Net Loan Portfolio (millions)

Deposits (millions)

Dear Shareholder,

In a year that witnessed turmoil in the credit markets, where some of the biggest names in banking had their very existence threatened, Flushing Financial saw continued improvement in its operating environment. Core earnings per share increased in the last three consecutive quarters of 2007 to \$0.30, up \$0.03 per share from \$0.27 in the third quarter, \$0.26 in the second quarter and \$0.25 in the first quarter. The impetus for these improvements began in 2004 with the Fed's tightening of interest rates.

The impact of this tightening was a flat and sometimes inverted yield curve that persisted through the first half of 2007 and squeezed margins industry-wide. We at Flushing adopted a strategy during this time period to continue to grow our balance sheet in our well-developed niche markets while accelerating our investment to make the institution a more "commercial-like" bank. From the time that Fed tightening began we increased assets 65%, loans 94% and deposits 64%. This approach enabled us to bring net interest income to record levels in 2007 as our investments began to contribute to revenue. We built a strong balance sheet. We avoided the high-yielding inducements of sub-prime, over indulgence in development projects and interest only, negative amortization loans. Now with our balance sheet at \$3.4 billion we face considerable opportunity as the Fed continues to reduce rates.

Our company saw operating improvement across the board during 2007. Loan originations were a record \$746 million for the year. The mainstays of this business continued to be multi-family and commercial real estate—our longstanding areas of expertise. Loans in process were \$201 million at December 31, 2007, with \$35 million resulting from new or expanded initiatives within our strategic plan. We grew commercial business loans by \$60 million during the year to \$128 million at December 31, 2007.

Throughout the year, we continued to pursue our strategic goal of transitioning to a more "commercial-like" bank. To strengthen our Business Banking product line, new products were added including Lockbox, Remote Deposit, and a more robust Business Online Banking service as well as cash management. Two new branches were added in 2007, one in the affluent community of Forest Hills and another in the vibrant business center of downtown Flushing. This latter branch—our new Asian Banking Center—is staffed with a full complement of experienced professionals including branch bankers, small business lenders, and investment/insurance advisors. Our Asian Banking Center has bilingual and trilingual employees fluent in Chinese and Korean as well as English. These two additional offices increased the total of our branch network to fourteen. In 2007, Flushing Savings Bank also launched its wholly-owned subsidiary, Flushing Commercial Bank. This Government Banking unit is designed to serve public entities including counties, towns, school districts, libraries, fire districts, and the various courts throughout the metropolitan area.

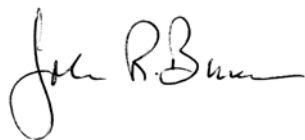

Our iGObanking.com® internet branch, with deposits of \$133 million at December 31, 2007, became our fifth largest branch. It has enabled us to expand outside our historical footprint

and obtain business from all 50 states. iGObanking.com® has enabled our Bank to capture additional market share from the ever-increasing percentage of customers who choose to do their banking online. We are clearly in the early stages of development of this method of distribution and see it as an area of significant potential. We plan to introduce several new products in 2008, including an online checking account that will feature a debit card and surcharge free, nationwide ATM service at over 32,000 Allpoint banking machines.

Business deposit activity began to grow during the year as our longtime existing real estate customers, recognizing our increased capabilities, began to open more deposit accounts. More of our lending relationships included deposit relationships in 2007, aided by our remote deposit capture capability. By providing business customers with scanning machines to deposit their checks from their offices we have been able to open accounts in New Jersey and Staten Island without having a branch presence. We see a continued opportunity in this area as the remote deposit product becomes more accepted by the market.

In May of 2007, Anna Piacentini, Senior Vice President, announced her plan to retire. Anna was responsible for the Bank's Human Resource department and modernized personnel records. She also served as the Company's Corporate Secretary. In December of 2007, Henry Braun, Senior Vice President, announced his plan to retire. Henry was instrumental in the implementation and development of the Bank's systems technology, overall operations, and branch network. We wish both our longtime friends and colleagues, Anna and Hank, the best of luck in this new phase of their lives.

We sincerely thank our Board of Directors and Advisory Boards for their support, our employees for their hard work, and our customers for their loyalty; as we continue to build a business with long-term value for our shareholders.

