is also used for deposit of rebates from the use of Federal credit cards, the deposits then being made available for start-up costs at new ICASS service provider missions and for technical support to missions currently providing services.

As required by the Federal Credit Reform Act of 1990, this account records, for the Development Credit Authority, the subsidy costs associated with direct loans obligated and loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program and legacy USAID credit programs. The subsidy amounts are estimated on a net present value basis; the administrative expenses are estimated on a cash basis.

In 2012, the U.S. Agency for International Development (USAID) will use the Development Credit Authority (DCA) transfer authority to support DCA projects in every region of the globe and every economic sector targeted by USAID. DCA augments grant assistance by mobilizing private capital in developing

countries for sustainable development projects. Credit assistance under DCA is principally intended for use where a development activity is financially viable, where borrowers are creditworthy, and where there is true risk sharing with private lenders.

In 2012, the request for \$50 million in DCA transfer authority will continue to support the flow of credit to microfinance institutions, small and medium enterprises, agribusinesses, and housing projects. In addition, USAID intends to scale guarantees, particularly for key Administration priorities such as food security, climate change, water, and health. The request for \$8.3 million in credit program administrative expenses will fund the total cost of development, implementation, and financial management of the DCA program, as well as the continued administration of USAID's legacy credit portfolios.

This account transfers funds to the operating expense account for the Peace Corps to finance upward adjustments of recorded obligations because of foreign currency fluctuations. Transfers are made as needed to meet disbursement requirements in excess of funds otherwise available for obligation adjustment. Net gains resulting from favorable exchange rates are returned to this appropriation and available for subsequent transfer when needed. The account is replenished through the utilization of a special transfer authority that allows the Peace Corps to withdraw unobligated balances from the operating expenses account from prior years as long as the authorized limit of \$5 million is not exceeded at the time of the transfer.

The Inter-American Foundation (IAF) funds grassroots development initiatives designed by the organized poor in Latin America and the Caribbean. The IAF has carried out its mandate by responding with grant support to the most creative ideas for

community self-help received from grassroots groups and non-governmental organizations. The IAF uses objective indicators to gauge the results of its grants in improving the quality of life in poor communities and disseminates the experiences to a broad audience that includes private and public sector donors, development professionals, academics, and other interested parties. In 2012, the IAF will seek to expand partnerships with other federal agencies and donors.

**Development Grants.**—Grants are awarded directly to non-governmental organizations in Latin America and the Caribbean to carry out community development projects. In 2012, the IAF plans to award approximately 75 new grants and to supplement with additional funds approximately 20 grants awarded in previous years.

**Leveraging of Resources.**—Beneficiary communities own the projects and contribute their own resources alongside IAF funds to carry them out. They are also encouraged to partner with local governments and the local private sector to sustain their efforts after the grant period. RedEAmerica, a network of the hemisphere's corporate foundations that have adopted the IAF's bottom-up approach, invests its funds in community self-help programs. RedEAmerica members that are parties to the IAF cooperative agreements match IAF funding two-to-one; the entire network raises contributions from a variety of sources. Additionally, U.S.-based migrant associations are joining the IAF to support grassroots development in their home communities. The IAF contributes to thought leadership in grassroots development by funding field research for a limited number of PhD candidates.

**Evaluations and Other Activities.**—Each year the progress of all IAF grantees is routinely assessed and a sample of completed projects undergoes comprehensive evaluation of the projects' impacts in the communities four to five years after IAF funding has ended. The IAF also produces and distributes regularly scheduled publications on its projects, on trends in development, and on other topics of interest to the development profession. The IAF contributes to the state of knowledge on grassroots development by funding field research for a limited number of PhD candidates.

**Program Management and Operation.**—The IAF also manages resources that cover salaries and benefits, travel, reimbursable service agreements with other U.S. government agencies, rent, service contracts, and other support costs.

