## Organization

Farmers Capital Bank Corporation (the "Registrant" or the "Company") is a financial holding company. The Registrant was originally formed as a bank holding company under the Bank Holding Company Act of 1956, as amended, on October 28, 1982 under the laws of the Commonwealth of Kentucky. During 2000, the Federal Reserve Board granted the Company financial holding company status (see discussion in Supervision and Regulation section of this report). The Company's subsidiaries provide a wide range of banking and bank-related services to customers throughout Central and Northern Kentucky. The bank subsidiaries owned by the Company include Farmers Bank \& Capital Trust Co. ("Farmers Bank"), Frankfort, Kentucky; United Bank \& Trust Co. ("United Bank"), Versailles, Kentucky; The Lawrenceburg Bank and Trust Company ("Lawrenceburg Bank"), Harrodsburg, Kentucky (formerly Lawrenceburg National Bank); First Citizens Bank ("First Citizens"), Elizabethtown, Kentucky; Farmers Bank and Trust Company ("Farmers Georgetown"), Georgetown, Kentucky; Citizens Bank of Northern Kentucky, Inc. ("Citizens Northern"), Newport, Kentucky; and Citizens Bank of Jessamine County ("Citizens Jessamine"), Nicholasville, Kentucky (formerly Citizens National Bank of Jessamine County).

The Company also owns FCB Services, Inc., ("FCB Services"), a nonbank data processing subsidiary located in Frankfort, Kentucky; Kentucky General Life Insurance Company, Inc., ("Kentucky General Life"), an inactive nonbank insurance agency subsidiary located in Frankfort, Kentucky; Kentucky General Holdings, LLC, ("Kentucky General"), in Frankfort, Kentucky, which holds a $50 \%$ voting interest in KHL Holdings, LLC (KHL Holdings acquired a $100 \%$ interest in Kentucky Home Life Insurance Company effective January 1, 2005); FFKT Insurance Services, Inc., ("FFKT Insurance"), a captive property and casualty insurance company in Frankfort, Kentucky; and Farmers Capital Bank Trust I ("Trust I"), Farmers Capital Bank Trust II ("Trust II"), and Farmers Capital Bank Trust III ("Trust III"), which are unconsolidated trusts established to complete the private offering of trust preferred securities.

The Company provides a broad range of financial services to individuals, corporations, and others through its 36 banking locations in 23 communities throughout Central and Northern Kentucky. These services primarily include the activities of lending and leasing, offering deposits, providing cash management services, safe deposit box rental, and trust activities. Operations are managed and financial performance is evaluated at the subsidiary level. The Company's chief decision makers monitor the results of the various banking products and services of its subsidiaries. Accordingly, all of the Company's operations are considered by management to be aggregated in one reportable operating segment of commercial and retail banking. As of December 31, 2007, the Company had $\$ 2.1$ billion in consolidated assets.

## Organization Chart

Subsidiaries of Farmers Capital Bank Corporation are indicated in the table that follows. Percentages reflect the ownership interest held by the parent company of each of the subsidiaries. Tier 2 subsidiaries are direct subsidiaries of Farmers Capital Bank Corporation. Tier 3 subsidiaries are direct subsidiaries of the Tier 2 subsidiary listed immediately above them. Tier 4 subsidiaries are direct subsidiaries of the Tier 3 subsidiary listed immediately above them.

Farmers Bank, originally organized in 1850, is a state chartered bank engaged in a wide range of commercial and personal banking activities, which include accepting savings, time and demand deposits; making secured and unsecured loans to corporations, individuals and others; providing cash management services to corporate and individual customers; issuing letters of credit; renting safe deposit boxes; and providing funds transfer services. The bank's lending activities include making commercial, construction, mortgage, and personal loans and lines of credit. The bank serves as an agent in providing credit card loans. It acts as trustee of personal trusts, as executor of estates, as trustee for employee benefit trusts and as registrar, transfer agent and paying agent for bond issues. Farmers Bank is the general depository for the Commonwealth of Kentucky and has been for more than 70 years.

Farmers Bank is the largest bank chartered in Franklin County. It conducts business in its principal office and four branches within Frankfort, the capital of Kentucky. Franklin County is a diverse community, including government, commerce, finance, industry, medicine, education and agriculture. The bank also serves many individuals and corporations throughout Central Kentucky. On December 31, 2007, it had total consolidated assets of $\$ 561$ million, including loans net of unearned income of $\$ 338$ million. On the same date, total deposits were $\$ 401$ million and shareholders' equity totaled $\$ 33.2$ million.

Farmers Bank had six active subsidiaries during 2007: Farmers Bank Realty Co. ("Farmers Realty"), Leasing One Corporation ("Leasing One"), Farmers Capital Insurance Corporation ("Farmers Insurance"), EG Properties, Inc. ("EG Properties"), Austin Park Apartments, LTD ("Austin Park"), and Frankfort Apartments II, LTD ("Frankfort Apartments").

Farmers Realty was incorporated in 1978 for the purpose of owning certain real estate used by the Company and Farmers Bank in the ordinary course of business. Farmers Realty had total assets of $\$ 3.3$ million on December 31, 2007.

Leasing One was incorporated in August 1993 to operate as a commercial equipment leasing company. It is located in Frankfort and is currently licensed to conduct business in fourteen states. At year-end 2007, it had total assets of $\$ 17.0$ million, including leases net of unearned income of $\$ 16.6$ million.

Farmers Insurance was organized in 1988 to engage in insurance activities permitted to the Company under federal and state law. Farmers Bank capitalized this corporation in December 1998. Farmers Insurance acts as an agent for Commonwealth Land Title Co. At year-end 2007 it had total assets of $\$ 824$ thousand. Farmers Insurance holds a $50 \%$ interest in Farmers Fidelity Insurance Company, LLP ("Farmers Fidelity"). The Creech \& Stafford Insurance Agency, Inc., an otherwise unrelated party to the Company, also holds a $50 \%$ interest in Farmers Fidelity. Farmers Fidelity is a direct writer of property and casualty coverage, both individual and commercial.

In November 2002 Farmers Bank incorporated EG Properties. EG Properties is involved in real estate management and liquidation for certain properties repossessed by Farmers Bank. It had total assets of \$3.5 million at December 31, 2007.

Farmers Bank is a limited partner in Austin Park and Frankfort Apartments, two low income housing tax credit partnerships located in Frankfort, Kentucky. These investments provide for federal income tax credits to the Company. Farmers Bank's aggregate investment in these partnerships was $\$ 1.1$ million at year-end 2007.

On February 15, 1985, the Company acquired United Bank, a state chartered bank originally organized in 1880. It is engaged in a general banking business providing full service banking to individuals, businesses and governmental customers. It conducts business in its principal office and two branches in Woodford County, Kentucky. During 2003 United Bank incorporated EV Properties, Inc. EV Properties is involved in real estate management and liquidation for certain properties repossessed by United Bank. EV Properties had total assets of \$384 thousand at year-end 2007. Based on deposits, United Bank is the second largest bank chartered in Woodford County with total assets of \$224 million and total deposits of \$167 million at December 31, 2007.

On June 28, 1985, the Company acquired Lawrenceburg Bank, a state chartered bank originally organized in 1885. It is engaged in a general banking business providing full service banking to individuals, businesses and governmental customers. During 1998, it moved its charter and main office to Harrodsburg, Kentucky in Mercer County. In 2007, it changed from a National to a state chartered bank. Lawrenceburg Bank conducts business at its Harrodsburg site, two branches in Anderson County, Kentucky, and one branch in Boyle County, Kentucky. Based on deposits, the Anderson County branches rank number one in size compared to all banks chartered in Anderson County. Total assets were $\$ 212$ million and total deposits were $\$ 168$ million at December 31, 2007.

On March 31, 1986, the Company acquired First Citizens, a state chartered bank originally organized in 1964. It is engaged in a general banking business providing full service banking to individuals, businesses and governmental customers. It conducts business at its main office and three branches in Hardin County, Kentucky along with two branch offices in Bullitt County, Kentucky. During 2003 First Citizens incorporated EH Properties, Inc. This company was involved in real estate management and liquidation for certain properties repossessed by First Citizens. EH Properties was dissolved in January, 2007.

On October 8, 2004, First Citizens acquired Financial National Electronic Transfer, Inc. ("FiNET"), a data processing company that specializes in the processing of federal benefit payments and military allotments and is headquartered in Radcliff, Kentucky. Effective January 1, 2005 FiNET was merged into First Citizens. These services are now operated using the name of FirstNet.

On November 2, 2006, First Citizens announced the signing of a definitive agreement to acquire the military allotment operation of PNC Bank, National Association based in Elizabethtown, Kentucky. The operation specializes in the processing of data associated with military allotments and federal benefit payments. The transaction was completed on January 12, 2007 and merged into First Citizens and its FirstNet operations.

Based on deposits, First Citizens ranks third in size compared to all banks chartered in Hardin County. Total assets were $\$ 257$ million and total deposits were \$203 million at December 31, 2007.

On June 30, 1986, the Company acquired Farmers Georgetown, a state chartered bank originally organized in 1850. It is engaged in a general banking business providing full service banking to individuals, businesses and governmental customers. During the fourth quarter of 2004 the Company merged its previously acquired Citizens Bank (Kentucky), Inc. ("Citizens Georgetown") into Farmers Georgetown. During 2006, Farmers Georgetown sold the Bath County, Kentucky branches that it acquired from Citizens Georgetown. Farmers Georgetown conducts business at its principal office and three branches in Scott County, Kentucky and two branches in Fayette County, Kentucky.

On July 16, 2002, Farmers Georgetown incorporated Community Development of Kentucky, Inc. ("CDK, Inc.") in order to apply to be certified as a Community Development Entity for participation in the New Markets Tax Credit Program ("Program") as provided by the Community Renewal Tax Relief Act of 2000. The Program is designed to promote economic development in qualified low-income communities as defined by the tax regulations. The Company decided not to participate in the Program and CDK, Inc. was dissolved during 2006. In May 2004, Farmers Georgetown incorporated Pro Mortgage Partners, LLC ("Pro Mortgage"), a mortgage brokerage company established to offer a variety of fixed rate loan products. Pro Mortgage was merged into Farmers Georgetown at year-end 2007.

Based on deposits, Farmers Georgetown is the largest bank chartered in Scott County with total assets of $\$ 350$ million and total deposits of $\$ 223$ million at December 31, 2007.

On June 15, 1987, the Company acquired Horse Cave State Bank, a state chartered bank originally organized in 1926. During 1997, it moved its charter to Glasgow, Kentucky. Subsequent to that approval, Horse Cave State Bank changed its name to Kentucky Banking Centers, Inc. On December 1, 2006, the Company sold Kentucky Banking Centers to Citizens First Corporation, an unrelated company headquartered in Bowling Green, Kentucky.

On December 6, 2005, the Company acquired Citizens Bancorp, Inc. ("Citizens Bancorp") in Newport, Kentucky. Citizens Bancorp was subsequently merged into Citizens Acquisition, a former bank holding company subsidiary of the Company. During January 2007, Citizens Acquisition was merged into the Company, leaving Citizens Northern as a direct subsidiary of the Company. Citizens Northern is a state chartered bank organized in 1993 and is engaged in a general banking business providing full service banking to individuals, businesses, and governmental customers. It conducts business in its principal office in Newport and four branches in Campbell County, Kentucky, one branch in Boone County, Kentucky and two branches in Kenton County, Kentucky. Based on deposits, Citizens Northern ranks second in size compared to all banks chartered in Campbell County. Total assets were $\$ 262$ million and total deposits were $\$ 189$ million at December 31, 2007. Citizens Financial Services, formerly an investment brokerage subsidiary of Citizens Acquisition, was dissolved during 2006.

On October 1, 2006, the Company acquired Citizens National Bancshares ("Citizens Bancshares"), the former one-bank holding company of Citizens Jessamine. Citizens Bancshares was subsequently merged into the Company, leaving Citizens Jessamine as a direct subsidiary of the Company. Citizens Jessamine, organized in 1996 as a national charter bank engaged in a general banking business providing full service banking to individuals, businesses, and governmental customers. In 2007, it changed from a national to a state charter. It conducts business in its principal office and three branches in Jessamine County, Kentucky. Based on deposits, Citizens Jessamine ranks first in size compared to all banks chartered in Jessamine County. Total assets were $\$ 218$ million and total deposits were $\$ 147$ million at December 31, 2007.

FCB Services, organized in 1992, provides data processing services and support for the Company and its subsidiaries. It is located in Frankfort, Kentucky. It also performs data processing services for nonaffiliated entities. FCB Services had total assets of \$4.1 million at December 31, 2007.

Kentucky General was incorporated in November 2004 and holds a $50 \%$ voting interest in KHL Holdings, LLC. Effective January 1, 2005 KHL Holdings, LLC purchased Kentucky Home Life Insurance Company ("KHL"). KHL writes credit life and health insurance
in Kentucky. The remaining 50\% voting interest in KHL Holdings, LLC is held by Hamburg Insurance, LLC, an otherwise unrelated company. Kentucky General had total assets of \$2.1 million at December 31, 2007.

Kentucky General Life was incorporated on June 22, 2000 to engage in insurance activities permitted by federal and state law. This corporation was inactive as of December 31, 2007.

Trust I, Trust II, and Trust III are each separate Delaware statutory business trusts sponsored by the Company. The Company completed two private offerings of trust preferred securities during 2005 through Trust I and Trust II totaling $\$ 25.0$ million. During 2007, the Company completed a private offering of trust preferred securities totaling $\$ 22.5$ million. The Company owns all of the common securities of each of the Trusts. The Company does not consolidate the Trusts into its financial statements.

FFKT Insurance was incorporated during 2005. It is a captive property and casualty insurance company insuring primarily deductible exposures and uncovered liability related to properties of the Company. It had total assets of $\$ 3.5$ million at December 31, 2007.

## Lending

A significant part of the Company's operating activities include originating loans, approximately $82 \%$ of which are secured by real estate at December 31, 2007. Real estate lending primarily includes loans secured by non-owner and owner-occupied one-to-four family residential properties as well as commercial real estate mortgage loans to developers and owners of other commercial real estate. Real estate lending primarily includes both variable and adjustable rate products. Loan rates on variable rate loans generally adjust upward or downward immediately based on changes in the loan's index, normally prime rate as published in the Wall Street Journal. Rates on adjustable rate loans move upward or downward after an initial fixed term of normally one, three, or five years. Rate adjustments on adjustable rate loans are made annually after the initial fixed term expires and are indexed primarily to shorter-term Treasury indexes. Generally, variable and adjustable rate loans contain provisions that cap the amount of interest rate increases over the life of the loan of up to 600 basis points and lifetime floors of 100 basis points. In addition to the lifetime caps and floors on rate adjustments, loans secured by residential real estate typically contain provisions that limit annual increases at a maximum of 100 basis points. There is typically no annual limit applied to loans secured by commercial real estate.

The Company also makes fixed rate commercial real estate loans to a lesser extent with repayment terms generally not exceeding 12 months. The Company's subsidiary banks make first and second residential mortgage loans secured by real estate not to exceed $90 \%$ loan to value without seeking third party guarantees. Commercial real estate loans are made primarily to small and mid-sized businesses, secured by real estate not exceeding $80 \%$ loan to value. Other commercial loans are asset based loans secured by equipment and lines of credit secured by receivables and include lending across a diverse range of business types. Commercial lending and real estate construction lending, including commercial leasing, generally includes a higher degree of credit risk than other loans, such as residential mortgage loans. Commercial loans, like other loans, are evaluated at the time of approval to determine the adequacy of repayment sources and collateral requirements. Collateral requirements vary to some degree among borrowers and depend on the borrower's financial strength, the terms and amount of the loan, and collateral available to secure the loan. Credit risk results from the decreased ability or willingness to pay by a borrower. Credit risk also results when a liquidation of collateral occurs and there is a shortfall in collateral value as compared to a loans outstanding balance. For construction loans, inaccurate initial estimates of a project's costs and the property's completed value could weaken the Company's position and lead to the property having a value that is insufficient to satisfy full payment of the amount of funds advanced for the property. Secured and unsecured consumer loans generally are made for automobiles, boats, and other motor vehicles. In most cases loans are restricted to the subsidiaries' general market area.

## Supervision and Regulation

The Company and its subsidiaries are subject to comprehensive supervision and regulation that affect virtually all aspects of their operations. These laws and regulations are primarily intended to protect depositors and borrowers and, to a lesser extent, stockholders. Changes in applicable laws, regulations, or in the policies of banking and other government regulators may have a material adverse effect on our current or future business. The following summarizes certain of the more important aspects of the relevant statutory and regulatory provisions.

## Supervisory Authorities

The Company is a financial holding company, registered with and regulated by the Federal Reserve Board ("FRB"). All seven of its subsidiary banks are Kentucky state-chartered banks. Four of the Company's subsidiary banks are members of their regional Federal Reserve Bank. The Company and its subsidiary banks are subject to supervision, regulation and examination by the Federal Deposit Insurance Corporation ("FDIC") and the Kentucky Office of Financial Institutions ("Kentucky Office"). The regulatory authorities routinely examine the Company and its subsidiary banks to monitor their compliance with laws and regulations, financial condition, adequacy of capital and reserves, quality and documentation of loans, payment of dividends, adequacy of systems and controls, credit underwriting and asset liability management, and the establishment of branches. The Company and its subsidiary banks are required to file regular reports with the FRB, the FDIC and the Kentucky Office, as applicable.

## Capital

The FRB, the FDIC, and the Kentucky Office require the Company and its subsidiary banks to meet certain ratios of capital to assets in order to conduct their activities. To be well-capitalized, the institutions must generally maintain a Total Capital ratio of $10 \%$ or greater, a Tier 1 Capital ratio of $6 \%$ or greater, and a leverage ratio of $5 \%$ or better. For the purposes of these tests, Tier 1 Capital consists of common equity and related surplus, retained earnings, and a limited amount of qualifying preferred stock, less goodwill and certain core deposit intangibles. Tier 2 Capital consists of non-qualifying preferred stock, certain types of debt and a limited amount of other items. Total Capital is the sum of Tier 1 and Tier 2 Capital.

In measuring the adequacy of capital, assets are generally weighted for risk. Certain assets, such as cash and U.S. government securities, have a zero risk weighting. Others, such as commercial and consumer loans, have a $100 \%$ risk weighting. Risk weightings are also assigned for off-balance sheet items such as loan commitments. The various items are multiplied by the appropriate risk-weighting to determine risk-adjusted assets for the capital calculations. For the leverage ratio mentioned above, assets are not risk-weighted.

If the institution fails to remain well-capitalized, it will be subject to a series of restrictions that increase as the capital condition worsens. For instance, federal law generally prohibits a depository institution from making any capital distribution, including the payment of a dividend or paying any management fee to its holding company, if the depository institution would be undercapitalized as a result. Undercapitalized depository institutions may not accept brokered deposits absent a waiver from the FDIC, are subject to growth limitations and are required to submit a capital restoration plan for approval, which must be guaranteed by the institution's parent holding company. Significantly undercapitalized depository institutions may be subject to a number of requirements and restrictions, including orders to sell sufficient voting stock to become adequately capitalized, requirements to reduce total assets, and cessation of receipt of deposits from correspondent banks. Critically undercapitalized institutions are subject to the appointment of a receiver or conservator.

All of the Company's subsidiary banks exceed the minimum Tier 1, Total Capital and leverage ratios and qualify as "well-capitalized" under current regulatory criteria.

## Expansion and Activity Limitations

With prior regulatory approval, the Company may acquire other banks or bank holding companies and its subsidiaries may merge with other banks. Acquisitions of banks located in other states may be subject to certain deposit-percentage, age or other restrictions. In addition, as a financial holding company, the Company and its subsidiaries are permitted to acquire or engage in activities that were not previously permitted for bank holding companies such as insurance underwriting, securities underwriting and distribution, travel agency activities, broad insurance agency activities, merchant banking, and other activities that the FRB determines to be financial in nature or complementary to these activities. The Company has subsidiaries that engage in some of these additional activities, including insurance underwriting and distribution and other activities that are financial in nature. The FRB normally requires some form of notice or application to engage in or acquire companies engaged in such activities. Under the Bank Holding Company Act and Gramm-Leach-Bliley Act, the Company is generally prohibited from engaging in or acquiring direct or indirect control of more than $5 \%$ of the voting shares of any company engaged in activities other than those referred to above.

## Limitations on Acquisitions of Bank Holding Companies

As a general proposition, other companies seeking to acquire control of a financial holding company such as the Company would require the approval of the FRB under the Bank Holding Company Act. In addition, individuals or groups of individuals seeking to acquire control of a financial holding company such as the Company would need to file a prior notice with the FRB (which the FRB may disapprove under certain circumstances) under the Change in Bank Control Act. Control is conclusively presumed to exist if an individual or company acquires $25 \%$ or more of any class of voting securities of the bank holding company. Control may exist under the Change in Bank Control Act if the individual or company acquires $10 \%$ or more of any class of voting securities of the bank holding company and no shareholder holds a larger percentage of the subject class of voting securities.

## Deposit Insurance

All of the Company's subsidiary banks are members of the FDIC, and their deposits are insured by the FDIC's Deposit Insurance Fund up to the amount permitted by law. The Company's subsidiary banks are thus subject to FDIC deposit insurance assessments. The FDIC utilizes a risk-based assessment system that imposes insurance premiums based upon a risk matrix that takes into account a bank's capital level and supervisory rating. Under the Federal Deposit Insurance Reform Act of 2005, which became law in 2006, the Company received a one-time assessment credit of $\$ 1.2$ million that can be applied against future premiums, subject to certain limitations. Based on the one-time assessment credit, the Company was not required to pay any deposit insurance premiums in 2006 and unused credits from 2006 limited the amount of deposit insurance premiums paid in 2007 to $\$ 55$ thousand. During 2007, the Company paid $\$ 171$ thousand in Financing Corporation ("FICO") assessments related to outstanding FICO bonds to the FDIC as collection agent. The FICO is a mixed-ownership government corporation established by the Competitive Equality Banking Act of 1987 whose sole purpose was to function as a financing vehicle for the now defunct Federal Savings \& Loan Insurance Corporation.

It is possible that the FDIC could impose assessment rates in the future in connection with declines in the insurance funds or increases in the amount of insurance coverage. An increase in the assessment rate could have a material adverse effect on the Company's earnings, depending on the amount of the increase.

## Other Statutes and Regulations

The Company and its subsidiary banks are subject to a myriad of other statutes and regulations affecting their activities. Some of the more important are:

Anti-Money Laundering. Financial institutions are required to establish anti-money laundering programs that must include the development of internal policies, procedures, and controls; the designation of a compliance officer; an ongoing employee training program; and an independent audit function to test the performance of the programs. The Company and its subsidiary banks are also subject to prohibitions against specified financial transactions and account relationships as well as enhanced due diligence and "know your customer" standards in their dealings with foreign financial institutions and foreign customers. Financial institutions must take reasonable steps to conduct enhanced scrutiny of account relationships in order to guard against money laundering and to report any suspicious transactions. Recent laws provide the law enforcement authorities with increased access to financial information maintained by banks.

Sections 23A and 23B of the Federal Reserve Act. The Company's subsidiary banks are limited in their ability to lend funds or engage in transactions with the Company or other non-bank affiliates of the Company, and all transactions must be on an arms'-length basis and on terms at least as favorable to the subsidiary bank as prevailing at the time for transactions with unaffiliated companies.

Dividends. The Parent Company's principal source of cash flow, including cash flow to pay dividends to its shareholders, is the dividends that it receives from its subsidiary banks. Statutory and regulatory limitations apply to the subsidiary banks' payments of dividends to the Parent Company as well as to the Parent Company's payment of dividends to its shareholders. A depository institution may not pay any dividend if payment would cause it to become undercapitalized or if it already is undercapitalized. The federal banking agencies may prevent the payment of a dividend if they determine that the payment would be an unsafe and unsound banking practice. Moreover, the federal agencies have issued policy statements that provide that financial holding companies and insured banks should generally only pay dividends out of current operating earnings.

Community Reinvestment Act. The Company's subsidiary banks are subject to the provisions of the Community Reinvestment Act of 1977 ("CRA"), as amended, and the federal banking agencies' related regulations, stating that all banks have a continuing and affirmative obligation, consistent with safe and sound operations, to help meet the credit needs for their entire communities, including low and moderate-income neighborhoods. The CRA requires a depository institution's primary federal regulator, in connection with its examination of the institution or its evaluation of certain regulatory applications, to assess the institution's record in assessing and meeting the credit needs of the community served by that institution, including low and moderate-income neighborhoods. The regulatory agency's assessment of the institution's record is made available to the public.

Insurance Regulation. The Company's subsidiaries that underwrite or sell insurance products are subject to regulation by the Kentucky Department of Insurance.

Consumer Regulation. The activities of the Company and its bank subsidiaries are subject to a variety of statutes and regulations designed to protect consumers. These laws and regulations:

- limit the interest and other charges collected or contracted for by all of the Company's subsidiary banks;
govern disclosures of credit terms to consumer borrowers;
require financial institutions to provide information to enable the public and public officials to determine whether a financial institution is fulfilling its obligation to help meet the housing needs of the community it serves;
prohibit discrimination on the basis of race, creed, or other prohibited factors in extending credit;
require all of the Company's subsidiary banks to safeguard the personal non-public information of its customers, provide annual notices to consumers regarding the usage and sharing of such information and limit disclosure of such information to third parties except under specific circumstances; and
. govern the manner in which consumer debts may be collected by collection agencies.
require disclosure of the interest rate and other terms of consumer deposit accounts;
impose a duty to maintain the confidentiality of consumer financial records and prescribe procedures for complying with administrative subpoenas of financial records; and
- govern automatic deposits to and withdrawals from deposit accounts and customers' rights and liabilities arising from the use of automated teller machines and other electronic banking services.

References under the caption "Supervision and Regulation" to applicable statutes and regulations are brief summaries of portions thereof which do not purport to be complete and which are qualified in their entirety by reference thereto.

