SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

**Annual Report Pursuant to Section 13 or 15(d)
Of the Securities Exchange Act of 1934**

For the Fiscal Year Ended December 31, 2008

Commission File Number 000- 50357

FIRST COMMUNITY BANK CORPORATION OF AMERICA

A Florida Corporation
IRS Employer Identification No. 65-0623023

9001 Belcher Road
Pinellas Park, Florida 33782
(727) 520-0987

**Securities Registered Pursuant to Section 12(b)
of the Securities Exchange Act of 1934: NONE**

**Securities Registered Pursuant to Section 12(g) of the Securities Exchange
Act of 1934: Common Stock, \$0.05 par value**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Exchange Act. Yes No

Note – Checking the box above will not review any registrant required to file reports pursuant to Section 13 or 15(d) of the Exchange Act.

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the Registrant's common stock held by non-affiliates of the Registrant, based upon the closing price of \$5.04, as quoted on the NASDAQ Capital Market, on March 2, 2009 was approximately \$11,125,760. For the purposes of this response, directors and officers of the Registrant's common stock are considered the affiliates of the Registrant at that date.

The number of shares outstanding of the Registrant's common stock, as of March 2, 2009: 4,151,431 shares of \$.05 par value common stock.

Portions of the Proxy Statement of the Registrant for the Annual Meeting of Shareholders to be held on May 18, 2009, are incorporated by reference into Part III of this report.

PART I

Item 1. Description of Business.

Forward Looking Statements

This document contains forward-looking statements as defined by Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These forward-looking statements involve substantial risks and uncertainties. When used in this document, or in the documents incorporated by reference, the words “anticipate”, “believe”, “estimate”, “may”, “intend” and “expect” and similar expressions are some of the forward-looking statements used in these documents. Actual results, performance, or achievements could differ materially from those contemplated, expressed or implied by the forward-looking statements. Factors which may cause results to change materially include competition, inflation, general economic conditions, changes in interest rates, and changes in the value of collateral securing loans First Community Bank has made, among other things. First Community Bank Corporation of America is referred to herein as “First Community. “We” and “our” refers to First Community and its wholly-owned subsidiaries First Community Bank of America and First Community Lender Services, Inc.

General

First Community is a Florida-based unitary savings and loan holding company with one bank subsidiary, First Community Bank of America (“First Community Bank”) and one non-bank subsidiary First Community Lenders Services, Inc.

First Community Bank

First Community owns all of the outstanding common stock of First Community Bank and First Community Lender Services, Inc. Our primary business activity, however, is the operation of our wholly-owned subsidiary First Community Bank, which was established in February 1985. First Community Bank has eleven branch locations in Pinellas, Hillsborough, Pasco and Charlotte Counties. It is a federally-chartered stock savings bank that provides a variety of banking services to small and middle market businesses and individuals through its four banking offices located in Pinellas County, two banking offices located in Hillsborough County, two banking offices in Pasco County, and three banking offices located in Charlotte County, Florida.

As of December 31, 2008, First Community Bank had assets of approximately \$502 million, net loans of \$404 million and deposits of \$403 million. Due to its strong focus on commercial lending, approximately 53% of First Community Bank’s total loans are commercial and 8% of its total deposits are comprised of non-interest bearing checking accounts.

First Community Lender Services, Inc.

First Community Lender Services, Inc. was incorporated in 2001 as a wholly-owned subsidiary of First Community. First Community Lender Services was originally established to network with title insurance vendors. In November 2004, 1031 Exchange services were added. A 1031 Exchange allows customers to sell investment property/properties and defer any capital gains taxes by purchasing a “like-kind” replacement property/properties within a certain time frame under Section 1031 of the Internal Revenue Code. First Community Lender Services, Inc. had nominal operations in 2008.

Strategy

We have experienced tremendous success in growing our Company, and attribute this success to two key business values: Safety and soundness first, coupled with a relentless commitment to serve our customers.

We believe that building relationships is a crucial factor in differentiating between the national and regional financial institutions and First Community. Even though, typically, the national and regional financial institutions have more products and more locations, they lose that personal service touch that we offer. The most frequent customer complaints we hear about the national and regional institutions are the lack of personalized service and the turnover in personnel, which limits the customer’s ability to develop a relationship with his or her banker. Customers are willing to make a change in order to have that personalized service, and we believe a significant opportunity exists to attract and retain these customers who are dissatisfied with their current banking relationship.

We believe we are unique in the sense that we offer a Regional President and local Regional Board of Directors in each of the counties we serve, all under the same charter. Each Region is operated as a community bank, emphasizing local leadership and local decision-making with Regional Presidents making most major decisions. Our Regional Presidents have loan approval authority, and deposit and loan pricing authority enabling them to provide quicker service and to respond appropriately to their respective markets. Each county’s Regional Board and Regional President are drawn mainly from

[Table of Contents](#)

members of the local business community. We place emphasis on relationship banking so that each customer can identify and establish a comfort level with our bank officers and staff. While a significant portion of our lending effort is concentrated on commercial and professional businesses, we also focus on cross-marketing our deposit products to these borrowers. Many of our retail customers are the principals and employees of our small-and medium-sized business customers.

Market Focus

Our marketing efforts are focused on attracting small and medium-sized businesses and individuals, including service companies, light manufacturing companies, commercial real estate developers, entrepreneurs and professionals, such as engineers, physicians, attorneys, certified public accountants, and architects.

We have been successful in penetrating this market through our ability to deliver:

- Tailored and flexible loan products;
- Comprehensive online banking and cash management services; and
- Competitive investment SWEEP products.

We distinguish ourselves from our competitors by providing a high level of personal service to customers who want quick, local decision making, and who appreciate and are looking for a long-term banking relationship. We believe banking is a business that requires public trust. Our senior management team has over 100 years of combined experience endeavoring to build a reputation worthy of our customers' trust.

Future Growth

In the next few years, we plan to have sufficient capital on hand to take advantage of growth opportunities either through the acquisition of small banks in identified strategic markets, or through the acquisition of branch sites that may come available in markets we are trying to penetrate. Currently, we have no specific acquisition candidates targeted. The acquisition or formation of banks, the purchase of branch facilities, and the establishment of new branch facilities are subject to regulatory approvals and other requirements. See the "Supervision and Regulation" section for more details regarding the requirements surrounding the acquisition or formation of banks.

Products and Services

General. Through First Community Bank we offer a broad array of traditional banking products and services to our customers, including the products and services described below. These services are offered at each of our banking locations, as well as through our online banking program at www.fcbfl.com.

Deposits. We offer a full range of interest bearing and non-interest bearing accounts, including commercial and retail checking accounts, money market accounts, sweep accounts, cash management accounts, individual retirement accounts, savings accounts, and other time deposits, ranging from daily money market accounts to longer term certificates of deposit. We have tailored the rates and terms of our accounts and time deposits to compete with the rates and terms in our principal markets. We seek deposits from residents, businesses, professionals and employees of businesses in our primary markets. The FDIC insures all of our accounts up to the maximum amount permitted by law. In addition, we receive service charges that are competitive with other financial institutions in our principal markets, covering such matters as maintenance fees on checking accounts, per item processing fees on checking accounts, returned check charges and other similar fees.

Loan Activities. We rely on deposits, borrowings and other sources of funds to originate loans. We offer a full range of short- and medium-term commercial, consumer and real estate loans. We generally seek to allocate our loan portfolio as follows: 60% to real estate loans; 20% to consumer loans; and 20% to commercial and industrial loans. Our loan approval process provides for various levels of officer lending authority. When a loan amount exceeds officer lending authority levels, it is reviewed by the loan committee of our Board of Directors, which has ultimate lending authority. The loan committee meets as needed.

The risk of non-payment of loans is inherent in all loans. However, we carefully evaluate all loan applicants and attempt to minimize our credit risk by using thorough loan application and approval procedures that we have established for each category of loan. In determining whether to make a loan, we consider the borrower's credit history, analyze the borrower's income and ability to repay the loan, and evaluate the need for collateral to secure recovery in the event of default. We have established an allowance for loan losses based upon assumptions and judgments regarding the ultimate collectability of loans in our portfolio and a percentage of the outstanding balances of specific loans when their ultimate collectability is considered questionable.

Table of Contents

Our loan activities are primarily directed to individuals, businesses and professionals in our principal markets whose demand for funds generally fall within our bank's respective legal lending limits and who are also likely deposit customers. We have the ability to make loans in excess of our individual loan limits when we are able to secure a commitment from another lending institution to purchase a participation in the loan. The following is a description of each of the major categories of loans which we make.

Commercial Loans. This category includes loans made to business entities for a variety of business purposes. We place particular emphasis on loans to small- to medium-sized professional firms, retail and wholesale businesses, and light industry and manufacturing concerns operating in our principal markets. We consider "small businesses" to include those with generally less than \$10 million in sales. Our commercial loans include term loans with variable interest rates secured by equipment, inventory, receivables and real estate, as well as secured and unsecured working capital lines of credit. The risks of these types of loans depend on the general business conditions in the local economy and the borrowers' ability to sell its products and services in order to generate sufficient business profits to repay their loans under the agreed upon terms and conditions. Personal guarantees are obtained from the principals of business borrowers, and sometimes third parties, to further support the borrowers' ability to service the debt and reduce the risk of non-payment.

Commercial Real Estate Loans. Commercial real estate loans are offered to developers of both commercial and residential properties. Interest rates may be fixed or adjustable. We manage credit risk associated with these loans by actively monitoring such measures as advance rate, cash flow, collateral value and other appropriate credit factors. Risks associated with commercial real estate loans include the general risk of the failure of the commercial borrower, which is different for each type of business and commercial entity. We evaluate each business on an individual basis. We attempt to reduce credit risks in the commercial real estate loan portfolio by emphasizing loans on owner-occupied office and retail buildings where the loan-to-value ratio established by independent appraisals does not exceed 80%. In addition, we typically require personal guarantees of the principal owners.

Construction and Development Loans. Construction and development loans are made on both a pre-sold and speculative basis, and generally have a fixed interest rate. If the borrower has entered into an arrangement to sell the property prior to beginning construction, we consider the loan to be on a pre-sold basis. If the borrower has not entered into an agreement to sell the property prior to beginning construction, we consider the loan to be on a speculative basis. We make residential and commercial construction loans to builders and developers as well as consumers who are contracting with a builder to build their own residence. As of December 31, 2008, our construction real estate portfolio consisted of 33% residential and 67% commercial for a total of \$14,050,000 in construction loans. The terms of most construction and development loans range from twelve to twenty four months. Speculative loans are based on the borrower's financial strength and cash flow position. Loan proceeds are disbursed based on a percentage of completion basis under a set budget and only after a third party inspector inspects the project. These loans generally command higher rates and fees commensurate with the risks warranted in the construction loan field. The risk in construction lending depends upon the performance of the builder in building the project to the plans and specifications of the borrower and our ability to administer and control all phases of construction disbursements. The primary source of repayment for most construction loans is the sale of the property. If the property is to be occupied by the borrower or leased to a third party, then upon completion of construction, we typically convert the loan to a permanent loan on a monthly amortization with a longer maturity.

Residential Real Estate Loans. Adjustable or fixed-interest rate residential real estate loans are made to qualified individuals for the purchase of existing single-family residences in our principal markets. We make these loans in accordance with our appraisal policy and real estate lending policy which detail maximum loan-to-value ratios and maturities. We believe that these loan-to-value ratios are sufficient to compensate us for fluctuations in real estate market values and minimize losses that could result from a downturn in the residential real estate market. We sell mortgage loans that do not conform to our policies in the secondary markets. The risk of these loans depends on our ability to sell the loans to national investors and on the frequency of interest rate changes. Our residential real estate loans are primarily in Florida.

We limit interest rate risk and credit risk on these loans by locking in the interest rate for each loan with a secondary market investor and receiving a forward sales agreement from the secondary market investor. Loans are retained for our portfolio when there is sufficient liquidity to fund the needs of the established customers and when rates are favorable to retain the loans. The loan underwriting standards and policies are generally the same for both loans sold in the secondary market and those retained in our portfolio.

Consumer and Installment Loans. Consumer loans include lines of credit and term loans secured by second mortgages on the residences of borrowers for a variety of purposes, including home improvements, education and other personal expenditures. Consumer loans also include installment loans to individuals for personal, family and household purposes, including automobile and boat loans and pre-approved lines of credit. Consumer loans generally involve more risk than mortgage loans because the collateral for a defaulted loan may not provide an adequate source of repayment of the principal.

[Table of Contents](#)

This risk is due to the potential for damage to the collateral or other loss of value, and the fact that any remaining deficiency often does not warrant further collection efforts. In addition, consumer loan performance depends on the borrower's continued financial stability and is, therefore, more likely to be adversely affected by job loss, divorce, illness or personal bankruptcy.

In addition, we have been approved for participation in the Office of Thrift Supervision pilot program, which allows us to lend up to 25% of our capital and surplus on certain types of loans.

Other Services and Products. In addition to the deposit and loan products discussed above, we also provide:

- Cash management services
- Telephone banking
- Traveler's checks
- Deposit pick-up for commercial customers
- Online banking/bill payment services
- Automatic drafts for various accounts
- Certificate of Deposit Account Registry Service (CDARS)
- VISA® and MasterCard® credit card services through our correspondent banks.
- Sweep accounts
- Safe deposit boxes
- eStatements
- Wire transfers and ACH services
- 1031 Exchange Services
- Debit cards
- Direct deposit of payroll and social security checks
- Health Saving Accounts (HSA)

We offer extended banking hours (both drive-in and lobby) and an after-hours depository and are associated with a shared network of automated teller machines that customers may use throughout our market areas and other regions. We are also associated with third party Internet banking service providers that enable us to provide customers with cost effective, secure and reliable Internet banking services.

Asset and Liability Management

Our main assets are cash and cash equivalents, our loan portfolio and our investment portfolio. Our liabilities consist primarily of deposits. Our objective is to support asset growth through the growth of core deposits, which include deposits of all categories made by individuals, partnerships, corporations and other entities. Consistent with the requirements of prudent banking necessary to maintain liquidity, we seek to match maturities and rates of loans and the investment portfolio with those of deposits, although exact matching is not always possible. The largest portion of our assets is invested in real estate, commercial and consumer loans. Our investment portfolio consists primarily of marketable securities of the United States government and federal agencies, generally with varied maturities.

Our asset/liability mix is monitored on a regular basis with a quarterly report detailing interest-sensitive assets and interest-sensitive liabilities. The objective of this policy is to control interest-sensitive assets and liabilities in order to minimize the impact of substantial movements in interest rates on our earnings.

Customers

The consolidation of the Florida banking industry over the last several years has created significant opportunities for community-oriented banks such as ours to build a successful, locally managed bank. We believe that many of the larger financial institutions do not provide the high level of personalized services desired by many small and medium-sized businesses and their principals. Our marketing efforts are focused on attracting small and medium-sized businesses and individuals, including service companies, manufacturing companies, commercial real estate developers, entrepreneurs and professionals, such as engineers, physicians, CPAs, architects and attorneys.

While a significant portion of our lending effort is concentrated on commercial and professional businesses, emphasis is also placed on generating a significant amount of consumer business. Many of our consumer customers are the principals and employees of our small and medium-sized business customers. We believe in old-fashioned "relationship banking," where each customer can identify and establish a comfort level with our bank officers. We intend to continue to develop our consumer business with individuals who appreciate a high level of personal service, contact with their loan officer and responsive decision-making. Most of our business is developed through our loan officers and members of our board of directors and by pursuing an aggressive strategy of calling on customers and potential customers throughout our principal market areas.

[Table of Contents](#)

Information About Our Primary Markets

Pinellas, Hillsborough, Pasco and Charlotte Counties are considered to be our primary market areas. Pinellas County, located on Florida's Gulf Coast, is a peninsula bordered by the Gulf of Mexico on the west and by Tampa Bay on the east. Pinellas County estimated its population in 2008 to be almost one million. Two of the top five beaches in the United States are located along the 588 miles of Pinellas County coastline, according to America's Best Beaches' List. Florida is nicknamed the "Sunshine City," and St. Petersburg averages 361 sunny days every year, and is located in southeast Pinellas County. St. Petersburg is also home to the MLB Tampa Bay Rays. Top key business segments in Pinellas County are services industries, light manufacturing and financial services. Pinellas County has received the "Successful Community Award" for creating a special metropolitan region by improving housing, expanding recreational opportunities and protecting the environment. Hillsborough County is located midway along the west coast of Florida and is contiguous with Pinellas County. As of 2008, Hillsborough County estimated its population at 1,198,177. The City of Tampa is the largest city in Hillsborough County and is the third most populous city in Florida. It is approximately 20 miles northeast of St. Petersburg. Hillsborough's key business segments include tourism, agriculture, construction, finance, health care, government, technology, and the port of Tampa, which is the seventh largest in the Nation. Tampa is home to both the NFL Tampa Bay Buccaneers and the NHL Tampa Bay Lightning. Pasco County, located on the Gulf of Mexico in the Tampa Bay area, is part of a nine-county region referred to as the "Nature Coast." Pasco County estimated its population to be approximately 462,801 in 2008. Located in the rolling hills of eastern Pasco County, Dade City is the county seat. Pasco County's economy has historically been tied to agriculture, however, over time it has shifted more to service, government and retail. Pasco County has a total of 745 square miles with more than 100 square miles of managed recreational facilities, including parks, four artificial reefs (one made up of surplus military tanks), more than 25 golf courses, and three State-designated canoe trails. Charlotte County is located between Lee County (Fort Myers) and Sarasota County in Southwest Florida on the Gulf of Mexico. Charlotte County estimated its population in 2008 at 167,932. Port Charlotte, the county's geographical center, is approximately 100 miles south of St. Petersburg. Charlotte County features over 70 parks and recreational areas, including Charlotte Harbor, which is the 17th largest estuary in the Nation and the 2nd largest estuary in the State encompassing 270 square miles. The top two business segments of the County are service industries and construction. Charlotte County has been designated one of the top ten sailing destinations by SAIL magazine, and ranked 3rd "Best in America" place to live and golf by Golf Digest.