## AFRICAN DEVELOPMENT FOUNDATION—Continued

The African Development Foundation (ADF), a public corporation, is an independent agency of the U.S. Government, established to support African-designed and African-driven initiatives to address grassroots economic and social problems, alleviate poverty, and promote sustainable development. ADF provides grants of up to \$250,000 directly to community groups, agricultural cooperatives, and small enterprises. These grants help organizations create tangible benefits such as increasing or sustaining the number of jobs in a community, improving income levels, and addressing social development needs. ADF also funds African NGOs in each country to provide technical assistance to improve project outcomes.

In 2012, ADF will provide grants to recipients in 21 African countries, directly to small farmer and agricultural cooperatives, other grassroots groups, and small, African-owned enterprises. These investments will be focused at the marginalized end of the economic and social spectrum to promote two strategic goals:

1) Advance community-based food security and sustainable development, and empowerment of the poor in Africa. ADF will promote smallholder agricultural development and micro and small enterprise to generate income and employment. ADF will increase participation of producer groups and African-owned small enterprises to promote economic development, including trade and investment.

2) Expand local capacity to promote and support grassroots development. ADF will build local community development Partner Organizations that provide technical assistance and support to grassroots groups. ADF will continue to leverage additional funding through strategic partnerships with national and local governments, and other donor entities. ADF will encourage African governments and other donors to increase utilization of grassroots development "practices."

ADF has the authority to accept contributions from any legitimate source, such as foreign governments, private businesses, non-governmental organizations, international donors, and other strategic partners committed to promoting grassroots-based economic growth and development in Africa. These funds are used in coordination with appropriated amounts to further expand the reach and impact of ADF's programs.

## INTERNATIONAL MONETARY PROGRAMS

In December 2010, the Governors of the International Monetary Fund (IMF) approved proposals for the Fourteenth General Review of Quotas, agreeing to take the necessary actions to double total IMF quotas and realign quota shares to better reflect the changing relative position of IMF member countries in the world economy. The agreement includes a rollback of the New Arrangements to Borrow (NAB), while maintaining the relative shares of members of the NAB. The technical terms of the rollback are being reviewed over the coming year. The Administration anticipates requesting legislation for the quota increase and the NAB rollback, perhaps as early as the 2013 Budget. Under the agreement, the U.S. quota in the IMF would roughly double, while the final details of the corresponding NAB rollback will be determined as part of the current review. Given the current uncertainty over the details and timing of the final package, the full cost impact

of the commitments, if any, would be difficult to estimate at this time. In order to avoid presupposing the outcome of the review, an estimate of the approved proposals is not being reflected herein.

The United States participates in the International Monetary Fund (IMF) through a quota subscription. The United States quota to the International Monetary Fund (IMF) is denominated in Special Drawing Rights (SDRs) and is presently SDR 37,149,300,000 (about \$57.2 billion as of December 30, 2010). Quotas are the metric used by the Fund to assign voting weights to determine contributions to the IMF's general resources and to determine access to IMF financing. This account reflects IMF quota resources appropriated prior to 2009.

With respect to this account, use by the IMF of the quota commitment does not result in net budget outlays because the United States receives an increase in its international monetary reserves corresponding to any transfer of dollars under the U.S. quota subscription. The United States can use these interest-bearing reserves to meet a balance-of-payments financing need.

For the 2009 appropriation for the U.S. quota to the IMF, see the account entitled "United States Quota IMF Direct Loan Program".

In April 2008, IMF members reached agreement on a quota reform package as a first step to modernize the IMF's governance structure to keep pace with the rapid growth and greater economic weight of dynamic emerging economies. The Supplemental Appropriations Act of 2009 (Public Law 111-32), enacted June 24, 2009, provides authorization and appropriations for an increase in the U.S. quota to the IMF by the dollar equivalent of SDR 4,973,100,000 (about \$7.7 billion as of December 30, 2010). This increase in the U.S. quota is not yet effective, and will not come into effect until other IMF member countries undertake certain actions with respect to the IMF.

While the U.S. quota to the IMF is not a credit program, the Supplemental Appropriations Act of 2009 (Public Law 111-32) specified that the 2009 appropriation to increase in the U.S. quota in the IMF is to be scored on a credit reform basis, per the Federal Credit Reform Act of 1990, with an additional adjustment to the discount rate for market risk. The application of FCRA by operation of law to the 2009 quota appropriation is a significant change in the budgetary treatment of the U.S. quota to the IMF and does not apply to appropriations for the U.S. quota to the IMF prior to 2009.