## Competition

The Company and its subsidiaries compete for banking business with various types of businesses other than commercial banks and savings and loan associations. These include, but are not limited to, credit unions, mortgage lenders, finance companies, insurance companies, stock and bond brokers, financial planning firms, and department stores which compete for one or more lines of banking business. The banks also compete for commercial and retail business not only with banks in Central and Northern Kentucky, but with banking organizations from Ohio, Indiana, Tennessee, Pennsylvania, and North Carolina which have banking subsidiaries located in Kentucky. These competing businesses may possess greater resources and offer a greater number of branch locations, higher lending limits, and may offer other services not provided by the Company. In addition, the Company's competitors that are not depository institutions are generally not subject to the extensive regulations that apply to the Company and its subsidiary banks. The Company has attempted to offset some of the advantages of its competitors by arranging participations with other banks for loans above its legal lending limits, expanding into additional markets and product lines, and entering into third party arrangements to better compete for its targeted customer base.

The Company competes primarily on the basis of quality of services, interest rates and fees charged on loans, and the rates of interest paid on deposit funds.

The business of the Company is not dependent upon any one customer or on a few customers, and the loss of any one or a few customers would not have a material adverse effect on the Company.

No material portion of the business of the Company is seasonal. No material portion of the business of the Company is subject to renegotiation of profits or termination of contracts or subcontracts at the election of the government, though certain contracts are subject to such renegotiation or termination.

The Company is not engaged in operations in foreign countries.

## Employees

As of December 31, 2007, the Company and its subsidiaries had 578 full-time equivalent employees. Employees are provided with a variety of employee benefits. A salary savings plan, group life insurance, hospitalization, dental, and major medical insurance along with postretirement health insurance benefits are available to eligible personnel. Employees are not represented by a union. Management and employee relations are good.

The Company maintains a Stock Option Plan ("Plan") that grants certain eligible employees the option to purchase a limited number of the Company's common stock. The Plan specifies the conditions and terms that the grantee must meet in order to exercise the options.

In 2004, the Company's Board of Directors adopted an Employee Stock Purchase Plan ("ESPP"). The ESPP was subsequently approved by the Company's shareholders and became effective July 1, 2004. Under the ESPP, in the discretion of the Board of Directors, employees of the Company and its subsidiaries can purchase Company common stock at a discounted price and without payment of brokerage costs or other fees and in the process benefit from the favorable tax treatment afforded such plans pursuant to Section 423 of the Internal Revenue Code.

## Available Information

The Company makes available, free of charge through its website (www.farmerscapital.com), its Code of Ethics, its annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to these reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after electronically filing such material with the SEC.

Investing in the Company's common stock is subject to risks inherent to the Company's business. The material risks and uncertainties that management believes affect the Company are described below. Before making an investment decision, you should carefully consider the risks and uncertainties described below together with all of the other information included or incorporated by reference in this report. The risks and uncertainties described below are not the only ones facing the Company. Additional risks and uncertainties that management is not aware of or focused on or that management currently deems immaterial may also impair the Company's business operations. This report is qualified in its entirety by these risk factors.

If any of the following risks actually occur, the Company's financial condition and results of operations could be materially and adversely affected. If this were to happen, the market price of the Company's common stock could decline significantly, and you could lose all or part of your investment.

## Risks associated with unpredictable economic and political conditions may be amplified as a result of limited market area

Commercial banks and other financial institutions are affected by economic and political conditions, both domestic and international, and by governmental monetary policies. Conditions such as inflation, value of the dollar, recession, unemployment, high interest rates, short money supply, scarce natural resources, international disorders, terrorism and other factors beyond our control may adversely affect profitability. In addition, almost all of the Company's primary business area is located in Central and Northern Kentucky. A significant downturn in this regional economy may result in, among other things, deterioration in the Company's credit quality or a reduced demand for credit and may harm the financial stability of the Company's customers. Due to the Company's regional market area, these negative conditions may have a more noticeable effect on the Company than would be experienced by an institution with a larger, more diverse market area.

## The Company's status as a holding company makes it dependent on dividends from its subsidiaries to meet its obligations

The Company is a financial holding company and conducts almost all of its operations through its subsidiaries. The Company does not have any significant assets other than cash, company-owned life insurance and the stock of its subsidiaries. Accordingly, the Company depends primarily on dividends from its subsidiaries to meet its obligations and obtain revenue. The Company's right to participate in any distribution of earnings or assets of its subsidiaries is subject to the prior claims of creditors of such subsidiaries. Under federal and state law, the Company's bank subsidiaries are limited in the amount of dividends they may pay to the Company without prior regulatory approval. Also, bank regulators have the authority to prohibit the subsidiary banks from paying dividends if the bank regulators determine the payment would be an unsafe and unsound banking practice.

## Interest rate volatility could significantly harm the Company's business

The Company's results of operations are affected by the monetary and fiscal policies of the federal government and the regulatory policies of governmental authorities. A significant component of the Company's earnings is its net interest income, which is the difference between the income from interest-earning assets, such as loans, and the expense of interest-bearing liabilities, such as deposits. A change in market interest rates could adversely affect the Company's earnings if market interest rates change such that the interest the Company's subsidiaries pay on deposits and borrowings increases faster than the interest they collect on loans and investments. Consequently, the Company, along with other financial institutions generally, is sensitive to interest rate fluctuations.

## The Company's results of operations are significantly affected by the ability of its borrowers to repay their loans

Lending money is an essential part of the banking business. However, borrowers do not always repay their loans. The risk of non-payment is affected by:

- credit risks of a particular borrower;
changes in economic and industry conditions;
- the duration of the loan; and
. in the case of a collateralized loan, uncertainties as to the future value of the collateral.
Due to the fact that the outstanding principal balances can be larger for commercial loans than other types of loans, such loans present a greater risk to the Company than other types of loans when non-payment by a borrower occurs.

In addition, consumer loans typically have shorter terms and lower balances with higher yields compared to real estate mortgage loans, but generally carry higher risks of frequency of default than real estate mortgage and commercial loans. Consumer loan collections are dependent on the borrower's continuing financial stability, and thus are more likely to be affected by adverse personal circumstances. Furthermore, the application of various federal and state laws, including bankruptcy and insolvency laws, may limit the amount that can be recovered on these loans.

The Company's financial condition and results of operations would be adversely affected if its allowance for loan losses were not sufficient to absorb actual losses
There is no precise method of predicting loan losses. The Company can give no assurance that the allowance for loan losses of its subsidiaries is or will be sufficient to absorb actual loan losses. Excess loan losses could have a material adverse effect on the Company's financial condition and results of operations. Each of the Company's subsidiary banks attempts to maintain an appropriate allowance for loan losses to provide for estimated losses in its loan portfolio, but there are no guaranties actual future loan losses will not exceed these estimates and allowances. Each subsidiary bank of the Company periodically determines the amount of its allowance for loan losses based upon consideration of several factors, including:

- a regular review of the quality, mix and size of the overall loan portfolio;
- historical loan loss experience;
evaluation of non-performing loans;
assessment of economic conditions and their effects on the bank's existing portfolio; and
- the amount and quality of collateral, including guarantees, securing loans.

## Combining a newly acquired bank or other business entity with the Company's network of banks may be more difficult, costly or time-consuming than we expect

The Company has generally operated newly acquired banks as independent bank subsidiaries within the network of the Company's existing banking subsidiaries. Combining newly acquired banks or other entities within this network usually involves converting certain data processing functions from their current format, changing some of the policies and procedures in place, and other integration issues. It is possible that integration processes could result in the loss of key employees or disruption of each company's ongoing business or inconsistencies in standards, procedures and policies that would adversely affect the Company's ability to maintain relationships with clients and employees or to achieve the anticipated benefits of a merger. If difficulties with the integration processes occur, we might not achieve the economic benefits we expect resulting from an acquisition. As with any merger of banking institutions, there also may be business disruptions that cause a newly acquired bank to lose customers or cause customers to take their deposits out of the bank and move their business to other financial institutions.

Inability to hire or retain certain key professionals, management and staff could adversely affect our revenues and net income
The Company relies on key personnel to manage and operate its business, including major revenue generating functions such as its loan and deposit portfolios. The loss of key staff may adversely affect the Company's ability to maintain and manage these portfolios effectively, which could negatively affect our revenues. In addition, loss of key personnel could result in increased recruiting and hiring expenses, which could cause a decrease in our net income.

## The Company's controls and procedures may fail or be circumvented

The Company's management regularly reviews and updates its internal controls, disclosure controls and procedures, and corporate governance policies and procedures. Any system of controls, however well-designed and operated, can provide only reasonable, not absolute, assurances that the objectives of the system of controls are met. Any failure or circumvention of the Company's controls and procedures or failure to comply with regulations related to controls and procedures could have a material and adverse effect on the Company's business, results of operations, and financial condition.

## Trading volume in the Company's common stock is less than that of other similar companies

The Company's common stock is listed for trading on the NASDAQ Global Select Stock Market. However, the trading volume of the Company's common stock is less than that of other similar companies. An efficient public trading market is dependent upon the existence in the marketplace of willing buyers and willing sellers of the Company's common stock at any given time. This existence depends on individual decisions of investors and general economic and market conditions over which the Company has no control. Given the lower trading volume of the Company's common stock, larger sales volumes of the Company's common stock could cause the value of the Company's common stock to decrease.

Item 1B. Unresolved Staff Comments
None.

Item 2. Properties
The Company, through its subsidiaries, owns or leases buildings that are used in the normal course of business. The corporate headquarters is located at 202 W. Main Street, Frankfort, Kentucky, in a building owned by the Company. The Company’s subsidiaries own or lease various other offices in the counties and cities in which they operate. See the Notes to Consolidated Financial Statements contained in Item 8, Financial Statement and Supplementary Data, of this Form $10-\mathrm{K}$ for information with respect to the amounts at which bank premises and equipment are carried and commitments under long-term leases.

Unless otherwise indicated, the properties listed below are owned by the Company and its subsidiaries as of December 31, 2007.

## Data Processing Center

102 Bypass Plaza, Frankfort, KY

## Leasing One Corporation \& Farmers Capital Insurance Corporation

201 W. Main Street, Frankfort, KY

The Company considers its properties to be suitable and adequate based on its present needs.

As of December 31, 2007, there were various pending legal actions and proceedings against the Company arising from the normal course of business and in which claims for damages are asserted. Management, after discussion with legal counsel, believes that these actions are without merit and that the ultimate liability resulting from these legal actions and proceedings, if any, will not have a material adverse effect upon the consolidated financial statements of the Company.

## Item 4. Submission of Matters to a Vote of Security Holders

No matters were submitted during the fourth quarter of the fiscal year covered by this report to a vote of security holders, through the solicitation of proxies or otherwise.

## PART II

## Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

At various times, the Company's Board of Directors has authorized the purchase shares of the Company's outstanding common stock. No stated expiration dates have been established under any of the previous authorizations. There were no shares of common stock repurchased by the Company during the quarter ended December 31, 2007. The maximum number of shares that may still be purchased under previously announced repurchase plans is 128 thousand.

In July 2007, the Company announced a tender offer to purchase for cash up to 550 thousand shares of its outstanding common stock at a price not greater than $\$ 35.00$ or less than $\$ 31.00$ per share through a process commonly known as a modified "Dutch Auction". The Company had the right to purchase up to an additional $2 \%$ of the outstanding shares in accordance with applicable securities laws. Pursuant to the terms of the tender offer, the Company purchased 559 thousand shares of its common stock, which represented $7.1 \%$ of the Company's issued and outstanding shares on the date of purchase, at a purchase price of $\$ 32.00$ per share.

## Performance Graph

The following graph sets forth a comparison of the five-year cumulative total returns among the shares of Company Common Stock, the NASDAQ Composite Index ("broad market index") and Southeastern Banks under 1 Billion Market-Capitalization ("peer group index"). Cumulative shareholder return is computed by dividing the sum of the cumulative amount of dividends for the measurement period and the difference between the share price at the end and the beginning of the measurement period by the share price at the beginning of the measurement period. The broad market index includes over 3,000 domestic and international based common shares listed on The NASDAQ Stock Market. The peer group index consists of 45 banking companies in the Southeastern United States. The Company is among the 45 companies included in the peer group index.

## Glossary of Financial Terms

## Allowance for loan losses

A valuation allowance to offset credit losses specifically identified in the loan portfolio, as well as management's best estimate of probable losses in the remainder of the porffolio at the balance sheet date. Management estimates the allowance balance required using past loan loss experience, an assessment of the financial condition of individual borrowers, a determination of the value and adequacy of underlying collateral, the condition of the local economy, an analysis of the levels and trends of the loan portfolio, and a review of delinquent and classified loans. Actual losses could differ significantly from the amounts estimated by management.

## Dividend payout

Cash dividends paid on common shares, divided by net income.

## Basis points

Each basis point is equal to one hundredth of one percent. Basis points are calculated by multiplying percentage points times 100 . For example: 3.7 percentage points equals 370 basis points.

## Interest rate sensitivity

The relationship between interest sensitive earning assets and interest bearing liabilities.

## Net charge-offs

The amount of total loans charged off net of recoveries of loans that have been previously charged off.

## Net interest income

Total interest income less total interest expense.

## Net interest margin

Taxable equivalent net interest income expressed as a percentage of average earning assets.

## Net interest spread

The difference between the taxable equivalent yield on earning assets and the rate paid on interest bearing funds.

## Other real estate owned

Real estate not used for banking purposes. For example, real estate acquired through foreclosure.

## Provision for loan losses

The charge against current income needed to maintain an adequate allowance for loan losses.

## Return on average assets (ROA)

Net income divided by average total assets. Measures the relative profitability of the resources utilized by the Company.

## Return on average equity (ROE)

Net income divided by average shareholders' equity. Measures the relative profitability of the shareholders' investment in the Company.

## Tax equivalent basis (TE)

Income from tax-exempt loans and investment securities have been increased by an amount equivalent to the taxes that would have been paid if this income were taxable at statutory rates. In order to provide comparisons of yields and margins for all earning assets, the interest income earned on tax-exempt assets is increased to make them fully equivalent to other taxable interest income investments.

## Weighted average number of common shares outstanding

The number of shares determined by relating (a) the portion of time within a reporting period that common shares have been outstanding to (b) the total time in that period.

## Management's Discussion and Analysis of Financial Condition and Results of Operations

The following pages present management's discussion and analysis of the consolidated financial condition and results of operations of Farmers Capital Bank Corporation (the "Company"), a financial holding company, and its bank and nonbank subsidiaries. Bank subsidiaries include Farmers Bank \& Capital Trust Co. ("Farmers Bank") in Frankfort, KY and its significant wholly-owned subsidiaries Leasing One Corporation ("Leasing One") and Farmers Capital Insurance Corporation ("Farmers Insurance"). Leasing One is a commercial leasing company in Frankfort, KY and Farmers Insurance is an insurance agency in Frankfort, KY; Farmers Bank and Trust Company in Georgetown, KY ("Farmers Georgetown") and its formerly wholly-owned subsidiary Pro Mortgage Partners, LLC ("Pro Mortgage"), a mortgage brokerage company that was merged into Farmers Georgetown at year-end 2007; First Citizens Bank in Elizabethtown, KY ("First Citizens"); United Bank \& Trust Co. in Versailles, KY; The Lawrenceburg Bank and Trust Company in Harrodsburg, KY; Kentucky Banking Centers, Inc. in Glasgow, KY ("KBC"), which was sold during 2006; Citizens Bank of Northern Kentucky, Inc. in Newport, KY ("Citizens Northern"); and Citizens Bank of Jessamine County in Nicholasville, KY ("Citizens Jessamine") acquired on October 1, 2006. The Company has three active nonbank subsidiaries, FCB Services, Inc. ("FCB Services"), Kentucky General Holdings, LLC ("Kentucky General"), and FFKT Insurance Services, Inc. ("FFKT Insurance"). FCB Services is a data processing subsidiary located in Frankfort, KY, which provides services to the Company's banks as well as unaffiliated entities. Kentucky General holds a 50\% voting interest in KHL Holdings, LLC, which is the parent company of Kentucky Home Life Insurance Company. FFKT Insurance is a captive property and casualty insurance company insuring primarily deductible exposures and uncovered liability related to properties of the Company. In addition, the Company has three subsidiaries organized as Delaware statutory trusts that are not consolidated into its financial statements. These trusts were formed for the purpose of issuing trust preferred securities. For a complete list of the Company's subsidiaries, please refer to the discussion under the heading "Organization" included in Part 1, Item 1 of this Form 10-K. The following discussion should be read in conjunction with the audited consolidated financial statements and related Notes that follow.

## Forward-Looking Statements

This report contains forward-looking statements under the Private Securities Litigation Reform Act of 1995 that involve risks and uncertainties. In general, forward-looking statements relate to a discussion of future financial results or projections, future economic performance, future operational plans and objectives, and statements regarding the underlying assumptions of such statements. Although the Company believes that the assumptions underlying the forward-looking statements contained herein are reasonable, any of the assumptions could be inaccurate, and therefore, there can be no assurance that the forward-looking statements included herein will prove to be accurate. Factors that could cause actual results to differ from the results discussed in the forward-looking statements include, but are not limited to: economic conditions (both generally and more specifically in the markets in which the Company and its subsidiaries operate) and lower interest margins; competition for the Company’s customers from other providers of financial services; deposit outflows or reduced demand for financial services and loan products; government legislation, regulation, and changes in monetary and fiscal policies (which changes from time to time and over which the Company has no control); changes in interest rates; changes in prepayment speeds; inflation; material unforeseen changes in the liquidity, results of operations, or financial condition of the Company's customers; changes in the level of non-performing assets and charge-offs; changes in the number of common shares outstanding; the capability of the Company to successfully enter into a definitive agreement for and close anticipated transactions; the possibility that acquired entities may not perform as well as expected; unexpected claims or litigation against the Company; technological or operational difficulties; the impact of new accounting pronouncements and changes in policies and practices that may be adopted by regulatory agencies; acts of war or terrorism; and other risks or uncertainties detailed in the Company's filings with the Securities and Exchange Commission, all of which are difficult to predict and many of which are beyond the control of the Company. The Company expressly disclaims any intent or obligation to update any forward-looking statements after the date hereof to conform such statements to actual results or to changes in the Company's opinions or expectations.

## Discontinued Operations

In June 2006, the Company announced that it had entered into a definitive agreement to sell KBC, its former wholly-owned subsidiary based in Glasgow, Kentucky. In addition, Farmers Georgetown entered into a definitive agreement during August 2006 to sell its Owingsville and Sharpsburg branches in Bath County (the "Branches"). These sales were completed during the fourth quarter of 2006. All prior period results included herein have been reclassified to conform to the current presentation which displays the operating results of KBC and the Branches as discontinued operations. These reclassifications had no effect on net income or shareholders' equity. Unless otherwise noted, this Management's Discussion and Analysis of Financial Condition and Results of Operations relate only to the Company's continuing operations.

The majority of the Company's current operations are located in and around the larger population areas of Central and Northern Kentucky. The decision to sell KBC and the Branches allows the Company to focus its resources on geographical areas it has determined to have the highest potential, including new and existing markets.

## Application of Critical Accounting Policies

The Company's audited consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America and follow general practices applicable to the banking industry. Application of these principles requires management to make estimates, assumptions, and judgments that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. These estimates, assumptions, and judgments are based on information available as of the date of the financial statements; accordingly, as this information changes, the financial statements could reflect different estimates, assumptions, and judgments. Certain policies inherently have a greater reliance on the use of estimates, assumptions, and judgments and as such have a greater possibility of producing results that could be materially different than originally reported. Estimates, assumptions, and judgments are necessary when assets and liabilities are required to be recorded at fair value, when a decline in the value of an asset warrants an impairment write-down or valuation reserve to be established, or when an asset or liability needs to be recorded contingent upon a future event. Carrying assets and liabilities at fair value inherently results in more financial statement volatility. The fair values and the information used to record valuation adjustments for certain assets and liabilities are based either on quoted market prices or are provided by other third-party sources, when available. When third-party information is not available, valuation adjustments are estimated in good faith by management primarily through the use of internal cash flow modeling techniques.

The most significant accounting policies followed by the Company are presented in Note 1 of the Company's 2007 audited consolidated financial statements. These policies, along with the disclosures presented in the other financial statement notes and in this management's discussion and analysis of financial condition and results of operations, provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined. Based on the valuation techniques used and the sensitivity of financial statement amounts to the methods, assumptions, and estimates underlying those amounts, management has identified the determination of the allowance for loan losses and accounting for business acquisitions to be the accounting areas that requires the most subjective or complex judgments, and as such could be most subject to revision as new information becomes available.

The allowance for loan losses represents credit losses specifically identified in the loan portfolio, as well as management's estimate of probable credit losses in the loan portfolio at the balance sheet date. Determining the amount of the allowance for loan losses and the related provision for loan losses is considered a critical accounting estimate because it requires significant judgment and the use of estimates related to the amount and timing of expected future cash flows on impaired loans, estimated losses on pools of homogeneous loans based on historical loss experience, and consideration of current economic trends and conditions, all of which may be susceptible to significant change. The loan portfolio also represents the largest asset group on the consolidated balance sheets. Additional information related to the allowance for loan losses that describes the methodology and risk factors can be found under the captions "Asset Quality" and "Nonperforming Assets" in this management's discussion and analysis of financial condition and results of operation, as well as Notes 1 and 5 of the Company's 2007 audited consolidated financial statements.

The Company accounts for business acquisitions as purchases in accordance with Statement of Financial Accounting Standards ("SFAS") No. 141, whereby the purchase price is allocated to the tangible and intangible assets acquired and liabilities assumed based on their estimated fair value. The excess of the purchase price over estimated fair value of the net identifiable assets is allocated to goodwill. The Company engages third-party appraisal firms to assist in determining the fair values of certain assets acquired and liabilities assumed. Determining fair value of assets and liabilities requires many assumptions and estimates. These estimates and assumptions are sometimes refined subsequent to the initial recording of the transaction with adjustments to goodwill as information is gathered and final appraisals are completed. The changes in these estimates could impact the amount of tangible and intangible assets (including goodwill) and liabilities ultimately recorded on the Company's balance sheet as a result of an acquisition, and could impact the Company's operating results subsequent to such acquisition. The Company believes that its estimates have been materially accurate in the past.

## EXECUTIVE LEVEL OVERVIEW

The Company offers a variety of financial products and services at its 36 banking locations in 23 communities throughout Central and Northern Kentucky. The most significant products and services include consumer and commercial lending and leasing, receiving deposits, providing trust services, and offering other traditional banking products and services. The primary goals of the Company are to continually improve profitability and shareholder value, maintain a strong capital position, provide excellent service to our customers through our community banking structure, and to provide a challenging and rewarding work environment for our employees.

The Company generates a significant amount of its revenue, cash flows, and net income from interest income and net interest income, respectively. Interest income is generated by earnings on the Company's earning assets, primarily loans and investment securities. Net interest income is the excess of the interest income earned on earning assets over the interest expense paid on amounts borrowed to
support those earning assets. Interest expense is paid primarily on deposit accounts and other short and long-term borrowing arrangements. The ability to properly manage net interest income under changing market environments is crucial to the success of the Company.

In assessing the Company's financial performance in this report, the following items of note should be considered:
During 2007, the general trend of the interest rate environment has been sharply lower, particularly with short-term rates. In the final half of 2007, the Federal Reserve Board ("Fed") lowered the short-term federal funds rate by a total of 100 basis points and at year-end 2007 the rate was $4.25 \%$. The prime interest rate, which significantly impacts the Company's loan portfolio and certain deposits, declined in a similar manner. Yields on U.S. Treasury obligations, which impact the value of bond investments and certain funding sources, have declined throughout all maturity periods in the year-end comparison. On shorter term obligations, the yield on the one-year Treasury bill is down 166 basis points at year-end 2007 compared to a year earlier. For intermediate term maturities, the three, five, and ten year notes have fallen 167, 125 , and 67 basis points in yield, respectively. The yield on the 20 -year bond is down 41 basis points and the 30 -year bond is down 36 basis points. The effect of lower market rates did have a negative impact on the Company's net interest spread and margin during 2007; however, the Company has yet to absorb the full impact due to the timing of market interest rate changes and the repricing characteristics of the Company's interest sensitive assets and liabilities. The Company expects further margin compression during 2008.

Action by the Fed to lower rates during 2007 coincides with a decline in many economic data, particularly as it relates to the housing market, and the resulting general tightening of credit conditions in the broader economy. In January 2008, the Fed took further action by lowering the federal funds rate by an additional 125 basis points, including 75 basis points in advance of its normally scheduled meeting of the Federal Open Market Committee. This action was taken a result of the heightened concerns over a weakening economic outlook and increasing downside risk to growth, as broader financial market conditions have deteriorated and credit has tightened for many businesses and households. Additionally, market data currently indicates a deepening of the housing contraction as well as some softening in labor markets.

The Company had a sharp increase in the provision for loan losses in the fourth quarter of 2007, which is reflective of higher levels of nonperforming loans, primarily nonaccrual loans. Nonperforming loans were $\$ 21.1$ million at December 31, 2007 compared to $\$ 12.4$ million and $\$ 4.3$ million at September 30, 2007 and December 31, 2006, respectively. A significant amount of the increase in nonperforming loans during the fourth quarter of 2007 compared to the third quarter of 2007 and the prior year-end is limited to a relatively small number of largerbalance credits. Although the Company believes that loan demand and credit quality overall remains healthy, the real estate development segment of the Company's portfolio began to show deteriorating conditions, including a slowdown in demand, in certain parts of its banking market in the fourth quarter of 2007.

During the fourth quarter of 2007, the Company entered into a balance sheet leverage transaction to enhance earnings. The Company borrowed approximately $\$ 200$ million in multiple fixed rate repurchase agreements and used the proceeds to purchase a like amount of fixed rate Government National Mortgage Association ("GNMA") bonds. The leverage transaction added $\$ 423$ thousand to net interest income during the fourth quarter of 2007.

During the third quarter of 2007 the Company purchased 559 thousand shares of its outstanding common stock at a price of $\$ 17.9$ million or $\$ 32.00$ per share through a process commonly known as a modified "Dutch Auction". The number of shares purchased represented $7.1 \%$ of the shares issued and outstanding on the date of purchase.

As part of the repurchase program, the Company issued trust preferred securities to finance the cost of the shares purchased. Capital from the proceeds of trust preferred securities is included in the Company's regulatory capital base, subject to certain limitations, and allows the Company to maintain its historically strong, "well-capitalized" regulatory rating. Excess funds raised from the trust preferred securities transaction that remained available following the tender offer were used for general corporate purposes.