John R. Buran
President and
Chief Executive Officer

Gerard P. Tully, Sr.
Chairman of the Board

implementing our strategy

- Transition from a traditional thrift to a more “commercial-like” bank
- Cross-sell expanded commercial product set to existing valued customers
- Build new revenue streams in the commercial banking area
- Increase deposits through multiple channels in our existing markets and through iGObanking.com®
- Expand core multi-cultural business
- Continue to emphasize growth in niche lending
- Protect margin and prepare for a more normal yield curve by booking loans with long term viability
- Maintain credit standards and asset quality
- Use market disruptions to attract talent and customers from competitors

“Safe Harbor” Statement under the Private Securities Litigation Reform Act of 1995: Statements in this Press Release relating to plans, strategies, economic performance and trends, projections of results of specific activities or investments and other statements that are not descriptions of historical facts may be forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking information is inherently subject to risks and uncertainties, and actual results could differ materially from those currently anticipated due to a number of factors, which include, but are not limited to, risk factors discussed in the Company's Annual Report on Form 10-K for the year ended December 31, 2007, and in other documents filed by the Company with the Securities and Exchange Commission from time to time. Forward-looking statements may be identified by terms such as “may”, “will”, “should”, “could”, “expects”, “plans”, “intends”, “anticipates”, “believes”, “estimates”, “predicts”, “forecasts”, “potential” or “continue” or similar terms or the negative of these terms.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. The Company has no obligation to update these forward-looking statements.

Serving Multi-Cultural Communities

Branches with multilingual employees, brochures, posters and local advertisements are an example of Flushing Savings Bank's commitment to serving the diverse communities located throughout the metropolitan area.

To further enhance our commitment to the community, over the past year Flushing Savings Bank opened an Asian Banking Center in one of the largest Chinese and Korean communities in the country. Flushing's Asian Banking Center is staffed with seasoned branch and business lending professionals who are able to communicate in the languages and dialects of the community. We created an Asian Advisory Board made up of prominent leaders from the Chinese and Korean communities, which has been very influential in guiding the Bank on local events and enhancing awareness of Flushing's active role in the local neighborhood. Recently, the Bank hired a seasoned professional with over 20 years of experience in commercial banking. This newly hired Senior Vice President will serve as our ambassador to the Asian Market.

Recently, the Bank's efforts towards serving this community were affirmed by one of our customers, who wrote:

"I came to the United States three months ago; I needed to open up an account to send money back home to Seoul, Korea. I saw signage at the Roosevelt branch by the #7 subway train station that the Bank has Korean staff. I was relieved by the fact that there is someone who understands my needs and is able to assist me in answering questions I had about banking here in the United States. I would like to thank Mr. Sean Kim of the Roosevelt branch for helping me adjust to the American way of having a bank account."

Since 1929, Flushing Savings Bank has distinguished itself as a leader in serving the diverse, ethnic groups that have come to this country. With a significant percentage of our branches located in the most diverse county in the United States, the borough of Queens, New York, our multi-cultural approach is not only the right way to serve the community, it's also good business.

I came to the United States three months ago... I was *relieved* by the fact that there is someone who *understands my needs*...I would like to thank Mr. Sean Kim of the Roosevelt branch for *helping me* adjust to the American way of having a bank account.

Helping Communities Grow and Prosper

Composition of Loan Portfolio (millions)

Vibrant, high-density urban communities produce significant economic activity through retail sales from Mixed-Use “Store-Front” properties. For years, Flushing Savings Bank has been providing the financing necessary to help. As a result, we have contributed to continued economic growth throughout the metropolitan area. The Bank has also been instrumental in providing these same communities with financing for their multi-family housing requirements.

This community-based lending approach coupled with a conservative credit philosophy has enabled the Bank to more than double the mixed-use and multi-family portfolio in the past five years to over \$1.6 billion, while maintaining high credit standards and avoiding the subprime lending market.

With most of our competition more intensely focused on originating some of the “larger” commercial real estate deals, Flushing Savings Bank has remained committed to the Mixed-Use/Multi-Family Real Estate Lending business; in fact, the business now accounts for 60% of the Bank’s Real Estate Lending portfolio.