## UNITED STATES QUOTA IMF DIRECT LOAN PROGRAM ACCOUNT—Continued

As authorized by Public Law 111–32, and required by the Federal Credit Reform Act of 1990, as amended, this account records, for this program, the subsidy costs associated with the increase in the U.S. quota to the IMF, as reflected in the 2009 Supplemental Appropriations Act. The subsidy amounts are estimated on a present value basis using a market risk-adjusted discount rate, as required by the 2009 Act.

For additional information and the status of funds for the U.S. quota to the IMF prior to 2009, see the account entitled "United States Quota, International Monetary Fund".

As authorized by the Supplemental Appropriations Act of 2009 (Public Law 111–32), and required by the Federal Credit Reform Act of 1990, as amended, this non-budgetary account records all cash flows to and from the Government resulting from the increase in the U.S. quota in the IMF as reflected in the 2009 Supplemental Appropriations Act. The amounts in this account are a means of financing and do not affect the deficit and are not included in the budget totals.

The General Arrangements to Borrow (GAB) were established in 1962 by 10 industrial countries, including the United States, as a means of supplementing the IMF's resources when needed to forestall or cope with an impairment of the international monetary system. GAB members agreed in early 1983 to increase their financial commitments to the GAB from approximately SDR 6.3 billion to SDR 17 billion (about \$17.9 billion at that time), with the U.S. share rising from SDR 1.9 billion to approximately SDR 4.25 billion (about \$6.5 billion as of December 30, 2010).

In January 1997, the Executive Board of the IMF approved the creation of the New Arrangements to Borrow (NAB) to further supplement resources available to the IMF to forestall or cope with an impairment of the international monetary system or to deal with an exceptional situation that poses a threat to the stability of the system. The NAB became effective on November 17, 1998, and was activated in December 1998 to finance an IMF arrangement for Brazil. The IMF repaid the NAB in March 1999. In 2010, twenty-six countries and institutions participated in the NAB through a set of credit arrangements with the IMF totaling SDR 34 billion (about \$48 billion on the date of establishment), of which the U.S. share is approximately SDR 6.6 billion (about \$10 billion as of December 30, 2010). Although the GAB continues to exist, the sum of loans advanced under NAB and GAB cannot exceed SDR 34 billion. The sum of U.S. loans advanced under both arrangements cannot exceed the U.S. share of the NAB. Neither the NAB nor the GAB has been activated since 1999.

This account reflects GAB and NAB resources appropriated prior to 2009. With respect to this account, financing extended by the United States under GAB and NAB does not result in any net budget outlays because such financing results in an equivalent increase in U.S. international reserve assets in the form of a claim on the IMF.

For the 2009 appropriation for the U.S. participation in the NAB, see the account entitled "Loans to IMF Direct Loan Program".

At the G-20 Leaders' Summit in London in April 2009, the President secured agreement to increase the NAB by up to \$500 billion to restore global confidence and ensure the IMF has adequate resources to play its central role in resolving and preventing the spread of international economic and financial crises. As part of this agreement, the United States committed to increase its participation in the NAB by up to \$100 billion, which required congressional action. The Supplemental Appropriations Act of 2009 (Public Law 111-32) enacted on June 24, 2009, provides authorization and appropriations for an increase in the United States participation in the NAB by up to 75 billion SDRs. This SDR amount is subject, as a practical matter, to the public commitment to an increase by up to \$100 billion. This increase in the United States participation in the NAB is not yet effective, and will not come into effect until all IMF member countries

participating in the NAB undertake certain actions with respect to the IMF.

While U.S. participation in the NAB is not a credit program, Public Law 111-32 specified that the 2009 appropriation for the increase in the U.S. participation in the NAB is to be scored on a credit reform basis, per the Federal Credit Reform Act of 1990, with an additional adjustment to the discount rate for market risk. The application of FCRA by operation of law to the 2009 NAB appropriation is a significant change in the budgetary treatment of appropriations for the NAB and does not apply to appropriations for the U.S. participation in the NAB prior to 2009.