In January 2007, First Citizens completed its transaction to acquire the Military Allotment operation of PNC Bank, National Association in a cash transaction. First Citizens acquired intangible assets in the form of a customer list and goodwill. It also recorded a core deposit intangible in connection with receiving approximately $\$ 10.8$ million in deposits from PNC in the transaction. First Citizens merged the acquired Military Allotment operation into its existing allotment operations, which specializes in the processing of federal benefit payments and military allotments. The purchase added $\$ 3.3$ million in noninterest income for the year and $\$ 887$ thousand in amortization expense related to the intangible assets acquired.

During the fourth quarter of 2006 the Company sold KBC and the Bath County branches of its Farmers Georgetown bank subsidiary. The Company recorded a pretax gain on these sales of $\$ 9.8$ million. The impact from these sales, which has been classified as discontinued operations, was a decrease in net loans and deposits of $\$ 88.6$ million and $\$ 146$ million, respectively.

## RESULTS OF OPERATIONS

Income from continuing operations was $\$ 15.6$ million for the twelve months ended December 31, 2007, an increase of $\$ 2.0$ million or $14.4 \%$ compared to $\$ 13.7$ million reported for the twelve months ended December 31, 2006. Basic and diluted income per share from continuing operations was $\$ 2.03$ for the current twelve months, an increase of $\$ .21$ or $11.5 \%$ compared to $\$ 1.82$ a year earlier.

Net income was $\$ 15.6$ million for the twelve months ended December 31, 2007, a decrease of $\$ 5.7$ million or $26.9 \%$ compared to $\$ 21.4$ million reported for the same period in 2006. Basic and diluted net income per share was $\$ 2.03$ for the current twelve months, a decrease of $\$ .82$ or $28.8 \%$ (basic) and $\$ .81$ or $28.5 \%$ (diluted) as compared to $\$ 2.85$ and $\$ 2.84$, respectively, a year earlier.

In June 2006, the Company announced that it had entered into a definitive agreement to sell its former wholly-owned subsidiary, KBC. During the third quarter of 2006, the Company also committed to a plan of sale of the Bath County branches of its wholly-owned subsidiary Farmers Georgetown. Both sales closed during the fourth quarter of 2006.

Net interest income, the most significant component of the Company's earnings, grew $\$ 7.3$ million or $14.4 \%$ in 2007 compared to a year earlier. The Citizens Jessamine acquisition that occurred during the fourth quarter of 2006 was a key driver of the current-year increase in net interest income.

The decrease in net income in the current year was driven primarily by the impact of prior-year discontinued operations and higher provisions for loan losses in the current year. Income from discontinued operations was $\$ 7.7$ million in the prior year, including a net gain on disposals of $\$ 6.4$ million recorded in the fourth quarter of 2006. There was no comparable amount during 2007 since the discontinued operations were disposed of in 2006 . The provision for loan losses was $\$ 3.6$ million in 2007, an increase of $\$ 2.7$ million compared to 2006.

A sharp increase in the provision for loan losses occurred in the fourth quarter of 2007 and is reflective of higher levels of nonperforming loans, primarily nonaccrual loans. Nonperforming loans were $\$ 21.1$ million at December 31, 2007 compared to $\$ 12.4$ million and $\$ 4.3$ million at September 30, 2007 and December 31, 2006, respectively. A significant amount of the increase in nonperforming loans in the fourth quarter of 2007 compared to the third quarter of 2007 and the prior year-end is limited to a relatively small number of larger-balance credits. The $\$ 8.7$ million increase in nonperforming loans at December 31, 2007 compared to September 30, 2007 is attributed almost entirely to two larger-balance nonaccrual real estate development credits. In the annual comparison, $\$ 15.9$ million of the $\$ 16.7$ million increase in nonperforming loans was driven by seven individual larger-balance nonaccrual credits, substantially all of which is secured by real estate. Although the Company believes that loan demand and credit quality overall remains healthy, the real estate development segment of the Company's portfolio began to show deteriorating conditions, including a slowdown in demand, in certain parts of its banking market in the fourth quarter.

The allowance for loan losses was $\$ 14.2$ million at December 31, 2007. As a percentage of net loans outstanding, the allowance for loan losses was $1.10 \%$ at year-end 2007 compared to $.91 \%$ at September 30, 2007 and $1.00 \%$ at December 31, 2006. Net charge-offs for 2007 were $\$ 1.4$ million, up $\$ 320$ thousand or $29.1 \%$; however, they remain near recent historical lows for the Company. Net charge-offs as a percentage of average net loans outstanding were $.11 \%$ for the year ended December 31, 2007 compared to $.10 \%$ at year-end 2006.

Noninterest income was $\$ 24.2$ million in 2007, an increase of $\$ 3.7$ million or $18.1 \%$ compared to a year earlier. The acquisition of Citizens Jessamine accounted for an additional $\$ 1.1$ million due to the timing of the transaction since there was only three months of operations included in the prior year. Similarly, the acquisition of the Military Allotment operations of PNC Bank, National Association accounted for an additional \$3.3 million of noninterest income during 2007 since the acquisition occurred in January of 2007. The increase in fee income in the current twelve months from these acquisitions was the major factor that offset revenue declines in other line items from previously existing operations.

Noninterest expenses were $\$ 58.8$ million in 2007, an increase of $\$ 5.4$ million or $10.2 \%$ compared to $\$ 53.4$ million in the prior year. An increase in noninterest expenses during 2007 was led by higher personnel costs of $\$ 2.4$ million or $8.4 \%$, increased amortization expense of $\$ 1.4$ million or $67.3 \%$, and higher occupancy costs of $\$ 597$ thousand or $16.3 \%$. The acquisitions of Citizens Jessamine and the Military Allotment operations along with other business growth efforts were key drivers of the higher noninterest expenses in the current year.

Income from discontinued operations was $\$ 7.7$ million or $\$ 1.02$ per share (diluted) for the twelve-month period ended December 31, 2006. There were no discontinued operations in the current-year since all discontinued operations were disposed of during the fourth quarter of 2006.

The return on assets ("ROA") was $.83 \%$ in 2007, a decrease of 2 basis points from $.85 \%$ for the prior year-end. Net interest margin and the provision for loan losses contributed 11 basis points and 13 basis points, respectively to lower ROA in the comparison. These
negative effects were partially offset by 22 basis points lower noninterest expenses as a percentage of average assets. The return on equity ("ROE") increased 39 basis points to $8.88 \%$ compared to $8.49 \%$ in the prior year. The higher ROE is a result of the $\$ 2.0$ million or $14.4 \%$ increase in income from continuing operations, which grew at a higher pace than the increase in average equity capital of $\$ 15.0$ million or $9.3 \%$.

## Interest Income

Interest income results from interest earned on earning assets, which primarily include loans and investment securities. Interest income is affected by volume (average balance), composition of earning assets, and the related rates earned on those assets. Total interest income for 2007 was $\$ 114$ million, an increase of $\$ 21.9$ million or $23.7 \%$ from the previous year. The increase in interest income is mainly a result of increased interest on loans of $\$ 17.6$ million or $22.8 \%$. Interest income on loans increased as a result of higher average loan balances outstanding resulting from the Citizens Jessamine acquisition, higher internally generated loan growth, and a 25 basis point increase in the average rate earned on loans. The Citizens Jessamine acquisition accounted for $\$ 7.4$ million or $41.9 \%$ of the increased interest income on loans in the comparison. The Company's tax equivalent yield on earning assets for the current year was $7.0 \%$, an increase of 34 basis points compared to $6.7 \%$ the same period a year ago.

Interest and fees on loans was $\$ 94.9$ million, an increase of $\$ 17.6$ million or $22.8 \%$ compared to $\$ 77.3$ million a year earlier. Average loans increased $\$ 199$ million or $19.0 \%$ to $\$ 1.3$ billion in the comparison, helped by $\$ 93.7$ million additional average loan balances outstanding from the Citizens Jessamine acquisition and higher loan demand at our pre-existing bank subsidiaries in what remains a relatively low rate environment. A higher average rate earned on loans also contributed to the rise in interest income. New loans and variable rate loans repricing during the current year have generally repriced higher as the average interest rate earned has edged upward. The tax equivalent yield on loans increased 25 basis points to $7.7 \%$ from $7.4 \%$ in the year-to-year comparison.

Interest on taxable securities was $\$ 12.6$ million, an increase of $\$ 3.6$ million or $39.9 \%$ due to an increase in volume and the average rate earned. Volume rose to $\$ 253$ million, an increase of $\$ 41.1$ million or $19.3 \%$ compared to the previous year due in part to the $\$ 200$ million balance sheet leverage transaction that took place during the fourth quarter of 2007. The average rate earned on taxable securities increased 73 basis points to $5.0 \%$ from $4.3 \%$. Taxable equivalent interest on nontaxable securities decreased $\$ 301$ thousand or $8.2 \%$ due to both volume and rate declines. The average rate (TE) earned during 2007 on nontaxable securities was $5.4 \%$, a decrease of 35 basis points from $5.8 \%$ in 2006. The average balance outstanding dropped to $\$ 88.5$ million compared to $\$ 91.4$ million in 2006. Interest on short-term investments, including time deposits in other banks, federal funds sold, and securities purchased under agreements to resell, increased $\$ 978$ thousand or $41.5 \%$ due to an increase in the average rate earned of 98 basis points combined with a $\$ 7.7$ million or $12.3 \%$ increase in volume.

## Interest Expense

Interest expense results from incurring interest on interest bearing liabilities, which primarily include interest bearing deposits, federal funds purchased, securities sold under agreements to repurchase, and other short and long-term borrowed funds. Interest expense is affected by volume, composition of interest bearing liabilities, and the related rates paid on those liabilities. Total interest expense was $\$ 56.0$ million for 2007 , an increase of $\$ 14.6$ million or $35.3 \%$ from the prior year. Interest expense increased mainly as a result of higher interest expense on deposits of $\$ 12.6$ million or $38.7 \%$ and was mainly driven by additional volume of $\$ 192$ million or $18.1 \%$. Interest expense on deposits increased as a result of higher deposit balances outstanding from the Citizens Jessamine acquisition, higher deposits generated internally, and higher rates paid on interest bearing deposits throughout most of the deposit portfolio. The Citizens Jessamine acquisition accounted for an additional $\$ 91.1$ million in average interest bearing deposits outstanding. The Company's cost of funds was $3.8 \%$ for 2007 , an increase of 44 basis points from $3.4 \%$ for the prior year. The increase in cost of funds was led by a 68 basis point increase in time deposits.

Interest expense on time deposits, the largest component of total interest expense, increased $\$ 11.8$ million or $48.6 \%$ to $\$ 36.2$ million. The increase is due to both a $\$ 162$ million or $27.6 \%$ increase in volume combined with a 68 basis point increase in the average rate paid to $4.8 \%$ from $4.2 \%$. The increase in average time deposits outstanding in the comparable periods was boosted by an additional $\$ 55.6$ million of time deposits related to the Citizens Jessamine acquisition along with additional time deposits generated internally in order to fund additional loan growth. The increase in the average rate paid is due to competitive market conditions, the need to attract additional deposits to support asset growth, and the relocation or opening of branch sites in existing or new markets.

Interest expense on interest bearing demand deposits in 2007 was $\$ 3.7$ million, a decrease of $\$ 90$ thousand or $2.4 \%$ compared to $\$ 3.8$ million a year ago. The lower expense is attributed to a slight decline in both the average rate paid of three basis points and volume of $\$ 1.4$ million. Interest expense on savings deposits was $\$ 5.3$ million, an increase of $\$ 862$ thousand or $19.4 \%$ from $\$ 4.4$ million in 2006. The higher interest expense on savings deposits is mainly volume related, but an increase in the average rate paid also contributed to the increase in interest expense. The average outstanding balance of savings deposits was up $\$ 31.4$ million or $14.7 \%$ to $\$ 244$ million; the rate increased 9 basis points to $2.2 \%$ from $2.1 \%$ a year earlier. Average volume of savings deposits were up primarily due to the Citizens Jessamine acquisition, which added $\$ 30.2$ million in average savings deposits in the comparison.

Interest expense on federal funds purchased and other short-term borrowings declined $\$ 172$ thousand or $3.7 \%$ due mainly to a lower average rate paid of 17 basis points. Interest expense on securities sold under agreements to repurchase and other long-term borrowings was $\$ 6.4$ million for 2007 , an increase of $\$ 2.2$ million or $51.8 \%$ and is volume related. Average long-term borrowings increased $\$ 47.8$ million during 2007 as a result of the $\$ 200$ million balance sheet leverage transaction during the fourth quarter and additional borrowings of $\$ 23.2$ million to fund the Company's share buy-back program via a modified Dutch Auction during the third quarter.

## Net Interest Income

Net interest income is the most significant component of the Company's earnings. Net interest income is the excess of the interest income earned on earning assets over the interest paid for funds to support those assets. The two most common metrics used to analyze net interest income are net interest spread and net interest margin. Net interest spread represents the difference between the yields on earning assets and the rates paid on interest bearing liabilities. Net interest margin represents the percentage of net interest income to average earning assets. Net interest margin will exceed net interest spread because of the existence of noninterest bearing sources of funds, principally demand deposits and shareholders' equity, which are also available to fund earning assets. Changes in net interest income and margin result from the interaction between the volume and the composition of earning assets, their related yields, and the associated cost and composition of the interest bearing liabilities. Accordingly, portfolio size, composition, and the related yields earned and the average rates paid can have a significant impact on net interest spread and margin. The table on the following page represents the major components of interest earning assets and interest bearing liabilities on a tax equivalent basis. To compare the tax-exempt asset yields to taxable yields, amounts are adjusted to pretax equivalents based on the marginal corporate Federal tax rate of $35 \%$.

Tax equivalent net interest income was $\$ 60.5$ million for 2007, an increase of $\$ 7.5$ million or $14.1 \%$ compared to $\$ 53.1$ million in 2006. The net interest margin was $3.6 \%$, a decrease of 11 basis points from $3.8 \%$ in the prior year. Net interest spread declined 10 basis points to $3.2 \%$ from $3.3 \%$ a year earlier. The impact of noninterest bearing sources of funds negatively impacted net interest margin by one basis point in the comparison. The effect of noninterest bearing sources of funds on net interest margin typically increases as the average cost of funds rises. However, this relationship was negated because of the Company's lower net interest position during 2007 compared to 2006. Net interest position is a measure that indicates the amount of earning assets that are funded by noninterest bearing sources of funds.

During 2007, the Company's tax equivalent yield on total earning assets was $7.0 \%$, up 34 basis points from $6.7 \%$ for 2006. The cost of funds was $3.8 \%$, up 44 basis points compared to $3.4 \%$ for 2006. This resulted in a net interest spread of $3.2 \%$ and $3.3 \%$ for year-ends 2007 and 2006 as indicated above. Although the increase in yield on earning assets was lower than the increase in the cost of funds, net interest income increased because the amount of earning assets is much larger than the amount of interest bearing liabilities.

The Company remains proactive in management of the rate sensitive components of both its assets and liabilities. This task continues to be challenging due to intense market competition and the effects of a dynamic interest rate environment, that is, however, still relatively low in historical terms. The Fed increased the short-term federal funds rate eight separate times by a total of 200 basis points in 2005 and an additional four times totaling 100 basis points in 2006. Between September, 2007 and year-end 2007, the Fed lowered the federal funds rate 100 basis points in the wake of weakening economic data and tightening credit markets. The lowering trend continued into early 2008, with additional rate cuts of 125 basis points in January.

The prime interest rate, which has a significant impact on the Company's interest income on loans, moved in a similar manner to that of the federal funds rate. Predicting the movement of future interest rates is uncertain. During 2007, the average rates on the two most significant components of net interest income for the Company, loans and time deposits, both increased as the impact of market interest rate declines have yet to fully be realized in the Company's loan and deposit portfolio. Should interest rates on the Company's earning assets and interest paying liabilities reprice lower, the Company's yield on earning assets could potentially decrease faster than its cost of funds. Should interest rates reprice higher, the Company's cost of funds may also increase and could continue to increase faster than the yields on earning assets, resulting in a smaller net interest margin.

## Distribution of Assets, Liabilities and Shareholders' Equity: Interest Rates and Interest Differential

| Years Ended December 31, | 2007 |  |  | 2006 |  |  | 2005 |  |  |

## Noninterest Income

Noninterest income was $\$ 24.2$ million for 2007, an increase of $\$ 3.7$ million or $18.1 \%$ compared to $\$ 20.5$ million in 2006. Noninterest income represented $17.5 \%$ of total revenue for 2007, a decrease of 69 basis points from $18.1 \%$ for 2006 . The decrease in noninterest income as a percentage of total income is mainly attributed to the composition of the revenue streams of from the Citizens Jessamine acquisition, which is more heavily weighted toward interest income.

The increase in noninterest income was driven by higher service charges and fees on deposits of $\$ 2.8$ million or $30.1 \%$ and higher allotment processing fees of $\$ 1.8$ million or $67.7 \%$. The primary factor driving the increase in service charges and fees on deposits was a $\$ 1.4$ million increase in account fees related to the Company's allotment line of business, which is up in the current year as a result of the acquisition of the Military Allotment operations of PNC Bank during the first quarter of 2007. Overdraft charges were also up $\$ 926$ thousand in 2007 compared to a year ago and are attributed to additional fees of $\$ 836$ thousand from the Citizens Jessamine acquisition. The $\$ 1.8$ million increase in allotment processing fees is mainly attributed to the acquisition of the Military Allotment operation in the current year. Trust income was $\$ 2.1$ million in 2007, an increase of $\$ 263$ thousand or $14.7 \%$ and is due in part to both price and volume increases. Assets under management grew $6.1 \%$ in 2007 compared to 2006, with higher volumes occurring in each of our trust markets.

The Company experienced declines in the following noninterest income categories during 2007 compared to a year earlier: non-deposit service charges, commissions, and fees of $\$ 88$ thousand or $3.4 \%$, data processing fees of $\$ 492$ thousand or $28.6 \%$, gains on sale of loans of $\$ 58$ thousand or $8.9 \%$, income from company-owned life insurance of $\$ 65$ thousand or $4.8 \%$, and net all other noninterest income of $\$ 583$ thousand.

The decrease in data processing fees is attributed to the acquisition of Citizens Jessamine and the sale of KBC, both of which were customers of the Company's data processing subsidiary. Data processing income from KBC was not eliminated in consolidation once classified as discontinued operations in 2006, effectively increasing data processing income during the previous year by $\$ 380$ thousand. There was no data processing fees recognized from KBC during 2007 since it was sold during 2006. Additionally, Citizens Jessamine was a separate unrelated entity until the Company purchased it during the fourth quarter of 2006. Approximately $\$ 150$ thousand was included in data processing fees during 2006 that are not included in the current period since inter-company amounts are eliminated in
consolidation. The decline in all other noninterest income of $\$ 583$ thousand in 2007 was made up primarily of lower gains on sale of premises and equipment, which was higher than normal during 2006, and lower income from the Company's low income tax credit partnerships.

## Noninterest Expense

Total noninterest expenses were $\$ 58.8$ million for 2007, an increase of $\$ 5.4$ million or $10.2 \%$ compared to $\$ 53.4$ million for 2006. The increase in noninterest expenses occurred across a broad range of line items. The acquisition of Citizens Jessamine during the fourth quarter of 2006 is a significant factor contributing to the higher expenses, along with the Military Allotment acquisition and other business expansion efforts. The largest increases in noninterest expenses are attributed to higher salaries and employee benefits of $\$ 2.4$ million or $8.4 \%$, amortization of intangible assets of $\$ 1.4$ million or $67.3 \%$, and higher occupancy costs of $\$ 597$ thousand or $16.3 \%$.

The increase in salaries and employee benefits resulted primarily from the net addition of 38 average full time equivalent employees, 31 of which are attributed to the Citizens Jessamine acquisition, and normal salary increases for existing employees. Salaries and related payroll taxes increased $\$ 1.5$ million or $6.5 \%$, with Citizens Jessamine accounting for $\$ 1.3$ million of the increase and, to a lesser extent, additional personnel related to the Military Allotment acquisition during the current year. Benefit expenses increased $\$ 989$ thousand or $17.7 \%$, driven by additional postretirement benefit costs. Expense related to the Company's self-funded health insurance plan declined $\$ 178$ thousand or $5.6 \%$ in the year-to-year comparison. Noncash compensation expense related to the Company's nonqualified stock option plan and employee stock purchase plan declined $\$ 65$ thousand in the comparison due to lower expense recorded in the current period as all options have been fully vested.

Intangible asset amortization was $\$ 3.4$ million for 2007. This represents an increase of $\$ 1.4$ million or $67.3 \%$ compared to 2006 and is due to the increase in customer list and core deposit intangible assets resulting from the acquisitions of Citizens Jessamine and the Military Allotment operations of PNC Bank. Amortization expense attributed to current intangible assets is expected to gradually decrease in the coming years, beginning with a $\$ 760$ thousand decline scheduled for 2008. The $\$ 597$ thousand or $16.3 \%$ increase in net occupancy expense is attributed primarily to the Citizens Jessamine acquisition and continued expansion efforts. Data processing expenses decreased $\$ 261$ thousand or $5.2 \%$ in the comparison. Up until the early part of the fourth quarter of 2006, Citizen Northern used the services of an unrelated third party vendor to meet its data processing needs. During the fourth quarter of 2006, Citizens Northern began to use the Company's data processing subsidiary; as such, fees paid to the unrelated third party vendor during 2006 are recognized as an expense prior to the change in processing companies. Subsequent to the change, the fees paid to the Company's data processing subsidiary have been eliminated in consolidation. All other noninterest expenses were up a net of $\$ 1.3$ million or $9.6 \%$ and occurred across a wide range of line items and are mainly attributed to the Citizens Jessamine acquisition.

## Income Tax

Income tax expense for 2007 was $\$ 4.3$ million, an increase of $\$ 927$ thousand or $27.6 \%$ compared to $\$ 3.4$ million for the prior year. The effective federal income tax rate was $21.5 \%$, an increase of 179 basis points compared to $19.7 \%$ in the comparison. The higher effective tax rate is due to the beginning of scheduled reductions in low income housing tax credits and lower tax-free income.

## 2007-Fourth Quarter

For the fourth quarter of 2007, the Company reported income from continuing operations of $\$ 1.9$ million, a decrease of $\$ 567$ thousand or $22.5 \%$ compared to $\$ 2.5$ million for the same period in 2006. Basic and diluted income per share from continuing operations was $\$ .26$ for the current three months, a decline of $\$ .06$ or $18.8 \%$ compared to $\$ .32$ in the same three-month period a year ago. Net income in the fourth quarter of 2007 was $\$ 1.9$ million, a decrease of $\$ 7.0$ million or $78.2 \%$ compared to $\$ 8.9$ million for the same period in 2006. Basic and diluted net income per share was $\$ .26$ for the current three months, a decline of $\$ .87$ or $77.0 \%$ compared to $\$ 1.13$ in the same three-month period a year ago. Net income in the fourth quarter of 2006 includes a $\$ 6.4$ million gain, net of tax, related to disposals of discontinued operations.

The provision for loan losses was $\$ 3.2$ million in the final quarter of 2007 , an increase of $\$ 2.4$ million compared to the final quarter of 2006 . The sharp increase in the provision for loan losses in the fourth quarter of 2007 is reflective of higher levels of nonperforming loans, primarily nonaccrual loans and is discussed further under the headings of "Asset Quality" and "Nonperforming Assets". Although the Company believes that loan demand and credit quality overall remains healthy, the real estate development segment of the Company's portfolio began to show deteriorating conditions, including a slowdown in demand, in certain parts of its banking market in the fourth quarter of 2007.

At December 31, 2006, the Company adopted SFAS No. 158 for it postretirement benefit plans. During the fourth quarter of 2007 the Company learned that an actuarial error caused the amount recorded upon adoption to be incorrect. Accordingly, the Company's stockholders equity as presented in the accompanying audited consolidated financial statements included in this Form $10-\mathrm{K}$ has been revised to reflect the correct balance. This revision reduced total shareholders' equity at December 31, 2006 by $\$ 1.4$ million or less than $0.8 \%$. No revision to the 2006 statement of income was required. In accordance with Securities and Exchange Commission Staff Accounting Bulletin No. 108, the Company's consolidated balance sheet and statement of shareholders' equity is being presented as revised in this 2007 Annual report on Form 10-K.

## Income From Discontinued Operations

Income from discontinued operations was zero in 2007 and $\$ 7.7$ million or $\$ 1.02$ per diluted share for the year ended December 31, 2006. This includes a gain on the sale of discontinued operations of $\$ 6.4$ million, net of tax, which occurred in the fourth quarter of 2006 . There were no discontinued operations in the current-year period presented since all discontinued operations were disposed of during the fourth quarter of 2006.

## FINANCIAL CONDITION

The Company's total assets were $\$ 2.1$ billion at December 31, 2007, an increase of $\$ 243$ million or $13.3 \%$ from the prior year-end. The most significant changes in the Company's assets from the prior year-end were as follows: an increase in investment securities of $\$ 212$ million or $63.5 \%$, an increase in net loans of $\$ 91.9$ million or $7.8 \%$, an increase of $\$ 9.4$ million or $17.8 \%$ in goodwill and other intangible assets, partially offset by $\$ 77.7$ million or $49.5 \%$ lower cash and cash equivalents. The changes within the asset groups are atributed mainly to the $\$ 200$ million balance sheet leverage transaction, the overall funding position of the Company, and the purchase of the Military Allotment operation of PNC Bank during 2007.

The increase in investment securities was driven by the balance sheet leverage transaction that occurred during the fourth quarter of 2007 whereby the Company borrowed $\$ 200$ million via long-term repurchase agreements and used the proceeds to purchase a like amount of GNMA bonds. The increase in net loans outstanding is representative of still-active loan demand and was funded mainly with higher interest bearing deposit balances. The decrease in cash and cash equivalents is mainly attributed to lower end of period deposit balances from the Commonwealth of Kentucky of \$53.3 million. Shareholders' equity was $\$ 8.6$ million or $4.8 \%$ lower at year-end 2007 compared to a year earlier mainly due to the $\$ 17.9$ million purchase of Company shares through its tender offer during 2007.