As a distinguished, well-known niche lender in the market, we are excited about the future impact that Mixed-Use and Multi-Family Lending business will have for the Bank’s financial growth and the communities that it serves.

Furthermore, Flushing Savings Bank is committed to providing its customers with a full complement of fixed and variable rate residential mortgages. The Bank also offers a highly competitive Home Equity line of credit product. In 2007, this product more than doubled from \$16 million to \$36 million.

Thinking Outside “The Branch”

Flexibility, Innovation, and Accessibility are the Bank’s cornerstones to making it easier and more convenient for our customers to manage their money. Remote Deposit, Lockbox, Business Online Banking, and iGObanking.com® have made a dramatic impact on how Flushing’s customers do business with the Bank. Additionally, enhancements to Flushing’s Online Banking bill presentment and e-statement are excellent tools for clients to manage their money.

iGObanking.com® was launched with a promise to customers of “Real Simple. Real Smart.” with a top-of-the-market iGOsavings account rate, No Fees and No Minimums, as well as high rates on CD accounts. Our goal was to build a brand that emphasized a real simple and smart way for customers to do their banking. By working toward this goal, we appealed to an increasingly multigenerational audience of online banking customers. Our results reflect our success as we have continued to expand upon our geographic footprint by attracting a diverse customer base from all 50 states.

By reaching \$133 million in total deposits, iGObanking.com® exceeded the targets set forth in the Bank’s business plan and provided an additional source of funding for overall loan growth. iGObanking.com® has made a total commitment to high-quality customer service. This commitment was embodied in a recent customer comment:

“When iGObanking.com was just getting started, I asked a question about beneficiaries. Not only was I quickly provided a link to set up beneficiaries, but iGObanking staff added the information to the FAQ and to the ‘Account Access’ main page so that others would be able to easily access it. This shows a commitment not only to resolve an issue when it comes up, but to improve the service for all iGObanking clients. Over the past year, iGObanking has matured and blossomed into a wonderful user experience.”

With online banking projected to continue to have double-digit growth rates, increasing acceptance from a multigenerational audience, new technologies to access online accounts, and the incorporation of new products and services, iGObanking.com® is well-positioned to benefit from the opportunities that are offered from these short- and long-term trends.

Experienced Bankers Providing Fast, Flexible Solutions

Transitioning to a more commercial-like bank includes providing timely, innovative and flexible solutions that meet the changing financial needs of our business and consumer clients. It also involves building a staff that understands what this transition truly means, and has the ability to make it happen.

We have transitioned our product offerings to make them more attractive to our loyal customers. Included in our full complement of product and service offers to consumers are a high-yielding interest checking account, BestRate Checking, and a competitively priced Home Equity line of credit. To make business banking easier, our enhanced electronic banking solutions include our “Point-Click-Scan” remote deposit product and our business online banking product, Cash Manager Direct. We also offer a wide range of business checking accounts and business financing options.

To further accelerate this transition, we added experienced commercial bank managers and customer service representatives to our already seasoned branch banking team. Our branch teams now provide an invaluable mix of skills, experience, and knowledge.

This transition was evident in the Bank’s two new branch openings in Queens: Forest Hills and Roosevelt Avenue. In 2007, our Forest Hills branch surpassed deposit projections and our Roosevelt Avenue branch office achieved one of the highest mixes of checking to overall deposit ratio. Both branches were well-received in the communities they serve, and promise continued success.

As we continue to transition to a more “commercial-like” Bank, we will apply this business model to our new locations. By incorporating a mix of seasoned, commercial bankers who know their community, offering attractive deposit, loan and cash management products, and providing financial solutions that are timely, innovative, and flexible, we will strive to continue to build trust, expertise, and brand-recognition within the markets we serve.

Flushing's Commercial Real Estate Portfolio is *diverse*, consisting of *shopping centers*, *professional office buildings* and other essential income producing commercial properties.

We Get Deals Done When Other Banks Don't

Commercial Real Estate Lending at Flushing Savings Bank combines a team of experienced lenders who have extensive market knowledge, and provide quick, flexible and innovative solutions. This market expertise, coupled with a hands-on, practical approach to valuing real estate and credit requirements, enables the Bank to arrange closing transactions so that borrowers can achieve their goals and the Bank can continue to grow its loan portfolio in a safe and secure manner.

