## DEAR SHAREHOLDERS

Two thousand and seven was an extremely challenging year for financial institutions and it proved to be one of the most difficult in CIT's 100-year history. Our performance was adversely affected by the downturn in the housing market, the legislative changes surrounding education lending and the tightening of the capital markets. Despite these setbacks, which resulted in a net loss of \$111.0 million for our company and a 57% decline in our share price, we are a resilient company focused on building value for our shareholders, our customers and our employees. We have demonstrated this resiliency time and again over the past century, as we navigated successfully through more than 19 business cycles since our founding in 1908.

In 2007, we made strategic moves to respond to these issues. We decided to exit home lending and took approximately \$1.5 billion in valuation allowances and loss provisions. We modified our student lending business model in response to legislative and competitive changes, and wrote off \$312.7 million of goodwill and general intangibles related to that business. And we adjusted our funding and asset origination strategies as a result of the sharp pullback of liquidity and repricing of risk in the capital markets.

I, along with our Board of Directors, was extremely disappointed in our 2007 financial results. While dissatisfied with our performance, I am confident that the fundamental strength of our commercial franchise, which is recognized as a leading global provider of financing to the middle market, as well as the commitment and dedication of our employees, will drive our future success. Our senior management team continues to focus on mitigating the issues we faced in 2007, and I am confident that we will overcome these challenges. We continue to implement the long-term strategies that have built our franchise over the past several years, and we were successful in achieving many of the goals and objectives we set for ourselves earlier in the year.

We are a market leader in each of our core commercial franchises. Our Corporate Finance, Transportation Finance, Trade Finance and Vendor Finance business segments are all serving customers and generating profits at double-digit returns on equity. And while their performance was overshadowed by our consumer business-related charges this past year, they continue to expand client relationships and build market share.

In 2007, we grew our global vendor financing franchise through the acquisition of Citigroup's U.S. Business Technology Finance unit and expanded our global vendor financing relationship with Microsoft. In an effort to increase our advisory capabilities, we acquired Edgeview Partners, a highly-regarded middle market mergers and acquisitions firm. This transaction has already resulted in increased fee generation, and we expect continued traction on this front throughout 2008. We also successfully completed the strategic sales of our construction finance business and our U.S. systems leasing portfolio, which freed valuable capital. In addition, we sold our 30% interest in our U.S.-based Dell Financial Services joint venture, the gain from which largely offset the write-off of goodwill and intangibles in our student lending business.

We maintained a diverse portfolio of more than \$80 billion in managed assets—of which approximately 75% are commercial exposures, spread among many industries and geographies. This past year we launched a broader asset management strategy whose objectives were three-fold: to more efficiently use our capital; to provide ongoing third-party sources of capital; and to generate fee income. Under this strategy, we successfully launched our first Collateralized Loan Obligation (CLO) and completed the initial public offering of Care Investment Trust (NYSE: CRE), a healthcare REIT managed by CIT Healthcare. Our efforts on this front continue to build momentum; in early 2008, we created our first junior capital fund, which is expected to approach \$1 billion in total funding by the end of 2009.

**Jeffrey M. Peek**  
Chairman & CEO

Our determination to grow our global footprint continued to deliver results. During 2007, we achieved our goal of having 25% of our assets outside the U.S. by year-end. In fact, approximately one-third of our commercial exposure is now non-U.S. We expanded our regional service center in Dublin and opened new service centers in Shanghai and Singapore to meet the demands of our expanding international customer base. These offices offer a global value proposition to our regional clients and reflect our commitment to deploying our expertise in middle market finance around the world.

Credit and proactive risk management remains a fundamental part of the success of our business model. Our long-standing commitment to maintaining a strong balance sheet and solid capital levels has proven particularly important in navigating the recent capital markets by giving us flexibility. We actively adjusted our funding model by shifting from a mix of secured and unsecured debt to principally secured debt, in order to take advantage of the more attractive cost of funds available to us through asset-backed financings.

We expect that many of the market challenges we faced in 2007, including a softening U.S. economy and constrained capital markets, will continue into 2008. Despite these factors, I remain confident in our fundamental business model. We have built CIT to perform through all business cycles, and I believe our actions to enter non-cyclical industries, expand globally, and diversify revenue sources have better positioned us for the future.

We began our centennial year on February 11, 2008, which offers us an opportunity to reflect on what has made CIT so resilient and successful for the past 100 years and how we can position ourselves for the next 100.

This year, we will continue to take a two-pronged approach to driving value: enhancing the success of our commercial franchises, while managing our consumer business to further mitigate risk. Key to our success in 2008 and beyond will be our ability to navigate the rapidly changing economic environment. We will further diversify our funding sources to maintain adequate liquidity and minimize our cost of funds.

We will deploy resources and capital selectively to our most profitable commercial franchises. We will increase operational efficiencies, with a goal of eliminating approximately \$100 million of annualized costs and we will leverage our diverse revenue generation capabilities. I believe these actions will further solidify CIT's competitive market position.

Enduring customer relationships have been paramount to our success these past 100 years. These relationships will remain crucial to our future success, and we will focus on deepening and broadening them as we deliver capital, as well as ideas, that drive business success.

I am very proud of the flexibility and commitment displayed by our employees this past year. We have asked them to shoulder a heavier burden as we move forward with a leaner, more focused organization, and they have responded with ingenuity and enthusiasm. Their performance, dedication and hard work are reflected in the strength of the CIT culture and the growing recognition of our global brand. I am confident that our actions during a very challenging 2007 will position us to deliver long-term value for our investors and further strengthen the relationships we have with our clients. As we look toward the next 100 years, I want to thank all our stakeholders, clients and employees for their continued confidence and support.

**Jeffrey M. Peek**  
*Chairman and CEO*

100 YEARS OF SUCCESS...  
REDEFINING THE FUTURE

## 100 YEARS OF INNOVATION TO BUILD ON

Since our founding in 1908, CIT has been a financing innovator to companies and individuals seeking capital. As far back as 1915, we paved new ground by partnering with Studebaker to pioneer the auto financing business. This tradition of working with trailblazing companies continues today. For example, we recently supported the expansion of one of the fastest growing sports in the U.S. by financing the acquisition of the Professional Bull Riders Association. We also partnered with two innovative companies in the film industry to bring their unique visions to the screen. For the first, an independent production company, we provided financing on a picture-by-picture basis. This approach offered the company significant financial flexibility and led to a major corporate syndication deal. For the second, a global media company, we provided financing to establish a new studio with in-house production and distribution capabilities. In both instances, out-of-the-box thinking created cutting-edge solutions for an industry that thrives on ingenuity.

Even in our longest-standing businesses, CIT continues to develop new financial solutions to meet the needs of clients. We helped to bring about the emergence of a market that is revolutionizing business travel: fractional ownership of business jets. We structured an innovative supply chain factoring and financing model for Lifestyle Enterprise, a company that manufactures furniture in Asia and exports it to the U.S. To enable Lifestyle to move goods directly from the ship to the showroom, our model accelerates funding by monitoring goods while they are still in transit.

# STA T

## 100 YEARS OF VALUES TO BUILD ON

CIT's success has always depended on the talent and dedication of our employees. Our core values—integrity, respect and resilience—infuse everything we do, whether working collaboratively with colleagues, meeting the financing needs of our customers or volunteering in the communities in which we live and work. From our Chairman's Forum, which offers senior management the opportunity to share strategic leadership perspectives, to our analyst program, which provides recent college graduates with hands-on opportunities to learn and contribute as they build their careers, CIT is committed to investing in the asset most critical to building our future: our people.

Supporting our communities is important to everyone at CIT. Globally, we partner with a range of civic and cultural organizations that address critical non-profit needs and encourage employee volunteerism. Our partnerships with the National Ballet of Canada, the New York City Ballet, the New York City Opera, and the New Museum of Contemporary Art in Manhattan offer thousands of people free access or discounted ticket programs, allowing these institutions to expand and build their audiences by removing cost barriers. In addition, our regional support for the Salvation Army Food Bank and education programs through Junior Achievement has created lasting results for the communities and individuals served by these programs.

To commemorate our Centennial, CIT has empowered employees worldwide to donate funds and time to support organizations in their local communities. CIT employees will also be planting trees as part of the New York City MillionTrees initiative, which is intended to improve quality of life and reduce the effects of asthma in areas of the city afflicted with low canopy cover.

# 02.

## 100 YEARS OF RELATIONSHIPS TO BUILD ON

We opened our doors with 22 customers. Today we have over 1 million customers in 50 countries. Many of our business relationships have lasted for decades. CIT continues to value long-term relationships, working to understand our clients' distinctive business models and their unique potential. This ability to spot potential enabled CIT to help Christian Casey, a fashion leader representing such high-profile lines as Sean Jean, to move forward with a new, more efficient financing structure. Because of our long-standing relationship with key members of the Christian Casey management team, as well as with its equity partner, we were confident in the company's people as well as its products. We provided a complete financing package that enabled Christian Casey to consolidate its obligations with one lender.

Spotting a company's unique potential leads to relationships that grow and become stronger. When the founders of Primrose Schools approached CIT more than a decade ago seeking growth financing, we saw more than the numbers on their balance sheet; we saw the potential in their early childhood national franchise business. The company has since revolutionized early childhood education by combining its proprietary learning methodology with a franchise model. Our customized vendor program has enabled them to open more than 180 preschools across America. This type of close, supportive client relationship has been central to our success for a century.

# 03.

A person in a dark suit and light blue shirt is holding a large, silver-framed photograph. The photograph shows a vintage Dunkin' Donuts store with a large sign on the roof. Several cars from the mid-20th century are parked in front of the store. The background of the entire page is a solid dark red color.

## 100 YEARS OF SERVICE TO BUILD ON

CIT has always understood that companies need more than capital to succeed. Service excellence and a commitment to working with our clients through all business cycles has been integral to our success. Increasingly, providing superb service has meant a commitment to being closer to our customers no matter where they do business. This year we opened two new offices in Asia, a global vendor servicing center in Shanghai and an aerospace office in Singapore, further deepening our relationships in that region. These offices reflect our commitment to deploying our expertise around the world.

Service has been the foundation on which CIT has built a 50+ year partnership with Dunkin' Donuts. Over the years we have provided more than \$2 billion in financing to its franchisees, allowing Dunkin' Donuts to become one of the leading purveyors of coffee and donuts in the U.S., with an expanded footprint in previously underserved areas. By providing outstanding service and simplifying the often complex franchise finance process, CIT has built long-standing relationships with Dunkin' Donuts franchisees, helping them to achieve their entrepreneurial dreams.

# 04.

## 100 YEARS OF EXPERTISE TO BUILD ON

Providing ideas and insights, in addition to capital, has been an enduring hallmark of CIT. Our ability to offer advisory services to complement our diverse product line was further strengthened by our acquisition of Edgeview Partners, a middle market mergers and acquisitions firm. In the first six months, Edgeview closed six transactions totaling approximately \$630 million in enterprise value while assisting clients in selling their businesses and acquiring new ones.

With a brand that's recognized as a leader in middle market M&A, Edgeview has strengthened our competitive position in this traditionally underserved segment of the U.S. economy. To better understand and support this \$6 trillion market, we conducted a comprehensive survey in 2007. This resulted in the release of our inaugural *U.S. Middle Market Outlook*, which provides an in-depth understanding of where the middle market is headed and highlights critical challenges and opportunities.

In addition to our deep understanding of the middle market, our industry expertise, combined with our specialized advisory service businesses, allows us to bring more than just capital to the table. In fact, it is this deep expertise that continues to differentiate CIT as we advise our clients on how best to navigate through the ever-changing business environment.

05

CIT 100 YEARS

# A NEW VENTURE

CIT was born in 1908 when Henry Ittleson found a new way to make financing available to businesses in St. Louis, Missouri. Soon, CIT was forging paths across the country, into Canada and overseas.

## A SURE START

Even as Henry Ittleson signed the incorporation papers for his new company, the nation was in the middle of a banking crisis, the Panic of 1907. Nervous customers' withdrawals forced many banks out of business. Despite the turbulence, Ittleson realized that businesses would require credit through times of sickness and health. Within three months of its founding, CIT listed 22 clients, including the young Monsanto chemical company.

## NOW TO NEW YORK

In 1915, CIT moved east to New York City. The following year, CIT teamed with the Studebaker automobile company to provide first-of-its-kind financing to car buyers. During World War I, CIT financed the manufacture of 150 electronic "U-boat chasers." With an eye toward the post-war economy, the company also arranged with Thomas Edison, Inc., for consumers to purchase radios on an installment plan.

## THE ROARING TWENTIES

As the economy surged during the "Roaring 20s," CIT arranged financing for several other car makers, including Nash, Packard and Chrysler. In 1924, CIT became the first company of its kind to be listed on the New York Stock Exchange. The following year, volume exceeded \$148 million.

**1908** CIT's birthplace — the Security Bank Building in St. Louis.

**1908** Henry Ittleson, CIT's founder and chief executive for 40 years.

**1915** CIT's first New York City office — the Adams Building at 61 Broadway.

**1916** CIT offered "banking facilities for the deferred payment selling" of cars.

**1924** CIT became the first company of its kind to be listed on the NYSE.

## CIT AND THE WORLD

- 1908** The Wright brothers sign their first contract for the delivery of a plane
- 1911** Air conditioning is invented
- 1913** The Federal Reserve System is created

- 1914** The Panama Canal is officially opened
- 1916** Ford's Model T sells for \$360 — half a million roll off the lines
- 1919** The nation's first municipal airport opens in Tucson, Arizona

# STANDING FIRM

Through the Great Depression and World War II, at a time when reservations about installment buying ran deep, CIT maintained an unshakable belief in the soundness of American institutions and the good judgment of its customers.

## STANDING UP FOR CONSUMERS

Faith in the American consumer helped CIT weather the Great Depression. Just a few months after the stock market "Crash of '29," CIT announced record earnings and opened new offices in Europe. During the next few years the company provided financing for the Detroit Aircraft Company and acquired William Iselin & Company, Inc., to become the nation's largest factoring business.

**1926** The home office Accounting Department hard at work.

**1930s** CIT financed the leasing of RCA Photophone units.

## THROUGH THE HARD TIMES

CIT remained remarkably sound throughout the 1930s, and in 1933 lent its financing expertise to a federal commission that established the Federal Housing Administration. CIT acquired Universal Credit Corporation, Ford Motor's financing wing; launched a new subsidiary, Equipment Acceptance Corporation, to provide financing for machinery and equipment manufacturers; and established the CIT Safety Foundation to promote safe driving.

**1930** CIT operated 122 branch offices in three major divisions.

**1930** CIT entered the airplane manufacturing finance business.

## ON TO VICTORY

During World War II, CIT offered a month's bonus pay, life insurance and a guaranteed job on return to its 2,000 employees who served in the armed forces. CIT also acquired two manufacturing companies in the early war years, Micro Switch Corporation and Holtzer-Cabot Electric Company. Both earned awards from the military for outstanding productivity.

**1933** CIT helped to establish the Federal Housing Administration.

## CIT AND THE WORLD

- 1929** The Great Crash
- 1930** First U.S. supermarket, King Kullen, opens
- 1935** First DC-3 flight
- 1936** Hoover Dam completed

- 1939** First commercial television broadcast
- 1939** Bill Hewlett and Dave Packard set up shop in a Palo Alto garage

# POSTWAR PROSPERITY

When America turned its energies to postwar production, the country demonstrated the confidence of victory as well as an awesome capacity for growth and widely shared prosperity. CIT helped provide the capital to fuel this unprecedented expansion of the national economy.

## AT PEACE AND AT WORK

With much of the world devastated by war, the United States entered an era of unparalleled ascendancy. The progress of CIT through the era tracked the nation's upward trajectory: in just three years, from 1947 to 1950, the company's net income rose from \$7.3 million to \$30.8 million. In 1953, the company started a new subsidiary, Patriot Life Insurance Company, opened a consumer finance office in Hawaii and established its first employee health plan. As a supplier of financing for autos and for construction equipment, CIT helped put Americans into new automobiles and onto safer, more efficient roads.

## A NEW HOME

In 1957, CIT moved into a new building at 650 Madison Avenue. The following year, its 50th anniversary, CIT purchased a manufacturing company, Picker X-ray, and Bank of North America, which established a personal loan portfolio. In 1964, diversification continued with the purchase of Gibson Greeting Cards, the nation's third largest card company. CIT also combined several factoring units into a new subsidiary, Meinhard-Commercial.

## CONFIDENT AND PROSPERING

CIT added Meadow Brook Bank in 1965 and acquired another manufacturing business, All-Steel Equipment, Inc., a maker of office furniture. At the end of the year, CIT passed a major milestone, having recorded \$100 billion in financing volume since its founding in 1908. Half of that volume had been generated in the 10 years since 1955.

**1939** Arthur O. Dietz became CIT President. He served for 24 years.

**1947** CIT representatives get acquainted with a new, Ford tractor in Columbus, Ohio.

**1956** CIT's Universal C.I.T. Credit office in East St. Louis.

**1954** CIT was instrumental in bringing about the National Highway Act of 1954.

**1957** CIT opened for business at 650 Madison Avenue on October 28, 1957.

**1964** CIT purchased Gibson Greeting Cards, the nation's third largest card company.

## CIT AND THE WORLD

**1946** Baby boom begins

**1947** Levittown opens

**1947** Three Bell Labs scientists invent the transistor

**1955** Disneyland opens

**1958** First credit card introduced

**1962** First Wal-Mart opens

# ADAPTING TO CHANGE

By the late 1960s the postwar boom was ebbing: drift and doubt began to creep back into the economy. Through the 1970s CIT redefined its business lines in a successful effort to stay ahead of landmark changes in politics, culture and the economy.

## NEW NEEDS, NEW DIRECTIONS

In 1969, CIT withdrew from auto financing, once a pioneering business, and turned instead to personal and home equity loans and equipment leasing. To pursue those aims, CIT acquired two more banks in 1970, while maintaining its commitment to social change by offering loans for minority-owned small businesses, as well as a \$5.6 million loan for a low-income housing project in Georgia.

**1972** A name change for CIT's Financial Services unit required 744 U.S. offices to install new signs.

**1979** Subsidiary, Picker X-ray Corp. produced the fastest CT scanner.

## STALL AND RECOVERY

In 1971, CIT reported record-high earnings for the twentieth consecutive year. But in 1972, profits declined, reflecting "stagflation" in the national economy. A subsequent oil embargo by OPEC escalated energy and raw materials costs, but by 1977 vigorous consumer spending, assisted in part by more than 1,000 CIT consumer finance offices, had fueled a recovery. In 1979, new banking rules prompted CIT to sell National Bank of North America.

**1979** Pope John Paul II used CIT-financed mobile homes and flat bed trucks during a portion of his U.S. visit.

## NEW RULES, NEW ERA

In 1980, RCA Corporation acquired CIT and sold its four manufacturing businesses – Picker, Gibson, All-Steel and RACO. Despite these changes, net earnings of \$177.4 million were the highest in CIT history. In 1983, the company's 75th anniversary year, CIT moved to new, campus-like quarters in Livingston, NJ. The next year, RCA sold CIT to Manufacturers Hanover Trust Corporation.

**1983** Artist's drawing of CIT's new quarters on 31 acres in Livingston, NJ.

**1984** Manufacturers Hanover acquired CIT from RCA for \$1.51 billion.

## CIT AND THE WORLD

**1971** Intel invents the single-chip microprocessor

**1973** OPEC oil shock

**1973** Federal Express begins operations

**1973** Dr. Martin Cooper of Motorola makes the first call on a portable cell phone

**1975** *Jaws* ushers in blockbuster era in Hollywood

**1981** Microsoft tapped to provide IBM operating system

**1984** AT&T dismantled

# A NEW ECONOMY

The 1980s brought a new era of business innovation, while the 1990s brought sweeping technological change. With unprecedented productivity came opportunities to prosper and build. CIT was there to help businesses and consumers make the most of them.

## DOING MORE WITH LESS

After transferring its \$1.35 billion consumer loan portfolio to Manufacturers Hanover Trust Corporation (MHC) in 1986, CIT focused exclusively on business clients. That year, the company's diversified operations helped it weather a collapse in energy-related sectors of the economy.

## AROUND THE WORLD

In 1991, the acquisition of Fidelcor Business Credit Corporation greatly increased the small business service capabilities of CIT. In the new century, CIT survived a brief ill-fated acquisition by Tyco International and became 100 percent publicly owned in 2002. In 2004, the purchase of CitiCapital's vendor financing business in Germany, UK, France and Spain was the company's first European acquisition. Subsequent acquisitions of the UK and German vendor financing businesses from Barclay's greatly increased international capabilities, as did the purchase of two Chinese equipment leasing companies.

## POWER OF IMAGINATION

In 2006, CEO Jeffrey M. Peek and NYC Mayor Michael R. Bloomberg officially opened The CIT Building, a new, 28-story, glass-encased tower building at 505 Fifth Avenue. The company's emphasis on such assets as talent, creativity and service capability to 1 million clients across 30 industries in 50 countries gave further evidence of the company's highly tuned resonance with the new economy.

**1996** CIT invested in Magic Cinemas and is now financing 15 films by Dark Castle Entertainment.

**1999** CIT helped the state of NJ finance the state's new E-ZPass toll technology.

**2004** As CIT's CEO for 17 years, Albert R. Gamper, Jr. guided the company into a new era of global competition and community service.

**2006** CIT opened its global headquarters, a 28-story, glass-encased tower building at 505 Fifth Avenue in NYC.

**2004** Jeffrey M. Peek was elected as CIT's President and Chief Executive Officer.

## CIT AND THE WORLD

- 1989** Berlin Wall falls, heralding the triumph of market capitalism
- 1994** Netscape goes public, launching a technology IPO boom
- 2004** Google goes public

## OVERVIEW

## BUSINESS DESCRIPTION

Founded a hundred years ago on February 11, 1908, CIT Group Inc., a Delaware corporation ("we," "CIT" or the "Company"), is a leading commercial finance company providing financing and leasing products and services to clients in a wide variety of industries around the globe.

Diversification is a hallmark of CIT, with a broad range of financial services businesses serving customers in over 30 industries and 50 countries. The majority of our business focuses on commercial clients with a particular focus on middle-market companies. We serve a wide variety of industries. Our largest industries include transportation, particularly aerospace and rail, and a broad range of manufacturing and retailing. We also serve the wholesaling, healthcare, communications, media and entertainment and various service-related industries. Our SBA preferred lender operations has been recognized as the nation's #1 SBA Lender (based on 7(a) program volume) in each of the last eight years. We also provide financing to the student loan market.

Each business has industry alignment and focuses on specific sectors, products and markets, with portfolios diversified by client and geography. Our principal product and service offerings include:

## Products

- Asset-based loans
- Secured lines of credit
- Leases – operating, capital and leveraged
- Vendor finance programs
- Import and export financing
- Debtor-in-possession / turnaround financing
- Acquisition and expansion financing
- Project financing
- Small business loans
- Student loans
- Letters of credit / trade acceptances

## Services

- Financial risk management
- Asset management and servicing
- Merger and acquisition advisory services
- Debt restructuring
- Credit protection
- Accounts receivable collection
- Commercial real estate advisory services
- Debt underwriting and syndication
- Insurance
- Capital markets structuring

We previously offered mortgage loans to consumers.

However, we closed the home lending origination platform in August 2007 due to the disruptions in that market. See "Home Lending" segment in this section and "Profitability and Key Business Trends" section of *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations* for further discussion on home lending.

Asset generation is a core strength of CIT. We source transactions through direct marketing efforts to borrowers, lessees, manufacturers, vendors, distributors and to end-users through referral sources and other intermediaries. In addition, our business units work together both in referring transactions between units (i.e. cross-selling) and by combining various products and services to meet our customers' overall financing needs. We also buy and sell participations in syndications of finance receivables and lines of credit and periodically purchase and sell finance receivables on a whole-loan basis.

Credit adjudication and servicing are also core strengths. We maintain disciplined underwriting standards and employ sophisticated portfolio risk management models to achieve desired portfolio demographics. Our collection and servicing operations are centralized across businesses and geographies providing efficient client interfaces and uniform customer experiences.

We generate revenue by earning interest income on the loans we hold on our balance sheet, collecting rentals on the equipment we lease, and earning fee and other income for the financial services we provide. In addition, we syndicate and sell certain finance receivables and equipment to leverage our origination capabilities, reduce concentrations, manage our balance sheet and improve profitability.

We fund our business in the global capital markets, principally through asset-backed and other secured financing arrangements, commercial paper, unsecured term debt, and broker-originated deposits. We rely on these diverse funding sources to maintain liquidity and strive to mitigate interest rate, foreign currency, and other market risks through disciplined matched-funding strategies. Our debt ratings are summarized on page 46 in the "Risk Management" section of *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations*.

At December 31, 2007, we had managed assets of \$83.2 billion comprised of an owned loan and lease portfolio of \$76.9 billion and a securitized portfolio of \$6.3 billion. We also serviced third party assets under fee-based contracts at year-end. Common stockholders' equity at December 31, 2007 was \$6.5 billion.

## BUSINESS SEGMENTS

CIT meets customers' financing needs through six business segments.

SEGMENT	MARKET AND SERVICES
Corporate Finance Group	Lending, leasing and other financial services to middle-market companies, through industry focused sales teams, including Healthcare, Communications, Media and Entertainment, and Energy, as well as to small businesses, through broker and intermediary relationships.
Transportation Finance	Large ticket equipment leases and other secured financing to companies in aerospace, rail and defense industries.
Trade Finance	Factoring, lending, credit protection, receivables management and other trade products to retail supply chain companies.
Vendor Finance	Innovative financing and leasing solutions to manufacturers, distributors and customer end-users around the globe.
Consumer	Student loans through Student Loan Xpress; other consumer loans through CIT Bank.
Home Lending	Servicing and collecting our liquidating home lending assets. We ceased originating new loans in the second half of 2007.

PAGE 3

Our managed assets are presented in the following graphs.

### Managed Assets by Segment

At December 31, 2007 (dollars in billions)

### Managed Assets by Country

At December 31, 2007 (dollars in billions)

## CORPORATE FINANCE

Our Corporate Finance segment provides a full spectrum of financing alternatives to borrowers ranging from small companies to large multinationals with emphasis on middle market companies. We service clients in a broad array of industries with specialized groups serving commercial and industrial; capital markets; communications, media and entertainment; energy; and healthcare sectors in the U.S. and abroad. We also provide collateralized and government-secured loans to small businesses (such as SBA loans), leveraging broker and intermediary relationships.

We offer loan structures ranging from working capital loans secured by accounts receivable and inventories, term loans secured by fixed assets to leveraged loans based on operating cash flow and enterprise valuation. Loans may be fixed or variable rate, senior or subordinated, and revolving or term. Our clients typically use the proceeds for working capital, asset growth, acquisitions, debtor-in-possession financing, and debt restructurings. Additionally, we provide equipment lending and leasing products, including loans, leases, whole-sale and retail financing packages, operating leases, and sale-leaseback arrangements to meet our customer's needs.

We also offer clients an array of financial and advisory services. The unit offers capital markets structuring and syndication capabilities, as well as advisory services, a capability that we enhanced in 2007 with a strategic acquisition. We also offer financial risk management services to selected customers, whereby we will enter into offsetting derivative transactions with a customer and a third party financial institution. As the offsetting derivatives have like notional amounts and terms, we retain only the counter-party risk.

Industry focused teams originate business through various intermediaries, referral sources, strategic partnerships and direct calling. We maintain relationships with selected banks, finance companies, hedge funds and other lenders both to obtain business leads and distribute our products. We also purchase and sell participation interests in syndicated loans from and to other financial institutions.

Our small business lending unit originates and services Small Business Administration and conventional loans for commercial real estate financing, construction, business acquisition and business succession financing. We are a SBA preferred lender and have been recognized as the nation's #1 SBA Lender (based on 7(a) program volume) in each of the last eight years.

We earn interest revenue on receivables we keep on-balance sheet and recognize gains on receivables sold. We also earn fees for servicing third party assets, which approximated \$2.1 billion at year end. Small business lending activities are principally focused on the U.S. market.

## TRANSPORTATION FINANCE

Our Transportation Finance segment specializes in providing customized leasing and secured financing primarily to end-users of aircraft, locomotives and railcars. Our transportation equipment financing products include operating leases, single investor leases, equity portions of leveraged leases and sale

and leaseback arrangements, as well as loans secured by equipment. Our equipment financing clients represent major and regional airlines worldwide, North American railroad companies, and middle-market to larger-sized aerospace and defense companies.

This segment has been servicing the aerospace and rail industries for many years and has built a global presence with operations in the United States, Canada, Europe and Asia. We have extensive experience in managing equipment over its full life cycle, including purchasing new equipment, equipment maintenance, estimating residual values and re-marketing by re-leasing or selling equipment.

The aerospace group offers commercial aircraft financing, business aircraft and aerospace and defense financing. It provides aircraft leasing and sales, asset management, finance, banking, technical and engineering, aircraft valuation and advisory services. The team has built strong relationships across the entire aerospace industry, including the major manufacturers, parts suppliers and carriers. These relationships provide us with access to technical information, which enhances our customer service and provides opportunities to finance new business. Our clients include major and regional airlines around the world.

Our commercial aerospace business has offices in North America, Europe and Asia and a global reach of customers in 45 countries. Our international aerospace servicing center in Dublin, Ireland, puts us closer to our growing international client base and provides us with favorable tax treatment for certain aircraft leasing operations. Our commercial fleet consists of 287 aircraft with a weighted average age of approximately 5 years placed with 105 clients around the world. As of December 31, 2007, our commercial aerospace financing and leasing portfolio was \$8.2 billion.

The business aircraft team offers financing and leasing programs for owners of business jet aircraft and turbine helicopters primarily in the United States. The aerospace and defense business provides comprehensive financing solutions to the aerospace and defense corporate finance market, as well as the aerospace financial intermediary market.

Our dedicated rail equipment group maintains relationships with numerous leading railcar manufacturers and calls directly on railroads and rail shippers throughout North America. Our rail portfolio, which totaled \$4.4 billion at December 31, 2007, includes leases to all of the U.S. and Canadian Class I railroads (railroads with annual revenues of at least \$250 million) and other non-rail companies, such as shippers and power and energy companies. The operating lease fleet primarily includes: covered hopper cars used to ship grain and agricultural products, plastic pellets and cement; gondola cars for coal, steel coil and mill service; open hopper cars for coal and aggregates; center beam flat cars for lumber; boxcars for paper and auto parts; and tank cars. Our railcar operating lease fleet has an average age of approximately 6 years and approximately 86% (based on net investment) were manufactured in 1998 or later. Our total rail fleet includes approximately 114,000 railcars and over 500 locomotives that we own, lease or service.

See “Concentrations” section of *Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations* and Note 17 – Commitments and Contingencies of *Item 8. Financial Statements and Supplementary Data* for further discussion of our aerospace portfolio.

## TRADE FINANCE

Our Trade Finance segment provides factoring, receivable and collection management products, and secured financing to businesses that operate in several industries including apparel, textile, furniture, home furnishings and electronics. Although primarily U.S.-based, we have increased our international business in Asia and Europe. CIT has many relationships with factors located throughout Asia, and from our full-service factoring company based in Frankfurt, Germany, we provide factoring and financing services to companies in Europe.

We offer a full range of domestic and international customized credit protection, lending and outsourcing services that include working capital and term loans, factoring, receivable management outsourcing, bulk purchases of accounts receivable, import and export financing and letter of credit programs.

We provide financing to our clients, primarily manufacturing, through the purchase of accounts receivable owed to our clients by their customers, typically retailers. We also guarantee amounts due to our client’s suppliers under letters of credit collateralized by accounts receivable and other assets. The purchase of accounts receivable is traditionally known as “factoring” and results in the payment by the client of a factoring fee that is commensurate with the underlying degree of credit risk and recourse, and which is generally a percentage of the factored receivables or sales volume. We also may advance funds to our clients, typically in an amount up to 80% of eligible accounts receivable, charging interest on the advance (in addition to any factoring fees), and satisfying the advance by the collection of the factored accounts receivable. We integrate our clients’ operating systems with ours to facilitate the factoring relationship.

Clients use our products and services for various purposes, including improving cash flow, mitigating or reducing credit risk, increasing sales, and improving management information. Further, with our TotalSource<sup>SM</sup> product, our clients can out-source their bookkeeping, collection, and other receivable processing to us. These services are attractive to industries outside the traditional factoring markets.

## VENDOR FINANCE

We are a leading global vendor finance company with numerous vendor relationships and operations serving customers in over 30 countries. We have significant vendor programs in information technology, telecommunications equipment, healthcare and other diversified asset types across multiple industries. Through our global relationships with industry-leading equipment vendors, including manufacturers, dealers, and distributors, we deliver customized financing solutions to both commercial and consumer customers of our vendor partners in a wide array of programs.

Our vendor alliances feature traditional vendor finance programs, joint ventures, profit sharing and other transaction structures with large, sales-oriented partners. In the case of joint ventures, we engage in financing activities jointly with the vendor through a distinct legal entity that is jointly owned. We also use “virtual joint ventures,” by which we originate the assets on our balance sheet and share with the vendor the economic outcomes from the customer financing activity. A key part of these partnership programs is coordinating with the vendor’s product offering systems to improve execution and reduce cycle times.

These alliances allow our vendor partners to focus on their core competencies, reduce capital needs and drive incremental sales volume. As a part of these programs, we offer our partners (1) financing to commercial and consumer end users for the purchase or lease of products, (2) enhanced sales tools such as asset management services, efficient loan processing and real-time credit adjudication, and (3) a single point of contact in our regional servicing hubs to facilitate global sales. In turn, these alliances provide us with a highly efficient origination platform as we leverage our partners’ sales forces.

Vendor Finance includes a small and mid-ticket commercial business, which focuses on leasing office equipment, computers and other technology products primarily in the United States and Canada. We originate products through relationships with manufacturers, dealers, distributors and other intermediaries as well as through direct calling.

Vendor Finance also houses CIT Insurance Services, through which we offer insurance and financial protection products in key markets around the world. We leverage our existing distribution capabilities and alliances with insurance and financial services providers, enabling us to offer protection products for small business and middle market clients and consumers. Our offerings to middle market and small business customers range from commercial property & casualty insurance, employee benefits, key person life insurance, and high net worth personal line coverage. For our consumer clients, we offer property coverage, debt protection, credit insurance, as well as supplemental insurance programs.

## CONSUMER

Our Consumer segment includes student lending and CIT Bank, a Utah-based industrial bank with deposit-taking capabilities. Our consumer activities are principally focused on the U.S. market.

Our student lending unit, which markets under the name Student Loan Xpress, offers student loan products, services, and solutions to students, parents, schools, and alumni associations. We offer government-guaranteed student loans made under the Federal Family Education Loan Program (FFELP), including consolidation loans, Stafford loans, Parent Loans for Undergraduate Students (PLUS) and Grad PLUS. We discontinued offering private loans during 2007. We originate and acquire loans through direct consumer marketing, school channel referrals and periodically purchase portfolios of loans. The majority of our student

loan portfolio is consolidation loans, but our portfolio of Stafford and PLUS loans has continued to grow. Most of our student loan portfolio is serviced in-house from our Cleveland facility.

During 2007, the federal government passed legislation with respect to the student lending business. Among other things, the legislation reduces special allowance payments paid to lenders by the federal government, increases loan origination fees paid to the government by lenders, and reduces the lender guarantee percentage. The legislation went into effect for all new FFELP student loans with first disbursements on or after October 1, 2007. The guarantee percentage, reduced from 97% to 95%, is in effect for loans originated after October 1, 2012. While the demographics of this market remain strong, the returns related to future originations will be impacted by the recent legislation.

As a result of decreased market valuations for student lending businesses and lower profit expectations resulting from higher funding costs, we recorded goodwill and intangible asset impairment charges during the last quarter of 2007.

CIT Bank, with assets of \$3.3 billion and deposits of \$2.7 billion, is located in Salt Lake City, Utah. Since its inception, the bank had been primarily funding consumer type loans. During late 2007, we refined the Bank's focus to fund commercial assets

and have commenced originating corporate loans. The Bank is chartered by the state of Utah as an industrial bank and is subject to regulation and examination by the Federal Deposit Insurance Corporation and the Utah Department of Financial Institutions.

See "Concentrations" section of *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations* and "Note 23 – Goodwill and Intangible Assets" of *Item 8. Financial Statements and Supplementary Data* for further discussion of our student lending portfolios.

## HOME LENDING

The Home Lending segment consists primarily of a liquidating portfolio of home mortgage receivables and manufactured housing receivables. In July of 2007, we announced our intent to exit this business and closed the home lending origination platform in August 2007.

The remaining portfolio is serviced out of our centralized servicing center in Oklahoma City, Oklahoma.

See "Profitability and Key Business Trends" section of *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations* for further discussion of our home lending portfolios.

## 2007 SEGMENT PERFORMANCE

Earnings and Return Summary (dollars in millions)

	Net Income/(Loss)	Return on Equity
Corporate Finance	\$ 453.0	18.3%
Transportation Finance	271.1	16.3%
Trade Finance	164.0	17.8%
Vendor Finance	410.1	23.6%
Commercial Segments	1,298.2	19.1%
Consumer	(274.9)	(52.3%)
Home Lending	(989.2)	(171.8%)
Corporate and Other	(145.1)	(2.1%)
Total	<u>\$[111.0]</u>	<u>(1.6%)</u>

See the "Results by Business Segments" and "Concentrations" sections of *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations* and

*Item 7A. Quantitative and Qualitative Disclosures about Market Risk*, and Notes 5 and 21 of *Item 8. Financial Statements and Supplementary Data*, for additional information.

## EMPLOYEES

CIT employed approximately 6,700 people at December 31, 2007, of which approximately 4,855 were employed in the

United States and approximately 1,845 were outside the United States.

## COMPETITION

Our markets are highly competitive, based on factors that vary depending upon product, customer, and geographic region. Our competitors include captive and independent finance companies, commercial banks and thrift institutions, industrial banks, leasing companies, insurance companies, hedge funds, manufacturers, and vendors. Many bank holding, leasing, finance, and insurance companies that compete with us have formed substantial financial services operations with global reach. On a local level, community banks and smaller independent finance and mortgage companies are competitive with substantial local market positions. Many of our competitors are large companies that have substantial capital, technological, and marketing resources. Some of these competitors are larger than we are and may have access to capital at a lower cost than we do. The markets for most of our products have a large number of competitors.

We compete primarily on the basis of financing terms, structure, client service, and price. From time to time, our competitors seek to compete aggressively on the basis of these factors and we may lose market share to the extent we are unwilling to match competitor product structure, pricing or terms that do not meet our credit standards or return requirements.

Other primary competitive factors include industry experience, equipment knowledge, and relationships. In addition, demand for an industry's services and products and industry regulations will affect demand for our products in some industries.

## REGULATION

In some instances, our operations are subject to supervision and regulation by federal, state, and various foreign governmental authorities. Additionally, our operations may be subject to various laws and judicial and administrative decisions imposing various requirements and restrictions. This oversight may serve to:

- regulate credit granting activities, including establishing licensing requirements, if any, in various jurisdictions,
- establish maximum interest rates, finance charges and other charges,
- regulate customers' insurance coverages,
- require disclosures to customers,
- govern secured transactions,
- set collection, foreclosure, repossession and claims handling procedures and other trade practices,
- prohibit discrimination in the extension of credit and administration of loans, and
- regulate the use and reporting of information related to a borrower's credit experience and other data collection.

Certain of our subsidiaries are subject to regulation from various agencies. CIT Bank, a Utah industrial bank wholly owned by CIT, is subject to regulation and examination by the Federal Deposit Insurance Corporation and the Utah Department of Financial Institutions. Student Loan Xpress, Inc., a Delaware corporation, conducts its business through various banks authorized by the

Department of Education, including Fifth Third Bank, CIT Bank and Liberty Bank, as eligible lender trustees. CIT Small Business Lending Corporation, a Delaware corporation, is licensed by and subject to regulation and examination by the U.S. Small Business Administration. CIT Capital Securities L.L.C., a Delaware limited liability company, is a broker-dealer licensed by the National Association of Securities Dealers, and is subject to regulation by the Financial Industry Regulatory Authority and the Securities and Exchange Commission. CIT Bank Limited, an English corporation, is licensed as a bank and broker-dealer and is subject to regulation and examination by the Financial Service Authority of the United Kingdom.

Our insurance operations are conducted through The Equipment Insurance Company, a Vermont corporation, Highlands Insurance Company Limited, a Barbados company, and Equipment Protection Services (Europe) Limited, an Irish Company. Each company is licensed to enter into insurance contracts. The local regulators in Vermont, Barbados, and Ireland regulate them. In addition, we have various banking corporations in Brazil, France, Germany, Italy, Belgium, Sweden, and the Netherlands and a broker-dealer entity in Canada, each of which is subject to regulation and examination by banking regulators and securities regulators in their home country.

## GLOSSARY OF TERMS

**Average Earning Assets (AEA)** is the average of finance receivables, operating lease equipment, financing and leasing assets held for sale, and some investments, less the credit balances of factoring clients. We use this average for certain key profitability ratios, including return on AEA and net finance revenue as a percentage of AEA.

**Average Finance Receivables (AFR)** is the average of finance receivables and includes loans and finance leases. It excludes operating lease equipment. We use this average to measure the rate of net charge-offs on an owned basis for the period.

**Capital** is the sum of common equity, preferred stock, junior subordinated notes, convertible debt (equity units) and preferred capital securities.

**Derivative Contract** is a contract whose value is derived from a specified asset or an index, such as interest rates or foreign currency exchange rates. As the value of that asset or index changes, so does the value of the derivative contract. We use derivatives to reduce interest rate, foreign currency or credit risks. We also offer derivatives to our own customers to enable those customers to reduce their own interest rate, foreign currency or credit risks. The derivative contracts we use include interest-rate swaps, cross-currency swaps, foreign exchange forward contracts, and credit default swaps.

**Efficiency Ratio** is the percentage of salaries and general operating expenses to Total Net Revenue. We use the efficiency ratio to measure the level of expenses in relation to revenue earned.

**Finance Revenue** includes interest income on finance receivables and rental income on operating leases.

**Financing and Leasing Assets** include loans, capital and finance leases, leveraged leases, operating leases, assets held for sale, and other investments.

**Held for Investment** describes loans that CIT has the ability and intent to hold in portfolio for the foreseeable future or until maturity. These are carried at amortized cost, unless it is determined that other than temporary impairment has occurred, then a charge is recorded in the current period statement of income.

**Held for Sale** describes loans that we intend to sell in the near-term. These are carried at the lower of cost or market, with a charge reflected in the current period statement of income if the cost (or current book value) exceeds the market value.

**Lease – capital and finance** is an agreement in which the party who owns the property (lessor) permits another party (lessee) to use the property with substantially all of the economic benefits and risks of ownership passed to the lessee.

**Lease – leveraged** is a lease in which a third party, a long-term creditor, provides non-recourse debt financing. We are party to these lease types either as a creditor or as the lessor.

**Lease – operating** is a lease in which we retain beneficial ownership of the asset, collect rental payments, recognize depreciation on the asset, and retain the risks of ownership, including obsolescence.

**Lower of Cost or Market (LOCOM)** relates to the carrying value of an asset. The cost refers to the current book balance, and if that balance is higher than the market value, then an impairment charge is reflected in the current period statement of income.

**Managed Assets** are comprised of finance receivables, operating lease equipment, financing and leasing assets held for sale, some investments, and receivables securitized and still managed by us. The change in managed assets during a reporting period is one of our measurements of asset growth.

**Net Finance Revenue** reflects finance revenue after interest expense and depreciation on operating lease equipment, which is a direct cost of equipment ownership. This subtotal is a key measure in the evaluation of our business.