Competition

We are subject to intense competition from a variety of different competitors in our primary market areas in all phases of our operations. These competitors include:

- Large national and super-regional financial institutions that have well-established branches and significant market share in the communities we serve;
- Finance companies, investment banking and brokerage firms, and insurance companies that offer bank-like products;
- Credit unions, which can offer highly competitive rates on loans and deposits because they receive tax advantages not available to commercial banks;
- Other community banks, including start-up banks that can compete with us for customers who desire a high degree of personal service;
- Technology-based financial institutions including large national and super-regional banks offering on-line deposit, bill payment, and mortgage loan application services; and
- Both local and out-of-state trust companies and trust service offices.

Other existing community banks with whom we compete, and many new community bank start-ups, have marketing strategies similar to ours. These other community banks may open new branches in the communities we serve and compete directly for customers who want the level of service offered by community banks. Other community banks also compete for the same management personnel in Florida.

Various legislative actions in recent years have led to increased competition among financial institutions. With the enactment of the Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994 and other laws and regulations affecting interstate bank expansion, it is easier for financial institutions located outside of the State of Florida to enter the Florida market, including our targeted markets. In addition, recent legislative and regulatory changes and technological advances have enabled customers to conduct banking activities without regard to geographic barriers, through computer and telephone-based banking and similar services. There can be no assurance that the United States Congress, the Florida Legislature, or the applicable bank regulatory agencies will not enact legislation or promulgate rules that may further increase competitive pressures on us.

[Table of Contents](#)

Personnel

At December 31, 2008, First Community had four officers and no other employees and First Community Bank had 97 full-time employees and 3 part-time persons. First Community Lender Services, Inc. has no employees of its own and operates using employees of First Community Bank.

SUPERVISION AND REGULATION

General

First Community is a registered unitary savings and loan holding company within the meaning of the Home Owners' Loan Act ("HOLA"). First Community and First Community Bank, operate in a highly regulated environment. Our business activities, which are governed by statute, regulation and administrative policies, are supervised by a number of federal bank regulatory agencies, including the Office of Thrift Supervision, the Federal Deposit Insurance Corporation ("FDIC") and, to a limited extent, the Federal Reserve Board. The following is a brief summary of the more recent legislation that affects our company and our subsidiaries.

Regulation of the Holding Company

Restrictions on the Acquisition of Savings Institutions. Under the change in Bank Control Act, no person may acquire control of a federal savings bank or its parent holding company, directly or indirectly, unless the Office of Thrift Supervision has been given 60 days prior written notice and has issued a notice discussing the proposed acquisition. In addition, regulations provide that no company may acquire control of a federal savings bank without the prior approval of the Office of Thrift Supervision. Any company that acquires such control becomes a "savings and loan holding company" subject to registration, examination and regulation by the Office of Thrift Supervision. Control in this context means ownership, control of, or holding proxies representing more than 25% of the voting shares of, an insured institution, the power to control in any manner the election of a majority of the directors of such institution or the power to exercise a controlling influence over the management or policies of the institution.

The Office of Thrift Supervision also has established certain rebuttable control determinations. An acquiror must file for approval of control with the Office of Thrift Supervision, or file to rebut the presumptions before surpassing a rebuttable control level of ownership. To rebut the presumption, the acquirer must file a submission with the Office of Thrift Supervision setting forth the reasons for rebuttal. The submission must be filed when the acquirer acquires more than 25% of any class of voting stock of the savings bank and when they have any of the control factors enumerated in 12 C.F.R. Section 574.4(c) which include, but are not limited to:

- The acquirer would be one of the two largest stockholders of any class of voting stock;
- The acquirer and/or the acquirer's representative or nominees would constitute more than one member of the savings bank's board of directors; and
- The acquirer or nominee or management official of the acquirer would serve as the chairman of the board of directors, chairman of the executive committee, chief executive officer, chief operating officer, chief financial officer, or in any similar policy making authority in the savings bank.

Transactions with Affiliates. Our authority to engage in transactions with related parties or "affiliates" or to make loans to certain insiders is limited by Sections 23A and 23B of the Federal Reserve Act ("FRA") and Regulation "W" adopted by the Federal Reserve. Section 23A limits the aggregate amount of transactions with any individual affiliate to 10% of the capital and surplus of the savings institution and also limits the aggregate amount of transactions with all affiliates to 20% of the savings institution's capital and surplus.

Certain transactions with affiliates are required to be secured by collateral in an amount and of a type described in the FRA and the purchase of low quality assets from affiliates is generally prohibited. Section 23B provides that certain transactions with affiliates, including loans and asset purchases, must be on terms and circumstances, including credit standards, that are substantially the same or at least as favorable to the savings institution as those prevailing at the time for comparable transactions with a non-related party or non-affiliated holding company. In the absence of comparable transactions, such transactions may only occur under terms and circumstances, including credit standards that in good faith would be offered to or would apply to non-related parties or non-affiliated companies. Notwithstanding Sections 23A and 23B, savings institutions are prohibited from lending to any affiliate that is engaged in activities that are not permissible for bank holding companies under Section 4(c) of the Bank Holding Company Act of 1956. Further, no savings institution may purchase the securities of any affiliate other than a subsidiary.

[Table of Contents](#)

In addition, Sections 22(g) and 22(h) of the FRA and Regulation O (which set limits on extensions of credit to executive officers, directors and 10% stockholders, as well as companies which such persons control) apply to savings institutions. Among other things, such loans must be made on terms, including interest rates, substantially the same as loans to unaffiliated individuals and which involve no more than the normal risk of collectability. These regulations also place limits on the amount of loans we may make to such persons. These restrictions apply in addition to certain restrictions on transactions with affiliates contained in the Office of Thrift Supervision regulations.

Support of Subsidiary Depository Institutions. Under Office of Thrift Supervision policy, First Community is expected to act as a source of financial strength to and to commit resources to support First Community Bank. This support may be required at times when, in the absence of such Office of Thrift Supervision policy, First Community might not be inclined to provide such support. In addition, any capital loans by First Community to First Community Bank must be subordinate in right of payment to deposits and to certain other indebtedness of First Community Bank. In the event of bankruptcy, any commitment by a holding company to a federal bank regulatory agency to maintain the capital of a subsidiary depository institution will be assumed by the bankruptcy trustee and will be entitled to a priority of payment.

Under the Federal Deposit Insurance Act, a depository institution of a holding company can be held liable for any loss incurred by, or reasonably expected to be incurred by, the FDIC, in connection with:

- The default of a commonly controlled FDIC-insured depository institution; or
- Any assistance provided by the FDIC to any commonly controlled FDIC-insured depository institution in danger of default.

Default is defined generally as the appointment of a conservator or a receiver and “in danger of default” is defined generally as the existence of certain conditions indicating that a default is likely to occur in the absence of regulatory assistance.

Payment of Dividends. There are statutory and regulatory limitations on the payment of dividends by First Community Bank as proscribed by the Office of Thrift Supervision’s capital distribution regulation. Under the regulation, First Community Bank may make a capital distribution without the approval of the Office of Thrift Supervision, provided the Office of Thrift Supervision is notified 30 days before declaration of the capital distribution. First Community Bank must also meet the following requirements:

- It is not of supervisory concern, and will remain adequately or well-capitalized, as defined in the Office of Thrift Supervision prompt corrective action regulations, following the proposed distribution; and
- The distribution does not exceed First Community Bank’s net income for the calendar year-to-date, plus retained net income for the previous two calendar years (less any dividends previously paid).

If First Community Bank does not meet the above-stated requirements, it must obtain the prior approval of the Office of Thrift Supervision before declaring any proposed distributions. The Office of Thrift Supervision can prohibit a proposed capital distribution by a savings institution, which would otherwise be permitted by the regulation, if the Office of Thrift Supervision determines that such distribution would constitute an unsafe or unsound practice. First Community Bank has never paid a dividend; instead earnings are reinvested in First Community Bank to support our current growth rate.

In addition, the Company’s participation in the Troubled Asset Relief Program Capital Purchase Program (“CPP”) with the United States Department of the Treasury (“Treasury”) has limited the ability to declare or pay dividends on any of the Company’s shares. Specifically, under the Purchase Agreement with the Treasury, the Company is unable to declare dividend payments on common, junior preferred or *pari passu* preferred shares if it is in arrears on the dividends on the Series A Preferred Stock. In addition, the Company’s ability to repurchase shares is restricted. Treasury consent generally is required for the Company to make any stock repurchase until the third anniversary of the investment by the Treasury unless all of the Series A Preferred Stock has been redeemed or transferred. Further, common, junior preferred or *pari passu* preferred shares may not be repurchased if the Company is in arrears on the Series A Preferred Stock dividends.

Regulation of First Community Bank

Capital Requirements. Both the Office of Thrift Supervision and the FDIC have promulgated regulations setting forth capital requirements applicable to depository institutions. The Office of Thrift Supervision capital regulations require savings institutions to meet three capital standards:

- A 1.5% tangible capital ratio (defined as the ratio of tangible capital to adjusted total assets);
- A 4% leverage (core capital) ratio (defined as the ratio of core capital to adjusted total assets); and
- An 8% risk-based capital standard as defined below.

Table of Contents

First Community Bank's tangible capital, core capital, and risk-based capital ratios at December 31, 2008, were 7.27%, 9.81%, and 11.07%, respectively.

Core capital is defined as common stockholder's equity (including retained earnings), certain non-cumulative perpetual preferred stock and related surplus, minority interests in equity accounts of consolidated subsidiaries, certain goodwill and certain mortgage servicing rights less certain intangible assets, mortgage servicing rights less certain intangible assets, mortgage servicing rights and investments in non-includable subsidiaries. Tangible capital is defined in the same manner as core capital, except that all intangible assets (excluding certain mortgage servicing rights) must be deducted. Adjusted total assets is defined as GAAP total assets, minus intangible assets (except those included in core capital). The Office of Thrift Supervision regulations also require that in calculating the leverage ratio, tangible and risk-based capital standards, savings institutions must deduct investments in and loans to subsidiaries engaged in activities not permissible for a national bank.

The Office of Thrift Supervision risk-based capital standard for savings institutions requires that total capital (comprised of core capital and supplementary capital) be at least 8% of risk-weighted assets. In determining risk-weighted assets, all assets, including certain off-balance sheet assets, are multiplied by a risk-weight of 0% to 100%, as assigned by the Office of Thrift Supervision capital regulation based on the risks Office of Thrift Supervision believes are inherent in the type of asset. Generally, zero weight is assigned to risk-free assets, such as cash and unconditionally guaranteed United States Government securities. A weight of 20% is assigned to, among other things, certain obligations of United States Government-sponsored agencies (such as the FNMA and the FHLMC) and certain high quality mortgage-related securities. A weight of 50% is assigned to qualifying mortgage loans and certain other mortgaged-related securities, repossessed assets and assets that are 90 days or more past due.

The components of core capital are equivalent to those discussed above. The components of supplementary capital include permanent capital instruments (such as cumulative perpetual preferred stock, mandatory convertible subordinated debt and perpetual subordinated debt), maturing capital instruments (such as mandatory convertible subordinated debt and intermediate-term preferred stock) and the allowance for loan and lease losses. Allowance for loan and lease losses includable in supplementary capital is limited to a maximum of 1.25% of risk-weighted assets. Overall, the amount of capital counted toward supplementary capital cannot exceed 100% of core capital.

At December 31, 2008, First Community Bank exceeded each of its capital requirements. See Note 12 to the consolidated financial statements for a summary of the regulatory capital levels and percentages.

Standards for Safety and Soundness. The FDICIA, as amended by the Reigle Community Development and Regulatory Improvement Act of 1994, requires each federal banking agency to prescribe standards relating to internal controls, information systems and audit systems, loan documentation, credit underwriting, interest rate risk exposure, asset growth, and compensation, fees and benefits and such other operational and managerial standards as the agency deems appropriate for all insured depository institutions and their holding companies. The Office of Thrift Supervision and the other federal banking agencies adopted a rule establishing deadlines for the agencies to submit and review safety and soundness compliance plans and Interagency Guidelines Establishing Standards for Safety and Soundness. The guidelines require depository institutions to maintain internal controls and information systems and internal audit systems that are appropriate for the size, nature and scope of the institution's business.

The guidelines also establish certain basic standards for loan documentation, credit underwriting, interest rate-risk exposure, and asset growth. The guidelines further provide that savings institutions should maintain safeguards to prevent the payment of compensation, fees and benefits that are excessive or that could lead to material financial loss, and that they should take into account factors such as compensation practices at comparable institutions. The Interagency Guidelines also include asset quality and earnings standards.

If the Office of Thrift Supervision determines that a savings institution is not in compliance with the safety and soundness guidelines, it may require the institution to submit an acceptable plan to achieve compliance with the guidelines. A savings institution is required to submit an acceptable compliance plan to the Office of Thrift Supervision within 30 days after receipt of a request for such a plan. Failure to submit or implement a compliance plan may subject the institution to regulatory sanctions.

Insurance of Deposit Accounts. The FDIC currently maintains the Deposit Insurance Fund ("DIF"), which was created in 2006 in the merger of the Bank Insurance Fund and Savings Association Insurance Fund. The deposit accounts of the Bank are insured by the DIF to the maximum amount provided by law. This insurance is backed by the full faith and credit of the United States Government.

[Table of Contents](#)

As insurer, the FDIC is authorized to conduct examinations of and to require reporting by DIF-insured institutions. It also may prohibit any DIF-insured institution from engaging in any activity the FDIC determines by regulation or order to pose a serious threat to the DIF. The FDIC also has the authority to take enforcement actions against insured institutions.

The FDIC's regulations for risk-based deposit insurance assessments establish four Risk Categories. Risk Category I is for well-capitalized institutions that are financially sound with only a few minor weaknesses. Risk Categories II, III and IV present progressively greater risks to the DIF. Effective January 1, 2007, Risk Category I institutions pay quarterly assessments for deposit insurance at annual rates of 5 to 7 basis points. The rates for Risk Categories II, III and IV are 7, 28 and 43 basis points, respectively. With advance notice to insured institutions, rates are subject to change. Within Risk Category I, the precise rate for an individual institution with less than \$10 billion in assets is generally determined by a formula using CAMELS ratings, which are assigned in examinations, and financial ratios. A different method applies for larger institutions. The rate for an individual institution is applied to it is assessment base, consisting generally of its deposit liabilities subject to certain adjustments. An institution insured by the FDIC on December 31, 1996, which had previously paid assessments (or its successor) is eligible for certain credit against deposit insurance assessments.

The FDIC also collects assessments against the assessable deposits of insured institutions to service the debt on bonds issued during the 1980's to resolve the thrift bailout. During the year ended December 31, 2008, the quarterly assessments averaged approximately .00285% of assessable deposits, and First Community Bank paid approximately \$41,300 in assessments.

Business Activities.

Qualified Thrift Lender Test ("QTL"). The HOLA requires savings institutions to meet a QTL test. The QTL test, as amended by the FDICIA, requires a savings institution to maintain at least 65% of its "portfolio assets" (as defined by regulation) in qualified thrift investments, primarily residential mortgages and related investments on a monthly basis in nine out of every 12 months. The definition of portfolio assets has recently been amended to include the small business loans upon which we focus. As of December 31, 2008, we exceeded the QTL test, maintaining approximately 87% of our portfolio assets in qualified thrift investments.

Interstate Banking. Federally-chartered savings institutions are allowed to branch nationwide to the extent allowed by federal statute. This ability permits savings institutions with interstate networks to diversify their loan portfolios and lines of business. The Office of Thrift Supervision authority preempts any state law purporting to regulate branching by federal savings institutions. Prior approval of the Office of Thrift Supervision is required for a savings institution to branch interstate or intrastate. To obtain supervisory clearance for branching, an applicant's regulatory capital must meet or exceed the minimum requirements established by law and by the Office of Thrift Supervision regulations. In addition, the savings institution must have a satisfactory record under the Community Reinvestment Act ("CRA"). First Community Bank does not conduct interstate branching operations and does not plan to do so in the foreseeable future.

The Reigle-Neal Interstate Banking and Branching Efficiency Act of 1994 ("Interstate Act") eliminated many existing restrictions on interstate banking by authorizing interstate acquisitions of financial institutions by bank holding companies without geographic limitations. Under the Interstate Act, existing restrictions on interstate acquisitions of banks by bank holding companies were repealed. Bank holding companies located in Florida are able to acquire any Florida-based bank, subject to certain deposit percentage and other restrictions. The legislation also provides that *de novo* branching by an out-of-state bank is permitted only if it is expressly permitted by the laws of the host state. The authority of a bank to establish and operate branches within a state is subject to applicable state branching laws. Florida law permits interstate branching through the acquisition of a bank in existence for more than three years, but prohibits *de novo* branching by out of state banks.

Office of Thrift Supervision Assessments. Savings institutions are required by Office of Thrift Supervision regulation to pay assessments to the Office of Thrift Supervision to fund the operations of the Office of Thrift Supervision. The general assessment, to be paid on a semiannually basis, is computed upon the savings institution's total assets, including consolidated subsidiaries, as reported in the institution's latest quarterly thrift financial report.

The Office of Thrift Supervision also assesses fees to savings and loan holding companies such as First Community. The semi-annual assessment for savings and loan holding companies includes a \$3,000 base assessment with an additional assessment based on the savings and loan holding company's risk or complexity, organizational form and condition.

Federal Home Loan Bank System. First Community Bank is a member of the Federal Home Loan Bank ("FHLB") system, which consists of 12 regional FHLBs. The FHLB provides a central credit facility primarily for member institutions. As a member of the FHLB-Atlanta, First Community Bank is required to acquire and hold shares of capital stock in that FHLB in an amount at least equal to 4.5% of our advances (borrowings) from the FHLB-Atlanta plus 8% of certain assets sold to the FHLB-Atlanta. We are in compliance with this requirement. FHLB advances must be secured by specified types of collateral and may be obtained only for the purpose of providing funds for residential housing finance.

[Table of Contents](#)

The FHLBs are required to provide funds for the resolution of insolvent savings institutions and to contribute funds for affordable housing programs. These requirements could reduce the amount of dividends that the FHLBs pay to their members and could also result in the FHLBs imposing a higher rate of interest on advances to members. For the year ended December 31, 2008, dividends paid by the FHLB-Atlanta to First Community Bank amounted to approximately \$100,000, at a yield of 3.70% on our investment. Should dividends be reduced, or interest on FHLB advances increased, our consolidated net interest income might also be reduced. Furthermore, there can be no assurance that the value of the FHLB-Atlanta stock we hold will not decrease as a result of any new legislation.