This approach to the market place has enabled the Bank to build a brand in the real estate arena as an innovative credit provider for commercial real estate customers. The value created with this brand was evident in a recent customer comment:

"As you know, we have been your client since October of 2007. I have been an entrepreneur since 1990, and have never experienced the level of service and attention to detail that I have received from your institution these last six months. My personal experience is such that for the first time as a businessman, I feel I have a partner I can work with. Your team is enabling me to realize my dream by believing in it as well as investing in it."—Sean Daneshvar, President of Med Alliance

Flushing's Commercial Real Estate Portfolio is diverse, consisting of shopping centers, professional office buildings and other essential income producing commercial properties. While geographically concentrated in the New York Metropolitan area, essentially our portfolio is centered within the Bank's primary market. As a full-service banking institution, this diverse cross section of borrowers provides the Bank with the opportunity to cross-sell ancillary deposit services such as lease security accounts and cash management products such as Remote Deposit and Business Online Banking.

"They did more than *honor their commitment* for financing, they *helped us* work through every issue until the project and the loans were painlessly *completed.*"

Jacqueline Juliano of Daily Bus & Truck Rental Corporation

Business Banking: Building Relationships

Now that the organization and products are built, our main focus is developing relationships with businesses in our local marketplace. We take the time to understand the needs of the customer, and find simple, easy, streamlined solutions. We want our customers to focus on their business, and not spend time worrying how they will obtain financing. Our philosophy is: “Customers build businesses; they should get the credit they deserve.”

At Flushing Savings Bank, we take a hands-on, “roll up your sleeves” approach to getting business done. This approach leads us to winning deals, and effectively separates us from our competition. A recent example involved a customer that was faced with term sheets from seven different banks. To simplify the decision for the customer, we sat down with him and proceeded to show him the differences between each offer. By helping the customer to fully analyze his options, he was able to make a financially beneficial decision for his company and we were able to secure his business.

Our approach to Business Banking was summed-up in a recent customer testimonial:

“They did more than honor their commitment for financing, they helped us work through every issue until the project and the loans were painlessly completed.” Jacqueline Juliano of Daily Bus & Truck Rental Corporation

At Flushing Savings Bank, we are more than business lenders, we’re relationship managers. As a result, we don’t stop with the evaluation of customers’ credit needs; we show customers how we can make their banking easier and more efficient. This approach has led to the growing acceptance of our remote deposit product from our business banking clients.

Flushing’s Remote Deposit, a “Point-Click-Scan” electronic banking tool, enables customers to scan their checks right from the office desktop and have them sent directly to the Bank. Banking hours, bad weather, and proximity to the branch office are no longer concerns for any business. The Bank’s Lockbox service enables customers to enhance their cash flow by processing their incoming payments (e.g., checks) from a central postal location, and having them electronically credited to their business checking account. Business Online Banking, with wire, ACH, and multiple-authorization level access, is the ideal cash management tool for a wide variety of businesses.

Following up on the awards bestowed on Flushing Savings Bank for its Small Business Lending activities, in 2007, the Bank once again received the Silver Status Award for the number and dollar amount of SBA loans approved in the New York District. Flushing Savings Bank is especially proud of this distinguished record, and looks forward to providing small businesses with the full complement of products and services for all of their future needs.

CAUTIONARY NOTE REGARDING FORWARD LOOKING STATEMENTS

Statements contained in this Annual Report on Form 10-K (this “Annual Report”) relating to plans, strategies, economic performance and trends, projections of results of specific activities or investments and other statements that are not descriptions of historical facts may be forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Forward-looking information is inherently subject to risks and uncertainties, and actual results could differ materially from those currently anticipated due to a number of factors, which include, but are not limited to, factors discussed under the captions “Business — General — Allowance for Loan Losses” and “Business — General — Market Area and Competition” in Item 1 below, “Risk Factors” in Item 1A below, in “Management’s Discussion and Analysis of Financial Condition and Results of Operations – Overview” in Item 7 below, and elsewhere in this Annual Report and in other documents filed by the Company with the Securities and Exchange Commission from time to time. Forward-looking statements may be identified by terms such as “may”, “will”, “should”, “could”, “expects”, “plans”, “intends”, “anticipates”, “believes”, “estimates”, “predicts”, “forecasts”, “potential” or “continue” or similar terms or the negative of these terms. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. The Company has no obligation to update these forward-looking statements.