Management of the Company considers it noteworthy to understand the relationship between the Company's principal subsidiary, Farmers Bank, and the Commonwealth of Kentucky. Farmers Bank provides various services to state agencies of the Commonwealth. As the depository for the Commonwealth, checks are drawn on Farmers Bank by these agencies, which include paychecks and state income tax refunds. Farmers Bank also processes vouchers of the WIC (Women, Infants and Children) program for the Cabinet for Human Resources. The Bank's investment department also provides services to the Teacher's Retirement systems. As the depository for the Commonwealth, large fluctuations in deposits are likely to occur on a daily basis. Therefore, reviewing average balances is important to understanding the financial condition of the Company.

On an average basis, total assets were $\$ 1.9$ billion for 2007, an increase of $\$ 282$ million or $17.6 \%$ compared to average total assets related to continuing operations at year-end 2006. Average earning assets, primarily loans and securities, were $\$ 1.7$ billion for 2007, an increase of $\$ 245$ million or $17.3 \%$ from year-end 2006. The increase was boosted by an additional $\$ 118$ million in connection with the Citizens Jessamine acquisition during the fourth quarter of 2006. Average earning assets represent $88.1 \%$ of total average assets on December 31, 2007, a decrease of 23 basis points compared to $88.4 \%$ at year-end 2006.

## Loans

Loans, net of unearned income, totaled $\$ 1.3$ billion on December 31, 2007, an increase of $\$ 94.1$ million or $7.9 \%$ from $\$ 1.2$ billion at year-end 2006. The increase in loans was led by $\$ 146$ million or $16.1 \%$ higher outstanding balances of loans secured by real estate. Higher real estate lending offset declines in the following categories: commercial, financial, and agriculture of $\$ 43.6$ million or $22.1 \%$, consumer installments loans of $\$ 5.1$ million or $8.9 \%$, and lease financing of $\$ 3.2$ million or $9.5 \%$. On average, loans represented $75.2 \%$ of earning assets during 2007 compared to $74.2 \%$ for 2006 . When loan demand declines, the available funds are redirected to lower earning temporary investments or investment securities, which typically involve a decrease in credit risk and lower yields. The Company does not have direct exposure to the subprime mortgage market. The Company does not originate subprime mortgages nor has it invested in bonds that are secured by such mortgages.

The composition of the loan portfolio, net of unearned income, is summarized in the table below.

| (In thousands) |  |  |  |  |  |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |

| Due after five years | 17,208 | 28,948 |
| Total | $\$ 66,121$ | $\$ 74,946$ |

## Asset Quality

The Company's loan portfolio is subject to varying degrees of credit risk. Credit risk is mitigated by diversification within the portfolio, limiting exposure to any single customer or industry, standard lending policies and underwriting criteria, and collateral requirements. The Company maintains policies and procedures to ensure that the granting of credit is done in a sound and consistent manner. This includes policies on a company-wide basis that require certain minimum standards to be maintained. However, the policies also permit the individual subsidiary companies authority to adopt standards that are no less stringent than those included in the company-wide policies. Credit decisions are made at the subsidiary bank level under guidelines established by policy. The Company's internal audit department performs loan reviews at each subsidiary bank during the year. This loan review evaluates loan administration, credit quality, documentation, compliance with Company loan standards, and the adequacy of the allowance for loan losses on a consolidated and subsidiary basis.

The provision for loan losses represents charges made to earnings to maintain an allowance for loan losses at an adequate level based on credit losses specifically identified in the loan portfolio, as well as management's best estimate of probable loan losses in the remainder of the portfolio at the balance sheet date. The allowance for loan losses is a valuation allowance increased by the provision for loan losses and decreased by net charge-offs. Loan losses are charged against the allowance when management believes the uncollectibility of a loan is confirmed. Subsequent recoveries, if any, are credited to the allowance.

Management estimates the allowance balance required using a risk-rated methodology. Many factors are considered when estimating the allowance. These include, but are not limited to, past loan loss experience, an assessment of the financial condition of individual borrowers, a determination of the value and adequacy of underlying collateral, the condition of the local economy, an analysis of the levels and trends of the loan portfolio, and a review of delinquent and classified loans. The allowance for loan losses consists of specific and general components. The specific component relates to loans that are individually classified as impaired or loans otherwise classified as substandard or doubtful. The general component covers non-classified loans and is based on historical loss experience adjusted for current risk factors. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, should be charged off. Actual loan losses could differ significantly from the amounts estimated by management.

The risk-rated methodology includes segregating watch list and past due loans from the general portfolio and allocating specific reserves to these loans depending on their status. For example, watch list loans, which may be identified by the internal loan review risk-rating system or by regulatory examiner classification, are assigned a certain loss percentage while loans past due 30 days or more are assigned a different loss percentage. Each of these percentages considers past experience as well as current factors. The remainder of the general loan portfolio is segregated into three components having similar risk characteristics as follows: commercial loans, consumer loans, and real estate loans. Each of these components is assigned a loss percentage based on their respective three year historical loss percentage. Additional allocations to the allowance may then be made for subjective factors, such as those mentioned above, as determined by senior managers who are knowledgeable about these matters. During 2007, the Company further identified signs of deterioration in certain real estate development loans and specific allowances related to these loans were recorded.

While management considers the allowance for loan losses to be adequate based on the information currently available, additional adjustments to the allowance may be necessary due to changes in the factors noted above. Borrowers may experience difficulty in periods of economic deterioration, and the level of nonperforming loans, charge-offs, and delinquencies could rise and require additional increases in the provision. Also, regulatory agencies, as an integral part of their examinations, periodically review the allowance for loan losses. These reviews could result in additional adjustments to the provision based upon their judgments about relevant information available during their examination.

The provision for loan losses was $\$ 3.6$ million in 2007, an increase of $\$ 2.7$ million compared to $\$ 965$ thousand for 2006. The sharp increase in the provision for loan losses is reflective of higher levels of nonperforming loans, primarily nonaccrual loans. Nonperforming loans were $\$ 21.1$ million at December 31, 2007 compared to $\$ 4.3$ million at year-end 2006. A significant amount of the increase in nonperforming loans is limited to a relatively small number of larger-balance credits. A significant amount of the $\$ 16.7$ million increase in nonperforming loans is attributed to seven individual larger-balance nonaccrual credits of $\$ 15.9$ million, substantially all of which is secured by real estate. Further, the three largest nonaccrual credits represent $\$ 13.6$ million of the increased nonaccrual loan balances in the comparison. Although the Company believes that loan demand and credit quality overall remains healthy, the real estate development segment of the Company's portfolio began to show deteriorating conditions, including a slowdown in demand, in certain parts of its banking market during the fourth quarter of 2007. Approximately $\$ 8.8$ million of the increase in nonperforming loans is concentrated in real estate development.

Total net charge-offs for the Company increased $\$ 320$ thousand or $29.1 \%$ for year-end 2007 compared to 2006 and were as follows for 2007: commercial, financial, and agricultural loans $\$ 394$ thousand, real estate lending $\$ 385$ thousand, installment loans $\$ 637$ thousand, and lease financing $\$ 5$ thousand. The increase in net charge-offs for 2007 compared to the prior year was as follows: commercial, financial, and agriculture \$170 thousand or $75.9 \%$, real estate lending $\$ 266$ thousand or $224 \%$, installment loans $\$ 92$ thousand or $16.9 \%$; net charge-off related to lease financing declined $\$ 208$ thousand or $97.7 \%$. Net charge-offs in 2007 were widely disbursed among relatively small-balance credits. Net charge-offs were $0.1 \%$ of average loans for 2007, unchanged from 2006 and remain near recent historical lows for the Company. The allowance for loan losses was $\$ 14.2$ million at year-end 2007 and represented $1.1 \%$ of loans net of unearned income at year-end 2007 compared to $1.0 \%$ at year-end 2006. The allowance for loan losses as a percentage of nonperforming loans was $67.5 \%$ and $278 \%$ at year-end 2007 and 2006, respectively. Management continues to emphasize collection efforts and evaluation of risks within the portfolio. The composition of the Company's loan portfolio continues to be diverse with no significant concentration to any individual or industry.

The table below summarizes the loan loss experience for the past five years.

| Years Ended December 31, (In thousands) | 2007 |  | 2006 |  | 2005 |  | 2004 |  | 2003 |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Balance of allowance for loan losses at beginning of year | \$ | 11,999 | \$ | 11,069 | \$ | 11,043 | \$ | 10,088 | \$ | 9,931 |

| Additions to allowance charged to expense |  | 3,638 |  | 965 |  | 622 |  | 856 |  | 1,895 |
| Balance at end of year | \$ | 14,216 | \$ | 11,999 | \$ | 11,069 | \$ | 11,043 | \$ | 10,088 |
| Average loans net of unearned income |  | 1,250,423 |  | 1,051,002 |  | 805,014 |  | 735,697 |  | 663,442 |
| Ratio of net charge-offs during year to average loans, net of unearned income |  | .11\% |  | .10\% |  | .25\% |  | .26\% |  | .26\% |

The following table presents an estimate of the allocation of the allowance for loan losses by type for the date indicated. Although specific allocations exist, the entire allowance is available to absorb losses in any particular category.

## Allowance For Loan Losses

| December 31, (In thousands) | 2007 | 2006 | 2005 | 2004 | 2003 |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Commercial, financial, and agricultural | $\$$ | 2,505 | $\$$ | 2,223 | $\$$ | 2,840 | $\$$ |
| Real estate | 9,201 |  | 6,497 | 5,849 |  | 6,206 | 5,068 |
| Installment loans to individuals | 1,979 | 2,316 | 1,601 | 1,634 | 1,478 |  |  |
| Lease financing | 531 | 963 | 779 | 1,095 | 982 |  |  |
| Total | $\$ 14,216$ | $\$$ | 11,999 | $\$$ | 11,069 | $\$$ | 11,043 |

## Nonperforming Assets

Nonperforming assets for the Company include nonperforming loans, other real estate owned, and other foreclosed assets. Nonperforming loans consist of nonaccrual loans, restructured loans, and loans past due ninety days or more on which interest is still accruing. Generally, the accrual of interest on loans is discontinued when it is determined that the collection of interest or principal is doubtful, or when a default of interest or principal has existed 90 days or more, unless such loan is well secured and in the process of collection.

Nonperforming assets totaled $\$ 27.2$ million at December 31, 2007, an increase of $\$ 17.8$ million or $189 \%$ compared to $\$ 9.4$ million for 2006 . The increase is primarily due to a $\$ 16.6$ million increase in nonaccrual loans followed by higher real estate acquired through foreclosure of $\$ 1.0$ million or 20.1\%. The sharp increase in nonaccrual loans is concentrated within a relatively small number of larger-balance credits. Three larger-balance credits make up $\$ 13.6$ million or $82 \%$ of the increase in nonaccrual loans in the annual comparison while the top seven larger-balance nonaccrual credits represent $\$ 15.9$ million or $96 \%$ of the increase. Of the three larger-balance credits, $\$ 8.8$ million is related to real estate development and $\$ 4.8$ million attributed to commercial real estate. Although the Company believes that loan demand and credit quality overall remains healthy, the real estate development segment of the Company's portfolio began to show deteriorating conditions, including a slowdown in demand, in certain parts of its banking market during the fourth quarter of 2007.

The amount of interest income reversed from accrued interest receivable and interest income on loans was \$390 thousand and \$589 thousand for the fourth quarter and year-to-date 2007, respectively, attributed to the seven larger-balance credits placed on nonaccrual status mentioned above. This reduced the yield on earning assets, net interest spread, and net interest margin by eight basis points in the fourth quarter and by four basis points for the year. The total amount of interest income on loans lost related to these credits for 2007 was $\$ 783$ thousand.

The increase in other real estate owned of $\$ 1.0$ million is due mainly to the addition of commercial real estate properties of three different borrowers acquired through foreclosure in the amount of $\$ 2.5$ million; $\$ 1.7$ million of which was acquired during the fourth quarter of 2007. The amount of additional properties acquired through foreclosure offset the amount of properties that were liquidated during the current year and no longer held by the Company, primarily $\$ 1.5$ million in real estate collateral previously securing loans to a financially troubled builder.

Nonperforming loans represent $1.6 \%$ of loans net of unearned income at year-end 2007. This represents an increase of 127 basis points from year-end 2006 and is attributed to the higher nonaccrual loans as discussed above. Information pertaining to nonperforming loans and assets is presented in the table below.

| December 31, (In thousands) | 2007 | 2006 | 2005 | 2004 | 2003 |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Loans accounted for on nonaccrual basis | $\$ 18,073$ | $\$$ | 1,462 | $\$$ | 2,269 | $\$$ | 4,990 |
| Loans past due 90 days or more and still accruing | 2,977 |  | 2,856 |  | 2,383 |  | 2,831 |
| Total nonperforming loans | 21,050 | 4,318 |  | 4,235 |  |  |  |
| Other real estate owned | 6,044 | 5,031 |  | 8,786 | 3,821 | 8,058 |  |
| Other foreclosed assets | 66 |  | 54 | 2,719 | 1,662 |  |  |
| Total nonperforming assets | $\$ 27,160$ | $\$$ | 9,403 | $\$$ | 13,459 | $\$$ | 11,572 |

## Temporary Investments

Temporary investments consist of interest bearing deposits in other banks and federal funds sold and securities purchased under agreements to resell. The Company uses these funds in the management of liquidity and interest rate sensitivity. At December 31, 2007, temporary investments were $\$ 34.2$ million, a decrease of $\$ 6.9$ million or $16.9 \%$ compared to $\$ 41.2$ million at year-end 2006.

Temporary investments averaged $\$ 70.1$ million during 2007, an increase of $\$ 7.7$ million or $12.3 \%$ from 2006. The increase is a result of the Company's overall net funding position. Temporary investments are reallocated as loan demand and other investment alternatives present the opportunity.

## Investment Securities

The investment securities portfolio is comprised primarily of U.S. government-sponsored agency securities, mortgage-backed securities, and tax-exempt securities of states and political subdivisions. Total investment securities were $\$ 546$ million on December 31, 2007, an increase of $\$ 212$ million or $63.5 \%$ from year-end 2006. The increase in investment securities was driven by the fourth quarter 2007 balance sheet leverage transaction to enhance earnings. In the transaction, the Company borrowed approximately $\$ 200$ million in multiple fixed rate repurchase agreements with an initial weighted average cost of $3.95 \%$. The borrowings mature in time periods ranging from three to 10 years with a weighted average maturity of 6.5 years and are callable quarterly after time periods ranging from one to five years. The Company used the proceeds from the borrowing to purchase a like amount of fixed rate GNMA bonds (the "Bonds"). The Bonds had an initial weighted average yield of $5.69 \%$ and a stated maturity of 30 years. The estimated weighted average maturity of the Bonds is seven years. The leverage transaction added $\$ 423$ thousand to net interest income during the fourth quarter of 2007.

The funds made available from maturing or called bonds have been redirected as necessary to fund higher yielding loan growth, reinvested to purchase additional investment securities, or otherwise employed to improve the composition of the balance sheet. The purchase of nontaxable obligations of states and political subdivisions is one of the primary means of managing the Company's tax position. The impact of the alternative minimum tax related to the Company's ability to acquire tax-free obligations at an attractive yield is routinely monitored. The Company does not have direct exposure to the subprime mortgage market. The Company does not originate subprime mortgages nor has it invested in bonds that are secured by such mortgages.

Investment securities averaged $\$ 342$ million in total for 2007, up $\$ 38.2$ million or $12.6 \%$. The increase in average investment securities was driven by the Bonds that were purchased in the balance sheet leverage transaction, which accounts for $\$ 24.7$ million of the higher average balance outstanding. The Company had a net unrealized gain on available for sale investment securities of $\$ 374$ thousand at December 31, 2007 compared to a net unrealized loss of $\$ 2.0$ million at year-end 2006. The $\$ 2.4$ million improvement in the current period is mainly attributed to a net increase in the market value on available for sale investment securities, particularly during the final half of 2007. The higher market value of available for sale investment securities is due primarily to the impact of changing economic conditions, including a decrease in Treasury yields in nearly every maturity range in the current period compared to December 31, 2006. As overall yields have decreased, the portfolio has increased in value. Market values of fixed rate investments are inversely related to changes in market interest rates. Unrealized losses on investment securities have not been included in income since they are considered interest rate related and identified as temporary.

On December 31, 2007, available for sale securities made up $99.3 \%$ of the total investment securities, up from $97.7 \%$ from a year earlier. The increase is a result of the Company classifying reinvested proceeds from matured or called held to maturity investment securities into available for sale investment securities.

Mortgage-backed securities in the available for sale portfolio were $\$ 343$ million at year-end 2007, an increase of $\$ 256$ million compared to $\$ 86.7$ million at year-end 2006. Mortgage-backed securities accounted for $63.2 \%$ and $26.6 \%$ of the available for sale securities portfolio at December 31, 2007 and 2006, respectively. The higher concentration of mortgage-backed securities is attributed to the $\$ 200$ million of GNMA bonds purchased in the balance sheet leverage transaction in the fourth quarter of 2007. U.S. government-sponsored entities were $\$ 88.5$ million and $\$ 142$ million at year-end 2007 and 2006, respectively. This represents $16.3 \%$ and $43.4 \%$ of the total available for sale securities portfolio at year-end 2007 and 2006 , respectively. Obligations of states and political subdivisions in the available for sale and held to maturity portfolio were $\$ 94.2$ million and $\$ 3.8$ million, respectively at December 31, 2007. This represents $17.4 \%$ and $100 \%$ of the available for sale and held to maturity portfolio, respectively. A $\$ 1.5$ million or $18.4 \%$ increase in equity securities is due to additional purchases of Federal Home Loan Bank and Federal Reserve Bank stock. Other investment securities were $\$ 5.1$ million at year-end 2007 and represent floating rate trust preferred capital securities of a global financial services firm.

The following table summarizes the carrying values of investment securities on December 31, 2007, 2006, and 2005. The investment securities are divided into available for sale and held to maturity securities. Available for sale securities are carried at the estimated fair value and held to maturity securities are carried at amortized cost.

| December 31, | 2007 |  |  |  | 2006 |  |  |  | 2005 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| (In thousands) |  | Available for Sale |  | Held to Maturity |  | Available for Sale |  | Held to Maturity |  | Available for Sale |  | Held to Maturity |
| Obligations of U.S. governmentsponsored entities | \$ | 88,522 |  |  | \$ | 141,832 |  |  | \$ | 123,684 |  |  |
| Obligations of states and political subdivisions |  | 94,181 | \$ | 3,844 |  | 88,147 | \$ | 7,788 |  | 86,031 | \$ | 13,610 |

| U.S. Treasury securities |  | 863 |  |  |  | 484 |  |  |  | 104 |  |  |
| Money market mutual funds |  | 1,396 |  |  |  | 1,396 |  |  |  | 925 |  |  |
| Equity securities |  | 9,363 |  |  |  | 7,910 |  |  |  | 6,298 |  |  |
| Other |  | 5,132 |  |  |  |  |  |  |  |  |  |  |
| Total | \$ | 542,633 | \$ | 3,844 | \$ | 326,485 | \$ | 7,788 | \$ | 315,067 | \$ | 13,610 |

The following table presents an analysis of the contractual maturity and tax equivalent weighted average interest rates of investment securities at December 31, 2007. For purposes of this analysis, available for sale securities are stated at fair value and held to maturity securities are stated at amortized cost. Equity securities in the available for sale portfolio consist primarily of restricted FHLB and Federal Reserve Board stocks, which have no stated maturity and are not included in the maturity schedule that follows.

## Available for Sale

|  | Within One Year |  | After One But Within Five Years |  | After Five But <br> Within Ten Years |  | After Ten Years |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| (In thousands) | Amount | Rate | Amount | Rate | Amount | Rate | Amount | Rate |
| Obligations of U.S. governmentsponsored entities | \$ 63,238 | 4.2\% | \$ 17,256 | 4.8\% | \$ 7,025 | 5.2\% | \$ 1,003 | 4.9\% |
| Obligations of states and political subdivisions | 3,288 | 6.1 | 44,882 | 5.6 | 32,935 | 5.5 | 13,076 | 6.1 |
| Mortgage-backed securities | 21,314 | 4.6 | 23,490 | 4.8 | 33,244 | 4.9 | 265,128 | 5.5 |
| U.S. Treasury securities | 605 | 3.4 | 258 | 3.1 |  |  |  |  |
| Money market mutual funds | 1,396 | 4.5 |  |  |  |  |  |  |
| Other |  |  |  |  |  |  | 5,132 | 7.2 |
| Total | \$ 89,841 | 4.3\% | \$ 85,886 | 4.4\% | \$ 73,204 | 4.4\% | \$ 284,339 | 5.5\% |

## Held to Maturity

|  |  | After One But <br> Within Five <br> Years |  |  | After Five But |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  | Within One Year | Within Ten Years | After Ten Years |  |  |  |  |  |  |  |
| (In thousands) | Amount | Rate | Amount | Rate | Amount | Rate | Amount | Rate |  |  |
| Obligations of states and political <br> subdivisions | $\$ 1,980$ | $6.8 \%$ | $\$$ | 789 | $6.6 \%$ | $\$$ | 0 | $0 \%$ | $\$$ | 1,075 |

The calculation of the weighted average interest rates for each category is based on the weighted average costs of the securities. The weighted average tax rates on exempt states and political subdivisions are computed based on the marginal corporate Federal tax rate of 35\%.

## Deposits

The Company's primary source of funding for its lending and investment activities results from its customer deposits, which consist of noninterest and interest bearing demand, savings, and time deposits. On December 31, 2007 total deposits were $\$ 1.5$ billion, an increase of $\$ 19.3$ million or $1.3 \%$ from year-end 2006. Interest bearing deposits were up $\$ 69.8$ million or $5.8 \%$ to $\$ 1.3$ billion, which offset a $\$ 50.5$ million or $20.8 \%$ decline in noninterest bearing deposits to $\$ 192$ million. The decrease in end of period noninterest bearing deposits was driven by lower balances from the Commonwealth of Kentucky of $\$ 53.3$ million or $77.6 \%$. Balances related to the Commonwealth can fluctuate significantly from day to day.

Average total deposits were $\$ 1.5$ billion during 2007, an increase of $\$ 210$ million or $16.7 \%$ compared to average year-end 2006 balances. Net increases in average deposits were consistent throughout much of the deposit portfolio as follows: noninterest bearing demand of $\$ 18.4$ million or $9.4 \%$, savings accounts of $\$ 31.4$ million or $14.7 \%$, and time deposits of $\$ 162$ million or $27.6 \%$. Interest bearing demand deposits, on average, declined $\$ 1.4$ million or $.5 \%$. The net increase in average total deposits outstanding is due in large part to the Citizens Bank acquisition during the fourth quarter of 2006. This acquisition contributed an additional $\$ 16.5$ million and $\$ 91.1$ million in average noninterest bearing and interest bearing deposits, respectively, during 2007 compared to the year-end 2006 average balances.

A summary of average balances and rates paid on deposits follows.

| Years Ended December 31, | 2007 |  |  | 2006 |  |  | 2005 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Average | Average |  | Average | Average |  | Average | Average |
| (In thousands) |  | Balance | Rate |  | Balance | Rate |  | Balance | Rate |
| Noninterest bearing demand | \$ | 214,423 |  | \$ | 195,982 |  | \$ | 179,197 |  |
| Interest bearing demand |  | 258,992 | 1.42\% |  | 260,417 | 1.45\% |  | 214,548 | .88\% |
| Savings |  | 244,299 | 2.17 |  | 212,948 | 2.08 |  | 182,337 | 1.41 |
| Time |  | 748,939 | 4.83 |  | 587,047 | 4.15 |  | 453,419 | 3.24 |
| Total | \$ | 1,466,653 | 3.08\% | \$ | 1,256,394 | 2.59\% | \$ | 1,029,501 | 1.85\% |

Maturities of time deposits of $\$ 100,000$ or more outstanding at December 31, 2007 are summarized as follows.

| In thousands) | Amount |
| :--- | ---: | ---: |
| 3 months or less | 48,724 |
| Over 3 through 6 months | 82,323 |
| Over 6 through 12 months | 85,345 |
| Over 12 months | 36,111 |
| Total | $\$ 252,503$ |

## Short-term Borrowings

Short-term borrowings primarily consist of federal funds purchased and securities sold under agreements to repurchase with year-end balances of $\$ 80.3$ million, $\$ 67.9$ million, and $\$ 71.3$ million for 2007, 2006, and 2005, respectively. Such borrowings are generally on an overnight basis. Other short-term borrowings consist of FHLB borrowings totaling $\$ 0, \$ 8.0$ million, and $\$ 0$ at year-end 2007, 2006, and 2005, respectively, and demand notes issued to the U.S. Treasury under the treasury tax and loan note option account totaling $\$ 440$ thousand, $\$ 777$ thousand, and $\$ 779$ thousand in 2007, 2006, and 2005 respectively. A summary of short-term borrowings is as follows.

| (In thousands) | 2007 | 2006 | 2005 |
| :--- | :---: | :---: | :---: |
| Amount outstanding at year-end | $\$ 80,755$ | $\$ 76,718$ | $\$$ |
| Maximum outstanding at any month-end | 155,362 | 113,926 | 166,550 |
| Average outstanding | 97,192 | 97,489 | 82,717 |
| Weighted average rate at year-end | $3.71 \%$ | $4.55 \%$ | $3.89 \%$ |
| Weighted average rate during the year | 4.63 | 4.80 | 3.13 |

## Long-term Borrowings

The Company's long-term borrowings consist mainly of FHLB advances to the Company's subsidiary banks, subordinated notes payable to unconsolidated trusts, and securities sold under agreements to repurchase. FHLB advances are secured by restricted holdings of FHLB stock that the banks are required to own as well as certain mortgage loans as required by the FHLB. Such advances are made pursuant to several different credit programs, which have their own interest rates and range of maturities. Interest rates on FHLB advances are generally fixed and range between 3.84\% and $6.90 \%$, with a weighted average rate of $4.65 \%$, and maturities of up to 13 years. Approximately $\$ 10.0$ million of the total long-term advances from the FHLB are convertible to a floating interest rate. These advances may convert to a floating interest rate indexed to three-month LIBOR only if LIBOR equals or exceeds $7 \%$. At year-end 2007, the three-month LIBOR was $4.70 \%$. FHLB advances are generally used to increase the Company's lending activities and to aid the efforts of asset and liability management by utilizing various repayment options offered by the FHLB. Long-term advances from the FHLB totaled $\$ 66.5$ million at December 31, 2007, an increase of $\$ 5.4$ million or $8.7 \%$ from year-end 2006.