**Net Finance Revenue after Credit Provision** reflects net finance revenue after credit costs. This subtotal is also called “risk adjusted revenue” by management as it reflects the periodic cost of credit risk.

**Net (loss) income (attributable) available to Common Shareholders (“net (loss) income”)** reflects net (loss) income after preferred dividends and is utilized to calculate return on common equity and other performance measurements.

**Non-GAAP Financial Measures** are balances, amounts or ratios that do not readily agree to balances disclosed in financial statements presented in accordance with accounting principles generally accepted in the U.S. We use non-GAAP measures to provide additional information and insight into how current operating results and financial position of the business compare to historical operating results and financial position of the business and trends, as well as adjusting for certain nonrecurring or unusual transactions.

**Non-performing Assets** include loans placed on non-accrual status, typically after becoming 90 days delinquent or prior to that time due to doubt of collectibility of principal and interest, and repossessed assets.

**Other Income** includes syndication fees, gains from dispositions of receivables and equipment, factoring commissions, loan servicing and other fees.

**Retained Interest** is the portion of the interest in assets we retain when we sell assets in a securitization transaction.

**Residual Values** represent the estimated value of equipment at the end of the lease term. For operating leases, it is the value to which the asset is depreciated at the end of its useful economic life (i.e., “salvage” or “scrap value”).

**Return on Common Equity (ROE)** is net income available to common stockholders, expressed as a percentage of average common equity, and is a key measurement of profitability.

**Special Purpose Entity (SPE)** is a distinct legal entity created for a specific purpose in order to isolate the risks and rewards of owning its assets and incurring its liabilities. We typically use SPEs in securitization transactions, joint venture relationships, and certain structured leasing transactions.

*Syndication and Sale of Receivables* result from originating leases and receivables with the intent to sell a portion, or the entire balance, of these assets to other financial institutions. We earn and recognize fees and/or gains on sales, which are reflected in other income, for acting as arranger or agent in these transactions.

*Tangible Capital and Metrics* exclude goodwill, other intangible assets and some comprehensive income items. We use tangible metrics in measuring capitalization.

*Total Net Revenue* is the total of net finance revenue plus other income. This amount excludes provision for credit losses and

valuation allowances from total net revenue and other income and is a measurement of our revenue growth.

*Unpaid Principal Balance (UPB)* refers to the remaining unpaid principal balance of a loan and is used in the discussion surrounding home lending assets and reflects the carrying value, before applying the recorded discount or valuation allowance.

*Yield-related Fees* are collected in connection with our assumption of underwriting risk in certain transactions in addition to interest income. We recognize yield-related fees, which include prepayment fees and certain origination fees, in Finance Revenue over the life of the lending transaction.

---

## ITEM 1A. Risk Factors

You should carefully consider the following discussion of risks, and the other information provided in this Annual Report on Form 10-K. Our business activities involve various elements of risk. The risks described below are not the only ones facing us. Additional risks that are presently unknown to us or that we currently deem immaterial may also impact our business. We consider the following issues to be the most critical risks to the success of our business:

### OUR LIQUIDITY OR ABILITY TO RAISE DEBT OR EQUITY CAPITAL MAY BE LIMITED.

We rely upon access to the capital markets to provide sources of liquidity and to fund asset growth. These markets have exhibited heightened volatility and reduced liquidity. Recently, liquidity in the capital markets has been more constrained and interest rates available to us have increased significantly relative to benchmark rates, such as U.S. treasury securities and LIBOR. As a result, our cost of funds has increased and we have shifted our funding sources primarily to asset-backed securities and other secured credit facilities, including both on-balance sheet and off-balance sheet securitizations, rather than unsecured debt securities. Adverse changes in the economy, long-term disruption in the capital markets, deterioration in our business performance or downgrades in our credit ratings could limit our access to these markets or increase our cost of capital. Any one of these developments would adversely affect our business operating results and financial condition. A downgrade in our short-term credit ratings could result in our having to issue commercial paper to a different group of investors, as a portion, or potentially all, of our current investor base could require maintenance of our short-term credit ratings.

We may also raise additional equity capital through the sale of common stock, preferred stock, or securities that are convertible into common stock. There are no restrictions on entering into the sale of any such equity securities in either public or private transactions, except that any private transaction involving more than 20% of the shares outstanding will require shareholder approval. Under current market conditions, the

terms of any such equity transactions may subject existing security holders to potential subordination or dilution and may involve change in governance.

### WE MAY BE ADVERSELY AFFECTED BY DETERIORATION IN ECONOMIC CONDITIONS THAT IS GENERAL OR SPECIFIC TO INDUSTRIES, PRODUCTS OR GEOGRAPHIES.

A recession or downturn in the U.S. or global economies or affecting specific industries, geographic locations and/or products could make it difficult for us to originate new business, given the resultant reduced demand for consumer or commercial credit. In addition, a downturn in certain industries may result in a reduced demand for the products that we finance in that industry or negatively impact collection and asset recovery efforts.

Credit quality also may be impacted during an economic slowdown or recession as borrowers may fail to meet their debt payment obligations. Adverse economic conditions may also result in declines in collateral values. Accordingly, higher credit and collateral related losses could impact our financial position or operating results.

For example, decreased demand for the products of various manufacturing customers due to a general economic slowdown may adversely affect their ability to repay their loans and leases with us. Similarly, a decrease in the level of airline passenger traffic due to general economic slowdown or a decline in shipping volumes due to a slowdown in particular industries may adversely affect our aerospace or rail businesses.

### WE MAY BE ADVERSELY AFFECTED BY CONTINUED DETERIORATION IN MARKET CONDITIONS AND CREDIT QUALITY IN THE HOME LENDING AND RELATED INDUSTRIES.

The U.S. residential market and home lending industry began showing signs of stress in early 2007, with credit conditions deteriorating rapidly in the second quarter of 2007 and continuing into the third and fourth quarters of 2007, including

increased rates of defaults and foreclosures, stagnating or declining home prices, and declining sales in both the new construction and the resale markets.

These market conditions were reflected in the deterioration of credit metrics of our home lending portfolio and the decreased market liquidity for such portfolios and resulted in higher charge-offs and significant valuation allowances through year end 2007. These changes in the home lending and home construction industries have also resulted in reduced demand for certain types of railcars that are used to transport building materials, produced higher volatility and reduced demand from investors in the high yield loan markets, generated concerns about credit quality in general, and hampered activity in the syndication market, among other effects.

We will continue to be adversely affected by conditions in the U.S. residential home lending industry if they continue to deteriorate further. It is also likely that we will be adversely affected if the conditions in the home lending industry negatively impact our other consumer businesses or other parts of our credit portfolio or the U.S. or world economies. Finally, we may be adversely affected if the conditions in the home lending industry result in new or increased regulation of financing and leasing companies in general or with respect to specific products or markets.

#### **OUR RESERVES FOR CREDIT LOSSES MAY PROVE INADEQUATE OR WE MAY BE NEGATIVELY AFFECTED BY CREDIT RISK EXPOSURES.**

Our business depends on the creditworthiness of our customers. We maintain a consolidated reserve for credit losses on finance receivables that reflects management's judgment of losses inherent in the portfolio. We periodically review our consolidated reserve for adequacy considering economic conditions and trends, collateral values and credit quality indicators, including past charge-off experience and levels of past due loans and non-performing assets. We cannot be certain that our consolidated reserve for credit losses will be adequate over time to cover credit losses in our portfolio because of adverse changes in the economy or events adversely affecting specific customers, industries or markets. If the credit quality of our customer base materially decreases, if the risk of a market, industry, or group of customers changes significantly, or if our reserves for credit losses are not adequate, our business, financial condition and results of operations could suffer. For example, credit performance in the home lending industry, and particularly in the sub-prime market, has been declining over the past year. This decline in the home lending industry has been reflected in our home lending portfolio during 2007, resulting in increased charge-offs and significant valuation allowances.

In addition to customer credit risk associated with loans and leases, we are also exposed to other forms of credit risk, including counterparties to our derivative transactions, loan sales, syndications and equipment purchases. These counterparties include other financial institutions, manufacturers and our customers. To the extent that our credit underwriting processes or credit risk judgments fail to adequately identify or assess such risks, or if the credit quality of our

derivative counterparties, customers, manufacturers, or other parties with which we conduct business materially deteriorates, we may be exposed to credit risk related losses that may negatively impact our financial condition, results of operations or cash flows.

#### **WE MAY BE ADVERSELY AFFECTED BY SIGNIFICANT CHANGES IN INTEREST RATES.**

Although we generally employ a matched funding approach to managing our interest rate risk, including matching the repricing characteristics of our assets with our liabilities, significant increases in market interest rates or widening of our credit spreads, or the perception that an increase may occur, could adversely affect both our ability to originate new finance receivables and our profitability. Conversely, a decrease in interest rates could result in accelerated prepayments of owned and managed finance receivables.

#### **WE MAY BE REQUIRED TO TAKE AN IMPAIRMENT CHARGE FOR GOODWILL OR INTANGIBLE ASSETS RELATED TO ACQUISITIONS.**

We have acquired certain portions of our business and certain portfolios through acquisitions and bulk purchases. Further, as part of our long-term business strategy, we may continue to pursue acquisitions of other companies or asset portfolios. In connection with prior acquisitions and portfolio purchases, we have accounted for the portion of the purchase price paid in excess of the book value of the assets acquired as goodwill or intangible assets, and we may be required to account for similar premiums paid on future acquisitions in the same manner.

Under the applicable accounting rules, goodwill is not amortized and is carried on our books at its original value, subject to periodic review and evaluation for impairment, while intangible assets are amortized over the life of the asset. If, as a result of our periodic review and evaluation of our goodwill and intangible assets for potential impairment, we determine that changes in the business itself, the economic environment including business valuation levels and trends, or the legislative or regulatory environment have adversely affected the fair value of the business, we may be required to take an impairment charge to the extent that the carrying values of our goodwill or intangible assets exceeds the fair value of the business. As a result of our 2007 fourth quarter analysis of goodwill and intangible assets associated with our student lending business, we recorded impairment charges. Also, if we sell a business for less than the book value of the assets sold, plus any goodwill or intangible assets attributable to that business, we may be required to take an impairment charge on all or part of the goodwill and intangible assets attributable to that business.

#### **BUSINESSES OR ASSET PORTFOLIOS ACQUIRED MAY NOT PERFORM AS EXPECTED AND WE MAY NOT BE ABLE TO ACHIEVE ADEQUATE CONSIDERATION FOR PLANNED DISPOSITIONS.**

As part of our long-term business strategy, we may pursue acquisitions of other companies or asset portfolios as well as dispose of non-strategic businesses or portfolios. Future

acquisitions may result in potentially dilutive issuances of equity securities and the incurrence of additional debt, which could have a material adverse effect on our business, financial condition and results of operations. Such acquisitions may involve numerous other risks, including difficulties in integrating the operations, services, products and personnel of the acquired company; the diversion of management's attention from other business concerns; entering markets in which we have little or no direct prior experience; and the potential loss of key employees of the acquired company. In addition, acquired businesses and asset portfolios may have credit-related risks arising from substantially different underwriting standards associated with those businesses or assets.

With respect to our planned disposition of certain home lending assets held for sale, or any future dispositions of our businesses or asset portfolios, there can be no assurance that we will receive adequate consideration for those businesses or assets at the time of their disposition or that we will be able to adequately replace the volume associated with the businesses or asset portfolios that we dispose of with higher-yielding businesses or asset portfolios having acceptable risk characteristics. As a result, our future disposition of businesses or asset portfolios could have a material adverse effect on our business, financial condition and results of operations.

#### **ADVERSE OR VOLATILE MARKET CONDITIONS MAY REDUCE FEES AND OTHER INCOME.**

In 2005, we began pursuing strategies to leverage our expanded asset generation capability and diversify our revenue base to increase other income as a percentage of total revenue. We invested in infrastructure and personnel focused on increasing other income in order to generate higher levels of syndication and participation income, advisory fees, servicing fees and other types of fee income. These revenue streams are dependent on market conditions and, therefore, can be more volatile than interest on loans and rentals on leased equipment. Current market conditions, including lower liquidity levels, have had a direct impact on syndication activity, and have resulted in lower fee generation. If we are unable to sell or syndicate a transaction after it is originated, this activity will involve the assumption of greater underwriting risk than we originally intended and could increase our capital requirements to support our business.

Continued disruption to the capital markets, our failure to implement these initiatives successfully, or the failure of such initiatives to result in increased asset and revenue levels could adversely affect our financial position and results of operations.

#### **ADVERSE FINANCIAL RESULTS OR OTHER FACTORS MAY LIMIT OUR ABILITY TO PAY DIVIDENDS**

Our board of directors decides whether we will pay dividends on our common stock. That decision depends upon, among other things, general economic and business conditions, our strategic and operational plans, our financial results and condition, contractual, legal and regulatory restrictions on the payment of dividends by us, our credit ratings, and such other

factors as the board of directors may consider to be relevant. If any of these factors are adversely affected it may impact our ability to pay dividends on our common stock.

In addition, the terms of our outstanding preferred stock and junior subordinated notes restrict our ability to pay dividends on our common stock if we do not make distributions on our preferred stock and subordinated notes. Further, we are prohibited from declaring dividends on our preferred stock and from paying interest on our junior subordinated notes if we do not meet certain financial tests, provided that the limitation does not apply if we pay such dividends and interest out of net proceeds that we have received from the sale of common stock. We sold common stock to cover such dividend and interest payments during the third and fourth quarters of 2007 and the first quarter of 2008, and we obtained a forward commitment from two investment banks to purchase additional shares, at our option, in the second and third quarters of 2008. If we are unable to sell our common stock in the future, and we fail to meet the requisite financial tests, then we will be prohibited from declaring dividends on our preferred stock, paying interest on our junior subordinated notes, or declaring dividends on our common stock.

#### **COMPETITION FROM BOTH TRADITIONAL COMPETITORS AND NEW MARKET ENTRANTS MAY ADVERSELY AFFECT OUR RETURNS, VOLUME AND CREDIT QUALITY.**

Our markets are highly competitive and are characterized by competitive factors that vary based upon product and geographic region. We have a wide variety of competitors that include captive and independent finance companies, commercial banks and thrift institutions, industrial banks, community banks, leasing companies, hedge funds, insurance companies, mortgage companies, manufacturers and vendors.

Competition from both traditional competitors and new market entrants has intensified due to increasing recognition of the attractiveness of the commercial finance markets. We compete primarily on the basis of pricing, terms and structure. To the extent that our competitors compete aggressively on any combination of those factors, we could lose market share. Should we match competitors' terms, it is possible that we could experience margin compression and/or increased losses.

#### **WE MAY NOT BE ABLE TO REALIZE OUR ENTIRE INVESTMENT IN THE EQUIPMENT WE LEASE.**

The realization of equipment values (residual values) at the end of the term of a lease is an important element in the leasing business. At the inception of each lease, we record a residual value for the leased equipment based on our estimate of the future value of the equipment at the expected disposition date. Internal equipment management specialists, as well as external consultants, determine residual values.

A decrease in the market value of leased equipment at a rate greater than the rate we projected, whether due to rapid technological or economic obsolescence, unusual wear and tear on the equipment, excessive use of the equipment, or other factors, would adversely affect the residual values of

such equipment. Further, certain equipment residual values, including commercial aerospace residuals, are dependent on the manufacturer's or vendor's warranties, reputation and other factors. Consequently, there can be no assurance that we will realize our estimated residual values for equipment.

The degree of residual realization risk varies by transaction type. Capital leases bear the least risk because contractual payments cover approximately 90% of the equipment's cost at the inception of the lease. Operating leases have a higher degree of risk because a smaller percentage of the equipment's value is covered by contractual cashflows at lease inception. Leveraged leases bear the highest level of risk as third parties have a priority claim on equipment cashflows.

#### INVESTMENT IN AND REVENUES FROM OUR FOREIGN OPERATIONS ARE SUBJECT TO THE RISKS AND REQUIREMENTS ASSOCIATED WITH TRANSACTING BUSINESS IN FOREIGN COUNTRIES.

An economic recession or downturn, increased competition, or business disruption associated with the political or regulatory environments in the international markets in which we operate could adversely affect us. In addition, while we generally hedge our translation and transaction exposures, foreign currency exchange rate fluctuations, or the inability to hedge effectively in the future, could have a material adverse effect on our investment in international operations and the level of international revenues that we generate from international asset based financing and leasing. Reported results from our operations in foreign countries may fluctuate from period to period due to exchange rate movements in relation to the U.S. dollar, particularly exchange rate movements in the Canadian dollar, which is our largest non-U.S. exposure.

Foreign countries have various compliance requirements for financial statement audits and tax filings, which are required to obtain and maintain licenses to transact business.

#### THE REGULATED ENVIRONMENT IN WHICH WE OPERATE MAY ADVERSELY AFFECT US.

Our domestic operations are subject, in certain instances, to supervision and regulation by state and federal authorities, including the Federal Deposit Insurance Corporation, the Utah Department of Financial Institutions, the U.S. Small Business Administration, the FINRA, the SEC and various state insurance regulators, and may be subject to various laws and judicial and administrative decisions imposing various requirements and restrictions. Noncompliance with applicable statutes or regulations could result in the suspension or revocation of any license or registration at issue, as well as the imposition of civil fines and criminal penalties.

The financial services industry is heavily regulated in many jurisdictions outside the United States. As a result, growing our international operations may be affected by the varying requirements of these jurisdictions. CIT Bank Limited, is licensed as a bank and a broker-dealer and is subject to regulation and examination by the Financial Services Authority of the United Kingdom. We also operate various banking corporations in Brazil, France, Italy, Belgium, Sweden and The Netherlands, and a broker-dealer entity in Canada, each of which is subject to regulation and examination by banking regulators and securities regulators in their home country. Our subsidiary, CIT Bank, a Utah industrial bank, is subject to regulation and examination by the FDIC and the Utah Department of Financial Institutions. Finally, our subsidiary that operates our insurance business, Highlands Insurance Company Limited, is a Barbados company and therefore regulated by Barbados laws and regulations. Given the evolving nature of regulations in many of these jurisdictions, it may be difficult for us to meet these requirements even after we establish operations and receive regulatory approvals. Our inability to remain in compliance with regulatory requirements in a particular jurisdiction could have a material adverse effect on our operations in that market and on our reputation generally.

## ITEM 1 B. Unresolved Staff Comments

There are no unresolved SEC staff comments.

## ITEM 2. Properties

CIT operates in the United States, Canada, Europe, Latin America, Australia and the Asia-Pacific region. CIT occupies approximately 2.1 million square feet of office space, the

majority of which is leased. Such office space is suitable and adequate for our needs and we utilize, or plan to utilize, substantially all of our leased office space.

---

## ITEM 3. Legal Proceedings

### STUDENT LOAN INVESTIGATIONS

Student Loan Xpress, Inc. ("SLX"), a subsidiary of CIT, is engaged in the student lending business. In connection with investigations into (i) the relationships between student lenders and the colleges and universities that recommend such lenders to their students, and (ii) the business practices of student lenders, CIT and/or SLX have received requests for information from several state Attorneys General and several federal governmental agencies. In May, 2007, CIT entered into an Assurance of Discontinuance (the "AOD") with the New York Attorney General (the "NYAG"), pursuant to which CIT contributed \$3.0 million into a fund established to educate students and their parents concerning student loans and agreed to cooperate with the NYAG's investigation, in exchange for which, the NYAG agreed to discontinue its investigation concerning certain alleged conduct by SLX. CIT is fully cooperating with the remaining investigations.

### VENDOR FINANCE BILLING AND INVOICING INVESTIGATION

In the second quarter of 2007, the office of the United States Attorney for the Central District of California requested that

CIT produce the billing and invoicing histories for a portfolio of customer accounts that CIT purchased from a third-party vendor. The request was made in connection with an ongoing investigation being conducted by federal authorities into billing practices involving that portfolio. State authorities in California have been conducting a parallel investigation. It appears the investigations are being conducted under the Federal False Claims Act and its California equivalent. CIT is cooperating with these investigations. Based on the facts known to date, CIT cannot determine the outcome of these investigations at this time.

### OTHER LITIGATION

In addition, there are various legal proceedings and government investigations against or including CIT, which have arisen in the ordinary course of business. While the outcomes of the ordinary course legal proceedings and the related activities are not certain, based on present assessments, management does not believe that they will have a material adverse effect on CIT.

---

## ITEM 4. Submission of Matters to a Vote of Security Holders

We did not submit any matters to a vote of security holders during the three months ended December 31, 2007.

## PART TWO

# ITEM 5. Market for Registrant's Common Equity and Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock is listed on the New York Stock Exchange. The following table sets forth the high and low reported

closing prices for CIT's common stock for each of the quarterly periods in the two years ended December 31, 2007.

Common Stock Price	2007		2006	
	High	Low	High	Low
First Quarter	\$61.36	\$50.96	\$55.05	\$51.38
Second Quarter	\$61.16	\$52.80	\$55.95	\$48.89
Third Quarter	\$57.63	\$33.28	\$53.41	\$42.44
Fourth Quarter	\$41.85	\$22.76	\$56.35	\$47.74

During the year ended December 31, 2007, we paid a dividend of \$0.25 per common share each quarter for a total of \$1.00 per share. During the year ended December 31, 2006, we paid a dividend of \$0.20 per common share each quarter for a total of \$0.80 per share. On January 15, 2008, the Board of Directors approved a quarterly dividend of \$0.25 per share to be paid February 29, 2008, to shareholders of record on February 15, 2008.

Our dividend practice is to pay a dividend while maintaining sufficient capital to support our business. The declaration and payment of future dividends are subject to the discretion of our board of directors. Any determination as to the payment of dividends, including the level of dividends, will depend on, among other things, general economic and business conditions, our strategic and operational plans, our financial results and condition, contractual, legal and regulatory restrictions on the payment of dividends by us, and such other factors as the board of directors may consider to be relevant.

The terms of our outstanding preferred stock and junior subordinated notes restrict our ability to pay dividends on our common stock if and so long as we do not make distributions on our preferred stock or we do not pay all accrued and unpaid interest on our junior subordinated notes, in full when due. Further, we are prohibited from declaring dividends on our preferred stock and from paying interest on our junior subordinated notes if, among other things, our average four quarters fixed charge ratio is less than or equal to 1.10 on the dividend declaration date or on the

thirtieth day prior to the interest payment date, as the case may be. Our average four quarters fixed charge ratio is defined as (a) the sum, for our most recently completed four fiscal quarters, of the quotient of (x) our earnings (excluding income taxes, interest expense, extraordinary items, goodwill impairment and amounts related to discontinued operations) and (y) interest expense plus preferred dividends, divided by (b) four.

Our average four-quarter fixed charge ratio was below 1.10 at December 31, 2007. Notwithstanding the foregoing, we may declare such dividends and pay such interest to the extent of any net proceeds that we have received from the sale of common stock during the 90 days prior to the declaration of the dividend or the 180 days prior to the interest payment date.

On January 23, 2008, CIT Group Inc. entered into a Sales Agency Agreement with Morgan Stanley & Co. Incorporated and Citigroup Global Markets Inc., pursuant to which CIT agreed to sell shares of its common stock for an aggregate purchase price of up to \$31.5 million. As a result, the Company sold 1,281,519 shares on January 30, 2008 and satisfied the conditions necessary to permit the declaration and payment of preferred stock dividends payable February 29, 2008.

As of February 15, 2008, there were 77,727 beneficial owners of CIT common stock.

All equity compensation plans in effect during 2007 were approved by our shareholders, and are summarized in the following table.

	Number of Securities to be Issued Upon Exercise of Outstanding Options <sup>(1)</sup> (A)	Weighted-Average Exercise Price of Outstanding Options (B)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (A)) (C)
Equity Compensation Plans Approved by Security Holders	12,262,634	\$42.94	8,963,793

<sup>(1)</sup> Excludes 189,687 unvested restricted shares and 1,986,608 unvested performance shares outstanding under the Long-Term Equity Compensation Plan.

We had no equity compensation plans that were not approved by shareholders. For further information on our equity compensation

plans, including the weighted average exercise price, see Item 8. Financial Statements and Supplementary Data, Note 16.

The following table details the repurchase activity of CIT common stock during the quarter ended December 31, 2007.

	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet be Purchased Under the Plans or Programs
Balance at September 30, 2007	24,762,422			689,096
October 1 – 31, 2007	–	–	–	689,096
November 1 – 30, 2007	–	–	–	689,096
December 1 – 31, 2007	–	–	–	689,096
Total Purchases	–			
Reissuances <sup>(1)</sup>	297,848			
Balance at December 31, 2007	24,464,574			

<sup>(1)</sup> Includes the issuance of 235,800 shares of our common stock to permit declaration of fourth quarter dividends, as well as exercise of stock options and for the employee stock purchase plan.

The remaining shares that may yet be repurchased relate to the 2007 continuation of the common stock repurchase program to acquire up to an additional 5 million shares of our outstanding common stock in conjunction with employee equity compensation programs. The program authorizes the Company to purchase shares on the open market, in other privately negotiated transactions or a combination thereof from time to time over a two-year period beginning January 17, 2007. The repurchased common stock is held as treasury shares and may be used for the issuance of shares under CIT's employee stock plans. Acquisitions under the share repurchase program will be made from time to time at prevailing

prices as permitted by applicable laws, and subject to market conditions and other factors. The program may be discontinued at any time and is not expected to have a significant impact on our capitalization.

#### STOCK PERFORMANCE GRAPH

The following graph compares the yearly cumulative total stockholder return of our common stock during the last five years to the cumulative total return of the S&P Financial Index and the S&P 500 Index for the same period. The results are based on an assumed \$100 invested at December 31, 2002, and daily reinvestment of dividends.

#### COMPARISON OF FIVE YEAR CUMULATIVE TOTAL RETURN

## ITEM 6. Selected Financial Data

The following tables set forth selected consolidated financial information regarding our results of operations and balance sheets. The data presented below is explained further in, and should be read in conjunction with, *Item 7. Management's*

*Discussion and Analysis of Financial Condition and Results of Operations and Item 7A. Quantitative and Qualitative Disclosures about Market Risk and Item 8. Financial Statements and Supplementary Data.*

(At or for the Years Ended December 31, dollars in millions, except per share data)

# ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

## and

# ITEM 7A. Quantitative and Qualitative Disclosures about Market Risk

### INTRODUCTION

CIT Group Inc., a Delaware corporation ("we," "CIT" or the "Company"), is a global commercial finance company that was founded in 1908. CIT provides financing and leasing capital for companies and consumers in a wide variety of industries, offering vendor, equipment, commercial, factoring, student lending and structured financing products, as well as management advisory services. CIT operates primarily in North America, with locations in Europe, Latin America, Australia and the Asia-Pacific region.

In the following discussion we use financial terms that are relevant to our business. You can find a glossary of other key terms used in our business in Part I *Item 1. Business Section*.

This "*Management's Discussion and Analysis of Financial Condition and Results of Operations*" and "*Quantitative and Qualitative Disclosures about Market Risk*" contain certain non-GAAP financial measures. See "*Non-GAAP Financial Measurements*" for reconciliation of our non-GAAP financial measures to the comparable GAAP financial measures.

KEY PERFORMANCE METRICS AND MEASUREMENTS	
<b>Profitability</b> Our ability to generate income on investments to produce returns to our shareholders and build our capital base to support future growth. We measure our performance in this area by:	<ul style="list-style-type: none"> <li>– Net income per common share (EPS);</li> <li>– Net income as a percentage of average common equity (ROE); and</li> <li>– Net income as a percentage of average earning assets (ROA).</li> </ul>
<b>Asset Generation</b> Our ability to originate new business and build our earning assets. We measure our performance in these areas by:	<ul style="list-style-type: none"> <li>– Origination volumes by unit; and</li> <li>– Levels of financing and leasing assets, and managed assets.</li> </ul>
<b>Revenue Generation</b> Our ability to lend money at rates in excess of our cost of borrowing, earn rentals on the equipment we lease, and generate other income. We measure our performance in this area by:	<ul style="list-style-type: none"> <li>– Finance revenue as a percentage of average earning assets (AEA);</li> <li>– Net finance revenue as a percentage of AEA;</li> <li>– Operating lease revenue as a percentage of average operating lease equipment (AOL) and</li> <li>– Levels of net finance revenue and other income.</li> </ul>
<b>Liquidity and Market Rate Risk Management</b> Our ability to obtain funding at competitive rates, which depends on maintaining high quality assets, strong capital ratios, and high credit ratings, and our ability to manage our interest rate and currency rate risk, where our goal is to substantially insulate our interest margins and profits from movements in market interest rates and foreign currency exchange rates. We measure our liquidity and market rate risk management by:	<ul style="list-style-type: none"> <li>– Various interest sensitivity and liquidity measurements, which we discuss in "<i>Risk Management</i>".</li> </ul>

KEY PERFORMANCE METRICS AND MEASUREMENTS	
<p><b>Credit Risk Management</b> Our ability to evaluate the credit-worthiness of our customers, both during the credit granting process and after the advancement of funds, and to maintain high-quality assets while balancing income potential with adequate credit loss reserve levels. We assess our credit risk management by:</p>	<ul style="list-style-type: none"> <li>– Net charge-offs as a percentage of average finance receivables;</li> <li>– Non-performing assets as a percentage of finance receivables;</li> <li>– Delinquent assets as a percentage of finance receivables;</li> <li>– Reserve for credit losses as a percentage of finance receivables and non-performing assets; and</li> <li>– Concentration risk by geographic region, industry and customer.</li> </ul>
<p><b>Equipment and Residual Risk Management</b> Our ability to evaluate collateral risk in leasing and lending transactions and to remarket equipment at lease termination. We measure these activities by:</p>	<ul style="list-style-type: none"> <li>– Gains and losses on equipment sales; and</li> <li>– Equipment utilization and value of equipment off -lease.</li> </ul>
<p><b>Expense Management</b> Our ability to maintain efficient operating platforms and infrastructure in order to run our business at competitive cost levels. We track our efficiency by:</p>	<ul style="list-style-type: none"> <li>– Efficiency ratio, which is the ratio of operating expenses to total net revenue; and</li> <li>– Operating expenses as a percentage of average managed assets ("AMA").</li> </ul>
<p><b>Capital Management</b> Our ability to maintain a strong capital base to support our debt credit ratings and asset growth. We measure our performance in this area by:</p>	<ul style="list-style-type: none"> <li>– Tangible capital base;</li> <li>– Tangible book value per common share; and</li> <li>– Tangible capital as a percentage of managed assets.</li> </ul>

## PROFITABILITY AND KEY BUSINESS TRENDS

This past year, particularly the second half of 2007, was challenging for CIT. We reconsidered our home lending business strategy due to the market conditions in the U.S. residential mortgage market, particularly with respect to sub-prime mortgage lending and as a result, recorded significant valuation adjustments and credit loss provisioning related to this business in 2007. In addition, heightened volatility in the capital markets in the second half of 2007 resulted in a widening of corporate borrowing spreads and restricted our access to traditional unsecured long-term funding sources at competitive rates. Given these market conditions, we funded our business principally in the asset-backed markets during the second half of the year. We continued to access the commercial paper markets, but at reduced levels and higher costs. We also recorded a non-cash goodwill and intangible asset impairment charge in our student lending business, as declining peer valuations and higher funding costs for this asset class led us to conclude in the fourth quarter that the fair value of this business did not support the goodwill and intangible asset carrying values.

The losses in our home lending and consumer segments overshadowed solid results in our commercial businesses. Owned financing and leasing assets in our four commercial segments grew 14% from December 31, 2006, as we deployed capital strategically to provide liquidity to customers with whom we have long and strong relationships. We executed two significant acquisitions (approximately \$4 billion in assets) in the first half of the year in our Vendor Finance segment and we sold just over \$3 billion in construction (Corporate Finance segment) and systems leasing (Vendor Finance segment) portfolios in the second half of 2007. Commercial credit quality

remained strong, though credit quality measurements did weaken from very strong prior year levels.

The loss per share for 2007 was \$0.58 compared with diluted income per share in 2006 and 2005 of \$5.00 and \$4.44, respectively. The net loss attributable to common shareholders was \$111.0 million for 2007, versus net income of \$1,015.8 million and \$936.4 million for 2006 and 2005. Among the items driving these comparisons were the following:

- An after tax loss of \$989.2 million in the Home Lending segment, primarily due to \$1,248.9 million (pretax) in valuation allowance charges to adjust assets held for sale to estimated fair value and a \$250 million fourth quarter provision for credit losses following the transfer of the majority of the portfolio back to held for investment late in the third quarter;
- A \$302.5 million after tax goodwill and intangible asset impairment charge related to the Company's student lending business, reflecting decreased market valuations for student lending businesses and lower profit expectations as a result of higher funding costs;
- A pretax gain of \$247.1 million on the sale of CIT's 30% interest in its Dell Financial Services (DFS) joint venture within Other Income; and
- A combined pretax gain of \$261.1 million on the above-mentioned sales of construction and systems leasing assets within Other Income.

Looking ahead to 2008, we will continue to focus on capital discipline, proactive portfolio management, balance sheet strength and maximizing the value of the liquidating home lending portfolio. We are concentrating on maintaining liquidity

and will deploy resources to our most profitable commercial franchises. We expect to continue to fund the business primarily with secured / asset-backed financings and to grow assets modestly, particularly in the first half of 2008. As a result, we expect 2008 earnings to reflect the following:

- Lower net finance revenue, with spread compression due to higher borrowing costs and reduced revenue from the Dell vendor relationship;
- Softness in other income, due to low asset sale and syndication gains;
- An increase in credit costs from very favorable levels due to a softening economic environment; and
- Positive operating expense trends due to lower headcount and other cost savings initiatives.

#### HOME LENDING BUSINESS – SIGNIFICANT 2007 EVENTS AND ACTIONS

The Company entered the home lending business in 1992 in order to develop diversification relative to our commercial finance businesses in an asset class with liquidity, predictable revenue streams and growth opportunities. In the first half of 2007, deteriorating credit performance in the residential mortgage markets, coupled with reduced liquidity in the secondary market for this asset class, resulted in a decline in portfolio and origination economics. In light of these negative developments, other negative trends in the housing market and management's belief that the residential mortgage business would be weak for an extended period, we announced our intent to exit this business in July of 2007. Working with an external advisor, we considered an outright sale of: (i) the business as a going concern, including the origination and servicing platforms; (ii) the entire portfolio of receivables or (iii) various parts of the portfolio.

##### Second Quarter 2007

Given our intent to exit the business and potentially sell all or part of the portfolio, management determined that the home lending receivables portfolio no longer qualified as assets held for investment under generally accepted accounting principles (GAAP) at June 30, 2007. Accordingly, the portfolio was transferred to assets held for sale and reduced to the lower of cost or market as required by GAAP, resulting in a second quarter pre-tax charge of \$765.3 million. The valuation allowance as of June 30, 2007 reflected a discount of approximately 6.3% to the \$11.3 billion of unpaid principal balance (UPB), excluding repossessed assets, based on management's estimate of fair value.

The valuation allowance for the mortgage portfolio as of June 30, 2007 was based on (i) pricing indicators for multiple pools of our home lending portfolio that we obtained from a major market participant on two separate occasions in mid-June and early July 2007 and (ii) an offer from a private equity investor to purchase a portion of the portfolio comprised of a representative cross section of the entire portfolio. Both the pricing indicators from the major market participant and the bid from the private equity investor were within comparable value ranges. There were few observable portfolio sale transactions in the weeks preceding June 30, 2007. Those transactions that were completed were at levels in excess of par value and were dismissed as not being relevant estimates of fair value as at June 30, 2007 due to the changed market conditions.

The valuation adjustment at June 30, 2007, was based on an assessment of the estimated fair value of the mortgage portfolio, as opposed to the overall business including origination and servicing platforms.

##### Third Quarter 2007

We closed the home lending origination platform and ceased accepting new loan applications in August 2007, and recorded a pre-tax charge of \$39.6 million for severance (\$25.0 million) and other exit costs (\$14.6 million). The closing of the origination platform reduced annual operating expenses by approximately \$50 million. As explained below, we obtained funding using a significant portion of the home lending assets as collateral in secured financing transactions at the end of the quarter.

Given continued adverse conditions in the U.S. housing market, the residential mortgage market, and the global capital markets, and our expectation that these conditions could persist for an extended period, management determined after extensive analysis of market conditions, portfolio conditions and trends that an orderly run-off of a substantial portion of the Company's home lending receivables portfolio, rather than a sale under market conditions expected for the foreseeable future, would produce a better economic outcome for the Company's shareholders. Accordingly, \$9.7 billion in remaining unpaid principal balance (UPB) of the \$11.1 billion UPB of home lending receivables (excluding repossessed assets) were transferred at the lower of cost or market from assets held for sale to assets held for investment as of September 30, 2007. A third quarter valuation charge of \$465.5 million pretax was recorded to reduce the portfolio to lower of cost or market value, on a loan by loan basis, prior to transfer to held for investment. The accumulated valuation allowance as of September 30, 2007 reflected a discount of approximately 9.7% to the \$11.1 billion of UPB, excluding repossessed assets. The portion of the accumulated valuation allowance related to loans transferred from held for sale to held for investment at September 30 is accounted for as a discount for periods after September 30, 2007.

In determining estimated fair value at September 30, 2007, management stratified the home lending portfolio into nine pools of loans with common characteristics that we believed to be consistent with how a market participant would evaluate the value of the portfolio.

- Six pools, comprising \$7.5 billion of the \$9.7 billion were transferred to held for investment at September 30, 2007. For three of these pools, estimated fair values were based upon observable sales of portfolios of similar assets by two financial institutions in September 2007. These three pools were primarily comprised of first lien conforming and non-conforming fixed and floating rate mortgage loans. These two market transactions were the only relevant transactions that we were able to identify. Based on our experience in the market, we identified 12 relevant loan characteristics that we believed were typically used by market participants to compare and adjust prices between comparable mortgage portfolios. These characteristics included, but were not limited to weighted average coupon, loan-to-value

ratio, FICO score, lien position (second vs. first), percentage of portfolio comprised of adjustable rate mortgages and proportion of full documentation loans. We used pricing sheets to calculate adjustments to observable sale prices of the two portfolios of similar assets sold by other financial institutions (purchase price adjustments) based on similarities and differences between the 12 component characteristics of the CIT portfolios and each of the portfolios sold by the two financial institutions. We had previously used similar pricing sheets in our own actual market transactions. These pools are labeled pools 1, 2, and 5 in the tabular summary of held for investment balances at December 31, 2007 that follows.

- Despite extensive research, including consulting with several major market participants, we were unable to obtain observable relevant market transactions during the third quarter of 2007 for the other three pools of assets transferred to held for investment, comprising \$2.2 billion at September 30, 2007. These pools include home equity lines of credit (HELOC), re-performing first lien mortgage loans and second lien loans. Based on our judgment regarding market practices, we developed estimates of fair value utilizing discounted cash flow analyses for each of the pools by applying assumptions that we believe market participants would have utilized. We assumed a weighted average lifetime loss assumption of approximately 16% (with an underlying range among the pools of 11% to 30%) and a weighted average discount rate of approximately 13.5% (with an underlying range among the pools of 12.75% to 15%). These pools are labeled pools 3, 4 and 6 in the tabular summary of held for investment balances at December 31, 2007 that follows.
- For the three pools (two pools of manufactured housing loans and the pool of non-performing and delinquent loans sold in the fourth quarter) comprising the portfolio classified as held for sale at September 30, 2007 (UPB of approximately \$1.4 billion), we based the valuation upon multiple third party bids that resulted from our marketing efforts with respect to these portfolios. These bid terms and conditions did not include provisions for credit recourse or seller financing.

See *Critical Accounting Estimates* for additional discussion of the fair value determination and the related sensitivities for changes in assumptions underlying discounted cash flow modeling.

Consistent with management's determination to hold certain assets for the foreseeable future, in the third quarter, we segregated \$7.2 billion UPB of the \$9.7 billion portfolio in a bankruptcy-remote vehicle and issued \$5.2 billion of securities as on-balance sheet, non-recourse secured financings. These financing transactions, which management viewed as an attractive alternative to sales in the then current market, encumbered the assets for their remaining lives, as the terms of the securitizations do not permit the Company to withdraw assets from the securitization vehicles or to substitute comparable assets. The \$7.2 billion of loans collateralizing the securitizations were predominantly first liens, less seasoned than other loans in our portfolio and at the high end of our average portfolio FICO score range. The majority of the remaining \$2.5 billion portfolio transferred to held for investment at September 30, 2007 was comprised of re-performing first liens, which had either been delinquent or modified at some point in the account history, and home equity lines of credit. Management has both the ability and intent to hold over their remaining lives the entire \$9.7 billion of home lending assets transferred to held for investment and to liquidate them in accordance with their contractual terms. The Company has ceased its sales analysis and activities with respect to these assets.

The securities in the on-balance sheet financing (securitization) transactions described above were structured into separate credit tranches and rated AAA through BBB-. The \$5.2 billion private placement of securities sold to investors was comprised entirely of the AAA components of the structure. While we are not currently offering the remaining securities for sale, we could sell the lower-rated securities (AA+ to BBB-) if conditions were to become economically attractive. There are no conditions that need to be satisfied in order for us to execute such sales.

The following table summarizes the UPB of the Home Lending portfolio by pool of loans at September 30 and December 31, 2007 (\$ in millions).

Pool	September	December	Fair Value Methodology — September Valuation
1 Securitization pool - conforming loans	\$6,154	\$6,061	<sup>(3)</sup> Observable market transactions
2 Securitization pool - non-conforming	1,088	915	<sup>(3)</sup> Observable market transactions
3 Re-performing first liens <sup>(1)</sup>	1,272	1,226	Discounted cash flow model
4 HELOCs <sup>(2)</sup>	532	478	Discounted cash flow model
5 Other securitization eligible loans	256	210	Observable market transactions
6 Second liens, other	386	281	Discounted cash flow model
Total held for investment portfolio	<u>\$9,688</u>	<u>\$9,171</u>	

<sup>(1)</sup> Re-performing first liens were either delinquent or modified at some point in the account history.

<sup>(2)</sup> Home equity lines of credit.

<sup>(3)</sup> At December 31, 2007, CIT retains \$2.3 billion securities backed by loans in Pool 1 and 2, of which \$1.6 billion are investment grade. Balances include loans pledged as collateral on the \$4.8 billion AAA-rated non-recourse debt outstanding.

#### Fourth Quarter 2007

In October, management sold approximately \$870 million UPB of non-performing and delinquent loans (classified in assets held for sale at September 30, 2007) at a price approximately \$20 million below the September 30, 2007 carrying value, and recognized a fourth quarter loss on sale.

The bids for the remaining assets held for sale that we utilized in the third quarter valuation did not materialize due to the prospective buyers' inability to obtain financing. Therefore, we are continuing to market the \$488 million UPB of manufactured housing assets remaining in assets held for sale at December 31, 2007. The estimated fair value for these two pools was determined using discounted cash flow analyses, as we did not consider the third quarter bids to be relevant estimated fair value data points at December 31, 2007. Cash flows, determined based on projections of lifetime losses, were discounted at rates that we believed reflected the potential volatility in the projected cash flows that would have been considered by market participants. As a result, an additional valuation allowance of \$18 million, or 3.7% of UPB, was recorded in the fourth quarter to reduce carrying value to esti-

mated fair value as of December 31, 2007, bringing the cumulative valuation allowance charge to \$1,248.9 million for the year ended December 31, 2007.