Federal Reserve System. Federal Reserve regulations require depository institutions to maintain non-interest-earning reserves against their transaction accounts (primarily NOW and regular checking accounts). The Federal Reserve regulations generally require that reserves of 3% must be maintained against aggregate transaction accounts of \$40.6 million or less (subject to adjustment by the Federal Reserve) and an initial reserve of \$1,218,000 plus 10% of accounts in excess of \$40.6 million. The first \$6.6 million of otherwise reversible balances (subject to adjustments by the Federal Reserve) are exempted from the reserve requirements. We are in compliance with the foregoing requirements. The balances maintained to meet the reserve requirements imposed by the Federal Reserve may be used to satisfy liquidity requirements imposed by the Office of Thrift Supervision.

Because required reserves must be maintained in the form of either vault cash, a non-interest-bearing account at a Federal Reserve or a pass-through account as defined by the Federal Reserve, the effect of this reserve requirement is to reduce our interest-earning assets. FHLB System members are also authorized to borrow from the Federal Reserve discount window, however, Federal Reserve regulations require institutions to exhaust all FHLB sources before borrowing from a Federal Reserve discount window.

Emergency Economic Stabilization Act

In response to the financial crisis affecting the banking system and financial markets, the Emergency Economic Stabilization Act (“EESA”) was signed into law on October 3, 2008, and established the TARP. As part of TARP, the U.S. Treasury established the CPP to provide up to \$700 billion of funding to eligible financial institutions through the purchase of capital stock and other financial instruments for the purpose of stabilizing and providing liquidity to the U.S. financial markets. On December 23, 2008, First Community issued \$10.685 million in preferred stock and a warrant to purchase 228,312 shares of common stock at \$7.02 to the U.S. Treasury. In connection with EESA, there have been numerous actions by the Federal Reserve Board, Congress, the U.S. Treasury, the FDIC, the SEC and others to further the economic and banking industry stabilization efforts under EESA. It remains unclear at this time what further legislative and regulatory measures will be implemented under EESA affecting First Community.

American Recovery and Reinvestment Act of 2009

On February 17, 2009 President Obama signed into law the American Recovery and Reinvestment Act of 2009 (“ARRA”), more commonly known as the economic stimulus or economic recovery package. ARRA includes a wide variety of programs intended to stimulate the economy and provide for extensive infrastructure, energy, health, and education needs. In addition, ARRA imposes certain new executive compensation and corporate expenditure limits on all current and future CPP recipients that are in addition to those previously announced by the U.S. Treasury, until the institution has repaid the U.S. Treasury, which is now permitted under ARRA without penalty and without the need to raise new capital, subject to the U.S. Treasury’s consultation with the recipient’s appropriate regulatory agency.

Future Legislation

Various other legislative and regulatory initiatives, including proposals to overhaul the banking regulatory system and to limit the investments that a depository institution may make with insured funds, are from time to time introduced in Congress and state legislatures, as well as regulatory agencies. Such legislation may change banking statutes and the operating environment of First Community and First Community Bank in substantial and unpredictable ways, and could increase or decrease the cost of doing business, limit or expand permissible activities or affect the competitive balance depending upon whether any of this potential legislation will be enacted, and if enacted, the effect that it or any implementing regulations, would have on the financial condition or results of operations of First Community or First Community Bank. With the recent enactments of EESA and ARRA, the nature and extent of future legislative and regulatory changes affecting financial institutions is very unpredictable at this time. We cannot determine the ultimate effect that such potential legislation, if enacted, would have upon its financial condition or operations.

[Table of Contents](#)

Other Laws. State usury and credit laws limit the amount of interest and various other charges collected or contracted by a bank on loans. Our loans are also subject to federal laws applicable to credit transactions, such as the:

- Federal Truth-In-Lending Act, which governs disclosures of credit terms to consumer borrowers;
- Community Reinvestment Act, which requires financial institutions to meet their obligations to provide for the total credit needs of the communities they serve, including investing their assets in loans to low- and moderate-income borrowers;
- Home Mortgage Disclosure Act requiring financial institutions to provide information to enable public officials to determine whether a financial institution is fulfilling its obligations to meet the housing needs of the community it serves;
- Equal Credit Opportunity Act prohibiting discrimination on the basis of race, creed or other prohibitive factors in extending credit;
- Real Estate Settlement Procedures Act, which requires lenders to disclose certain information regarding the nature and cost of real estate settlements, and prohibits certain lending practices, as well as limits escrow account amounts in real estate transactions;
- Fair Credit Reporting Act governing the manner in which consumer debts may be collected by collection agencies; and
- Rules and regulations of various federal agencies charged with the responsibility of implementing such federal laws. Our operations are also subject to the:
 - Privacy provisions of the Gramm-Leach-Bliley Act of 1999, which require us to maintain privacy policies intended to safeguard consumer financial information, to disclose these policies to our customers, and to allow customers to “opt out” of having their financial service providers disclose their confidential financial information to non-affiliated third parties, subject to certain exceptions;
 - Right to Financial Privacy Act, which imposes a duty to maintain confidentiality of consumer financial records and prescribes procedures for complying with administrative subpoenas of financial records; and
 - Electronic Funds Transfer Act and Regulation E, which govern automatic deposits to, and withdrawals from, deposit accounts and customers’ rights and liabilities arising from the use of debit cards, automated teller machines and other electronic banking services.

Financial Modernization. The Gramm-Leach-Bliley Act of 1999 sought to achieve significant modernization of the federal bank regulatory framework by allowing the consolidation of banking institutions with other types of financial services firms, subject to various restrictions and requirements. In general, the Gramm-Leach-Bliley Act repealed most of the federal statutory barriers which separated commercial banking firms from insurance and securities firms and authorized the consolidation of such firms in a “financial services holding company”. We have no immediate plans to utilize the structural options created by the Gramm-Leach-Bliley Act, but we may develop such plans in the future.

After the September 11, 2001 terrorist attacks in New York and Washington, D.C., the United States government acted in several ways to tighten control on activities perceived to be connected to money laundering and terrorist funding. A series of orders were issued which identified terrorists and terrorist organizations and required the blocking of property and assets of, as well as prohibiting all transactions or dealings with, such terrorists, terrorist organizations and those that assist or sponsor them. The USA Patriot Act:

- Substantially broadens existing anti-money laundering legislation and the extraterritorial jurisdiction of the United States;
- Imposes new compliance and due diligence obligations;
- Creates new crimes and penalties;
- Compels the production of documents located both inside and outside the United States; including those of foreign institutions that have a correspondent relationship in the United States; and
- Clarifies the safe harbor from civil liability to customers.

In addition, the United States Treasury Department issued regulations in cooperation with the federal banking agencies, the Securities and Exchange Commission, the Commodity Futures Trading Commission and the Department of Justice to:

- Require customer identification and verification;

[Table of Contents](#)

- Expand the money-laundering program requirement to the major financial services sectors; including insurance and unregistered investment companies, such as hedge funds; and
- Facilitate and permit the sharing of information between law enforcement and financial institutions, as well as among financial institutions themselves.

The United States Treasury Department also has created the Treasury USA Patriot Act Task Force to work with other financial regulators, the regulated community, law enforcement and consumers to continually improve the regulations.

On July 30, 2002, President Bush signed into law the Sarbanes-Oxley Act of 2002 (“Act”). The Securities and Exchange Commission (“SEC”) has promulgated certain regulations pursuant to the Act and will continue to propose additional implementing or clarifying regulations as necessary in furtherance of the Act. The passage of the Act and the regulations implemented by the SEC subject publicly traded companies to additional and more cumbersome reporting regulations and disclosure. Compliance with the Act and corresponding regulations may increase our operating expenses. The effective date of the application of the provision of Section 404 of the Act concerning independent auditor attestation of internal control compliance reporting for non-accelerated filers such as First Community has been extended to the first fiscal year ending on or after July 15, 2008.

Item 1A. Risk Factors

Investing in our common stock involves risk. In addition to the other information set forth elsewhere in this Report, the following factors relating to us and our common stock should be carefully considered in deciding whether to invest in our common stock.

Risk Related to Our Business

Recent negative developments in the financial services industry and the U.S. and global credit markets have adversely impacted our operations and results and may continue to do so

Negative developments in the latter portion of 2007 and during 2008 in the capital markets have resulted in an economic downturn and uncertainty in the financial markets that appears certain to continue through 2009 and possibly beyond. Loan portfolio performances have deteriorated at many institutions resulting from, among other factors, a weak economy and a decline in the value of the collateral supporting their loans. The competition for our deposits has increased significantly due to liquidity concerns at many of these same institutions. Stock prices of financial institution holding companies, like ours, have been negatively affected by the current condition of the financial markets, as has our ability, if needed, to raise capital or borrow in the debt markets, compared to prior years. As a result, there is a potential for new federal or state laws and regulations regarding lending and funding practices and capital and liquidity standards, and financial institution regulatory agencies are expected to be very aggressive in responding to concerns and trends identified in examinations, including the expected issuance of many formal enforcement actions. Negative developments in the financial services industry and the impact of any new legislation in response to those developments could continue to negatively impact our operations by restricting our business operations, including our ability to originate or sell loans, and adversely impact our financial performance.

Our business is subject to the success of the local economies where it operates

Our success significantly depends upon the growth in population, income levels, deposits and housing starts in our primary and secondary markets. If the communities in which we operate do not grow or if prevailing economic conditions locally or nationally continue to remain challenged, our business may be adversely affected. Prolonged adverse economic conditions in our specific market area could reduce our growth rate, affect the ability of our customers to repay their loans to us and generally affect our financial condition and results of operations. We are less able than a larger institution to spread the risks of unfavorable local economic conditions across a large number of diversified economies. Moreover, we cannot give any assurance that we will benefit from any market growth or favorable economic conditions in our primary market areas if they do occur.

We make and hold in our portfolio a significant number of land acquisition and development and construction loans, which pose more credit risk than other types of loans typically made by financial institutions.

We offer land acquisition and development and construction loans for builders, developers and individuals. Land acquisition and development and construction loans are considered more risky than other types of loans. The primary credit risks associated with land acquisition and development and construction lending are underwriting, project risks and market

[Table of Contents](#)

risks. Project risks include cost overruns, borrower credit risk, project completion risk, general contractor credit risk, and environmental and other hazard risks. Market risks are risks associated with the sale of the completed residential or commercial units. They include affordability risk, which means the risk of affordability of financing by borrowers, product design risk, and risks posed by competing projects. While we believe we have established adequate reserves on our financial statements to cover the credit risk of our land acquisition and development and construction loan portfolio, there can be no assurance that losses will not exceed our reserves, which could adversely impact our earnings. Non-performing loans in our land acquisition and development and construction portfolio may increase further and these non-performing loans may result in a material level of charge-offs, which may negatively impact our capital and earnings.

An inadequate allowance for loan losses would reduce our earnings.

The risk of credit losses on loans varies with, among other things, general economic conditions, the type of loan being made, the creditworthiness of the borrower over the term of the loan and, in the case of a collateralized loan, the value and marketability of the collateral for the loan. Management maintains an allowance for loan losses based upon, among other things, historical experience, an evaluation of economic conditions and regular reviews of delinquencies and loan portfolio quality. Based upon such factors, management makes various assumptions and judgments about the ultimate collectibility of the loan portfolio and provides an allowance for loan losses based upon a percentage of the outstanding balances and for specific loans when their ultimate collectibility is considered questionable. If management's assumptions and judgments prove to be incorrect and the allowance for loan losses is inadequate to absorb losses, or if the bank regulatory authorities require the Bank to increase the allowance for loan losses as a part of its examination process, the Bank's earnings and capital could be significantly and adversely affected.

If the value of real estate in our core Florida market were to continue to decline materially, a greater portion of our loan portfolio could become under-collateralized, which could have a material adverse effect on us.

With most of our loans concentrated in Pinellas, Hillsborough, Pasco and Charlotte Counties Florida, a continued decline in local economic conditions will continue to adversely affect the values of our real estate collateral. Additionally, the availability of property insurance, including windstorm and flood insurance, and the significant increases in the cost thereof in the Florida market may negatively affect borrowers' abilities to repay existing loans and the abilities of potential borrowers to qualify for new loans. Consequently, the expected continued decline in local economic conditions may have a greater effect on our earnings and capital than on the earnings and capital of larger financial institutions whose real estate loan portfolios are geographically diverse.

In addition to the financial strength and cash flow characteristics of the borrower in each case, the Bank often secures its loans with real estate collateral. The real estate collateral in each case provides an alternate source of repayment in the event of default by the borrower and may deteriorate in value during the time the credit is extended. If we are required to liquidate the collateral securing a loan to satisfy the debt during a period of reduced real estate values, our earnings and capital could be adversely affected.

Continued deterioration in the housing market and the homebuilding industry may lead to increased loss severities and further worsening of delinquencies and non-performing assets in our loan portfolios. Consequently, our results of operations may be adversely impacted.

There has been substantial industry concern and publicity over asset quality among financial institutions due in large part to issues related to residential mortgage lending, declining real estate values and general economic concerns. If market conditions continue to deteriorate, they may lead to additional valuation adjustments on our loan portfolios and real estate owned as we continue to reassess the market value of our loan portfolio, the losses associated with the loans in default and the net realizable value of real estate owned.

The homebuilding industry has experienced a significant and sustained decline in demand for new homes and an oversupply of new and existing homes available for sale in various markets, including the markets in which we lend. Our customers who are builders and developers face greater difficulty in selling their homes in markets where these trends are more pronounced. Consequently, we may face increased delinquencies and non-performing assets if builders and developers are forced to default on their loans with us. We do not anticipate that the housing market will improve in the near-term, and accordingly, additional downgrades, provisions for loan losses and charge-offs related to our loan portfolio may occur.

[Table of Contents](#)

If we are unable to increase our share of deposits in our markets, we may accept out of market and brokered deposits, the costs of which may be higher than expected.

We can offer no assurance that we will be able to maintain or increase our market share of deposits in our highly competitive service areas. If we are unable to do so, we may be forced to accept increased amounts of out of market or brokered deposits. At times, the cost of out of market and brokered deposits exceeds the cost of deposits in our local market. In addition, the cost of out of market and brokered deposits can be volatile, and if we are unable to access these markets or if our costs related to out of market and brokered deposits increases, our liquidity and ability to support demand for loans could be adversely affected.

Our continued growth and current level of earnings may require us to raise additional capital in the future, but that capital may not be available when it is needed.

We are required by federal and state regulatory authorities to maintain adequate levels of capital to support our operations. We anticipate our capital resources as a result of the recent sale of the Series A Preferred Stock to the Treasury will satisfy our capital requirements for the foreseeable future. We may at some point, however, need to raise additional capital to support our continued growth.

Our ability to raise additional capital, if needed, will depend on conditions in the capital markets at that time, which are outside of our control, and on our financial performance. Accordingly, we cannot give any assurance that we will be able to raise additional capital if needed on terms acceptable to us. If we cannot raise additional capital when needed, our ability to further expand our operations through internal growth and acquisitions could be materially impaired.

Changes in interest rates may negatively affect our earnings and the value of our assets.

Our earnings and cash flows are largely dependent upon our net interest income. Net interest income is the difference between interest income earned on interest-earning assets, such as loans and investment securities, and interest expense paid on interest-bearing liabilities, such as deposits and borrowed funds. Interest rates are sensitive to many factors that are beyond our control, including general economic conditions, competition and policies of various governmental and regulatory agencies and, in particular, the policies of the Board of Governors of the Federal Reserve. Changes in monetary policy, including changes in interest rates, could influence not only the interest the Bank receives on loans and investment securities and the amount of interest it pays on deposits and borrowings, but such changes could also affect (i) the Bank's ability to originate loans and obtain deposits, (ii) the fair value of our financial assets and liabilities, including the held-to-maturity, available for sale, and trading securities portfolios, and (iii) the average duration of our interest-earning assets. This also includes the risk that interest-earning assets may be more responsive to changes in interest rates than interest-bearing liabilities, or vice versa (repricing risk), the risk that the individual interest rates or rates indices underlying various interest-earning assets and interest-bearing liabilities may not change in the same degree over a given time period (basis risk), and the risk of changing interest rate relationships across the spectrum of interest-earning asset and interest-bearing liability maturities (yield curve risk), including a prolonged flat or inverted yield curve environment. Any substantial, unexpected, prolonged change in market interest rates could have a material adverse affect on our financial condition and results of operations.

Competition from financial institutions and other financial service providers may adversely affect our profitability.

The banking business is highly competitive and we experience competition in each of our markets from many other financial institutions. We compete with commercial banks, credit unions, savings and loan associations, mortgage banking firms, consumer finance companies, securities brokerage firms, insurance companies, money market funds, and other mutual funds, as well as other super-regional, national and international financial institutions that operate offices in our primary market areas and elsewhere.

[Table of Contents](#)

We compete with these institutions both in attracting deposits and in making loans. In addition, we have to attract our customer base from other existing financial institutions and from new residents. Many of our competitors are well-established, larger financial institutions. While we believe we can and do successfully compete with these other financial institutions in our primary markets, we may face a competitive disadvantage as a result of our smaller size, lack of geographic diversification and inability to spread our marketing costs across a broader market. Although we compete by concentrating our marketing efforts in our primary markets with local advertisements, personal contacts, and greater flexibility and responsiveness in working with local customers, we can give no assurance this strategy will be successful.

We are subject to extensive regulation that could limit or restrict our activities.

We operate in a highly regulated industry and are subject to examination, supervision, and comprehensive regulation by various federal and state agencies. Our compliance with these regulations is costly and restricts certain of our activities, including payment of dividends, mergers and acquisitions, investments, loans and interest rates charged, interest rates paid on deposits and locations of offices. We are also subject to capitalization guidelines established by our regulators, which require us to maintain adequate capital to support our growth.

The laws and regulations applicable to the banking industry could change at any time, and we cannot predict the effects of these changes on our business and profitability. Because government regulation greatly affects the business and financial results of all financial institutions and financial institutions holding companies, our cost of compliance could adversely affect our ability to operate profitably.

We face regulatory risks related to our commercial real estate loan concentrations.

Commercial real estate, or "CRE," is cyclical and poses risks of possible loss due to concentration levels and similar risks of the asset class. The banking regulators are more closely scrutinizing CRE lending and may require banks with higher levels of CRE loans to implement more rigorous underwriting, internal controls, risk management policies and portfolio stress testing, as well as possibly requiring higher levels of allowances for possible loan losses and capital levels as a result of CRE lending growth and exposures.