As authorized by the Supplemental Appropriations Act of 2009 (Public Law 111-32), and required by the Federal Credit Reform Act of 1990, as amended, this account records, for this program, the subsidy costs associated with increased participation by the U.S. in the NAB, as reflected in the 2009 Supplemental Appropriations Act. The subsidy amounts are estimated on a present value basis using a market risk-adjusted discount rate, as required by the 2009 Act.

For additional information on the NAB and the status of funds for the U.S. participation in the NAB prior to 2009, see the account entitled "Loans to International Monetary Fund".

The Special Defense Acquisition Fund will help to better support coalition and other U.S. partners participating in U.S. overseas contingency and other operations and expedite the procurement of defense articles for provision to foreign nations and international organizations. This legislation will re-activate an International Assistance Program account managed by the Department of Defense for advance purchases of defense articles. Advance purchases will focus initially on high-demand warfighter support equipment that has long procurement lead times. Long procurement lead times are often the main limiting factor in our ability to provide coalition partners with critical equipment to make them operationally effective. Improving the mechanism for supporting U.S. partners is a high priority for both the Departments of State and Defense.

In December 2004, a devastating tsunami and earthquake affected a number of countries in southeast Asia. The United States responded with a quick infusion of emergency assistance, followed by funding for rehabilitation and reconstruction. Assistance provided in the supplemental was designed for rebuilding communities and infrastructure, helping individuals return to their original livelihood, training individuals, particularly women, to develop new skills, and supporting host government-led reconstruction and early warning/disaster preparedness efforts. Funds were also used to reimburse other accounts obligated for relief and rehabilitation efforts in the immediate aftermath of the tsunami. The largest amounts of funding went to assistance for Indonesia and Sri Lanka, with smaller programs in India, Thailand, and the Maldives. Funds were also provided to support regional programs, such as development of an early warning and disaster preparedness system for the Indian Ocean, and to support prevention and preparations against avian influenza.

The Administration proposes to reclassify all surface transportation outlays as mandatory, consistent with the recommendations of the President's National Commission on Fiscal Responsibility and Reform, and to also move a number of current General Fund programs into the Transportation Trust Fund. This schedule reclassifies 2011 estimate and baseline budget authority and outlays as mandatory, for comparability purposes, and to calculate the spending increase above the baseline subject to PAYGO.

The National Infrastructure Investments account reflects activity under the TIGER program. TIGER awards grants as well as TIFIA credit assistance to projects that demonstrate their ability to contribute to the long-term economic competitiveness of the nation, improve the condition of existing transportation facilities and systems, increase energy efficiency, reduce greenhouse gas emissions, improve the safety of U.S. transportation facilities, and/or enhance the quality of living and working environments of communities through increased transportation choices and connections.

*Up-Front Investments.*—To spur job growth and allow States to initiate sound multi-year investments, the Budget includes a \$50 billion boost above current law spending for roads, railways and runways. Within the upfront total, the Budget requests \$2 billion in 2012 for a single round of competitive funding awards under the TIGER program.

The Administration proposes to reclassify all surface transportation outlays, including the up-front \$50 billion, as mandatory, consistent with the recommendations of the President's National Commission on Fiscal Responsibility and Reform, and to also move a number of current General Fund programs into the Transportation Trust Fund. The negative figures in this schedule are necessary to adjust the mandatory budget authority downward so that the Budget properly accounts for requested program

NATIONAL INFRASTRUCTURE INVESTMENTS—Continued  
growth in the new trust fund accounts and should not be misinterpreted as a reduction below \$2 billion for TIGER in 2012.

The Federal Aviation Reauthorization Act of 1996 (P.L. 104-264) authorized the collection of user fees for services provided by the FAA to aircraft that neither take off nor land in the United States, commonly known as overflight fees. The Act permanently appropriated the first \$50,000,000 of such fees for the Essential Air Service program and rural airport improvements. To the extent that fee collections fall below \$50,000,000 the law requires the difference to be covered by Federal Aviation Administration funds.