The Company has completed three private offerings of trust preferred securities through three separate Delaware statutory trusts sponsored by the Company. Farmers Capital Bank Trust I ("Trust I") sold $\$ 10.0$ million of preferred securities, Farmers Capital Bank Trust II ("Trust II") sold $\$ 15.0$ million of preferred securities, and Farmers Capital Bank Trust III ("Trust III") sold $\$ 22.5$ million of preferred securities (Trust I, Trust II, and Trust III are hereafter collectively referred to as the "Trusts"). The proceeds from Trust I and Trust II were used to fund the cash portion of the Citizens Bancorp acquisition during 2005. The Company used most of the proceeds
from Trust III for the purpose of financing the cost of acquiring Company shares under a Modified Dutch Auction share repurchase program during 2007. Remaining funds were used for general corporate operating purposes. The Company owns all of the common securities of each of the Trusts.

The Trusts used the proceeds from the sale of preferred securities, plus capital contributed by the Company to establish the trusts, to purchase the Company's subordinated notes in amounts and bearing terms that parallel the amounts and terms of the respective preferred securities. The subordinated notes of Trust I and Trust II mature in 2035 and bear a floating interest rate (current three-month LIBOR plus 150 basis points in the case of the notes held by Trust I and current three-month LIBOR plus 165 basis points in the case of the notes held by Trust II). The subordinated notes of Trust III mature in 2037 and bear a fixed interest rate through 2012 of $6.60 \%$ and convert to floating thereafter at current three-month LIBOR plus 132 basis points. Interest on the notes is payable quarterly.

The subordinated notes of Trust I and Trust II are redeemable in whole or in part, without penalty, at the Company's option on or after September 30, 2010 and mature on September 30, 2035. The subordinated notes of Trust III are redeemable in whole or in part, without penalty, at the Company's option on or after November 1, 2012. The subordinated notes are junior in right of payment of all present and future senior indebtedness. At December 31, 2007, the balance of the subordinated notes payable to Trust I, Trust II, and Trust III was $\$ 10.3$ million, $\$ 15.5$ million, and $\$ 23.2$ million, respectively. The interest rates in effect as of the last determination date in 2007 were $6.73 \%, 6.88 \%$, and $6.60 \%$ for Trusts I, II, and III, respectively.

Securities sold under agreements to repurchase represent long-term obligations whereby the Company borrowed approximately $\$ 200$ million in multiple fixed rate repurchase agreements with an initial weighted average cost of $3.95 \%$. The borrowings mature in time periods ranging from three to 10 years with a weighted average maturity of 6.5 years and are callable quarterly after time periods ranging from one to five years. The Company used the proceeds from the borrowing to purchase a like amount of fixed rate GNMA bonds. The Bonds had an initial weighted average yield of $5.69 \%$ and a stated maturity of 30 years. The estimated weighted average maturity of the Bonds is seven years.

## Contractual Obligations

The Company is contractually obligated to make payments as follows.

|  | Payments Due by Period |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Contractual Obligations (In thousands) |  | Total |  | Less <br> Than <br> One <br> Year |  | One to Three Years |  | Three to <br> Five <br> Years |  | ore Than <br> Five <br> Years |
| Long-term FHLB debt | \$ | 66,526 | \$ | 10,565 | \$ | 14,079 | \$ | 17,015 | \$ | 24,867 |
| Subordinated notes payable |  | 48,970 |  |  |  |  |  |  |  | 48,970 |
| Securities sold under agreements to repurchase |  | 200,000 |  |  |  | 50,000 |  | 50,000 |  | 100,000 |
| Unfunded postretirement benefit obligations |  | 4,930 |  | 361 |  | 823 |  | 894 |  | 2,852 |
| Operating leases |  | 3,906 |  | 596 |  | 962 |  | 656 |  | 1,692 |
| Capital lease obligations |  | 813 |  | 237 |  | 243 |  | 248 |  | 85 |
| Total | \$ | 325,145 | \$ | 11,759 | \$ | 66,107 | \$ | 68,813 | \$ | 178,466 |

Long-term FHLB debt represents FHLB advances pursuant to several different credit programs. Long-term FHLB debt subordinated notes payable, and securities sold under agreements to repurchase are more fully described under the caption "Long-Term Borrowings" above and in Note 9 of the Company’s 2007 audited consolidated financial statements. Payments for borrowings in the table above do not include interest. Postretirement benefit obligations are actuarially determined and estimated based on various assumptions with payouts projected over the next 10 years. Estimates can vary significantly each year due to changes in significant assumptions. Capital lease obligations represent amounts relating to the acquisition of data processing hardware and software. Operating leases include standard business equipment used in the Company's day-to-day business as well as the lease of certain branch sites. Operating lease terms generally range from one to five years, with the ability to extend certain branch site leases at the Company's option. Payments related to leases are based on actual payments specified in the underlying contracts.

## Guarantees

During 2007, the Parent Company entered into a guarantee agreement whereby it agreed to become unconditionally and irrevocably the guarantor of the obligations of its bank subsidiaries in connection with the balance sheet leverage transaction in the fourth quarter. The amount of borrowings outstanding guaranteed by the Parent Company at December 31, 2007 was $\$ 200$ million, with various maturity dates ranging from three to ten years. The $\$ 200$ million outstanding borrowings are secured by GNMA bonds held by the Parent Company's subsidiary banks valued at $106 \%$ of the outstanding borrowings or $\$ 212$ million. Should any of the subsidiary banks default on its borrowings under the agreement, the GNMA bonds securing the borrowings would be liquidated to satisfy amounts due. If the value of the GNMA bonds fall below the obligation under the contract, the Parent Company is obligated to cover any such
shortfall in absence of the subsidiary banks ability to do so. The Parent Company believes its subsidiary banks are fully capable of fulfilling their obligations under the borrowing arrangement and that the Parent Company will not be required to make any payments under the guarantee agreement.

## Effects of Inflation

The majority of the Company's assets and liabilities are monetary in nature. Therefore, the Company differs greatly from most commercial and industrial companies that have significant investments in nonmonetary assets, such as fixed assets and inventories. However, inflation does have an important impact on the growth of assets in the banking industry and on the resulting need to increase equity capital at higher than normal rates in order to maintain an appropriate equity to assets ratio. Inflation also affects other noninterest expense, which tends to rise during periods of general inflation.

Management believes the most significant impact on financial and operating results is the Company's ability to react to changes in interest rates. Management seeks to maintain an essentially balanced position between interest sensitive assets and liabilities in order to protect against the effects of wide interest rate fluctuations.

## Market Risk Management

Market risk is the risk of loss arising from adverse changes in market prices and rates. The Company's market risk is comprised primarily of interest rate risk created by its core banking activities of extending loans and receiving deposits. The Company's success is largely dependent upon its ability to manage this risk. Interest rate risk is defined as the exposure of the Company's net interest income to adverse movements in interest rates. Although the Company manages other risks, such as credit and liquidity risk, management considers interest rate risk to be its most significant risk, which could potentially have the largest and a material effect on the Company's financial condition and results of operations. A sudden and substantial change in interest rates may adversely impact the Company's earnings to the extent that the interest rates earned on assets and paid on liabilities do not change at the same speed, to the same extent, or on the same basis. Other events that could have an adverse impact on the Company's performance include changes in general economic and financial conditions, general movements in market interest rates, and changes in consumer preferences. The Company's primary purpose in managing interest rate risk is to effectively invest the Company's capital and to manage and preserve the value created by its core banking business.

The Company has a Corporate Asset and Liability Management Committee ("ALCO"). ALCO monitors the composition of the balance sheet to ensure comprehensive management of interest rate risk and liquidity. ALCO also provides guidance and support to each ALCO of the Company's subsidiary banks and is responsible for monitoring risks on a company-wide basis. ALCO has established minimum standards in its asset and liability management policy that each subsidiary bank must adopt. However, the subsidiary banks are permitted to deviate from these standards so long as the deviation is no less stringent than that of the Corporate policy.

The Company uses a simulation model as a tool to monitor and evaluate interest rate risk exposure. The model is designed to measure the sensitivity of net interest income and net income to changing interest rates during the next twelve months. Forecasting net interest income and its sensitivity to changes in interest rates requires the Company to make assumptions about the volume and characteristics of many attributes, including assumptions relating to the replacement of maturing earning assets and liabilities. Other assumptions include, but are not limited to, projected prepayments, projected new volume, and the predicted relationship between changes in market interest rates and changes in customer account balances. These effects are combined with the Company's estimate of the most likely rate environment to produce a forecast for the next twelve months. The forecasted results are then compared to the effect of a gradual 200 basis point increase and decrease in market interest rates on the Company's net interest income and net income. Because assumptions are inherently uncertain, the model cannot precisely estimate net interest income or net income or the effect of interest rate changes on net interest income and net income. Actual results could differ significantly from simulated results.

At December 31, 2007, the model indicated that if rates were to gradually increase by 200 basis points over the next twelve months, then net interest income (TE) and net income would increase $3.4 \%$ and $5.7 \%$, respectively, compared to forecasted results. The model indicated that if rates were to gradually decrease by 200 basis points over the next twelve months, then net interest income (TE) and net income would decrease $1.9 \%$ and $3.8 \%$, respectively, compared to forecasted results.

In the current relatively low interest rate environment, it is not practical or possible to reduce certain deposit rates by the same magnitude as rates on earning assets. The average rate paid on some of the Company's deposits remains below $2 \%$. This situation magnifies the model's predicted results when modeling a decrease in interest rates, as earning assets with higher yields have more of an opportunity to reprice at lower rates than lower-rate deposits.

## LIQUIDITY

Liquidity measures the ability to meet current and future cash flow needs as they become due. For financial institutions, liquidity reflects the ability to meet loan requests, to accommodate possible oufflows in deposits, and to capitalize on interest rate market opportunities. A financial institution's ability to meet its current financial obligations is dependent upon the structure of its balance sheet, its ability to liquidate assets, and its access to alternative sources of funds. The Company's goal is to meet its funding needs by maintaining a level of liquid funds through its asset/liability management.

The Company uses a liquidity ratio to help measure its ability to meet its cash flow needs. This ratio is monitored by ALCO at both the bank level and on a consolidated basis. The liquidity ratio is based on current and projected levels of sources and uses of funds. This measure is useful in analyzing cash needs and formulating strategies to achieve desired results. For example, a low liquidity ratio could indicate that the Company's ability to fund loans might become more difficult. A high liquidity ratio could indicate that the Company may have a disproportionate amount of funds in low yielding assets, which is more likely to occur during periods of sluggish loan demand. The Company's liquidity position was lower at year-end 2007 compared to year-end 2006, but remains within ALCO guidelines and considered by management to be at an adequate level.

At the Parent Company level, liquidity is primarily affected by the receipt of dividends from its subsidiary banks (see Note 18 of the Company's 2007 audited consolidated financial statements), cash balances maintained, and borrowings from nonaffiliated sources. The Parent Company's primary uses of cash include the payment of dividends to its common shareholders, repurchasing its common stock, business acquisitions, interest expense on borrowings, and paying for general operating expenses.

The primary source of funds for the Parent Company is the receipt of dividends from its subsidiary banks. As of December 31, 2007, combined retained earnings of the subsidiary banks were $\$ 46.4$ million, of which $\$ 12.6$ million was available for the payment of dividends to the Parent Company without obtaining prior approval from bank regulatory agencies. As a practical matter, payment of future dividends is also subject to the maintenance of other capital ratio requirements. Management expects that in the aggregate, its subsidiary banks will continue to have the ability to dividend adequate funds to the Parent Company to meet its near-term liquidity needs. In addition, the Parent Company has a $\$ 15.0$ million unsecured line of credit with an unrelated financial institution available for general corporate purposes. This line of credit matures in June 2008 and bears interest at the three-month LIBOR rate plus 125 basis points.

The Parent Company had cash balances of $\$ 15.0$ million at year-end 2007, an increase of $\$ 3.9$ million or $34.9 \%$ from the prior year-end. Significant cash receipts of the Parent Company during 2007 include $\$ 22.6$ million in dividends from its subsidiaries and $\$ 23.2$ million in proceeds from debt issued to Trust III in a trust preferred securities borrowing transaction. Significant cash payments by the Parent Company during 2007 include $\$ 18.6$ million to purchase Company common stock, $\$ 11.1$ million for the payment of dividends to shareholders, and $\$ 8.0$ million additional investment in First Citizens to facilitate the purchase of the allotment operations of PNC Bank, National Association. Each of the Company's subsidiary banks continued to maintain "well capitalized" status as defined by the FDIC subsequent to their dividend payments.

The Company's objective as it relates to liquidity is to ensure that its subsidiary banks have funds available to meet deposit withdrawals and credit demands without unduly penalizing profitability. In order to maintain a proper level of liquidity, the subsidiary banks have several sources of funds available on a daily basis that can be used for liquidity purposes. Those sources of funds include the subsidiary banks' core deposits, consisting of both business and nonbusiness deposits; cash flow generated by repayment of principal and interest on loans and investment securities; FHLB and other borrowings; and federal funds purchased and securities sold under agreements to repurchase. While maturities and scheduled amortization of loans and investment securities are generally a predictable source of funds, deposit outflows and mortgage prepayments are influenced significantly by general interest rates, economic conditions, and competition in our local markets. As of December 31, 2007, the Company had $\$ 220$ million in additional borrowing capacity under various FHLB, federal funds, and other borrowing agreements. However, there is no guarantee that these sources of funds will continue to be available to the Company, or that current borrowings can be refinanced upon maturity, although the Company is not aware of any events or uncertainties that are likely to cause a decrease in the Company's liquidity from these sources.

For the longer term, the liquidity position is managed by balancing the maturity structure of the balance sheet. This process allows for an orderly flow of funds over an extended period of time. The Company's ALCOs, both at the bank subsidiary level and on a consolidated basis, meets regularly and monitors the composition of the balance sheet to ensure comprehensive management of interest rate risk and liquidity.

Liquid assets consist of cash, cash equivalents, and available for sale investment securities. At December 31, 2007, consolidated liquid assets totaled $\$ 622$ million, a $\$ 138$ million or $28.6 \%$ increase compared to the prior year-end. Cash and equivalents decreased $\$ 77.7$ million or $49.5 \%$, offset by a $\$ 216$ million or $66.2 \%$ in available for sale investment securities in the comparison. The lower cash and cash equivalents amount at year-end 2007 is due mainly to lower cash balances from the Commonwealth of Kentucky of $\$ 53.3$ million
or $77.6 \%$ and the overall net funding position of the Company, which changes as loan demand, deposit levels, and other sources and uses of funds fluctuate. Available for sale investment securities were up sharply as a result of the $\$ 200$ million balance sheet leverage transaction that occurred during the fourth quarter of 2007.

Net cash provided by continuing operating activities was $\$ 22.1$ million in 2007, relatively unchanged from $\$ 21.3$ million for 2006 . Net cash used in continuing investing activities was $\$ 313$ million during 2007 compared to $\$ 135$ million a year earlier. The $\$ 178$ million increase in the comparison is attributed mainly to additional net cash outflows related to investment securities transactions, primarily driven by the purchase of additional GNMA bonds in the Company's $\$ 200$ million balance sheet leverage transaction. Net cash provided by continuing financing activities totaled $\$ 213$ million for the year 2007 compared to $\$ 130$ million during 2006. This represents an increase in cash flows of $\$ 83.3$ million or $64.3 \%$ in the comparison and is due primarily to a net increase in borrowing activity of $\$ 218$ million, partially offset by $\$ 115$ million in lower net deposit activity and additional purchases of Company common shares of $\$ 17.8$ million in the comparable periods. Increased borrowing activity is due in large part to the $\$ 200$ million funds borrowed in the balance sheet leverage transaction and the $\$ 23.2$ million borrowed relating to the Company's share buy-back plan. The lower net deposit activity between the periods is attributed in part to fluctuations in balances related to the Commonwealth. During 2006, net deposits from the Commonwealth increased $\$ 47.1$ million; during 2007, net deposits declined $\$ 53.3$ million. The additional number of Company shares purchased during 2007 is attributed to the share buy-back plan announced during the third quarter of 2007, whereby the Company purchased 559 thousand of its outstanding shares at a cost of $\$ 17.9$ million.

Information relating to off-balance sheet arrangements is disclosed in Note 15 of the Company's 2007 audited consolidated financial statements. These transactions are entered into in the ordinary course of providing traditional banking services and are considered in managing the Company's liquidity position. The Company does not expect these commitments to significantly affect the liquidity position in future periods. The Company has not entered into any contracts for financial derivative instruments such as futures, swaps, options, or similar instruments.

## CAPITAL RESOURCES

Shareholders' equity was $\$ 168$ million on December 31, 2007, a decrease of $\$ 8.6$ million or $4.8 \%$ from $\$ 177$ million at December 31, 2006. Retained earnings declined $\$ 6.2$ million or $4.8 \%$ as a result of $\$ 15.6$ million of net income partially offset by $\$ 10.1$ million or $\$ 1.32$ per share in cash dividends declared and $\$ 11.7$ million attributed to the Company's purchase of its outstanding common stock. The total decline in shareholders' equity related to share repurchase activity in 2007 was $\$ 18.6$ million. This includes $\$ 17.9$ million paid for outstanding shares through the Company's modified Dutch Auction self tender offer during the third quarter of 2007.

Other significant changes to shareholders’ equity include $\$ 1.5$ million in proceeds from employees stock option exercises and an increase in accumulated other comprehensive income that increased equity by $\$ 2.7$ million. The higher accumulated other comprehensive income is attributed to a net increase in the market value on available for sale investment securities of $\$ 1.6$ million, net of tax. The increase in the market value of available for sale investment securities is due primarily to the impact of changing economic conditions, including a decline in Treasury yields at December 31, 2007 compared to December 31, 2006. The decline in yields occurred in nearly all maturity ranges, with shorter-term rates experiencing the largest decreases. As overall yields have decreased, the portfolio has increased in value. Market values of fixed rate investments are inversely related to changes in market interest rates. The remaining $\$ 1.1$ million increase in accumulated other comprehensive income is attributed to the change in the funded status of the Company's defined benefit postretirement health insurance plans.

Under current regulatory requirements, accumulated other comprehensive amounts related to the net unrealized gain or loss on securities available for sale and the funded status of the Company's defined benefit postretirement benefit plans do not impact regulatory capital; therefore, they are not included in the risk-based capital or leverage ratios that follow.

During the third quarter of 2007, the Company reclassified its previous presentation of treasury stock to conform to its current presentation. The current presentation displays purchased shares as retired. These reclassifications, which include $\$ 43.1$ million and $\$ 42.4$ million in cumulative stock repurchased at June 30, 2007 and December 31, 2006, respectively, had no impact on net income or total shareholders’ equity as previously reported and is not material to the Company's financial statements.

Consistent with the objective of operating a sound financial organization, the Company's goal is to maintain capital ratios well above the regulatory minimum requirements. The Company's capital ratios as of December 31, 2007, the regulatory minimums, and the regulatory standard for a well-capitalized institution are as follows.

|  | Farmers |  |
| :---: | :---: | :---: |
|  | Capital Bank Corporation | Regulatory Minimum |
| Tier 1 risk-based | 11.55\% | 4.00\% |
| Total risk-based | 12.60 | 8.00 |
| Leverage | 8.08 | 4.00 |

The capital ratios of each subsidiary bank were in excess of the applicable minimum regulatory capital ratio requirements at December 31, 2007. The Company is not aware of any recommendations by its regulatory authorities which, if implemented, would have a material effect on its capital resources, liquidity, or operations.

The table below is an analysis of dividend payout ratios and equity to asset ratios for the previous five years.

| Years Ended December 31, | 2007 | 2006 | 2005 | 2004 | 2003 |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Percentage of dividends declared to income from <br> continuing operations | $64.52 \%$ | $78.89 \%$ | $61.67 \%$ | $68.10 \%$ | $70.70 \%$ |
| Percentage of average shareholders' equity to average <br> total assets $^{1}$ | 9.33 | 10.04 | 10.19 | 10.45 | 10.88 |
| 1 |  |  |  |  |  |

${ }^{1}$ Excludes assets of discontinued operations.

## Share Buy Back Program

At various times, the Company's Board of Directors has authorized the purchase shares of the Company's outstanding common stock. No stated expiration dates have been established under any of the previous authorizations. There are approximately 128 thousand shares that may still be purchased under the various authorizations.

In July 2007, the Company announced a tender offer to purchase for cash up to 550 thousand shares of its outstanding common stock at a price not greater than $\$ 35.00$ or less than $\$ 31.00$ per share through a process commonly known as a modified "Dutch Auction". The Company had the right to purchase up to an additional $2 \%$ of the outstanding shares in accordance with applicable securities laws. Pursuant to the terms of the tender offer, the Company purchased 559 thousand shares of its common stock, which represented $7.1 \%$ of the Company's issued and outstanding shares on the date of purchase, at a purchase price of $\$ 32.00$ per share.

## Shareholder Information

As of February 22, 2008, the Company had 2,653 shareholders of record.

## Stock Prices

Farmers Capital Bank Corporation's stock is traded on the NASDAQ Stock Market LLC exchange in the Global Select Market tier, with sales prices reported under the symbol: FFKT. The table below lists the stock prices and dividends declared for 2007 and 2006.

## Stock Prices

|  |  |  |  | Dividends <br> Declared |
| :--- | ---: | ---: | ---: | ---: |
| 2007 |  | Low |  |  |
| Fourth Quarter | 30.72 | $\$ 26.43$ | $\$$ | .33 |
| Third Quarter | 31.50 | 28.35 | .33 |  |
| Second Quarter | 35.35 | 28.29 | .33 |  |
| First Quarter |  |  | .33 |  |
|  |  |  |  |  |
| 2006 | $\$ 36.98$ | $\$ 32.40$ | $\$$ | .44 |
| Fourth Quarter | 34.59 | 29.78 | .33 |  |
| Third Quarter | 32.82 | 29.25 | .33 |  |
| Second Quarter | 33.54 | 30.59 | .33 |  |
| First Quarter |  |  |  |  |

The closing price per share of common stock on December 31, 2007, the last trading day of the Company's fiscal year, was $\$ 27.00$. Dividends declared per share were $\$ 1.32$ and $\$ 1.43$ for 2007 and 2006, respectively. A special one-time $\$ .11$ per share dividend was declared during the fourth quarter of 2006.

## Recently Issued Accounting Standards

Please refer to the caption "Recently Issued But Not Yet Effective Accounting Standards" in Note 1 of the Company's 2007 audited consolidated financial statements.

## 2006 Compared to 2005

Consolidated net income for 2006 was $\$ 21.4$ million, an increase of $\$ 5.6$ million or $35.5 \%$ compared to $\$ 15.8$ million for 2005. Basic and diluted net income per share for 2006 was $\$ 2.85$ and $\$ 2.84$, respectively. This represents an increase of $\$ .54$ or $23.4 \%$ and $23.5 \%$ on a basic and diluted basis, respectively. Net income for 2006 includes $\$ 7.7$ million attributed to discontinued operations, including
gains on disposals (net of tax) of $\$ 6.4$ million. Income from continuing operations for 2006 was $\$ 13.7$ million, a decline of $\$ 867$ thousand or $6.0 \%$ from $\$ 14.5$ million in 2005. Basic and diluted income per share from continuing operations for 2006 was $\$ 1.82$ compared to $\$ 2.13$ and $\$ 2.12$ in 2005 , respectively. This represents a decrease of $\$ .31$ or $14.6 \%$ on a basic per share basis and $\$ .30$ or $14.2 \%$ on a diluted per share basis.

For 2006, the Company reported a $\$ 9.7$ million or $23.4 \%$ increase in net interest income and a higher provision for loan losses of $\$ 343$ thousand. The increase in net interest income is primarily due to higher interest on loans of $\$ 24.7$ million or $47.0 \%$, partially offset by $\$ 13.4$ million or $70.2 \%$ higher interest expense on deposits. The increase in net interest income was driven by the Citizens Bancorp and Citizens Jessamine acquisitions, which occurred during the fourth quarter of 2005 and the fourth quarter of 2006, respectively. Net noninterest expense (noninterest expense in excess of noninterest income) grew $\$ 10.6$ million and the provision for income taxes was down $\$ 431$ thousand.

The general trend of the short-term interest rate environment for 2006 was upward primarily as a result of short-term interest rate increases by the Fed. The Fed began to increase the short-term federal funds rate by increments of 25 basis points during the last half of 2004 that continued into 2006. In all, the federal funds rate was increased 125 basis points during 2004, 200 basis points during 2005, and 100 basis points during 2006 and stood at $5.25 \%$ at year-end 2006. Longer-term yields, such as for the $3,5,10$, and 20 year treasuries, were also up at year-end 2006 compared to year-end 2005, with the 3,5 , and 10 year notes up 37,35 , and 32 basis points, respectively and the 20 year bond up 30 basis points. For the Company, this has had a relatively neutral impact on net interest margin and spread in the comparison. Net interest margin for 2006 increased 6 basis points to $3.75 \%$ from $3.69 \%$ due to the impact of noninterest bearing sources of funds used to support the increase in interest earning assets.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk
The information required by this item is incorporated by reference to Part II, Item 7 under the caption "Market Risk Management" on page 37 of this Form 10-K.

## MANAGEMENT'S RESPONSIBILITY FOR FINANCIAL REPORTING

The management of Farmers Capital Bank Corporation has the responsibility for preparing the accompanying consolidated financial statements and for their integrity and objectivity. The statements were prepared in accordance with accounting principles generally accepted in the United States of America. The consolidated financial statements include amounts that are based on management's best estimates and judgments. Management also prepared other information in the annual report and is responsible for its accuracy and consistency with the financial statements.

The Company’s 2007 consolidated financial statements have been audited by Crowe Chizek and Company LLC independent accountants. Management has made available to Crowe Chizek and Company LLC all financial records and related data, as well as the minutes of Boards of Directors’ meetings. Management believes that all representations made to Crowe Chizek and Company LLC during the audit were valid and appropriate.

## REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

## Board of Directors and Shareholders <br> Farmers Capital Bank Corporation <br> Frankfort, Kentucky

We have audited the accompanying consolidated balance sheets of Farmers Capital Bank Corporation as of December 31, 2007, and 2006, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2007. We also have audited Farmers Capital Bank Corporation's internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting (see Item 9A in the accompanying Form 10-K). Our responsibility is to express an opinion on these financial statements and an opinion on the company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2007 and 2006, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2007 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

## 1. Summary of Significant Accounting Policies

The accounting and reporting policies of Farmers Capital Bank Corporation and subsidiaries conform to accounting principles generally accepted in the United States of America and general practices applicable to the banking industry. Significant accounting policies are summarized below.

## Principles of Consolidation and Nature of Operations

The consolidated financial statements include the accounts of Farmers Capital Bank Corporation (the "Company"), a financial holding company, and its bank and nonbank subsidiaries. Bank subsidiaries include Farmers Bank \& Capital Trust Co. ("Farmers Bank") in Frankfort, KY and its wholly-owned subsidiaries Leasing One Corporation ("Leasing One") and Farmers Capital Insurance Corporation ("Farmers Insurance"). Leasing One is a commercial leasing company in Frankfort, KY and Farmers Insurance is an insurance agency in Frankfort, KY; Farmers Bank and Trust Company in Georgetown, KY ("Farmers Georgetown") including its formerly wholly-owned subsidiary Pro Mortgage Partners, LLC ("Pro Mortgage"), a mortgage brokerage company established in 2004 that was merged into Farmers Georgetown at year-end 2007; First Citizens Bank in Elizabethtown, KY ("First Citizens"); United Bank \& Trust Co. in Versailles, KY; The Lawrenceburg Bank and Trust Company in Harrodsburg, KY; Kentucky Banking Centers, Inc. ("KBC") in Glasgow, KY, which was sold during 2006; Citizens Bank of Northern Kentucky, Inc. in Newport, KY ("Citizens Northern"); and Citizens Bank of Jessamine County in Nicholasville, KY ("Citizens Jessamine"). The Company has three active nonbank subsidiaries, FCB Services, Inc. ("FCB Services"), Kentucky General Holdings, LLC ("Kentucky General"), and FFKT Insurance Services, Inc. ("FFKT Insurance"). FCB Services is a data processing subsidiary located in Frankfort, KY, which provides services to the Company’s banks as well as other unaffiliated entities. Kentucky General holds a $50 \%$ voting interest in KHL Holdings, LLC, which is the parent company of Kentucky Home Life Insurance Company. FFKT Insurance is a captive property and casualty insurance company insuring primarily deductible exposures and uncovered liability related to properties of the Company. All significant intercompany transactions and balances are eliminated in consolidation.

The Company provides financial services at its 36 locations in 23 communities throughout Central and Northern Kentucky to individual, business, agriculture, government, and educational customers. Its primary deposit products are checking, savings, and term certificate accounts. Its primary lending products are residential mortgage, commercial lending and leasing, and installment loans. Substantially all loans and leases are secured by specific items of collateral including business assets, consumer assets, and commercial and residential real estate. Commercial loans and leases are expected to be repaid from cash flow from operations of businesses. Farmers Bank has served as the general depository for the Commonwealth of Kentucky for over 70 years and also provides investment and other services to the Commonwealth. Other services include, but are not limited to, cash management services, issuing letters of credit, safe deposit box rental, and providing funds transfer services. Other financial instruments, which potentially represent concentrations of credit risk, include deposit accounts in other financial institutions and federal funds sold.

## Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Estimates used in the preparation of the financial statements are based on various factors including the current interest rate environment and the general strength of the local economy. Changes in the overall interest rate environment can significantly affect the Company's net interest income and the value of its recorded assets and liabilities. Actual results could differ from those estimates used in the preparation of the financial statements. The allowance for loan losses, carrying value of real estate, actuarial assumptions used to calculate postretirement benefits, and the fair values of financial instruments are estimates that are particularly subject to change.

## Revised 2006 Balance Sheet and Statement of Changes in Shareholders' Equity

At December 31, 2006, the Company adopted Financial Accounting Standards Board ("FASB") Statement of Financial Accounting Standards No. ("SFAS") 158 for its postretirement benefit plans. During the fourth quarter of 2007 the Company learned that an actuarial error, related to the selection of the appropriate actuarial table, caused the amount recorded upon adoption to be incorrect. The previously recorded adjustment upon adoption was $\$ 3,091,000$; it should have been $\$ 4,469,000$. Although the error was not material to the 2006 consolidated financial statements, the Company determined that the 2006 amount should be revised because correcting the error through the 2007 consolidated financial statements would have resulted in a material misstatement of other comprehensive income within the consolidated statement of comprehensive income. Accordingly, other assets, other liabilities, and the comprehensive income component of shareholders' equity have been revised to reflect the correct balance. These revisions increased total assets at December 31, 2006 by $\$ 742,000$, increased total liabilities by $\$ 2,120,000$, and reduced total shareholders' equity by $\$ 1,378,000$ or less than $1 \%$; no revision to the 2006 statement of income was required. In accordance with Securities and Exchange Commission Staff Accounting Bulletin No. 108, the Company's consolidated balance sheet and statement of changes in shareholders' equity for 2006 is presented as revised in this 2007 annual report on Form 10-K.

## Reclassifications

Certain amounts in the accompanying consolidated financial statements presented for prior years have been reclassified to conform to the 2007 presentation. These reclassifications do not affect net income or total shareholders' equity as previously reported.

## Segment Information

The Company provides a broad range of financial services to individuals, corporations, and others through its 36 banking locations throughout Central and Northern Kentucky. These services primarily include the activities of lending and leasing, receiving deposits, providing cash management services, safe deposit box rental, and trust activities. Operations are managed and financial performance is evaluated at the subsidiary level. The Company's chief decision makers monitor the results of the various banking products and services of its subsidiaries. Accordingly, all of the Company's operations are considered by management to be aggregated in one reportable operating segment; commercial and retail banking.

## Cash Flows

For purposes of reporting cash flows, cash and cash equivalents include the following: cash on hand, deposits from other financial institutions that have an initial maturity of less than 90 days when acquired by the Company, federal funds sold, and securities purchased under agreements to resell. Generally, federal funds sold and securities purchased under agreements to resell are purchased and sold for one-day periods. Net cash flows are reported for loan and deposit transactions.

## Investment Securities

Investments in debt and equity securities are classified into three categories. Securities that management has the positive intent and ability to hold until maturity are classified as held to maturity. Securities that are bought and held specifically for the purpose of selling them in the near term are classified as trading securities. The Company had no securities classified as trading during 2007, 2006, or 2005. All other securities are classified as available for sale. Securities are designated as available for sale if they might be sold before maturity. Securities classified as available for sale are carried at estimated market value. Unrealized holding gains and losses for available for sale securities are reported net of deferred income taxes in other comprehensive income. Investments classified as held to maturity are carried at amortized cost. Interest income includes amortization and accretion of purchase premiums or discounts. Premiums and discounts on securities are amortized using the interest method over the expected life of the securities. Realized gains and losses on the sales of securities are recorded on the trade date and computed on the basis of specific identification of the adjusted cost of each security and are included in noninterest income. A decline in the market value of any available for sale or held to maturity security below cost that is deemed other than temporary results in a charge to earnings and the establishment of a new cost basis for the security. In estimating other-than-temporary losses, management considers each of the following: the length of time and extent that fair value has been less than cost, the financial condition and near term prospects of the issuer, and the Company's ability and intent to hold the security for a period sufficient to allow for any anticipated recovery in fair value. Federal Home Loan Bank ("FHLB") and Federal Reserve Board stock is carried at cost.

## Loans and Interest Income

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or pay-off are reported at their unpaid principal amount outstanding adjusted for any charge-offs and any deferred fees or costs on originated loans. Interest income on loans is recognized using the interest method based on loan principal amounts outstanding during the period. Interest income also includes amortization and accretion of any premiums or discounts over the expected life of acquired loans at the time of purchase or business acquisition. Net fees and incremental direct costs associated with loan origination are deferred and amortized as yield adjustments over the contractual term of the loans. Generally, the accrual of interest on loans is discontinued when it is determined that the collection of interest or principal is doubtful, or when a default of interest or principal has existed for 90 days or more, unless such loan is well secured and in the process of collection. Past due status is based on the contractual terms of the loan. Cash payments received on nonaccrual loans generally are applied to principal, and interest income is only recorded once principal recovery is reasonably assured. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

## Loans Held for Sale

The Company's operations include a limited amount of mortgage banking. Mortgage banking activities include the origination of fixed-rate residential mortgage loans for sale to various third-party investors. Mortgage loans originated and intended for sale in the secondary market, principally under programs with the Federal Home Loan Mortgage Corporation, the Federal National Mortgage Association, and other commercial lending institutions are carried at the lower of cost or estimated market value determined in the aggregate and are included in net loans on the balance sheet until sold. These loans are sold with the related servicing rights either retained or released by the Company depending on the economic conditions present at the time of origination. Mortgage loans held for sale included in net loans totaled \$1,386,000 and \$2,921,000 at December 31, 2007 and December 31, 2006, respectively. Mortgage banking revenues, including origination fees, servicing fees, net gains or losses on sales of mortgages, and other fee income were $.6 \%, .8 \%$, and $.9 \%$ of the Company's total revenue for the years ended December 31, 2007, 2006, and 2005, respectively.

## Provision and Allowance for Loan Losses

The provision for loan losses represents charges made to earnings to maintain an allowance for loan losses at an adequate level based on credit losses specifically identified in the loan portfolio, as well as management's best estimate of probable loan losses in the remainder of the portfolio at the balance sheet date. The allowance for loan losses is a valuation allowance increased by the provision for loan losses and decreased by net charge-offs. Loan losses are charged against the allowance when management believes the uncollectibility of a loan is confirmed. Subsequent recoveries, if any, are credited to the allowance.

Management estimates the allowance balance required using a risk-rated methodology. Many factors are considered when estimating the allowance. These include, but are not limited to, past loan loss experience, an assessment of the financial condition of individual borrowers, a determination of the value and adequacy of underlying collateral, the condition of the local economy, an analysis of the levels and trends of the loan portfolio, and a review of delinquent and classified loans. The allowance for loan losses consists of specific and general components. The specific component relates to loans that are individually classified as impaired or loans otherwise classified as substandard or doubtful. The general component covers non-classified loans and is based on historical loss experience adjusted for current risk factors. Allocations of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in management's judgment, should be charged off. Actual loan losses could differ significantly from the amounts estimated by management.

The risk-rated methodology includes segregating watch list and past due loans from the general portfolio and allocating specific amounts to these loans depending on their status. For example, watch list loans, which may be identified by the internal loan review risk-rating system or by regulatory examiner classification, are assigned a certain loss percentage while loans past due 30 days or more are assigned a different loss percentage. Each of these percentages considers past experience as well as current factors. The remainder of the general loan portfolio is segregated into three components having similar risk characteristics as follows: commercial loans, consumer loans, and real estate loans. Each of these components is assigned a loss percentage based on their respective three year historical loss percentage. Additional allocations to the allowance may then be made for subjective factors, such as those mentioned above, as determined by senior managers who are knowledgeable about these matters. During 2007, the Company further identified signs of deterioration in certain real estate development loans and specific allowances related to these loans were recorded.

The Company accounts for impaired loans in accordance with the SFAS No. 114, Accounting by Creditors for Impairment of a Loan, as amended by SFAS No. 118, Accounting by Creditors for Impairment of a Loan - Income Recognition. SFAS No. 114, as amended, requires that impaired loans be measured at the present value of expected future cash flows, discounted at the loan's effective interest rate, at the loan's observable market price, or at the fair value of the collateral if the loan is collateral dependent. A loan is impaired when full payment under the contractual terms is not expected. Generally, impaired loans are also in nonaccrual status. In certain circumstances, however, the Company may continue to accrue interest on an impaired loan. Cash receipts on impaired loans are typically applied to the recorded investment in the loan, including any accrued interest receivable. Loans that are part of a large group of smaller-balance homogeneous loans, such as residential mortgage, consumer, and smaller-balance commercial loans, are collectively evaluated for impairment and, accordingly, they are not separately identified for impairment disclosures.

## Mortgage Servicing Rights

Mortgage servicing rights are recognized in other intangible assets on the Company's consolidated balance sheet for the allocated cost of retained servicing rights on loans sold. Mortgage servicing rights are expensed in proportion to, and over the period of, estimated net servicing revenues. Impairment is evaluated based on the fair value of the rights, using groupings of the underlying loans as to interest rates. Any impairment of a grouping is reported as a valuation allowance. Capitalized mortgage servicing rights were $\$ 413,000$ and $\$ 496,000$ at December 31, 2007 and 2006. No impairment of the asset was determined to exist on either of these dates.

## Fair Value of Financial Instruments

Fair values of financial instruments are estimated using relevant market information and other assumptions, as more fully disclosed in a separate note. Fair value estimates involve uncertainties and matters of significant judgment regarding interest rates, credit risk, prepayments, and other factors, especially in the absence of broad markets for particular items. Changes in assumptions or in market conditions could significantly affect the estimates.

## Business Combinations

The Company accounts for its business acquisitions as a purchase in accordance with SFAS No. 141, whereby the purchase price is allocated to the tangible and intangible assets acquired and liabilities assumed based on their estimated fair value. The excess of the purchase price over estimated fair value of the net identifiable assets is allocated to goodwill. The Company engages third-party appraisal firms to assist in determining the fair values of certain assets acquired and liabilities assumed. Determining fair value of assets and liabilities requires many assumptions and estimates. These estimates and assumptions are sometimes refined subsequent to the initial recording of the transaction with adjustments to goodwill as information is gathered and final appraisals are completed.

## Goodwill and Other Intangible Assets

Goodwill results from business acquisitions and represents the excess of the purchase price over the fair value of acquired tangible assets and liabilities and identifiable intangible assets. Goodwill is assessed at least annually for impairment and any such impairment is recognized in the period identified.

Other intangible assets consist of core deposit and acquired customer relationship intangible assets arising from business acquisitions. They are initially measured at fair value and then are amortized on an accelerated method over their estimated useful lives.

## Other Real Estate

Other real estate owned and held for sale, included with other assets in the accompanying consolidated balance sheets, includes properties acquired by the Company through actual loan foreclosures. Other real estate owned is carried at the lower of cost or fair value less estimated costs to sell. Fair value is the amount that the Company could reasonably expect to receive in a current sale between a willing buyer and a willing seller, other than in a forced or liquidation sale. Fair value of assets is measured by the market value based on comparable sales. If fair value declines subsequent to foreclosure, a valuation allowance is recorded through expense. Costs after acquisition are expensed. Other real estate owned included in the consolidated balance sheets was $\$ 6,044,000$ and $\$ 5,031,000$ at December 31, 2007 and 2006, respectively.

## Income Taxes

Income tax expense is the total of current year income tax due or refundable and the change in deferred tax assets and liabilities, except for the deferred tax assets and liabilities related to business combinations or components of other comprehensive income. Deferred income tax assets and liabilities result from temporary differences between the tax basis of assets and liabilities and their reported amounts in the consolidated financial statements that will result in taxable or deductible amounts in future years. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in years in which those temporary differences are expected to be recovered or settled. As changes in tax laws or rates are enacted, deferred tax assets and liabilities are adjusted through income tax expense.

The Company files a consolidated federal income tax return with its subsidiaries. Federal income tax expense or benefit has been allocated to subsidiaries on a separate return basis.

## Premises and Equipment

Premises, equipment, and leasehold improvements are stated at cost less accumulated depreciation and amortization. Depreciation is computed primarily on the straight-line method over the estimated useful lives generally ranging from two to seven years for furniture and equipment and generally ten to 50 years for buildings and related components. Leasehold improvements are amortized over the shorter of the estimated useful lives or terms of the related leases on the straight-line method. Maintenance, repairs, and minor improvements are charged to operating expenses as incurred and major improvements are capitalized. The cost of assets sold or retired and the related accumulated depreciation are removed from the accounts and any resulting gain or loss is included in noninterest income. Land is carried at cost.

## Company-owned Life Insurance

The Company has purchased life insurance policies on certain key employees with their knowledge and written consent. Company-owned life insurance is recorded at its cash surrender value, i.e. the amount that can be realized, on the consolidated balance sheet. The related change in cash surrender value and proceeds received under the policies are reported on the consolidated statement of income under the caption "Income from company-owned life insurance".

## Net Income Per Common Share

Basic net income per common share is determined by dividing net income by the weighted average total number of shares of common stock outstanding. Diluted net income per common share is determined by dividing net income by the total weighted average number of shares of common stock outstanding, plus the total weighted average number of shares that would be issued upon exercise of dilutive stock options assuming proceeds are used to repurchase shares pursuant to the treasury stock method. Net income per common share computations were as follows at December 31, 2007, 2006, and 2005.

| (In thousands, except per share data) |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Years Ended December 31, | 2007 |  | 2006 |  | 2005 |  |
| Net income, basic and diluted | \$ | 15,627 | \$ | 21,372 | \$ | 15,772 |
| Average shares outstanding |  | 7,706 |  | 7,511 |  | 6,831 |
| Effect of dilutive stock options |  |  |  | 15 |  | 33 |
| Average diluted shares outstanding |  | 7,706 |  | 7,526 |  | 6,864 |
|  |  |  |  |  |  |  |
| Net income per share, basic | \$ | 2.03 | \$ | 2.85 | \$ | 2.31 |
| Net income per share, diluted |  | 2.03 |  | 2.84 |  | 2.30 |
| Income from continuing operations, basic and diluted | \$ | 15,627 | \$ | 13,665 | \$ | 14,532 |
| Income per share from continuing operations, basic | \$ | 2.03 | \$ | 1.82 | \$ | 2.13 |
| Income per share from continuing operations, diluted |  | 2.03 |  | 1.82 |  | 2.12 |
| Income from discontinued operations, basic and diluted | \$ | 0 | \$ | 7,707 | \$ | 1,240 |
| Income per share from discontinued operations, basic | \$ | 0 | \$ | 1.03 | \$ | . 18 |
| Income per share from discontinued operations, diluted |  | 0 |  | 1.02 |  | . 18 |

Stock options for $62,621,62,621$, and 38,049 shares of common stock were not included in the determination of dilutive earnings per share for 2007 , 2006, and 2005 because they were antidilutive.

## Comprehensive Income

Comprehensive income is defined as the change in equity (net assets) of a business enterprise during a period from transactions and other events and circumstances from nonowner sources. For the Company this includes net income, the after tax effect of changes in the net unrealized gains and losses on available for sale investment securities, and the changes in the funded status of postretirement benefit plans.

## Treasury Stock

The Company previously accounted for the purchase of its outstanding shares as treasury stock using the cost method. Under this method, the cost of shares purchased is shown as a single amount in shareholders' equity. Since the Commonwealth of Kentucky does not recognize the concept of treasury stock, during the third quarter of 2007 the Company changed its previous presentation to conform to its current presentation that displays purchased shares as retired. The current presentation allocates a portion of the purchase price of shares that are retired to each of the following balance sheet line items: common stock, capital surplus, and retained earnings. The reclassification of previous periods to their current presentation, including $\$ 42,399,000$ in cumulative stock repurchased at December 31, 2006, had no impact on net income or total shareholders' equity.

## Dividend Restrictions

Banking regulations require maintaining certain capital levels and may limit the dividends paid to the Company by its bank subsidiaries or by the Company to its shareholders.

## Trust Assets

Assets of the Company's trust departments, other than cash on deposit at our subsidiaries, are not included in the accompanying financial statements because they are not assets of the Company.

## Stock-Based Compensation

During 1997 the Company’s Board of Directors approved a nonqualified stock option plan (the "Plan"), subsequently approved by the Company's shareholders, that has periodically provided for the granting of stock options to key employees and officers of the Company. All stock options are awarded at a price equal to the fair market value of the Company's common stock at the date options are granted and expire ten years from the grant date. Total options granted were 450,000, 54,000, and 40,049 in the years 1997, 2000, and 2004, respectively.

Effective January 1, 2006 the Company adopted SFAS No. 123(R), Share-based Payment, using the modified prospective transition method. Accordingly, the Company has recorded stock-based employee compensation cost using the fair value method starting in 2006. For 2006, adopting this Standard resulted in a reduction of income before taxes of $\$ 154,000$, a reduction in net income of $\$ 100,000$, and a decrease in basic and diluted earnings per share (continuing operations) of \$.01.

Prior to January 1, 2006, the Company accounted for its Plan under the recognition and measurement provisions of APB Opinion No. 25 and related interpretations as allowed by SFAS No. 123. Under the modified prospective transition method of SFAS No. 123(R), prior year financial statement amounts are not restated. The table below presents the effect on net income and earnings per share as if expense was measured using the fair value recognition provisions of SFAS No. 123 for the year ended December 31, 2005.

| (In thousands, except per share data) |  |
| :---: | :---: |
| Years Ended December 31, | 2005 |
| Net Income |  |
| As reported | \$15,772 |
| Add: Stock-based compensation expense included in reported net income |  |
| Less: Stock-based compensation expense determined under fair value based method for all awards, net of related tax effects | (112) |
| Proforma | \$15,660 |
| Net Income Per Common Share |  |
| Basic, as reported | \$ 2.31 |
| Basic, proforma | 2.29 |
|  |  |
| Diluted, as reported | 2.30 |
| Diluted, proforma | 2.28 |
| Income From Continuing Operations |  |
| As reported | \$14,532 |
| Add: Stock-based compensation expense included in reported net income |  |
| Less: Stock-based compensation expense determined under fair value based method for all awards, net of related tax effects | (100) |
| Proforma | \$14,432 |
| Income Per Common Share From Continuing Operations |  |
| Basic, as reported | \$ 2.13 |
| Basic, proforma | 2.11 |
|  |  |
| Diluted, as reported | 2.12 |
| Diluted, proforma | 2.10 |
| Income From Discontinued Operations |  |
| As reported | \$ 1,240 |
| Add: Stock-based compensation expense included in reported net income |  |
| Less: Stock-based compensation expense determined under fair value based method for all awards, net of related tax effects | (12) |
| Proforma | \$ 1,228 |
| Income Per Common Share From Discontinued Operations |  |
| Basic and diluted, as reported | \$ . 18 |
| Basic and diluted, proforma | . 18 |

The fair value of options granted is estimated as of the measurement date using the Black-Scholes option pricing model. Following are the weighted average assumptions used and estimated fair market value for the Employee Stock Purchase Plan ("ESPP").

|  | ESPP |  |  |  |
| :--- | ---: | :---: | :---: | :---: |
|  | 2007 | 2006 | 2005 |  |
| Dividend yield | $3.97 \%$ | $3.88 \%$ | $3.82 \%$ |  |
| Expected volatility | 15.3 | 14.0 | 13.0 |  |
| Risk-free interest rate | 4.75 | 4.70 | 2.98 |  |
| Expected life (in years) | .25 | .25 | .25 |  |
| Fair value | $\$ 5.12$ | $\$$ | 5.75 | $\$$ |

The Plan provides for the granting of options to purchase up to 450,000 shares of the Company's common stock at a price equal to the fair market value of the Company's common stock on the date the option is granted. The term of the options expires after ten years from the date on which the options are granted. Options granted under the Plan vest ratably over various time periods ranging from three to seven years. All options granted must be held for a minimum of one year before they can be exercised. Forfeited options are available for the granting of additional stock options under the Plan. Options forfeited from the initial grant in 1997 were used to grant options during 2000 and 2004. At December 31, 2007 there were 5,715 options available for future grants under the Plan.

The Company's ESPP was approved by its shareholders at the Company's 2004 annual meeting. The purpose of the ESPP is to provide a means by which eligible employees may purchase, at a discount, shares of common stock of the Company through payroll withholding. The purchase price of the shares is equal to $85 \%$ of their fair market value on specified dates as defined in the plan. The ESPP was effective beginning July 1, 2004. There were $10,557,8,161$, and 6,883 shares issued under the plan during 2007, 2006, and 2005, respectively. Compensation expense related to the ESPP included in the accompanying statements of income was $\$ 47,000$ and $\$ 42,000$ in 2007 and 2006, respectively. Compensation cost related to the ESPP included in the proforma net income disclosure in the table above was $\$ 25,000$ for 2005.

## Adoption of New Accounting Standards

Effective January 1, 2007 the Company adopted FASB Interpretation No. ("FIN") 48 "Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109". FIN 48 clarifies certain aspects of accounting for uncertain tax positions, including issues related to the recognition and measurement of those tax positions taken or expected to be taken in a tax return. A tax position is recognized as a benefit only if it is "more likely than not" that the tax position would be sustained in a tax examination, with a tax examination presumed to occur. The amount recognized is the largest amount of tax benefit that is greater than $50 \%$ likely of being realized on examination. For tax positions not meeting the "more likely than not" test, no tax benefit is recorded. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. Adoption of FIN 48 did not have a material impact on the Company's results of operations and consolidated financial condition.

Effective January 1, 2007 the Company adopted SFAS No. 155, "Accounting for Certain Hybrid Financial Instruments", an amendment of SFAS No. 133 and SFAS No. 140. This statement permits fair value re-measurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation. It establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation. In addition, SFAS No. 155 clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS No. 133. It also clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives. SFAS No. 155 amends SFAS No. 140 to eliminate the prohibition on a qualifying special-purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. Adoption of SFAS No. 155 did not have a material impact on the Company's results of operations and consolidated financial condition.

On January 1, 2007 the Company adopted SFAS No. 156, "Accounting for Servicing of Financial Assets". This Statement amends SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities", and requires that all separately recognized servicing assets and servicing liabilities be initially measured at fair value, if practicable and permits the entities to elect either fair value measurement with changes in fair value reflected in earnings or the amortization and impairment requirements of SFAS No. 140 for subsequent measurement. The subsequent measurement of separately recognized servicing assets and servicing liabilities at fair value eliminates the necessity for entities that manage the risks inherent in servicing assets and servicing liabilities with derivatives to qualify for hedge accounting treatment and eliminates the characterization of declines in fair value as impairments or direct write-downs. Adoption of SFAS No. 156 did not have a material impact on the Company's results of operations and consolidated financial condition.

## Recently Issued But Not Yet Effective Accounting Standards

In September 2006, the FASB issued SFAS No. 157, "Fair Value Measurements". This Statement provides clarification of the definition of fair value, methods used to measure fair value, and additional disclosures about fair value measurements. This Standard is applicable in circumstances in which other Standards require or permit assets or liabilities to be measured at fair value. Therefore, this Standard does not require any new fair value measurements. This Standard is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Company does not expect the adoption of this Statement on January 1, 2008 to have a material impact on its results of operations and consolidated financial condition.