In addition to the valuation allowance charges described above, we recorded a \$250.0 million provision for credit losses during the quarter ended December 31, 2007 related to the mortgage loans held for investment. The fourth quarter provision related primarily to the loans securitized in the third quarter. These loans were comprised predominantly of first liens, were less seasoned and at the higher end of the average FICO score range, and as a result, had the lowest percentage of discount to UPB of the six pools. Adverse credit trends in this portfolio during the quarter, reflecting portfolio seasoning, coupled with severity of loss assumptions arising principally from further deterioration in the home lending market during the quarter, were the primary drivers of the provision charge.

The following table summarizes the balances for, and activity in various components of, home lending loans held for sale, held for investment, and repossessed assets from June 30, 2007 (date of classification as held for sale) through December 31, 2007.

(\$ in millions)

	Held for Investment		Held for Sale		Repossessed Assets

<sup>(1)</sup> Respective amounts at repossession date and transferred to other assets.

#### Accounting Conventions at December 31, 2007

The accounting for loans transferred to held for investment from assets held for sale has a number of key revenue recognition aspects that will impact prospective reported results for the home lending portfolio. Key elements of this accounting follow.

- As described above, the loans transferred to held for investment from held for sale were valued at the lower of cost or market (LOCOM) at the September 30, 2007 transfer date.
- While in held for investment, the loans will not be subject to LOCOM accounting.
- Under held for investment accounting, the difference between the carrying value at LOCOM and UPB is reflected

as loan discount, a reduction of the carrying value of the corresponding loans.

- The valuation allowance for each pool at the transfer date was allocated on a loan-by-loan basis to loans within each pool, based upon an assessment of underlying loan characteristics, including, but not limited to, interest rate reset characteristics (fixed versus variable rate), lien position, and estimated inherent loss.
- Subsequent to transfer, the discount on performing loans is being accreted into earnings as an increase to finance revenue over the contractual life of the assets using the interest (level yield) method.

- Consistent with our historic accounting policies, discount accretion and income accrual is suspended on non-performing accounts when they become 90 days or more delinquent.
- Any unamortized discount is recognized in the period of prepayment.
- An allowance for credit losses is evaluated on a loan pool basis and is recognized to the extent estimated inherent losses exceed corresponding remaining unamortized discount at any balance sheet date, in accordance with FAS 5 and SAB 102.
- Charge-offs are recognized to the extent net individual loan carrying value, including any remaining unaccreted discount, exceeds the corresponding expected future cash flows for that loan, and are recorded no later than 180 days past due.

As a result of the accounting requirements described above, finance revenue is expected to reflect a slightly increased yield due to discount accretion, while the allowance for credit losses will reflect ongoing estimates of inherent losses in the portfolio, based on then existing portfolio characteristics, loan

performance and other relevant credit factors. The allowance for credit losses will also be impacted by losses that exceed the unamortized discount on such loans. Future earnings trends will continue to reflect changes in the credit dynamics of the portfolio, including trends in default rates, price trends in the residential home market, our success in restructuring certain loans and the effectiveness of our collection operations. We currently expect that home lending credit losses will peak during 2008, and that quarterly credit loss provisions will be required in 2008, though at reduced levels from the fourth quarter 2007 amount.

The home lending assets were previously funded with unsecured long-term debt. As a result of the recent on-balance sheet secured financing transactions, which provided \$5.2 billion in funds, we were able to source additional liquidity using the home lending assets as collateral. In addition, principal collections relating to loans not securitized in the above-mentioned secured financing transactions will provide a source of future liquidity.

The following table presents selected portfolio information as of December 31, 2007.

**Managed Home Lending Portfolio Statistics (\$ in millions)**

		December 31, 2007
Held for Investment Portfolio		
Owned assets (UPB, including assets collateralizing 2007 third quarter secured financings)		\$9,171

Texas	683	5.68%
Illinois	523	12.70%

<sup>(1)</sup> Excludes loans that were granted based on income and other credit parameters that were subject to low documentation or no documentation.

The above table includes portfolio statistics for the home mortgage held for investment portfolio and home mortgage assets previously securitized, but excludes approximately

\$488 million (UPB) of manufactured housing assets held for sale and \$187 million (managed UPB) of sales financing assets included in the Home Lending segment.

## REVENUE

Revenue (dollars in millions)

The trend in our total net revenues in the three-year period from 2005-2007 reflects both asset growth and our focus on other income generation. Net finance revenue has increased over this period, however, rising interest rates have reduced our margins. Other income accounted for 44% of net revenue

in 2007, up from 41% in 2006 and 2005, as the gains on the sales of our DFS joint venture interest, combined with the construction and systems leasing portfolio sale gains, drove the 2007 increase. Absent these sale gains, the 2007 ratio was 35%, reflecting reduced syndication and receivable sale activity, particularly in the second half of 2007.

## NET FINANCE REVENUE

Net Finance Revenue for the years ended December 31 (dollars in millions)

	2007	2006	2005
Finance income - loans and capital leases	\$ 5,031.6	\$ 3,973.3	\$ 3,018.7
Rental income on operating leases	1,993.3	1,720.6	1,496.5
Finance revenue	7,024.9	5,693.9	4,515.2
Less:			
Interest expense	3,832.3	2,867.8	1,912.0
Depreciation on operating lease equipment	1,172.3	1,023.5	968.0
Net finance revenue	\$ 2,020.3	\$ 1,802.6	\$ 1,635.2
Average Earnings Asset ("AEA")	\$71,101.1	\$58,003.3	\$48,128.2
<b>As a % of AEA:</b>			
Finance income - loans and capital leases	7.08%	6.85%	6.27%
Rental income on operating leases	2.80%	2.96%	3.11%
Finance revenue	9.88%	9.81%	9.38%
Less:			
Interest expense	5.39%	4.94%	3.97%
Depreciation on operating lease equipment	1.65%	1.76%	2.01%
Net finance revenue	2.84%	3.11%	3.40%
<b>As a % of AEA by segment:</b>			
Corporate Finance	3.12%	3.19%	3.17%
Transportation Finance	2.81%	2.60%	2.30%
Trade Finance	5.79%	6.01%	5.47%
Vendor Finance	4.70%	5.68%	5.64%
Commercial Segments	3.59%	3.76%	3.74%
Home Lending	1.97%	2.11%	2.40%
Consumer	1.18%	1.51%	1.65%
Consolidated Net finance revenue	2.84%	3.11%	3.40%
<b>As a % of AOL:</b>			
Rental income on operating leases	16.92%	16.45%	17.03%
Depreciation on operating lease equipment	9.95%	9.79%	11.02%
Net operating lease revenue	6.97%	6.66%	6.01%
Average Operating Lease Equipment ("AOL")	\$11,784.0	\$10,458.8	\$ 8,788.5

Net finance revenue increased 12% and 10% from the prior year in 2007 and 2006, due to corresponding increases of 23% and 21% in average earning assets. Net finance revenue, as a percentage of average earning assets, declined from the prior year in both 2007 and 2006, as increased funding costs in both

years outpaced revenue increases. From a segment perspective, Net finance revenue percentages were relatively stable over the three-year period in the commercial businesses, except for the Vendor Finance margin, which reflected the impact of 2007 acquisitions.

The year over year variances in the net finance revenue percentages are summarized in the table below:

**Years ended December 31**

	<b>2007</b>	<b>2006</b>
Net finance revenue - prior year	3.11%	3.40%
Treasury gap (including asset / liability mix, changes in liquidity position)	(0.13%)	(0.08%)
Yield-related fees	(0.09%)	(0.06%)
Asset mix changes, including student lending	(0.03%)	(0.10%)
Other factors	(0.02%)	(0.05%)
Net finance revenue - current year	<u>2.84%</u>	<u>3.11%</u>

The increased treasury gap drag on net finance revenue reflects the disrupted capital market conditions in the second half of 2007 and our decision to maintain excess cash balances and liquidity. As described in *Capitalization* and the *Liquidity* section of *Risk*

*Management*, during the second half of 2007, commercial paper balances were significantly lower, as we relied more heavily on secured financing sources and issued a number of higher-cost funding instruments. We expect this downward pressure on net finance income as a percentage of AEA to continue into 2008, as the full impact of the capital markets disruption and the higher-cost funding sources is reflected in our margins.

The increase from the prior year in net operating lease revenue as a percentage of average operating lease assets reflected the continuation of strong rental rates in aerospace. All of our commercial aircraft are under contract at December 31, 2007. All of our 2008 order book, and all but one aircraft in our 2009 delivery order book have been placed. Rail rates remain stable, though utilization has softened modestly for cars used for residential construction, consistent with the slowing housing market in 2007. See “*Concentrations – Operating Leases*” for additional information regarding operating lease assets.

## CREDIT METRICS

Overall, commercial credit metrics remained strong in 2007, although weakened from very favorable prior period levels. Excluding home lending and consumer, net charges-offs

increased \$7 million, but were down 2 basis points as a percentage of average finance receivables.

**Past Due Loans (60 days or more) as of December 31** (dollars in millions, % as a percentage of finance receivables)

	2007		2006		2005	
<b>Owned Past Dues:</b>						
Corporate Finance	\$ 194.8	0.91%	\$ 152.6	0.76%	\$131.8	0.89%
Transportation Finance	9.8	0.39%	15.3	0.72%	17.0	0.90%
Trade Finance	71.1	0.97%	101.8	1.46%	39.3	0.59%

Home Lending	962.1	9.91%	470.1	4.77%	220.7	2.62%
Consumer	600.8	4.93%	407.9	4.52%	135.5	2.53%
Total	<u>\$2,174.6</u>	3.43%	<u>\$1,321.9</u>	2.40%	<u>\$758.2</u>	1.71%
<b>Managed Past Dues:</b>						
Corporate Finance	\$ 201.8	0.86%	\$ 162.1	0.72%	\$150.5	0.85%
Transportation Finance	9.8	0.39%	15.3	0.69%	17.0	0.83%
Trade Finance	71.1	0.97%	101.8	1.46%	39.3	0.59%
Vendor Finance	520.7	3.49%	301.9	2.68%	302.9	2.65%
Commercial Segments	803.4	1.68%	581.1	1.23%	509.7	1.34%
Home Lending	1,031.3	9.92%	538.8	4.92%	320.2	3.31%
Consumer	600.8	4.88%	407.9	4.36%	135.5	2.42%
Total	<u>\$2,435.5</u>	3.42%	<u>\$1,527.8</u>	2.42%	<u>\$965.4</u>	1.81%

Corporate Finance delinquency metrics trended up during the year primarily due to delinquency increases in the small business lending unit.

Transportation Finance delinquencies continued a downward trend reflecting strength in the aerospace and rail industries.

Trade Finance delinquency declined from the high 2006 level, which include a few high dollar accounts.

The Vendor Finance increase in delinquency in 2007 was driven primarily by higher delinquencies in U.S. operations including the impact of the integration and consolidation of leasing platforms in connection with an acquisition. The decrease in 2006 reflected lower delinquency levels in the international portfolios.

Consumer delinquency increased in 2007 driven by Student Lending. Delinquencies on student loans for which there is a 97% government guarantee totaled \$569.1 million (5.23%) and

\$399.0 million (4.88%) at December 31, 2007 and 2006. Higher delinquency in this component of our student loan portfolio is not indicative of potential loss due to the underlying U.S. government guarantee on the majority of the loan balance. Delinquencies on non-government guaranteed private loans totaled \$12.7 million (2.03%) and \$1.1 million (0.35%) at December 31, 2007 and 2006. Approximately \$445 million (75%) of the private loan portfolio is not yet in repayment status, which begins upon graduation, or when students no longer attend the school. As more loans enter repayment status, it is possible that we will experience increasing delinquencies in this portfolio.

Home Lending metrics are based on a percentage of unpaid principal balance. Home Lending delinquencies rose sharply, reflecting the effects of softer real estate and mortgage market conditions. See *Profitability and Key Business Trends* for additional information on Home Lending.

**Non-performing Assets as of December 31** (dollars in millions, % as a percentage of finance receivables)

	2007		2006		2005	
<b>Non-performing assets:</b>						
Corporate Finance	\$ 242.2	1.14%	\$196.7	0.97%	\$208.5	1.40%
Transportation Finance	3.3	0.13%	7.9	0.37%	22.3	1.18%
Trade Finance	41.6	0.57%	60.4	0.87%	5.3	0.08%
Vendor Finance	190.6	1.84%	51.4	0.75%	71.1	1.01%
Commercial Segments	477.7	1.15%	316.4	0.87%	307.2	1.01%
Home Lending	892.3	9.19%	451.1	4.57%	213.0	2.53%
Consumer	8.5	0.07%	3.0	0.03%	1.0	0.02%
Total	<u>\$1,378.5</u>	2.17%	<u>\$770.5</u>	1.40%	<u>\$521.2</u>	1.18%
Non accrual loans	\$1,162.7	1.83%	\$662.0	1.20%	\$460.7	1.04%
Reposessed assets	215.8	0.34%	108.5	0.20%	60.5	0.14%
Total non-performing assets	<u>\$1,378.5</u>	2.17%	<u>\$770.5</u>	1.40%	<u>\$521.2</u>	1.18%

The non-performing asset trends follow those of the delinquencies. Non-performing balances, such as in Corporate Finance, may exceed the delinquency balance as loans deemed impaired will stop accruing income even though con-

tractually not past due. Repossessed assets, which are carried at the lower of book value or estimated fair value, increased primarily related to Home Lending.

## RESERVE AND PROVISION FOR CREDIT LOSSES

Reserve and Provision for Credit Losses for the years ended December 31 (dollars in millions)

	2007	2006	2005
Balance beginning of period	\$659.3	\$621.7	\$617.2
Provision for credit losses – finance receivables (by segment)			
Corporate Finance	68.9	48.8	49.4
Transportation Finance	(32.0)	2.2	4.5
Trade Finance	33.4	38.0	25.2
Vendor Finance	52.1	45.4	47.2
Home Lending	352.1	62.4	51.7
Consumer	55.4	16.1	9.8
Corporate and Other, including specific reserving actions	63.9	9.3	29.2
Total provision for credit losses	593.8	222.2	217.0
Reserves applied to receivables transferred to held for sale	(227.8)	–	–
Reserves relating to acquisitions, other	69.2	40.4	38.6
Additions to reserve for credit losses, net	435.2	262.6	255.6
Net charge-offs (recoveries)			
Corporate Finance	69.6	37.6	48.7
Transportation Finance	(32.3)	1.4	53.5
Trade Finance	31.6	37.4	22.9
Vendor Finance	58.0	43.1	49.0
Home Lending	83.0	91.7	67.9
Consumer	53.1	13.8	9.1
Total net charge-offs	263.0	225.0	251.1
Balance end of period	\$831.5	\$659.3	\$621.7
Reserve for credit losses as a percentage of finance receivables	1.33%	1.20%	1.40%
Reserve for credit losses excluding specific reserves, as a percentage of finance receivables, excluding guaranteed student loans and home lending	1.22%	1.19%	1.24%
Reserve for credit losses as a percentage of non-performing assets, excluding guaranteed student loans and home lending	121.1%	154.3%	158.5%

We present the metrics both including and excluding guaranteed student loans as these are currently covered by U.S. government guarantees for approximately 97% of the balance, and the Home Lending due to the valuation allowance and current status as a liquidating portfolio.

The reserve for credit losses increased in amount in both 2007 and 2006 primarily reflecting higher inherent losses among Home Lending receivables and general portfolio growth. The reserve percentage excluding guaranteed student loans, Home Lending and specific reserves related to impaired loans is up slightly from last year, reflecting some weakening trends in credit metrics in the form of higher net charge-offs and higher delinquency and non-performing asset levels.

The reserve for credit losses includes three key components: (1) specific reserves for loans that are impaired under SFAS 114, (2) reserves for estimated losses inherent in the portfolio based upon historical and projected charge-offs, and (3) reserves for inherent estimated losses in the portfolio based

upon economic risks, industry and geographic concentrations and other factors. Specific reserves related to impaired loans totaled \$52.1 million, \$53.4 million and \$76.5 million at December 31, 2007, 2006 and 2005. The specific reserves primarily relate to SFAS 114 impaired accounts within our Corporate Finance and Trade Finance businesses. The reserve for credit losses at December 31, 2007, 2006 and 2005 includes approximately \$250 million, \$168 million, and \$137 million for home lending and manufactured housing.

The consolidated reserve for credit losses is intended to provide for losses inherent in the portfolio. We estimate the ultimate outcome of collection efforts and realization of collateral values, among other things. We may make additions or reductions to the consolidated reserve for credit losses depending on changes in economic conditions or credit metrics, including past due and non-performing accounts, or other events affecting specific obligors or industries. We continue to believe that the credit risk characteristics of the portfolio are well diversified by geography,

industry, borrower, and collateral type. The portion of the reserve related to inherent estimated loss and estimation risk reflects our evaluation of trends in our key credit metrics, as well as our assessment of risk in specific industry sectors.

Based on currently available information and our portfolio assessment, we believe that our total reserve for credit losses is adequate.

#### Net Charge-offs (charge-offs net of recoveries) for the years ended December 31

(dollars in millions, % as a percentage of average finance receivables for Owned and average managed finance receivables for Managed)

	2007		2006		2005	
Owned						
Corporate Finance	\$ 69.6	0.34%	\$ 37.6	0.22%	\$ 48.6	0.35%
Transportation Finance	(32.3)	(1.39%)	1.4	0.08%	53.5	2.34%
Trade Finance	31.6	0.44%	37.4	0.55%	22.9	0.34%
Vendor Finance	58.0	0.57%	43.1	0.60%	49.0	0.66%
Commercial Segments	126.9	0.32%	119.5	0.36%	174.0	0.57%
Home Lending	83.0	1.06%	91.7	0.98%	67.9	1.07%
Consumer	53.1	0.49%	13.8	0.19%	9.1	0.22%
Total	<u>\$263.0</u>	0.45%	<u>\$225.0</u>	0.45%	<u>\$251.0</u>	0.60%
Managed						
Corporate Finance	\$ 78.5	0.36%	\$ 47.9	0.25%	\$ 66.1	0.40%
Transportation Finance	(32.3)	(1.39%)	1.4	0.08%	53.5	2.34%
Trade Finance	31.6	0.44%	37.4	0.55%	22.9	0.34%
Vendor Finance	80.5	0.57%	57.3	0.53%	63.7	0.59%
Commercial Segments	158.3	0.35%	144.0	0.37%	206.2	0.55%
Home Lending	110.2	1.29%	128.6	1.24%	119.2	1.55%
Consumer	53.1	0.49%	13.8	0.19%	9.1	0.22%
Total	<u>\$321.6</u>	0.50%	<u>\$286.4</u>	0.50%	<u>\$334.5</u>	0.68%

Corporate Finance net charge-offs were up in 2007 due to higher charge-offs on equipment leasing and lower levels of recoveries.

Transportation Finance benefited from an improving aerospace industry in 2007 and 2006, as reflected by large recoveries in 2007 and few charge-offs during 2006.

Net charge-offs in Trade Finance decreased to more normalized levels during 2007 after a run-up in 2006.

Although up in amount from 2006, net charge-offs in Vendor Finance as a percentage of average finance receivables improved from the prior periods in both 2007 and 2006. The increase in amount during 2007 reflected higher international charge-offs.

Home Lending charge-offs were down in 2007 from 2006 as the balance above does not reflect charge-offs that were recorded during the period the portfolio was held for sale during the third quarter. Charge-offs during this period were

instead taken against the valuation allowances. See "Profitability and Key Business Trends" for more detail relating to Home Lending.

Charge-offs in Consumer increased due to higher losses on unsecured consumer loans held in the Utah bank.

Net charge-offs on securitized assets were stable during 2007. As a percentage of average securitized assets, securitized portfolio net charge-offs were 0.97%, 0.93% and 1.38% in 2007, 2006 and 2005.

We currently expect the following: (1) commercial net charge-offs to increase in 2008 from the low 2007 levels, driven in part by lower recoveries; (2) higher losses from all types of consumer receivables, including private student loans, unsecured loans and Home Lending; (3) Home Lending losses to continue at high levels, and quarterly provisioning may be required, but not at the 2007 fourth quarter level.

## NET FINANCE REVENUE, AFTER PROVISION FOR CREDIT LOSSES

Net Finance Revenue after Provision for Credit Losses for the years ended December 31 (dollars in millions)

	2007	2006	2005
Net finance revenue after depreciation on operating lease equipment	\$ 2,020.3	\$ 1,802.6	\$ 1,635.2
Provision for credit losses	593.8	222.2	217.0
Finance revenue, net of interest expense, depreciation, and credit provision	<u>\$ 1,426.5</u>	<u>\$ 1,580.4</u>	<u>\$ 1,418.2</u>
<b>As a % of AEA:</b>			
Net finance revenue after depreciation on operating lease equipment	2.84%	3.11%	3.40%
Provision for credit losses	0.83%	0.38%	0.45%
Finance revenue, net of interest expense, depreciation, and credit provision	<u>2.01%</u>	<u>2.73%</u>	<u>2.95%</u>
Average Earnings Asset ("AEA")	<u>\$71,101.1</u>	<u>\$58,003.3</u>	<u>\$48,128.2</u>

The 2007 decline in finance revenue, net of the provision for credit losses resulted primarily from increased charge-offs in the Consumer segment and the fourth quarter 2007 home

lending provision charge and to a lesser extent, from compressed margins.

## NET FINANCE REVENUE, AFTER CREDIT PROVISION AND VALUATION ALLOWANCE

Total net revenue, after credit provision and valuation allowances was \$155.1 million in 2007, down from \$1,565.4 million and \$1,418.2 million in 2006 and 2005. The \$1,248.9 million in valuation adjustments on home lending

receivables (to reduce receivables held for sale to lower of cost or market) drove the 2007 decline.

See *Profitability and Key Business Trends* for additional information.

## OTHER INCOME

Other Income for the years ended December 31 (dollars in millions)

	2007	2006	2005
Fees and other income	\$ 527.2	\$ 547.3	\$ 489.6
Factoring commissions	226.6	233.4	235.7
Gains on receivable sales and syndication fees	180.7	298.3	163.3
Gains on sales of leasing equipment	117.1	122.8	91.9
Gains on securitizations	45.3	47.0	39.1
Sub total	1,096.9	1,248.8	1,019.6
Gain on sale of Dell Financial Services joint venture	247.1	–	–
Gains on portfolio and asset dispositions	236.1	–	181.3
Gain on derivatives	–	–	43.1
Total other income	<u>\$1,580.1</u>	<u>\$1,248.8</u>	<u>\$1,244.0</u>

We continue to emphasize growth and diversification of other income to improve our overall profitability, though the disruption to the capital markets in the second half of 2007 resulted in reduced loan sale gains and syndication fees. Total other income was increased by strategic asset sales in both 2007 and 2005.

*Fees and other income* are comprised of asset management, agent and servicing fees, including securitization-related serv-

icing fees and accretion, advisory and agent fees, as well as income from joint venture operations. The decline from 2006 reflected increased securitization impairment charges, lower joint venture earnings and reduced structuring fees, offset in part by higher advisory fees. The 2006 amount also benefited from a \$16.4 million commercial aircraft insurance recovery.

*Gains on receivable sales and syndication fees* dropped 40% from a very strong 2006, reflecting the challenging syndication

markets in the latter part of 2007. In addition to a 30% decline in Corporate Finance, the consolidated sale and syndication income trend reflected a considerable reduction in home lending and student lending assets sales from prior periods.

*Factoring commissions* were down 3% and 1% in 2007 and 2006 as an increase in volume was more than offset by lower commission rates, reflecting favorable lending environment to customers.

*Gains on sales of leasing equipment* decreased 4% in 2007, as a decline in end of lease activity in both the U.S. and International businesses in Vendor Finance was offset by strong equipment sale gains in the Transportation Finance rail business.

*Gains on securitization* decreased 4% in 2007 after having increased 20% in 2006. Gains as a percentage of volume securitized were 1.1%, 1.3% and 0.9% in 2007, 2006 and 2005 (on volume of \$4.2 billion, \$3.6 billion and \$4.3 billion).

*Gain on sale of Dell Financial Services joint venture* of \$247.1 million resulted from the 2007 sale of the Company's 30% ownership interest in DFS. The sale was the result of Dell exercising their right to buy CIT's interest. See *Concentrations* for additional information.

*Gain on portfolio dispositions* resulted from the 2007 sales of the U.S. Construction business at a gain of \$240.1 and the sale of our U.S. Systems Leasing portfolio at a gain of \$21.0, offset by a loss on the sale of home lending assets classified as available for sale at September 30, 2007. The 2005 amount included the gains from the sale of a New York City apartment complex and the sale of a micro-ticket leasing business.

*Gain on derivatives* relate to the 2005 mark-to-market of certain compound cross-currency swaps that did not qualify for hedge accounting treatment. All of these swaps were either terminated or had matured as of December 31, 2005.

## SALARIES AND GENERAL OPERATING EXPENSES PROVISION FOR SEVERANCE AND REAL ESTATE EXIT ACTIVITIES

Salaries and General Operating Expenses for the years ended December 31 (dollars in millions)

	2007	2006	2005
Salaries and employee benefits	\$ 892.5	\$ 903.5	\$ 695.8
Other general operating expenses	586.2	479.1	418.0
Salaries and general operating expenses	<u>\$1,478.7</u>	<u>\$1,382.6</u>	<u>\$1,113.8</u>
Provision for severance and real estate exit activities	<u>\$ 76.8</u>	<u>\$ 19.6</u>	<u>\$ 25.2</u>
Efficiency ratio <sup>(1)</sup>	41.1%	45.3%	38.7%
Headcount	6,700	7,345	6,340

<sup>(1)</sup> The efficiency ratio is the ratio of salaries and general operating expenses to total net revenues (before provision for credit losses and valuation allowance). The efficiency ratio was 47.9% excluding gains on portfolio dispositions and the gain on sale of our Dell Financial Services joint venture interest.

We concentrated on expanding the sales force to grow the business during 2006 and 2005. In 2007, we shifted our focus to divesting and exiting some businesses. This will allow us to focus on our core businesses in 2008. These initiatives increased the provision for severance and real estate exit activities. The reduction in salaries and employee benefits in 2007 was driven by lower incentive compensation, corresponding to the reduced earnings in 2007, and lower headcount. The 2007 increase in other general operating expenses included a \$16 million write off of capitalized expenses related to a terminated capital initiative in our commercial aerospace business due to market conditions, higher legal expenses, and integration costs associated with two significant acquisitions within Vendor Finance. In 2006 the increased expenses primarily related to personnel, as we added over 1,000 employees during 2006. The majority of the hires related to growing our sales force in existing lines and establishing new businesses,

such as mergers and acquisitions advisory services, as well as growth of our international operations.

The 2007 provision for severance and real estate exit activities resulted from the combination of cost savings actions related to a reduction in force of 330 people in the second quarter and the closing of the home lending origination platform in the third quarter, involving 550 employees and the closing of 27 offices. These 2007 actions are expected to generate annual savings of approximately \$67 million. We continued these cost savings initiatives in the first quarter of 2008, including streamlining of back office functions, with a reduction in force of approximately 470 people. This action will result in a restructuring charge of approximately \$50 million in 2008, with expected annual savings of approximately \$60 million.

See Note 24 – Severance and Facility Restructuring Reserves for additional information.

## IMPAIRMENT OF GOODWILL AND INTANGIBLE ASSETS

During the third quarter of 2007, legislation was passed with respect to the student lending business. Among other things, the legislation reduced the maximum interest rates that can be charged by lenders in connection with a variety of loan products, increased loan origination fees paid to the government by lenders, and reduced the lender guarantee percentage. The legislation went into effect for all new FFELP student loans with first disbursements on or after October 1, 2007. The reduced guarantee percentage, from 97% to 95%, will be in effect for loans originated after October 1, 2012. As a result, in the third quarter, management assessed the value of goodwill and intangible assets associated with the student lending business following the passage of the legislation. Based on management's assessment of the legislation's potential impact on earnings levels for new loan originations, factoring in expected ensuing business practices and leverage, coupled with assumptions and projected cash flows of the

existing business, management concluded that the goodwill and intangibles assets related to the student lending business were not impaired at that time.

During the fourth quarter of 2007, market valuations for student lending businesses declined further, reflecting a failed sale of a significant student lender, the market's continued emerging view of the legislative changes and the general difficult environment for lenders in this sector, including higher funding costs and credit deterioration in the industry. As a result, management performed an impairment test for the goodwill and intangible assets related to the student lending business as of December 31, 2007. In this analysis, management estimated the fair value of the unit's individual assets and liabilities (primarily loans and debt), and determined that the impairment charge of \$312.7 million, representing the entire goodwill and intangible asset balance, was required.

## INCOME TAXES

Income Tax Data for the years ended December 31,

	2007	2006	2005
(Benefit) provision for income taxes	\$(194.4)	\$364.4	\$464.2
Tax liability releases / NOL valuation adjustments	44.7	69.7	34.6
Tax benefit – goodwill and intangible asset impairment charge	10.3	–	–
Tax benefits – home lending losses (net of valuation allowance) and other noteworthy items	446.0	–	–
Provision for income taxes – adjusted	<u>\$ 306.6</u>	<u>\$434.1</u>	<u>\$498.8</u>
Effective tax rate – reported	71.4%	25.8%	32.8%
Effective tax rate – adjusted	24.3%	30.7%	35.2%

CIT's reported 2007 tax provision reflects a tax benefit of \$194.4 million, compared with tax expense of \$364.4 million and \$464.2 million in 2006 and 2005, respectively. In 2007, significant noteworthy items impacted the relationship between recorded tax benefits and pre-tax earnings. Pre-tax losses were \$272.3 million for the year ended December 31, 2007, with a corresponding tax benefit of \$194.4 million, resulting in a reported effective tax rate of 71.4%.

The statutory tax rates (US federal and applicable state tax) applied to the pre-tax losses associated with the significant, noteworthy items (valuation adjustments and credit loss provisions related to the home lending assets, the loss on extinguishment of debt, the gain on sale of CIT's interest in the Dell joint venture, the write-off of capitalized expenses related to a terminated capital raising initiative, and the gains on the sales of portfolios) were higher than the tax rates applied to the Company's other items of ordinary income and expense. The combined tax benefit related to these items amounted to \$446.0 million for the year ended December 31, 2007, as

shown in the preceding table. These effects, along with the lower tax rates and tax benefits associated with our international operations and the tax expense reductions outlined below, are the primary drivers of the significant tax benefit recorded in 2007.

The 2007 income tax benefit included \$44.7 million in net tax expense reductions comprised of the effects of a New York State law change, deferred tax adjustments related to foreign affiliates and the refinement of transfer pricing between various international jurisdictions. These tax benefits were offset by a net increase in liabilities related to uncertain tax positions in accordance with Financial Accounting Standards Board Interpretation No. 48 (FIN 48), "Accounting for Uncertainty in Income Taxes", and an increase to the recorded valuation allowance for state net operating losses and capital loss carryovers anticipated not to be utilized. The 2007 income tax benefit also included a \$10.3 million reduction in tax related to the write-off of the student lending intangible asset. The goodwill impairment was not tax-deductible.

CIT's effective tax rate differs from the U.S. federal tax rate of 35% primarily due to state and local income taxes, foreign earnings taxed at lower rates, and permanent differences between the book and tax treatment of certain items. The lower effective tax rates in 2006 and 2007, excluding the tax liability releases and NOL valuation allowance adjustments, reflects our strategy to relocate and fund certain aerospace assets offshore, favorable tax treatment for certain aircraft leasing operations conducted offshore, coupled with improved international earnings and reduced state and local income taxes.

The 2006 provision for income taxes was reduced by \$69.7 million, primarily due to a \$72.5 million release of deferred income tax liabilities from the relocation and funding of certain aerospace assets to lower tax jurisdictions. The 2006

provision also included a net \$6.8 million reversal of state net operating loss (NOL) valuation allowances (net of state deferred tax write-offs), reflecting management's updated assessment with respect to higher expected loss utilization, and \$9.6 million in additional tax expense, including an amount relating to the enactment of a tax law change during the second quarter of 2006 that reduced benefits relating to certain leveraged lease transactions.

The 2005 provision for income taxes benefited from the release of a \$17.0 million deferred tax liability associated with the offshore aerospace initiative and the release of a tax liability of \$17.6 million relating to our international operations, as we finalized a tax filing position based on a favorable opinion received from the local tax authorities.

See Note 15 for additional information.

## FINANCING AND LEASING ASSETS

Financing and Leasing Assets by Segment as of December 31 (dollars in millions)

				% Change	
	2007	2006	2005	07 vs. 06	06 vs. 05
<b>Corporate Finance</b>					
Finance receivables	\$21,326.2	\$20,190.2	\$14,891.1	5.6%	35.6%

Finance receivables securitized and managed by CIT	680.5	841.7	1,113.7	(19.2)%	(24.4)%
Managed assets	9,801.9	10,943.0	9,665.7	(10.4)%	13.2%
<b>Consumer</b>					
Finance receivables - student lending	11,499.9	8,488.9	5,051.0	35.5%	68.1%
Finance receivables - other	679.9	537.1	302.9	26.6%	77.3%
Financing and leasing assets held for sale	130.1	332.6	254.2	(60.9)%	30.8%
Owned assets	12,309.9	9,358.6	5,608.1	31.5%	66.9%
<b>Other – Equity Investments</b>					
Managed assets	\$83,230.1	\$74,163.2	\$62,866.4	12.2%	18.0%

Managed assets grew by 12% in 2007, reflecting an increase in new business volume and portfolio acquisitions. Most of the growth was on balance sheet, as securitized assets increased modestly. Growth was broad based in all segments with the exception of Home Lending, which ceased originations during the year. We continued our discipline of allocating capital to businesses with higher risk-adjusted returns by liquidating non-strategic portfolios.

See *Non-GAAP Financial Measurements* for reconciliation of managed assets.

## BUSINESS VOLUMES, SALES/SYNDICATIONS, ACQUISITIONS AND DISPOSITIONS

In 2007, we neared our record 2006 level of business volume growth as we continued our strategy to advance our sales culture. The decline from 2006 was the result of our decision to cease home lending originations in the third quarter. New business volume (excluding factoring) was up 7% and 24% from the preceding years in the commercial segments. Excluding the impact of the sold construction finance business, volume in the commercial segments was up 11% from 2006.

### Total Business Volume (excluding factoring)

For the years ended December 31 (dollars in millions)

	2007	2006	2005
Corporate Finance	\$15,974.7	\$15,464.2	\$ 9,626.8
Transportation Finance	3,060.4	3,137.2	2,264.1
Vendor Finance	9,733.5	8,202.0	9,706.5
Commercial Segments	28,768.6	26,803.4	21,597.4
Home Lending	4,192.4	7,629.8	6,927.1
Consumer	6,630.2	6,883.3	2,726.0
Total new business volume	<u>\$39,591.2</u>	<u>\$41,316.5</u>	<u>\$31,250.5</u>

### Syndications and Receivable Sales

For the years ended December 31 (dollars in millions)

	2007	2006	2005
Corporate Finance	\$5,111.2	\$ 4,728.0	\$1,563.0
Transportation Finance	454.6	310.0	199.0
Vendor Finance	566.9	735.0	296.0
Commercial Segments	6,132.7	5,773.0	2,058.0
Home Lending	610.3	3,124.0	2,256.0
Consumer	2,027.5	1,896.0	1,105.0
Total	<u>\$8,770.5</u>	<u>\$10,793.0</u>	<u>\$5,419.0</u>

As part of a strategic initiative to leverage origination platforms and broaden our revenue generation, we increased our sales and syndication activities during the first half of 2007

and 2006. Due to market liquidity constraints, sales and syndication activities were sharply reduced during the second half of 2007.

## ACQUISITIONS

Acquisition Summary (dollars in millions)

Asset Type	Financing and Leasing Assets	Closing	Segment
Barclays — U.K. and German vendor finance businesses	\$2.0 billion	1st quarter 2007	Vendor Finance
Citicapital — U.S. business technology finance unit	\$2.0 billion	2nd quarter 2007	Vendor Finance
Edgeview Partners M&A Advisory	–	3rd quarter 2007	Corporate Finance

With the exception of the Edgeview M&A acquisition, these acquisitions were add-ons to existing CIT businesses and the existing assets at the acquisition date are not reflected in our new business volume in the year of acquisition. The first quarter Vendor Finance acquisition significantly leveraged our existing expertise in managing vendor relationships across Europe. The businesses acquired provide asset finance to customers of industrial equipment and technology manufacturers and suppliers throughout the United Kingdom and Germany. Approximately 60% of the purchased assets were originated in

the UK, with the balance in Germany. The second quarter acquisition included assets that complemented existing domestic CIT businesses. The acquisition of Edgeview Partners provides additional advisory service capabilities to private-equity firms and middle market companies, which is part of our ongoing initiative to boost revenue from fees and decrease our reliance on interest income.

See Note 23 – *Goodwill and Intangible Assets* for additional information.

## DISPOSITIONS

Disposition Summary (dollars in millions)

Asset Type	Financing and Leasing Assets	Closing	Segment
Construction finance	\$2.6 billion	2nd quarter 2007	Corporate Finance
Home Lending assets	\$0.9 billion	4th quarter 2007	Home Lending
Systems leasing	\$0.7 billion	4th quarter 2007	Vendor Finance
DFS equity	–	4th quarter 2007	Vendor Finance

In addition to normal course sales and syndications in a prior table, we periodically dispose of receivables and other assets that we determine do not meet our risk-adjusted return criteria or do not fit in with our strategic direction, including growth and scale characteristics. This guided the disposition initiatives above, thereby freeing up the corresponding capital for redeployment. We sold our construction business and made the effort to sell much of our manufactured housing and home lending portfolios. The sale of equity is the sale of CIT's 30% interest in its Dell Financial Services joint venture due to Dell's exercise of a purchase option, not a sale of financing assets.

## RESULTS BY BUSINESS SEGMENT

Effective with the third quarter of 2007, and consistent with recent management changes, our segment disclosures reflect the following changes. Prior period data conforms to current period presentation.

- The home lending business is reported as a separate segment.
- The student lending and consumer loan businesses, previously reported in the Consumer and Small Business Lending segment, are reported in the Consumer segment.
- The small business lending unit, previously reported in the former Consumer and Small Business Lending segment, is reported in the Corporate Finance segment.

## Results by Business Segment for the years ended December 31 (dollars in millions)

	2007	2006	2005
<b>Net Income / (Loss)</b>			
Corporate Finance	\$ 453.0	\$ 284.3	\$266.5
Transportation Finance	271.1	259.8	116.3
Trade Finance	164.0	162.2	173.5
Vendor Finance	410.1	275.8	289.8
Commercial Segments	1,298.2	982.1	846.1
Home Lending	(989.2)	41.2	(15.7)
Consumer	(274.9)	41.8	46.4
Corporate & Other	(145.1)	(49.3)	59.6
Total	<u>\$ (111.0)</u>	<u>\$1,015.8</u>	<u>\$936.4</u>
<b>Return on Equity</b>			
Corporate Finance	18.3%	13.6%	14.6%
Transportation Finance	16.3%	18.4%	9.2%
Trade Finance	17.8%	18.3%	19.8%
Vendor Finance	23.6%	27.0%	26.7%
Commercial Segments	19.1%	18.2%	16.7%
Home Lending	(52.3%)	5.4%	(2.6%)
Consumer	(171.8%)	9.1%	11.7%
Corporate & Other	(2.1%)	(1.2%)	0.6%
Total	(1.6%)	15.0%	15.1%

Beginning with the first quarter of 2007, we refined our capital allocation factors and also began allocating certain expenses to our segments to measure segment performance on a more fully "loaded" basis. These expenses include equity-based compensation and corporate support costs, as well as a portion of the provisions for credit losses, which had previously been recorded in Corporate and Other. Certain other expenses are not allocated to the operating segments. These are reported in Corporate and Other and consist primarily of the following: (1) certain funding costs, as the segment results reflect debt transfer pricing that matches assets (as of the origination date) with liabilities from an interest rate and maturity perspective; (2) certain tax provisions and benefits; (3) a portion of credit loss provisioning in excess of amounts recorded in the segments; and (4) interest and dividends on preferred securities, as segment risk adjusted returns are based on the allocation of common equity.

Results by business segment are discussed below. See Note 21 – *Business Segment Information* for additional details.

#### Corporate Finance

- Net income increased from the preceding years, driven by profitability improvements across most businesses and a significant 2007 gain on the sale of the U.S. construction portfolio. Excluding the gain, net income increased sequentially by 10% in 2007 and 7% in 2006, year over year. Significant contributors to the 2007 improvements were the syndicated loan group, healthcare and commercial and industrial.
- Total net revenues (net finance revenue plus other income) increased 34% in 2007 and 17% in 2006 from the prior year. Finance margins as a percentage of earning assets have trended slightly down over the presented years. Other income in 2007 was flat with 2006 after 2006 was up 18% from 2005, reflecting two years of strong fees, including the contribution of higher advisory fees from a 2007 acquisition of a mergers and advisory firm. However, partially offsetting this performance were lower syndications fees due to lack of market liquidity in the latter half of 2007.
- After being flat in 2006 compared to the prior year in both amount and percentage of receivables (at approximately 20 basis points), charge-offs trended up in 2007 on a lower level of recoveries. 2006 recoveries were high and increased approximately \$16 million over 2005.
- Return on risk-adjusted capital increased in 2007 due to the gain on sale of the U.S. construction portfolio. Absent this gain, the 2007 return was 12.6%.
- Volume was strong across virtually all of the businesses. Newer businesses such as the syndicated loan group (up 49% to \$2.3 billion) contributed to the 10% increase over 2006. Healthcare, which led the 2006 growth of over 65% from 2005, was down during 2007.
- Owned assets growth was up 7% over 2006, muted by the sale of the \$2.6 billion construction portfolio. Growth during 2007 was highlighted by the commercial and industrial and the syndicated loan groups. Securitized assets were slightly lower as we shifted strategy to sales and syndications during 2006. 2006 owned asset growth was 36% from 2005.

year-end, with strength in healthcare, syndicated loan business and communications, media & entertainment.

#### Transportation Finance

- This segment posted a second consecutive year of strong bottom line performance, up from 2006 (last year included noteworthy items). Excluding the 2006 noteworthy items, net income was \$251.0 million in 2006 and \$133.2 million in 2005. The improvement reflected higher operating lease net revenues (operating lease rental income less the related equipment depreciation expense), led by aerospace rentals, strong recoveries and a continued low effective tax rate due to the relocation of aircraft to Ireland coupled with higher allocated tax benefits.
- Total net revenues improved 29% in 2007 on top of a strong 49% in 2006, driven by stronger operating lease margins, which increased to 7.13% in 2007 from 6.74% in 2006 and 5.58% in 2005. Aerospace rental rates continue to strengthen as aircraft are re-leased at higher rates, offsetting moderating rail utilization rates.
- Credit metrics remained strong over the past two years. During 2007 we recovered \$32 million of previously charged off U.S. carrier balances in commercial aerospace, on top of net recoveries during 2006. Delinquency and non-performing assets declined from 2005.
- Return on risk-adjusted capital declined from 2006 primarily due to the noteworthy items last year, but remained well above 2005 and CIT's internal target return rate.
- New business volume decreased slightly from a strong 2006 but outpaced 2005. In 2007, we committed to the purchase of 37 additional new commercial aircraft and ended the year with 107 aircraft on order. See Note 17 – Commitments and Contingencies for additional information.
- Asset growth was 13% for the segment, driven by new aircraft deliveries from our order book and loans to major carriers. During 2007, we placed 26 new aircraft from our order book. Our commercial aircraft are fully utilized; there were no aircraft off-lease at year-end 2007 and 2006, down from ten at year-end 2005. Rail demand experienced some softening during 2007. Our rail assets were 92% utilized at the end of 2007.