Through 1997, the Essential Air Service program was funded from the Airport and Airway Trust Fund. Starting in 1998, the FAA reauthorization funded it as a mandatory program supported by overflight fees under the Essential Air Service and Rural Airport Improvement Fund. In addition to mandatory funding supported by overflight fees, direct appropriations from the Airport and Airway Trust Fund to Payments to Air Carriers have been enacted every year beginning in 2002 to meet the needs of the essential air service program. For 2012, \$123,254,000 is requested from the Airport and Airway Trust Fund for Payments to Air Carriers. The Budget proposes to repeal the 15-passenger seat requirement under 49 U.S.C. 41732(b)(3) and to limit the program size, for the 48 contiguous States, to communities that are receiving subsidized Essential Air Service as of October 1, 2011.

The National Infrastructure Bank (NIB) establishes a new direction in Federal infrastructure investment that emphasizes demonstrable merit and analytical measures of performance. NIB investments will be issued in the form of grants, loans, or a blend of both and will target transportation and transportation-related projects that provide a significant economic benefit to the Nation or a region. In addition, the NIB will sponsor planning, feasibility, and analytical work including cost-benefit analysis of projects necessary to identify high-value investments around the country. The NIB will encourage the leveraging of Federal funds and collaboration among non-Federal stakeholders including States, municipalities, and private investors, and will also promote coordination with investments in other infrastructure sectors. The NIB is included as part of the Administrations six-year surface reauthorization proposal and would be financed from the Transportation Trust Fund (TTF).

For 2012, the Budget requests \$9,823 million for FAA operations. These funds will be used to continue to promote aviation safety and efficiency. The Budget provides funding for the Air Traffic Organization (ATO) which is responsible for managing the air traffic control system. As a performance-based organization, the ATO is designed to provide cost-effective, efficient, and, above all, safe air traffic services. The Budget also funds the Aviation Safety Organization (AVS) which ensures the safe operation of the airlines and certifies new aviation products. In addition, the request also funds regulation of the commercial space transportation industry, as well as FAA policy oversight and overall management functions.

The Federal Aviation Reauthorization Act of 1996 (P.L. 104-264) authorized the collection of user fees for air traffic control and related services provided by the FAA to aircraft that neither take off nor land in the United States, commonly known as overflight fees. The Budget estimates that \$54 million in overflight fees will be collected in 2012.

The fund provides direct support for the aviation insurance program (chapter 443 of title 49, U.S. Code). Income to the fund is derived from premium collections for premium insurance coverage issued, income from authorized investments, and filing fees for non-premium coverage issued. The non-premium program provides aviation insurance coverage for aircraft used in connection with certain Government contract operations by the Department of Defense.

The Homeland Security Act of 2002 (P.L. 107-296) added a provision requiring the Secretary to provide additional federal insurance coverage (hull loss or damage and passenger and crew liability) to air carriers insured for third-party war risk liability on November 25, 2002.

The FAA insurance policy covers: (i) hull losses at agreed value; (ii) death, injury, or property loss to passengers or crew, the

limit being the same as the air carrier's commercial coverage as of November 25, 2002; and (iii) third party liability.

Now that commercial underwriters are expressing a stronger interest in writing a small but limited amount of war risk, the Budget proposes to establish a \$150 million deductible for hull and liability exposures in all FAA war risk policies. The Administration's goal is to incentivize the commercial marketplace to underwrite most but not all aviation war risks.

In 1997, the Federal Aviation Administration established a franchise fund to finance operations where the costs for goods and services provided are charged to the users on a reimbursable basis. The fund improves organized organizational efficiency and provides better support to FAA's internal and external customers. The activities included in this franchise fund are: training, accounting, payroll, travel, duplicating services, multi-media services, information technology, materiel management (logistics), and aircraft maintenance.

The Budget proposes to lower funding for the ongoing airport grants program to \$2.4 billion, a reduction of \$1.1 billion, by eliminating guaranteed funding for large and medium hub airports. The Budget proposal is consistent with the recommendation of the President's National Commission on Fiscal Responsibility and Reform to eliminate grants to large and medium hub airports. To assist those airports that need the most help, the Administration proposes to focus Federal grants to support smaller commercial and general aviation airports that do not have access to additional revenue or other outside sources of capital. The Budget also proposes to allow large and medium hub airports to increase the non-Federal Passenger Facility Charge thereby, giving large and medium hub airports greater flexibility to generate their own revenue. Eligible airports in all size categories will be able to compete for an additional \$3.1 billion in one-time funding that will be made available under the President's infrastructure proposal targeted at investments in roads, railways, and runways.