PART I

Item 1. Business.

GENERAL

Overview

Flushing Financial Corporation (the “Holding Company”) is a Delaware corporation organized in May 1994 at the direction of Flushing Savings Bank, FSB (the “Bank”). The Bank was organized in 1929 as a New York State chartered mutual savings bank. In 1994, the Bank converted to a federally chartered mutual savings bank and changed its name from Flushing Savings Bank to Flushing Savings Bank, FSB. The Bank converted from a federally chartered mutual savings bank to a federally chartered stock savings bank on November 21, 1995, at which time the Holding Company acquired all of the stock of the Bank. The primary business of the Holding Company at this time is the operation of its wholly owned subsidiary, the Bank. The Bank owns four subsidiaries: Flushing Commercial Bank, Flushing Preferred Funding Corporation, Flushing Service Corporation, and FSB Properties Inc. In November, 2006, the Bank launched an internet branch, iGObanking.com[®]. The activities of the Holding Company are primarily funded by dividends, if any, received from the Bank. Flushing Financial Corporation’s common stock is traded on the NASDAQ Global Select Market under the symbol “FFIC.”

The Holding Company also owns Flushing Financial Capital Trust II, Flushing Financial Capital Trust III, and Flushing Financial Capital Trust IV (the “Trusts”), special purpose business trusts formed during 2007 to issue capital securities. The Trusts used the proceeds from the issuance of these capital securities, and the proceeds from the issuance of their common stock, to purchase junior subordinated debentures from the Holding Company. In accordance with the requirements of FASB Interpretation No. 46R, the Trusts are not included in the consolidated financial statements of the Holding Company. The Holding Company previously owned Flushing Financial Capital Trust I (the “Trust”), which was a special purpose business trust formed in 2002 similar to the Trusts discussed above. The Trust called its outstanding capital securities during July 2007, and was then liquidated. Prior to 2004, the Trust was included in the consolidated financial statements of the Company. Effective January 1, 2004, in accordance with the requirements of FASB Interpretation No. 46R, the Trust was deconsolidated.

Unless otherwise disclosed, the information presented in this Annual Report reflects the financial condition and results of operations of the Holding Company, the Bank and the Bank’s subsidiaries on a consolidated basis (collectively, the “Company”). At December 31, 2007, the Company had total assets of \$3.4 billion, deposits of \$2.0 billion and stockholders’ equity of \$233.7 million.

The Bank’s principal business is attracting retail deposits from the general public and investing those deposits together with funds generated from ongoing operations and borrowings, primarily in (1) originations and purchases of one-to-four family (focusing on mixed-use properties – properties that contain both residential dwelling units and commercial units), multi-family residential and commercial real estate mortgage loans; (2) construction loans, primarily for multi-family residential properties; (3) Small Business Administration (“SBA”) loans and other small business loans; (4) mortgage loan surrogates such as mortgage-backed securities; and (5) U.S. government securities, corporate fixed-

income securities and other marketable securities. The Bank also originates certain other consumer loans. The Bank's revenues are derived principally from interest on its mortgage and other loans and mortgage-backed securities portfolio, and interest and dividends on other investments in its securities portfolio. The Bank's primary sources of funds are deposits, Federal Home Loan Bank of New York ("FHLB-NY") borrowings, repurchase agreements, principal and interest payments on loans, mortgage-backed and other securities, proceeds from sales of securities and, to a lesser extent, proceeds from sales of loans. As a federal savings bank, the Bank's primary regulator is the Office of Thrift Supervision ("OTS"). The Bank's deposits are insured to the maximum allowable amount by the Federal Deposit Insurance Corporation ("FDIC"). Additionally, the Bank is a member of the Federal Home Loan Bank ("FHLB") system.