#### Trade Finance

- Net income was up in 2007 after falling 5% in 2006 from the prior year. Higher finance income and lower provision for credit losses offset lower commissions. The decline in 2006 was due to higher charge-offs.
- Total net revenues increased slightly in 2007 and 2006, as net finance margin as a percentage of average earning assets improved in both years. Other income declined modestly in 2007 after a slight increase in 2006, as lower commission income rates were offset by higher factoring volume.
- After increasing in 2006, net charge-offs were down 11 bps in 2007. Delinquency and non-performing accounts trended down from 2006 levels, which in turn were up from relatively low levels at December 31, 2005.
- Return on risk adjusted capital trended down over the periods presented, consistent with a decline in return on assets.

- During 2007 we capitalized on our prior year European acquisition, which helped increase assets 5% from 2006.

#### Vendor Finance

- Net income improved from the prior year due to a pre-tax gain of \$247.1 million from the sale of CIT's 30% interest in the U.S. based Dell Financial Services (DFS) joint venture (resulting from Dell exercising its purchase option) and a \$21.0 million gain on the sale of the U.S. Systems Leasing portfolio. Net income was up by 7% in 2006, reflecting strong growth in the international operations. Excluding the DFS gain, net income was down, as a reduction in other income was mitigated by improved finance revenue. The 2006 improvement was driven primarily by higher other income and reduced charge-offs. The 2005 results included a \$26.8 million after tax gain on the sale of our domestic micro-ticket leasing point of sale unit.
- Total net revenues excluding the DFS and systems leasing gains decreased in 2007 driven by lower other income, and was up 4% in 2006. After a decline in 2006, net finance revenue increased in 2007 driven by higher asset levels from two significant acquisitions, totaling approximately \$4 billion. Other revenue was down in 2007, excluding the DFS and systems leasing gains, due to lower joint venture fees, lower gains from equipment sales and fewer securitization sales. Other income was up 7% in 2006, reflecting strong gains from asset sales and syndication activity in our global operations.
- Net charge-offs as a percentage of average finance receivables improved in both years. Both delinquency and non-performing asset levels were up from 2006, primarily driven by U.S. operations due to the integration of leasing platforms.
- Return on risk-adjusted capital was down after improving in 2006.
- After declining for the past two years, new business volume increased 19% in 2007, as activity from new vendor partners and the current year acquisitions offset the anticipated lower volumes from one U.S. joint venture. During the year, we announced continued growth with new strategic partnerships with several large international companies.
- Managed assets were up 31% from last year as the asset growth from acquisitions and strong volumes, offset the sale of the systems leasing portfolio and the 20% decline in U.S. Dell program assets to \$2.9 billion, reflecting both a decline in the overall Dell financed sales volume and Dell exercising its right to purchase a higher portion of the receivables originated by the DFS joint venture. International assets grew 16% in 2006; while in total, managed assets were down from 2005 primarily due to Dell U.S.

#### Consumer

- The unit recorded a loss in 2007 reflecting the \$313 million in impairment charges to write-off the goodwill and intangible assets associated with the student lending business and higher provisioning for charge-offs of other unsecured consumer loans.
- Total net revenues were up slightly in 2007 after improving 50% in 2006. Net finance margin for the past two years has been up in dollars but down as a percentage of AEA, reflecting the growth in the lower margin federally

guaranteed student lending portfolio. Other revenue decreased in 2007 on lower receivable gains after an increase of 43% in 2006 on higher gains on sales of student lending receivables. Average earning assets increased in 2007 and 2006, reflecting growth in the student lending business.

- We grew the deposit funding at CIT Bank by approximately \$350 million during 2007. Since its inception, the bank has been primarily funding consumer loans, including home lending and other sales financing, businesses which we are currently exiting. During late 2007 we began the Bank's transition from a consumer-oriented lender to a commercial lender and have recently originated certain loans in conjunction with Corporate Finance.
- Net charge-offs were up in 2007, primarily due to the other consumer loans in the Bank discussed above. We expect this higher level of charge-offs to continue into 2008 as we liquidate these bank portfolios. Past due and non-performing loans also increased.
- Despite an increase in assets for the year, new business volume decreased over last year's strong loan origination levels at Student Loan Xpress.
- Assets were up 32% for the year primarily due to growth in the student lending business, which grew by approximately \$2.8 billion in 2007. See "Concentrations" section for more detail on student lending.

**Home Lending** (See *Home Lending Business – Significant 2007 Events and Actions* for more detail on home lending)

- The 2007 net loss reflects pre-tax valuation allowances totaling \$1.3 billion to reduce assets held for sale to lower

of cost or market, increased provision for credit losses in the last quarter driven by the weak residential housing market and other charges on retained interests in securitizations due to reduced portfolio credit performance. Net income in 2006 increased 56% from the prior year, reflecting higher receivable gains.

- Net finance revenue was flat with 2006, helped by the elimination of amortization of certain fees in conjunction with the change in accounting as explained in Home Lending Business – Significant 2007 Events and Actions section. Accretion of discount associated with receivables reclassified to held for investment at September 30 was not significant. Other income was down from 2006, as we recorded impairment charges on retained interests and ceased selling receivables during the first half of 2007.
- Home Lending charge-offs were down in 2007 from 2006 as the balance above does not reflect charge-offs that were recorded during the period the portfolio was held for sale, in the third quarter. Charge-offs during this period were instead taken against the valuation allowances.
- Managed assets were \$9.8 billion, comprised of the following: net finance receivable \$8.8 billion (unpaid principal balance less \$0.5 billion discount), manufactured housing receivables held for sale of \$0.3 billion and securitized assets of \$0.7 billion. The portfolio is down from last year as we announced our intent to exit the business and run-off the held for investment portfolio.

**Corporate and Other** net expenses are shown in the table below:

**Corporate and Other for the years ended December 31** (dollars in millions)

	2007	2006	2005
Unallocated revenues, net	\$ 24.9	\$ 2.2	\$ 29.1
Preferred stock dividends	(30.0)	(30.2)	(12.7)
Provision for credit losses	(38.3)	(5.6)	(27.7)
Subtotal	(43.4)	(33.6)	(11.3)
Provision for severance and real estate exit activities	(22.5)	(15.7)	(23.2)
Mark-to-market on non-accounting hedge derivatives	–	–	24.4
Loss on early extinguishments of debt	(79.2)	–	–
Real estate investment gain	–	–	69.7
Total	<u><u>\$(145.1)</u></u>	<u><u>\$(49.3)</u></u>	<u><u>\$ 59.6</u></u>

The increase in unallocated net revenues reflects the impact of the disrupted capital markets, as higher interest revenue on excess liquidity offset operating expenses. The provision for credit losses reflects the portion of credit loss provisioning in excess of amounts recorded in the segments.

The loss on early extinguishments of debt reflects the after tax charge to call \$1.5 billion in high coupon debt and preferred capital securities in the first quarter of 2007. These securities

were refinanced with securities that qualified for a higher level of capital at a lower cost of funds as part of a capital optimization initiative in place at that time.

The 2005 derivative amounts related to certain compound derivative contracts, which did not qualify for hedge accounting treatment and were terminated in, or had matured by, the fourth quarter of 2005.

## CONCENTRATIONS

### Ten Largest Accounts

Our ten largest financing and leasing asset accounts in the aggregate represented 4.1% of our total financing and leasing assets at December 31, 2007 (the largest account being less

than 1.0%), 4.6% at December 31, 2006, and 4.5% at December 31, 2005. The largest accounts primarily consist of companies in the transportation, retail and energy industries. The decline from the prior two years is primarily due to the growth in our consumer and smaller ticket vendor portfolios.

## Operating Leases

Operating Leases as of December 31 (dollars in millions)

	2007	2006	2005
Transportation Finance – Aerospace <sup>(1)</sup>	\$ 7,206.8	\$ 6,327.6	\$5,327.1
Transportation Finance – Rail and Other	3,824.8	3,518.7	3,081.4
Vendor Finance	1,119.3	967.2	1,049.5
Corporate Finance	459.6	204.4	177.7
Total	<u>\$12,610.5</u>	<u>\$11,017.9</u>	<u>\$9,635.7</u>

<sup>(1)</sup> Aerospace includes commercial, regional and corporate aircraft and equipment.

The increases in the Transportation Finance– Aerospace portfolio reflect deliveries of 26 new commercial aircraft from our order book. We had 219 commercial aircraft on operating lease at December 31, 2007, up from 192 last year and 182 in 2005. As of December 31, 2007, our operating lease railcar portfolio consisted of approximately 98,000 cars including 29,000 cars under sale-leaseback contracts. Railcar utilization remained fairly strong with approximately 92% of our fleet in use.

The increase in the Vendor Finance operating lease portfolio reflects increases in our international portfolio, largely through acquisition.

The increase in Corporate Finance operating leases is primarily due to commercial real estate operating leases.

## Leveraged Leases

Leveraged Lease Portfolio as of December 31 (dollars in millions)

Transaction Component	2007	2006	2005
Project finance	\$163.6	\$192.7	\$ 360.1
Commercial aerospace	86.2	138.3	367.3
Rail	152.3	137.2	212.9
Other	32.3	28.1	80.4
Total leveraged lease transactions	<u>\$434.4</u>	<u>\$496.3</u>	<u>\$1,020.7</u>
As a percentage of finance receivables	<u>0.7%</u>	<u>0.9%</u>	<u>2.3%</u>

The major components of our net investments in leveraged leases include: 1) power and utility project finance transactions, 2) rail transactions; and 3) commercial aerospace transactions, including tax-optimized leveraged leases. The reduction in the project finance balance reflects refinancing of two power generation facilities, which resulted in the classification of the resulting transactions as conventional capital leases. The decline in the aerospace balances generally reflects the debt restructuring and reclassification to operating leases in conjunction with our initiative to relocate and fund certain assets overseas. The 2006 decline in rail is due to the

remarketing of the equipment under operating lease agreements at the expiration of the original lease transactions.

### Joint Venture Relationships

Our strategic relationships with industry-leading equipment vendors are a significant origination channel for our financing and leasing activities. These vendor alliances include traditional vendor finance programs, joint ventures and profit sharing structures. Our vendor programs with Dell, Snap-on and Avaya are among our largest alliances.

We have multiple program agreements with Dell, one of which was Dell Financial Services (DFS), covering originations in the U.S. The agreement, provided Dell with the option to purchase CIT's 30% interest in DFS, which was exercised during the fourth quarter of 2007 resulting in a pre-tax gain of \$247.1 million. We maintain the right to provide 25% (of sales volume) funding to DFS in 2009 and 35% in 2008, compared to 50% in 2007. We also retain vendor finance programs for Dell's customers in Canada and in more than 40 countries outside the United States that are not affected by Dell's purchase of our DFS interest.

The joint venture agreement with Snap-on runs until January 2009. The Avaya agreement, which relates to profit sharing on

a CIT direct origination program, was extended through September 2009, pursuant to a renewal provision in the agreement.

Our financing and leasing assets include amounts related to the Dell, Snap-on, and Avaya joint venture programs. These amounts include receivables originated directly by CIT as well as receivables purchased from joint venture entities. A significant reduction in origination volumes from any of these alliances could have a material impact on our asset and net income levels.

For additional information regarding certain of our joint venture activities, see Note 20 – Certain Relationships and Related Transactions.

#### Joint Venture Relationships as of December 31 (dollars in millions)

	2007	2006	2005
<b>Owned Financing and Leasing Assets</b>			
Dell U.S.	\$ 604.7	\$1,307.9	\$1,986.3
Dell - International	1,748.1	1,667.9	1,528.3
Snap-on	1,010.5	1,001.2	1,035.7
Avaya Inc	399.7	478.0	563.0
<b>Securitized Financing and Leasing Assets</b>			
Dell U.S.	\$2,341.6	\$2,394.5	\$2,526.1
Dell - International	84.7	122.3	34.2
Snap-on	24.1	39.2	55.4
Avaya Inc	402.4	446.1	460.5

## Geographic Composition (%)

Geographic Concentrations by Obligor as of December 31

	2007	2006	2005
<b>State</b>			
California	8.7%	9.3%	9.8%
Texas	6.3%	7.2%	7.5%
New York	6.8%	6.6%	6.7%
All other states	52.4%	55.8%	54.9%
Total U.S.	<u>74.2%</u>	<u>78.9%</u>	<u>78.9%</u>
<b>Country</b>			
Canada	6.3%	5.6%	6.1%
England	5.1%	3.4%	3.5%
China	1.5%	1.2%	1.0%
Mexico	1.4%	1.1%	0.9%
Germany	2.2%	1.1%	0.8%
Australia	1.2%	1.0%	1.1%
France	0.8%	0.9%	1.0%
All other countries	7.3%	6.8%	6.7%
Total International	<u>25.8%</u>	<u>21.1%</u>	<u>21.1%</u>

The table summarizes significant state concentrations greater than 5.0% and international concentrations in excess of 1.0% of our owned financing and leasing portfolio assets. Domestic concentrations decreased as a result of asset dispositions in construction and home lending. International assets

increased in 2007 due to increased originations and the Barclays acquisition. For each period presented, our managed asset geographic composition did not differ significantly from our owned asset geographic composition.

## Industry Composition

Our industry composition is detailed in Note 5 – *Concentrations*. We believe the following discussions, covering certain industries, are of interest to investors.

## Aerospace

### Commercial Aerospace Portfolio as of December 31 (dollars in millions)

	2007		2006		2005	
	Net Investment	Number	Net Investment	Number	Net Investment	Number
<i>By Region:</i>						
Europe	\$2,906.2	94	\$2,880.2	88	\$2,348.4	75

<sup>(1)</sup> *Narrow body* are single aisle design and consist primarily of Boeing 737 and 757 series and Airbus A320 series aircraft. *Intermediate body* are smaller twin aisle design and consist primarily of Boeing 767 series and Airbus A330 series aircraft. *Wide body* are large twin aisle design and consist primarily of Boeing 747 and 777 series and McDonnell Douglas DC10 series aircraft.

Our top five commercial aerospace exposures totaled \$1,321.4 million at December 31, 2007. Four of the top five exposures are to carriers outside of the U.S. The largest exposure to a U.S. carrier at December 31, 2007 was \$234.6 million.

Aerospace depreciation expense for the years ended December 31, 2007, 2006 and 2005 totaled \$330.5 million, \$299.4 million, and \$248.4 million.

Our aerospace assets include both operating and capital leases as well as secured loans. Management considers current lease rentals as well as relevant and available market information (including third-party sales for similar equipment, published appraisal data and other marketplace information) both in determining undiscounted future cash flows when testing for the existence of impairment and in determining estimated fair

value in measuring impairment. We adjust the depreciation schedules of commercial aerospace equipment on operating leases or residual values underlying capital leases when projected fair value at the end of the lease term is less than the projected book value at the end of the lease term. We review aerospace assets for impairment annually, or more often should events or circumstances warrant. Aerospace equipment is defined as impaired when the expected undiscounted cash flow over its expected remaining life is less than its book value. We factor historical information, current economic trends and independent appraisal data into the assumptions and analyses we use when determining the expected undiscounted cash flow. Included among these assumptions are the following: lease terms, remaining life of asset, lease rates, remarketing prospects and maintenance costs.

See *Item 8. Financial Statements and Supplementary Data*, Note 17 – *Commitments and Contingencies* for additional information

regarding commitments to purchase additional aircraft and Note 5 – *Concentrations* for further discussion on geographic and industry concentrations.

#### Student Lending (Student Loan Xpress)

The Consumer Finance student lending portfolio, which is marketed as Student Loan Xpress, totaled \$11.6 billion at December 31, 2007, representing 15.1% of owned and 13.9% of managed assets. Loan origination volumes totaled \$5.9 billion in 2007, \$6.3 billion in 2006, and \$2.4 billion for the period of CIT ownership beginning in February 2005. Student Loan Xpress has arrangements with certain financial institutions to sell selected loans and works jointly with these financial institutions to promote these relationships. These sales are held on-balance sheet and are further described in "On-balance Sheet Securitization Transactions".

Finance receivables, including held for sale, by product type for our student lending portfolio are as follows:

#### Product Type at December 31 (dollars in millions)

	2007	2006	2005
Consolidation loans	\$ 9,050.4	\$7,399.8	\$4,668.7
Other U.S. Government guaranteed loans	1,935.3	1,064.1	568.7
Private (non-guaranteed) loans and other	599.3	308.8	30.4
Total	\$11,585.0	\$8,772.7	\$5,267.8
Delinquencies (sixty days or more) %	5.06%	4.71%	2.63%
Top state concentrations	California, New York, Texas, Ohio, Pennsylvania	California, New York, Texas, Ohio, Pennsylvania	California, New York, Texas, Ohio, Pennsylvania
Top state concentrations (%)	36%	35%	37%

In late 2007, we ceased originating new private student loans. However, the portfolio is expected to grow approximately \$200 million in 2008 due to existing funding commitments. Loans to students at the top 5 institutions represent approximately 50% of the portfolio at December 31, 2007.

During the third quarter of 2007, legislation was passed with respect to the student lending business. Among other things, the legislation reduces the maximum interest rates that can be charged by lenders in connection with a variety of loan products, increases loan origination fees paid to the government by lenders, and reduces the lender guarantee percentage. The legislation goes into effect for all new FFELP student loans with the first disbursements on or after October 1, 2007. The reduced guarantee percentage, from 97% to 95%, is in effect for loans originated after October 1, 2012. As a result, management assessed the value of goodwill associated with our student lending business following the passage of the legislation, and again in the fourth quarter.

Based on decreased market valuations and lower profit expectations for student lending businesses in the fourth quarter of 2007 due to higher funding and credit costs, we wrote off the entire balance of goodwill and intangible assets, approximately \$313 million, associated with this business in a fourth quarter impairment charge. See Note 23 for additional information regarding goodwill and intangible assets.

In February 2008, a private pilot training school, whose students have outstanding loans totalling approximately \$196 million at December 31, 2007, filed for Chapter 7 bankruptcy. Management is currently evaluating the collectibility and projected cash flows related to these loans. Given the unsecured nature of the loans and the uncertainties regarding collection, management currently expects additional reserves may be required in 2008 in connection with these loans. See Note – 27 *Subsequent Events* for further information.

## RISK MANAGEMENT

Our business activities involve various elements of risk. We consider the principal types of risk to be market risk (including interest rate, foreign currency and liquidity risk) and credit risk (including credit, collateral and equipment risk). Managing risks is essential to conducting our businesses and to our profitability. Accordingly, our risk management systems and procedures are designed to identify and analyze key business risks, to set appropriate policies and limits, and to continually monitor these risks and limits by means of reliable administrative and information systems, along with other policies and programs. The Chief Risk Officer oversees credit and equipment risk management across the businesses while the Vice Chairman and Chief Financial Officer oversees market risk management.

Our Asset Quality Review Committee is comprised of members of senior management, including the Vice Chairman and Chief Financial Officer, the Chief Risk Officer, the Controller and the Director of Credit Audit. Periodically, this committee meets with senior executives of our business units and corporate credit risk management group to review portfolio performance, including the status of individual financing and leasing assets, owned and managed, to obligors with higher risk profiles. In addition, this committee periodically meets with the Chief Executive Officer of CIT to review overall credit risk, including geographic, industry and customer concentrations, and the reserve for credit losses.

### MARKET RISK MANAGEMENT

We engage in transactions in the normal course of business that expose us to market risks. Market risk is the risk of loss arising from changes in values of financial instruments, and includes liquidity risk, interest rate risk, foreign exchange risk and derivative counterparty risk, each of which are discussed in detail below. We conduct what we believe are appropriate management practices and maintain policies designed to effectively mitigate such risks. The objectives of our market risk management efforts are to preserve the economic and accounting returns of our assets by matching the repricing and maturity characteristics of our assets with that of our liabilities. Strategies for managing market risks associated with changes in interest rates and foreign exchange rates are an integral part of the process, because those strategies affect our future expected cash flows as well as our cost of capital.

Our Capital Committee sets policies, oversees and guides the interest rate and currency risk management process, including the establishment and monitoring of risk metrics, and ensures the implementation of those policies. Other risks monitored by the Capital Committee include derivative counterparty credit risk and liquidity risk. The Capital Committee meets periodically and includes the Chief Executive Officer, Vice Chairman and Chief Financial Officer, Treasurer, and Controller, among others.

### LIQUIDITY RISK MANAGEMENT

Our goal is to achieve a balance between the liquidity needed to fund our business, the cost of funds, our concentration risk from relying on only a few sources of funding, and demonstrating proven access to the markets. Our strategy for achieving this goal is to maintain multiple funding sources to meet the needs of the business, to access multiple segments of the capital markets, including commercial paper, unsecured debt, and both on-balance sheet and off-balance sheet securitizations, and to maintain adequate back-up sources of liquidity, such as committed conduit facilities and committed bank lines of credit. We raise debt financing from multiple sources, with funding decisions driven by the relative cost and availability of these alternative sources.

Our commercial paper programs provide short term financing, and are comprised of U.S., Canadian and Australian programs. Outstanding commercial paper totaled \$2.8 billion at December 31, 2007, down from \$5.4 billion and \$5.2 billion at December 31, 2006 and 2005 due to reduced liquidity in the commercial paper market. In addition, our goal is to maintain committed bank lines in excess of aggregate outstanding commercial paper, with available bank lines aggregating \$7.5 billion at December 31, 2007.

The capital markets experienced a heightened level of volatility during 2007 that continues into 2008, causing corporate borrowing spreads to widen significantly against benchmark rates, such as Treasury securities and LIBOR, and substantially increasing the cost of funds available through traditional unsecured long-term funding sources. We issued \$2.0 billion 5-year, fixed-rate bonds in late November with a coupon rate of 7.625%. Also in the fourth quarter of 2007, we executed a mandatory convertible transaction in which the Company sold approximately 27.6 million equity units for a total stated amount of \$690 million. These equity units carry a total distribution rate of 7.75%. As a result of market dislocations and the significant increase in the cost of unsecured debt, we have reduced our reliance on the unsecured debt markets and relied primarily on other funding sources, which included asset-backed transactions that raised approximately \$13.5 billion of proceeds during 2007 from on-balance sheet financings including: \$5.1 billion secured by home loans, \$5.5 billion secured by student loans, \$1.3 billion secured by factoring receivables and \$1.6 billion secured by equipment loans and leases; and off balance sheet financings of \$3.4 billion secured by equipment loans and leases. We continued to access the commercial paper markets, but at significantly reduced levels, in order to reduce our exposure to volatility in that market. In addition to the secured funding, unsecured term-debt issued during 2007 totaled \$11.4 billion, including \$5.1 billion variable-rate medium-term notes, \$4.9 billion fixed-rate notes and \$1.4 billion junior subordinated notes and convertible debt, most of which was issued in the first half of 2007. Consistent with our strategy of managing debt refinancing risk, the weighted average maturity of unsecured senior term-debt issued in 2007 was approximately five years. Included with the fixed-rate notes are issuances under a retail

note program in which we offer fixed-rate senior, unsecured notes utilizing numerous broker-dealers for placement to retail accounts. During 2007, we issued \$0.8 billion under this program having maturities between 1.5 and 15 years. We plan on continuing to utilize diversified sources of debt funding.

Capital markets volatility continued into 2008 resulting in our unsecured debt spreads remaining at historically wide levels. As a result, we expect to largely satisfy our estimated first half funding requirements as follows:

2008 first and second quarter estimated funding requirements	<u>\$6.0 – \$8.0 billion</u>
Estimated Sources of Funding	
Existing cash	\$1.0 – \$2.0 billion
Unsecured Issuances:	
Senior unsecured notes	\$ .75 – \$2.0 billion
Bank deposits	\$.50 – \$.75 billion
Asset-backed Issuances:	
Equipment	\$1.25 – \$1.50 billion
Student loans	\$.75 – \$1.0 billion
Rail	\$.75 – \$1.0 billion
Commercial loans	\$1.0 – \$2.0 billion

During the first two months of 2008, we raised \$2.1 billion of asset backed financing including \$900 million secured by commercial assets, \$800 million secured by rail assets and \$400 million secured by residential mortgages. We also raised \$600 million of unsecured term debt financing, principally retail notes, as we elected not to access the institutional term debt markets.

Capital markets dislocations extended into the auction rate note market in early 2008 with failed auctions spanning multiple issuers and asset classes. We have \$1.175 billion of AAA rated and \$150 million of AA rated auction rate securities outstanding linked to seasoned student loan securitizations that reset every 28 days. Failed note auctions result in the Company paying an average rate of LIBOR plus 1.5% on the AAA rated securities and LIBOR plus 2.5% on the AA rated securities.

We maintain registration statements covering debt securities that we may sell in the future. At December 31, 2007, 4 billion euros of registered but unissued debt securities were available under our euro medium-term notes program, under which we may issue debt securities and other capital market securities in multiple currencies. In addition, CIT maintains an effective shelf registration with the Securities and Exchange Commission (SEC) for the issuance of senior and subordinate debt, and other capital market securities that has no specific limit on the amount of debt securities that may be issued.

Our goal is to maintain immediate cash availability, through overnight cash investments, and multiple sources of committed funding facilities, in order to reduce our risks from market volatility. We maintain multi-year bank facilities of \$7.5 billion, which include a \$200 million facility to back stop international commercial paper. We also have committed international local bank lines of \$496 million to support our

international operations. To further diversify our funding sources, we maintain committed asset-backed facilities and shelf registration statements, which cover a range of assets from equipment to consumer home lending receivables and trade accounts receivable. We have committed asset-backed facilities aggregating \$13.0 billion covering a variety of asset classes, with approximately \$2.2 billion of availability under these facilities as of December 31, 2007. The tenor of these facilities is generally one year. During 2007, we renewed \$5.7 billion of these facilities, the majority of which occurred in the second half of the year. We added \$5.2 billion of additional facilities during 2007 (of which \$2.2 billion was added in the fourth quarter) and anticipate further additions in 2008 to provide flexibility in our funding needs. As noted in the table below, we target the aforementioned minimum aggregate alternate liquidity sources to equal short-term debt. These sources exceeded short-term debt at both period end dates noted below. The expiration dates of the bank facilities are set forth in Footnote 8 to our Consolidated Financial Statements. Our ability to sell assets into the committed asset-backed facilities expires at various dates in 2008 and 2009, with \$1.6 billion expiring in the second quarter of 2008, \$5.7 billion expiring in the third quarter of 2008, \$3.2 billion expiring in the fourth quarter of 2008, and \$1.0 billion expiring in 2009. Depending on origination volume expectations and financing in the term securitization markets, we intend to renew each of the outstanding facilities as they expire. If we are unable to renew one or more facilities, we will be unable to sell new assets into those facilities, but the assets already held by those facilities will generally remain outstanding and the obligations will be repaid out of cash flows from the assets.

During 2007, we increased deposits at CIT Bank, a Utah industrial bank, by approximately \$0.4 billion to \$2.7 billion. We are continuing to execute on our liquidity risk management plan to broaden our funding sources and decrease our reliance on the capital markets. At December 31, 2007, the bank's cash and short-term investments was approximately \$2 billion, which is available solely for the bank's funding and investing requirements pursuant to the bank's charter. We intend to redeploy this cash during 2008 by originating certain commercial assets through the bank. During the final quarter of 2007 we initiated this transition strategy from funding consumer type

loans to funding commercial loans and have recently started originating corporate loans in the Bank. Our goal is to increase further our total funding base from deposits.

If difficult market conditions persist, we will continue to limit asset growth, finance our business principally with asset-backed issuances and fund certain commercial loans in our bank.

We also target and monitor certain liquidity metrics to ensure both a balanced liability profile and adequate alternate liquidity availability as outlined in the following table:

## LIQUIDITY MEASUREMENTS

	Current Target	December 31,	
		2007	2006
Commercial paper to total debt	Maximum of 15%	4%	9%
Short-term debt to total debt	Maximum of 35%	17%	24%
Bank lines to commercial paper	Minimum of 100%	285%	148%
Aggregate alternate liquidity * to short-term debt	Minimum of 100%	134%	125%

\* Aggregate alternate liquidity includes available bank facilities, asset-backed facilities and cash.

The changes in the table above from 2006 reflect the reduction in commercial paper borrowing in 2007.

Our credit ratings are an important factor in meeting our earnings and net finance revenue targets as better ratings generally correlate to lower cost of funds and broader market access. Below is a summary of our credit ratings.

## CREDIT RATINGS

	Short-Term	Long-Term	Outlook
DBRS	R-1L	A	Stable
Fitch	F1	A	Positive
Moody's	P-1	A2	Negative
Standard & Poor's	A-1	A	Stable

The credit ratings stated above are not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal by the assigning rating organization. Each rating should be evaluated independently of any other rating.

Our unsecured notes are issued under indentures containing certain covenants and restrictions on CIT. Among the covenants, which also apply to our credit agreements, is a

negative pledge provision that limits the granting or permitting of liens on the assets owned by the holding company. In addition, our credit agreements also contain a requirement that CIT maintain a minimum net worth of \$4.0 billion. See Note 25 for consolidating financial statements of CIT Group Inc. (the holding company) and other subsidiaries.

The following tables summarize significant contractual payments and projected cash collections, and contractual commitments at December 31, 2007:

**Payments and Collections by Year<sup>(1)</sup>** (dollars in millions)

	<b>Total</b>	<b>2008</b>	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2012+</b>
Commercial Paper	\$ 2,822.3	\$ 2,822.3	–	–	–	–
Deposits	2,745.8	1,397.1	729.1	335.5	124.8	159.3
Variable-rate senior unsecured notes	19,888.2	7,377.0	5,956.4	1,918.8	2,238.6	2,397.4
Fixed-rate senior unsecured notes	29,477.6	2,730.5	1,785.9	3,346.3	3,787.2	17,827.7
Non-recourse, secured borrowings <sup>(6)</sup>	17,430.3	2,546.4	1,154.4	781.8	640.3	12,307.4
Junior subordinated notes and convertible debt	1,440.0	–	–	–	–	1,440.0
Credit balances of factoring clients	4,542.2	4,542.2	–	–	–	–
Lease rental expense	399.4	46.5	39.4	33.8	31.8	247.9
<b>Total contractual payments</b>	<b>78,745.8</b>	<b>21,462.0</b>	<b>9,665.2</b>	<b>6,416.2</b>	<b>6,822.7</b>	<b>34,379.7</b>
Finance receivables <sup>(2)(6)</sup>	62,536.5	13,972.6	6,560.1	5,950.7	5,679.1	30,374.0
Operating lease rental income <sup>(3)</sup>	6,341.0	1,771.6	1,403.5	1,008.7	704.4	1,452.8
Finance receivables held for sale <sup>(4)</sup>	1,606.0	1,606.0	–	–	–	–
Cash – current balance <sup>(5)</sup>	6,792.3	6,792.3	–	–	–	–
Retained interests in securitizations	1,289.9	598.8	277.9	108.5	58.5	246.2
<b>Total projected cash collections</b>	<b>78,565.7</b>	<b>24,741.3</b>	<b>8,241.5</b>	<b>7,067.9</b>	<b>6,442.0</b>	<b>32,073.0</b>
<b>Net projected cash collections (payments)</b>	<b>\$ (180.1)</b>	<b>\$ 3,279.3</b>	<b>\$ (1,423.7)</b>	<b>\$ 651.7</b>	<b>\$ (380.7)</b>	<b>\$ (2,306.7)</b>

<sup>(1)</sup> Projected proceeds from the sale of operating lease equipment, interest revenue from finance receivables, debt interest expense and other items are excluded. Obligations relating to postretirement programs are also excluded.

<sup>(2)</sup> Based upon carrying value before credit reserves, including unearned discount; amount could differ due to prepayments, extensions of credit, charge-offs and other factors.

<sup>(3)</sup> Rental income balances include payments from lessees on sale-leaseback equipment. See related CIT payment in schedule below.

<sup>(4)</sup> Based upon management's intent to sell rather than contractual maturities of underlying assets.

<sup>(5)</sup> Includes approximately \$2 billion of cash and short-term investments held at our Utah bank, which is only available to meet the bank's funding requirements.

<sup>(6)</sup> Non-recourse secured borrowings is generally repaid in conjunction with receipt of payment on the pledged receivables. For student lending receivables, due to certain reporting limitations, the scheduled repayment of both the receivable and borrowing includes a prepayment component.

**Commitment Expiration by Year** (dollars in millions)

	<b>Total</b>	<b>2008</b>	<b>2009</b>	<b>2010</b>	<b>2011</b>	<b>2012+</b>
Credit extensions	\$13,062.6	\$2,059.3	\$1,012.0	\$1,881.4	\$1,965.8	\$ 6,144.1
Aircraft purchases	7,222.0	1,408.0	896.0	1,173.0	1,098.0	2,647.0
Letters of credit	1,109.5	872.8	84.5	46.5	26.1	79.6
Sale-leaseback payments	1,925.9	140.9	141.4	142.6	147.9	1,353.1
Manufacturer purchase commitments	735.5	653.5	82.0	–	–	–
Guarantees, acceptances and other recourse obligations	232.3	218.9	–	–	2.8	10.6
Liabilities for unrecognized tax obligations <sup>(1)</sup>	223.1	20.0	203.1	–	–	–
<b>Total contractual commitments</b>	<b>\$24,510.9</b>	<b>\$5,373.4</b>	<b>\$2,419.0</b>	<b>\$3,243.5</b>	<b>\$3,240.6</b>	<b>\$10,234.4</b>

<sup>(1)</sup> The balance can not be reasonably estimated past 2008, therefore the remaining balance is reflected in 2009. Expiration amounts include non-cash liability reversals for statute of limitation period expirations. See Income Taxes section for discussion of unrecognized tax obligations. See Item 8. Financial Statements and Supplementary Data, Note 17 – Commitments and Contingencies for additional information regarding commitments.

## INTEREST RATE AND FOREIGN EXCHANGE RISK MANAGEMENT

**Interest Rate Risk Management** We monitor our interest rate sensitivity on a regular basis by analyzing the impact of interest rate changes upon the financial performance of the business. We also consider factors such as the strength of the economy, customer prepayment behavior and re-pricing characteristics of our assets and liabilities.

We evaluate and monitor risk through two primary metrics:

- Margin at Risk (MAR), which measures the impact of changing interest rates upon interest income over the subsequent twelve months.
- Value at Risk (VAR), which measures the net economic value of assets by assessing the market value of assets, liabilities and derivatives.

We regularly monitor and simulate our degree of interest rate sensitivity by measuring the characteristics of interest-sensitive assets, liabilities, and derivatives. The Capital Committee reviews the results of this modeling periodically.

The first interest rate sensitivity modeling technique (MAR) that we employ includes the creation of prospective twelve-month baseline and rate shocked net interest income simulations. At the date that we model interest rate sensitivity, we derive the baseline net interest income considering the current level of interest-sensitive assets, the current level of interest-sensitive liabilities, and the current level of derivatives. Our baseline simulation assumes that, over the next successive twelve months, market interest rates (as of the date of our simulation) are held constant and that the composition of assets and liabilities and interest sensitivities remain unchanged. Once we calculate the baseline net interest income, we instantaneously raise market interest rates, which we previously held constant, 100 basis points across the entire yield curve, and a rate shocked simulation is run in which all interest rate sensitive assets, liabilities and derivatives are immediately reset. We then measure interest rate sensitivity as the difference between the calculated baseline and the rate shocked net interest income.

An immediate hypothetical 100 basis point increase in the yield curve on January 1, 2008 would reduce our net income by an estimated \$10 million after-tax over the next twelve months. A corresponding decrease in the yield curve would cause an increase in our net income of a like amount. A 100 basis point increase in the yield curve on January 1, 2007 would have reduced our net income by an estimated \$5 million after tax, while a corresponding decrease in the yield curve would have increased our net income by a like amount.

The second interest rate modeling technique (VAR) that we employ is focused on the net economic value of the firm by modeling the current market value of assets, liabilities and derivatives, to determine our market value baseline. Once the baseline market value is calculated, we raise market interest rates 100 basis points across the entire yield curve, and new market values are estimated. By modeling the economic value of the portfolio we are able to understand how the economic value of the balance sheet would change under specific interest rate scenarios.

An immediate hypothetical 100 basis point increase in the yield curve on January 1, 2008 would increase our economic value by \$233 million before income taxes. A 100 basis point increase in the yield curve on January 1, 2007 would have increased our economic value by \$287 million before income taxes.

Although we believe that these measurements provide an estimate of our interest rate sensitivity, they do not account for potential changes in the credit quality, size, composition, and prepayment characteristics of our balance sheet, nor do they account for other business developments that could affect our net income or for management actions that could be taken. Accordingly, we can give no assurance that actual results would not differ materially from the estimated outcomes of our simulations. Further, such simulations do not represent our current view of future market interest rate movements.

A comparative analysis of the weighted average principal outstanding and interest rates on our debt before and after the effect of interest rate swaps is shown on the following table.

[dollars in millions]

	Before Swaps		After Swaps	
<b>For the year ended December 31, 2007</b>				
Commercial paper, variable-rate senior notes and secured borrowings	\$35,924.3	5.54%	\$37,212.0	5.64%
Fixed-rate senior and subordinated notes and deposits	<u>32,430.7</u>	5.51%	<u>31,143.0</u>	5.57%
Composite	<u>\$68,355.0</u>	5.51%	<u>\$68,355.0</u>	5.61%
<b>For the year ended December 31, 2006</b>				
Commercial paper, variable-rate senior notes and secured borrowings	\$26,290.4	5.14%	\$29,532.7	5.22%
Fixed-rate senior and subordinated notes and deposits	<u>26,349.9</u>	5.69%	<u>23,107.6</u>	5.73%
Composite	<u>\$52,640.3</u>	5.41%	<u>\$52,640.3</u>	5.45%
<b>For the year ended December 31, 2005</b>				
Commercial paper, variable-rate senior notes and secured borrowings	\$20,823.7	3.57%	\$24,225.2	3.87%
Fixed-rate senior and subordinated notes and deposits	<u>22,362.6</u>	5.33%	<u>18,961.1</u>	5.14%
Composite	<u>\$43,186.3</u>	4.48%	<u>\$43,186.3</u>	4.43%

The weighted average interest rates before swaps do not necessarily reflect the interest expense that we would have incurred over the life of the borrowings had we managed the interest rate risk without the use of such swaps.

We offer a variety of financing products to our customers, including fixed and variable-rate loans of various maturities and currency denominations, and a variety of leases, including operating leases. Changes in market interest rates, relationships between short-term and long-term market interest rates, or relationships between different interest rate indices (i.e., basis risk) can affect the interest rates charged on interest-earning assets differently than the interest rates paid on interest-bearing liabilities, and can result in an increase in interest expense relative to finance income. We measure our asset/liability position in economic terms through duration measures and sensitivity analysis, and we measure the effect on earnings using maturity gap analysis. Our asset portfolio is generally comprised of loans and leases of short to intermediate term. As such, the duration of our asset portfolio is generally less than three years. We target to closely match the duration of our liability portfolio with that of our asset portfolio. As of December 31, 2007, our liability portfolio duration was slightly longer than our asset portfolio duration.

A matched asset/liability position is generally achieved through a combination of financial instruments, including commercial paper, deposits, medium-term notes, long-term debt, interest rate and currency swaps, foreign exchange contracts, and through securitization. We do not speculate on interest rates or foreign exchange rates, but rather seek to mitigate the possible impact of such rate fluctuations encountered in the normal course of business. This process is ongoing due to prepayments, refinancings and actual payments varying from contractual terms, as well as other portfolio dynamics.

We periodically enter into structured financings (involving the issuance of both debt and an interest rate swap with corre-

sponding notional principal amount and maturity) to manage liquidity and reduce interest rate risk at a lower overall funding cost than could be achieved by solely issuing debt.

As part of managing exposure to interest rate, foreign currency, and, in limited instances, credit risk, CIT, as an end-user, enters into various derivative transactions, all of which are transacted in over-the-counter markets with other financial institutions acting as principal counterparties. Derivatives are utilized to eliminate or mitigate economic risk, and our policy prohibits entering into derivative financial instruments for speculative purposes. To ensure both appropriate use as a hedge and to achieve hedge accounting treatment, whenever possible, substantially all derivatives entered into are designated according to a hedge objective against a specific or forecasted liability or, in limited instances, assets. The notional amounts, rates, indices, and maturities of our derivatives closely match the related terms of the underlying hedged items.

CIT utilizes interest rate swaps to exchange variable-rate interest underlying forecasted issuances of commercial paper, specific variable-rate debt instruments, and, in limited instances, variable-rate assets for fixed-rate amounts. These interest rate swaps are designated as cash flow hedges and changes in fair value of these swaps, to the extent they are effective as a hedge, are recorded in other comprehensive income. Ineffective amounts are recorded in interest expense. Interest rate swaps are also utilized to effectively convert fixed-rate interest on specific debt instruments to variable-rate amounts. These interest rate swaps are designated as fair value hedges and changes in fair value of these swaps are effectively recorded as an adjustment to the carrying value of the hedged item, and the offsetting changes in fair value of the swaps and the hedged items are recorded in earnings.

The following table summarizes the composition of our interest rate sensitive assets and liabilities before and after swaps:

	Before Swaps		After Swaps	
	Fixed rate	Floating rate	Fixed rate	Floating rate
<b>December 31, 2007</b>				
Assets	50%	50%	50%	50%
Liabilities	50%	50%	48%	52%
<b>December 31, 2006</b>				
Assets	51%	49%	51%	49%
Liabilities	55%	45%	50%	50%

Total interest sensitive assets were \$72.6 billion and \$64.1 billion at December 31, 2007 and 2006. Total interest sensitive liabilities were \$65.3 billion and \$57.1 billion at December 31, 2007 and 2006.

**Foreign Exchange Risk Management** – To the extent local foreign currency borrowings are not raised, CIT utilizes foreign currency exchange forward contracts to hedge or mitigate currency risk underlying foreign currency loans to subsidiaries

and the net investments in foreign operations. These contracts are designated as foreign currency cash flow hedges or net investment hedges and changes in fair value of these contracts are recorded in other comprehensive income along with the translation gains and losses on the underlying hedged items. Translation gains and losses of the underlying foreign net investment, as well as offsetting derivative gains and losses on designated hedges, are reflected in other comprehensive income in the Consolidated Balance Sheet.

CIT also utilizes cross-currency swaps to hedge currency risk underlying foreign currency debt and selected foreign currency assets. The swaps that meet hedge accounting criteria are designated as foreign currency cash flow hedges or foreign currency fair value hedges and changes in fair value of these contracts are recorded in other comprehensive income (for cash flow hedges), or effectively as a basis adjustment (including the impact of the offsetting adjustment to the carrying value of the hedged item) to the hedged item (for fair value hedges) along with the transaction gains and losses on the underlying hedged items. CIT also has certain cross-currency swaps that economically hedge exposures, but do not qualify for hedge accounting treatment.

**Other Market Risk Management** – CIT has entered into credit default swaps to economically hedge certain CIT credit exposures. These swaps do not meet the requirements for hedge accounting treatment and, therefore, are recorded at fair value, with both realized and unrealized gains and losses recorded in other revenue in the Consolidated Statement of Income. See Note 10 - Derivative Financial Instruments for further discussion, including notional principal balances of interest rate swaps, foreign currency exchange forward contracts, cross-currency swaps, credit default swaps and other derivative contracts.

## DERIVATIVE RISK MANAGEMENT

We enter into interest rate and currency swaps, foreign exchange forward contracts, and in limited instances, credit default swaps as part of our overall risk management practices. We assess and manage the external and internal risks associated with these derivative instruments in accordance with the overall operating goals established by our Capital Committee. External risk is defined as those risks outside of our direct control, including counterparty credit risk, liquidity risk, systemic risk, legal risk and market risk. Internal risk relates to those operational risks within the management oversight structure and includes actions taken in contravention of CIT policy.