Funding in this account provides for the deployment of communications, navigation, surveillance, and related capabilities within the National Airspace System (NAS). This includes funding for several activities of the Next Generation Air Transportation System, a joint effort between DOT, NASA, and the Departments of Defense, Homeland Security and Commerce to improve the safety, capacity, security, and environmental performance of the NAS. As the organization primarily responsible for air traffic infrastructure, the Air Traffic Organization receives and manages 95 percent of the funding in this account. The funding request for 2012 supports FAA's comprehensive plan for modernizing, maintaining, and improving air traffic control and airway facilities services.

### FEDERAL HIGHWAY ADMINISTRATION

The authorization for Federal surface transportation programs, SAFETEA-LU, ended on September 30, 2009. To continue highway, transit, and highway safety programs, Congress has extended the SAFETEA-LU authorities on a short-term basis, most recently through March 4, 2011. The Federal Highway Administration's (FHWA) 2012 Budget request represents a new paradigm in funding our nation's highways. Built on past successes, the new structure strives to enhance the safety, livability, condition, and efficiency of our nation's highway system. The proposed 2012 FHWA Budget will provide the resources necessary for State, local and other Federal transportation agencies to improve the condition and performance of their highway and roadway system, in ways that protect the environment, provide user access and choices, and take advantage of advances in technology and innovation.

In summary, the 2012 Budget consists of \$70,414 million in new budget authority and \$51,552 million in outlays. To spur job growth and allow States to initiate sound multi-year investments, the Budget includes a \$50 billion boost above current law spending for roads, railways and runways. Within amounts requested for FHWA, \$25 billion is to be apportioned to the States for critical highway infrastructure on enhanced National Highway System, \$2.2 billion to support significant improvements at land ports of entry facilities which link directly to the transportation infrastructure at border crossing locations, and \$450 million to address the growing demand for TIFIA credit assistance.

The following table reflects the total funding for all Federal Highway Administration programs.

Enacted on February 17, 2009, the American Recovery and Reinvestment Act of 2009 (Recovery Act) provided \$27.5 billion from the General Fund to the Federal Highway Administration (FHWA), of which \$26.6 billion was apportioned to States based on formulas described in the Act and \$0.9 billion was allocated to programs identified in the Act, including the Indian Reservation Roads Program, Park Roads and Parkway Program, Forest Highway Program, Refuge Roads Program, Disadvantaged Business Enterprise Bonding Assistance, Territorial Highway Program, Puerto Rico Highway Program, and the Ferry Boat Discretionary Program. Administrative oversight funds are available through September 30, 2012 and all other funds were available through September 30, 2010. No additional funding was received for 2011 and no funds are requested for 2012.

The FHWA Recovery Act funds have been used to invest in transportation, environmental protection, and other infrastructure that will provide longer term economic benefits to the Nation. The Recovery Act funds augmented existing investments, authorized by SAFETEA-LU, enabled States, regional and local governments to accelerate to completion a number of highway infrastructure projects planned or underway. Since the Recovery Act was enacted in February 2009, more than 40,000 miles of pavement across the United States have been improved. Of the 12,900 highway projects for which Recovery Act funds were obligated for, more than 5,900 projects are under construction and more than 6,300 projects have been completed.

The Federal-Aid Highway Act of 1968 authorized the establishment of a right-of-way revolving fund. This fund was used to make cash advances to States for the purpose of purchasing right-of-way parcels in advance of highway construction and thereby preventing the inflation of land prices from significantly increasing construction costs.

This program was terminated by TEA-21 but will continue to be shown for reporting purposes as loan balances remain outstanding. The purchase of right-of-way is an eligible expense of the Federal-aid program.