In addition to operating the Bank, the Holding Company invests primarily in U.S. government securities, mortgage-backed securities, and corporate securities. The Holding Company also holds a note evidencing a loan that it made to an employee benefit trust established by the Holding Company for the purpose of holding shares for allocation or distribution under certain employee benefit plans of the Holding Company and the Bank (the "Employee Benefit Trust"). The funds provided by this loan enabled the Employee Benefit Trust to acquire 2,328,750 shares, or 8% of the common stock issued in our initial public offering.

On June 30, 2006, the Company acquired all of the outstanding common stock of Atlantic Liberty Financial Corporation ("Atlantic Liberty"), the parent holding company for Atlantic Liberty Savings, F.A., based in Brooklyn, New York. The aggregate purchase price was \$42.5 million, which consisted of \$14.7 million of cash, common stock valued at \$26.6 million, and \$1.3 million assigned to the fair value of Atlantic Liberty's outstanding stock options. Under the terms of the Agreement and Plan of Merger, dated December 20, 2005, Atlantic Liberty's shareholders received \$24.00 in cash, 1.43 Holding Company shares per Atlantic Liberty share owned, or a combination thereof, subject to aggregate allocation to all Atlantic Liberty's shareholders of 65% stock / 35% cash. In connection with the merger, the Company issued 1.6 million shares of common stock, the value of which was determined based on the closing price of the Company's common stock on the announcement date of December 21, 2005, and two days prior to and after the announcement date. The Company acquired \$186.9 million in assets, \$116.2 million in net loans and assumed \$106.8 million in deposits. This acquisition provided the Bank a presence on Montague Street and on Avenue J in Brooklyn, two highly attractive markets.

During 2006, the Bank established a business banking unit. The Bank's business plan includes a transition from a traditional thrift to a more 'commercial like' banking institution by focusing on the development of a full complement of commercial business deposit, loan and cash management products.

On November 27, 2006, the Bank launched an internet branch, iGObanking.com®, as a new division which provides the Bank access to markets outside its geographic locations. Accounts can be opened online at www.iGObanking.com or by mail.

During 2007, the Bank formed a wholly owned subsidiary, Flushing Commercial Bank, a New York State chartered commercial bank, for the limited purpose of accepting municipal deposits and state funds, including certain court ordered funds from New York State Courts, in the State of New York. The commercial bank was formed in response to a New York State Finance Law which requires that municipal deposits and state funds must be deposited into a bank or trust company designated by the New York State Comptroller. The Bank is not considered a bank or trust company for this purpose. The commercial bank offers a full range of deposit products to municipalities and New York State, similar to the products currently being offered by the Bank, but does not make loans. To date, the operations of Flushing Commercial Bank have not been material.

Market Area and Competition

The Bank is a community oriented savings institution offering a wide variety of financial services to meet the needs of the communities it serves. The Bank's main office is in Flushing, New York, located in the Borough of Queens. At December 31, 2007, the Bank operated out of its main office and thirteen branch offices, located in the New York City Boroughs of Queens, Brooklyn, and Manhattan, and in Nassau County, New York. The Bank also operates an internet branch, iGObanking.com®. The Bank maintains its executive offices in Lake Success in Nassau County, New York. Substantially all of the Bank's mortgage loans are secured by properties located in the New York City metropolitan area. During the last three years, real estate values in the New York City metropolitan area have been stable, which has favorably impacted the Bank's asset quality. See "— Asset Quality" and "Risk Factors – Local Economic Conditions" included in Item 1A of this Annual Report. There can be no assurance that the stability of these economic factors will continue.

The Bank faces intense and increasing competition both in making loans and in attracting deposits. The Bank's market area has a high density of financial institutions, many of which have greater financial resources, name recognition and market presence than the Bank, and all of which are competitors of the Bank to varying degrees. Particularly intense competition exists for deposits and in all of the lending activities emphasized by the Bank. The internet banking arena, which the Bank entered in November 2006, also has many larger financial institutions which have greater financial resources, name recognition and market presence than the Bank. The future earnings prospects of the Bank will be affected by the Bank's ability to compete effectively with other financial institutions and to implement its business strategies. See "Risk Factors – The Markets in Which the Bank Operates Are Highly Competitive" included in Item 1A of this Annual Report.

For a discussion of the Company's business strategies, see "Management's Discussion and Analysis of Financial Condition and Results of Operations — Overview — Management Strategy" included in Item 7 of this Annual Report.