The primary external risk of derivative instruments is counterparty credit exposure, which is defined as the ability of a counterparty to perform its financial obligations under a derivative contract. We control the credit risk of our derivative agreements through counterparty credit approvals, pre-established exposure limits and monitoring procedures.

The Capital Committee, in conjunction with Corporate Risk Management, approves each counterparty and establishes exposure limits based on credit analysis and market value. All derivative agreements are entered into with major money

center financial institutions rated investment grade by nationally recognized rating agencies, with the majority of our counterparties rated "AA" or better. Credit exposures are measured based on the current market value and potential future exposure of outstanding derivative instruments. Exposures are calculated for each derivative contract and are aggregated by counterparty to monitor credit exposure.

## CREDIT RISK MANAGEMENT

We review and monitor credit exposures, both owned and managed, on an ongoing basis to identify, as early as possible, customers that may be experiencing declining creditworthiness or financial difficulty, and periodically evaluate the performance of our finance receivables across the entire organization. We monitor concentrations by borrower, industry, geographic region and equipment type, and we set or modify exposure limits as conditions warrant, to minimize credit concentrations and the risk of substantial credit loss. We have maintained a standard practice of reviewing our aerospace portfolio regularly and, in accordance with SFAS No. 13 and SFAS No. 144, we test for asset impairment based upon projected cash flows and relevant market data with any impairment in value charged to earnings.

We have formal underwriting policies and procedures to evaluate financing and leasing assets for credit and collateral risk during the credit granting process and periodically after the advancement of funds. These guidelines set forth our underwriting parameters based on: (1) Target Market Definitions, which delineate the markets, industries, geographies and products that our businesses are permitted to target, and (2) Risk Acceptance Criteria, which details acceptable transaction structures, credit profiles and required risk-adjusted returns.

We have enhanced our credit risk management process by implementing a two-tier risk metrics system to capture and analyze credit risk based on probability of obligor default and loss given default. Probability of default is determined by evaluating the borrower creditworthiness including analyzing credit history, financial condition, cash flow adequacy, financial performance and management quality. Loss given default ratings, which estimate the loss if an account goes into default, are predicated on transaction structure, collateral valuation and related guarantees (including recourse from manufacturers, dealers or governments).

We implemented processes and systems to drive risk-based pricing models to the individual transaction level based on the aforementioned credit metrics to ensure that transactions meet acceptable risk-adjusted return criteria. Each of our business units developed and implemented a formal credit management process customized to the products/services they offer, the clients they serve and the industries in which they operate.

CIT has entered into a limited number of credit default swaps to economically hedge certain CIT credit exposures. Also, we have executed offsetting derivative transactions with financial institutions and our customers as a service to our customers in order to mitigate their respective interest rate and currency risks. The counter party credit exposure related to these

transactions is monitored and evaluated in conjunction with our normal underwriting policies and procedures.

See Item 8. Financial Statements and Supplementary Data, Note 10 – Derivative Financial Instruments for additional information.

**Commercial Lending and Leasing** The commercial credit management process begins with the initial evaluation of credit risk and underlying collateral at the time of origination and continues over the life of the finance receivable or operating lease, including collecting past due balances and liquidating underlying collateral. Credit personnel review a potential borrower's financial condition, results of operations, management, industry, customer base, operations, collateral and other data, such as third party credit reports, to thoroughly evaluate the customer's borrowing and repayment ability. Transactions are graded according to the two-tier risk metrics system described above. Credit facilities are subject to approval within our overall credit approval and underwriting guidelines and are issued commensurate with the credit evaluation performed on each borrower.

**Consumer and Small Ticket Lending and Leasing** For consumer transactions and certain small-ticket lending and leasing transactions, we employ proprietary automated credit scoring models by loan type. The complex statistical models and algorithms are developed, tested and maintained in-house by our credit risk management sciences group. The models emphasize, among other things, occupancy status, length of residence, employment, debt to income ratio (ratio of total installment debt and housing expenses to gross monthly income), bank account references, credit bureau information and combined loan to value ratio for consumers, while small business models encompass financial performance metrics, length of time in business, industry category and geographic location. The models are used to assess a potential borrower's credit standing and repayment ability considering the value or adequacy of property offered as collateral. We also utilize external credit bureau scoring, behavioral models and judgment in the credit adjudication and collection processes.

We regularly evaluate the consumer loan portfolio and the small ticket leasing portfolio using past due, vintage curve and other statistical tools to analyze trends and credit performance by transaction type, including analysis of specific credit characteristics and other selected subsets of the portfolios. Adjustments to credit scorecards and lending programs are made when deemed appropriate. Individual underwriters are assigned credit authority based upon their experience, performance and understanding of the underwriting policies and procedures of our consumer and small-ticket leasing operations. A credit approval hierarchy also exists to ensure that an underwriter with the appropriate level of authority reviews all applications.

As discussed in *Profitability and Key Business Trends and Concentrations*, in 2007, we ceased originating home lending receivables and private student loans.

#### EQUIPMENT/RESIDUAL RISK MANAGEMENT

We have developed systems, processes and expertise to manage the equipment and residual risk in our leasing businesses. Our process consists of the following: 1) setting

residual value at transaction inception; 2) systematic residual reviews; and 3) monitoring of residual realizations. Reviews for impairment are performed at least annually. Residual realizations, by business unit and product, are reviewed as part of our ongoing financial and asset quality review, both within the business units and by senior management.

#### Portfolio Analytics

We monitor concentrations by borrower, industry, geographic region and equipment type, and we set or modify exposure limits as conditions warrant, to minimize credit concentrations and the risk of substantial credit loss. Owned and managed credit exposures are reviewed on an ongoing basis to identify sectors of the economy that may be experiencing declining creditworthiness or financial difficulty as soon as possible and underwriting criteria and risk tolerances are adjusted accordingly.

We continue to advance our capital allocation disciplines through the implementation of processes and systems, which will drive risk-based equity allocations down to the transaction level and stress test loss scenarios. We expanded our proactive portfolio management activities to place greater emphasis on whole loan sales and syndications and broadened our risk mitigation techniques to include risk-sharing arrangements, credit insurance and credit derivatives. Additionally, we have migrated our credit data files to a centralized credit manager system, which will further our portfolio analytical capabilities and allow us to analyze cross industry and cross border performance correlations.

#### Supervision and Oversight

The Corporate Risk Management group, which reports to the Chief Risk Officer, oversees and manages credit and related risk throughout CIT. This group includes a Chief Credit Officer as well as Chief Investment Officers for each of the business segments. Our Executive Credit Committee includes the Chief Risk Officer and other members of the Corporate Risk Management group. The committee approves transactions which exceed segment Investment Committee authorities or are otherwise outside of established target market definitions or risk acceptance criteria.

The Corporate Risk Management group also includes an independent credit audit function. The credit audit group reviews the credit management processes at each business unit and monitors compliance with established corporate policies. The credit audit group examines adherence with established credit policies and procedures and tests for inappropriate credit practices, including whether potential problem accounts are being detected and reported on a timely basis.

CIT also maintains a standing Asset Quality Review Committee, which is charged with reviewing aggregate portfolio performance, including the status of individual financing and leasing assets, owned and managed, to obligors with higher risk profiles. The committee is comprised of members of senior management, including the Chief Credit and Risk Officer, the Vice Chairman and Chief Financial Officer, the Controller and the Director of Credit Audit and meets with senior business unit executives to understand portfolio performance dynamics. This committee also periodically meets with the Chief Executive Officer of CIT to review overall credit risk, including geographic, industry and customer concentrations, and the reserve for credit losses.

## INTERNAL CONTROLS

The Internal Controls Committee is responsible for monitoring and improving internal controls and overseeing the internal controls attestation mandated by Section 404 of the Sarbanes-Oxley Act of 2002 ("SARBOX"). The committee, which is

chaired by the Controller, includes the Vice Chairman and Chief Financial Officer, the Director of Internal Audit and other senior executives in finance, legal, risk management and information technology.

## OFF-BALANCE SHEET ARRANGEMENTS

### Securitization Program

We fund asset originations on our balance sheet by accessing various sectors of the capital markets, including the term debt and commercial paper markets. In an effort to broaden funding sources and provide an additional source of liquidity, we use an array of securitization programs, including both asset-backed commercial paper and term structures, to access both the

public and private asset-backed securitization markets. Current products in these programs include receivables and leases secured by equipment and small business lending receivables, as well as consumer loans secured by residential real estate, manufactured housing and other assets. The following table summarizes data relating to our securitization programs.

Off-balance Sheet Securitized Assets at or for the years ended December 31 (dollars in millions)

	2007	2006	2005
<b>Securitized Assets:</b>			
Vendor Finance	\$4,104.0	\$3,850.9	\$3,646.7
Corporate Finance	1,526.7	1,568.7	2,525.3
Home Lending <sup>(1)</sup>	680.5	841.7	1,113.7
Total securitized assets	<u>\$6,311.2</u>	<u>\$6,261.3</u>	<u>\$7,285.7</u>
Securitized assets as a % of managed assets	<u>7.6%</u>	<u>8.4%</u>	<u>11.6%</u>
<b>Volume Securitized:</b>			
Vendor Finance	\$3,447.4	\$3,324.1	\$3,230.9
Corporate Finance	750.4	321.9	1,089.6
Total volume securitized	<u>\$4,197.8</u>	<u>\$3,646.0</u>	<u>\$4,320.5</u>

<sup>(1)</sup> Includes manufactured housing and other assets of approximately \$157 million, \$207 million and \$275 million at December 31, 2007, 2006 and 2005.

In a typical asset-backed securitization, we sell a "pool" of secured loans or leases to a special-purpose entity (SPE), typically a trust. SPEs are used to achieve "true sale" requirements for these transactions in accordance with SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities" ("SFAS 140"). The SPE, in turn, issues certificates and/or notes that are collateralized by the pool and entitle the holders thereof to participate in certain pool cash flows.

Accordingly, CIT has no legal obligation to repay the securities in the event of a default by the SPE. CIT retains the servicing rights of the securitized contracts, for which we earn periodic or "on going" servicing fees. We also participate in certain "residual" cash flows (cash flows after payment of principal and interest to certificate and/or note holders, servicing fees and other credit-related disbursements). At the date of

securitization, we estimate the "residual" cash flows to be received over the life of the securitization, record the present value of these cash flows as a retained interest in the securitization (retained interests can include bonds issued by the SPE, cash reserve accounts on deposit in the SPE or interest only receivables) and typically recognize a gain. Assets securitized are shown in our managed assets and our capitalization ratios on a managed basis.

In estimating residual cash flows and the value of the retained interests, we make a variety of financial assumptions, including pool credit losses, prepayment speeds and discount rates. These assumptions are supported by both our historical experience and anticipated trends relative to the particular products securitized. Subsequent to recording the retained interests, we review them quarterly for impairment based on estimated fair value. These reviews are performed on a

disaggregated basis. Fair values of retained interests are estimated utilizing current pool demographics, actual note/certificate outstandings, current and anticipated credit losses, prepayment speeds and discount rates.

Our retained interests had a carrying value at December 31, 2007 of \$1,289.9 million. Retained interests are subject to credit and prepayment risk. As of December 31, 2007, approximately 72% of our outstanding securitization pool balances are in conduit structures. Securitized assets are subject to the same credit granting and monitoring processes which are described in the “Credit Risk Management” section. See Note 6 – Retained Interests in Securitizations and Other Investments for detail on balance and key assumptions.

#### Joint Venture Activities

We utilize joint ventures organized through distinct legal entities to conduct financing activities with certain strategic vendor partners. Receivables are originated by the joint venture and purchased by CIT. The vendor partner and CIT jointly own these distinct legal entities, and there is no third-party debt involved. These arrangements are accounted for using the equity method, with profits and losses distributed according to the joint venture agreement. See disclosure in Note 20 – Certain Relationships and Related Transactions. The Company sold our interest in Dell Financial Services. See disclosure in Management’s Discussion and Analysis – Acquisitions and Dispositions.

## SECURED BORROWINGS AND ON-BALANCE SHEET SECURITIZATION TRANSACTIONS

As discussed in Liquidity Risk Management, capital markets volatility in the second half of 2007 caused us to reduce our dependency upon the unsecured debt and commercial paper markets, and satisfy a higher proportion of our funding requirements through the asset-backed markets than we have historically. In addition to the off-balance sheet securitization transactions previously discussed, we raised approximately \$13.5 billion of proceeds during the year from on-balance sheet financings including: \$5.1 billion secured by home loans, \$5.5 billion secured by student loans, \$1.3 billion secured by factoring receivables and \$1.6 billion secured by

equipment loans and leases. These transactions do not meet the accounting (SFAS 140) requirements for sales treatment and are therefore recorded as non-recourse secured borrowings, with the proceeds reflected in Non-recourse, secured borrowings in the Consolidated Balance Sheet. Certain cash balances are restricted in conjunction with the student lending borrowings.

The following table summarizes the assets pledged / encumbered and the related secured borrowings. Amounts do not include non-recourse borrowings related to leveraged lease transactions.

Balances as of December 31, (dollars in millions)

	2007		2006	
	Assets Pledged	Secured Borrowing	Assets Pledged	Secured Borrowing
Consumer (student lending)	\$9,079.4	\$9,437.5	\$4,031.1	\$4,118.0
Home lending	7,074.3	4,785.9	–	–
Trade Finance (factoring receivable) <sup>(1)</sup>	5,279.7	1,262.5	–	–
Vendor Finance (acquisition financing)	1,491.3	1,312.3	–	–
Corporate Finance <sup>(2)</sup>	632.1	632.1	280.5	280.5
Total	<u>\$23,556.8</u>	<u>\$17,430.3</u>	<u>\$4,311.6</u>	<u>\$4,398.5</u>

<sup>(1)</sup> Excludes credit balances of factoring clients.

<sup>(2)</sup> Includes a secured borrowing related to an energy finance project and financing (related to \$262 million of commercial loans) executed via total return swap, under which CIT retains control of, and the full risk related to, these loans.

## CAPITALIZATION

Capital Structure as of December 31 (dollars in millions)

	2007	2006	2005
Common stockholders' equity	\$ 6,460.6	\$ 7,251.1	\$ 6,462.7
Preferred stock <sup>(1)</sup>	500.0	500.0	500.0
Junior subordinated notes	750.0	–	–
Mandatory convertible debt <sup>(2)</sup>	690.0	–	–
Preferred capital securities <sup>(3)</sup>	–	250.3	252.0
Total Capital	8,400.6	8,001.4	7,214.7
Senior unsecured debt	52,188.1	53,656.4	43,301.8
Non-recourse, secured borrowings <sup>(4)</sup>	17,430.3	4,398.5	4,048.8
Deposits	2,745.8	2,399.6	261.9
Total Capitalization	\$80,764.8	\$68,455.9	\$54,827.2
Goodwill and other intangible assets	(1,152.5)	(1,008.4)	(1,011.5)
Equity Adjustments	88.8	(52.6)	(44.6)
Total Tangible Common Equity	5,396.9	6,190.1	5,406.6
Total Tangible Capital	7,336.9	6,940.4	6,158.6
Total Tangible Capitalization	79,701.1	67,394.9	53,771.1
Book value per common share	\$34.48	\$36.30	\$32.23
Tangible book value per common share	\$28.42	\$31.22	\$27.15
Tangible capital to managed assets	8.82%	9.36%	9.80%

<sup>(1)</sup> During 2005, CIT issued \$500 million aggregate amount of Series A and Series B preferred equity securities. Series A has a stated value of \$350 million, comprised of 14 million shares of 6.35% non-cumulative fixed rate preferred stock, with a liquidation value of \$25 per share. Series B has a stated value of \$150 million, comprised of 1.5 million shares of 5.189% non-cumulative adjustable rate preferred stock, with a liquidation value of \$100 per share. See Note 11 – Stockholders' Equity for further detail on preferred stock.

<sup>(2)</sup> During 2007, the Company sold 24 million equity units with a stated amount of \$25.00 for a total stated amount of \$600 million. These securities convert to common stock no later than November 17, 2010 at a maximum price of \$42.00, which represents a premium of approximately 20% over the closing price of CIT's common stock of \$34.98 on October 17, 2007. The equity units carry a total distribution rate of 7.75%. On October 29, 2007, the underwriters exercised the option to purchase 3.6 million additional equity units, or an additional stated amount of \$90 million, to cover over-allotments. The equity units initially consist of a contract to purchase CIT common stock and a 2.5% beneficial ownership interest in a \$1,000 principal amount senior note due November 15, 2015.

<sup>(3)</sup> The preferred capital securities were 7.70% Preferred Capital Securities issued in 1997 by CIT Capital Trust I, a wholly-owned subsidiary. CIT Capital Trust I invested the proceeds of that issue in Junior Subordinated Debentures of CIT having identical rates and payment dates. Consistent with rating agency measurements, preferred capital securities were included in tangible capital in our leverage ratios. See "Non-GAAP Financial Measurements" for additional information.

<sup>(4)</sup> See "On-balance Sheet Securitization Transactions" section for detail.

We employ a comprehensive capital allocation framework to determine our capital requirements. Our capital assessments address credit, operational and market risks, with capital assigned to cover each of these risks. Credit risk comprises the largest component of required capital and is assessed utilizing our credit risk management systems, which capture probabilities of default and loss given default for each obligor within our sub-portfolios. The result is a capital allocation for each sub-portfolio ranging from student lending at the low end to aerospace leasing at the high end.

Based upon our capital allocation framework and associated portfolio mix, including a greater proportion of U.S. Government guaranteed student loans, we determined a capital ratio target, defined as Tangible Capital to Managed Assets, of approximately 8.5%.

The Tangible Capital to Managed Assets ratio of 8.82% at December 31, 2007 was impacted by the valuation adjustment of the home lending portfolio that resulted in a reduction of the carrying value of the assets and commensurate reduction in capital.

## Capital and Funding

CIT has certain preferred stock and junior subordinated notes outstanding. The terms of these securities restrict us from declaring dividends or paying interest on the securities, as applicable, if, among other things, our average four quarters fixed charge ratio is less than 1.10, or if our tangible capital to managed asset ratio is less than 5.50%. In addition, if we do not pay dividends or interest on such securities, we are also prohibited from paying dividends on our common stock. Our preferred stock and junior subordinated notes, provided, however that we may pay dividends and interest on those securities with any net proceeds that we have received from the sale of common stock during specified time periods prior to the declaration of the dividend or the payment of interest. As a result of the valuation allowances taken in 2007 to mark our home lending portfolio to the lower of cost or market, our average four quarters fixed charge ratio fell below 1.10 for the third and fourth quarters. Therefore, the Board of Directors authorized the Company to issue and sell common stock in an amount sufficient to allow it to pay dividends and make interest payments on the aforementioned securities.

On January 23, 2008, CIT Group Inc. entered into a Sales Agency Agreement with Morgan Stanley & Co. Incorporated and Citigroup Global Markets Inc., pursuant to which CIT agreed to sell shares of its common stock for an aggregate purchase price of up to \$31.5 million. As a result, the Company sold 1,281,519 shares on January 30, 2008. On October 16, 2007, agreed to sell 235,800 shares of its common

stock for an aggregate purchase price of approximately \$8 million. As a result, the Company satisfied the conditions necessary to permit the declaration and payment of preferred stock dividends for these periods.

On October 16, 2007, CIT Group Inc. entered into a forward equity commitment agreement with Morgan Stanley & Co. Incorporated and Citigroup Global Markets Inc. Pursuant to the agreement, Morgan Stanley and Citigroup severally committed to purchase shares of common stock issued by CIT in an aggregate amount of up to \$80 million, subject to the conditions set forth in the agreement. The commitment to purchase the shares of common stock terminates on September 30, 2008. The purchase price per share of common stock to be paid by Morgan Stanley and Citigroup will be equal to an amount from and including 95% to 100% of the lesser of (1) the volume weighted average price of the common stock during the final hour of trading on the New York Stock Exchange on the third trading day preceding the applicable purchase date and (2) the closing price of the common stock on the New York Stock Exchange on the third trading day preceding the applicable purchase date. The \$80 million is sufficient to cover interest and dividend payments on the Company's junior subordinated notes and preferred stock through September 30, 2008 if necessary.

See "Liquidity Risk Management" for discussion of risks impacting our liquidity and capitalization. See Exhibit 12.1 for the Computation of Ratios to Fixed Charges.

---

## CRITICAL ACCOUNTING ESTIMATES

The preparation of financial statements in conformity with GAAP requires management to use judgment in making estimates and assumptions that affect reported amounts of assets and liabilities, the reported amounts of income and expense during the reporting period and the disclosure of contingent assets and liabilities at the date of the financial statements. The following accounting estimates, which are based on relevant information available at the end of each period, include inherent risks and uncertainties related to judgments and assumptions made by management. We consider the following accounting estimates to be critical in applying our accounting policies due to the existence of uncertainty at the time the estimate is made, the likelihood of changes in estimates from period to period and the potential impact that these estimates can have on the financial statements.

Management believes that the judgments and estimates utilized in the following critical accounting estimates are reasonable. We do not believe that different assumptions are more likely than those utilized in the following critical accounting estimates, although actual events may differ from such assumptions. Consequently, our estimates could prove inaccurate, and we may be exposed to charges to earnings that could be material.

**Reserve for Credit Losses** – The reserve for credit losses is intended to provide for losses inherent in the portfolio, which requires the application of estimates and significant judgment as to the ultimate outcome of collection efforts and realization of collateral values, among other things. Therefore, changes in economic conditions or credit metrics, including past due and non-performing accounts, or other events affecting specific obligors or industries may necessitate additions or reductions to the reserve for credit losses.

The reserve for credit losses is reviewed for adequacy based on portfolio collateral values and credit quality indicators, including charge-off experience, levels of past due loans and non-performing assets, evaluation of portfolio diversification and concentration as well as economic conditions. We review finance receivables periodically to determine the probability of loss, and record charge-offs after considering such factors as delinquencies, the financial condition of obligors, the value of underlying collateral, as well as third party credit enhancements such as guarantees and recourse from manufacturers. This information is reviewed formally on a quarterly basis with senior management, including the CEO, CFO, Chief Risk Officer and Controller, among others, in conjunction with setting the reserve for credit losses.

The reserve for credit losses is determined based on three key components: (1) specific reserves for collateral dependent loans which are impaired, based upon the value of underlying collateral or projected cash flows (2) reserves for estimated losses inherent in the portfolio based upon historical and projected charge-offs and (3) reserves for estimated losses inherent in the portfolio based upon economic, estimation risk and other factors. Historical loss rates are based on one to three-year averages, which are consistent with our portfolio life and provide what we believe to be appropriate weighting to current loss rates. The process involves the use of estimates and a high degree of management judgment. As of December 31, 2007, the reserve for credit losses was \$831.5 million or 1.33% of finance receivables. A hypothetical 10% change to the expected loss rates utilized in our reserve determination at December 31, 2007 equates to the variance of \$77.9 million, or 12 basis points (0.12%) in the percentage of reserves to finance receivables, and \$0.25 in earnings per share. See Note 3 for additional information regarding the reserve for credit losses.

**Impaired Loans** – Loan impairment is measured as any shortfall between the estimated value and the recorded investment for those loans defined as impaired loans in the application of SFAS 114. The estimated value is determined using the fair value of the collateral or other cash flows, if the loan is collateral dependent, or the present value of expected future cash flows discounted at the loan's effective interest rate. The determination of impairment involves management's judgment and the use of market and third party estimates regarding collateral values. Valuations in the level of impaired loans and corresponding impairment as defined under SFAS 114 affect the level of the reserve for credit losses. At December 31, 2007, the reserve for credit losses includes a \$52.1 million impairment valuation component. A 10% fluctuation in this valuation equates to \$0.02 in earnings per share.

**Fair value determination** – Selected assets and liabilities, including derivatives, retained interests in securitizations and net employee benefit obligations, are measured at estimated fair value in our financial statements. The carrying value of certain other assets, such as financing and leasing assets held for sale, which are reflected in our financial statements at the lower of cost or fair value, also are influenced by our determination of fair value.

We determine market value in the following order: (1) comparable market prices to the extent available; (2) internal valuation models that utilize market data (observable inputs) as input variables; and (3) internal valuation models that utilize management's assumptions about market participant assumptions (unobservable inputs) to the extent (1) and (2) are unavailable.

Derivative fair values are determined primarily via method (1). Financing and leasing assets held for sale fair values are determined largely via methods (1) and (2), while the fair value of retained interests in securitizations and net employee benefit obligations are determined largely via method (3). See

Notes 10, 6, and 16 for additional information regarding derivative financial instruments, retained interests in securitizations and employee benefit obligations. Excluding home lending, Financing and leasing assets held for sale totaled \$1,260.2 million at December 31, 2007. A hypothetical 10% fluctuation in value of financing and leasing assets held for sale equates to \$0.41 in earnings per share.

We value home lending assets classified as held for sale at the lower of cost or estimated fair value (LOCOM), with current period earnings charged to the extent carrying value exceeds estimated fair value. In the second quarter of 2007, as described in Home Lending Business – Significant 2007 Events and Actions, we transferred our entire portfolio of home lending assets from assets held for investment to assets held for sale. In the third quarter of 2007, we transferred approximately \$9.7 billion of home lending receivables from assets held for sale to assets held for investment. These assets were transferred at LOCOM at the September 30, 2007 transfer date. Under held for investment accounting these loans will not be subject to LOCOM accounting prospectively. The estimated fair value for approximately 78% of the \$9.7 billion transferred to assets held for investment was based upon market prices for similar assets sold, with the remaining 22% based upon estimated fair value developed from discounted cash flow models. At December 31, 2007, approximately \$490 million of home lending manufactured housing loans remain classified in held for sale, subject to prospective LOCOM accounting.

We estimate fair value based on observable market transactions for similar assets or other relevant observable market data when available. To the extent such relevant market data is unavailable to us, we estimate fair value based upon discounted cash flow analysis ("DCF").

Valuations based on observable market transactions must be adjusted to develop a valid estimate of fair value for our portfolio, usually through the use of pricing sheets based on similarities and differences between key characteristics of the respective loan pools. The use of pricing sheets to adjust the prices of observable market transactions to reflect the characteristics of our loan pools requires management to make assumptions regarding the validity of using, the value of, and the weight attributed to each component of the pricing sheets. The prices for our portfolios, derived by adjusting for the differences in our portfolio characteristics and each of the two market transactions in the 2007 third quarter, fell within a narrow range (less than 40 basis points) of each other.

Valuations based on DCF modeling are most influenced by the impact of estimated lifetime loan losses on the underlying cash flows and the discount rates applied to the net cash flows. Our valuation allowance contains uncertainties because DCF modeling requires management to make assumptions regarding future delinquency and home price trends as well as the frequency and severity of loss.

With respect to the approximate \$7.5 billion of loans transferred to held for investment at September 30, 2007, for which we utilized observable sales of similar assets to determine estimated fair value, the portfolio characteristics that most influenced the purchase price adjustments were the similarities and differences in weighted average coupon and loan to value ratio among the two observable market transactions as compared to our portfolios. In our fair value estimates, every percentage point difference in the weighted average coupon and loan to value ratio of each portfolio equated to 325 basis points and 10 basis points in purchase price adjustments.

With respect to the approximate \$2.2 billion of loans transferred to held for investment at September 30, 2007, for which we utilized cash flow analysis to determine estimated fair value, the weighted average lifetime loss assumption was approximately 16% (with an underlying range among the pools of 11% to 30%) and the weighted average discount rate utilized in the calculation was approximately 13.5% (with an underlying range among the pools of 12.75% to 15%). A 10% deterioration in the lifetime loss assumption would have increased the valuation allowance related to these loans at September 30, 2007 by approximately \$30 million (1.5% of UPB) or \$0.10 earnings per share. A 100 basis point increase in the discount rate applied to the related cash flows would have increased the valuation allowance related to these loans at September 30, 2007 by approximately \$45 million (2.0% of UPB) or \$0.14 earnings per share. In each of these sensitivity calculations the other variable is held constant. In reality, changes in one variable could result in changes in the other variable, which might magnify or counteract the sensitivities. With respect to assets remaining in assets held for sale at December 31, 2007, a 10% deterioration in loss and discount rate assumptions would increase the corresponding valuation allowance by approximately \$15 million (3.0% of UPB) or \$0.05 earnings per share.

**Retained Interests in Securitizations** – Significant financial assumptions, including loan pool credit losses, prepayment speeds and discount rates, are utilized to determine the fair values of retained interests, both at the date of the securitization and in the subsequent quarterly valuations of retained interests. These assumptions reflect both the historical experience and anticipated trends relative to the products securitized. Any resulting losses, representing the excess of carrying value over estimated fair value that are other than temporary, are recorded in current earnings. However, unrealized gains are reflected in stockholders' equity as part of other comprehensive income. See Note 6 for additional information regarding securitization retained interests and related sensitivity analysis.

**Lease Residual Values** – Operating lease equipment is carried at cost less accumulated depreciation and is depreciated to estimated residual value using the straight-line method over the lease term or projected economic life of the asset. Direct financing leases are recorded at the aggregated future minimum lease payments plus estimated residual values less unearned finance income. We generally bear greater risk in operating lease transactions (versus finance lease

transactions) as the duration of an operating lease is shorter relative to the equipment useful life than a finance lease. Management performs periodic reviews of the estimated residual values, with non-temporary impairment recognized in the current period as an increase to depreciation expense for operating lease residual impairment, or as an adjustment to yield for residual value adjustments on finance leases. Data regarding equipment values, including appraisals, and our historical residual realization experience are among the factors considered in evaluating estimated residual values. As of December 31, 2006, our direct financing lease residual balance was \$2.1 billion and our total operating lease equipment balance, including estimated residual value at the end of the lease term, was \$12.6 billion. A hypothetical 10% fluctuation in the total of these amounts equates to \$4.77 in earnings per share over the remaining life of the assets.

**Goodwill and Intangible Assets** – CIT adopted SFAS No. 142, "Goodwill and Other Intangible Assets," effective October 1, 2001. The Company determined at October 1, 2001 that there was no impact of adopting this new standard under the transition provisions of SFAS No. 142. Since adoption, goodwill is no longer amortized, but instead is assessed for impairment at least annually. During this assessment, management relies on a number of factors, including operating results, business plans, economic projections, anticipated future cash flows, and market place data.

During the third quarter of 2007, legislation was passed with respect to the student lending business. Among other things, the legislation reduced the maximum interest rates that can be charged by lenders in connection with a variety of loan products, increased loan origination fees paid to the government by lenders, and reduced the lender guarantee percentage. During the fourth quarter of 2007, market valuations for student lending businesses declined further, reflecting the failed sale of a significant student lender, the market's continued emerging view of the legislative changes and the general difficult environment for lenders in this sector, including higher funding costs and credit deterioration in the industry. As a result, management performed an interim impairment test in accordance with SFAS 142 for the goodwill and intangible assets related to the student lending business as of December 31, 2007 and determined an impairment charge of \$312.1 million, representing the entire goodwill and intangible asset balance, was required.

In addition to the above market events related to the student lending business, the deterioration in the residential mortgage lending market and disruption to the capital markets continued in the fourth quarter of 2007, which contributed to a decline the Company's stock price. As a result, management performed the impairment test for the Corporate Finance, Trade Finance and Vendor Finance segments as of December 31, 2007. The fair value for these segments, which was determined based upon observable market valuation data, exceeded the corresponding segment book values. Accordingly, management determined that no impairment charge for these three segments was required.

Intangible assets consist primarily of customer relationships acquired with acquisitions, with amortization lives up to 20 years, and computer software and related transaction processes, which are being amortized over a 5-year life. An evaluation of the remaining useful lives and the amortization methodology of the intangible assets is performed periodically to determine if any change is warranted.

The Goodwill and Intangible Assets balance was \$1,152.5 million at December 31, 2007. A hypothetical 10% fluctuation in the value equates to \$0.60 in earnings per share. See Note 23 for additional information regarding the current year evaluation and impairment determination.

**FIN 48 Liabilities and Tax Reserves** – We have open tax years in the U.S. and Canada and other jurisdictions that are currently under examination by the applicable taxing authorities, and certain later tax years that may in the future be subject to examination. We periodically evaluate the adequacy of our FIN 48 liabilities and tax reserves, taking into account our open tax return positions, tax assessments received, tax law changes and third party indemnifications. The process of evaluating FIN 48 liabilities and tax reserves involves the use of estimates and a high degree of management judgment. The final determination of tax audits could affect our tax reserves.

Deferred tax assets and liabilities are recognized for the future tax consequences of transactions that have been reflected in the Consolidated Financial Statements. Our ability to realize deferred tax assets is dependent on prospectively generating taxable income by corresponding tax jurisdiction, and in some cases on the timing and amount of specific types of future transactions. Management's judgment regarding uncertainties and the use of estimates and projections is required in assessing our ability to realize net operating loss ("NOL's") and other tax benefit carry-forwards, as these assets expire at various dates beginning in 2008, and they may be subject to annual use limitations under the Internal Revenue Code and other limitations under certain state laws.

Management utilizes historical and projected data, budgets and business plans in making these estimates and assessments. Deferred tax assets relating to NOL's were \$730.2 million, net of valuation allowance, at December 31, 2007. A hypothetical 10% fluctuation in the value of deferred tax assets relating to NOL's equates to \$0.38 in earnings per share. See Note 15 for additional information regarding income taxes.

See Note 1 to the financial statements for a discussion of recently issued accounting pronouncements.

## NON-GAAP FINANCIAL MEASUREMENTS

The SEC adopted regulations that apply to any public disclosure or release of material information that includes a non-GAAP financial measure. The accompanying Management's Discussion and Analysis of Financial Condition and Results of Operations and Quantitative and Qualitative Disclosure about Market Risk contain certain non-GAAP financial measures. The SEC defines a non-GAAP financial measure as a numerical measure of a company's historical or future financial performance, financial position, or cash flows that excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the most directly comparable measure calculated and presented in accordance with GAAP in the financial statements or includes amounts, or is subject to adjustments that have the effect of

including amounts, that are excluded from the most directly comparable measure so calculated and presented.

Non-GAAP financial measures disclosed in this report are meant to provide additional information and insight regarding the historical operating results and financial position of the business and in certain cases to provide financial information that is presented to rating agencies and other users of financial information. These measures are not in accordance with, or a substitute for, GAAP and may be different from or inconsistent with non-GAAP financial measures used by other companies. See footnotes below the tables that follow for additional explanation of non-GAAP measurements.

Non-GAAP Reconciliations as of December 31 (dollars in millions)

<sup>(1)</sup> Managed assets are utilized in certain credit and expense ratios. Securitized assets are included in managed assets because CIT retains certain credit risk and the servicing related to assets that are funded through securitizations.

<sup>(2)</sup> Earning assets are utilized in certain revenue and earnings ratios. Earning assets are net of credit balances of factoring clients. This net amount, which corresponds to amounts funded, is a basis for revenues earned.

<sup>(3)</sup> Total tangible stockholders' equity is utilized in leverage ratios, and is consistent with certain rating agency measurements. Other comprehensive income/losses relating to derivative financial instruments and unrealized gains on securitization investments (both included in the separate component of equity) are excluded from the calculation, as these amounts are not necessarily indicative of amounts which will be realized.

<sup>(4)</sup> The preferred capital securities were called on March 12, 2007.

<sup>(5)</sup> Total net revenues are the combination of net finance revenues and other income.

## FORWARD-LOOKING STATEMENTS

Certain statements contained in this document are “forward-looking statements” within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. All statements contained herein that are not clearly historical in nature are forward-looking and the words “anticipate,” “believe,” “expect,” “estimate,” “plan,” “target” and similar expressions are generally intended to identify forward-looking statements. Any forward-looking statements contained herein, in press releases, written statements or other documents filed with the Securities and Exchange Commission or in communications and discussions with investors and analysts in the normal course of business through meetings, webcasts, phone calls and conference calls, concerning our operations, economic performance and financial condition are subject to known and unknown risks, uncertainties and contingencies. Forward-looking statements are included, for example, in the discussions about:

- our liquidity risk management,
- our credit risk management,
- our asset/liability risk management,
- our funding, borrowing costs and net finance revenue,
- our capital, leverage and credit ratings,
- our operational risks, including success of build-out initiatives and acquisitions,
- legal risks,
- our growth rates,
- our commitments to extend credit or purchase equipment, and
- how we may be affected by legal proceedings.

All forward-looking statements involve risks and uncertainties, many of which are beyond our control, which may cause actual results, performance or achievements to differ materially from anticipated results, performance or achievements. Also, forward-looking statements are based upon management’s estimates of fair values and of future costs, using currently available information. Therefore, actual results may differ materially from those expressed or implied in those statements. Factors, in addition to those disclosed in “Risk Factors”, that could cause such differences include, but are not limited to:

- risks of economic slowdown, downturn or recession,
- industry cycles and trends,
- demographic trends,
- risks inherent in changes in market interest rates and quality spreads,
- funding opportunities and borrowing costs,
- changes in funding markets, including commercial paper, term debt and the asset-backed securitization markets,
- uncertainties associated with risk management, including credit, prepayment, asset/liability, interest rate and currency risks,
- adequacy of reserves for credit losses,
- risks associated with the value and recoverability of leased equipment and lease residual values,
- application of fair value accounting in volatile markets,
- changes in laws or regulations governing our business and operations,
- changes in competitive factors, and
- future acquisitions and dispositions of businesses or asset portfolios.

## ITEM 8. Financial Statements and Supplementary Data

### REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of  
CIT Group Inc.:

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of income, of stockholders' equity and of cash flows present fairly, in all material respects, the financial position of CIT Group Inc. and its subsidiaries at December 31, 2007 and December 31, 2006, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2007 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control – Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing on page 119, under Item 9A. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an under-

standing of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

New York, New York

**NOTE 1 – BUSINESS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES****Principles of Consolidation and Basis of Presentation**

The accompanying consolidated financial statements include the accounts of CIT Group Inc. and its majority owned subsidiaries, and those variable interest entities (VIEs) where the Company is the primary beneficiary. All significant intercompany accounts and transactions have been eliminated. Results of operations of companies purchased are included from the dates of acquisition and for VIEs, from the dates that the Company became the primary beneficiary. Assets held in an agency or fiduciary capacity are not included in the consolidated financial statements. The Company accounts for investments in companies for which it owns a voting interest of 20 percent to 50 percent and for which it has the ability to exercise significant influence over operations and financial decisions using the equity method of accounting. These investments are included in other assets and the Company's proportionate share of net income or loss is included in other income.

The preparation of the consolidated financial statements in conformity with accounting principles generally accepted in the United States (GAAP) requires management to make estimates and assumptions that affect reported amounts and disclosures. Actual results could differ from those estimates and assumptions.

In 2007, the Company changed its basis of presentation for its business segments. For additional information on segments, see Note 21 – Business Segment Information. In addition, the Company revised the classification of cash flow changes in security deposits and aerospace equipment maintenance funds and included these amounts as a separate line item within "Cash Flows From Financing Activities". Previously, these changes had been included in the line item Increase (decrease) in accrued liabilities and payables in "Cash Flows from Operations". The presentation of corresponding 2006 and 2005 balances have been conformed to this presentation. The effect of the revision to the previously issued 2006 and 2005 cash flow statement is a reduction of \$168.8 million and \$34.3 million from cash flows from operations, and corresponding increase in cash flows from financing activities. Further, eligible amounts due to/from derivative counterparties have been reclassified, resulting in a \$418 million increase to other assets and accrued liabilities and payables in the 2006 presentation.

**Financing and Leasing Assets**

CIT extends credit to customers through a variety of financing arrangements, including term loans, lease financing and operating leases. The amounts outstanding on loans, direct financing and leveraged leases are referred to as finance receivables and, when combined with finance receivables held for sale and the net book value of operating lease equipment, represent financing and leasing assets.

Loans and lease receivables are accounted for as held-for-investment (HFI) if management has the intent and ability to hold the receivables for the foreseeable future or until maturity. Loans classified as HFI are recorded at amortized cost. Direct

financing leases classified as HFI are recorded at the aggregate future minimum lease payments plus estimated residual values less unearned finance income. Leveraged leases, for which a major portion of the funding is provided by third party lenders on a non-recourse basis, with CIT providing the balance and acquiring title to the property, are recorded at the aggregate value of future minimum lease payments plus estimated residual value, less non-recourse third party debt and unearned finance revenue. Management performs periodic reviews of estimated residual values with other than temporary impairment recognized in current period earnings. Operating lease equipment is carried at cost less accumulated depreciation and is depreciated to estimated residual value using the straight-line method over the lease term or projected economic life of the asset. Equipment acquired in satisfaction of loans is recorded at the lower of carrying value or estimated fair value, less costs to sell, when acquired.

Maintenance costs incurred that exceed maintenance funds collected for commercial aircraft are not capitalized if they do not provide a future economic benefit and do not extend the useful life of the aircraft. Such costs may include costs of routine aircraft operation and costs of maintenance and spare parts incurred in connection with re-leasing an aircraft and during the transition between leases. For such maintenance costs that are not capitalized, a charge is recorded in general operating expense at the time the costs are incurred. Income recognition related to maintenance funds collected is deferred to the extent management estimates costs will be incurred by subsequent lessees performing scheduled maintenance. Upon the disposition of an aircraft, any excess maintenance funds that exist are recognized as income.

The determination of intent and ability for the foreseeable future is highly judgmental and requires management to make good faith estimates based on information available at the time. Generally, the Company's intent to syndicate and securitize assets is established prior to the origination of specific assets as part of the Company's asset, liability and liquidity risk management process. Similarly, CIT's intent to hold assets that are classified as HFI is generally established prior to origination.

Loans and lease receivables designated for sale, securitization or syndication are classified as finance receivables held for sale and are carried at lower of cost or fair value. The amount by which costs exceeds fair value is recorded as a valuation allowance. Subsequent changes in the valuation allowance are included in the determination of net income in the period in which the change occurs. Loans transferred from the held-for-sale classification to the held-for-investment classification are transferred at the lower of cost or market on the transfer date, which coincides with the date of change in management's intent. The difference between the carrying value of the loan and the market value, if lower, is reflected as a loan discount at the transfer date, which reduces its carrying value. Subsequent to the transfer, the discount is accreted into earnings as an increase to finance revenue over the life of the loan using the interest method.

### Revenue Recognition

Finance revenue includes interest on loans, the accretion of income on direct financing leases and leveraged leases, discount on loans held for investment, and rents on operating leases. Related origination and other nonrefundable fees and direct origination costs are deferred and amortized as an adjustment of finance revenue over the contractual life of the transactions. Revenue on finance receivables other than leveraged leases is recognized on an accrual basis commencing in the month of origination. Leveraged lease revenue is recognized on a basis calculated to achieve a constant after-tax rate of return for periods in which CIT has a positive investment in the transaction, net of related deferred tax liabilities. Rental revenue on operating leases is recognized on a straight line basis over the lease term.

The recognition of revenue on commercial finance receivables is generally suspended and an account is placed on non-accrual status when payment of principal or interest is contractually delinquent for 90 days or more, or earlier when, in the opinion of management, full collection of all principal and interest due is doubtful. To the extent the estimated fair value of collateral does not satisfy both the principal and accrued interest outstanding, accrued but uncollected interest at the date an account is placed on non-accrual status is reversed and charged against revenue. Subsequent interest received is applied to the outstanding principal balance until such time as the account is collected, charged-off or returned to accrual status. The accrual of finance revenue on consumer loans is suspended, and all previously accrued but uncollected revenue is reversed, when payment of principal and/or interest is contractually delinquent for 90 days or more.

### Reserve for Credit Losses on Finance Receivables

The reserve for credit losses is intended to provide for losses inherent in the portfolio and is periodically reviewed for adequacy considering economic conditions, collateral values and credit quality indicators, including historical and expected charge-off experience and levels of and trends in past due loans, non-performing assets and impaired loans.