The Highway Revenue Act of 1956, as amended, provides for the transfer from the General Fund to the Highway Trust Fund of revenue from the motor fuel tax and certain other taxes paid by highway users. The Secretary of the Treasury estimates the amounts to be transferred. In turn, appropriations are authorized from this fund to meet expenditures for Federal-aid highways and other programs as specified by law. The Administration proposes, as part of a multi-year surface transportation reauthorization, to rename the Highway Trust Fund as the Transportation Trust Fund, and create two new additional accounts for rail and the National Infrastructure Bank.

The following Status of Funds table presents the status of the proposed Transportation Trust Fund.

**Cash balances.**—The Status of Funds table begins with the unexpended balance on a "cash basis" at the start of the year. The table shows the amount of cash invested in Federal securities at par value and the amount of cash on hand, i.e., uninvested balance. Next, the table provides the amounts of cash income and cash outlays during each year to show the cash balance at the end of each year.

**Revenues.**—The Budget presentation includes new (or increased) revenues sufficient to ensure solvency of the Transportation Trust Fund through 2021. As a matter of policy, the Administration believes the proceeds from existing Highway Trust Fund excise taxes should continue to be dedicated solely to the Highway and Mass Transit accounts, and no existing revenue would be diverted to the new accounts for rail and the National Infrastructure Bank. The additional revenue displayed below would be sufficient to maintain the solvency of the Transportation Trust Fund, but are not associated with any specific policy proposal. Rather, the Ad-

TRANSPORTATION TRUST FUND—Continued

ministration intends to work with Congress to authorize sufficient revenue for the Transportation Trust Fund.

The Federal-Aid Highways program is designed to aid in the development, operations and management of an intermodal transportation system that is economically efficient, environmentally sound, provides the foundation for the Nation to compete in the global economy, and moves people and goods safely. Typically, all programs included within FAH are financed from the Highway Account of the Transportation Trust Fund, and most are distributed via apportionments and allocations to States. Liquidating cash appropriations are subsequently requested to fund outlays resulting from obligations incurred under contract authority.

The authorization for Federal surface transportation programs, SAFETEA-LU, ended on September 30, 2009. To continue highway programs, Congress has extended the SAFETEA-LU authorities on a short-term basis, most recently through March 4, 2011.

The Federal Highway Administration's (FHWA) 2012 Budget request represents a new paradigm in funding our nation's highways. Built on past successes, the new structure strives to enhance the safety, livability, condition, and efficiency of our nation's highway system. The new construct consists of six core programs: Safety Program; National Highway Program; Livable Communities Program; Research, Technology and Education Program; Federal Allocation Program; and, the Transportation Leadership Awards.

**Safety Program.**—The revamped, performance-based Highway Safety Improvement Program (\$2.5 billion) doubles the Federal investment in highway safety programs to reduce fatalities and injuries on public roads in alignment with Department's Roadway Safety Plan. This program will provide \$2.2 billion for infrastructure oriented safety improvement projects, with the flexibility to use up to 25 percent of funds for education, enforcement and emergency medical services investments if needed to address specific safety problems in the State. The program also features funding for rural road safety, as well as a new \$293 million Highway Safety Data Improvement Program designed to focus on improved State data collection, use of data to identify problems, and use of analytical tools and processes to identify and prioritize safety treatments. The Administration proposes \$17 billion for the Safety Program over the six-year reauthorization period.

**National Highway Program.**—The new performance-based National Highway Program (\$32.4 billion) targets investment to maintain a state of good repair on roads critical to national interests while also providing flexibility to the States for making transportation investments on the larger system of Federal-aid eligible highways. The proposal streamlines and consolidates portions of several existing programs including Interstate Maintenance, National Highway System, Highway Bridge, and the Surface Transportation Program. The National Highway Program includes two new subprograms: (1) a \$16.75 billion Highway Infrastructure Performance Program that is designed to improve infrastructure condition and performance on an en-

hanced National Highway System, a 220,000-mile network that carries 55 percent of all traffic and 97 percent of all truck-borne freight; and (2) a \$15.6 billion Flexible Investment Program that provides flexibility to the States to invest in infrastructure preservation, congestion mitigation, or performance improvement projects on any Federal-aid eligible highway. Further, as an incentive to make performance-based investment decisions, States that successfully set and meet condition and performance targets on the enhanced National Highway System for three consecutive years are afforded broader eligibility for where they can invest their funds. The Administration proposes \$257 billion for the National Highway Program over the six-year reauthorization period.