We are dependent upon the services of our management team.

Our future success and profitability is substantially dependent upon the management and banking abilities of our senior executives. We believe that our future results will also depend in part upon our attracting and retaining highly skilled and qualified management and other personnel. Competition for such personnel is intense, and we cannot assure you that the Company will be successful in retaining such personnel. We also cannot guarantee that members of our executive management team will remain with us. Changes in key personnel and their responsibilities may be disruptive to the Company's business and could have a material adverse effect on our business, financial condition and results of operations.

Our profitability could be adversely affected if we are unable to promptly deploy the capital raised in our recent offering

We may not be able to immediately deploy all of the capital raised in the recent sale of the Series A Preferred Stock to the Treasury. Investing the offering proceeds in securities until we are able to deploy the proceeds will provide lower margins than we generally earn on loans, potentially adversely affecting shareholder returns, including earnings per share, return on assets and return on equity.

Losses from loan defaults may exceed the allowance we establish for that purpose, which will have an adverse effect on our business.

If a significant number of loans are not repaid, it would have an adverse effect on our earnings and overall financial condition. Like all financial institutions, we maintain an allowance for loan losses to provide for losses inherent in the loan portfolio. The allowance for loan losses reflects our management's best estimate of probable losses in the loan portfolio at the relevant balance sheet date. This evaluation is primarily based upon a review of our and the banking industry's historical loan loss experience, known risks contained in the loan portfolio, composition and growth of the loan portfolio, and economic factors. However, the determination of an appropriate level of loan loss allowance is an inherently difficult process and is based on numerous assumptions. As a result, our allowance for loan losses may not be adequate to cover actual losses, and future provisions for loan losses may adversely affect our earnings.

[Table of Contents](#)

First Community and its subsidiaries operate in an environment highly regulated by state and federal government; changes in banking laws and regulations could have a negative impact on our business

As a unitary holding company, First Community is regulated primarily by the OTS. Our current Subsidiaries are regulated primarily by the Office of Thrift Supervision, the Federal Deposit Insurance Corporation and the Florida Office of Finance Regulation. Federal and various state laws and regulations govern numerous aspects of our operations and the operations of our Subsidiaries, including:

- Adequate capital and financial condition;
- Permissible types and amounts of extensions of credit and investments;
- Permissible non-banking activities; and
- Restrictions on dividend payments.

Federal and state regulatory agencies have extensive discretion and power to prevent or remedy unsafe or unsound practices or violations of law by our holding company, our subsidiary bank and service company. Following such examinations, we may be required, among other things, to change its asset valuations or the amounts of required loan loss allowances or to restrict its operations, based on information available to them at the time of their respective examination.

Risk Related to an Investment in Our Securities

Our growth strategy may not be successful.

As a strategy, we have sought to increase the size of our franchise through branch expansion and rapid growth, aggressively pursuing business development opportunities. No assurance can be provided that we will continue to be successful in increasing the volume of loans and deposits at acceptable risk levels and upon acceptable terms and expanding our asset base, while managing the costs and implementation risks associated with this growth strategy. There also can be no assurance that any further expansion will be profitable or that we will continue to be able to sustain our rate of growth, either through internal growth or through other successful expansions of our banking markets, or that we will be able to maintain capital sufficient to support our continued growth.

Because of our participation in the U.S. Treasury's Capital Purchase Program, we are subject to several restrictions including restrictions on our ability to declare or pay dividends and repurchase our shares as well as restrictions on our executive compensation.

On December 23, 2008, the Company issued to the U.S. Treasury for aggregate consideration of \$10,685,000: (i) 10,685 shares of Series A Preferred Stock, par value \$0.01 per share and liquidation preference \$1,000 per share; and (ii) a warrant to purchase 228,312 shares of the Company's common stock, par value \$0.05 per share. Pursuant to the terms of the Purchase Agreement, our ability to declare or pay dividends on any of our shares is limited. Specifically, we are unable to declare dividend payments on common, junior preferred or *pari passu* preferred shares if we are in arrears on the dividends on the Series A Preferred Stock. In addition, our ability to repurchase our shares is restricted. Treasury consent generally is required for us to make any stock repurchase until the third anniversary of the investment by the Treasury unless all of the Series A Preferred Stock has been redeemed or transferred. Further, common, junior preferred or *pari passu* preferred shares may not be repurchased if we are in arrears on the Series A Preferred Stock dividends.

In addition, pursuant to the terms of the Purchase Agreement, we adopted the Treasury's standards for executive compensation and corporate governance for the period during which the Treasury holds the equity issued pursuant to the Purchase Agreement, including the common stock which may be issued pursuant to the warrant. These standards generally apply to our Chief Executive Officer, Chief Financial Officer and the three next most highly compensated senior executive officers. The standards are evolving as evidenced by the ARRA and their impact on our ability to attract and retain qualified senior management is unknown. Since the warrant has a ten year term, we could potentially be subject to the executive compensation and corporate governance restrictions for a ten year time period.

Changes in the terms of the TARP-CPP are unpredictable and could adversely affect our operations.

Pursuant to the TARP-CPP Purchase Agreement, the U.S. Treasury has the right to unilaterally amend the Purchase Agreement to impose new terms and conditions upon TARP-CPP participants to comply with changes in Federal law. This has already occurred with the ARRA. It is impossible to know if future changes in law will result in new terms and conditions being imposed upon us as participants in TARP-CPP and the impact of any such changes can not be determined.

[Table of Contents](#)

Future capital needs could result in dilution of an investment in our shares.

Our Board of Directors may determine from time to time that there is a need to obtain additional capital through the issuance of additional shares of our common stock or other securities. These issuances would dilute the ownership interests of our shareholders and may dilute the per share book value of our common stock. New investors may also have rights, preferences and privileges senior to our shareholders which may adversely impact our shareholders. Furthermore, future additional dilution may result from exercises of outstanding stock options and warrants.

Although publicly traded, the trading market in our common stock is less liquid and the price of our common stock due to this limited trading market may be more volatile in the future.

Our common stock is thinly traded. Thinly traded stock can be more volatile than stock trading in an active public market. We cannot predict the extent to which an active public market for our common stock will develop or be sustained. In recent years, the stock market has experienced a high level of price and volume volatility, and market prices for the stock of many companies have experienced wide price fluctuations that have not necessarily been related to their operating performance. Therefore, our shareholders may not be able to sell their shares at the volumes, prices, or times that they desire.

Our ability to pay dividends is limited and we may be unable to pay future dividends.

Our ability to pay dividends is limited by regulatory restrictions and the need to maintain sufficient consolidated capital and is dependent upon the receipt of dividends from the Bank and cash available at the holding company. The ability of the Bank to pay dividends to us is limited by its obligation to maintain sufficient capital and by other general restrictions on their dividends that are applicable to thrifts that are regulated by the OTS. We have never paid a cash dividend on our common stock.

Our preferred shares impact net income available to our common shareholders and our earnings per share

As long as there are shares of Series A Preferred Stock outstanding, no dividends may be paid on our common stock unless all dividends on the preferred shares have been paid in full. The dividends declared on our Series A Preferred Stock will reduce the net income available to common shareholders and our earnings per common share. Additionally, warrants to purchase our common stock issued to the Treasury in conjunction with the Series A Preferred Stock, may be dilutive to our earnings per share. The Series A Preferred Stock will also receive preferential treatment in the event of liquidation, dissolution or winding up of our business.

We may issue debt and equity securities or securities convertible into equity securities, which are senior to our common stock as to distributions and in liquidation, which could negatively affect the value of our common stock.

In the future, we may attempt to increase our capital resources by entering into debt or debt-like financing that is unsecured or secured by all or up to all of our assets, or by issuing debt or equity securities, which could include issuances of secured or unsecured commercial paper, medium-term notes, senior notes, subordinated notes, common stock, warrants, or other securities convertible into common stock. In the event of our liquidation, our lenders and holders of our debt securities would receive a distribution of our available assets before distributions to the holders of our common stock. Because our decision to incur debt and issue securities in our future offerings will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of our future offerings and debt financings. Further, market conditions could require us to accept less favorable terms for the issuance of our securities in the future.

Future sales of our common stock could depress the price of the common stock.

Sales of a substantial number of shares of our common stock in the public market by our shareholders, or the perception that such sales are likely to occur, could cause the market price of our common stock to decline.

There are substantial regulatory limitations on ownership of our common stock and changes of control.

With certain limited exceptions, federal regulations prohibit a person or company or a group of persons deemed to be "acting in concert" from, directly or indirectly, acquiring 10% or more (5% if the acquirer is a bank holding company) of any class of our voting stock or obtaining the ability to control in any manner the election of a majority of our directors or otherwise direct our management or our policies without prior notice or application to and the approval of the Office of Thrift Supervision.

Item 1B. Unresolved Staff Comments.

Not applicable.

Item 2. Description of Property.

We lease our corporate headquarters, which also serves as our Mid-County office. Our headquarters is located at 9001 Belcher Road, Pinellas Park, Florida 33782 and consists of a 7,200 square foot, two-story stand alone building. The facility has three drive-through lanes and an ATM machine.

In addition to our headquarters, we currently have ten branch offices: St. Petersburg, Largo, West Central, South Shore, West Shore, Dade City, Zephyrhills, Port Charlotte, Punta Gorda, and Veterans. We own our West Central, West Shore, Port Charlotte, Punta Gorda, Veterans and Zephyrhills offices. The new West Central office in Pinellas County consists of a 3,000 square foot, single story, facility with two drive-through lanes and a drive-up ATM. Our West Shore office in Hillsborough County is a two-story, 6,200 square foot building, with four drive-through lanes and an ATM machine. The Port Charlotte office is located in a stand-alone building consisting of approximately 4,000 square feet, with one drive-through lane. We renovated a 1,509 square foot vacant commercial building for our Punta Gorda office, which has two drive-through lanes. The Veterans office, in Charlotte County, is a two-story, 7,400 square foot building with four drive-through lanes and an ATM machine. We lease the St. Petersburg, Largo, South Shore, and Dade City offices. The St. Petersburg office consists of a 7,400 square foot, single story facility, with three drive-through lanes and an ATM machine. The Largo office consists of a 2,000 square foot, single story, stand alone facility with one drive-through lane. Our South Shore office, located in Apollo Beach in Hillsborough County, is a 3,227 square feet facility with one drive-through lane. The Dade City office consists of 1,400 square feet and is located in a retail center.

We operate a 5,749 square foot operations center in Largo, Florida, which is leased.

Item 3. Legal Proceedings.

There are no pending legal proceedings to which we are a party or to which any of our properties are subject.

Item 4. Submission of Matters to a Vote of Security Holders.

No matters were submitted to a vote of security holders, through the solicitation of proxies or otherwise, during the fourth quarter of 2008.

PART II

Item 5. Market for Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

On September 4, 2003, our stock began trading on The NASDAQ SmallCap Market (currently the NASDAQ Capital Market) under the symbol "FCFL." As of March 2, 2009, there were 151 registered holders of common stock of First Community and approximately 515 street name holders. On March 15, 2005, we paid a stock dividend in common stock equal to 5% of the outstanding shares to shareholders of record as of the close of business on March 1, 2005. On January 20, 2006, a three-for-two stock split was issued to shareholders of record as of the close of business on January 10, 2006. On February 28, 2007 we paid a common stock dividend equal to 5% of our common shares outstanding to record holders as of the close of business on February 12, 2007. We did not repurchase any of our equity securities during the fourth quarter of 2008.

On March 2, 2009, the closing sales price of our common stock was \$5.04 compared to \$4.75 at December 31, 2008.

	Calendar Years			
	2008		2007

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

General

First Community Bank and First Community Lender Services, Inc. are wholly-owned subsidiaries. Our primary business activity is the operations of First Community Bank, a federally-chartered stock savings bank. First Community provides a variety of banking services to small and middle market businesses and individuals through its four banking offices located in Pinellas County, two banking offices located in Hillsborough County, two banking offices in Pasco County and three banking offices located in Charlotte County, Florida. First Community Lender Services, Inc. provides tax deferred 1031 exchange services for eligible transactions. The following is a description of the significant accounting policies that we follow in preparing and presenting our consolidated financial statements.

Critical Accounting Policies

We believe that the determination of the allowance for loan losses represents a critical accounting policy. The allowance for loan losses is maintained at a level management considers adequate to absorb loan losses inherent in the portfolio, based on evaluations of the collectability and historical loss experience of loans. Credit losses are charged and recoveries are credited to the allowance. Provisions for loan losses are based on our review of the historical loan loss experience and such factors which, in management's judgment, deserve consideration under existing economic conditions in estimating probable credit losses. The allowance is based on ongoing assessments of the estimated losses inherent in the loan portfolio. Our methodology for assessing the appropriate allowance level consists of several key elements described below.

Larger commercial loans that exhibit probable or observed credit weaknesses are subject to individual review. Where appropriate, reserves are allocated to individual loans based on our estimate of the borrower's ability to repay the loan given the availability of collateral, other sources of cash flows and available legal options. Included in the review of individual loans are those that are impaired as provided in Statement of Financial Accounting Standards No. 114, "*Accounting by Creditors for Impairment of a Loan*", as amended. Any specific reserves for impaired loans are measured based on the fair value of the underlying collateral. The collectability of both principal and interest is evaluated when assessing the need for a specific reserve. Historical loss rates are applied to other commercial loans not subject to specific reserve allocations.

Homogenous loans, such as installment and residential mortgage loans, are not individually reviewed by management. Reserves are established for each pool of loans based on the expected net charge-offs. Loss rates are based on the average net charge-off history by loan category.

Historical loss rates for commercial and consumer loans may be adjusted for significant factors that, in management's judgment, reflect the impact of any current conditions on loss recognition. Factors which management considers in the analysis include the effects of the local economy, trends in the nature and volume of loans (delinquencies, charge-offs, non-accrual and problem loans), changes in the internal lending policies and credit standards, collection practices, and examination results from bank regulatory agencies and our internal credit review function.

Specific reserves on individual loans and historical loss rates are reviewed throughout the year and adjusted as necessary based on changing borrower and collateral conditions and actual collection and charge-off experience.

During 2007, we changed our overall approach in the determination of the allowances for loan losses. A new methodology was created to be in compliance with the guidance issued by the federal agencies in December of 2006. This methodology incorporated the calculation of loans considered impaired under FAS 114 and allocations for performing portfolio categories based on applying historical charge off data for loans categorized by similar risk characteristics based on the banks experience as per FAS 5. The methodology includes an unallocated portion (qualitative factors) justified by current general market conditions, trends in performance (delinquency), economic and political trends.

Loans

We believe that general economic conditions in our primary service areas, including the real estate market, continue to be healthy due to the growth in the areas' population and demand for real estate property and personal services. Accordingly, we have experienced continued demand for consumer and commercial loans in 2008 as net loans increased \$21.3 million, or 5.6%, to \$403.9 million at December 31, 2008. Commercial loan activity is focused on seasonal working capital loans and commercial real estate term loans. At December 31, 2008, 2007 and 2006, our non accrual loans had balances of \$13,165,000, \$2,364,000, and \$150,000, respectively.

Through First Community Bank, we engage in a full complement of lending activities, including commercial, consumer/installment and real estate loans.

Table of Contents

Commercial lending activities are directed principally towards businesses whose demands for funds fall within our bank subsidiary's legal lending limits and who are potential deposit customers. Particular emphasis is placed on loans to small- and medium-sized businesses. Commercial loans consist primarily of loans made to individual, partnership or corporate borrowers, and who obtained those loans for a variety of business purposes.

Real estate loans consist of residential and commercial first mortgage loans, second mortgage financing and construction loans.

Lines of credit include home equity, commercial, and consumer lines of credit.

Consumer loans consist primarily of installment loans to individuals for personal, family and household purposes.

We have correspondent relationships with several banks, whereby we can engage in the sale and purchase of loan participations. Participations purchased, if any, are entered into using the same underwriting criteria that would be applied if we had originated the loan. This includes credit and collateral analyses and maintenance of a complete credit file on each purchased participation that is consistent with the credit files that we maintain on our customers.

Nonperforming Loans and Real Estate Owned Policy. When a borrower fails to make a required payment on a loan, our loan officers attempt to collect the payment by contacting the borrower. If a payment on a loan has not been received by the end of a grace period (usually 10 days from the payment due date), notices are sent at that time, with follow-up contacts made thereafter. In most cases, delinquencies are cured promptly. If the delinquency exceeds 29 days and is not cured through normal collection procedures, more formal measures are instituted to remedy the default, including the commencement of foreclosure proceedings. We will then attempt to negotiate with the delinquent borrower to establish a satisfactory payment schedule.

A loan is generally placed on non accrual status and ceases accruing interest when loan payment performance is deemed unsatisfactory. All loans past due 90 days, however, are placed on non-accrual status and all prior accrued interest is reversed against income. Cash payments received while a loan is in non-accrual status are recorded as a reduction of principal as long as doubt exists as to collection. If a loan is brought current it will be taken off non-accrual status.

If foreclosure is required, when completed, the property would be sold at a public auction in which we will generally participate as a bidder. If we are the successful bidder, the acquired real estate property is then included in the foreclosed real estate account until it is sold. Under federal regulations we are permitted to finance sales of foreclosed real estate by "loans to facilitate," which may involve more favorable interest rates and terms than generally would be granted under normal underwriting guidelines.

Charge-Offs Policy. All loans deemed uncollectible by management will be charged-off or written down as per the following guidelines:

Type of Loan	December 31,									
	Percent of Loans in Each Category to Total		Percent of Loans in Each Category to Total		Percent of Loans in Each Category to Total		Percent of Loans in Each Category to Total		Percent of Loans in Each Category to Total	
	Amount 2008	Loans 2008	Amount 2007	Loans 2007	Amount 2006	Loans 2006	Amount 2005	Loans 2005	Amount 2004	Loans 2004
	(Dollars in thousands)									
Residential mortgage loans	\$121,427	29.4%	\$128,426	33.0%	\$114,311	32.6%	\$ 75,585	27.3%	\$ 44,147	21.0%
Commercial real estate loans	197,716	47.8	180,304	46.5	162,973	46.5	109,995	39.8	97,849	46.9
Commercial loans	22,829	5.5	22,343	5.8	21,572	6.1	31,916	11.6	24,322	11.6

Net deferred loan fees	<u>(1,089)</u>		<u>(539)</u>		<u>(353)</u>		<u>(254)</u>		<u>(224)</u>	
Net loans	<u>\$403,855</u>		<u>\$382,551</u>		<u>\$346,788</u>		<u>\$272,534</u>		<u>\$205,789</u>	

- All open-end credits past due for more than 90 days and all unsecured closed-end credits past due for 90 days must be charged-off.