The reserve for credit losses is determined based on three key components: (1) specific reserves for loans that are impaired under Statement of Financial Accounting Standards (SFAS) 114, based upon the value of underlying collateral or projected cash flows, (2) reserves for estimated losses inherent in the portfolio based upon historical and projected charge-offs and (3) reserves for estimated losses inherent in the portfolio based upon economic risks, industry and geographic concentrations and other factors. In management's judgment, the reserve for credit losses is adequate to provide for credit losses inherent in the portfolio. However, changes in economic conditions or other events affecting specific obligors or industries may necessitate additions or deductions to the reserve for credit losses.

With respect to assets transferred to held for investment from held for sale, a reserve for credit losses is recognized to the extent estimated inherent losses exceed corresponding remaining discount at the applicable balance sheet date.

### Impaired Finance Receivables

Impaired finance receivables include any loans or capital leases of \$500 thousand or greater that are placed on non-accrual status and are subject to periodic individual review by CIT's Asset Quality Review Committee ("AQR"). The AQR, which is comprised of members of senior management, reviews overall portfolio performance, as well as individual accounts meeting certain credit risk grading parameters. Excluded from impaired finance receivables are: 1) certain individual commercial non-accrual finance receivables for which the collateral value supports the outstanding balance and the continuation of earning status, 2) home lending, small ticket leasing and other homogeneous pools of loans, which are subject to automatic charge-off procedures, and 3) short-term factoring customer finance receivables, generally having terms up to 30 days. Impairment occurs when, based on current information and events, it is probable that CIT will be unable to collect all amounts due according to the contractual terms of the financing agreement. Impairment is measured as any shortfall between the estimated value and the recorded investment in the finance receivable, with the estimated value determined using the fair value of the collateral and other cash flows if the finance receivable is collateralized, or the present value of expected future cash flows discounted at the contract's effective interest rate.

### Charge-off of Finance Receivables

Finance receivables are reviewed periodically to determine the probability of loss. Charge-offs are taken after considering such factors as the borrower's financial condition and the value of underlying collateral and guarantees (including recourse to dealers and manufacturers) and the status of collection activities. Such charge-offs are deducted from the carrying value of the related finance receivables. To the extent that an unrecovered balance remains due, a final charge-off is taken at the time collection efforts are deemed no longer useful. Charge-offs are recorded on home lending, consumer and certain small ticket commercial finance receivables beginning at 180 days of contractual delinquency. Collections on accounts previously charged off are recorded as recoveries. With respect to assets transferred to held for investment from held for sale, charge-offs are recognized to the extent the loan carrying value, including remaining unaccreted discount, exceeds the corresponding expected future cash flows for that loan.

### Retained Interests in Securitizations

Pools of assets are originated and sold to special purpose entities which, in turn, issue debt securities backed by the asset pools or sell individual interests in the assets to investors. CIT retains the servicing rights and participates in certain cash flows from the pools. For transactions meeting accounting sale criteria, the present value of expected net cash flows (after payment of principal and interest to certificate and/or note holders and credit-related disbursements) that exceeds the estimated cost of servicing is recorded at the time of sale as a "retained interest." Retained interests in securitized assets are classified as available-for-sale securities and accounted for at fair value in accordance with SFAS No. 115. In its estimation of those net cash flows and retained

interests, management employs a variety of financial assumptions, including loan pool credit losses, prepayment speeds and discount rates. These assumptions are supported by both CIT's historical experience, market trends and anticipated performance relative to the particular assets securitized. Subsequent to the recording of retained interests, estimated cash flows underlying retained interests are periodically updated based upon current information and events that management believes a market participant would use in determining the current fair value of the retained interest. If the analysis indicates that an adverse change in estimated cash flows has occurred, an "other-than temporary" impairment is recorded and included in net income to write down the retained interest to estimated fair value. Unrealized gains are not credited to current earnings, but are reflected in stockholders' equity as part of other comprehensive income.

Servicing assets or liabilities are established when the fees for servicing securitized assets are more or less than adequate compensation to CIT for servicing the assets. CIT securitization transactions generally do not result in servicing assets or liabilities, as typically the contractual fees are adequate compensation in relation to the associated servicing costs. To the extent applicable, servicing assets or liabilities are recorded at fair value and recognized in earnings over the servicing period and are periodically evaluated for impairment.

In February 2005, CIT acquired Education Lending Group, Inc., a specialty finance company principally engaged in providing education loans (primarily U.S. government guaranteed), products and services to students, parents, schools and alumni associations. This business is largely funded with "Education Loan Backed Notes," which are accounted for under SFAS No. 140 "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities." The assets related to these borrowings are owned by a special purpose entity that is consolidated in the CIT financial statements, and the creditors of that special purpose entity have received ownership and, or, security interests in the assets. CIT retains certain call features with respect to these borrowings. The transactions do not meet the SFAS 140 requirements for sales treatment and are, therefore, recorded as secured borrowings and are reflected in the Consolidated Balance Sheet as Finance receivables pledged and Non-recourse, secured borrowings. Certain cash balances, included in cash and cash equivalents, are restricted in conjunction with these borrowings.

In 2007, the Company also funded a portion of the business in the asset-backed markets with on-balance sheet financings secured by home loans, factoring receivables, and certain other commercial loans. Similar to the student loan facilities, these transactions do not meet the accounting (SFAS 140) requirements for sales treatment and are therefore reflected in the Consolidated Balance Sheet as Finance receivables pledged and Non-recourse, secured borrowings.

#### Derivative Financial Instruments

As part of managing economic risk and exposure to interest rate, foreign currency and, in limited instances, credit risk, CIT enters into various derivative transactions in over-the-counter

markets with other financial institutions. To ensure both appropriate use as a hedge and to achieve hedge accounting treatment, whenever possible, derivatives entered into are designated according to a hedge objective against a specific liability, forecasted transaction or, in limited instances, assets. The critical terms of the derivatives, including notional amounts, rates, indices, and maturities, match the related terms of the underlying hedged items. CIT does not enter into derivative financial instruments for speculative purposes.

Major portfolio hedge strategies include: (1) Interest rate risk management to match fund asset portfolio growth. Interest rate swaps, whereby CIT pays a fixed interest rate and receives a variable interest rate, are utilized to hedge either forecasted commercial paper issuances or specific variable-rate debt instruments. These transactions are classified as cash flow hedges and effectively convert variable-rate debt to fixed-rate debt. Interest rate swaps, whereby CIT pays a variable interest rate and receives a fixed interest rate, are utilized to hedge specific fixed-rate debt. These transactions are classified as fair value hedges and effectively convert fixed-rate debt to a variable-rate debt. (2) Currency risk management to hedge foreign funding sources. Cross-currency swaps, whereby CIT pays U.S. dollars and receives various foreign currencies, are utilized to effectively convert foreign-denominated debt to U.S. dollar debt. These transactions are classified as either foreign currency cash flow or foreign currency fair value hedges. (3) Currency risk management to hedge investments in foreign operations. Cross-currency swaps and foreign currency forward contracts, whereby CIT pays various foreign currencies and receives U.S. dollars, are utilized to effectively convert U.S. dollar denominated debt to foreign currency denominated debt. These transactions are classified as foreign currency net investment hedges, or foreign currency cash flow hedges, with resulting gains and losses reflected in accumulated other comprehensive income as a separate component of equity.

Derivative instruments are recognized in the balance sheet at their fair values in other assets and accrued liabilities and payables, and changes in fair values are recognized immediately in earnings, unless the derivatives qualify as cash flow hedges. For derivatives qualifying as hedges of future cash flows, the effective portion of changes in fair value is recorded temporarily in accumulated other comprehensive income as a separate component of equity, and contractual cash flows, along with the related impact of the hedged items, continue to be recognized in earnings. Any ineffective portion of a hedge is reported in current earnings. Amounts accumulated in other comprehensive income are reclassified to earnings in the same period that the hedged transaction impacts earnings.

CIT uses both the "short-cut" method and the "long-haul" method to assess hedge effectiveness. The short-cut method is applied to certain interest rate swaps used for fair value and cash flow hedges of term debt if certain strict criteria are met. This method allows for the assumption of no hedge ineffectiveness if these strict criteria are met at the inception of the derivative, including matching of the critical terms of the debt instrument and the derivative. As permitted under the short-cut method, no further assessment of hedge effectiveness is performed for these transactions.

The long-haul method is applied to other interest rate swaps, non-compound cross-currency swaps and foreign currency forward exchange contracts. For hedges where we use the long-haul method to assess hedge effectiveness, we document, both at inception and over the life of the hedge, at least quarterly, our analysis of actual and expected hedge effectiveness. For hedges of forecasted commercial paper transactions, more extensive analysis using techniques such as regression analysis are used to demonstrate that the hedge has been, and is expected to be, highly effective in off-setting corresponding changes in the cash flows of the hedged item. For hedges of foreign currency net investment positions we apply the “forward” method whereby effectiveness is assessed and measured based on the amounts and currencies of the individual hedged net investments and notional amounts and underlying currencies of the derivative contract. For those hedging relationships in which the critical terms of the entire debt instrument and the derivative are identical, and the creditworthiness of the counterparty to the hedging instrument remains sound, there is an expectation of no hedge ineffectiveness so long as those conditions continue to be met.

The net interest differential, including premiums paid or received, if any, on interest rate swaps, is recognized on an accrual basis as an adjustment to finance revenue or as interest expense to correspond with the hedged position. In the event of early termination of derivative instruments, the gain or loss is reflected in earnings as the hedged transaction is recognized in earnings.

Derivative instruments are transacted with CIT customers using interest rate swaps and other derivatives with our customers as well as derivative transactions with other financial institutions with like terms. These derivative instruments do not qualify for hedge accounting. As a result, changes in fair value of the derivative instruments are reflected in current earnings.

CIT is exposed to credit risk to the extent that the counterparty fails to perform under the terms of a derivative instrument. This risk is measured as the market value of derivative transactions with a positive fair value, reduced by the effects of master netting agreements. We manage this credit risk by requiring that all derivative transactions be conducted with counterparties rated investment grade by nationally recognized rating agencies, with the majority of the counterparties rated “AA” or higher, and by setting limits on the exposure with any individual counterparty. Accordingly, counterparty credit risk is not considered significant.

#### Goodwill and Other Identified Intangibles

SFAS No. 141 “Business Combinations” requires that business combinations be accounted for using the purchase method. The purchase method of accounting requires that the cost of an acquired entity be allocated to the assets acquired and liabilities assumed based on their estimated fair values at the date of acquisition. The difference between the fair values and the purchase price is recognized as goodwill. Identified intangible assets acquired in a business combination are separately valued and recognized on the balance sheet providing they meet certain recognition requirements.

Goodwill represents the excess of the purchase price over the fair value of identifiable assets acquired, less the fair value of liabilities assumed from business combinations. Goodwill is no longer amortized, but instead is assessed for impairment at least annually. During this assessment, management relies on a number of factors, including operating results, business plans, economic projections, anticipated future cash flows and market place data.

Intangible assets consist primarily of customer relationships acquired, which have amortizable lives up to 20 years, and computer software and related transactions processes, which are being amortized over a 5-year life. An evaluation of the remaining useful lives and the amortization methodology of the intangible assets is performed periodically to determine if any change is warranted.

#### Long-Lived Assets

A review for impairment of long-lived assets, such as certain operating lease equipment, is performed at least annually and whenever events or changes in circumstances indicate that the carrying amount of long-lived assets may not be recoverable. Impairment of assets is determined by comparing the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset. If an asset is considered to be impaired, the impairment is the amount by which the carrying amount of the asset exceeds the fair value of the asset. Fair value is based upon discounted cash flow analysis and available market data. Current lease rentals, as well as relevant and available market information (including third party sales for similar equipment, published appraisal data and other marketplace information), is considered, both in determining undiscounted future cash flows when testing for the existence of impairment and in determining estimated fair value in measuring impairment. Depreciation expense is adjusted when projected fair value at the end of the lease term is below the projected book value at the end of the lease term. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to dispose.

#### Other Assets

Assets received in satisfaction of loans are carried at the lower of carrying value or estimated fair value less selling costs, with write-downs of the pre-existing receivable generally reflected in provision for credit losses.

Realized and unrealized gains (losses) on marketable equity securities are recognized currently in operations. Unrealized gains and losses, representing the difference between carrying value and estimated current fair market value, for other debt and equity securities are recorded in other accumulated comprehensive income, a separate component of equity.

Investments in joint ventures are accounted for using the equity method, whereby the investment balance is carried at cost and adjusted for the proportionate share of undistributed earnings or losses. Unrealized intercompany profits and losses are eliminated until realized, as if the joint venture were consolidated.

### Mandatory Convertible Equity Units

The Company has allocated proceeds received upon issuance of the mandatory convertible equity units in accordance with APB 14 based on relative fair values at the time of issuance. The fair value of the equity forward at issuance was zero. The Company has allocated 0.15% of the 3.0% of underwriting commissions paid to the debt as deferred charges based on commissions paid for similar debt issuances in the past. The deferred charges will be amortized over the life of the note (until remarketing date) using the interest method. The remaining underwriting commissions (2.85%) were allocated to the equity forward and recorded as a reduction to paid in capital. The present value of the future quarterly equity forward payments has been recorded at inception as a liability and a reduction to paid-in capital. Interest on the liability component will be recorded as an adjustment to the yield. In computing earnings per share (EPS), the treasury stock method is used. Basic EPS will not be affected until the equity forwards are satisfied and the holders thereof become common stock holders. Diluted EPS will not be affected until CIT's common stock price is over \$42 per share (120% of \$34.98 reference price at security issue). See Note 9 for additional discussion.

The value of the stock purchase contracts is included in equity based on the requirements of SFAS No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity*, and EITF Issue No. 00-19, *Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock*. The equity forwards require physical settlement, and are therefore accounted for as equity.

### Fair Value of Financial Instruments

SFAS No. 107 "Disclosures about Fair Value of Financial Instruments" requires disclosure of the estimated fair value of CIT's financial instruments, excluding leasing transactions accounted for under SFAS 13. These fair value estimates are made at a discrete point in time based on relevant market information and information about the financial instrument, assuming adequate market liquidity. Because no established trading market exists for a significant portion of CIT's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature, involving uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions or estimation methods may significantly affect the estimated fair values. Because of these limitations, there is no assurance that the estimated fair values presented would necessarily be realized upon disposition or sale.

Actual fair values in the marketplace are affected by many factors, such as supply and demand, market liquidity, investment trends, the motivations of buyers and sellers, and geopolitical risks which are not considered in the methodology used to determine the estimated fair values presented. In addition, fair value estimates are based on existing financial instruments without attempting to estimate the value of future business transactions and the value of assets and liabilities that are part of CIT's overall value but are not considered financial

instruments. Significant assets and liabilities that are not considered financial instruments include customer base, operating lease equipment, premises and equipment, assets received in satisfaction of loans, and deferred tax balances. In addition, tax effects relating to the unrealized gains and losses (differences in estimated fair values and carrying values) have not been considered in these estimates and can have a significant effect on fair value estimates. The carrying amounts for cash and cash equivalents approximate fair value because they have short maturities and do not present significant credit risks. Credit-related commitments, as disclosed in Note 17 – "Commitments and Contingencies", are primarily short-term variable-rate contracts whose terms and conditions are individually negotiated, taking into account the creditworthiness of the customer and the nature, accessibility and quality of the collateral and guarantees. Therefore, the fair value of credit-related commitments, if exercised, would approximate their contractual amounts.

### Income Taxes

Deferred tax assets and liabilities are recognized for the expected future taxation of events that have been reflected in the Consolidated Financial Statements. Deferred tax liabilities and assets are determined based on the differences between the book values and the tax basis of particular assets and liabilities, using tax rates in effect for the years in which the differences are expected to reverse. A valuation allowance is provided to offset any net deferred tax assets if, based upon the relevant facts and circumstances, it is more likely than not that some or all of the deferred tax assets will not be realized. U.S. income taxes are generally not provided on undistributed earnings of foreign operations as such earnings are permanently invested. FIN 48 liabilities and tax reserves reflect open tax return positions, tax assessments received, tax law changes and third party indemnifications, and are included in current taxes payable, which is reflected in accrued liabilities and payables.

Effective January 1, 2007, management adopted Financial Accounting Standards Board FSP No. FAS 13-2, ("FAS 13-2") "Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction". The Company applied FAS 13-2 to all its leveraged lease transactions under the transition provision of the interpretation. As a result of the adoption, a direct credit of \$6.5 million after taxes reduced the Accumulated deficit as of January 1, 2007.

Effective January 1, 2007, the Company adopted Financial Accounting Standards Board Interpretation No. 48 ("FIN 48") "Accounting for Uncertainty in Income Taxes", which clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position must meet to be recognized in the financial statements. The Company applied FIN 48 to all its tax positions, including tax positions taken and those expected to be taken, under the transition provision of the interpretation. As a result of the adoption, a direct charge for \$6.4 million increased the Accumulated deficit as of January 1, 2007. As of the date of adoption and after the impact of recognizing the increase in liability noted above, the Company's

unrecognized tax benefits totaled \$211.0 million, the recognition of which would affect the annual effective income tax rate. During the twelve months ended December 31, 2007, the Company recognized approximately \$8.0 million net decrease in the liability for uncertain tax positions, offset by a \$14.2 million increase attributable to foreign currency revaluation.

The Company recognizes potential accrued interest and penalties related to unrecognized tax benefits within its global operations in income tax expense. In conjunction with the adoption of FIN 48, the Company recognized approximately \$48.7 million for the payment of interest and penalties at January 1, 2007, which is included as a component of the \$211.0 million unrecognized tax benefit noted above. During the twelve months ended December, 2007, the Company recognized approximately \$1.8 million net decrease in potential interest and penalties associated with uncertain tax positions offset by a \$7.6 million increase attributable to foreign currency revaluation. After the impact of recognizing the net increase in liability and interest noted above, the Company's unrecognized tax benefits totaled \$223.0 million, the recognition of which would affect the annual effective tax rate. To the extent interest and penalties are not assessed with respect to uncertain tax positions, amounts accrued will be reduced and reflected as a reduction of the overall income tax provision. The Company anticipates that it is reasonably possible that the total unrecognized tax benefits will decrease due to the settlement of audits and the expiration of statute of limitations prior to December 31, 2008 in the range of \$20-\$40 million. See Note 15 - Income Taxes, for additional disclosures.

#### Other Comprehensive Income/Loss

Other comprehensive income/loss includes unrealized gains on securitization retained interests and other available-for-sale investments, foreign currency translation adjustments pertaining to both the net investment in foreign operations and the related derivatives designated as hedges of such investments, the changes in fair values of derivative instruments designated as hedges of future cash flows and certain pension and post-retirement benefit obligations. Amounts are recognized net of tax to the extent applicable.

#### Foreign Currency Translation

CIT has operations in Canada, Europe and several other countries outside the United States. The functional currency for these foreign operations is generally the local currency. The value of the assets and liabilities of these operations is translated into U.S. dollars at the rate of exchange in effect at the balance sheet date. Revenue and expense items are translated at the average exchange rates effective during the year. The resulting foreign currency translation gains and losses, as well as offsetting gains and losses on hedges of net investments in foreign operations, are reflected in accumulated other comprehensive income. Transaction gains and losses resulting from exchange rate changes on transactions denominated in currencies other than the functional currency are included in net income.

#### Other Income

Other income is recognized in accordance with relevant authoritative pronouncements and includes the following:

(1) factoring commissions, (2) commitment, facility, letters of credit, advisory and syndication fees, (3) servicing fees, including servicing of securitized loans, (4) gains and losses from sales of leasing equipment and sales and syndications of finance receivables, (5) gains from and fees related to securitizations including accretion related to retained interests (net of impairment), (6) equity in earnings of joint ventures and unconsolidated subsidiaries, and (7) gains and losses related to certain derivative transactions.

#### Pension and Other Post-retirement Benefits

CIT has a number of funded and unfunded noncontributory defined benefit pension plans covering certain of its U.S. and non-U.S. employees, each of which is designed in accordance with the practice and regulations in the countries concerned. The Company adopted SFAS No. 158 "Employer's Accounting for Defined Benefit Pension and Other Postretirement Plans – an amendment of FASB Statements No. 87, 88, 106, and 132R" on a prospective basis effective December 31, 2006, which requires recognition of the funded status of a benefit plan, measured as the difference between plan assets at fair value and the benefit obligation, in the balance sheet. It also requires the Company to recognize as a component of other comprehensive income, net of tax, the gains or losses and prior service costs or credit that arise during the period but are not recognized as components of net periodic benefit cost pursuant to SFAS 87.

#### Earnings per Share

Basic EPS is computed by dividing net income by the weighted-average number of common shares outstanding for the period. In 2006 and 2005 where net income was positive, diluted EPS includes the potential impact of dilutive securities, including stock options and restricted stock grants. The dilutive effect of stock options is computed using the treasury stock method, which assumes the repurchase of common shares by CIT at the average market price for the period. In 2007, our net loss had the effect of making these dilutive securities anti-dilutive for EPS calculation.

#### Stock-Based Compensation

On January 1, 2006, the Company adopted the revision to SFAS No. 123, "Share-Based Payment" ("FAS 123R"), which requires the recognition of compensation expense for all stock-based compensation plans. As a result, salaries and general operating expenses for 2007 and 2006 include compensation expense related to employee stock option plans and employee stock purchase plans. The Company utilized the modified prospective transition method in the adoption of FAS 123R and compensation expense is recognized over the vesting period (requisite service period), generally three years, under the graded vesting method, whereby each vesting tranche of the award is amortized separately as if each were a separate award. The compensation expense assumes a 4% annual forfeiture rate for employees who are not executive officers and 1% annual forfeiture rate for executive officers.

#### Accounting for Costs Associated with Exit or Disposal Activities

A liability for costs associated with exit or disposal activities, other than in a business combination, is recognized when the liability is

incurred. The liability is measured at fair value, with adjustments for changes in estimated cash flows recognized in earnings.

#### Consolidated Statements of Cash Flows

Cash and cash equivalents includes cash and interest-bearing deposits, which generally represent overnight money market investments of excess cash maintained for liquidity purposes. The Company maintains its cash balances principally at financial institutions located in the United States and Canada. The balances are not insured. Cash and cash equivalents include amounts at CIT Bank, a Utah industrial bank, which are only available for the bank's funding and investment requirements pursuant to the bank's charter. Cash inflows and outflows from commercial paper borrowings and most factoring receivables are presented on a net basis in the Statements of Cash Flows, as their original term is generally less than 90 days.

Cash receipts and cash payments resulting from purchases and sales of loans, securities, and other financing and leasing assets are classified as operating cash flows when these assets are originated/acquired and designated specifically for resale. Cash receipts resulting from sales of loans, beneficial interests and other financing and leasing assets that were not specifically originated/acquired and designated for resale are classified as investing cash inflows.

#### Accounting Pronouncements

On December 4, 2007, the Financial Accounting Standards Board (FASB) issued SFAS No 141 (revised 2007), "Business Combinations" (SFAS 141R). SFAS 141R modifies the accounting for business combinations and requires, with limited exceptions, the acquiring entity in a business combination to recognize 100 percent of the assets acquired, liabilities assumed, and any non-controlling interest in the acquiree at the acquisition date fair value. In addition, SFAS 141R limits the recognition of acquisition-related restructuring liabilities and requires the following: the expensing of acquisition-related and restructuring costs and the acquirer to record contingent consideration measured at the acquisition date fair value. SFAS 141R is effective for new acquisitions consummated on or after January 1, 2009. Early adoption of SFAS 141R is not permitted. The Company is currently evaluating the effect of this standard.

On December 4, 2007, the FASB also issued SFAS No. 160, "Noncontrolling Interests in Consolidated Financial Statements" (SFAS 160). SFAS 160 requires all entities to report noncontrolling (i.e. minority) interests in subsidiaries as equity in the Consolidated Financial Statements and to account for transactions between an entity and noncontrolling owners as equity transactions if the parent retains its controlling financial interest in the subsidiary. SFAS 160 also requires expanded disclosure that distinguishes between the interests of a parent's owners and the interests of a noncontrolling owners of a subsidiary. SFAS 160 is effective for the Company's financial statements for the year beginning on January 1, 2009 and early adoption is not permitted. The adoption of SFAS 160 is not expected to have a material impact on the Company's financial condition and results of operations.

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements" (SFAS 157). SFAS 157 defines fair value, estab-

lishes a framework for measuring fair value under GAAP and enhances disclosures about fair value measurements. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between two market participants on the measurement date. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007. The adoption of SFAS 157 is not expected to have a material effect on the Company's financial statements. For additional information on fair value of certain financial assets and liabilities, see "Fair Value of Financial Instruments" in this Note, and Note 19 – Fair Value of Financial Instruments.

In February 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities", which permits entities to selectively elect fair value measurement for financial assets and liabilities. SFAS 159 is effective for financial statements issued for fiscal years beginning after November 15, 2007. The adoption of this standard is not expected to have a material effect on the Company's financial statements.

#### NOTE 2 – FINANCE RECEIVABLES

The following table presents finance receivables by loans and lease receivables and certain components thereto, as well as finance receivables previously securitized and still serviced by CIT.

##### December 31, (dollars in millions)

	2007	2006
Loans	\$51,591.0	\$47,151.9
Leases	10,945.5	7,913.0
Finance receivables	<u>\$62,536.5</u>	<u>\$55,064.9</u>
Finance receivables securitized and managed by CIT	\$ 6,311.2	\$ 6,261.3
Unearned income	\$ (3,760.4)	\$ (3,501.9)
Equipment residual values	\$ 2,103.9	\$ 1,937.7
Leverage leases <sup>(1)</sup>	\$ 434.4	\$ 496.3

##### Pledged or Encumbered Finance Receivables

Consumer (student lending)	\$ 9,079.4	\$ 4,031.1
Home Lending	7,074.3	–
Trade Finance (factoring)	5,279.7	–
Other <sup>(2)</sup>	2,123.4	280.5
Finance receivables pledged or encumbered	<u>\$23,556.8</u>	<u>\$ 4,311.6</u>

<sup>(1)</sup> Leveraged leases are presented net of third party non-recourse debt payable of \$625.9 million and \$860.3 million at December 31, 2007 and 2006.

<sup>(2)</sup> Other includes \$1.5 billion of acquisition financing, a secured borrowing related to an energy finance project and financing (related to \$262 million of commercial loans) executed via total return swap, under which CIT retains control of, and the full risk related to, these loans.

The following table sets forth the contractual maturities of finance receivables by respective fiscal period.

December 31, (dollars in millions)

	2007		2006	
Due Within Year:				
1	\$13,972.6	22.3%	\$12,709.7	23.1%
2	6,560.1	10.5%	4,879.2	8.9%
3	5,950.7	9.5%	4,371.9	7.9%
4	5,679.1	9.1%	3,563.2	6.5%
5	5,324.3	8.5%	4,147.9	7.5%
Thereafter	25,049.7	40.1%	25,393.0	46.1%
Total	<u>\$62,536.5</u>	<u>100.0%</u>	<u>\$55,064.9</u>	<u>100.0%</u>

The following table sets forth certain information regarding non-performing assets. Non-performing assets reflect both finance receivables on non-accrual status (primarily finance receivables that are ninety days or more delinquent) and assets received in satisfaction of loans (repossessed assets).

December 31, (dollars in millions)

	2007	2006
Non-accrual finance receivables	\$1,162.7	\$662.0
Assets received in satisfaction of loans	215.8	108.5
Total non-performing assets	<u>\$1,378.5</u>	<u>\$770.5</u>
Percentage of finance receivables	<u>2.20%</u>	<u>1.40%</u>

The following table contains information on finance receivables evaluated for impairment and the related reserve for credit losses. The Company excludes homogenous type loans such as home loans and other consumer loans, small-ticket loans and lease receivables, short-term factoring customer finance receivables and certain other receivables from its universe of receivables evaluated for impairment as described in Note 1. Non-performing home lending and consumer balances totaled \$900.8 million, \$454.1 million and \$214.0 million at December 31, 2007, 2006 and 2005. The reserve for credit losses at December 31, 2007, 2006 and 2005 includes approximately \$250 million, \$168 million, and \$137 million for home lending and manufactured housing.

At or for the Years Ended December 31, (dollars in millions)

	2007	2006	2005
Finance receivables considered for impairment	\$249.7	\$261.0	\$302.5
Impaired finance receivables with allowance <sup>(1)</sup>	\$145.1	\$131.0	\$229.7
Allowance <sup>(1)</sup>	\$ 52.1	\$ 53.4	\$ 76.5
Impaired finance receivables with no specific allowance <sup>(2)</sup>	\$104.6	\$130.0	\$ 72.8
Average monthly investment in impaired finance receivables	\$219.4	\$337.6	\$315.5

<sup>(1)</sup> Impaired finance receivables are those loans whose estimated fair value is less than the current recorded value. The allowance is the difference between these two amounts.

<sup>(2)</sup> In these cases, the expected proceeds from collateral liquidation and cash flow sources is sufficient to recover receivable balances.

On June 30, 2007 the Company determined that its home lending receivables portfolio no longer qualified as assets held for investment. Accordingly, approximately \$11.3 billion of unpaid principal balance was transferred to assets held for sale and reduced to the lower of cost or market, resulting in a pretax charge of \$765.3 million. Subsequently, management determined an orderly run-off of a substantial portion of the Company's home lending receivables portfolio, rather than a sale was preferable and \$9.7 billion in then remaining unpaid principal balance (UPB) was transferred at the lower of cost or

market from assets held for sale to assets held for investment. A valuation charge of \$465.5 million pretax was recorded to reduce the portfolio to lower of cost or market value, on a loan by loan basis, prior to transfer to held for investment. The portion of the accumulated valuation allowance related to loans transferred from held for sale to held for investment is accounted for as a discount and is accreted into earnings over the contractual life of the assets using the level yield method.

Consistent with management's determination to hold certain assets for the foreseeable future, the Company has segregated \$7.2 billion UPB of the \$9.7 billion portfolio in a bankruptcy-remote vehicle and issued \$5.2 billion of securities as on-balance sheet, non-recourse secured financings. These financing transactions encumber the assets for their remaining lives, as the terms of the securitizations do not permit the Company to withdraw assets from the securitization vehicles or to substitute comparable assets. The majority of the remaining \$2.5 billion portfolio transferred to held for investment at September 30, 2007 was comprised of re-performing first liens, which had either been delinquent or

modified at some point in the account history, and home equity lines of credit. Management has both the ability and intent to hold over their remaining lives the entire \$9.7 billion of home lending assets transferred to held for investment and to liquidate them in accordance with their contractual terms.

The securities in the on-balance sheet financing (securitization) transactions described above were structured into separate credit tranches and rated AAA through BBB-. The \$5.2 billion private placement of securities sold to investors was comprised entirely of the AAA components of the structure.

### NOTE 3 – RESERVE FOR CREDIT LOSSES

The following table presents changes in the reserve for credit losses.

At or for the Years Ended December 31, (dollars in millions)

	2007	2006	2005
Balance, beginning of period	\$ 659.3	\$ 621.7	\$ 617.2
Provision for credit losses	593.8	245.2	182.4
Provision for credit losses – specific reserving actions <sup>(1)</sup>	–	(23.0)	34.6
Reserves relating to receivables transferred to held for sale	(227.8)	–	–
Reserves applied to acquisitions and other <sup>(2)</sup>	69.2	40.4	38.6
Net additions to the reserve for credit losses	435.2	262.6	255.6
Charged-off – finance receivables	(355.9)	(322.9)	(328.7)
Recoveries on finance receivables previously charged-off	92.9	97.9	77.6
Net credit losses	(263.0)	(225.0)	(251.1)
Balance, end of period	\$ 831.5	\$ 659.3	\$ 621.7
Reserve for credit losses as a percentage of finance receivables	1.33%	1.20%	1.40%
Reserve for credit losses, excluding reserves related to impaired loans, as a percentage of finance receivables excluding guaranteed student loans and home lending <sup>(3)</sup>	1.22%	1.19%	1.24%

<sup>(1)</sup> The 2005 amount relates to a specific reserve for credit losses for estimated incurred losses associated with hurricanes Katrina and Rita. During 2006 that reserve was re-assessed regarding the projected amounts required to cover remaining exposures related to the hurricanes. As result, approximately \$23.0 million was released from the specific reserve and provisioned to other components of the reserve for credit losses.

<sup>(2)</sup> Amounts reflect reserves established for estimated losses inherent in portfolios acquired through purchases or business combinations, as well as foreign currency translation adjustments.

<sup>(3)</sup> Loans guaranteed by the U.S. government are excluded from the calculation.

### NOTE 4 – OPERATING LEASE EQUIPMENT

The following table provides an analysis of the net book value (net of accumulated depreciation of \$2.8 billion at December 31, 2007 and \$2.5 billion at December 31, 2006) of operating lease assets, by equipment type.

December 31, (dollars in millions)

	2007	2006
Commercial aircraft (including regional aircraft)	\$ 7,190.0	\$ 6,283.7
Railcars and locomotives	3,784.7	3,470.1
Information technology	262.7	332.3
Office equipment	453.4	253.0
Communications	231.8	211.6
Medical equipment, machinery and other	687.9	467.2
Total <sup>(1)</sup>	\$12,610.5	\$11,017.9

<sup>(1)</sup> Includes equipment off lease of \$396.8 million and \$159.1 million at December 31, 2007 and 2006.

Rental income on operating leases, which is included in finance revenue, totaled \$2.0 billion, \$1.8 billion and \$1.5 billion for the years ended December 31, 2007, 2006 and 2005. The following table presents future minimum lease rentals due on non-cancelable operating leases at December 31, 2007. Excluded from this table are variable rentals calculated on the level of asset usage, re-leasing rentals, and expected sales proceeds from remarketing operating lease equipment at lease expiration, all of which are components of operating lease profitability.

Years Ended December 31, (dollars in millions)

	2007
2008	\$1,635.6
2009	1,285.3
2010	913.4
2011	638.5
2012	424.8
Thereafter	833.3
Total	<u>\$5,730.9</u>

#### NOTE 5 – CONCENTRATIONS

The following table summarizes the geographic and industry compositions (by obligor) of financing and leasing portfolio assets.

December 31, (dollars in millions)

Geographic	2007		2006	
Northeast	\$14,530.2	18.9%	\$12,715.5	18.7%
West	12,893.0	16.7%	12,113.2	17.9%
Midwest	12,769.5	16.6%	11,994.2	17.7%
Southeast	10,209.1	13.3%	10,079.1	14.8%
Southwest	6,659.0	8.7%	6,642.1	9.8%
Total U.S.	57,060.8	74.2%	53,544.1	78.9%
Canada	4,841.1	6.3%	3,823.3	5.6%
Other international	15,016.9	19.5%	10,534.5	15.5%
Total	<u>\$76,918.8</u>	<u>100.0%</u>	<u>\$67,901.9</u>	<u>100.0%</u>

December 31, (dollars in millions)

Industry	2007		2006	
Student lending <sup>(1)</sup>	\$11,584.9	15.1%	\$ 8,772.7	12.9%
Manufacturing <sup>(2)</sup>	9,923.5	12.9%	8,383.3	12.3%
Home mortgage <sup>(3)(4)</sup>	9,010.4	11.7%	10,087.8	14.9%
Commercial airlines (including regional airlines)	8,625.8	11.2%	7,344.0	10.8%
Retail <sup>(4)</sup>	7,225.6	9.4%	6,759.0	10.0%
Service industries	5,282.7	6.9%	3,966.4	5.8%
Healthcare	4,223.1	5.5%	3,388.4	5.0%
Transportation <sup>(5)</sup>	3,138.8	4.1%	3,063.9	4.5%
Wholesaling	1,889.9	2.5%	2,485.0	3.7%
Communications	1,625.3	2.1%	1,367.0	2.0%
Other (no industry greater than 2.0%)	14,388.8	18.6%	12,284.4	18.1%
Total	<u>\$76,918.8</u>	<u>100.0%</u>	<u>\$67,901.9</u>	<u>100.0%</u>

<sup>(1)</sup> In late 2007, we ceased originating new private student loans. However, the portfolio is expected to grow approximately \$200 million in 2008 due to existing funding commitments. Loans to students at the top 5 institutions represent approximately 50% of the portfolio at December 31, 2007. Includes amounts financed to students of a private pilot training school that filed for bankruptcy in 2008. See Note 27 for additional information.

<sup>(2)</sup> Includes manufacturers of apparel (1.7%), followed by food and kindred products, steel and metal products, transportation equipment, industrial machinery and equipment, electronic equipment, textiles, printing and other industries.

<sup>(3)</sup> Includes receivables from consumers for products in manufactured housing.

<sup>(4)</sup> Includes retailers of apparel (3.7%) and general merchandise (3.6%).

<sup>(5)</sup> Includes rail, bus, over-the-road trucking industries and business aircraft.

<sup>(6)</sup> Geographic concentrations by region for home lending include \$2.0 billion northeast, \$1.6 billion midwest, \$2.7 billion west, \$2.0 billion southeast and \$0.7 billion southwest. The top 5 states include California, Florida, New York, Illinois, and Texas.

**NOTE 6 – RETAINED INTERESTS IN SECURITIZATIONS**

The Company securitizes loans that may be serviced by the Company or the other parties. With each securitization, the company may retain all or a portion of the securities, subordinated tranches, interest-only strips and in some cases, cash reserve accounts, all of which constitute retained interests. Retained interests in securitizations are designated as available for sale and include the following:

December 31, (dollars in millions)

	2007	2006
Retained interests in loans other than home lending:		
Retained subordinated securities <sup>(1)</sup>	\$ 582.4	\$ 304.3
Interest-only strips	426.0	395.5
Cash reserve accounts	251.0	318.7
Sub-total	<u>1,259.4</u>	<u>1,018.5</u>
Retained interests in Home Lending loans:		
Retained subordinated securities	26.4	34.8
Interest-only strips	4.1	6.1
Sub-total	<u>30.5</u>	<u>40.9</u>
Total retained interests in securitizations	<u>\$1,289.9</u>	<u>\$1,059.4</u>

<sup>(1)</sup> 2007 balance includes \$81.9 million retained interests in a healthcare real estate investment trust and \$6.8 million in a collateralized loan obligation.

The following table summarizes the net accretion recognized in pretax earnings, the related impairment charges, and unrealized after-tax gains, reflected as a part of accumulated other comprehensive income.

Years Ended December 31, (dollars in millions)

	2007	2006	2005
Net accretion in pre-tax earnings	\$87.7	\$95.7	\$62.5
Impairment charges, included in net accretion	\$20.7	\$ 2.1	\$39.4
Unrealized after tax gains	\$ 7.8	\$18.4	\$17.0

The following table summarizes the key assumptions used in measuring the retained interest carrying value of the securitization transactions outstanding at the end of 2007. Weighted average prepayment speed is based on a constant prepayment

rate which expresses payments as a function of the declining amount of loans at a compound annual rate. Weighted average expected credit losses are expressed as annual loss rates:

	Consumer Technology Leases	Vendor Finance	Small Business Lending	Home Lending and Manufactured Housing	Recreational Vehicles and Boats
Weighted-average life (in years)	1.4	1.4	3.7	3.9	2.4
Weighted average prepayment speed	44.50%	8.70%	16.89%	20.54%	21.50%
Impact on fair value of 10% adverse change	\$ (34.3)	\$ (0.6)	\$ (1.4)	\$ (1.1)	\$ –
Impact on fair value of 20% adverse change	(63.5)	(1.2)	(2.7)	(2.3)	–
Weighted average expected credit losses <sup>(1)</sup>	–	0.93%	2.48%	0.80%	1.64%
Impact on fair value of 10% adverse change	\$ –	\$ (4.1)	\$ (2.3)	\$ (1.1)	\$ (0.2)
Impact on fair value of 20% adverse change	–	(8.2)	(4.7)	(2.3)	(0.4)
Weighted average discount rate	8.20%	9.09%	14.00%	13.00%	15.00%
Impact on fair value of 10% adverse change	\$ (7.7)	\$ (4.6)	\$ (0.5)	\$ (0.8)	\$ –
Impact on fair value of 20% adverse change	(15.2)	(9.0)	(0.9)	(1.5)	(0.1)
Retained subordinated securities	\$210.3	\$ 233.7	\$ 49.6	\$ 26.4	\$ –
Interest only securities	368.4	52.2	5.4	4.1	–
Cash reserve accounts	142.8	89.3	11.5	–	7.5
Carrying value	<u>\$721.5</u>	<u>\$ 375.2</u>	<u>\$ 66.5</u>	<u>\$ 30.5</u>	<u>\$ 7.5</u>

The following summarizes the key assumptions used in measuring the retained interests as of the date of securitization for transactions completed in 2007.

Weighted average prepayment speed	37.39%	9.06%	16.76%	No activity	No activity
Weighted average expected credit losses <sup>(1)</sup>	0.00%	0.67%	2.27%	No activity	No activity
Weighted average discount rate	8.63%	9.00%	14.00%	No activity	No activity
Weighted average life (in years)	1.47	1.69	3.88	No activity	No activity

<sup>(1)</sup> The weighted average expected credit losses with respect to Consumer Technology Leases are zero, based on a contractual recourse agreement with a third party originator of these assets.

These sensitivities are hypothetical and should be used with caution. Changes in fair value based on a 10 percent or 20 percent variation in assumptions generally cannot be extrapolated because the relationship of the change in assumptions to the change in fair value may not be linear. Also, in this table, the effect of a variation in a particular

assumption on the fair value of the retained interest is calculated without giving effect to any other assumption changes. In reality, changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments and increased credit losses), which might magnify or counteract the sensitivities.

# CIT GROUP INC. AND SUBSIDIARIES – NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following table summarizes static pool credit losses for public securitizations by year of issuance. Static pool credit losses represent the sum of actual losses (life-to-date) and

projected future credit losses, divided by the original balance of each of the respective asset pools in the securitizations. There was no public securitization consummated in 2007.

	2007	2006	2005
Actual and projected losses at:			
December 31, 2007	N/A	1.15%	1.12%
December 31, 2006		0.97%	1.42%
December 31, 2005			1.54%

The table that follows summarizes the roll-forward of retained interest balances and cash flows received from and paid to securitization trusts.

Years Ended December 31, (dollars in millions)

	2007	2006	2005
<b>Retained Interests</b>

## NOTE 8 – DEBT

### Commercial Paper

The following table presents data on commercial paper borrowings.

At or for the year ended December 31, (dollars in millions)

	2007	2006
<b>At year end:</b>		
Borrowing outstanding	\$2,822.3	\$5,365.0
Weighted average interest rate	5.59%	5.33%
Weighted average number of days to maturity	23 days	57 days
<b>For the year ended:</b>		
Daily average borrowings	\$5,171.8	\$4,757.9
Maximum amount outstanding	\$7,131.4	\$6,094.3
Weighted average interest rate	5.40%	5.03%

**Variable and Fixed-rate Senior Unsecured Notes**

The consolidated weighted average interest rates on variable-rate senior notes at December 31, 2007 and December 31, 2006 were 5.09% and 5.32%, respectively. Fixed-rate senior debt outstanding at December 31, 2007 matures at various dates through 2036. The consolidated weighted-average interest rates on fixed-rate senior debt at December 31, 2007 and December 31, 2006 were 5.30% and 5.28%, respectively. Foreign currency-denominated debt (stated in U.S. Dollars) totaled \$9,731.4 million at December 31, 2006, of which \$7,121.1 million was fixed-rate and \$2,610.3 million was variable-rate. Foreign currency-denominated debt (stated in U.S. Dollars) totaled \$10,580.0 million at December 31, 2007, of which \$7,602.7 million was fixed-rate and \$2,977.3 million was variable-rate.

The following tables present total variable-rate and fixed-rate term debt.