**Livable Communities.**—The new Livable Communities Program (\$4.1 billion) establishes place-based planning, policies, and investments to help communities increase transportation choices and access to transportation services. This program will fund transportation projects that improve quality of life in both rural and urban areas, provide users with enhanced transportation choices, and improve air quality in large metropolitan areas. The program includes a new \$3.4 billion formula-based program to enable recipients to deliver transportation projects for rural and urban areas that benefit quality of life, a new \$500 million competitive grant program to promote innovative, multi-modal, and multi-jurisdictional highway projects that promise significant environmental and economic benefits to an entire metropolitan area, a region, or the nation, and a \$200 million discretionary grants program to support metropolitan transportation planning capacity building across the country. The Administration proposes \$28 billion for the Livable Communities program over the six-year reauthorization period.

**Federal Allocation Program.**—The new Federal Allocation Program (\$1.4 billion) consolidates several existing programs with inherently Federal responsibilities into one program with four components: (1) improving roads both within and directly connecting to Federal lands, such as National parks, forests, and wildlife refuges; (2) improving roads within and accessing Tribal lands; (3) providing funding to the States to recover from natural disasters and other emergencies; and (4) supporting the development of the future transportation workforce. The Administration proposes \$10 billion for the Federal Allocation Program over the six-year reauthorization period.

**Research Program.**—The Research, Technology, and Education Program (\$641 million) provides for a comprehensive, nationally-coordinated research, technology, and education program that will advance DOT organizational goals, while accelerating innovation delivery and technology implementation. The proposal restructures existing FHWA research, development and technology activities into three programs: a highway research and development program, a technology and innovation deployment program, and a training and education activities program. The Research Program also supports activities in the areas of safety, infrastructure preservation, operations, environmental sustainability, livability, and policy. The Administration proposes \$4 billion for the Research Program over the six-year reauthorization period.

**Transportation Leadership Awards.**—This \$1.3 billion competitive grant program will assist State departments of transportation, metropolitan planning organizations, Tribal governments and other transportation agencies to make critical reforms necessary to institutionalize best practices and innovations in transportation policy. The program will use competitive funding awards as incentives for State and local partners to reform the way transportation investments and decisions are made, to integrate performance management into budget and project selection pro-

cesses, and to make other reforms proven to deliver better outcomes on national strategic priorities. The Administration proposes \$17 billion for the Transportation Leadership Awards over the six-year reauthorization period.

**Surface Transportation Revenue Alternatives Office.**—The Budget includes \$20 million to establish a Surface Transportation Revenue Alternatives Office to research, analyze, and field test the feasibility of various innovations in user-fee collection, including mileage-based user fee systems, that provide a stronger connection between fees paid by travelers and the impact of their travel on transportation conditions and performance.

**Up-Front Investments.**—To spur job growth and allow States to initiate sound multi-year investments, the Budget includes a \$50 billion boost above current law spending for roads, railways and runways. In addition to the six core FHWA programs, the 2012 Budget request includes \$25 billion to be apportioned to the States for critical highway infrastructure on an enhanced National Highway System, \$2.2 billion to support significant improvements at land ports of entry facilities which link directly to the transportation infrastructure at border crossing locations, and \$450 million to address the growing demand for TIFIA credit assistance.

<b>Memorandum (non-add) entries:</b>			
5061 Limitation on obligations (Transportation Trust Funds) .....		-41,107	

The Administration proposes to reclassify all surface transportation outlays as mandatory, consistent with the recommendations of the President's National Commission on Fiscal Responsibility and Reform. This schedule reclassifies discretionary outlays from obligation limitations as mandatory outlays from mandatory contract authority for the 2011 estimate. This schedule also creates a new baseline of contract authority that is equal to the previous discretionary obligation limitation baseline, to calculate the spending increase above the baseline subject to PAYGO.