Table of Contents

- Secured non real estate loans when deemed uncollectible by management will be charged-off or written down to no more than 100% of the net liquidated collateral value of the loan as determined by management.
- Unsecured loans past due 90 days or more will be charged-off in full or written down to an amount deemed collectible by management.
- Management has the authority to charge-off loan losses and/or overdrafts up to \$10,000, when deemed uncollectible.

The following table presents various categories of loans contained in our loan portfolio and the total amount of all loans at December 31 for the years indicated.

The following is an analysis of maturities of our loans as of December 31, 2008 (in thousands):

<u>Type of Loan</u>	<u>Due in 1 Year or Less</u>	<u>Due in 1 to 5 Years</u>	<u>Due After 5 Years</u>	<u>Total</u>
Residential mortgage loans	16,428	13,095	91,904	121,427
Commercial real estate loans	61,979	73,401	62,336	197,716
Commercial loans	14,852	7,214	763	22,829
Installment loans	11,880	21,083	38,239	71,202
Total	<u>\$105,139</u>	<u>\$ 114,793</u>	<u>\$ 193,242</u>	<u>\$413,174</u>

All loans are recorded according to original terms and demand loans, overdrafts and loans having no stated repayment terms or maturity are reported as due in one year or less.

At December 31, 2008, the amount of loans due after one year with fixed interest rates totaled approximately \$95.6 million, while the amount of loans due after one year with floating interest rates totaled approximately \$189.8 million. We generally do not make fixed-rate loans with maturities longer than five years.

At December 31, 2008, 2007, 2006, 2005, and 2004 non accrual loans were as follows for the years indicated (dollars in thousands):

	<u>At December 31,</u>				
	<u>2008</u>	<u>2007</u>	<u>2006</u>	<u>2005</u>	<u>2004</u>
Residential mortgage loans	\$ 3,103	\$1,042	\$—	\$—	\$ 57
Commercial real estate loans	9,737	1,289	150	—	—
Commercial loans	74	—	—	—	—
Installment loans	251	33	—	—	23
Total non-accrual loans	<u>\$13,165</u>	<u>\$2,364</u>	<u>\$150</u>	<u>\$—</u>	<u>\$ 80</u>

At December 31, 2008, our loans that would be defined as troubled debt restructuring had a balance of \$15,850,000. For the prior years ending December 31, 2007, 2006, 2005, and 2004 there were no loans which would be defined as troubled debt restructurings. At December 31, 2008, 2007, 2006, 2005 and 2004 there were no loans which were past due ninety days or more and still accruing.

[Table of Contents](#)

An analysis of our allowance for loan losses and loan loss experience (charge-offs and recoveries) is furnished in the following table (dollars in thousands):

	Year Ended December 31,				
	2008	2007	2006	2005	2004

Provision for losses charged to operations	9,237	1,165	230	795	605
Balance at end of period	<u>\$ 8,230</u>	<u>\$ 4,479</u>	<u>\$ 3,499</u>	<u>\$3,416</u>	<u>\$ 2,640</u>

Asset Quality Ratios

Net charge-offs to average loans	1.39%	.03%	.05%	(0.01)%	(0.00)%
Allowance for loan losses to total loans	2.00	1.16	1.00	1.24	1.27
Allowance for loan losses to non performing loans	62.51	189.47	2,388.46	—	3,300.00
Non performing loans to total loans	3.19	.61	.04	—	0.04
Non performing loans to total assets	2.62	.54	.04	—	0.03

At December 31 the allowance for possible credit losses were generally allocated as follows for the years indicated (dollars in thousands):

	2008		2007		2006		2005		2004	
	Percent of Loans in Each Category to Total		Percent of Loans in Each Category to Total		Percent of Loans in Each Category to Total		Percent of Loans in Each Category to Total		Percent of Loans in Each Category to Total	
	Amount	Loans	Amount	Loans	Amount	Loans	Amount	Loans	Amount	Loans
Residential mortgage loans	\$2,812	29.4%	\$ 901	33.3%	\$ 317	32.6%	\$ 417	27.3%	\$ 238	21.2%
Commercial real estate loans	3,392	47.8	2,094	46.5	\$1,400	46.5	1,447	39.8	1,251	46.9
Commercial loans	416	5.5	244	5.8	945	6.1	819	11.6	699	11.6
Installment loans	1,610	17.3	1,240	14.4	837	14.8	733	21.3	452	20.3
Total	<u>\$8,230</u>	<u>100.0%</u>	<u>\$4,479</u>	<u>100.0%</u>	<u>\$3,499</u>	<u>100.0%</u>	<u>\$3,416</u>	<u>100.0%</u>	<u>\$2,640</u>	<u>100.0%</u>

Although the allowance for loan losses was determined by category of loans, the entire allowance is available to absorb losses from any category.

The allowance for loan losses is established based upon management's evaluation of the potential losses in our total loan portfolio. In analyzing the adequacy of the allowance for loan losses, management considers its own internal review, as well as the results of independent external credit reviews, changes in the composition and volume of the loan portfolio, levels of non-performing and charged-off loans, local and national economic conditions, and other factors.

Table of Contents

Investment Securities. We primarily invest in obligations of the United States or obligations guaranteed as to principal and interest by the United States and other taxable securities or mortgage backed obligations. The following table presents, at December 31, 2008, 2007 and 2006 the carrying value of our investments:

<u>Investment Category</u>	<u>December 31,</u>

Liquidity and Capital Resources

Liquidity Management. Liquidity management involves monitoring our sources and uses of funds in order to meet our day-to-day cash flow requirements while attempting to maximize profits. Liquidity represents the ability of a company to convert assets into cash or cash equivalents without significant loss and to raise additional funds by increasing liabilities. Liquidity management is made more complicated because different balance sheet components are subject to varying degrees of management control. For example, the timing of maturities of the investment portfolio is very predictable and subject to a high degree of control at the time investment decisions are made. However, net deposit inflows and outflows are far less predictable and are not subject to the same degree of control. Asset liquidity is provided by cash and assets which are readily marketable, can be pledged, or which will mature in the near future. Liability liquidity is provided by access to core funding sources, principally the ability to generate customer deposits in our primary markets. In addition, liability liquidity is provided through the ability to borrow against approved lines of credit including federal funds purchased from correspondent banks and from the FHLB.

Dividends. There are statutory and regulatory limitations on the payment of dividends by this subsidiary. The ability of First Community Bank to pay a dividend to us is governed by the Office of Thrift Supervision's capital distribution regulation and the United States Treasury' Troubled Asset Relief Program Capital Purchase Program. These regulations and First Community Bank's ability to pay dividends to us, is addressed in the sections entitled "Regulation and Supervision" and "Dividends."

Table of Contents

Management regularly reviews our liquidity position and has implemented internal policies that establish guidelines for sources of asset-based liquidity and limit the total amount of purchased funds used to support the balance sheet and funding from non-core sources.

Deposits and Other Sources of Funds. In addition to deposits, the sources of funds available for lending and other business purposes include loan repayments, loan sales, borrowings from the FHLB and funds received from our participation in the Capital Purchase Program. Loan repayments are a relatively stable source of funds, while deposit inflows and outflows are influenced significantly by general interest rates and money market conditions. We maintain lines of credit at Silverton Bank upon which we can draw up to \$12 million. The line of credit at Silverton Bank is secured by our common stock. There is a \$2 million balance on that line of credit as of December 31, 2008

A full range of interest bearing and non-interest bearing accounts, are offered, including business and consumer checking accounts, negotiable order of withdrawal (“NOW”) accounts, money market accounts with limited transactions, individual retirement accounts, regular interest bearing statement savings accounts and certificates of deposit with a range of maturity date options. The sources of deposits are individuals, businesses and employees of businesses within our market areas. Deposits are generally obtained through the personal solicitation of our officers and directors, direct mail solicitation and advertisements published in the local media. We pay competitive interest rates on time and savings deposits. In addition, we have implemented a service charge fee schedule competitive with other financial institutions in our market areas, covering such matters as maintenance fees on checking accounts, per item processing fees on checking accounts, returned check charges and the like.

Deposits from our primary market provide a relatively stable funding source for our loan portfolio and other earning assets. Our total deposits were \$403, \$335, and \$300, million at December 31, 2008, 2007, and 2006, respectively. Most of the \$68 million increase in deposits since December 31, 2007, was attributable to growth in time deposits reflecting the impact of the interest rate environment. The funding requirements for loans have continued to increase in 2008, from 2007 levels. Net loans have increased \$21 million during the period from December 31, 2007, to December 31, 2008. Management anticipates that a stable base of deposits combined with favorably priced advances from the Federal Home Loan Bank will be our primary source of funding to meet both our short-term and long-term liquidity needs in the future.

The following table presents, for the years ended December 31 2008, 2007, and 2006 the average amount of, and average rate paid on, each of the following deposit categories (dollars in thousands):

<u>Deposit Category</u>	<u>Average Amount</u>			<u>Average Rate Paid</u>		
	<u>2008</u>	<u>2007</u>	<u>2006</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
Non interest bearing demand	\$ 33,429	\$ 35,750	\$ 49,143	— %	— %	— %
Savings, NOW and money market deposits	130,833	113,196	103,239	1.87	2.31	2.04
Time deposits	205,375	191,858	140,104	4.07	5.09	4.41
Total	<u>\$369,637</u>	<u>\$340,804</u>	<u>\$292,486</u>	<u>3.21%</u>	<u>3.70%</u>	<u>2.83%</u>

The following table indicates the amount of outstanding time certificates of deposit of \$100,000 or more and their respective maturities as of December 31 (in thousands):

	<u>2008</u>
3 months or less	\$ 35,628,890
3-12 months	\$ 39,550,284
1-3 years	\$ 25,322,749
Over 3 years	\$ 3,926,218
Total	<u>\$104,428,141</u>

Borrowings. To date, we have relied on deposits, proceeds from sales of loans and securities, repurchase agreements, and borrowings from the Federal Home Loan Bank as our major sources of funding. As of December 31, 2008, we held repurchase agreements, which are used as sweep account for commercial customers, of approximately \$8.3 million. We will continue to rely on loan repayments, loan sales, and the sale of investment securities as additional sources of funding. In

[Table of Contents](#)

addition, in the future if there are periods when the supply of funds from deposits or other sources cannot meet our demand for loans, we have the ability to seek a portion of the needed funds through loans (advances) from the FHLB where it currently has the ability to borrow up to \$87 million. The amounts advanced under FHLB advances, the maturity date, and the weighted-average interest rate as of December 31, 2008, 2007 and 2006, are set forth in the table below (\$ in thousands):

Maturing in Year Ending December 31,	Interest Rate	At December 31,		
		2008	2007	2006
2007	5.50	—	—	17,500
2007	5.36	—	—	7,000

(2) FHLB has a call option in February 2011

(3) FHLB has a call option in October 2009

(4) FHLB has a call option in March 2009

Company Participation in the Capital Purchase Program. In December 2008, we determined that it was in our best interest to participate in the CPP subdivision of TARP. Under the program, the Treasury can purchase shares of senior preferred stock (“Preferred Stock”) and a warrant to purchase common stock (“Warrant”) of financial institutions.

On December 18, 2008, we filed with the Division of Corporations, Secretary of State of Florida an amendment to our Articles of Incorporation establishing the terms of the preferred shares. Subsequently on December 23, 2008, pursuant to the CPP, we agreed to issue and sell, and the Treasury agreed to purchase: (a) 10,685 shares (the “Preferred Shares”) of Company Fix Rate Cumulative Perpetual Preferred Stock, Series A, having a liquidation preference of \$1,000 per share, and (b) a ten-year warrant (the “Warrant”) to purchase up to 228,312 shares of Company common stock (the “Common Stock”), at an exercise price of \$7.02 per share. The issuance and sale also closed on December 23, 2008 and was exempt from registration as a private placement pursuant to Section 4(2) of the Securities Act of 1933, as amended. The purchase price for the Preferred Shares and the Warrant was \$10,685,000, or \$1,000 per Preferred Share.

Under the CPP Purchase Agreement, cumulative dividends on the Preferred Shares will accrue on the purchase price at an annual rate of 5% per year for the first five years and at an annual rate of 9% thereafter, but will be paid only if and when declared by our Board of Directors. The Preferred Shares have no maturity date and rank senior to the Common Stock (and *pari passu* with any other Company senior preferred stock, of which no shares are currently outstanding) with respect to the payment of dividends, distributions and amounts payable upon liquidation, dissolution and winding up of the Company. Subject to the approval of the Board of Governors of the Federal Reserve System, the Preferred Shares are redeemable at our option at 100% of their liquidation preference, provided that we have consulted with the OTS regarding any repurchase. Although ARRA was not specific, we believe the Treasury will require the OTS’ consent as part of such consultation to redeem the Preferred Shares.

The Treasury may not transfer any portion of the Warrant covering, or exercise the Warrant for more than one-half of, the 228,312 shares of Common Stock underlying the Warrant until the earlier of: (a) the date on which we have received aggregate gross proceeds of not less than \$1,671,250 from qualified equity offerings; and (b) December 31, 2009. In the event we complete qualified equity offerings on or prior to December 31, 2009 raising gross proceeds of at least \$1,671,250, the number of shares of Common Stock underlying the Warrant will be reduced by one-half. Pursuant to the CPP, a qualified equity offering is the sale and issuance for cash by the Company to persons other than the Company or any Company subsidiary of securities that qualify as Tier 1 capital for the Company at the time of issuance.

Average Contractual Obligations

Contractual obligations for payments under long-term debt and lease obligations are shown as follows, stratified by remaining term to contractual maturity (in thousands):

	<u>Less than 1 Year</u>	<u>1-3 Years</u>	<u>3-5 Years</u>	<u>More than 5 Years</u>	<u>Total</u>
Real estate operating leases	\$ 596	\$ 1,116	\$ 919	\$ 1,082	\$ 3,713
Certificates of Deposit	190,487	51,285	5,205	0	\$246,977
Federal home loan bank advances	1,000	10,000	6,000	21,000	\$ 38,000
Total	<u>\$192,083</u>	<u>\$62,401</u>	<u>\$12,124</u>	<u>\$ 22,082</u>	<u>\$288,690</u>

Further discussion of the nature of each obligation is included in “Note 4-Premises and Equipment, Net”, “Note 5-Deposits”, and “Note 6-Federal Home Loan Bank Advances”.

Average Balance, Interest and Average Yields and Costs

The following is an analysis of the net interest earnings for the years ended December 31, 2008, 2007, and 2006, with respect to each major category of interest-earning assets and each major category of interest-bearing liabilities.

(Table on following page)

[Table of Contents](#)

For purposes of these analyses, non-accruing loans, if any, are included in the average balances.

(1) Balances are net of deferred loan origination costs, undisbursed proceeds of construction loans in process, and include non-performing loans.

(2) Yields on securities available for sale are based on average amortized cost.

(3) Other borrowings include Federal Home Loan Bank Advances, repurchase agreements with customers and First Community's line of credit.

(4) Interest-rate spread represents the difference between the weighted-average yield on interest-earnings assets and the weighted-average cost of interest bearing liabilities.

(5) Net interest margin represents net interest income as a percentage of average interest-earning assets.

Rate/Volume Analysis

The following tables set forth certain information regarding changes in interest income and interest expense for the periods indicated. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to:

- Changes in rate (change in rate multiplied by prior volume);
- Changes in volume (change in volume multiplied by prior rate); and
- Changes in rate-volume (change in rate multiplied by change in volume).

Comparison of the Years Ended December 31, 2008 and 2007

General. We recorded a net loss of \$3.6 million for the year ended December 31, 2008 or \$(.88) earnings per basic share and \$(.88) earnings per diluted share, compared to a net income of \$2.9 million or \$0.70 earnings per basic share and \$0.67 earnings per diluted share for the year ended December 31, 2007. The \$6.5 million decrease in earnings reflected an \$8.1 million increase in provision for loan losses, which increased the loan loss reserve to \$8.2 million, or 2.0% gross loans. Net loan charge-offs were \$5.5 million for 2008, compared to \$185 thousand for 2007.

Net Interest Income. Interest income decreased to \$27.2 million during the year ended December 31, 2008, from \$28.8 million in 2007. Interest on loans for the year ended December 31, 2007 decreased to \$25.4 million from \$27.5 million for the year ended December 31, 2007. The decrease in interest on loans reflected an overall decline in market interest rates combined with the impact of an increase in nonaccrual loans. The average yield on the loan portfolio decreased to 6.25% for the year ended December 31, 2008 from an average yield of 7.59% for the year ended December 31, 2007. Interest on securities increased from \$819,000 in 2007 to \$1,400,000 in 2008. This increase reflected an improvement in the investment portfolio yield to 4.86% in 2008 from 4.65% in 2007 combined with an increase in the average balances in the portfolio to \$29.0 million for the year ended December 31, 2008 from \$17.6 million for the year ended December 31, 2007.

Table of Contents

Interest expense on interest bearing deposit accounts decreased to \$10.8 million during the year ended December 31, 2008, compared to \$12.4 million during the year ended December 31, 2007. The decrease was due to a decrease in the average rates paid on deposits to 3.21% in 2008 from 4.06% in 2007. The decrease in rates reflected the declining interest rate environment for most of the year.

Interest expense on other interest bearing liabilities increased to \$1.8 million during the year ended December 31, 2008, compared to \$1.5 million in 2007. The increase was primarily due to an increase in the average balance of such liability accounts.

Provision for loan losses. During 2007, we changed our over all approach in the determination of allowance for loan losses. A new methodology was created to be in compliance with guidance issued by the federal agencies in December 2006. This methodology incorporated the calculation of loans considered impaired under FAS 114 and allocations of performing portfolio categories based on applying historical charge off data for loans categorized by similar risk characteristics based on our experience as per FAS 5.

The provision for loan losses was \$9,237,000 for the year ended December 31, 2008, compared to \$1,165,000 for the year ended December 31, 2007. The increase in provision for loan losses reflected concerns over the declining real estate market values in Florida during a deepening recessionary period.