On February 15, 2007, the FASB issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities". SFAS No. 159 allows companies to record certain financial assets and financial liabilities at full fair value if they so choose. SFAS No. 159 was issued to mitigate volatility in reported earnings caused by an accounting model utilizing multiple measurement attributes. The adoption of the fair value option is recorded as a cumulative-effect adjustment to the opening balance of retained earnings, which would be January 1 for the Company. Upon adoption, the difference between the carrying amount and the fair value of the items chosen is included in the cumulative-effect adjustment. Subsequent changes in fair value are recorded through the income statement. SFAS No. 159 is effective as of the beginning of the first fiscal year after November 15, 2007, which is January 1, 2008 for the Company. The Company does not expect the adoption of this Statement to have a material impact on its results of operations and consolidated financial condition.

## 2. Discontinued Operations

In June 2006, the Company announced that it had entered into a definitive agreement to sell KBC, its wholly-owned bank subsidiary in Glasgow, Kentucky, in a cash transaction valued at $\$ 20,000,000$. The Company completed the sale on November 30, 2006 that resulted in a pretax gain of \$9,400,000.

In August 2006, Farmers Georgetown entered into a definitive agreement to sell its Owingsville and Sharpsburg branches in Bath County (the "Branches"). The sale, which was completed on December 1, 2006, included deposits of $\$ 26,600,000$, loans of $\$ 9,600,000$, fixed assets of $\$ 818,000$, and other assets of $\$ 1,800,000$. The Company recorded a pretax gain on the sale of the Branches of $\$ 431,000$.

In accordance with SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets", the financial position and results of operations of KBC and Farmers Georgetown's Branches were removed from the respective line items of the Company's financial statements and presented separately as discontinued operations. Following are condensed combined balance sheets and statements of income for KBC and Farmers Georgetown's Branches for the period indicated.

Condensed Combined Balance Sheets - Discontinued Operations

|  | November |
| :--- | ---: |

## 3. Investment Securities

The following summarizes the amortized cost and estimated fair values of the securities portfolio at December 31, 2007. The summary is divided into available for sale and held to maturity securities.

| December 31, 2007 (In thousands) | Amortized | Gross Unrealized |  | $\begin{array}{r} \text { Gross } \\ \text { Unrealized } \\ \text { Losses } \end{array}$ |  | Estimated <br> Fair <br> Value |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Available For Sale |  |  |  |  |  |  |  |
| Obligations of U.S. government-sponsored entities | \$ 88,226 | \$ | 332 | \$ | 36 | \$ | 88,522 |
| Obligations of states and political subdivisions | 93,430 |  | 1,165 |  | 414 |  | 94,181 |
| Mortgage-backed securities | 343,189 |  | 1,042 |  | 1,055 |  | 343,176 |
| U.S. Treasury securities | 863 |  |  |  |  |  | 863 |
| Money market mutual funds | 1,396 |  |  |  |  |  | 1,396 |
| Equity securities | 9,363 |  |  |  |  |  | 9,363 |

| Held To Maturity |  |  |  |  |  |  |  |
| Obligations of states and political subdivisions | \$ 3,844 | \$ | 19 | \$ | 0 | \$ | 3,863 |

The following summarizes the amortized cost and estimated fair values of the securities portfolio at December 31, 2006.

| December 31, 2006 (In thousands) | Amortized Cost |  | Gross ealized Gains |  | Gross Unrealized Losses | Estimated <br> Fair <br> Value |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Available For Sale |  |  |  |  |  |  |
| Obligations of U.S. government-sponsored entities | \$ 142,128 | \$ | 74 | \$ | 370 | \$ 141,832 |
| Obligations of states and political subdivisions | 87,974 |  | 939 |  | 766 | 88,147 |
| Mortgage-backed securities | 88,607 |  | 87 |  | 1,978 | 86,716 |
| U.S. Treasury securities | 484 |  |  |  |  | 484 |
| Money market mutual funds | 1,396 |  |  |  |  | 1,396 |
| Equity securities | 7,910 |  |  |  |  | 7,910 |
| Total securities - available for sale | \$ 328,499 | \$ | 1,100 | \$ | 3,114 | \$ 326,485 |
| Held To Maturity |  |  |  |  |  |  |
| Obligations of states and political subdivisions | \$ 7,788 | \$ | 61 | \$ | 0 | \$ 7,849 |

The amortized cost and estimated fair value of the securities portfolio at December 31, 2007, by contractual maturity, are detailed below. The summary is divided into available for sale and held to maturity securities. Expected maturities may differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. Equity securities in the available for sale portfolio consist primarily of restricted FHLB and Federal Reserve Board stocks, which have no stated maturity and are not included in the maturity schedule that follows.

Mortgage-backed securities are stated separately due to the nature of payment and prepayment characteristics of these securities, as principal is not due at a single date.

\left.|  | Available For Sale |  |  |  | Held To Maturity |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |
|  | Amortized | Estimated | Amortized | Estimated |  |  |
| Fair |  |  |  |  |  |  |$\right)$

Gross gains of \$0, $\$ 26,000$ and $\$ 5,000$ in 2007, 2006, and 2005, respectively, were realized on the sale of investment securities. Gross losses of $\$ 0$, $\$ 221,000$, and $\$ 8,000$ were realized during 2007, 2006, and 2005, respectively.

Investment securities with a carrying value of $\$ 461,593,000$ and $\$ 288,968,000$ at December 31, 2007 and 2006 were pledged to secure public and trust deposits, repurchase agreements, and for other purposes.

Investment securities with unrealized losses at year-end 2007 and 2006 not recognized in income are presented in the tables below. The tables segregate investment securities that have been in a continuous unrealized loss position for less than twelve months from those that have been in a continuous unrealized loss position for twelve months or more. The table also includes the fair value of the related securities.

| December 31, 2007 (In thousands) | Less than 12 Months |  |  |  | 12 Months or More |  |  |  | Total |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Fair Value | Unrealized Losses |  | FairValue |  | Unrealized Losses |  | Fair Value |  | Unrealized Losses |  |
| Obligations of U.S. governmentsponsored entities | \$ | 999 | \$ | 4 | \$ | 11,159 | \$ | 33 | \$ | 12,158 | \$ | 36 |
| Obligations of states and political subdivisions |  | 7,734 |  | 82 |  | 21,323 |  | 331 |  | 29,057 |  | 414 |
| Mortgage-backed securities |  | 11,004 |  | 46 |  | 45,740 |  | 1,009 |  | 56,744 |  | 1,055 |
| Other |  | 5,132 |  | 660 |  |  |  |  |  | 5,132 |  | 660 |
| Total |  | 24,869 | \$ | 792 | \$ | 78,222 | \$ | 1,373 | \$ | 103,091 | \$ | 2,165 |

| December 31, 2006 (In thousands) | Less than 12 Months |  |  | 12 Months or More |  |  |  | Total |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Fair Value |  | Unrealized Losses |  | Fair <br> Value |  | Unrealized Losses |  | Fair Value |  | ealized <br> Losses |
| Obligations of U.S. governmentsponsored entities | \$ 25,591 | \$ | 34 | \$ | 34,949 | \$ | 336 | \$ | 60,540 | \$ | 370 |
| Obligations of states and political subdivisions | 12,756 |  | 63 |  | 25,793 |  | 703 |  | 38,549 |  | 766 |
| Mortgage-backed securities | 2,467 |  | 6 |  | 68,993 |  | 1,972 |  | 71,460 |  | 1,978 |
| Total | \$ 40,814 | \$ | 103 | \$ | 129,735 | \$ | 3,011 | \$ | 170,549 | \$ | 3,114 |

Unrealized losses included in the tables above have not been recognized in income since they have been identified as temporary. The Company periodically evaluates securities for other-than-temporary impairment. Consideration is given to the length of time and the extent to which the fair value has been less than cost, the financial condition and near-term prospects of the issuer, and the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. The Company attributes the unrealized losses mainly to increases in market interest rates over the yield available at the time the underlying securities were purchased and does not expect to incur a loss unless the securities are sold. Management has the intent and ability to hold these securities for the foreseeable future. The fair value is expected to recover as the securities approach their maturity or repricing date or if market yields for such investments decline. The Company does not believe any of the securities are impaired due to reasons of credit quality.

## 4. Loans

Major classifications of loans are summarized as follows.

| December 31, (In thousands) | 2007 | 2006 |
| :--- | ---: | ---: |
| Commercial, financial, and agricultural | $\$ 154,015$ | $\$$ |
| Real estate - construction | 254,788 | 176,613 |
| Real estate mortgage - residential | 405,992 | 381,081 |
| Real estate mortgage - farmland and other commercial enterprises | 394,900 | 351,793 |
| Installment loans | 52,028 | 57,116 |
| Lease financing | 34,109 | 37,522 |
| Total loans | $1,295,832$ | $1,201,904$ |
| Less unearned income | $(3,847)$ | $(4,068)$ |
| Total loans, net of unearned income | $\$ 1,291,985$ | $\$ 1,197,836$ |

Loans to directors, executive officers, and principal shareholders (including loans to affiliated companies of which they are principal owners) and loans to members of the immediate family of such persons were $\$ 29,275,000$ and $\$ 25,903,000$ at December 31, 2007 and 2006, respectively. Such loans were made in the normal course of business on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with other customers and did not involve more than the normal risk of collectibility. An analysis of the activity with respect to these loans is presented in the table below.

| (In thousands) | Amount |
| :--- | ---: |
| Balance, December 31, 2006 | $\$ 25,903$ |
| New loans | 21,442 |
| Repayments | $(16,440)$ |
| Loans no longer meeting disclosure requirements, new loans meeting disclosure requirements, and other <br> adjustments | $(1,630)$ |
| $\quad$ Balance, December 31, 2007 | $\$ 29,275$ |

## 5. Allowance for Loan Losses

Activity in the allowance for loan losses was as follows.

| Years Ended December 31, (In thousands) | 2007 | 2006 | 2005 |
| :--- | ---: | ---: | ---: |
| Balance, beginning of year | $\$ 11,999$ | $\$ 11,069$ | $\$ 11,043$ |
| Acquisition of Citizens National Bancshares, Inc. |  | 1,066 |  |
| Acquisition of Citizens Bancorp, Inc. | 3,638 | 965 | 62,410 |
| Provision for loan losses | 733 | 678 | 439 |
| Recoveries | $(2,154)$ | $(1,779)$ | $(2,445)$ |
| Loans charged off | $\$ 14,216$ | $\$ 11,999$ | $\$ 11,069$ |
| Balance, end of year |  |  |  |

The Company's charge-off policy for impaired loans does not differ from the charge-off policy for loans outside the definition of SFAS No. 114. Loans that are delinquent in excess of 120 days are charged off unless the collateral securing the debt is of such value that any loss appears to be unlikely.

Individually impaired loans were as follows for the dates indicated.

| Years Ended December 31, (In thousands) | 2007 | 2006 |
| :--- | ---: | ---: | ---: |
| Year-end loans with no allocated allowance for loan losses | $\$ 1,877$ | $\$ 3,153$ |
| Year-end loans with allocated allowance for loan losses | 28,127 | 1,920 |
| Total | $\$ 30,004$ | $\$ 5,073$ |
| Amount of the allowance for loan losses allocated | $\$ 1,834$ | $\$ 105$ |

| Years Ended December 31, (In thousands) | 2007 | 2006 | 2005 |  |
| :--- | ---: | ---: | ---: | ---: |
| Average of individually impaired loans during year | $\$ 13,037$ | $\$ 5,151$ | $\$$ | 768 |
| Interest income recognized during impairment | 1,382 | 323 |  |  |
| Cash-basis interest income recognized | 683 |  |  |  |

Nonperforming loans were as follows.

| December 31, (In thousands) | 2007 | 2006 |
| :--- | ---: | ---: |
| Nonaccrual loans | $\$ 18,073$ | $\$ 1,462$ |
| Loans past due 90 days or more and still accruing | 2,977 | 2,856 |
| Total nonperforming loans | $\$ 21,050$ | $\$ 4,318$ |

## 6. Premises and Equipment

Premises and equipment consist of the following.

| December 31, (In thousands) | 2007 | 2006 |
| :--- | ---: | ---: |
| Land, buildings, and leasehold improvements | $\$ 48,767$ | $\$ 45,652$ |
| Furniture and equipment | 20,180 | 21,470 |
| Total premises and equipment | 68,947 | 67,122 |
| Less accumulated depreciation and amortization | $(30,284)$ | $(29,347)$ |
| Premises and equipment, net | $\$ 38,663$ | $\$ 37,775$ |

Depreciation and amortization of premises and equipment was $\$ 3,938,000, \$ 3,617,000$, and $\$ 3,140,000$, in 2007, 2006, and 2005, respectively.

## 7. Deposit Liabilities

At December 31, 2007 the scheduled maturities of time deposits were as follows.

| (In thousands) | Amount |
| :--- | ---: |
| 2008 | $\$ 630,507$ |
| 2009 | 90,041 |
| 2010 | 28,120 |
| 2011 | 11,565 |
| 2012 | 7,436 |
| Thereafter | 2,352 |
| Total | $\$ 770,021$ |

Time deposits of $\$ 100,000$ or more at December 31, 2007 and 2006 were $\$ 252,503,000$ and $\$ 215,369,000$, respectively. Interest expense on time deposits of $\$ 100,000$ or more was $\$ 11,869,000, \$ 6,865,000$, and $\$ 3,895,000$ for 2007, 2006, and 2005, respectively.

Deposits from directors, executive officers, and principal shareholders (including deposits from affiliated companies of which they are principal owners) and deposits from members of the immediate family of such persons were $\$ 40,751,000$ and $\$ 39,403,000$ at December 31, 2007 and 2006, respectively. Such deposits were accepted in the normal course of business on substantially the same terms as those prevailing at the time for comparable transactions with other customers.

## 8. Federal Funds Purchased and Other Short-term Borrowings

Federal funds purchased and other short-term borrowings represent borrowings with an original maturity of less than one year. Substantially all of the total short-term borrowings are made up of federal funds purchased and securities sold under agreements to repurchase, which represents borrowings that generally mature one business day following the date of the transaction. Information on federal funds purchased and other short-term borrowings is as follows.

| December 31, (Dollars in thousands) | 2007 | 2006 |
| :--- | ---: | ---: |
| Federal funds purchased and securities sold under agreement to repurchase | $\$ 80,315$ | $\$ 67,941$ |
| FHLB advances | 440 | 7,000 |
| Other | $\$ 80,755$ | $\$ 76,718$ |
| Total short-term | $\$ 97,192$ | $\$ 97,489$ |
|  | 155,362 | 113,926 |
| Average balance during the year | $4.63 \%$ | $4.80 \%$ |
| Maximum month-end balance during the year | 3.71 | 4.55 |
| Average interest rate during the year |  |  |
| Average interest rate at year-end |  |  |

## 9. Securities Sold Under Agreements to Repurchase and Other Long-term Borrowings

Long-term securities sold under agreements to repurchase and other borrowings represent borrowings with an original maturity of one year or more. The table below displays a summary of the ending balance and average rate for borrowed funds on the dates indicated.

|  |  | Average |  | Average |  |
| :--- | ---: | ---: | ---: | :--- | :---: |
| December 31, (Dollars in thousands) | 2007 | Rate | 2006 | Rate |  |
| FHLB advances | $\$ 66,526$ | $4.65 \%$ | $\$ 61,174$ | $4.51 \%$ |  |
| Subordinated notes payable | 48,970 | 6.71 | 25,774 | 6.96 |  |
| Securities sold under agreements to repurchase | 200,000 | 3.95 |  |  |  |
| Other | 813 | 2.32 | 1,044 | 2.32 |  |
| Total long-term | $\$ 316,309$ | $4.52 \%$ | $\$ 87,992$ | $5.20 \%$ |  |

Long-term FHLB advances are made pursuant to several different credit programs, which have their own interest rates and range of maturities. Interest rates on FHLB advances are fixed and range between $3.84 \%$ and $6.90 \%$, averaging $4.65 \%$, over a remaining maturity period of up to 13 years as of December 31, 2007. Approximately $\$ 10.0$ million of the total long-term advances from FHLB are convertible to a floating interest rate. These advances may convert, at FHLB’s option, to a floating interest rate indexed to LIBOR only if LIBOR equals or exceeds 7\%. At year-end 2007, three-month LIBOR was at $4.70 \%$.

For FHLB advances, the subsidiary banks pledge FHLB stock and fully disbursed, otherwise unencumbered, 1-4 family first mortgage loans as collateral for these advances as required by the FHLB. Based on this collateral and the Company's holdings of FHLB stock, the Company is eligible to borrow up to an additional $\$ 117,524,000$ at year-end 2007. In addition, the Company has a $\$ 15.0$ million unsecured line of credit with an unrelated financial institution available for general corporate purposes. This line of credit matures in June 2008 and bears interest at three-month LIBOR plus 125 basis points.

During 2005 the Company completed two private offerings of trust preferred securities through two separate Delaware statutory trusts sponsored by the Company. Farmers Capital Bank Trust I ("Trust I") sold \$10,000,000 of preferred securities and Farmers Capital Bank Trust II ("Trust II") sold $\$ 15,000,000$ of preferred securities. The proceeds from the offerings were used to fund the cash portion of the Citizens Bancorp acquisition.

Farmers Capital Bank Trust III ("Trust III"), a Delaware statutory trust sponsored by the Company, was formed during 2007 for the purpose of financing the cost of acquiring Company shares under a share repurchase program. Trust III sold $\$ 22,500,000$ of $6.60 \%$ (fixed through November 2012, thereafter at a variable rate of interest, reset quarterly, equal to the 3-month LIBOR plus a predetermined spread of 132 basis points) trust preferred securities to the public. The trust preferred securities, which pay interest quarterly, mature on November 1, 2037, or may be redeemed by the Trust at par any time on or after November 1, 2012. Trust I, Trust II, and Trust III are hereafter collectively referred to as the "Trusts".

The Trusts used the proceeds from the sale of preferred securities, plus capital contributed to establish the trusts, to purchase the Company's subordinated notes in amounts and bearing terms that parallel the amounts and terms of the respective preferred securities. The subordinated notes to Trust I and Trust II mature in 2035 and in 2037 for Trust III, and bear a floating interest rate (current three-
month LIBOR plus 150 basis points in the case of the notes held by Trust I, current three-month LIBOR plus 165 basis points in the case of the notes held by Trust II, and current three-month LIBOR plus 132 basis points in the case of the notes held by Trust III). Interest on the notes is payable quarterly.

The subordinated notes are redeemable in whole or in part, without penalty, at the Company's option on or after September 30, 2010 and mature on September 30, 2035 with respect to Trust I and Trust II. For Trust III, the subordinated notes are redeemable in whole or in part, with out penalty, at the Company's option on or after November 1, 2012. The notes are junior in right of payment of all present and future senior indebtedness. At December 31, 2007 the balance of the subordinated notes payable to Trust I, Trust II, and Trust III was $\$ 10,310,000, \$ 15,464,000$, and $\$ 23,196,000$, respectively. The interest rates in effect as of the last determination date in 2007 were $6.73 \%, 6.88 \%$, and $6.60 \%$ for Trust I, Trust II, and Trust III, respectively. For 2006 these rates were $6.87 \%$ and $7.02 \%$ for Trust I and Trust II, respectively.

Under FASB Interpretation No. 46 (revised), "Consolidation of Variable Interest Entities", the Company does not consolidate the Trusts into its financial statements. Accordingly, the Company does not report the securities issued by the Trusts as liabilities, but instead reports as liabilities the subordinated notes issued by the Company and held by the Trusts. The Company, which owns all of the common securities of the Trusts, accounts for its investment in each of the Trusts as assets. The Company records interest expense on the corresponding notes issued to the Trusts on its statement of income.

The subordinated notes may be included in Tier 1 capital (with certain limitations applicable) under current regulatory capital guidelines and interpretations. The amount of subordinated notes in excess of the limit may be included in Tier 2 capital, subject to restrictions.

During 2007, the Company entered into a balance sheet leverage transaction whereby it borrowed $\$ 200,000,000$ in multiple fixed rate repurchase agreements with an initial weighted average cost of $3.95 \%$ and invested the proceeds in Government National Mortgage Association ("GNMA") bonds, which were pledged as collateral. The Company is required to secure the borrowed funds by GNMA bonds valued at $106 \%$ of the outstanding principal balance. The borrowings have original maturity dates ranging from three to 10 years, with a weighted average maturity of 6.5 years and are callable quarterly after time periods ranging from one to five years. The repurchase agreements are held by each of the Company's subsidiary banks and are guaranteed by the Parent Company.

Maturities of long-term borrowings at December 31, 2007 are as follows.

| (In thousands) | Amount |
| :--- | ---: |
| 2008 | $\$ 10,802$ |
| 2009 | 13,787 |
| 2010 | 50,783 |
| 2011 | 5,613 |
| 2012 | 61,486 |
| Thereafter | 173,838 |
| Total | $\$ 316,309$ |

## 10. Income Taxes

The components of income tax expense are as follows.

## Continuing Operations

| December 31, (In thousands) | 2007 | 2006 | 2005 |  |
| :--- | ---: | ---: | ---: | ---: |
| Currently payable | $\$ 6,094$ | $\$ 5,208$ | $\$$ | 3,985 |
| Deferred | $(1,807)$ | $(1,848)$ | $(194)$ |  |
| $\quad$ Total applicable to continuing operations | 4,287 | 3,360 | 3,791 |  |
| Deferred tax (credited) charged to components of shareholders' equity: |  |  |  |  |
| Unfunded status of postretirement benefits | $(139)$ | 1,664 |  |  |
| Net unrealized securities gains (losses) | 836 | 237 | $(1,362)$ |  |
| $\quad$ Total income taxes from continuing operations | $\$ 4,984$ | $\$ 5,261$ | $\$ 2,429$ |  |

## Discontinued Operations

| December 31, (In thousands) | 2006 |  | 2005 |
| :---: | :---: | :---: | :---: |
| Currently payable | \$ 4,287 | \$ | 294 |
| Deferred | (152) |  | 189 |
| Total applicable to discontinued operations | 4,135 |  | 483 |
| Deferred tax charged to components of shareholders' equity: |  |  |  |
| Net unrealized securities gains (losses) | 90 |  | (47) |
| Total income taxes from discontinued operations | \$ 4,225 | \$ | 436 |

An analysis of the difference between the effective income tax rates and the statutory federal income tax rate follows.

## Continuing Operations

| December 31, | 2007 | 2006 | 2005 |
| :--- | :---: | :---: | :---: |
| Federal statutory rate | $35.0 \%$ | $35.0 \%$ | $35.0 \%$ |
| Changes from statutory rates resulting from: |  |  |  |

## Discontinued Operations

| December 31, | 2006 | 2005 |
| :--- | :---: | :---: |
| Federal statutory rate | $35.0 \%$ | $35.0 \%$ |
| Changes from statutory rates resulting from: | $(.7)$ | $(5.4)$ |
| Tax-exempt interest | .1 | .6 |
| Nondeductible interest to carry tax-exempt obligations | $(.2)$ | $(1.1)$ |
| Company-owned life insurance | .7 | $(1.1)$ |
| Other, net | $34.9 \%$ | $28.0 \%$ |
| Effective tax rate on pretax income from discontinued operations |  |  |

The tax effects of the significant temporary differences that comprise deferred tax assets and liabilities at December 31, 2007 and 2006 follows.

| December 31, (In thousands) | 2007 | 2006 |
| :---: | :---: | :---: |
| Assets |  |  |
| Allowance for loan losses | \$ 4,891 | \$ 4,122 |
| Unrealized losses on available for sale investment securities, net |  | 705 |
| Deferred directors’ fees | 242 | 131 |
| Postretirement benefit obligations | 3,894 | 3,251 |
| Stock options | 35 | 513 |
| Commissions |  | 12 |
| Self-funded insurance | 269 | 279 |
| Paid time off | 614 | 455 |
| Other | 7 | 157 |
| Total deferred tax assets | 9,952 | 9,625 |
| Liabilities |  |  |
| Depreciation | 533 | 925 |
| Unrealized gains on available for sale investment securities, net | 131 |  |
| Prepaid expenses | 636 | 590 |
| Discount on investment securities | 1,012 | 1,040 |
| Deferred loan fees | 1,197 | 1,000 |
| Lease financing operations | 1,502 | 1,942 |
| Intangibles | 2,577 | 2,874 |
| Total deferred tax liabilities | 7,588 | 8,371 |
| Net deferred tax asset | \$ 2,364 | \$ 1,254 |

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Based upon the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax assets are deductible, management believes it is more likely than not the Company will realize the benefits of these deductible differences at December 31, 2007.

The Company had no unrecognized tax benefits as of January 1, 2007 and did not recognize any increase in unrecognized benefits during 2007 relative to any tax positions taken in 2007. Should the accrual of any interest or penalties relative to unrecognized tax benefits be necessary, it is the Company's policy to record such accruals in its income tax expense accounts; no such accruals existed as of December 31, 2007. The Company files U.S. federal and various state income tax returns. The Company is no longer subject to income tax examinations by taxing authorities for the years before 2004.

## 11. Retirement Plans

The Company maintains a salary savings plan that covers substantially all employees. The Company matches all eligible voluntary tax deferred employee contributions up to $6 \%$ of the participant's compensation. The Company may, at the discretion of the Board, contribute an additional amount based upon a percentage of covered employees' salaries. The Company made a $2 \%$ discretionary contribution to the plan during 2007 and a $4 \%$ discretionary contribution in 2006 and 2005. Discretionary contributions are allocated among participants in the ratio that each participant's compensation bears to all participants' compensation. Eligible employees are presented with various investment alternatives related to the salary savings plan. Those alternatives include various stock and bond mutual funds that vary from traditional growth funds to more stable income funds. Company shares are not an available investment alternative in the salary savings plan.

The Company previously maintained an Employee Stock Ownership Plan ("ESOP") for its employees. During 2007, the Company terminated the ESOP. Participants in the ESOP had various options upon termination of the plan, including liquidating Company stock and rolling over the proceeds into the Company's salary savings plan. There were no contributions to the ESOP in any of the years in the three-year period ended December 31, 2007. The fair market value of Company shares held by the ESOP at the date of termination was $\$ 2,173,000$. The fair market value of Company shares held by the ESOP at year-end 2006 was $\$ 2,459,000$.