**December 31, (dollars in millions)**

<b>Variable-Rate Term Debt</b>	<b>2007</b>	<b>2006</b>
Due in 2007	\$ –	\$ 5,103.4
Due in 2008 <sup>(1)</sup>	7,377.0	6,367.9
Due in 2009	5,956.4	3,890.6
Due in 2010	1,918.8	819.9
Due in 2011	2,238.6	1,930.4
Due in 2012	1,052.1	302.1
Due after 2012	1,345.3	770.0
<b>Total</b>	<b>\$19,888.2</b>	<b>\$19,184.3</b>

<sup>(1)</sup> CIT has \$1.175 billion of AAA rated and \$150 million of AA rated auction rate securities outstanding linked to seasoned student loan securitizations that reset every 28 days. Failed note auctions result in the Company paying an average rate of LIBOR plus 1.5% on the AAA rated securities and LIBOR plus 2.5% on the AA rated securities.

<b>Fixed-Rate Term Debt</b>	<b>2007</b>	<b>2006</b>
Due in 2007	\$ –	\$ 4,163.4
Due in 2008 (rates ranging from 2.70% to 10.48%)	2,730.5	2,664.6
Due in 2009 (rates ranging from 3.35% to 10.48%)	1,785.9	1,410.6
Due in 2010 (rates ranging from 2.75% to 10.48%)	3,346.3	3,069.0
Due in 2011 (rates ranging from 4.25% to 10.48%)	3,787.2	3,461.7
Due in 2012 (rates ranging from 3.80% to 10.48%)	3,670.6	1,895.2
Due after 2012 (rates ranging from 4.45% to 7.80%)	14,157.1	12,442.6
<b>Total</b>	<b>\$29,477.6</b>	<b>\$29,107.1</b>

CIT maintains registration statements with the Securities and Exchange Commission (SEC) covering debt securities that the Company may sell in the future. At December 31, 2007, 4 billion euros of registered but unissued debt securities were

available under a euro medium-term notes program, under which CIT may issue debt securities and other capital market securities in multiple currencies. In addition, CIT maintains an effective shelf registration with the SEC for the issuance of senior and subordinate debt, and other capital market securities that does not require a specific limit under SEC rules. The following table represents information on unsecured committed lines of credit at December 31, 2007, that can be drawn upon to support U.S. commercial paper borrowings.

(dollars in millions)

<b>Expiration</b>	<b>Total</b>	<b>Drawn</b>	<b>Available</b>
October 14, 2008 <sup>(1)</sup>	\$2,100.0	\$ –	\$2,100.0
April 14, 2009	2,100.0	–	2,100.0
April 13, 2010	2,100.0	–	2,100.0
December 6, 2011	1,000.0	–	1,000.0
<b>Total credit lines</b>	<b>\$7,300.0</b>	<b>\$ –</b>	<b>\$7,300.0</b>

<sup>(1)</sup> CIT has the ability to issue up to \$400 million of letters of credit under the \$2.1 billion facility expiring in 2008, which, if utilized, reduces available borrowings under this facility.

The credit line agreements contain clauses that permit extensions beyond the expiration dates upon written consent from the participating lenders. In addition to the above lines, CIT has undrawn, unsecured committed lines of credit of \$175.5 million, which supports the Australia commercial paper program. Certain foreign operations utilize local financial institutions to fund operations. At December 31, 2007, local committed credit facilities totaled \$495.6 million, of which \$250.9 million was undrawn and available. CIT also has a \$750 million, five-year letter of credit facility, primarily in conjunction with the factoring business. As of December 31, 2007, \$308.0 million was undrawn and available under this facility.

The Company's unsecured notes are issued under indentures containing certain covenants and restrictions on CIT. Among the covenants, which also apply to the credit agreements, is a negative pledge provision that limits the granting or permitting of liens on the assets owned by the holding company. In addition, the credit agreements also contain a requirement that CIT maintain a minimum net worth of \$4.0 billion.

**Non-recourse secured borrowings**

Capital markets volatility in the second half of 2007 reduced the Company's use of the unsecured debt and commercial paper markets. A higher proportion of funding was completed through the asset-backed markets. The Company raised approximately \$13.5 billion of proceeds during the year from on-balance sheet financings including: \$5.2 billion collateralized by home loans, \$5.5 billion collateralized by student loans, \$1.3 billion collateralized by factoring receivables and \$1.6 billion secured by equipment loans and leases. These transactions do not meet the accounting (SFAS 140) requirements for sales treatment and are therefore recorded as non-recourse secured borrowings, with the proceeds reflected in Non-recourse, secured borrowings in the Consolidated Balance Sheet. The student lending business ("Student Loan Xpress"), is funded partially with Education Loan Backed

Notes. Certain cash balances are restricted in conjunction with the student lending borrowings.

The following table summarizes the secured borrowings. The consolidated weighted average interest rate on these secured borrowings at December 31, 2007 was 5.63%. Amounts do not include non-recourse borrowings related to leveraged lease transactions.

December 31, (dollars in millions)

	2007	2006
Due in 2007	\$ –	\$1,002.8
Due in 2008	2,546.4	2.8
Due in 2009	1,154.4	274.9
Due in 2010	781.8	–
Due in 2011	640.3	–
Due in 2012	511.2	–
Due after 2012	11,796.2	3,118.0
Total	<u>\$17,430.3</u>	<u>\$4,398.5</u>

#### Junior Subordinated Notes

During 2007, the Company issued \$750 million junior subordinated notes. Interest on the notes will accrue from and including the original issue date up to, but not including, March 15, 2017 at a fixed rate equal to 6.10% per year, payable semi-annually in arrears on March 15 and September 15 of each year. Subsequently, interest on the notes will accrue at an annual rate equal to three-month LIBOR plus a margin equal to 1.815% (181.5 basis points), payable quarterly in arrears on March 15, June 15, September 15 and December 15 of each year, commencing on June 15, 2017. The notes will be subordinate in right of payment of all senior and subordinated indebtedness and will be effectively subordinated to all indebtedness of CIT subsidiaries, except for any indebtedness that explicitly ranks on parity with these notes.

The terms of the outstanding junior subordinated notes restrict the Company's ability to pay dividends on common stock if and so long as CIT does not pay all accrued and unpaid interest on its junior subordinated notes, in full when due. Further, CIT is prohibited from paying interest on the junior subordinated notes if, among other things, the average four quarters fixed charge ratio is less than or equal to 1.10 on the thirtieth day prior to the interest payment date. The average four quarters fixed charge ratio is defined as (a) the sum, for the Company's most recently completed four fiscal quarters,

of the quotient of (x) our earnings (excluding income taxes, interest expense, extraordinary items, goodwill impairment and amounts related to discontinued operations) and (y) interest expense plus preferred dividends, divided by (b) four. The average fixed charge ratio was below 1.10 at December 31, 2007. Notwithstanding the foregoing, CIT may pay such interest to the extent of any net proceeds that we have received from the sale of common stock during the 90 days prior to the 180 days prior to the interest payment date.

#### Mandatory Convertible Debt

In October 2007, the Company issued 27.6 million mandatorily convertible equity units with a stated amount of \$25 each, for proceeds totaling \$690 million. Each equity unit consists of a contract to purchase CIT common stock and a 2.5% beneficial ownership interest in a \$1,000 principal amount senior note due November 15, 2015. The Company is obligated to pay holders of the equity units quarterly at a rate of 0.25% per year of the stated amount of \$25, or \$0.0625 per year. Under the purchase contract, holders are required to purchase CIT common stock no later than November 17, 2010. The equity units are convertible into common stock at any time prior to November 17, 2010 at the option of the holder. Until settlement of a purchase contract, the shares of CIT stock underlying each purchase contract are not outstanding, and the holder of the purchase contract is not entitled to any voting rights, rights to dividends or other distributions or other rights of a holder of our common stock by virtue of holding such purchase contract.

On the purchase date, the market price per share of common stock in relation to the reference price will determine how many shares of stock each equity unit holder will receive. The shares to be delivered will be based on the following conversion table:

Applicable Market Value of Common Shares	Conversion Rate
Less than or equal to \$34.98	0.7147 shares
Between \$34.98 and \$42.00	# of shares = \$25.00 divided by market value
Equal to or greater than \$42.00	0.5952 shares

**NOTE 9 – DEPOSITS**

The following table presents data on deposit balances.

(dollars in millions)

	2007	2006
Deposits Outstanding at December 31,	\$2,745.8	\$2,399.6

Due in 2011 (weighted average rate 5.26%)	124.8	69.5
Due in 2012 (weighted average rate 5.35%)	55.3	51.5
Due after 2012 (weighted average rate 5.37%)	104.0	–
Total	<u>\$2,745.8</u>	<u>\$2,399.6</u>

**NOTE 10 – DERIVATIVE FINANCIAL INSTRUMENTS**

Upon executing a derivative contract, the Company designates the derivative as either held for trading, an economic hedge not designated as a SFAS 133 hedge, or a qualifying SFAS 133 hedge. The designation may change based upon management's reassessment or changing circumstances. Derivatives utilized by the Company principally include swaps and forward settlement contracts. A swap agreement is a contract between two parties to exchange cash flows based on specified underlying notional amounts, assets and/or indices. Financial forward settlement contracts are agreements to buy or sell a quantity of a financial instrument, index, currency or commodity at a predetermined future date, and rate or price. CIT also executes interest rate swaps with customers (and

offsetting swaps with financial institutions) in connection with certain lending arrangements. In addition, the Company utilizes credit derivatives to manage the credit risk associated with its loan portfolio. For additional information see Note 1 *Summary of Significant Accounting Policies*.

The fair value of the Company's derivative contracts is reflected net of cash paid or received pursuant to credit support agreements and is reported on a net-by-counterparty basis in the Company's consolidated statements of financial condition when management believes a legal right of setoff exists under an enforceable netting agreement. The fair value of derivative financial instruments, computed in accordance with the Company's netting policy by counterparty, is set forth below:

December 31, (dollars in millions)

	2007		2006	
	Assets	Liabilities	Assets	Liabilities
Interest rate swaps	\$ 199.3	\$(294.8)	\$134.1	\$(273.8)
Cross currency swaps	862.5	(7.0)	368.0	(6.3)
Foreign currency forward exchange contracts	0.6	(298.7)	15.5	(79.6)
Commodity swap	–	–	6.3	–
Derivatives qualifying as SFAS 133 hedges	1,062.4	(600.5)	523.9	(359.7)
Non-qualifying derivatives	34.6	(65.3)	16.6	(20.0)
Total	<u>\$1,097.0</u>	<u>\$(665.8)</u>	<u>\$540.5</u>	<u>\$(379.7)</u>

# CIT GROUP INC. AND SUBSIDIARIES – NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following table presents additional information regarding qualifying SFAS 133 hedges, specifically the notional principal value of interest rate swaps by class and the corresponding hedged positions.

December 31, (dollars in millions)

2007 Notional	2006 Notional	Hedged Item	Hedge Classification
Variable rate to fixed rate swaps <sup>(1)</sup>			
\$ 9,744.8	\$ 9,435.7	Cash flow variability associated with specific variable-rate debt	Cash flow
1,796.9	2,663.5	Cash flow variability related to forecasted commercial paper issuances	Cash flow
<u>\$11,541.7</u>	<u>\$12,099.2</u>		
Fixed rate to variable rate swaps <sup>(2)</sup>			
<u>\$12,920.9</u>	<u>\$14,026.0</u>	Specific fixed rate debt	Fair value

<sup>(1)</sup> CIT pays a fixed rate of interest and receives a variable rate of interest. These swaps hedge the cash flow variability associated with forecasted commercial paper and specific variable rate debt.

<sup>(2)</sup> CIT pays a variable rate of interest and receives a fixed rate of interest. These swaps hedge specific fixed rate debt instruments.

The following table presents the notional principal amounts of cross-currency swaps by class and the corresponding hedged positions.

December 31, (dollars in millions)

2007	2006	Hedged Item	Hedge Classification	Description
\$4,026.5	\$3,905.5	Foreign denominated debt	Foreign currency fair value	CIT pays a U.S. variable rate of interest and receives a variable foreign rate of interest. These swaps hedge the fair value changes in foreign currency associated with specific foreign denominated debt and are designated as foreign currency fair value hedges.
249.5	249.5	Foreign denominated fixed-rate debt	Foreign currency cash flow	CIT pays a U.S. fixed rate of interest and receives a fixed foreign rate of interest. These swaps hedge the currency and interest rate cash flow variability associated with payments on specific foreign denominated fixed rate debt and are designated as foreign currency cash flow hedges.
27.6	115.3	Foreign currency loans to subsidiaries	Foreign currency cash flow	CIT receives a U.S. fixed rate of interest and pays a fixed foreign rate of interest. These swaps hedge the currency cash flow variability associated with payments on specific fixed-rate foreign denominated inter-company receivables and are designated as foreign currency cash flow hedges.
–	4.9	Foreign currency loans to subsidiaries	Foreign currency fair value	CIT receives a U.S. variable rate of interest and pays a variable foreign rate of interest. These swaps hedge the fair value currency changes associated with specific foreign denominated variable rate inter-company receivables and are designated as foreign currency fair value hedges.
<u>\$4,303.6</u>	<u>\$4,275.2</u>			

CIT sells various foreign currencies forward. These contracts are designated as either cash flow hedges of specific foreign denominated inter-company receivables or as net investment hedges of foreign denominated investments in subsidiaries.

December 31, (dollars in millions)

2007	2006	Hedged Item	Hedge Classification
\$1,394.4	\$ 904.1	Foreign currency loans to subsidiaries	Foreign currency cash flow
3,853.8	4,205.9	Foreign currency equity investments in subsidiaries	Foreign currency net investment
<u>\$5,248.2</u>	<u>\$5,110.0</u>		

The table that follows summarizes the nature and notional amount of economic hedges that do not qualify for hedge accounting under SFAS 133.

December 31, (dollars in millions)

2007 Notional	2006 Notional	Type of Swaps/Caps
\$17,564.1	\$1,365.1	Interest rate swaps
349.6	307.0	Cross-currency swaps
254.4	213.0	Foreign exchange forward contracts
3,184.1	946.8	Interest rate caps
168.0	128.0	Credit default swaps
<u>\$21,520.2</u>	<u>\$2,959.9</u>	

The U.S. dollar interest rate swaps included in the table above relates to the following: (1) \$11.6 billion in notional amount of interest rate swaps executed in conjunction with the third quarter on balance sheet securitization of home lending receivables, whereby CIT entered into offsetting swap transactions with the bankruptcy remote securitization trust formed for the transaction and with a third party commercial bank, each totaling \$5.8 billion in notional amount and (2) \$2.5 billion in notional amount of interest rate swaps related to

The following table presents the notional principal amounts of foreign currency forward exchange contracts and the corresponding hedged positions.

customer derivative programs at December 31, 2007. CIT has also extended \$3.2 billion in interest rate caps in connection with its customer derivative program. The notional amounts of derivatives related to the customer program include both derivative transactions with CIT customers, as well as offsetting transactions with third parties with like notional amounts and terms.

CIT also has certain cross-currency swaps, certain U.S. and Canadian dollar interest rate swaps, and interest rate caps that are economic hedges of certain interest rate and foreign currency exposures.

CIT has entered into credit default swaps, with terms of 5 years, to economically hedge certain CIT credit exposures.

In addition to the amount in the preceding table, CIT had \$2.0 billion and \$1.2 billion in notional amount of interest rate swaps outstanding with securitization trusts at December 31, 2007 and 2006 to protect the trusts against interest rate risk. CIT entered into offsetting swap transactions with third parties totaling \$2.0 billion and \$1.2 billion in notional amount at December 31, 2007 and 2006 to insulate the Company from the related interest rate risk.

Hedge ineffectiveness occurs in certain cash flow hedges, and was recorded as either an increase or decrease to interest expense as presented in the following table.

(dollars in millions)

	Ineffectiveness	Increase/Decrease to Interest Expense
Year ended December 31, 2007	\$0.6	Decrease
Year ended December 31, 2006	\$0.1	Decrease
Year ended December 31, 2005	\$1.5	Increase

## NOTE 11 – STOCKHOLDERS' EQUITY

## Preferred Stock

On July 26, 2005, the Company issued \$500 million aggregate amount of Series A and Series B preferred equity securities. The key terms are as follows.

	Series A	Series B
<b>Securities issued</b>	Stated value \$350 million, comprised of 14 million shares of 6.35% non-cumulative fixed rate preferred stock, \$0.01 par value per share, with a liquidation value of \$25.	Stated value \$150 million, comprised of 1.5 million shares of 5.189% non-cumulative adjustable rate preferred stock, \$0.01 par value per share, with a liquidation value of \$100.
<b>Dividends</b>	Annual fixed-rate of 6.35%, payable quarterly, when and if declared by the Board of Directors. Dividends are non-cumulative.	Annual fixed-rate of 5.189%, payable quarterly, when and if declared by the Board of Directors, through September 15, 2010, and thereafter at an annual floating rate spread over a pre-specified benchmark rate. Dividends are non-cumulative.
<b>Redemption/maturity</b>	No stated maturity date. Not redeemable prior to September 15, 2010. Redeemable thereafter at \$25 per share at the option of CIT.	No stated maturity date. Not redeemable prior to September 15, 2010. Redeemable thereafter at \$100 per share at the option of CIT.
<b>Voting rights</b>	No voting rights.	No voting rights.

The terms of the outstanding preferred stock restrict the Company's ability to pay dividends on its common stock if and so long as CIT does not make distributions on our preferred stock, in full when due. Further, CIT is prohibited from declaring dividends on its preferred stock if, among other things, the average four quarters fixed charge ratio is less than or equal to 1.10 on the dividend declaration date or on the thirtieth day prior to the interest payment date, as the case may be. The average four quarters fixed charge ratio is defined as (a) the sum, for our most recently completed four fiscal quarters, of the quotient of (x) our earnings (excluding income taxes, interest expense, extraordinary items, goodwill impairment and amounts related to discontinued operations) and (y) interest expense plus preferred dividends, divided by (b) four. The aver-

age fixed charge ratio was below 1.10 at December 31, 2007. Notwithstanding the foregoing, CIT may declare such dividends to the extent of any net proceeds that CIT has received from the sale of common stock during the 90 days prior to the declaration of the dividend or the 180 days prior to the interest payment date. As discussed in Note 26, on January 23, 2008, CIT Group Inc. entered into an Underwriting Agreement with Morgan Stanley & Co. Incorporated and Citigroup Global Markets Inc., pursuant to which CIT agreed to sell shares of its common stock for an aggregate purchase price of up to \$31.5 million. As a result, the Company sold 1,281,519 shares on January 30, 2008 and satisfied the conditions necessary to permit the declaration and payment of preferred stock dividends payable February 29, 2008.

## Common Stock

The following table summarizes changes in common stock outstanding for the respective periods.

	Issued	Less Treasury	Outstanding
Balance at December 31, 2006	213,555,940	(15,260,564)	198,295,376
Treasury shares purchased	–	(12,877,316)	(12,877,316)
Shares held to cover taxes on vesting restricted shares	–	(291,232)	(291,232)
Stock options exercised	–	2,879,016	2,879,016
Shares issued for acquisitions	–	726,206	726,206
Shares sold to allow preferred dividend payment	–	235,800	235,800
Employee stock purchase plan participation	–	123,516	123,516
Restricted and performance shares issued	834,237	–	834,237
Balance at December 31, 2007	<u>214,390,177</u>	<u>(24,464,574)</u>	<u>189,925,603</u>

**Accumulated Other Comprehensive Income/(Loss)**

The following table details the components of accumulated other comprehensive income/(loss), net of tax.

December 31, [dollars in millions]

	2007	2006	2005
Changes in fair values of derivatives qualifying as cash flow hedges	\$ (96.6)	\$ 34.2	\$ 27.6
Foreign currency translation adjustments	319.1	132.2	73.5
Minimum pension liability adjustments	17.1	(2.5)	(3.2)
Unfunded pension liability <sup>(1)</sup>	(52.7)	(52.7)	–
Unrealized gain on available for sale equity and securitization investments	7.9	18.4	17.3
Total accumulated other comprehensive income	<u>\$194.8</u>	<u>\$129.6</u>	<u>\$115.2</u>

<sup>(1)</sup> The adoption of SFAS 158 at December 31, 2006 resulted in recording various unfunded post-retirement liabilities

The change in the fair values of derivatives qualifying as cash flow hedges related to variations in market interest rates, as these derivatives hedge the interest rate variability associated with an equivalent amount of variable-rate debt, including commercial paper. See Note 10 – Derivatives for additional information. The change in foreign currency translation adjustments balance during 2007 reflects the strengthening of

various foreign currencies against the U.S. dollar, particularly the Canada dollar, British Pound and Euro, partially offset by corresponding hedging activity, on an after tax basis.

The components of the adjustment to Accumulated Other Comprehensive Income for derivatives qualifying as hedges of future cash flows are presented in the following table:

	Fair Value Adjustments of Derivatives	Income Tax Effects	Total Unrealized Gain (Loss)
Balance at December 31, 2005 – unrealized gain	\$ 48.4	\$(20.8)	\$ 27.6
Changes in values of derivatives qualifying as cash flow hedges	10.8	(4.2)	6.6
Balance at December 31, 2006 – unrealized gain	59.2	(25.0)	34.2
Changes in values of derivatives qualifying as cash flow hedges	(230.0)	99.2	(130.8)
Balance at December 31, 2007 – unrealized loss	<u>\$(170.8)</u>	<u>\$ 74.2</u>	<u>\$ (96.6)</u>

The unrealized loss as of and for the year ended December 31, 2007 reflects lower market interest rates since the inception of the hedges. The Accumulated Other Comprehensive Income (along with the corresponding swap asset or liability) will be adjusted as market interest rates change over the remaining

lives of the swaps. Assuming no change in interest rates, approximately \$39 million, net of tax, of the Accumulated Other Comprehensive Income as of December 31, 2007 is expected to be reclassified to earnings over the next twelve months as contractual cash payments are made.

**NOTE 12 – EARNINGS PER SHARE**

The reconciliation of the numerator and denominator of basic EPS with that of diluted EPS is presented.

(dollars in millions, except per share amounts, shares in thousands)

	<u>Net Income / (Loss)</u>	<u>Common Shares</u>	<u>Per Share Amount</u>
<b>Year Ended December 31, 2007</b>			
Basic EPS:	\$ (111.0)	191,412	\$(0.58)
Effect of dilutive securities:			
Restricted shares		–	
Stock options		–	
<b>Diluted EPS</b>	<u>\$ (111.0)</u>	<u>191,412</u>	<u>\$(0.58)</u>
<b>Year Ended December 31, 2006</b>			
Basic EPS:	\$1,015.8	198,912	\$ 5.11
Effect of Dilutive Securities:			
Restricted shares		1,912	
Stock options		2,287	
<b>Diluted EPS</b>	<u>\$1,015.8</u>	<u>203,111</u>	<u>\$ 5.00</u>
<b>Year Ended December 31, 2005</b>			
Basic EPS:	\$ 936.4	206,059	\$ 4.54
Effect of Dilutive Securities:			
Restricted shares		1,706	
Stock options		2,969	
<b>Diluted EPS</b>	<u>\$ 936.4</u>	<u>210,734</u>	<u>\$ 4.44</u>

Options and restricted shares that do not have a dilutive effect are not included in the denominator and averaged approximately 15.2 million shares, 13.8 million shares and

16.0 million shares for the years ended December 31, 2007, 2006 and 2005, respectively.

**NOTE 13 – OTHER INCOME**

The following table sets forth the components of other income.

Years Ended December 31, (dollars in millions)

	<u>2007</u>	<u>2006</u>	<u>2005</u>
Fees and other income	\$ 527.2	\$ 547.3	\$ 489.6
Gains on receivable sales and syndication fees	180.7	298.3	163.3
Factoring commissions	226.6	233.4	235.7
Gains on sales of leasing equipment	117.1	122.8	91.9
Gains on securitizations	45.3	47.0	39.1
Gain on sale of Dell Financial Services joint venture	247.1	–	–
Gain on portfolio and asset dispositions	236.1	–	181.3
Gain on derivatives	–	–	43.1
<b>Total other income</b>	<u>\$1,580.1</u>	<u>\$1,248.8</u>	<u>\$1,244.0</u>

**NOTE 14 – SALARIES AND GENERAL OPERATING EXPENSES**

The following table sets forth the components of salaries and general operating expenses.

Years Ended December 31, (dollars in millions)

	2007	2006	2005
Salaries and employee benefits	\$ 892.5	\$ 903.5	\$ 695.8
Other operating expenses	586.2	479.1	418.0
Total	<u>\$1,478.7</u>	<u>\$1,382.6</u>	<u>\$1,113.8</u>

**NOTE 15 – INCOME TAXES**

The (benefit)/provision for income taxes is comprised of the following.

Years Ended December 31, (dollars in millions)

	2007	2006	2005
Current federal income tax provision	\$ 7.0	\$ 42.4	\$ 20.4
Deferred federal income tax (benefit)/provision	(238.0)	159.2	298.0
Total federal income taxes	<u>(231.0)</u>	<u>201.6</u>	<u>318.4</u>
Current state and local income taxes	19.1	36.9	40.8
Deferred state and local income taxes	(28.3)	0.4	26.6
Total state and local income taxes	<u>(9.2)</u>	<u>37.3</u>	<u>67.4</u>
Foreign income taxes	45.8	125.5	78.4
Total (benefit)/provision for income taxes	<u>\$(194.4)</u>	<u>\$364.4</u>	<u>\$464.2</u>

The tax effects of temporary differences that give rise to significant portions of the deferred income tax assets and liabilities are presented below.

December 31, (dollars in millions)

	2007	2006
Assets:		
Net operating loss carry forwards	\$ 730.2	\$ 127.0
Provision for credit losses	217.8	216.9
Alternative minimum tax credits	242.2	157.0
Accrued liabilities and reserves	95.7	120.7
Other	233.0	192.3
Total deferred tax assets	<u>1,518.9</u>	<u>813.9</u>
Liabilities:		
Operating leases	(1,138.3)	(1,010.3)
Leveraged leases	(171.1)	(366.3)
Loans and direct financing leases	(584.7)	(397.3)
Securitizations	(132.5)	(128.9)
Joint ventures	(52.4)	(16.4)
Other	(79.4)	(69.7)
Total deferred tax liabilities	<u>(2,158.4)</u>	<u>(1,988.9)</u>
Net deferred tax (liability)	<u>\$ (639.5)</u>	<u>\$(1,175.0)</u>

At December 31, 2007, CIT had U.S. federal net operating losses of approximately \$1,584.6 million, including \$77.5 million acquired in the 2005 purchase of the Education Lending Group, which expire in various years beginning in 2023. In addition, CIT has gross deferred tax assets of approximately \$214.6 million and \$7.0 million related to state net operating losses (NOLs) and capital losses, respectively, that will expire in various years beginning in 2008. Federal and state operating losses may be subject to annual use limitations under Section 382 of the Internal Revenue Code of 1986, as amended, and other limitations under certain state laws. Management believes that CIT will have sufficient taxable income in future years and can avail itself of tax planning strategies in order to fully utilize the federal losses. Accordingly, CIT does not believe a valuation allowance is required with respect to these federal net operating losses. Based on management's assessment as to realizability, the net deferred tax liability includes a valuation allowance of approximately \$46.1 million and \$10.4 million against the recorded deferred tax asset for state NOLs and capital losses at December 31, 2007 and 2006, respectively.

Deferred federal income taxes have not been provided on approximately \$1,150.8 million of cumulative earnings of foreign subsidiaries that the Company has determined to be permanently reinvested. It is not practicable to estimate the amount of tax that might be payable on these permanently reinvested earnings.

## Percentage of Pretax Income Years Ended December 31,

	2007	2006	2005
Federal income tax rate	35.0%	35.0%	35.0%
Increase (decrease) due to:			
State and local income taxes, net of federal income tax benefit	2.2	1.7	3.1
Tax on international operations	64.2	(6.3)	(3.4)
Non-deductible goodwill impairment charge	(36.9)	–	–
Deferred tax release associated with aircraft transfers	5.1	(5.1)	(1.2)
Other	1.8	0.5	(0.7)
Effective tax rate	<u>71.4%</u>	<u>25.8%</u>	<u>32.8%</u>

In 2007 significant noteworthy items impacted the relationship between recorded tax benefits, pre-tax earnings and the computed effective tax rate. Pre-tax losses were \$272.3 million for the year ended December 31, 2007, with a corresponding tax benefit of \$194.4 million, resulting in a reported effective tax rate of 71.4%. The effective tax rate differs from the U.S. federal tax rate of 35% primarily due to state and local income taxes, foreign earnings taxed at lower rates and other tax benefits associated with our international operations, as well as permanent differences between book and tax treatment of certain items (including the goodwill impairment writedown).

Due to the existence of the 2007 pre-tax loss, the items above that are the reconciling differences between the federal statutory tax rate and the effective tax rate have an atypical relationship to the baseline statutory rate when compared to their effect in prior periods. Specifically, reconciling items that would typically reduce the effective rate, such as the impact of the reduced tax rates applied to foreign earnings, serve to increase the effective rate in 2007. This is due to the fact that the tax benefit derived from the pre-tax losses are reduced by foreign earnings taxed at a lower rate, which results in a higher overall tax benefit than if the foreign earnings were taxed at the US statutory tax rate of 35%. The greater tax benefit against a pre-tax loss results in a higher effective tax rate. Similarly, the impact of the non-deductible goodwill impairment charge when applied against a pre-tax loss, is reflected as a reduction to the computed effective tax rate, as it reduces the tax benefit.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

## December 31, [dollars in millions]

Balance at January 1, 2007	\$211.0
Additions based on tax positions related to the current year	20.0
Additions based on tax positions related to prior years	13.6
Reductions for tax positions of prior years	(29.1)
Settlements and payments	(11.6)
Expiration of the statute of limitations	(2.7)
Foreign currency revaluation	21.8
Balance at December 31, 2007	<u>\$223.0</u>

The Company adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48), on January 1, 2007. As a result of the implementation of FIN 48, the Company recognized an increase of \$6.4 million in the liability for uncertain tax positions, which was accounted for as a decrease to the January 1, 2007 balance of retained earnings. As of the date of adoption and after the impact of recognizing the increase in liability noted above, the Company's liability for uncertain tax positions totaled \$211.0 million (comprised of unrecognized tax benefits and associated interest and penalties), the recognition of which would affect the effective tax rate. During the twelve months ended December 31, 2007, the Company recognized an approximate \$9.8 million net decrease in the liability for unrecognized tax benefits, offset by a \$21.8 million increase attributable to foreign currency revaluation.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits within its global operations in income tax expense. In conjunction with the adoption of FIN 48, the Company recognized approximately \$48.7 million for the payment of interest and penalties at January 1, 2007, which is included as a component of the \$211.0 million liability for uncertain tax positions noted above. During the twelve months ended December 31, 2007, the Company recognized an approximate \$1.8 million net decrease in interest and penalties associated with uncertain tax positions, offset by a \$7.6 million increase attributable to foreign currency revaluation.

After the impact of recognizing the net increase in liability and interest noted above, the Company's unrecognized tax benefits totalled \$223.0 million, the recognition of which would affect the effective tax rate. To the extent interest and penalties are not assessed with respect to uncertain tax positions, amounts accrued will be reduced and reflected as a reduction of the overall income tax provision. The Company anticipates that it is reasonably possible that the total unrecognized tax benefits will decrease due to the settlement of audits and the expiration of statute of limitations prior to December 31, 2008 in the range of \$20 - \$40 million.

The Company's U.S. Federal income tax returns for 2002 through 2004 are currently under examination by the Internal Revenue Service. The audit of the 1997 through 2001 years is currently being reviewed, having been returned by Appeals to

an examining agent for further development of the disputed issues. The Canadian tax authorities are considering issues to which the Company has filed objections or Voluntary Disclosure relating to the 1992 through 2002 tax years. In addition, the Company has subsidiaries in various states, provinces and countries that are currently under audit for years ranging from 1997 through 2005. Management does not anticipate the resolution of these matters will result in a material change to its financial position or results of operations.

The Company, as required by regulation, has made payments totaling approximately \$93 million (CAD) to Revenue Canada ("CRA") in connection with disputed tax positions related to certain leasing transactions. The Company is engaged in settlement discussions with CRA with respect to these transactions, the outcome and timing of which is uncertain. These leasing transactions were originated by a predecessor prior to being acquired in a stock transaction by the Company. The predecessor shareholders provided an indemnification with respect to the tax attributes of these transactions. Management of the Company believes that the settlement of these transactions with CRA, or with the indemnitors, would not have a material impact on the Company's financial position, cash flows or results of operations.

#### NOTE 16 – RETIREMENT, OTHER POSTRETIREMENT AND OTHER BENEFIT PLANS

##### Retirement and Postretirement Medical and Life Insurance Benefit Plans

CIT has a number of funded and unfunded noncontributory defined benefit pension plans covering certain of its U.S. and non-U.S. employees, each of which is designed in accordance with the practices and regulations in the countries concerned. Retirement benefits under the defined benefit pension plans are based on the employee's age, years of service and qualifying compensation. CIT's funding policy is to make contributions to the extent such contributions are not less than the minimum required by applicable laws and regulations, are consistent with our long-term objective of ensuring sufficient funds to finance future retirement benefits, and are tax deductible as actuarially determined. Contributions are charged to the salaries and employee benefits expense on a systematic basis over the expected average remaining service period of employees expected to receive benefits.

The largest plan is the CIT Group Inc. Retirement Plan (the "Plan"), which accounts for 72% of the total pension benefit obligation at December 31, 2007. The Plan covers U.S. employees of CIT who have completed one year of service and have attained the age of 21. The Company also maintains a Supplemental Retirement Plan for employees whose benefit in the Plan is subject to Internal Revenue Code limitations.

On January 2, 2007, CIT acquired Barclay's UK and German vendor finance businesses. The acquisition included an unfunded defined benefit plan with a total benefit obligation of \$16.0 million as at January 2, 2007. CIT accounted for this acquisition using the purchase accounting method. As such, the projected benefit obligation was recognized as a new liability on the balance sheet. The recognition of this liability, at the date of

acquisition, resulted in the elimination of any (a) previously existing unrecognized net gain or loss, (b) unrecognized prior service cost and (c) unrecognized net transition obligation.

The Plan has a "cash balance" formula that became effective January 1, 2001, at which time certain eligible members had the option of remaining under the Plan formula as in effect prior to January 1, 2001. Under the cash balance formula, each member's accrued benefits as of December 31, 2000 were converted to a lump sum amount, and every month thereafter, the balance is credited with a percentage (5% to 8% depending on years of service) of the member's "Benefits Pay" (comprised of base salary, plus certain annual bonuses, sales incentives and commissions). These balances also receive periodic interest credits, subject to certain government limits. The interest credit was 4.78%, 4.73%, and 4.88% for the plan years ended December 31, 2007, 2006, and 2005, respectively. Prior to January 1, 2008, upon termination or retirement after five years of employment, the amount credited to a member is to be paid in a lump sum or converted into an annuity at the option of the member. The member may also elect to defer payment until age 65.

During the fourth quarter of 2006, CIT completed amendments to its non-qualified pension plans, generally to comply with IRS Section 409A regulations. Also, as of December 31, 2006 CIT has included the impact of reducing the vesting period of the Plan from five years to three years recognizing the impact of Pension Protection Act on "cash balance" formula plans. These amendments increased the benefit obligations of those plans by \$25.6 million, and is being recognized ratably in earnings over the remaining service life of the plan participants.

CIT also provides certain healthcare and life insurance benefits to eligible retired U.S. employees. For most eligible retirees, the healthcare benefit is contributory and the life insurance benefit is noncontributory. Salaried participants generally become eligible for retiree healthcare benefits upon completion of ten years of continuous service after attaining age 50. Individuals hired prior to November 1999 become eligible for postretirement benefits after 11 years of continuous service after attaining age 44. Generally, the medical plan pays a stated percentage of most medical expenses, reduced by a deductible as well as by payments made by government programs and other group coverage. The retiree health care benefit includes a limit on CIT's share of costs for all employees who retired after January 31, 2002. The plans are funded on a pay as you go basis.

The discount rate assumptions used for pension and postretirement benefit plan accounting reflect the prevailing rates available on high-quality, fixed-income debt instruments with maturities that match the benefit obligation. The rate of compensation used in the actuarial model for pension accounting is based upon the Company's long-term plans for such increases, taking into account both market data and historical pay increases.

The disclosure and measurement dates included in this report for the Retirement and Postretirement Medical and Life Insurance Plans are December 31, 2007, 2006 and 2005.

The Company adopted SFAS No. 158 "Employer's Accounting for Defined Benefit Pension and Other Postretirement Plans" on a prospective basis effective December 31, 2006, which required

recognition of the funded status of retirement and other postretirement benefit plans, measured as the difference between plan assets at fair value and the benefit obligation, in the balance sheet. It also required the Company to recognize as a component of other comprehensive income, net of tax, the gains or losses and prior service costs or credit that arise during the period but are not recognized as components of net periodic benefit cost.

The following tables set forth the change in benefit obligation, plan assets and funded status of the retirement plans as well as the net periodic benefit cost. All periods presented include amounts and assumptions relating to the Plan, the Supplemental Retirement Plan, an Executive Retirement Plan and various international plans.

#### Retirement Benefits

For the years ended December 31, (dollars in millions)

	2007	2006	2005
<i>Change in Benefit Obligation</i>			
Benefit obligation at beginning of period	\$376.7	\$330.5	\$314.5

Prior service cost recognition	\$ 2.7	\$ 2.6	

During 2007, reductions in workforce resulted in a curtailment under the US Retirement and Supplemental plans and resulted in one time charges of \$0.2 million. Obligations for these plans were re-measured during the third quarter using a 6.50% discount rate. The expense for the third and fourth quarters of 2007 reflect the re-measurement.

Special termination benefits in connection with the sale of CIT's construction equipment leasing business in 2007 resulted in a one time charge for the US Retirement plan in the amount of \$0.7 million.

Expected long-term rate of return assumptions for pension assets are based on projected asset allocation and historical

and expected future returns for each asset class. Independent analysis of historical and projected asset class returns, inflation, and interest rates are provided by our investment consultants and reviewed as part of the process to develop our assumptions.

The accumulated benefit obligation for all defined benefit pension plans was \$359.0 million, \$330.2 million, and \$286.8 million, at December 31, 2007, 2006, and 2005, respectively. Plans with accumulated benefit obligations in excess of plan assets relate primarily to non-qualified U.S. plans and certain international plans.

CIT maintains a "Statement of Investment Policies and Objectives" which specifies investment guidelines pertaining to the investment, supervision and monitoring of pension assets so as to ensure consistency with the long-term objective of ensuring sufficient funds to finance future retirement benefits. The policy asset allocation guidelines allow for assets to be invested between 55% to 70% in Equities and 25% to 45% in Fixed-Income investments. In addition, the policy guidelines allow for additional diversifying investments in other asset classes or securities such as Hedge Funds, Real

Estate and Commodities, as approved by the Investment Committee. The policy provides specific guidance related to asset class objectives, fund manager guidelines and identification of both prohibited and restricted transactions, and is reviewed on a periodic basis by both the Investment Committee of CIT and the Plans' external investment consultants to ensure the long-term investment objectives are achieved. Members of the Committee are appointed by the Chief Executive Officer of CIT and include the Chief Financial Officer, General Counsel, and other senior executives.

There were no direct investment in equity securities of CIT or its subsidiaries included in the pension plan assets at December 31, 2007, 2006, and 2005, respectively. CIT expects to contribute \$8.7 million to its pension plans and \$4.1 million to its other postretirement benefit plans in 2008.

Company assets, which are not included in the retirement plan assets in the preceding tables, are earmarked for the non-qualified U.S. Executive pension plan obligation.

The following tables set forth data relating to postretirement plans.

Pre-65	10.00%	10.00%	11.50%
Post-65	8.50%	8.00%	9.75%
Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)	5.00%	5.25%	5.00%
Year that the rate reaches the ultimate trend rate	2018	2018	2018

Included in our Postretirement Benefit Obligation at December 31, 2007 is a reduction to the liability for the transition of LTD medical benefits to our Postemployment Benefit Obligation. Preretirement medical obligations for employees on LTD are now being accounted for under FAS 112, "Employers' Accounting for Postemployment Benefits".

Assumed healthcare cost trend rates have a significant effect on the amounts reported for the healthcare plans. The Company relies on both external and historical data to determine healthcare trend rates. A one-percentage point change in assumed healthcare cost trend rates would have the following estimated effects.

## Postretirement Benefits

Period end postretirement benefit obligation	\$(1.6)	\$(1.8)	\$(2.3)
Total of service and interest cost components	\$(0.1)	\$(0.1)	\$(0.1)

The Medicare Prescription Drug, Improvement and Modernization Act of 2003 introduced a prescription drug benefit under Medicare (Medicare Part D) as well as a federal subsidy to sponsors of retiree healthcare benefit plans that provide a benefit that is at least actuarially equivalent to Medicare Part D. In accordance with FASB Staff Position No.

FAS 106-2, "Accounting and Disclosure Requirements related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003", CIT began prospective recognition of the effects of the subsidy in the third quarter 2004. Projected benefit payments and the effects of the Medicare Rx subsidy recognition are as follows:

For the years ended December 31, (dollars in millions)

<b>2007</b>			
<b>Projected Benefit Payments</b>	<b>Gross</b>	<b>Medicare Rx Subsidy</b>	<b>Net</b>

### Savings Incentive Plan

CIT also has a number of defined contribution retirement plans covering certain of its U.S. and non-U.S. employees, designed in accordance with conditions and practices in the countries concerned. Employee contributions to the plans are subject to regulatory limitations and the specific plan provisions. The largest plan is the CIT Group Inc. Savings Incentive Plan, which qualifies under section 401(k) of the Internal Revenue Code and accounts for 72% of CIT's total Savings Incentive Plan expense for the year ended December 31, 2007. CIT's expense is based on specific percentages of employee contributions and plan administrative costs and aggregated \$21.7 million, \$26.9 million and \$20.0 million for the years ended December 31, 2007, 2006, and 2005.

### Corporate Annual Bonus Plan

Annual bonuses are paid under the CIT Group Inc. Annual Bonus Plan. The value and number of awards depends on a variety of factors, including corporate performance and individual performance during the fiscal period for which awards are made and is subject to approval by the Compensation Committee of the Board of Directors (the "Committee"). Bonus payments of \$85.1 million for the year ended December 31, 2007, were paid in February 2008. For the year ended December 31, 2006, \$101.4 million in bonuses were awarded.

### Stock-Based Compensation

In May 2006, CIT adopted the Long-Term Incentive Plan (the "LTIP") as approved by shareholders, which provides for grants of stock-based awards. As of that date, the LTIP replaced the prior plan, the Long-Term Equity Compensation Plan (the "ECP"), under which no new awards have been or will be made, although awards granted under the ECP prior to that date remain outstanding. The number of shares of common stock that may be issued for all purposes under the LTIP is 7,500,000, plus any shares that remained available for issuance under the ECP, including shares that become available for issuance upon cancellation or expiration of awards granted under the ECP without having been exercised or settled. Including 36,000,000 shares originally approved for issuance under the ECP, the combined maximum number of shares allowed for issuance under the LTIP equals 43,500,000. Of that total, the maximum number of shares that may be issued in the form of Restricted Stock, Restricted Stock Units, Performance Stock, Performance Units and Other Awards that are payable in shares granted under the LTIP equals 9,500,000 (5,000,000 and 4,500,000 for the ECP and LTIP).

Stock Options granted to employees during 2007 have a vesting schedule of one third per year for three years, a 7-year term from the date of grant and were issued with strike prices equal to the fair market value of the common stock on each respective grant date [i.e., in each case a date on which quarterly earnings were publicly announced].