The allowance for loan losses was \$8.2 million at December 31, 2008, which was up from \$4.5 million at December 31, 2007 and is believed to be adequate. The provision expense increase reflected a \$5.3 million increase in net charge-offs and raising the reserve for loan losses to 2.0% of gross loans on December 31, 2008, up from 1.16% on December 31, 2007. Future adjustments to the allowance for loan losses may be necessary if there is prolonged economic weakness in our markets. We believe that our conservative underwriting policies somewhat mitigates our exposure in the troubled Florida real estate market.

Non interest Income. Non interest income increased to \$1.9 million in 2008 from \$1.8 million for the year ended December 31, 2007. The increase is primarily due to a \$411,000 increase in income from bank owned life insurance.

Non interest Expense. Total non interest expense increased to \$13.2 million for the year ended December 31, 2008, from \$11.2 million for the comparable period ended December 31, 2007. The increase in non interest expense reflects a \$905,000 increase in other expense, which includes a \$428,000 write off of goodwill and \$408,000 in other real estate expenses and write downs. Increases in FDIC premiums contributed to a \$309,000 increase in insurance premiums. Additionally, increases in employee compensation, occupancy, equipment expense, and data processing expense reflected the expansion in the branch network.

Income Taxes. Income taxes for the year ended December 31, 2008, was \$(2.4) million or compared to \$1.6 million or for the year ended December 31, 2007.

Comparison of the Years Ended December 31, 2007 and 2006

General. Our net earnings for the year ended December 31, 2007, decreased to \$2.9 million or \$0.70 earnings per basic share and \$0.67 earnings per diluted share, compared to \$3.7 million or \$0.91 earnings per basic share and \$0.85 earnings per diluted share for the year ended December 31, 2006. Net earnings decreased due to a \$935,000 increases in provision for loan losses and a \$785,000 increase in non-interest expense, which was partially offset by an increase in non-interest income and a decrease in the income tax provision due to a higher percentage of nontaxable income.

Net Interest Income. Interest income increased to \$28.8 million during the year ended December 31, 2007, from \$24.5 million in 2006. Interest on loans for the year ended December 31, 2007 increased to \$27.5 million from \$23.7 million for the year ended December 31, 2006. The increase in interest on loans was primarily due to an increase in the average balance of loans during the year ended December 31, 2007, when compared the year ended December 31, 2006. This yield on the loan portfolio of 7.59% in 2007 was only slightly higher than the 7.54% yield in 2006 reflecting a very competitive market given the overall upward trend in market interest rates for a good part of the year. Interest on securities increased to \$819,000 during the year ended December 31, 2007, from \$592,000 for the year ended December 31, 2006. The increase in interest income on securities was due primarily to an improvement in the average yield to 4.65%, from 3.90% in 2006. In addition, the average balance of securities in 2007 increased to \$17.6 million in 2007, from \$15.2 million in 2006.

Interest expense on interest bearing deposit accounts increased to \$12.4 million during the year ended December 31, 2007, compared to \$8.3 million during the year ended December 31, 2006. The increase was due to an increase in the average balance of interest bearing deposits in 2007 combined with higher rates paid on deposits due to rising interest rate environment for most of the year.

Table of Contents

Interest expense on other interest bearing liabilities increased to \$1.5 million during the year ended December 31, 2007, compared to \$1.3 million in 2006. The increase was primarily due to an increase in the average balance of such liability accounts combined with a slight increase in rates paid on borrowings.

Provision for loan losses. During 2007, we changed our over all approach in the determination of allowance for loan losses. A new methodology was created to be in compliance with guidance issued by the federal agencies in December 2006. This methodology incorporated the calculation of loans considered impaired under FAS 114 and allocations of performing portfolio categories based on applying historical charge off data for loans categorized by similar risk characteristics based on our experience as per FAS 5.

The provision for loan losses was \$1,165,000 for the year ended December 31, 2007, compared to \$230,000 for the year ended December 31, 2006. The increase in provision for loan losses reflected concerns over the declining real estate market values in Florida.

The allowance for loan losses was \$4.5 million at December 31, 2007, which was up from \$3.5 million at December 31, 2006 and is believed to be adequate. Future adjustments to the allowance for loan losses may be necessary if there is prolonged economic weakness in our markets. We believe that our conservative underwriting policies somewhat mitigates our exposure in the troubled Florida real estate market.

Non interest Income. Non interest income increased to \$1.8 million in 2007 from \$1.6 million for the year ended December 31, 2006. The increase is primarily due to a \$131,000 increase in deposit fees combined with a \$117,000 increase in income from bank owned life insurance.

Non interest Expense. Total non interest expense increased to \$11.2 million for the year ended December 31, 2007, from \$10.4 million for the comparable period ended December 31, 2006. the increase in expenses reflect the full year impact of opening the operations center and the Pasco County office in 2006 combined with the opening of two new banking offices in 2007 to position the company for growth.

Income Taxes. Income taxes for the year ended December 31, 2007, was \$1.6 million or 35.1% compared to \$2.1 million or 36.5% for the year ended December 31, 2006. The decline in the effective tax rate reflects increased tax exempt income from the municipal securities and from bank owned life insurance.

Selected Quarterly Results

Selected quarterly results of operations for the four quarters ended December 31, 2008 and 2007, are as follows. All per share amounts reflect the 5% stock dividends paid in March 15, 2005 and February 28, 2007, and the three-for-two stock split issued on January 20, 2006 (in thousands, except share amounts):

The Board of Directors and Stockholders
First Community Bank Corporation of America
Pinellas Park, Florida:

We have audited the accompanying consolidated balance sheets of First Community Bank Corporation of America and Subsidiaries (the "Company") as of December 31, 2008 and 2007, and the related consolidated statements of operations, stockholders' equity and cash flows for each of the years in the three-year period ended December 31, 2008. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2008 and 2007, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2008, in conformity with U.S. generally accepted accounting principles.

HACKER, JOHNSON & SMITH PA
Tampa, Florida

(1) Description of Business and Summary of Significant Accounting Policies

Organization. First Community Bank Corporation of America (the "Holding Company") owns all of the outstanding common stock of First Community Bank of America (the "Bank") and First Community Lender Services, Inc. ("FCLS") (collectively, the "Company"). The Holding Company's primary business activity is the operations of the Bank. The Bank is a federally-chartered stock savings bank that provides a variety of banking services to small and middle market businesses and individuals through its three banking offices located in Pinellas County, two banking offices located in Hillsborough County, one banking office in Pasco County and three banking offices located in Charlotte County, Florida. The Bank's deposits are insured, up to the applicable limits, by the Federal Deposit Insurance Corporation. FCLS provides tax deferred 1031 exchange services for eligible transactions. The following is a description of the significant accounting policies which the Company follows in preparing and presenting its consolidated financial statements.

Principles of Consolidation. The consolidated financial statements include the accounts of the Holding Company, the Bank and FCLS. All significant intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates. In preparing consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the consolidated balance sheet and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The material estimate that is particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses and the realization of deferred tax assets.

Cash and Cash Equivalents. For purposes of the consolidated statements of cash flows, cash and cash equivalents include cash and balances due from banks, interest-bearing deposits with banks and federal funds sold, all of which mature in ninety days or less.

Banks are required to maintain cash reserves in the form of vault cash or in a noninterest-earning account with the Federal Reserve Bank or in noninterest-earning accounts with other qualified banks based on the balances of their transaction deposit accounts. The Bank's reserve requirement at December 31, 2008 and 2007 was approximately \$200,000.

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(1) Description of Business and Summary of Significant Accounting Policies, Continued**

Securities. The Company may classify its securities as either trading, held to maturity or available for sale. Trading securities are held principally for resale and recorded at their fair values. Unrealized gains and losses on trading securities are included immediately in operations. Held-to-maturity securities are those which the Company has the positive intent and ability to hold to maturity and are reported at amortized cost. Available-for-sale securities consist of securities not classified as trading securities nor as held-to-maturity securities. Unrealized holding gains and losses, net of tax, on available-for-sale securities are excluded from operations and reported in accumulated other comprehensive income (loss). Gains and losses on the sale of available-for-sale securities are reported on the trade date and are determined using the specific-identification method. Premiums and discounts on securities available for sale and held to maturity are recognized in interest income using the interest method over the period to maturity.

Derivatives. The Company for the convenience of its customers enters into fixed-rate loan commitments for loans which will be sold to a secondary market investor. Simultaneously with the commitment the Company enters into a forward sales agreement with a secondary market investor. Any holding gains or losses associated with the loan commitments are offset by the holding gains or losses on the forward sales agreement.

Loans. Loans that management has the intent and ability to hold for the foreseeable future or until maturity or pay-off are reported at their outstanding principal adjusted for any charge-offs, the allowance for loan losses, and any deferred fees or costs on originated loans and unamortized premiums or discounts on purchased loans.

Loan origination fees are deferred and certain direct origination costs are capitalized. Both are recognized as an adjustment of the yield of the related loan.

The accrual of interest on loans is discontinued at the time the loan is ninety days delinquent unless the loan is well collateralized and in process of collection. In all cases, loans are placed on nonaccrual or charged-off at an earlier date if collection of principal or interest is considered doubtful.

All interest accrued but not collected for loans that are placed on nonaccrual or charged-off is reversed against interest income. The interest on these loans is accounted for on the cash-basis or cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(1) Description of Business and Summary of Significant Accounting Policies, Continued**

Loans Held for Sale. Loans originated that are intended to be sold in the secondary market are carried at the lower of cost or estimated fair value in the aggregate. Net unrealized losses are recognized through a valuation allowance by charges to operations. The Company had approximately \$0 and \$428,000 of loans held for sale at December 31, 2008 and 2007, respectively, which are included in loans on the accompanying consolidated balance sheets and the fair value of these loans exceeded book value in the aggregate.

Loan origination fees are deferred and direct loan origination costs are capitalized until the related loan is sold, at which time the net fees are included in the gain on the sale of loans in the consolidated statements of operations.

Allowance for Loan Losses. The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to operations. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is divided into two groups: (1) impaired loans, (2) all other loans. For impaired loans, the Company has determined an allowance amount to set aside which it believes is sufficient to cover any losses. Impaired loans are identified by the Loan Officer, Loan Review, Loan Committee or by the Examiners. All other loans are multiplied by an historical loss factor adjusted for economic factors, concentration of credit and portfolio composition changes.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis for commercial, commercial real estate and land, development and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

Large groups of smaller balance homogeneous loans are collectively evaluated for impairment. Accordingly, the Company does not separately identify individual installment and residential loans for impairment disclosures.

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(1) Description of Business and Summary of Significant Accounting Policies, Continued**

Foreclosed Real Estate. Real estate acquired through, or in lieu of, foreclosure, is initially recorded at the lower of fair value or the loan balance plus acquisition costs at the date of foreclosure. After foreclosure, valuations are periodically performed by management and the real estate is carried at the lower of carrying amount or fair value, less cost to sell. Revenue and expenses from operations and changes in the valuation allowance are included in operations.

Premises and Equipment. Land is stated at cost. Buildings, furniture, fixtures, equipment and leasehold improvements are carried at cost, less accumulated depreciation and amortization. Depreciation and amortization are computed using the straight-line method over the estimated useful life of each type of asset or lease term, if shorter.

Off-Balance-Sheet Financial Instruments. In the ordinary course of business, the Company has entered into off-balance-sheet financial instruments consisting of commitments to extend credit, unused lines of credit and standby letters of credit. Such financial instruments are recorded in the consolidated financial statements when they are funded.

Transfer of Financial Assets. Transfers of financial assets are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

Income Taxes. Deferred income tax assets and liabilities are recorded to reflect the tax consequences on future years of temporary differences between revenues and expenses reported for financial statement and those reported for income tax purposes. Deferred tax assets and liabilities are measured using the enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be realized or settled. Valuation allowances are provided against assets which are not likely to be realized.

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(1) Description of Business and Summary of Significant Accounting Policies, Continued**

Stock Compensation Plans. Prior to January 1, 2006, the Company's employees and directors stock option plans were accounted for under the recognition and measurement provisions of Accounting Principles Board Opinion No. 25 (Opinion 25), *Accounting for Stock Issued to Employees*, and related Interpretations, as permitted by Statement of Financial Accounting Standards ("SFAS") No. 123, *Accounting for Stock-Based Compensation* (as amended by SFAS No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure*) (collectively SFAS 123). No stock-based employee compensation cost was recognized in the Company's consolidated statements of operations through December 31, 2005, as all options granted under the plans had an exercise price equal to the market value of the underlying common stock on the date of grant. Effective January 1, 2006, the Company adopted the fair value recognition provisions of Financial Accounting Standards Board ("FASB") Statement No. 123(R), *Share-Based Payment* ("SFAS 123(R)"), using the modified-prospective-transition method. Under that transition method, compensation cost recognized in 2006 includes: (a) compensation cost for all share-based payments granted prior to, but not yet vested as of January 1, 2006, based on the grant date fair value calculated in accordance with the original provisions of SFAS 123, and (b) compensation cost for all share-based payments granted subsequent to December 31, 2005, based on the grant-date fair value estimated in accordance with the provisions of SFAS 123(R).

Fair Value Measurements. Effective January 1, 2008, the Company adopted Statement of Financial Accounting Standards ("SFAS") No. 157, *Fair Value Measurements* ("SFAS 157"). SFAS 157 defines fair value, establishes a framework for measuring fair value and enhances disclosures about fair value measurements.

SFAS 157 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. SFAS 157 also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Observable inputs such as quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities that are not active; and model-driven valuations whose inputs are observable or whose significant value drivers are observable. Valuations may be obtained from, or corroborated by, third-party pricing services.

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(1) Description of Business and Summary of Significant Accounting Policies, Continued**

Fair Value Measurements, Continued. Level 3: Unobservable inputs to measure fair value of assets and liabilities for which there is little, if any market activity at the measurement date, using reasonable inputs and assumptions based upon the best information at the time, to the extent that inputs are available without undue cost and effort.

In February 2008, the Financial Accounting Standards Board (“FASB”) issued FASB Staff Position (“FSP”) No. FAS 157-2, *Effective Date of FASB Statement No. 157*. This FSP delays the effective date of FAS 157 for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value on a recurring basis (at least annually) to fiscal years beginning after November 15, 2008. The impact of adoption had no effect on the Company.

In October 2008, the FASB issued FASB Staff Position No. 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*. This FASB Staff Position clarifies the application of SFAS 157, in determining the fair value of a financial asset when the market for that financial asset is not active. This FASB Staff Position was effective upon issuance.

The following describes valuation methodologies used for assets and liabilities measured at fair value:

Securities Available for Sale. Where quoted prices are available in an active market, securities are classified within level 1 of the valuation hierarchy. Level 1 securities include highly liquid government bonds, certain mortgage products and exchange-traded equities. If quoted market prices are not available, then fair values are estimated by using pricing models, quoted prices of securities with similar characteristics, or discounted cash flows. Examples of such instruments, which would generally be classified within level 2 of the valuation hierarchy, include certain collateralized mortgage and debt obligations and certain high-yield debt securities. In certain cases where there is limited activity or less transparency around inputs to the valuation, securities are classified within level 3 of the valuation hierarchy. Securities classified within level 3 include certain residual interests in securitizations and other less liquid securities.

Impaired Loans. Estimates of fair value are determined based on a variety of information, including the use of available appraisals, estimates of market value by licensed appraisers or local real estate brokers and the knowledge and experience of the Company’s management related to values of properties in the Company’s market areas. Management takes into consideration the type, location and occupancy of the property as well as current economic conditions in the area the property is located in assessing estimates of fair value. Accordingly, fair value estimates for impaired loans are classified as Level 3.

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(1) Description of Business and Summary of Significant Accounting Policies, Continued**

Fair Values of Financial Instruments. The following methods and assumptions were used by the Company in estimating fair values of financial instruments:

Cash and Cash Equivalents. The carrying amounts of cash and cash equivalents approximate their fair value.

Other Interest-Bearing Deposits with Banks. The carrying value of other interest-bearing deposits with bank approximates their fair value.

Securities. Fair values for securities are based on the framework for measuring fair value established by SFAS 157.

Loans. For variable-rate loans that reprice frequently and have no significant change in credit risk, fair values are based on carrying values. Fair values for certain fixed-rate mortgage (e.g. one-to-four family residential), commercial real estate and commercial loans are estimated using discounted cash flow analysis, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. Fair value for nonperforming loans is based on the framework for measuring fair value established by SFAS 157.

Federal Home Loan Bank Stock. The carrying amount of the Federal Home Loan Bank stock approximates its fair value.

Accrued Interest Receivable. The carrying amount of accrued interest receivable approximates its fair value.

Deposits. The fair values disclosed for demand deposits, savings, money-market and NOW accounts are, by definition, equal to the amount payable on demand at the reporting date (that is, their carrying amounts). Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities of time deposits.

Federal Funds Purchased. The carrying amount of federal funds purchased approximates fair value.

Borrowed Funds. The carrying amounts of other borrowings approximate their fair values. Fair values of advances from the Federal Home Loan Bank are estimated using discounted cash flow analysis based on the Company's current incremental borrowing rates for similar types of borrowings.

Off-Balance-Sheet Instruments. Fair values for off-balance-sheet lending commitments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing.

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(1) Description of Business and Summary of Significant Accounting Policies, Continued**

Comprehensive Income (Loss). Accounting principles generally require that recognized revenue, expenses, gains and losses be included in net operations. Although certain changes in assets and liabilities, such as unrealized gains and losses on available-for-sale securities, are reported as a separate component of the equity section of the consolidated balance sheet, such items along with net operations, are components of comprehensive income (loss).

(Loss) Earnings Per Share. Basic (loss) earnings per share is computed on the basis of the weighted-average number of common shares outstanding. Diluted (loss) earnings per share is computed based on the weighted-average number of shares outstanding plus the effect of outstanding stock options and warrants, computed using the treasury stock method. All per share information has been restated to reflect the three-for-two stock split declared in December, 2005 and the 5% stock dividend declared in January, 2007 and paid in February, 2007. In 2008, outstanding stock options and warrants are excluded from the calculation because the Company's net loss position makes their effect anti-dilutive.