In connection with the acquisition of Citizens Northern, the Company acquired a nonqualified supplemental retirement plan for certain key employees. Benefits provided under this plan are unfunded, and payments to plan participants are made by the Company.

The following schedules set forth a reconciliation of the changes in the plans benefit obligation and funded status for the years ended December 31, 2007 and 2006.

| (In thousands) | 2007 | 2006 |  |
| :--- | ---: | ---: | ---: |
| Change in Benefit Obligation |  |  |  |
| Obligation at beginning of year | 561 | $\$$ | 374 |
| Service cost | 31 | 41 |  |
| Interest cost | 32 | 22 |  |
| Actuarial (gain) loss | $(157)$ | 124 |  |
| Benefit payments | $(5)$ |  |  |
| Obligation at end of year | $\$$ | 462 | $\$$ |

The following table provides disclosure of the net periodic benefit cost as of December 31 for the years indicated.

| (In thousands) | 2007 | 2006 |  |
| :--- | ---: | ---: | ---: |
| Service cost | $\$ 31$ | $\$$ | 41 |
| Interest cost | 32 | 21 |  |
| Recognized net actuarial loss | 22 | 17 |  |
| Net periodic benefit cost | $\$$ | 85 | $\$$ |
| Major assumptions: | 79 |  |  |
| Discount rate | $5.75 \%$ | $5.75 \%$ |  |

The following table presents estimated future benefit payments in the period indicated.

| (In thousands) | Supplemental <br> Retirement Plan |  |
| :--- | :---: | ---: |
| 2008 | $\$$ | 5 |
| 2009 | 5 |  |
| 2010 |  | 5 |
| 2011 | 5 |  |
| 2012 | 5 |  |
| $2013-2017$ |  | 134 |
| Total | $\$$ | 159 |

Amounts recognized in accumulated other comprehensive loss as of December 31, 2007 and 2006 are as follows.

| (In thousands) | 2007 | 2006 |  |
| :--- | ---: | ---: | ---: |
| Unrecognized net actuarial loss | $\$$ | 125 | $\$$ |
| Total | $\$$ | 125 | $\$$ |

The estimated costs that will be amortized from accumulated other comprehensive loss into net periodic cost over the next fiscal year are as follows.

|  | Supplemental <br> Retirement <br> Plan |  |
| :--- | ---: | ---: |
| (In thousands) | $\$$ | 8 |
| Unrecognized net actuarial loss | $\$ 8$ |  |
| Total | $\$$ | 8 |

The total retirement plan expense for 2007,2006 , and 2005 was $\$ 1,486,000, \$ 1,427,000$, and $1,012,000$, respectively.

## 12. Common Stock Options

A summary of the activity in the Company's stock option plan for 2007 is presented below.

|  | 2007 |  |
| :--- | ---: | ---: |
|  | Weighted |  |
|  | Average |  |
|  | Shares | Price |
| Outstanding at January 1 | 125,522 | $\$$ |
| Exercised | 28.62 |  |
| Outstanding at December 31 | 62,601 | $\$$ |
| Options exercisable at year-end |  | 32.61 |

Options outstanding at year-end 2007 were as follows.

|  | Outstanding |  |  |  | Exercisable |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Exercise Price | Number | Weighted Average Remaining Contractual Life (Years) |  | ighted verage Price | Number |  | ighted verage Price |
| \$29.75 | 26,572 | 2.00 | \$ | 29.75 | 26,572 | \$ | 29.75 |
| \$34.80 | 36,049 | 6.83 |  | 34.80 | 36,049 |  | 34.80 |
| Outstanding at year-end | 62,621 | 4.78 | \$ | 32.66 | 62,621 | \$ | 32.66 |

The aggregate intrinsic value for options outstanding and options exercisable at December 31, 2007 was zero since the exercise price of all options was in excess of the market price of the Company's stock.

The following table presents further information regarding the Company's stock option Plan during each of the years indicated.

| (In thousands) | 2007 | 2006 | 2005 |  |
| :--- | ---: | ---: | ---: | ---: |
| Tax benefit realized from options exercised | 123 | $\$$ | 168 | $\$$ |
| Total intrinsic value of options exercised | 353 | 479 | 311 |  |
| Cash received from options exercised | 1,546 | 1,529 | 771 |  |

There were no modifications or cash paid to settle stock option awards during 2007, 2006, or 2005.

## 13. Postretirement Medical Benefits

Prior to 2003, the Company provided lifetime medical and dental benefits upon retirement for certain employees meeting the eligibility requirements as of December 31, 1989 (Plan 1). During 2003, the Company implemented an additional postretirement health insurance program (Plan 2). Under Plan 2, any employee meeting the service requirement of 20 years of full time service to the Company and is at least age 55 years of age upon retirement is eligible to continue their health insurance coverage. Under both plans, retirees not yet eligible for Medicare have coverage identical to the coverage offered to active employees. Under both plans, Medicare-eligible retirees are provided with a Medicare Advantage plan. The Company pays $100 \%$ of the cost of Plan 1 . The Company and the retirees each pay $50 \%$ of the cost under Plan 2 . Both plans are unfunded.

The following schedules set forth a reconciliation of the changes in the plans benefit obligation and funded status for the years ended December 31, 2007 and 2006.

| In thousands) | 2007 | $2006_{1}$ |
| :--- | ---: | ---: |
| Change in Benefit Obligation |  |  |
| Obligation at beginning of year | $\$ 11,164$ | $\$ 9,437$ |
| Service cost | 441 | 258 |
| Interest cost | 632 | 415 |
| Prior service cost | $(981)$ | 1,091 |
| Actuarial (gain) loss | 55 | 32 |
| Participant contributions | $(308)$ | $(368)$ |
| Benefit payments | $\$ 11,003$ | $\$ 11,164$ |
| Obligation at end of year |  |  |

${ }^{1}$ During the fourth quarter of 2007, the Company learned that an actuarial error caused the amount recorded to accumulated other comprehensive income upon adoption of SFAS No. 158 for its postretirement benefit plans at year-end 2006 to be incorrect. Certain disclosures for 2006 have been revised as a result of the actuarial error. For further information, please refer to the caption "Revised 2006 Balance Sheet and Statement of Changes in Shareholders' Equity" in Note 1.

The following table provides disclosure of the net periodic benefit cost as of December 31 for the years indicated.

| (nn thousands) | 2007 | 2006 |
| :--- | ---: | ---: |
| Service cost | $\$ 41$ | $\$$ |
| Interest cost | 632 | 415 |
| Amortization of transition obligation | 101 | 102 |
| Recognized prior service cost | 299 | 268 |
| Recognized net actuarial loss | 162 | 21 |
| Net periodic benefit cost | $\$ 1,635$ | $\$$ |
| Major assumptions: |  |  |
| $\quad$ Discount rate | $5.75 \%$ | $5.75 \%$ |
| $\quad$ Retiree participation rate (Plan 1) | 100.00 | 100.00 |
| $\quad$ Retiree participation rate (Plan 2) | 72.00 | 80.00 |

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plans. For measurement purposes, the rate of increase in pre-Medicare medical care claims costs was $9 \%$ in 2008 grading down by $1 \%$ to $7 \%$ for 2010 , then by $.5 \%$ to $5 \%$ for 2014 and thereafter. For dental claims cost, it was $5 \%$ for 2008 and thereafter. A $1 \%$ change in the assumed health care cost trend rates would have the following incremental effects:

| (In thousands) | $1 \%$ $1 \%$ <br> Increase  | Decrease |  |
| :--- | ---: | ---: | ---: |
| Effect on total of service and interest cost components of net periodic postretirement health care <br> benefit cost |  | 239 | $\$(185)$ |
| Effect on accumulated postretirement benefit obligation | 1,928 | $(1,539)$ |  |

The following table presents estimated future benefit payments in the period indicated.

| (In thousands) | Postretirement <br> Medical Benefits |  |
| :--- | :---: | ---: |
| 2008 | $\$$ | 356 |
| 2009 | 393 |  |
| 2010 | 420 |  |
| 2011 | 436 |  |
| 2012 | 448 |  |
| $2013-2017$ |  | 2,718 |
| Total | $\$$ | 4,771 |

Amounts recognized in accumulated other comprehensive loss as of December 31, 2007 and 2006 are as follows.

| (In thousands) | 2007 | 2006 |
| :--- | ---: | ---: |
| Unrecognized net actuarial loss | $\$ 2,554$ | $\$ 3,698$ |
| Unrecognized transition obligation | 507 | 609 |
| Unrecognized prior service cost | 1,966 | 2,265 |
| Total | $\$ 5,027$ | $\$ 6,572$ |

The estimated costs that will be amortized from accumulated other comprehensive loss into net periodic cost over the next fiscal year are as follows:

|  | Postretirement <br> Medical <br> (In thousands) |
| :--- | ---: |
| Unrecognized net actuarial loss | $\$$ |
| Transition obligation | 92 |
| Unrecognized prior service cost | $\$$ |
| Total | $\$ 01$ |

## 14. Leases

The Company leases certain branch sites and certain banking equipment under various operating leases. All of the branch site leases have renewal options of varying lengths and terms. In addition, the Company leases certain data processing equipment that meets the capitalization criteria of SFAS No. 13, "Accounting for Leases", as amended, and has been recorded as an asset in premises and equipment and a liability in other long-term debt on the balance sheet. The following table presents estimated future minimum rental commitments under these leases for the period indicated.

| (In thousands) | Operating <br> Leases | Capital <br> Lease |  |
| :--- | ---: | ---: | ---: |
| 2008 | $\$$ | 596 | $\$$ |
| 2009 | 525 | 254 |  |
| 2010 | 437 | 254 |  |
| 2011 | 374 | 84 |  |
| 2012 | 282 |  |  |
| Thereafter | 1,692 |  |  |
| Total | $\$$ | 3,906 | 846 |
| Less: amount representing interest |  | 34 |  |
| Long-term obligation under capital lease |  | $\$$ | 812 |

## 15. Financial Instruments With Off-Balance Sheet Risk

The Company is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. The financial instruments include commitments to extend credit and standby letters of credit.

These financial instruments involve to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets. The contract amounts of these instruments reflect the extent of involvement the Company has in particular classes of financial instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require the payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amount does not necessarily represent future cash requirements. Total commitments to extend credit were $\$ 233,498,000$ and $\$ 217,285,000$ at December 31, 2007 and 2006, respectively. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained upon extension of credit, if deemed necessary by the Company, is based on management's credit evaluation of the counter-party. Collateral held varies, but may include accounts receivable, marketable securities, inventory, premises and equipment, residential real estate, and income producing commercial properties.

Standby letters of credit are conditional commitments issued by the Company to guarantee the performance of a customer to a third party. Since many of the commitments are expected to expire without being drawn upon, the total commitment amount does not necessarily represent future cash requirements. The credit risk involved in issuing letters of credit is essentially the same as that
received when extending credit to customers. The fair value of these instruments is not considered material for disclosure under FIN 45. The Company had $\$ 18,337,000$ and $\$ 16,863,000$ in irrevocable letters of credit outstanding at December 31, 2007 and 2006, respectively.

The contractual amount of financial instruments with off-balance sheet risk was as follows at year-end.

| December 31, | 2007 |  | 2006 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Fixed | Variable | Fixed | Variable |
| (In thousands) | Rate | Rate | Rate | Rate |
| Commitments to extend credit | \$ 75,053 | \$ 158,445 | \$ 84,590 | \$ 132,695 |
| Standby letters of credit | 14,982 | 3,355 | 15,102 | 1,761 |
| Total | \$ 90,035 | \$ 161,800 | \$ 99,692 | \$ 134,456 |

## 16. Concentration of Credit Risk

The Company's bank subsidiaries actively engage in lending, primarily in their home counties and adjacent areas. Collateral is received to support these loans when deemed necessary. The more significant categories of collateral include cash on deposit with the Company's banks, marketable securities, income producing property, commercial real estate, home mortgages, and consumer durables. Loans outstanding, commitments to make loans, and letters of credit range across a large number of industries and individuals. The obligations are significantly diverse and reflect no material concentration in one or more areas, other than most of the Company's loans are in the Commonwealth of Kentucky.

## 17. Loss Contingencies

Loss contingencies, including claims and legal actions arising in the ordinary course of business, are recorded as liabilities when the likelihood of loss is probable and an amount or range of loss can be reasonably estimated. As of December 31, 2007, there were various pending legal actions and proceedings against the Company arising from the normal course of business and in which claims for damages are asserted. Management, after discussion with legal counsel, believes that these actions are without merit and that the ultimate liability resulting from these legal actions and proceedings, if any, will not have a material effect upon the consolidated financial statements of the Company.

## 18. Regulatory Matters

Payment of dividends by the Company's subsidiary banks is subject to certain regulatory restrictions as set forth in national and state banking laws and regulations. Generally, capital distributions are limited to undistributed net income for the current and prior two years, subject to the capital requirements described below. At December 31, 2007, combined retained earnings of the subsidiary banks were $\$ 46,416,000$ of which $\$ 12,563,000$ was available for the payment of dividends in 2008 without obtaining prior approval from bank regulatory agencies.

Included in cash and due from banks is certain noninterest bearing deposits that are held at the Federal Reserve Bank and correspondent banks in accordance with regulatory reserve requirements specified by the Federal Reserve Board of Governors. The reserve requirement was $\$ 16,872,000$ and $\$ 16,897,000$ at December 31, 2007 and 2006, respectively.

The Company and its subsidiary banks are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements will initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the banks must meet specific capital guidelines that involve quantitative measures of the banks’ assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Company and its subsidiary banks' capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and its subsidiary banks to maintain minimum amounts and ratios (set forth in the tables below) of total and Tier I capital (as defined in the regulations) to risk-weighted assets (as defined), and of Tier I capital to average assets (as defined). The Company and each of the subsidiary banks meet all capital adequacy requirements to which they are subject as of December 31, 2007.

As of December 31, 2007, the most recent notification from the FDIC categorized the banks as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the banks must maintain minimum total risk-based, Tier I risk-based, and Tier I leverage ratios as set forth in the tables. There are no conditions or events since that notification that management believes have changed the institutions' category.

The capital amounts and ratios of the consolidated Company and the banks are presented in the following tables.

|  | Actual |  |  | For Capital <br> Adequacy <br> Purposes |  |  | To Be Well Capitalized Under Prompt Corrective <br> Action Provisions |  |  |

## 19. Fair Value of Financial Instruments

The following table presents the estimated fair values of the Company's financial instruments made in accordance with the requirements of SFAS No. 107, Disclosures About Fair Value of Financial Instruments. This Statement requires disclosure of fair value information about financial instruments, whether or not recognized in the balance sheet for which it is practicable to estimate that value. The estimated fair value amounts have been determined by the Company using available market information and present value or other valuation techniques. These derived fair values are subjective in nature, involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. SFAS No. 107 excludes certain financial instruments and all nonfinancial instruments from the disclosure requirements. Accordingly, the aggregate fair value amounts presented are not intended to represent the underlying value of the Company.

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value.

Cash and Cash Equivalents, Accrued Interest Receivable, and Accrued Interest Payable
The carrying amount is a reasonable estimate of fair value.

## Investment Securities

Fair value equals quoted market price, if available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.

Loans
The fair value of loans is estimated by discounting the future cash flows using current discount rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

Deposit Liabilities
The fair value of demand deposits, savings accounts, and certain money market deposits is the amount payable on demand at the reporting date. The fair value of fixed maturity certificates of deposit is estimated by discounting the future cash flows using the rates currently offered for certificates of deposit with similar remaining maturities.

## Federal Funds Purchased and other Short-term Borrowings

The Carrying amount is the estimated fair value for these borrowings that reprice frequently in the near term.
Securities Sold Under Agreements to Repurchase, Subordinated Notes Payable, and Other Long-term Borrowings
The fair value of these borrowings is estimated based on rates currently available for debt with similar terms and remaining maturities.
Commitments to Extend Credit and Standby Letters of Credit
Pricing of these financial instruments is based on the credit quality and relationship, fees, interest rates, probability of funding, compensating balance, and other covenants or requirements. Loan commitments generally have fixed expiration dates, variable interest rates and contain termination and other clauses that provide for relief from funding in the event there is a significant deterioration in the credit quality of the customer. Many loan commitments are expected to, and typically do, expire without being drawn upon. The rates and terms of the Company's commitments to lend and standby letters of credit are competitive with others in the various markets in which the Company operates. There are no unamortized fees relating to these financial instruments, as such the carrying value and fair value are both zero.

The estimated fair values of the Company's financial instruments are as follows.

| Weighted average shares outstanding, basic | 7,385 | 7,378 | 7,393 | 7,884 |
| Weighted average shares outstanding, diluted | 7,413 | 7,400 | 7,412 | 7,904 |

${ }^{1}$ Includes gain on disposals of $\$ 9,873$ during the quarter ended December 31, 2006.
${ }^{2}$ Includes income tax expense of $\$ 3,456$ during the quarter ended December 31, 2006 related to gain on disposals.
3The reduction in net income in the fourth quarter of 2007 was due to an increase in the provision for loans losses associated with trends in the credit markets in that period (see Managements Discussion and Analysis under Item 7 of this Form 10-K).

## 22. Business Combination - Military Allotment Operation, PNC Bank, National Association

In January 2007, First Citizens completed its transaction to acquire the Military Allotment operation of PNC Bank, National Association in a cash transaction. First Citizens acquired intangible assets in the form of a customer list and goodwill. It also recorded a core deposit intangible in connection with receiving approximately $\$ 10,870,000$ in deposits from PNC in the transaction. First Citizens merged the acquired Military Allotment operation into its existing allotment operations, which specializes in the processing of federal benefit payments and military allotments.

The total cost related to this acquisition, which was paid entirely in cash, was $\$ 12,812,000$. The customer list and core deposit intangible assets of $\$ 1,275,000$ and $\$ 1,874,000$ at acquisition are being amortized over a life of 7 years under a declining amortization schedule through year 2013. Goodwill is not subject to periodic amortization in the consolidated financial statements, but will be deductible for federal income tax purposes over a period of 15 years. The following table summarizes the estimated fair value of assets acquired and liabilities assumed at the date of acquisition.

| (In thousands) | January 12, |  |
| :--- | ---: | ---: |
| Assets | 2007 |  |
| Cash | 10,870 |  |
| Customer list intangible | 1,275 |  |
| Core deposit intangible | 1,87 |  |
| Goodwill | 9,663 |  |
| Total Assets | $\$ 23,682$ |  |
| Liabilities |  |  |
| Deposits | $\$$ | 10,870 |
| Net Assets Acquired | $\$$ | 12,812 |

## 23. Goodwill and Intangible Assets

## Goodwill

The change in balance for goodwill is as follows.

| (In thousands) | 2007 | 2006 |
| :--- | ---: | ---: |
| Beginning of year | $\$ 42,822$ | $\$ 28,437$ |
| Purchase price refinements of prior years' acquisitions | $(77)$ | 211 |
| Acquired goodwill | 9,663 | 14,174 |
| End of year | $\$ 52,408$ | $\$ 42,822$ |

## Acquired Intangible Assets

Acquired core deposit and customer relationship intangible assets were as follows as of December 31 of the year indicated.

|  | 2007 |  | 2006 |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: |
| Amortized Intangible Assets | Gross | Accumulated | Gross | Accumulated |  |  |
| (In thousands) | Amount | Amortization | Amount | Amortization |  |  |
| Core deposit intangibles | $\$ 12,765$ | $\$$ | 5,274 | $\$ 10,890$ | $\$$ | 2,541 |
| Other customer relationship intangibles | 3,689 |  | 1,637 | 2,414 | 1,008 |  |
| Total | $\$ 16,454$ | $\$$ | 6,911 | $\$ 13,304$ | $\$$ | 3,549 |

Aggregate amortization expense of core deposit and customer relationship intangible assets was $\$ 3,362,000$ and $\$ 2,009,000$ for 2007 and 2006 , respectively. Estimated amortization expense for each of the next five years is as follows.

| (In thousands) | Amount |
| :--- | ---: |
| 2008 | $\$ 2,602$ |
| 2009 | 1,952 |
| 2010 | 1,437 |
| 2011 | 1,143 |
| 2012 | 1,014 |

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure
None.
Item 9A. Controls and Procedures

## Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, an evaluation was carried out under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934). Based on their evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures and internal control over financial reporting are, to the best of their knowledge, effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms.

Our Chief Executive Officer and Chief Financial Officer have also concluded that there were no changes in our internal control over financial reporting or in other factors that occurred during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting or any corrective actions with regard to significant deficiencies and material weaknesses in internal control over financial reporting.

## Management's Report on Internal Control Over Financial Reporting

Management Responsibility. The management of Farmers Capital Bank Corporation is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control system is designed to provide reasonable assurance
to the Company's management and Board of Directors regarding the reliability of financial reporting and the presentation of published financial statements. However, all internal control systems, no matter how well designed, have inherent limitations.

General Description of Internal Control over Financial Reporting. Internal control over financial reporting refers to a process designed by, or under the supervision of, our Chief Executive Officer and Chief Financial Officer and effected by the Company's Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of Company assets;

Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that Company's receipts and expenditures are being made only in accordance with the authorization of Company's management and members of the Company's Board of Directors; and

Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisitions, uses or dispositions of Company assets that could have a material effect on the Company's financial statements.

Inherent Limitations in Internal Control over Financial Reporting. Internal control over financial reporting cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting also can be circumvented or overridden by collusion or other improper activities. Because of such limitations, there is a risk that material misstatements may not be prevented or detected on a timely basis by internal control over financial reporting. However, these inherent limitations are known features of the financial reporting process, and it is possible to design into the process safeguards to reduce, though not eliminate, this risk.

Management's Assessment of the Company's Internal Control over Financial Reporting. We assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2007. In making this assessment, we used the criteria for effective internal control over financial reporting set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in "Internal Control-Integrated Framework."

As a result of our assessment of the Company's internal control over financial reporting, we conclude that the Company's internal control over financial reporting was effective as of December 31, 2007 to ensure that information required to be disclosed by the Company in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms.

Item 9B. Other Information
None.

## PART III

Item 10. Directors, Executive Officers and Corporate Governance

|  | Age | Positions and <br> Offices With <br> the Registrant | Years of Service <br> With the <br> Executive Officer |
| :--- | :---: | :--- | :---: |
| G. Anthony Busseni | 59 | President and CEO, Director ${ }^{2}$ | $23^{*}$ |
| Allison B. Gordon | 44 | Senior Vice President ${ }^{3}$ | $21^{*}$ |

The Company has adopted a Code of Ethics that applies to the Company's directors, officers and employees, including the Company's chief executive officer and chief financial officer. The Company makes available its Code of Ethics on its Internet website at www.farmerscapital.com.

Additional information required by Item 10 is hereby incorporated by reference from the Company's definitive proxy statement in connection with its annual meeting of shareholders scheduled for May 13, 2008, which will be filed with the Commission on or about April 1, 2008, pursuant to Regulation 14A.

* Includes years of service with the Company and its subsidiaries.

1 For Regulation O purposes, Frank W. Sower, Jr., Chairman of the Company's board of directors, is considered an executive officer in name only.

2 Also a director of Farmers Bank, Citizens Jessamine, Farmers Georgetown, United Bank, The Lawrenceburg Bank and Trust, First Citizens, Citizens Northern, FCB Services, Farmers Insurance (Chairman), Leasing One (Chairman), Kentucky General (Chairman), FFKT Insurance, Kentucky Home Life Insurance Company, and an administrative trustee of Farmers Capital Bank Trust I, Farmers Capital Bank Trust II, and Farmers Capital Bank Trust III.

3 Also a director of Farmers Bank, Farmers Georgetown, FCB Services, and an administrative trustee of Farmers Capital Bank Trust I, Farmers Capital Bank Trust II, and Farmers Capital Bank Trust III.

## Item 11. Executive Compensation

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters
Item 13. Certain Relationships and Related Transactions

## Item 14. Principal Accountant Fees and Services

The information required by Items 11 through 14 is hereby incorporated by reference from the Company's definitive proxy statement in connection with its annual meeting of shareholders scheduled for May 13, 2008, which will be filed with the Commission on or about April 1, 2008, pursuant to Regulation 14A.

PART IV

## Item 15. Exhibits, Financial Statement Schedules

(a)1. Financial Statements

The following consolidated financial statements and report of independent registered accounting firm of the Company is included in Part II, Item 8 on pages 42 through 77:

Report of Independent Registered Public Accounting Firm
Consolidated Balance Sheets
Consolidated Statements of Income
Consolidated Statements of Comprehensive Income
Consolidated Statements of Changes in Shareholders' Equity
Consolidated Statements of Cash Flows
Notes to Consolidated Financial Statements
(a)2. Financial Statement Schedules

All schedules are omitted for the reason they are not required, or are not applicable, or the required information is disclosed elsewhere in the financial statements and related notes thereto.

## (a)3. Exhibits:

3.1 Amended and Restated Articles of Incorporation of the Registrant (incorporated by reference to Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2006).
3.2 Amended and Restated Bylaws of the Registrant (incorporated by reference to Annual Report of Form 10-K for the fiscal year ended December 31, 1997).
3.3 Amendments to Bylaws of the Registrant (incorporated by reference to Quarterly Report of Form 10-Q for the quarterly period ended March 31, 2003).
4 Articles of Incorporation and Bylaws of the Registrant (incorporated by reference to Quarterly Report on Form 10-Q for the quarterly period ended June 30, 2006, the Annual Report on Form 10-K for the fiscal year ended December 31, 1997, and the Quarterly Report on Form 10-Q for the quarterly period ended March 31, 2003).
21 Subsidiaries of the Registrant
23 Consent of Independent Registered Public Accounting Firm
31.1 CEO Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
31.2 CFO Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

32 Certifications Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

I, G. Anthony Busseni, certify that:

1. I have reviewed this annual report on Form 10-K of Farmers Capital Bank Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

I, C. Douglas Carpenter, certify that:

1. I have reviewed this annual report on Form 10-K of Farmers Capital Bank Corporation;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

In connection with the accompanying Annual Report of Farmers Capital Bank Corporation on Form 10-K for the period ended December 31, 2007 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), each of the undersigned hereby certifies in his capacity as officer of Farmers Capital Bank Corporation, pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. Section 1350, that:

1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Registrant.