Restricted stock and restricted stock units granted to employees in 2007 vest either one-third per year for three years, 100% after three years, or 100% immediately. Performance Shares were granted during 2007 with a subsequent three-year performance period.

Restricted cash units were granted to employees during 2007 under the LTIP, which settle 100% in cash and do not result in the issuance of any Shares of common stock. All of the restricted cash units granted during 2007 vest 100% after three years.

On January 1, 2006, the Company adopted the revision to SFAS No. 123, "Share-Based Payment" ("FAS 123R"), which requires the recognition of compensation expense for all stock-based compensation plans. As a result, salaries and general operating expenses included \$24.3 million of compensation expense related to employee stock option plans and employee stock purchase plans (\$13.0 million after tax, \$0.07 EPS) for the year ended December 31, 2007 and \$30.8 million (\$17.9 million after tax, \$0.09 EPS) for the year ended December 31, 2006. Compensation expense is recognized over the vesting period (requisite service period), generally three years, under the graded vesting method, whereby each vesting tranche of the award is amortized separately as if each were a separate award. The compensation expense assumes a 4% annual

forfeiture rate for employees who are not executive officers and 1% annual forfeiture rate for executive officers.

The Company utilized the modified prospective transition method in the adoption of FAS 123R and therefore: (1) the 2006 expense applies to 2006 awards and the unvested awards as of December 31, 2005, and (2) the comparable compensation expense for the year ended December 31, 2005 is presented on a proforma basis in the table below as if CIT had accounted for employee stock option plans and employee stock purchase plans under the fair value method of FAS 123R:

**For the years ended December 31,**  
(dollars in millions except per share data)

	<b>2005</b>
Net income available for common shareholders as reported	\$936.4
Stock-based compensation expense – fair value method, after tax	(19.2)
Pro forma net income (loss)	<u>\$917.2</u>
Basic earnings per share as reported	\$ 4.54
Basic earnings per share pro forma	\$ 4.45
Diluted earnings per share as reported	\$ 4.44
Diluted earnings per share pro forma	\$ 4.35

Data for the stock option plans is summarized as follows:

**For the years ended December 31,**

	<b>2007</b>		<b>2006</b>	
	<b>Options</b>	<b>Weighted Average Price Per Option</b>	<b>Options</b>	<b>Weighted Average Price Per Option</b>
Outstanding at beginning of period	14,988,882	\$41.78	17,470,879	\$37.80

July Grant	857,199	\$49.17	998,651	\$47.28
Granted – Other	29,024	\$57.41	114,567	\$54.78
Exercised	(2,879,016)	\$33.59	(4,031,429)	\$27.70
Forfeited	(1,605,749)	\$59.82	(331,406)	\$46.56
Outstanding at end of period	<u>12,262,634</u>	\$42.94	<u>14,988,882</u>	\$41.78
Options exercisable at end of period	8,719,880	\$40.43	9,588,027	\$40.82
Options unvested at end of period	3,542,754	\$49.13	5,400,855	\$43.49

During 2007, 1,729,493 options were granted to employees as part of the annual long-term incentive process. In addition, 29,024 CIT options were issued to independent members of the Board of Directors. In 2006, 1,656,590 options were granted to employees as part of the annual long-term incentive process. In addition, 195,080 CIT options were granted to new hires as well as for retention purposes and 29,168 were issued to independent members of the Board of Directors.

The weighted average fair value of new options granted was \$13.76 and \$11.61 for the years ended December 31, 2007 and 2006. The fair value of new options granted was determined at the date of grant using the Black-Scholes option-pricing model, based on the following assumptions.

The intrinsic value of options exercised during 2007 and 2006 was \$70.2 million and \$99.2 million respectively. The intrinsic value of both outstanding and exercisable options as of December 31, 2007 was \$2.6 million.

Option Issuance Range	Expected Option Life Range	Average Dividend Yield	Expected Volatility Range	Risk Free Interest Rate
<b>2007</b>				
January, 2007	2-4 Years	1.41%	23.3% - 24.4%	4.81% - 4.91%

<b>2006</b>				
January, 2006	3-5 Years	1.60%	20.5% - 24.1%	4.28% - 4.29%
January, 2006 - Section 16b (named officers)	4-5 Years	1.60%	23.4% - 24.1%	4.28% - 4.29%
April, 2006	3-5 Years	1.50%	20.7% - 25.1%	4.87% - 4.91%
May, 2006 - Director Grant	4-5 Years	1.50%	24.1% - 25.1%	5.00% - 5.01%
July, 2006	3-5 Years	1.70%	23.6% - 27.4%	5.02% - 5.06%
July, 2006 - Section 16b (named officers)	4-5 Years	1.70%	26.5% - 27.4%	5.02% - 5.04%
October, 2006	3-5 Years	1.60%	21.6% - 25.4%	4.73% - 4.77%
October, 2006 - Director Grant	4-5 Years	1.60%	23.2% - 25.4%	4.73% - 4.75%

For employees other than 16(b) officers (selected senior executives), the expected term is equal to the vesting period of the options plus 12 months for grants made in 2007. Since each vesting segment was valued separately, the expected term assumptions are therefore two, three and four years for segments that vest in one, two and three years respectively. For 16(b) officers, the expected life calculation is based on the average of the longest and shortest possible exercise periods given the restrictions on the exercise of options under the Executive Equity Retention Policy. Under this methodology, the expected life assumptions are 57 months, 62 months and 67 months for each tranche. The entire cost of options granted is immediately recognized for those employees who are retire-

ment eligible as of the grant date. For options granted to employees who will reach retirement eligibility within the three year vesting period, the cost of the grants is amortized from the grant date through retirement eligibility date. The volatility assumption is equal to CIT's historical volatility using weekly closing prices for the period commensurate with the expected option term, averaged with the implied volatility for CIT's publicly traded options. The individual yield reflected the Company's current dividend yield. The risk free interest rate reflects the implied yield available on U.S. Treasury zero-coupon issues (as of the grant date for each grant) with a remaining term equal to the expected term of the options.

The following table summarizes information about stock options outstanding and exercisable at December 31, 2007 and 2006.

Range of Exercise Price	Options Outstanding			Options Exercisable	
	Number Outstanding	Weighted Remaining Average Contractual Life	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price

	<u>14,988,882</u>			<u>9,588,027</u>	

The unrecognized pretax compensation cost related to employee stock options was \$15.1 million at December 31, 2007, which is expected to be recognized in earnings over a weighted-average period of 0.9 years. The total intrinsic value (in-the-money value to employees), before taxes, related to options exercised during the year ended December 31, 2007 was \$70.2 million and the related cash received by the Company was \$96.7 million. The Company's tax benefit related to these employee gains was \$10.3 million.

#### Employee Stock Purchase Plan

Effective January 1, 2006, eligibility for participation in the Employee Stock Purchase Plan (the "ESPP") includes employees of CIT and its participating subsidiaries who are customarily employed for at least 20 hours per week, except that any employees designated as highly compensated are not eligible to participate in the ESPP. The ESPP is available to employees in the United States and to certain international employees. Under the ESPP, CIT is authorized to issue up to 1,000,000 shares of common stock to eligible employees. Eligible employees can choose to have between 1% and 10% of their base salary withheld to purchase shares quarterly, at a purchase price equal to 85% of the fair market value of CIT common stock on the last business day of the quarterly offering period. The amount of common stock that may be purchased by a participant through the ESPP is generally limited to \$25,000 per year. A total of 123,516 shares were

purchased under the plan in 2007 and 87,521 shares were purchased under the plan in 2006.

#### Restricted Stock

Performance Shares awarded under the LTIP totaled 834,182 in 2007. Final payouts of these awards are based upon a subsequent three-year performance period covering 2007 – 2010. In 2006 and 2005, 839,894 and 761,635 performance shares were awarded under the ECP (as the LTIP was adopted in May 2006). The performance targets for these awards are based upon a combination of consolidated return on common equity measurements and compounded annual EPS growth rates, which ultimately determine the number of common shares issued.

Restricted shares awarded were 7,517, 119,248 and 133,867 for 2007, 2006 and 2005. These shares were awarded at the fair market value on the applicable grant dates and have either a one-third per year or three-year cliff-vest period. In addition, 8,348, 8,123 and 9,369 shares were granted during 2007, 2006 and 2005 to independent members of the Board of Directors, who elected to receive shares in lieu of cash compensation for their retainer. The restricted shares issued to directors in lieu of cash compensation vest on the first anniversary of the grant date. As part of the 2007 annual share grant, 9,364 shares were awarded to the independent members of the Board of Directors, which have a one-third per year vesting schedule.

## CIT GROUP INC. AND SUBSIDIARIES – NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

For the years ended December 31, 2007, 2006 and 2005, \$17.9 million, \$44.1 million and \$43.3 million, respectively, of expenses are included in salaries and general operating expenses related to restricted stock.

The following tables summarize the restricted stock activity for 2007 and 2006:

	2007			
	Restricted Shares/Units		Performance Shares	
	Number of Shares	Weighted Average Grant Date Value	Number of Shares	Weighted Average Grant Date Value
Unvested at beginning of the year	263,522	\$47.01	2,002,822	\$45.24
Granted to employees	7,517	\$56.54	834,182	\$56.54
Granted to independent directors	17,712	\$49.30	n/a	n/a
Granted pursuant to performance above target related to 2004-2006 performance shares	n/a	n/a	260,742	\$38.88
Forfeited	(5,000)	\$43.91	(328,898)	\$52.43
Vested	(94,064)	\$46.51	(782,240)	\$38.88
Unvested at end of period	<u>189,687</u>	<u>\$47.94</u>	<u>1,986,608</u>	<u>\$50.46</u>

The fair value of restricted stock and performance shares that vested during 2007 was \$5.0 million and \$47.3 million respectively.

	2006			
	Restricted Shares/Units		Performance Shares	
	Number of Shares	Weighted Average Grant Date Value	Number of Shares	Weighted Average Grant Date Value
Unvested at beginning of the year	1,298,099	\$29.74	1,392,153	\$39.89
Granted to employees	119,248	\$52.32	839,894	\$53.35
Granted to independent directors	18,187	\$50.61	n/a	n/a
Forfeited	(15,614)	\$37.18	(229,225)	\$42.46
Vested	(1,156,398)	\$28.36	–	\$ –
Unvested at end of period	<u>263,522</u>	<u>\$47.01</u>	<u>2,002,822</u>	<u>\$45.24</u>

The fair value of restricted stock that vested during 2006 was \$53.7 million.

### Restricted Cash Units

Restricted cash units awarded under the LTIP were 55,131 for 2007. These units were awarded at the fair market value on the applicable grant dates and have a three-year cliff-vest period.

The following table summarizes restricted cash unit activity for 2007:

	Number of Units	Weighted Average Grant Date Fair Value
Outstanding at beginning of year	–	\$ –
Granted	85,129	\$40.60
Forfeited	(3,560)	\$49.17
Vested	–	\$ –
Outstanding at end of year	<u>81,569</u>	<u>\$40.22</u>

**NOTE 17 – COMMITMENTS AND CONTINGENCIES**

Financing and leasing asset commitments, referred to as loan commitments or lines of credit, are agreements to lend to customers subject to the customers' compliance with con-

tractual obligations. The accompanying table summarizes these and other credit-related commitments, as well as purchase and funding commitments.

December 31, (dollars in millions)

	Due to Expire		2007	2006
	Within One Year	After One Year	Total Outstanding	Total Outstanding
<b>Financing Commitments</b>				
Financing and leasing assets	\$2,059.3	\$11,003.3	\$13,062.6	\$12,601.4
<b>Letters of credit and acceptances</b>				
Standby letters of credit	506.9	236.7	743.6	632.5
Other letters of credit	365.9	–	365.9	426.9
Guarantees, acceptances and other recourse obligations	218.9	13.4	232.3	315.0
<b>Purchase and Funding Commitments</b>				
Aerospace purchase commitments	1,408.0	5,814.0	7,222.0	5,799.0
Other manufacturer purchase commitments	653.5	82.0	735.5	1,176.0
Sale-leaseback payments	140.9	1,785.0	1,925.9	1,740.8
<b>Other</b>				
Liabilities for unrecognized tax benefits	20.0	203.1	223.1	204.6

In addition to the amounts shown in the table above, unused, cancelable lines of credit to customers in connection with a third-party vendor program, which may be used to finance additional technology product purchases, amounted to approximately \$34.5 billion and \$27.7 billion at December 31, 2007 and 2006. These uncommitted vendor-related lines of credit represent CIT's estimated proportional amount and can be reduced or canceled by CIT at any time without notice. Our experience indicates that customers typically will not exercise their entire available line of credit at any point in time.

In the normal course of meeting the needs of its customers, CIT also enters into commitments to provide financing, letters of credit and guarantees. Standby letters of credit obligate CIT to pay the beneficiary of the letter of credit in the event that a CIT client to whom the letter of credit was issued does not meet its related obligation to the beneficiary. These financial instruments generate fees and involve, to varying degrees, elements of credit risk in excess of the amounts recognized in the consolidated balance sheets. To minimize potential credit risk, CIT generally requires collateral and other forms of credit support from the customer.

Guarantees are issued primarily in conjunction with CIT's factoring product in Trade Finance, whereby CIT provides the client with credit protection for its trade receivables without actually purchasing the receivables. The trade terms are generally sixty days or less. If the customer is unable to pay according to the contractual terms, then CIT purchases the receivables from the client. As of December 31, 2007, CIT had no outstanding liabilities relating to these credit-related com-

mitments or guarantees, as amounts are generally billed and collected on a monthly basis. The table above includes recourse obligations of approximately \$13.4 million at December 31, 2007 that were incurred in conjunction with financing and leasing asset sales.

CIT's firm purchase commitments relate predominantly to purchases of commercial aircraft and rail equipment. The commitments to purchase commercial aircraft are with both Airbus Industrie and The Boeing Company. These are fixed price purchase commitments subject to customary price increases for future changes in inflation and manufacturing components. The aerospace equipment purchases are contracted for a specific model aircraft, using a baseline aircraft specification at fixed prices, which reflect discounts from fair market purchase prices prevailing at the time of commitment. The delivery price of an aircraft may also change depending on the final specifications of the aircraft, including engine thrust, aircraft weight and seating configuration. Equipment purchases are recorded at delivery date at the final purchase price paid, which includes purchase price discounts, price changes relating to specification changes and price increases relating to inflation and manufacturing components. Accordingly, the commitment amounts detailed in the preceding table are based on estimated values. Pursuant to existing contractual commitments, 107 aircraft remain to be purchased (23 within 2008). Lease commitments are in place for all of the aircraft to be delivered over the next twelve months. The order amount excludes unexercised CIT options to purchase aircraft. The aircraft deliveries to CIT are scheduled periodically through 2016.

Outstanding commitments to purchase equipment to be leased to customers, other than aircraft, relates primarily to rail equipment. Rail equipment purchase commitments are at fixed prices subject to price increases for inflation and manufacturing components. The time period between commitment and purchase for rail equipment is generally less than 18 months. Additionally, CIT is party to railcar sale-leaseback transactions under which it is obligated to pay a remaining total of \$1,925.9 million, or approximately \$143 million per year for 2008 through 2012, with remaining payments due through 2030. These lease payments are expected to be more than offset by rental income associated with re-leasing the assets, subject to actual railcar utilization and rentals. In conjunction with sale-leaseback transactions, CIT has guaranteed all obligations of the related consolidated lessee entities.

CIT has guaranteed the public and private debt securities of a number of its wholly-owned, consolidated subsidiaries, including those disclosed in Note 25 - Summarized Financial Information of Subsidiaries. In the normal course of business, various consolidated CIT subsidiaries have entered into other credit agreements and certain derivative transactions with financial institutions that are guaranteed by CIT. These transactions are generally used by CIT's subsidiaries outside of the U.S. to allow the local subsidiary to borrow funds in local currencies.

#### NOTE 18 – LEASE COMMITMENTS

The following table presents future minimum rentals under noncancellable long-term lease agreements for premises and equipment at December 31, 2007.

Years Ended December 31, (dollars in millions)

	Amount
2008	\$ 46.5
2009	39.4
2010	33.8
2011	31.8
2012	29.7
Thereafter	218.2
Total	<u>\$399.4</u>

In addition to fixed lease rentals, leases generally require payment of maintenance expenses and real estate taxes, both of which are subject to rent escalation provisions. Minimum payments have not been reduced by minimum sublease rentals of \$18.2 million due in the future under noncancellable subleases.

Rental expense, net of sublease income on premises and equipment, was as follows.

Years Ended December 31, (dollars in millions)

	2007	2006	2005
Premises	\$57.7	\$47.0	\$34.6
Equipment	8.5	8.5	8.3
Less sublease income	(4.6)	(6.2)	(7.1)
Total	<u>\$61.6</u>	<u>\$49.3</u>	<u>\$35.8</u>

## NOTE 19 – FAIR VALUES OF FINANCIAL INSTRUMENTS

Estimated fair values, recorded carrying values and various assumptions used in valuing CIT's financial instruments are set forth below.

December 31, (dollars in millions)

	2007 Asset/(Liability)		2006 Asset/(Liability)	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Finance receivables-loans <sup>(1)</sup>	\$ 50,878.1	\$ 50,690.1	\$ 46,587.3	\$ 46,413.5
Finance receivables-held for sale <sup>(2)</sup>	1,606.0	1,606.0	1,793.7	1,793.7
Retained interests in securitizations <sup>(2)</sup>	1,289.9	1,289.9	1,059.4	1,059.4
Other assets <sup>(3)</sup>	2,056.5	2,056.5	1,382.0	1,382.0
Commercial paper <sup>(4)</sup>	(2,822.3)	(2,822.3)	(5,365.0)	(5,365.0)
Deposits <sup>(5)</sup>	(2,783.9)	(2,834.4)	(2,430.8)	(2,403.3)
Variable-rate senior notes (including accrued interest payable) <sup>(6)</sup>	(20,011.7)	(18,693.6)	(19,306.8)	(19,309.4)
Fixed-rate senior notes (including accrued interest payable) <sup>(6)</sup>	(29,914.5)	(27,568.0)	(29,493.2)	(29,633.0)
Non-recourse, secured borrowings <sup>(7)</sup>	(17,464.5)	(17,172.9)	(4,420.2)	(4,420.2)
Junior Subordinated notes and convertible debt	(1,440.0)	(1,068.0)	–	–
Preferred capital securities (including accrued interest payable) <sup>(8)</sup>	–	–	(257.8)	(266.9)
Credit balances of factoring clients and other liabilities <sup>(9)</sup>	(8,077.8)	(8,077.8)	(7,179.3)	(7,179.3)
Derivative financial instruments, net <sup>(10)</sup>	431.2	431.2	160.8	160.8

<sup>(1)</sup> The fair value of performing fixed-rate loans was estimated based upon a present value discounted cash flow analysis, using interest rates that were being offered at the end of the year for loans with similar terms to borrowers of similar credit quality. Discount rates used in the present value calculation range from 4.20% to 21.60% for December 31, 2007 and 4.80% to 10.66% for December 31, 2006. The maturities used represent the average contractual maturities adjusted for prepayments. For floating-rate loans that reprice frequently and have no significant change in credit quality, fair value approximates carrying value. The net carrying value of lease finance receivables not subject to fair value disclosure totaled \$10.9 billion at December 31, 2007 and \$7.8 billion at December 31, 2006. Finance receivables at December 31, 2007 include home lending loans with a carrying value of \$8,467.5 million and an estimated fair value of \$8,125.1 million.

<sup>(2)</sup> Finance receivables-held for sale are recorded at lower of cost or market on the balance sheet. Given current market conditions lower of cost or market is equal to fair value. Fair values of retained interests in securitizations are calculated utilizing current and anticipated credit losses, prepayment speeds and discount rates.

<sup>(3)</sup> Other assets subject to fair value disclosure include accrued interest receivable, certain investment securities, servicing assets and miscellaneous other assets. The carrying amount of accrued interest receivable approximates fair value. The carrying value of other assets not subject to fair value disclosure totaled \$3.0 billion at December 31, 2007 and \$2.4 billion at December 31, 2006.

<sup>(4)</sup> The estimated fair value of commercial paper approximates carrying value due to the relatively short maturities.

<sup>(5)</sup> The fair value of deposits was estimated based upon a present value discounted cash flow analysis. Discount rates used in the present value calculation range from 4.83% to 5.48% at December 31, 2007 and 5.15% to 5.34% at December 31, 2006.

<sup>(6)</sup> The difference between the carrying value of fixed-rate senior notes, variable rate senior notes and preferred capital securities and the corresponding balances reflected in the consolidated balance sheets is accrued interest payable. These amounts are excluded from the other liabilities balances in this table. Most fixed-rate notes were valued from quoted market estimates. In rare instances where market estimates were not available, values were computed using a present value discounted cash flow analysis with a discount rate approximating current market rates for issuances by CIT of similar term debt at the end of the year. Discount rates used in the present value calculation ranged from 3.51% to 9.21% at December 31, 2007 and 5.28% to 6.16% at December 31, 2006. The spread is substantially wider this year due to the low interest rate environment and the widening of CIT credit spreads.

<sup>(7)</sup> Non-recourse, secured borrowings includes Student Lending and Home Lending at fair value as well as Trade Finance and Vendor Finance where the fair value is approximately par.

<sup>(8)</sup> Preferred capital securities were valued using a present value discounted cash flow analysis with a discount rate approximating current market rates of similar issuances at the end of the year.

<sup>(9)</sup> The estimated fair value of credit balances of factoring clients approximates carrying value due to their short settlement terms. Other liabilities include accrued liabilities and deferred federal income taxes. Accrued liabilities and payables with no stated maturities have an estimated fair value that approximates carrying value. The carrying value of other liabilities not subject to fair value disclosure totaled \$0.7 billion and \$1.2 billion December 31, 2007 and 2006.

<sup>(10)</sup> CIT enters into derivative financial instruments for hedging purposes (FAS 133 and economic hedges) only. The estimated fair values are calculated internally using market data and represent the net amount receivable or payable to terminate the agreement, taking into account current market rates. See Note 10 – "Derivative Financial Instruments" for notional principal amounts and fair values associated with the instruments.

**NOTE 20 – CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS**

Until December 31, 2007, CIT was a partner with Dell Inc. ("Dell") in Dell Financial Services L.P. ("DFS"), a joint venture that offered financing to Dell's customers. The joint venture provided Dell with financing and leasing capabilities that were complementary to its product offerings and provides CIT with a source of new financings. In December 2007, Dell exercised its right to buy CIT's interest and the Company sold its 30% ownership interest in Dell Financial Services (DFS) joint venture. The pre-tax gain on the sale of Dell Financial Services joint venture was \$247.1 million. CIT has the right to purchase a minimum percentage of DFS's finance receivables on a declining scale through January 2010. See disclosures in Management's Discussion and Analysis Concentrations and Acquisitions and Dispositions for additional information.

Prior to and subsequent to the sale, CIT regularly purchases finance receivables from DFS at a premium, portions of which are typically securitized within 90 days of purchase from DFS. CIT has certain recourse to DFS on defaulted contracts. In accordance with the joint venture agreement, net income and losses generated by DFS as determined under GAAP were allocated 70% to Dell and 30% to CIT. The DFS board of directors voting representation was equally weighted between designees of CIT and Dell, with one independent director. DFS was not consolidated in CIT's financial statements and was accounted for under the equity method. Financing and leasing assets related to the DFS program included in the CIT Consolidated Balance Sheet (but excluding certain related international receivables originated directly by CIT) were approximately \$0.6 billion and \$1.3 billion and securitized assets included in managed assets were approximately \$2.3 billion and \$2.4 billion at December 31, 2007 and 2006, respectively. For the year ended December 31, 2007, CIT's 30% proportionate share of pretax income related to the joint venture was approximately \$81.6 million, including \$15 million in the fourth quarter of 2007, which was reported in other income. CIT had no equity investment in or loans to the joint venture at December 31, 2007 due to the sale, and \$181 million at December 31, 2006.

CIT also has a joint venture arrangement with Snap-on Incorporated ("Snap-on") that has a similar business purpose and model to the DFS arrangement described above, including limited credit recourse on defaulted receivables. The agreement with Snap-on extends until January 2009. CIT and Snap-on have 50% ownership interests, 50% board of direc-

tors' representation, and share income and losses equally. The Snap-on joint venture is accounted for under the equity method and is not consolidated in CIT's financial statements. At both December 31, 2007 and 2006, financing and leasing assets were approximately \$1.0 billion and securitized assets included in managed assets were less than \$0.1 billion.

Since December 2000, CIT has been a joint venture partner with Canadian Imperial Bank of Commerce ("CIBC") in an entity that is engaged in asset-based lending in Canada. Both CIT and CIBC have a 50% ownership interest in the joint venture, and share income and losses equally. This entity is not consolidated in CIT's financial statements and is accounted for under the equity method. CIT's investment in and loans to the joint venture were approximately \$440 million and \$224 million at December 31, 2007 and 2006.

In the first quarter of 2007, the Company formed Care Investment Trust Inc. (Care), an externally managed real estate investment trust (REIT), formed principally to invest in healthcare-related commercial mortgage debt and real estate. In conjunction with a June 2007 IPO, CIT contributed approximately \$280 million of loans to Care in return for cash and a 36% equity investment, of approximately \$79 million, in Care. A subsidiary of CIT provides services to Care pursuant to a management agreement. The investment in Care is accounted for under the equity method, as CIT does not have a majority of the economics (expected losses and residual returns) in the entity.

CIT invests in various trusts, partnerships, and limited liability corporations established in conjunction with structured financing transactions of equipment, power and infrastructure projects. CIT's interests in certain of these entities were acquired by CIT in a 1999 acquisition, and others were subsequently entered into in the normal course of business. Other assets included approximately \$11 million and \$17 million of investments in non-consolidated entities relating to such transactions that are accounted for under the equity or cost methods at December 31, 2007 and 2006.

The combination of investments in and loans to non-consolidated entities represents the Company's maximum exposure to loss, as the Company does not provide guarantees or other forms of indemnification to non-consolidated entities.

Certain shareholders of CIT provide investment management, banking and investment banking services in the normal course of business.

**NOTE 21 – BUSINESS SEGMENT INFORMATION****Management's Policy in Identifying Reportable Segments**

CIT's reportable segments are comprised of strategic business units or "verticals" that are aggregated into segments primarily based upon industry categories and to a lesser extent, the core competencies relating to product origination, distribution methods, operations and servicing, and the nature of their regulatory environment. This segment reporting is consistent with the presentation to management.

Effective with the third quarter of 2007, and consistent with recent management changes, segment disclosures reflect the following changes. The presentation of prior period data has been conformed to current period presentation.

- The home lending business is being reported as a separate segment.
- The student lending and consumer loan businesses previously in the Consumer and Small Business Lending segment are reported in the Consumer segment.
- The small business lending unit was transferred from the former Consumer and Small Business Lending segment to the Corporate Finance segment.

**Types of Products and Services**

CIT has six reportable segments: Corporate Finance, Transportation Finance, Trade Finance, Vendor Finance, Consumer and Home Lending. Transportation Finance and Vendor Finance offer secured lending and leasing products to midsize and larger companies across a variety of industries, including aerospace, rail, machine tool, business aircraft, technology, manufacturing and transportation. Trade Finance and Corporate Finance offer secured lending and receivables collection as well as other financial products and services to small and midsize companies. These include secured revolving lines of credit and term loans, credit protection, accounts receivable collection, import and export financing and factoring, debtor-in-possession and turnaround financing and management advisory services. Consumer offers student lending through Student Loan Xpress and the operations of CIT Bank, an industrial bank. Home Lending includes the mortgage operations, which were ceased during 2007.

# CIT GROUP INC. AND SUBSIDIARIES – NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## Segment Profit and Assets

The following table presents reportable segment information and the reconciliation of segment balances to the consolidated financial statement totals and the consolidated managed assets.

(dollars in millions)

<sup>(1)</sup> Includes valuation allowances, goodwill and intangible impairment charges, debt termination charges and severance and real estate exit provisions.

Finance income and other revenues derived from United States based financing and leasing assets were \$6,584.8 million, \$5,468.8 million and \$4,617.6 million for the years ended December 31, 2007, 2006 and 2005. Finance income and other revenues derived from foreign based financing and leasing assets, were \$2,020.2 million, \$1,458.9 million and \$1,055.6 million for the years ended December 31, 2007, 2006 and 2005.

## NOTE 22 – LEGAL PROCEEDINGS

### Student Loan Investigations

Student Loan Xpress, Inc. ("SLX"), a subsidiary of CIT, is engaged in the student lending business. In connection with investigations into (i) the relationships between student lenders and the colleges and universities that recommend such lenders to their students, and (ii) the business practices of student lenders, CIT and/or SLX have received requests for information from several state Attorneys General and several federal governmental agencies. In May, 2007, CIT entered into an Assurance of Discontinuance (the "AOD") with the New York Attorney General (the "NYAG"), pursuant to which CIT contributed \$3.0 million into a fund established to educate students and their parents concerning student loans and agreed to cooperate with the NYAG's investigation, in exchange for which, the NYAG agreed to discontinue its investigation concerning certain alleged conduct by SLX. CIT is fully cooperating with the remaining investigations.

### Vendor Finance Billing and Invoicing Investigation

In the second quarter of 2007, the office of the United States Attorney for the Central District of California requested that CIT produce the billing and invoicing histories for a portfolio of customer accounts that CIT purchased from a third-party vendor. The request was made in connection with an ongoing investigation being conducted by federal authorities into billing practices involving that portfolio. State authorities in California have been conducting a parallel investigation. It appears the investigations are being conducted under the federal False Claims Act and its California equivalent. CIT is cooperating with these investigations. Based on the facts known to date, CIT cannot determine the outcome of these investigations at this time.

### Other Litigation

In addition, there are various legal proceedings and government investigations against or including CIT, which have arisen in the ordinary course of business. While the outcomes of the ordinary course legal proceedings and the related activities are not certain, based on present assessments, management does not believe that they will have a material adverse effect on CIT.

## NOTE 23 – GOODWILL AND INTANGIBLE ASSETS

The following tables summarize goodwill and intangible assets, net balances by segment.

(dollars in millions)

	Corporate Finance	Trade Finance	Vendor Finance	Consumer	Total
<b>Goodwill</b>					
Balance at December 31, 2005	\$208.6	\$261.5	\$ 54.3	\$ 270.7	\$ 795.1
Acquisitions, other	14.1	8.6	(41.5)	15.8	(3.0)

Balance at December 31, 2007	<u>\$ 26.6</u>	<u>\$102.8</u>	<u>\$ 49.1</u>	<u>\$ –</u>	<u>\$ 178.5</u>

<sup>(1)</sup> Includes reduction due to sale of Systems Leasing \$40.2 million intangibles, net of \$15.4 million accumulated amortization

<sup>(2)</sup> Impairment of SLX intangibles of \$29.4 million, net of \$3.2 million accumulated amortization

The following tables summarize the projected amortization for the next five years.

For the years ended December 31, (dollars in millions)

	2008	2009	2010	2011	2012
Future Intangible Amortization	\$19.6	\$18.7	\$17.7	\$16.8	\$15.9

In accordance with SFAS No. 142, "Goodwill and Other Intangible Assets" ("SFAS 142"), goodwill is no longer amortized but instead is assessed periodically for impairment. The Company periodically reviews and evaluates its goodwill and intangible assets for potential impairment at a minimum annually, on October 1, or more frequently if circumstances indicate that impairment is possible.

The Company entered the student lending business in February 2005 with the acquisition of Education Lending, Group Inc. During the third quarter of 2007, federal legislation was passed that affects the student lending business. Among other things, the legislation reduces the maximum interest rates that can be charged by lenders in connection with a variety of loan products, increases loan origination fees paid to the government by lenders, and reduces the lender guarantee percentage. The legislation is effective for all new FFELP student loans with first disbursements on or after October 1, 2007. The reduced guarantee percentage, from 97% to 95%, will be in effect for loans originated after October 1, 2012. As a result, in the third quarter, management assessed the value of goodwill and intangible assets associated with the student lending business following the passage of the legislation. Based on management's assessment of the legislation's potential impact on earnings levels for new loan originations, factoring in expected ensuing business practices and leverage, coupled with assumptions and projected cash flows of the existing business, management concluded that the goodwill and intangibles assets related to the student lending business were not impaired at that time.

During the fourth quarter of 2007, market valuations for student lending businesses declined further, reflecting a failed sale of a significant student lender, the market's continued emerging view of the legislative changes and the general difficult environment for lenders in this sector, including higher funding costs. As a result, management performed an impairment test for the goodwill and intangible assets related to the

student lending business as of December 31, 2007. In performing its impairment test, management calculated the estimated fair value of the student lending business utilizing observable market valuation data applied to the unit's projected cash flows, which indicated that book value of equity exceeded fair value. SFAS 142 requires a second analysis whenever book value exceeds fair value to determine the related impairment charge. In this analysis, management estimated the fair value of the unit's individual assets and liabilities (primarily loans and debt), and determined that the impairment charge of \$312.1 million, representing the entire goodwill and intangible asset balance, was required.

In addition to performing an impairment assessment for the student lending unit, management assessed as of December 31, 2007 whether there was impairment of goodwill or intangibles in reporting units within the Corporate Finance, Trade Finance and Vendor Finance segments. Management determined that no impairment charge for these three segments was required.

The additions to goodwill and intangible assets in 2007 related to acquisitions of the Edgeview Partners advisory service business by Corporate Finance, the U.S. Business Technology Finance unit of Citigroup, Inc. and the Barclays UK and German vendor finance (both by Vendor Finance).

Other intangible assets, net, are comprised primarily of acquired customer relationships, and are amortized over their corresponding lives ranging from five to twenty years in relation to the related cash flows, where applicable. Amortization expense totaled \$18.5 million, \$22.1 million and \$21.2 million for the years ended December 31, 2007, 2006 and 2005. Accumulated amortization totaled \$71.2 million and \$67.0 million at December 31, 2007 and 2006. Projected amortization for the years ended December 31, 2008 through December 31, 2012 is \$19.6 million, \$18.7 million, \$17.7 million, \$16.8 million and \$15.9 million.

**NOTE 24 – SEVERANCE AND FACILITY RESTRUCTURING RESERVES**

The following table summarizes previously established purchase accounting liabilities (pre-tax) related to severance of

employees and closing facilities, as well as 2006 and 2007 restructuring activities:

(dollars in millions)

	Severance		Facilities		Total Reserves
	Number of Employees	Reserve	Number of Facilities	Reserve	
Balance December 31, 2005	23	\$ 8.1	9	\$ 5.1	\$ 13.2
2006 additions	146	17.2	1	7.5	24.7
2006 utilization	(150)	(19.9)	(5)	(1.1)	(21.0)
Balance December 31, 2006	19	5.4	5	11.5	16.9
2007 additions	1,093	76.7	33	3.0	79.7
2007 utilization	(1,053)	(65.4)	(2)	(5.9)	(71.3)
Balance December 31, 2007	59	\$ 16.7	36	\$ 8.6	\$ 25.3

The severance additions during 2007 primarily relate to employee termination benefits incurred in conjunction with closing the home lending origination platform (approximately 550 employees, \$25 million), as well as various organization efficiency initiatives. These additions, along with charges related to accelerated vesting of equity and other benefits, were recorded as part of the \$76.8 million restructuring provision. Of this amount \$17.1 million relates to the acquisition of Vendor Finance businesses in Europe and the United States, which was recorded as fair value adjustments to purchased liabilities/adjustments to goodwill.

The additions during 2006 relate to employee termination benefits incurred in conjunction with the business unit and segment realignments, as well as various streamlining and consolidation initiatives. These additions, along with charges related to accelerated vesting of equity, and other benefits, were recorded as part of the \$19.6 million restructuring provision.

The facilities additions during 2007 relate to properties of the aforementioned restructuring, including 27 home lending

offices. The ending facilities reserves relate primarily to short-falls in sublease transactions and will be utilized over the remaining terms of 5 years or less.

**NOTE 25 – SUMMARIZED FINANCIAL INFORMATION OF SUBSIDIARIES**

The following presents condensed consolidating financial information for CIT Holdings LLC. CIT has guaranteed on a full and unconditional and a joint and several basis the existing debt securities that were registered under the Securities Act of 1933 and certain other indebtedness of this subsidiary. CIT has not presented related financial statements or other information for this subsidiary on a stand-alone basis. No subsidiaries within "Other Subsidiaries" in the following tables have unconditionally guaranteed debt securities for any other CIT subsidiary. Included under "Other Subsidiaries" is a 100%-owned finance subsidiary of CIT Group Inc., Canadian Funding Company LLC, for which CIT has fully and unconditionally guaranteed the debt securities.

## NOTE 27 – SUBSEQUENT EVENTS

The Company ceased originating private (unguaranteed) student loans in late 2007 based on an evaluation of the return and risk characteristics of this student lending product, but has continued to fund pre-existing loan commitments. In February 2008, a private pilot training school filed bankruptcy. Our student lending business had originated private (unguaranteed) loans to students of the school, which totaled approximately \$196 million in total principal and accrued interest as of December 31, 2007. We ceased originating new loans to students of this school in mid-2007. Approximately \$17 million of the total loans represents loans to students who have completed their education (loans in "repayment"); the remainder is to students who have not yet completed their training. Loans in repayment to students of this school that were past due loans 60 days or more were approximately \$2.0 million at December 31, 2007. Collectibility of the outstanding principal and interest balance of loans that have both reached, and have not yet reached repayment status, will depend on a number of factors, including the student's current ability to repay the loan, whether a student has completed the licensing requirements, whether a student can complete any remaining education requirements at another institution

(including making further tuition payments and accessing previous education records) and satisfy any remaining licensing requirements.

Management is currently evaluating the collectibility and projected cash flows related to these loans. Given that the loans are unsecured and that uncertainties exist regarding collection, management currently expects that additional reserves may be required in 2008 in connection with these loans.

On January 23, 2008, CIT Group Inc. entered into a Sales Agency Agreement with Morgan Stanley & Co. Incorporated and Citigroup Global Markets Inc., pursuant to which CIT has the option to sell shares of its common stock for an aggregate purchase price of up to \$31.5 million. As a result, the Company sold 1,281,519 shares on January 30, 2008 and satisfied the conditions necessary to permit the declaration and payment of preferred stock dividends payable February 29, 2008.

On January 17, 2008 the Company announced that it expects to record a pre-tax charge of approximately \$50 million in the first quarter of 2008 for severance and related costs.

---

## ITEM 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None

---

### ITEM 9A. Controls and Procedures

#### CONCLUSION REGARDING THE EFFECTIVENESS OF DISCLOSURE CONTROLS AND PROCEDURES

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of our disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended (the Exchange Act). Based on this evaluation, our principal executive officer and our principal financial officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by this annual report.

#### MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management of CIT is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is identified in Exchange Act Rules 13a-15(f). Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition,

use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management of CIT, including our principal executive officer and principal financial officer, conducted an evaluation of the effectiveness of the Company's internal control over financial reporting as of December 31, 2007 using the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control – Integrated Framework. We believe that this evaluation provides a reasonable basis for our opinion.

Based on the assessment performed, management concluded that as of December 31, 2007 the Company's internal control over financial reporting was effective.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2007 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears on page 61.

#### CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There have been no changes to the Company's internal control over financial reporting that occurred during the Company's fourth quarter of 2007 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

## PART THREE

### ITEM 10. Directors and Executive Officers of the Registrant

The information called for by Item 10 is incorporated by reference from the information under the caption "Election of Directors" and "Election of Directors – Executive Officers" in our Proxy Statement for our 2008 annual meeting of stockholders.

---

### ITEM 11. Executive Compensation

The information called for by Item 11 is incorporated by reference from the information under the caption "Compensation of Directors and Executive Officers" in our Proxy Statement for our 2008 annual meeting of stockholders.

---

### ITEM 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information called for by Item 12 is incorporated by reference from the information under the caption "Principal Shareholders" in our Proxy Statement for our 2008 annual meeting of stockholders.

---

### ITEM 13. Certain Relationships and Related Transactions

The information called for by Item 13 is incorporated by reference from the information under the caption "Certain Relationships and Related Transactions" in our Proxy Statement for our 2008 annual meeting of stockholders.

---

### ITEM 14. Principal Accountant Fees and Services

The information called for by Item 14 is incorporated by reference from the information under the caption "Appointment of Independent Accountants" in our Proxy Statement for our 2008 annual meeting of stockholders.

## ITEM 15. Exhibits and Financial Statement Schedules

(a) The following documents are filed with the Securities and Exchange Commission as part of this report (see Item 8):

1. The following financial statements of CIT and Subsidiaries:
  - Report of Independent Registered Public Accounting Firm
  - Consolidated Balance Sheets at December 31, 2006 and December 31, 2005.
  - Consolidated Statements of Income for the years ended December 31, 2006, 2005 and 2004.
  - Consolidated Statements of Stockholders' Equity for the years ended December 31, 2006, 2005 and 2004.
  - Consolidated Statements of Cash Flows for the years ended December 31, 2006, 2005 and 2004.
  - Notes to Consolidated Financial Statements
2. All schedules are omitted because they are not applicable or because the required information appears in the Consolidated Financial Statements or the notes thereto.

(b) Exhibits

- 3.1 Second Restated Certificate of Incorporation of the Company (incorporated by reference to Form 10-Q filed by CIT on August 12, 2003).
- 3.2 Amended and Restated By-laws of the Company (incorporated by reference to Form 8-K filed by CIT on January 17, 2008).
- 3.3 Certificate of Designations relating to the Company's 6.350% Non-Cumulative Preferred Stock, Series A (incorporated by reference to Exhibit 3 to Form 8-A filed by CIT on July 29, 2005).
- 3.4 Certificate of Designations relating to the Company's Non-Cumulative Preferred Stock, Series B (incorporated by reference to Exhibit 3 to Form 8-A filed by CIT on July 29, 2005).
- 4.1 Form of Certificate of Common Stock of CIT (incorporated by reference to Exhibit 4.1 to Amendment No. 3 to the Registration Statement on Form S-3 filed June 26, 2002).
- 4.2 Indenture dated as of August 26, 2002 by and among CIT Group Inc., J.P. Morgan Trust Company, National Association (as successor to Bank One Trust Company, N.A.), as Trustee and Bank One NA, London Branch, as London Paying Agent and London Calculation Agent, for the issuance of unsecured and unsubordinated debt securities (Incorporated by reference to Exhibit 4.18 to Form 10-K filed by CIT on February 26, 2003).
- 4.3 Form of Indenture dated as of October 29, 2004 between CIT Group Inc. and J.P. Morgan Trust Company, National Association for the issuance of senior debt securities (Incorporated by reference to Exhibit 4.4 to Form S-3/A filed by CIT on October 28, 2004).
- 4.4 Form of Indenture dated as of October 29, 2004 between CIT Group Inc. and J.P. Morgan Trust Company, National Association for the issuance of subordinated debt securities (Incorporated by reference to Exhibit 4.5 to Form S-3/A filed by CIT on October 28, 2004).
- 4.5 Certain instruments defining the rights of holders of CIT's long-term debt, none of which authorize a total amount of indebtedness in excess of 10% of the total amounts outstanding of CIT and its subsidiaries on a consolidated basis have not been filed as exhibits. CIT agrees to furnish a copy of these agreements to the Commission upon request.
- 4.6 5-Year Credit Agreement, dated as of October 10, 2003 among J.P. ### CERTIFICATIONS

I, Jeffrey M. Peek, certify that:

1. I have reviewed this annual report on Form 10-K of CIT Group Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principals;
  - (c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's fourth fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
  - a) all significant deficiencies and material weaknesses in the design or operation of internal controls over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