Recent Accounting Pronouncements. In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations* ("SFAS 141(R)"). SFAS 141(R) is effective for fiscal years beginning after December 15, 2008 and early implementation is not permitted. SFAS 141(R) requires the acquiring entity in a business combination to recognize all (and only) the assets acquired and liabilities assumed in the transaction; establishes the acquisition date fair value as the measurement objective for all assets acquired and liabilities assumed; and requires the acquirer to disclose to investors and other users all of the information they need to evaluate and understand the nature and financial effect of the business combination. Acquisition related costs including finder's fees, advisory, legal, accounting valuation and other professional and consulting fees are required to be expensed as incurred. Management is in the process of evaluating the impact of SFAS 141(R) and does not anticipate it will have a material impact on the Company's financial condition or results of operations.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements* ("SFAS 160"). SFAS 160 provides the Company to establish accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS 160 is effective for the Company's financial statements for the year and interim periods within the year beginning January 1, 2009. The adoption of SFAS 160 had no effect on the Company.

On February 20, 2008, the FASB issued FSP No. FAS 140-3, *Accounting for Transfers of Financial Assets and Repurchase Financing Transactions* ("FSP 140-3"). FSP 140-3 requires that an initial transfer of a financial asset and a repurchase financing that was entered into contemporaneously with, or in contemplation of, the initial transfer be evaluated together as a linked transaction under SFAS 140, unless certain criteria are met. FSP 140-3 is effective for the Company's financial statements for the year beginning January 1, 2009. The adoption of FSP 140-3 had no effect on the Company's consolidated financial statements.

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(1) Description of Business and Summary of Significant Accounting Policies, Continued**

Recent Accounting Pronouncements, Continued. In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities* ("SFAS 161"). This standard requires enhanced disclosures regarding derivative instruments and hedging activities so as to enable investors to better understand their effects on an entity's financial position, financial performance, and cash flows. SFAS No. 161 is effective for the Company's financial statements for the year and interim periods within the year beginning January 1, 2009. The adoption of SFAS 161 had no effect on the Company.

In May 2008, the FASB issued SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles* ("SFAS 162"). This statement identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements that are presented in conformity with generally accepted accounting principles ("GAAP") in the United States. This Statement was effective in December 2008. The adoption of SFAS 162 had no effect on the Company's consolidated financial statements.

Reclassifications. Certain amounts in the 2007 and 2006 consolidated financial statements have been reclassified to conform to the 2008 presentation.

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(2) Securities**

Securities have been classified according to management's intent. The carrying amounts of securities and their fair value were as follows (in thousands):

	<u>Amortized Cost</u>	<u>Gross Unrealized Gains</u>	<u>Gross Unrealized Losses</u>	<u>Fair Value</u>
Available for Sale:				
<i>At December 31, 2008:</i>				
U.S. government agency securities	\$ 2,498	48	—	2,546
Mortgage-backed securities	<u>22,111</u>	<u>624</u>	<u>(54)</u>	<u>22,681</u>
	<u>\$ 24,609</u>	<u>672</u>	<u>(54)</u>	<u>25,227</u>
<i>At December 31, 2007:</i>				
U.S. government agency securities	4,197	76	—	4,273
Mortgage-backed securities	<u>2,539</u>	<u>36</u>	<u>(1)</u>	<u>2,574</u>
	<u>\$ 6,736</u>	<u>112</u>	<u>(1)</u>	<u>6,847</u>
Held to Maturity:				
<i>At December 31, 2008:</i>				
U.S. government agency securities	500	1	—	501
Mortgage-backed securities	779	2	(29)	752
Municipal securities	<u>7,017</u>	<u>—</u>	<u>(489)</u>	<u>6,528</u>
	<u>\$ 8,296</u>	<u>3</u>	<u>(518)</u>	<u>7,781</u>
<i>At December 31, 2007:</i>				
U.S. government agency securities	2,156	11	—	2,167
Mortgage-backed securities	1,156	—	(6)	1,150
Municipal securities	<u>7,018</u>	<u>—</u>	<u>(157)</u>	<u>6,861</u>
	<u>\$ 10,330</u>	<u>11</u>	<u>(163)</u>	<u>10,178</u>

Available-for-sale securities at December 31, 2008 measured at fair value on a recurring basis are summarized below (in thousands):

	<u>Fair Value Measurements Using</u>			
	<u>Fair Value</u>	<u>Quoted Prices In Active Markets for Identical Assets (Level 1)</u>	<u>Significant Other Observable Inputs (Level 2)</u>	<u>Significant Unobservable Inputs (Level 3)</u>
Available for sale	<u>\$25,227</u>	<u>—</u>	<u>25,227</u>	<u>—</u>

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(2) Securities, Continued**

The scheduled maturities of securities at December 31, 2008 were as follows (in thousands):

	<u>Available for Sale</u>		<u>Held to Maturity</u>	
	<u>Amortized Cost</u>	<u>Fair Value</u>	<u>Amortized Cost</u>	<u>Fair Value</u>
Less than one year	\$ 498	504	—	—
Five to ten years	1,500	1,540	1,249	1,208
After ten years	500	502	6,268	5,820
Mortgage-backed securities	22,111	22,681	779	753
	<u>\$ 24,609</u>	<u>25,227</u>	<u>8,296</u>	<u>7,781</u>

There were no sales of securities in 2008, 2007 or 2006.

Securities with gross unrealized losses at December 31, 2008, aggregated by investment category and length of time that individual securities have been in a continuous loss position, is as follows (in thousands):

	<u>Less Than Twelve Months</u>		<u>Over Twelve Months</u>	
	<u>Gross Unrealized Losses</u>	<u>Fair Value</u>	<u>Gross Unrealized Losses</u>	<u>Fair Value</u>
<i>Securities Available for Sale:</i>				
Mortgage-backed securities	<u>\$ (46)</u>	<u>5,936</u>	<u>(8)</u>	<u>167</u>
<i>Securities Held to Maturity:</i>				
Mortgage-backed securities	(14)	243	(15)	227
Municipal securities	(438)	6,050	(51)	478
Total securities held to maturity	<u>\$ (452)</u>	<u>6,293</u>	<u>(66)</u>	<u>705</u>

Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value.

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(2) Securities, Continued**

The unrealized losses on twenty-five investment securities were caused by interest rate changes. It is expected that the securities would not be settled at a price less than the par value of the investments. Because the decline in fair value is attributable to changes in interest rates and not credit quality, and because the Company has the ability and intent to hold these investments until a market price recovery or maturity, these investments are not considered other-than-temporarily impaired.

As of December 31, 2008 and 2007, securities with a carrying value of \$24,807,000 and \$13,574,000, respectively, were pledged for repurchase agreements with customers and for various purposes required or permitted by law.

(3) Loans

The components of loans are summarized as follows (in thousands):

	At December 31,	
	2008	2007
Residential mortgage loans	\$116,759	113,887
Commercial real estate loans	147,827	123,206
Land loans	23,754	23,344
Developed lot loans	16,753	23,495
Construction loans	14,050	24,798
Commercial loans	22,829	22,343
Installment loans	<u>71,202</u>	<u>56,496</u>
Total loans	413,174	387,569
Deduct:		
Allowance for loan losses	(8,230)	(4,479)
Net deferred loan fees	<u>(1,089)</u>	<u>(539)</u>
Loans, net	<u>\$403,855</u>	<u>382,551</u>

An analysis of the change in the allowance for loan losses follows (in thousands):

	Year Ended December 31,		
	2008	2007	2006
Balance at beginning of year	\$ 4,479	3,499	3,416
Provision for loan losses	9,237	1,165	230
(Charge-offs) net of recoveries	<u>(5,486)</u>	<u>(185)</u>	<u>(147)</u>
Balance at end of year	<u>\$ 8,230</u>	<u>4,479</u>	<u>3,499</u>

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(3) Loans, Continued**

The following summarizes the amount of collateral dependent impaired loans (in thousands):

	Year Ended December 31,	
	2008	2007
Gross loans with no related allowance for loan losses	\$25,775	4,357
Gross loans with related allowance for loan losses	164	2,106
Total related allowance for loan losses	<u>(95)</u>	<u>(306)</u>
Net investment in impaired loans	<u>\$25,844</u>	<u>6,157</u>

	Year Ended December 31,	
	2008	2007
Average net investment in impaired loans	<u>\$11,457</u>	<u>2,855</u>
Interest income recognized on impaired loans	<u>\$ 144</u>	<u>210</u>
Interest income received on impaired loans	<u>\$ 144</u>	<u>210</u>

Nonaccrual and past due loans were as follows (in thousands):

	At December 31,	
	2008	2007
Nonaccrual loans	\$13,165	2,364
Past due ninety days or more, still accruing	—	—
	<u>\$13,165</u>	<u>2,364</u>

Impaired collateral-dependent loans are carried at the lower of cost or fair value. At December 31, 2008, those impaired collateral-dependent loans which are measured at fair value or a nonrecurring basis are as follows (in thousands):

<u>Fair Value⁽¹⁾</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total Losses</u>	<u>Losses Recorded in Operations</u>
\$ 4,754	—	—	4,754	2,038	2,038

⁽¹⁾ In addition, loans with a carrying value of \$21,090 were measured for impairment using Level 3 inputs and had a fair value in excess of carrying value.

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(3) Loans, Continued**

Credit Risk and Credit Losses. A credit risk concentration results when the Bank has a significant credit exposure to an individual or a group engaged in similar activities or having similar economic characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions.

Most of the Company's lending activity is with borrowers located within Charlotte, Pinellas, Pasco and Hillsborough Counties, Florida. Therefore, the Company's exposure to credit risk is significantly affected by changes in the economy and real estate markets in those counties.

At December 31, 2008, the construction loans included \$2.3 million to individuals. The remaining construction loans included \$7.1 million in commercial properties and \$4.7 million in residential builder lines. The Bank believes that it has no significant exposure to any individual builder.

A majority of the Bank's loan activity is with customers located in our four markets, St. Petersburg/Clearwater, Tampa, Dade City and Port Charlotte/Punta Gorda. The customer base is comprised of individuals, professionals and small to middle market sized companies. Loans are underwritten primarily on the borrower's ability to repay the loan through personal cash flow, cash flow generated from the business, income producing real estate or the specific sale of an asset. Collateral and the amount to be obtained are determined through an analysis of the specific transaction and the source of repayment and related risk assessment. Collateral types are accounts receivable, inventory, equipment, commercial and residential real estate. The real estate utilized in commercial transactions is predominantly owner occupied industrial or income producing properties such as apartments, office, warehouse and some retail. The Bank's exposure in commercial real estate is over 65% owner occupied and the source of repayment is cash flow from the Company's operations. The remaining 35% of commercial real estate is income producing properties dependent on tenants. The Bank's residential mortgage loans are comprised of 1-4 family homes and condominiums, 84% of which are primary residences and 16% are for investment.

The Bank has no major concentration in acquisition and development or builder lines. The Bank currently has two acquisition and development loans with 35 lots totaling \$1.7million, two primary builder relationships totaling \$3.2 million. The builders are located in the St. Petersburg/Clearwater area and the inventory is six speculative lots and fourteen model homes/townhouse units and the source of repayment is sale of the asset. The Banks raw land (commercial and residential) and developed commercial land loans totals \$23.8 million to eighty-seven borrowers a majority of which was underwritten based on the cash flow of the borrower or guarantors to support the loan. The Bank has \$16.8 million in developed residential lots to 139 borrowers mostly underwritten with the borrower's personal cash flow as the primary source of repayment. Within this number are several small builders who maintain minimal lot inventory. The bank has minimal exposure in speculative single family homes as most loans are underwritten based on the borrowers ability to cash flow the loan in the event it must be termed out on a permanent basis.

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(3) Loans, Continued**

The Bank also has over \$15 million in manufactured housing loans in numerous parks through out the four market areas. These loans would be in rental parks, cooperative owned parks and subdivision parks. The Bank perfects its interest in the title and the cooperative share or real estate if applicable.

(4) Premises and Equipment, Net

Premises and equipment are summarized as follows (in thousands):

	<u>At December 31,</u>	
	<u>2008</u>	<u>2007</u>
Land	\$ 5,148	5,323
Buildings	6,715	4,875
Furniture, fixtures and equipment	2,901	2,764
Leasehold improvements	<u>550</u>	<u>546</u>
Total, at cost	15,314	13,508
Less accumulated depreciation and amortization	<u>(2,411)</u>	<u>(2,022)</u>
	<u>\$12,903</u>	<u>11,486</u>

The Company leases four branch offices and an operations center. The leases have initial terms ranging from two to ten years. Three of the leases contain escalation clauses and renewal options.

The Bank sold its office properties in St. Petersburg and Pinellas Park, Florida on May 17, 2006, and simultaneously leased both properties with favorable long-term leases. An immediate gain of approximately \$225,000 was recognized on one of the properties because of the excess gain over the present value of the lease payments. The remaining gain of approximately \$2.6 million was deferred and is being amortized using the straight-line method over the ten year lease term. The lease expense is being straight-lined over the ten year lease life due to yearly 2% annual increases.

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(4) Premises and Equipment, Net, Continued**

Rent expense under the operating leases, net of related deferred gain amortization, was approximately \$403,000, \$412,000 and \$278,000 for the years ended December 31, 2008, 2007 and 2006, respectively. Future minimum rental commitments at December 31, 2008 under these operating leases are as follows (in thousands):

<u>Year Ending December 31,</u>	<u>Amount</u>
2009	\$ 596
2010	571
2011	545
2012	470
2013	449
Thereafter	<u>1,082</u>
Total	<u>\$3,713</u>

During 2008, the Company opened one new banking office in Pasco County, Florida. This office is located in Zephyrhills and is a one-story, 3,200 square foot building. In February of 2009, the Company opened one new banking office in Pinellas County, Florida. This office is located in St. Petersburg and is a one-story, 3,074 square foot building.

(5) Deposits

The aggregate amount of time deposits of \$100,000 or more was \$104.4 million and \$74.2 million at December 31, 2008 and 2007, respectively.

At December 31, 2008, scheduled maturities of time deposits are as follows (in thousands):

<u>Year Ending December 31,</u>	<u>Amount</u>
2009	\$190,487
2010	41,330
2011	9,955
2012	2,532
2013	<u>2,673</u>
Total	<u>\$246,977</u>

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(6) Federal Home Loan Bank Advances**

A summary of the Company's Federal Home Loan Bank of Atlanta ("FHLB") advances by maturity follows (\$ in thousands):

Maturing in Year Ending December 31,	Interest Rate	At December 31,	
		2008	2007
2008	4.64%	\$ —	8,000
2008	4.45	—	3,000
2008	4.14	—	2,000
2009	3.71	1,000	1,000
2010	3.75 ⁽¹⁾	5,000	5,000
2011	5.40	5,000	5,000
2012	4.06	5,000	5,000
2013	2.30 ⁽⁴⁾	1,000	—
2015	2.76 ⁽³⁾	5,000	—
2015	2.92 ⁽³⁾	5,000	—

2017	2.92 ⁽⁴⁾	6,000	6,000
		<u>\$38,000</u>	<u>40,000</u>

(1) FHLB has a call option in December 2009 and quarterly thereafter

(2) FHLB has a call option in October 2009 and quarterly thereafter

(3) FHLB has a call option in February 2011 and quarterly thereafter

(4) FHLB has a call option in March 2009 and quarterly thereafter

The Company has entered into a collateral agreement with the FHLB. These advances are collateralized by all of the Company's FHLB stock and a blanket floating lien on all qualified 1-4 family mortgage loans.

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(7) Other Borrowings**

The Bank enters into repurchase agreements with customers. These agreements require the Bank to pledge securities as collateral for borrowings under these agreements. At December 31, 2008 and 2007, the outstanding balance of such borrowings totaled \$8,325,000 and \$9,613,000, respectively and the Bank pledged securities with a carrying value of \$13,522,000 and \$13,574,000, respectively as collateral for these agreements. The Holding Company has a \$12 million line of credit with a correspondent bank. At December 31, 2008, \$2 million was outstanding on this line. All of the Bank's common stock is pledged as collateral for this line.

(8) Income Taxes

Income taxes (benefit) consisted of the following (in thousands):

	<u>Year Ended December 31,</u>		
	<u>2008</u>	<u>2007</u>	<u>2006</u>
Current:			
Federal	\$(1,188)	1,844	1,963
State	<u>—</u>	<u>329</u>	<u>341</u>
Total current	<u>(1,188)</u>	<u>2,173</u>	<u>2,304</u>
Deferred:

State	<u>(310)</u>	<u>(91)</u>	<u>(29)</u>
Total deferred	<u>(1,207)</u>	<u>(621)</u>	<u>(202)</u>
Total income taxes (benefit)	<u><u>\$(2,395)</u></u>	<u><u>1,552</u></u>	<u><u>2,102</u></u>

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(8) Income Taxes, Continued**

The reasons for the differences between the statutory Federal income tax rate and the effective tax rate are summarized as follows (\$ in thousands):

	Year Ended December 31,					
	2008		2007		2006	
	<u>Amount</u>	<u>% of Loss</u>	<u>Amount</u>	<u>% of Earnings</u>	<u>Amount</u>	<u>% of Earnings</u>
Income taxes (benefit) at statutory rate	\$(2,050)	(34.0)%	\$1,502	34.0%	\$1,956	34.0%
Increase (decrease) in taxes resulting from:						
State taxes, net of Federal benefit	(205)	(3.4)	157	3.6	206	3.6
Tax exempt interest	(96)	(1.6)	(96)	(2.2)	(38)	(.7)
Other	(44)	(.7)	(11)	(.3)	(22)	(.4)
Income taxes (benefit)	<u>\$(2,395)</u>	<u>(39.7)%</u>	<u>\$1,552</u>	<u>35.1%</u>	<u>\$2,102</u>	<u>36.5%</u>

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and liabilities are presented below (in thousands):

	<u>At December 31,</u>	
	<u>2008</u>	<u>2007</u>
Deferred tax assets:		
Allowance for loan losses	\$2,511	1,598
Deferred loan fees	472	407
Deferred compensation	499	421
Net operating loss carryforward	98	—
Premises and equipment	10	16
Other	117	59
Total deferred tax assets	<u>3,707</u>	<u>2,501</u>
Deferred tax liability-		
Deferred loan costs	<u>(206)</u>	<u>(207)</u>
Net deferred tax asset	<u>\$3,501</u>	<u>2,294</u>

At December 31, 2008 the Company had a Florida net operating loss carryforward of approximately \$2.7 million available to offset future taxable income. This carryforward will expire in 2028.

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(9) Sale of Preferred Stock and Common Stock Warrants to United States Treasury**

On December 23, 2008, the Company issued and sold to the United States Department of the Treasury (the "Treasury") 10,685 shares of its Fixed-Rate Cumulative Perpetual Preferred Stock, Series A (the "Preferred Shares"), along with a ten year warrant (the "Warrant") to purchase at any time up to 228,312 shares of the Company's Class A common stock for \$7.02 per share, for a total cash investment of \$1,603,000 from the Treasury (the "Transaction"). The Transaction was completed pursuant to, and is governed by, the U.S. Treasury's Capital Purchase Program (the "CPP"), which is designed to attract broad participation by healthy institutions, to stabilize the financial system, and to increase lending for the benefit of the U.S. economy.

The Transaction proceeds of \$10,685,000 were allocated between the Preferred Shares and Warrant based on the ratio of the estimated fair value of the Warrant to the aggregate estimated fair value of both the Preferred Shares and the Warrant. The value of the Warrant was computed to be \$25,000 using the Black Scholes model with the following inputs: expected dividend yield of 0%; expected stock volatility of 9%, risk-free interest rate of 2.25% and expected life of 5 years. The value of the Preferred Shares was computed to be \$8.0 million based on the net present value of the expected cash flows over five years using a discount rate of 12%, which represents what management believes to be its incremental borrowing rate for a similar transaction in the private sector. The allocation of the \$10,685,000 of proceeds to the Warrant was recorded as a "preferred stock discount" against the Preferred Shares, with a corresponding and equal entry to additional paid in common equity in the amount of \$33,000, computed as follows (\$25,000 divided by the sum of (\$25,000 plus \$7,987,637) multiplied by \$10,685,000. This discount is being amortized over five years on a straight-line basis and reduces earnings available to common shareholders.

The Preferred Shares carry a 5% per year cumulative preferred dividend rate, payable quarterly. The dividend rate increases to 9% after five years. Dividends compound if they accrue and are not paid and they reduce earnings available to common shareholders. The Preferred Shares have a liquidation preference of \$1,000 per share, plus accrued unpaid dividends. During the first three years after the Transaction, the Company may not redeem the Preferred Shares except in conjunction with a qualified equity offering meeting certain requirements. The Company may redeem the Preferred Shares, plus accrued unpaid dividends, in whole or in part, subject to the approval of the Company's primary federal banking regulator. While the Preferred Shares are outstanding, certain restrictions apply to the Company, including, among others those that are discussed below.

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(9) Sale of Preferred Stock and Common Stock Warrants to United States Treasury, Continued**

The Preferred Shares have a senior rank and the Company cannot issue other preferred stock senior to the Preferred Shares. Until December 23, 2012, unless the Preferred Shares have been redeemed in whole or the Treasury has transferred all of the shares to a nonaffiliated third party, the Company may not increase its common stock cash dividend or repurchase common stock or other equity shares (subject to certain limited exceptions) without the Treasury's approval. The Company would not be able to pay a cash common dividend in the future if a Preferred Share dividend were missed. Dividends on common stock could be resumed only if all Preferred Share dividends in arrears were paid. Similar restrictions apply to the Company's ability to repurchase common stock if Preferred Share dividends are missed. Failure to pay the Preferred Share dividend is not an event of default. However, a failure to pay a total of six Preferred Share dividends, whether or not consecutive, gives the holders of the Preferred Shares the right to elect two directors to the Company's board of directors. That right would continue until the Company pays all dividends in arrears.

Senior Executive Officers' of the Company and its subsidiaries have agreed to limit certain compensation, bonus, incentive and other benefits plans, arrangements, and policies with respect to them during the period that the Treasury owns any debt or equity securities acquired in connection with the Transaction. Among other things, no executive compensation in excess of \$500,000 per annum can be deducted for tax purposes. The Preferred Shares generally are nonvoting, other than in connection with proposals to issue preferred stock senior to the Preferred Shares, certain merger transactions, amendments to the rights of the holder of the Preferred Shares, and other than in connection with the board representation rights mentioned above, or as required by Delaware State law.

The Warrant is exercisable immediately and expires on December 23, 2018. The Warrant has anti-dilution protections and certain other protections for the holder, as well as potential registration rights upon written request from the Treasury. If requested by the Treasury, the Warrant (and the underlying common stock) may need to be listed on a national securities exchange. The Treasury has agreed not to exercise voting rights with respect to common shares it may acquire upon exercise of the Warrant. The number of common shares covered by the Warrant may be reduced by up to one-half if the Company completes an equity offering meeting certain requirements by December 31, 2009. If the Preferred shares are redeemed in whole, the Company has the right to purchase any common shares held by the Treasury at their fair market value at that time.

(10) Profit Sharing Plan

The Company sponsors a 401(k) profit sharing plan which is available to all employees electing to participate after meeting certain length-of-service requirements. The Company contributed \$147,000, \$162,000 and \$118,000 to the plan during the years ended December 31, 2008, 2007 and 2006, respectively.

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(11) Salary Continuation Agreement**

The Company established a Salary Continuation Agreement (the "Agreement") with the President and Chief Executive Officer of the Company which requires the Company to provide salary continuation benefits to him upon retirement. The Agreement requires the Company to pay monthly benefits following normal retirement age. The Agreement also provides for salary continuation in the event of a change in control of the Company and for early voluntary termination. The Company is accruing the present value of the future benefits over the term of the Agreement. The Company expensed \$148,000, \$152,000 and \$148,000 under the Agreement in 2008, 2007 and 2006, respectively.

(12) Stock Dividends and Stock Splits

On December 19, 2005, a three-for-two stock split was declared by the Company for shareholders of record as of January 10, 2006, which was paid on January 20, 2006. Also, the par value of the common stock was decreased from \$.08 per share to \$.05 per share. In January, 2007, the Company declared a 5% stock dividend to shareholders of record on February 12, 2007 which was paid on February 28, 2007.

(13) Regulatory Matters

Banking regulations place certain restrictions on dividends and loans or advances made by the Bank to the Holding Company.

The Bank is subject to various regulatory capital requirements administered by the regulatory banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(13) Regulatory Matters, Continued**

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and percentages (set forth in the following table) of total and Tier 1 capital (as defined in the regulations) to risk-weighted assets (as defined) and of Tier 1 capital (as defined) to average assets (as defined). Management believes, as of December 31, 2008, the Bank met all capital adequacy requirements to which they are subject.

As of December 31, 2008, the most recent notification from the regulatory authorities categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, an institution must maintain minimum total risk-based, Tier I risk-based, and Tier I leverage percentages as set forth in the following tables. There are no conditions or events since that notification that management believes have changed the Bank's category. The Bank's actual capital amounts and percentages are also presented in the table (dollars in thousands).

	<u>Actual</u>		<u>For Capital Adequacy Purposes</u>		<u>Minimum To Be Well Capitalized Under Prompt Corrective Action Provisions</u>	
	<u>Amount</u>	<u>%</u>	<u>Amount</u>	<u>%</u>	<u>Amount</u>	<u>%</u>
<i>As of December 31, 2008:</i>						
Total Capital to Risk-Weighted Assets	\$41,279	11.07%	\$ 29,823	8.00%	\$37,279	10.00%
Tier I Capital to Risk-Weighted Assets	36,576	9.81	14,912	4.00	22,368	6.00
Tier I Capital (to Total Assets)	36,576	7.27	20,114	4.00	25,142	5.00
<i>As of December 31, 2007:</i>						
Total Capital to Risk-Weighted Assets	37,684	11.23	26,849	8.00	33,561	10.00
Tier I Capital to Risk-Weighted Assets	33,625	10.02	13,424	4.00	20,136	6.00
Tier I Capital (to Total Assets)	33,625	7.71	17,449	4.00	21,811	5.00

(14) Related Parties

The aggregate amount of loans owed to the Company by its officers and directors at December 31, 2008 and 2007 was \$508,000 and \$623,000, respectively. During 2008, total principal additions were \$322,000 and total principal payments were \$437,000.

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(15) Off-Balance-Sheet Financial Instruments**

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments are commitments to extend credit, unused lines of credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest-rate risk in excess of the amount recognized in the consolidated balance sheet. The contract amounts of these instruments reflect the extent of involvement the Company has in these financial instruments.

The Company's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit, unused lines of credit and standby letters of credit is represented by the contractual amount of those instruments. The Company uses the same credit policies in making commitments as it does for on-balance-sheet instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's credit worthiness on a case-by-case basis. The amount of collateral obtained if deemed necessary by the Company upon extension of credit is based on management's credit evaluation of the counterparty.

Standby letters of credit are conditional lending commitments issued by the Company to guarantee the performance of a customer to a third party and to support public and private borrowing arrangements. Essentially all letters of credit issued have expiration dates within one year. The credit risk involved in issuing letters-of-credit is essentially the same as that involved in extending loan facilities to customers. The Company may hold collateral supporting these commitments, and at December 31, 2008 such collateral amounted to \$14,675,000.

A summary of the notional amounts of the Company's financial instruments, with off-balance sheet risk at December 31, 2008, follows (in thousands):

	<u>Contract Amount</u>
Commitments to extend credit	<u>\$22,669</u>
Unused lines of credit	<u>\$35,430</u>
Standby letters of credit	<u>\$ 1,886</u>

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(16) Fair Value of Financial Instruments**

The estimated fair values of the Company's financial instruments were as follows (in thousands):

	<u>At December 31, 2008</u>		<u>At December 31, 2007</u>	
	<u>Carrying Amount</u>	<u>Fair Value</u>	<u>Carrying Amount</u>	<u>Fair Value</u>

Other borrowings	10,325	10,325	9,613	9,613
Off-Balance Sheet Financial Instruments	—	—	—	—

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(17) Share-Based Compensation**

The Company has three stock option plans for directors and employees of the Company. Under the first two plans, the total number of options which may be granted to purchase common stock is 620,156 (amended) for directors and 516,797 (amended) for employees. At December 31, 2008, no options remain available for grant under the directors' plan and 28,739 options remain available for grant under the employees' plan. The third plan has 236,250 (amended) options available to either employees or directors and 15,750 remain available for grant as of December 31, 2008. The directors' options vest immediately and have a life of five years. The employees' options vest over periods up to four years and have terms up to ten years. All options and share prices have been adjusted to reflect the three-for-two stock split declared in December 2005 and the 5% stock dividend declared in January 2007 and paid in February 2007:

	Number of Shares	Weighted Average Per Share Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value
Options outstanding at December 31, 2006	715,141	\$ 10.28		
Options granted	22,350	17.78		
Options exercised	(49,409)	5.92		
Options forfeited	<u>(2,361)</u>	16.31		
Options outstanding at December 31, 2007	685,721	10.71		
Options granted	27,838	7.85		
Options exercised	(35,141)	4.84		
Options forfeited	<u>(16,537)</u>	20.31		
Options outstanding at December 31, 2008	<u>661,881</u>	<u>\$ 10.79</u>	<u>2.9 years</u>	<u>\$ —</u>
Options exercisable at December 31, 2008	<u>637,751</u>	<u>\$ 10.57</u>	<u>3.2 years</u>	<u>\$ —</u>

The Company accelerated the vesting of all unvested options in 2005, primarily to reduce noncash compensation expense that would have been recorded in its consolidated statements of earnings in future years due to the adoption of SFAS No. 123(R) in January 2006. In accordance with SFAS 123, in 2005 the Company expensed the remaining unrecognized compensation cost associated with these options in the proforma disclosure.

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(17) Share-Based Compensation, Continued**

The total intrinsic value of options exercised during the years ended December 31, 2008, 2007 and 2006 was \$222,000, \$645,000 and \$1,064,000, respectively. At December 31, 2008, there was \$76,000 of total unrecognized compensation expense related to nonvested share-based compensation arrangements granted under the plans. The cost is expected to be recognized over a weighted-average period of thirty-three months. The total fair value of shares vesting and recognized as compensation expense was \$41,000, \$57,000 and \$22,000 for the years ended December 31, 2008, 2007 and 2006, respectively.

The fair value of each option granted is estimated on the date of grant using the Black-Scholes option-pricing model with the following assumptions:

	Year Ended December 31,		
	2008	2007	2006
Risk-free interest rate	2.25-2.72%	4.28%	4.94%
Expected dividend yield	—	—	—
Expected volatility	9.00%	4.00%	8.00%
Expected life in years	5-6	6	6
Per share grant-date fair value of options issued during the year	<u>\$.02-.04</u>	<u>3.28</u>	<u>4.79</u>

As part of its adoption of SFAS 123(R), the Company examined its historical pattern of option exercises in an effort to determine if there were any pattern based on certain employee populations. From this analysis, the Company could not identify any patterns in the exercise of options. As such, the Company used the guidance in Staff Accounting Bulletin No. 107 to determine the estimated life of options issued subsequent to the adoption of SFAS 123(R). Expected volatility is based on historical volatility of the Company's stock. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of grant. The dividend yield assumption is based on the Company's history and expectation of dividend payments.

(continued)

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(18) Earnings Per Share**

Earnings per share ("EPS") of common stock has been computed on the basis of the weighted-average number of shares of common stock outstanding. Outstanding stock options and warrants are considered dilutive securities for purposes of calculating diluted EPS which is computed using the treasury stock method. All per share amounts have been adjusted to reflect the three-for-two stock split declared in December 2005 and the 5% stock dividend declared in January 2007 and paid in February 2007. In 2008, outstanding stock options and warrants are excluded from the calculation because the Company's net loss position makes their effect anti-dilutive. The following tables present the calculations of EPS (dollars in thousands, except per share amounts).

	<u>Earnings (Loss)</u>	<u>Weighted- Average Shares</u>	<u>Per Share Amount</u>
<i>Year Ended December 31, 2008:</i>			
Basic EPS:			
Net earnings available to common stockholders	\$(3,635)	4,111,631	<u>\$ (.88)</u>
Effect of dilutive securities-			
Incremental shares from assumed conversion of options		—	
Diluted EPS:			
Net earnings available to common stockholders and assumed conversions	<u>\$(3,635)</u>	<u>4,111,631</u>	<u>\$ (.88)</u>
<i>Year Ended December 31, 2007:</i>			
Basic EPS:			
Net earnings available to common stockholders	2,865	4,073,207	<u>\$.70</u>
Effect of dilutive securities-			
Incremental shares from assumed conversion of options		<u>214,236</u>	
Diluted EPS:			
Net earnings available to common stockholders and assumed conversions	<u>\$ 2,865</u>	<u>4,287,443</u>	<u>\$.67</u>
<i>Year Ended December 31, 2006:</i>			
Basic EPS:			
Net earnings available to common stockholders	3,652	4,002,822	<u>\$.91</u>
Effect of dilutive securities-			
Incremental shares from assumed conversion of options		<u>291,019</u>	
Diluted EPS:			
Net earnings available to common stockholders and assumed conversions	<u>\$ 3,652</u>	<u>4,293,841</u>	<u>\$.85</u>

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(18) Earnings Per Share, Continued**

At December 31, 2007, the following options were excluded from the calculation of EPS due to the exercise price being above the average market price:

<i>2007</i>	<u>Number of Outstanding Options</u>	<u>Exercise Price</u>	<u>Expire</u>
Options	220,500	\$ 16.31	2011
	12,602	16.31	2011
	788	16.80	2011
	6,300	19.23	2012-2016
	5,250	19.52	2012-2016
	10,500	20.00	2012-2016
	10,500	19.19	2016
	10,500	18.71	2017
	6,850	18.57	2017

(19) Legal Contingencies

Various legal claims arise from time to time in the normal course of business which, in the opinion of management, will not have a material effect on the Bank's financial statements.

[Table of Contents](#)**FIRST COMMUNITY BANK CORPORATION OF AMERICA AND SUBSIDIARIES****Notes to Consolidated Financial Statements, Continued****(21) Financial Covenant Compliance Status**

First Community Bank Corporation of America has a \$12 million line of credit with Silverton Bank. As of December 31, 2008, the Company has funded \$2 million on this line. First Community Bank Corporation of America is out of compliance with two of the ratios required in the covenants. First Community Bank of America's ratio of non-performing assets as a percent of gross loans was 3.56% on December 31, 2008 which exceeded the covenant limit of 1.50%. Additionally, the 2008 annual loss recorded by the First Community Bank Corporation resulted in non compliance of meeting the debt servicing coverage ratio.

[Table of Contents](#)**Item 9. Changes In and Disagreements With Accountants on Accounting and Financial Disclosure.**

Neither First Community nor its subsidiaries has had any disagreements with its accountants.

Item 9A. Controls and Procedures.***(a) Evaluation of Disclosure Controls and Procedures***

First Community maintains controls and procedures designed to ensure that information required to be disclosed in the reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. Based upon management's evaluation of those controls and procedures performed within the 90 days preceding the filing of this Report, our Chief Executive Officer and Chief Financial Officer concluded that, subject to the limitations noted below, First Community's disclosure controls and procedures (as defined in Rules 13a-15(e) under the Securities Exchange Act of 1934) are effective to ensure that the information required to be disclosed by the Company in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the U.S. Securities and Exchange Commission's rules and forms.

(b) Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Such internal controls over financial reporting were designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

The Company's management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2008. In making this assessment, the Company used the criteria set forth in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based upon our evaluation under the framework in Internal Control-Integrated Framework, our management concluded that our internal control over financial reporting was effective as of December 31, 2008.

Table of Contents

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to temporary rules of the Securities and Exchange Commission that permit the Company to provide only management's report in this annual report.

(c) Changes in Internal Controls

We have made no significant changes in its internal controls over financial reporting during the quarter ended December 31, 2008 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

(d) Limitations on the Effectiveness of Controls

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and internal controls will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within First Community have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control.

The design of any system of controls also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected.

Item 9B. Other Information.

Not Applicable.

PART III

Item 10. Directors, Executive Officers, Promoters and Corporate Governance.

Information required by this Item appears in First Community's Proxy Statement for the 2009 Annual Meeting of Shareholders under the caption, "Election of Directors", "Non-Director Executive Officers", "Report of the Audit Committee" and "Compliance with Section 16(a) of the Securities and Exchange Act of 1934", and is hereby incorporated by reference. We have adopted a Code of Ethics that applies to our executive officers, a copy of which has been filed with our report on Form 10-K for the year ended December 31, 2005 as Exhibit 14. Persons who would like a copy of such Code of Ethics may receive one without charge upon request made to Kay M. McAleer, Vice President/Corporate Secretary, First Community Bank Corporation of America, 9001 Belcher Road, Pinellas Park, Florida 33782.

Item 11. Executive Compensation.