Lending Activities

Loan Portfolio Composition. The Bank's loan portfolio consists primarily of mortgage loans secured by multi-family residential, commercial real estate, one-to-four family mixed-use property, one-to-four family residential property, and construction loans. In addition, the Bank also offers SBA loans, other small business loans and consumer loans. Substantially all the Bank's mortgage loans are secured by properties located within the Bank's market area. At December 31, 2007, the Bank had gross loans outstanding of \$2,694.7 million (before the allowance for loan losses and net deferred costs).

Beginning in late 2001, the Bank shifted its focus from originating one-to-four family residential property mortgage loans to the origination of multi-family residential, commercial real estate and one-to-four family mixed-use property mortgage loans. These loans generally have higher yields than one-to-four family residential properties, and include prepayment penalties that the Bank collects if the loans pay in full prior to the contractual maturity. From December 31, 2001 to December 31, 2007, multi-family residential mortgage loans increased \$594.8 million, or 160.9%, commercial real estate mortgage loans increased \$411.4 million, or 191.9%, one-to-four family mixed-use property mortgage loans increased \$577.1 million, or 525.6%, while one-to-four family residential property mortgage loans decreased \$190.3 million, or 54.1%. The Bank expects to continue this emphasis through marketing and by maintaining competitive interest rates and origination fees. The Bank's marketing efforts include frequent contacts with mortgage brokers and other professionals who serve as referral sources. From time-to-time, the Bank may purchase loans from mortgage bankers and other financial institutions. Loans purchased comply with the Bank's underwriting standards.

Fully underwritten one-to-four family residential mortgage loans generally are considered by the banking industry to have less risk than other types of loans. Multi-family residential, commercial real estate and one-to-four family mixed-use property mortgage loans generally have higher yields than one-to-four family residential property mortgage loans and shorter terms to maturity, but typically involve higher principal amounts and generally expose the lender to a greater risk of credit loss than one-to-four family residential property mortgage loans. The Bank's increased emphasis on multi-family residential, commercial real estate and one-to-four family mixed-use property mortgage loans has increased the overall level of credit risk inherent in the Bank's loan portfolio. The greater risk associated with multi-family residential, commercial real estate and one-to-four family mixed-use property mortgage loans could require the Bank to increase its provision for loan losses and to maintain an allowance for loan losses as a percentage of total loans in excess of the allowance currently maintained by the Bank. To date, the Bank has not experienced significant losses in its multi-family residential, commercial real estate and one-to-four family mixed-use property mortgage loan portfolios, and has determined that, at this time, additional provisions are not required.

The Bank's mortgage loan portfolio consists of adjustable rate mortgage ("ARM") loans and fixed-rate mortgage loans. Interest rates charged by the Bank on loans are affected primarily by the demand for such loans, the supply of money available for lending purposes, the rate offered by the Bank's competitors and the creditworthiness of the borrower. Many of those factors are, in turn, affected by regional and national economic conditions, and the fiscal, monetary and tax policies of the federal government.

In general, consumers show a preference for ARM loans in periods of high interest rates and for fixed-rate loans when interest rates are low. In periods of declining interest rates, the Bank may experience refinancing activity in ARM loans, as borrowers show a preference to lock-in the lower rates available on fixed-rate loans. In the case of ARM loans originated by the Bank, volume and adjustment periods are affected by the interest rates and other market factors as

discussed above as well as consumer preferences. The Bank has not in the past, nor does it currently, originate ARM loans that provide for negative amortization.

In recent years, the Bank has grown its construction loan portfolio. The Bank obtains a first lien position on the underlying collateral, and generally obtains personal guarantees on construction loans. These loans generally have a term of two years or less. Construction loans involve a greater degree of risk than other loans because, among other things, the underwriting of such loans is based on an estimated value of the developed property, which can be difficult to ascertain in light of uncertainties inherent in such estimations. In addition, construction lending entails the risk that the project may not be completed due to cost overruns or changes in market conditions. The greater risk associated with construction loans could require the Bank to increase its provision for loan losses, and to maintain an allowance for loan losses as a percentage of total loans in excess of the allowance currently maintained by the Bank. To date, the Bank has not incurred significant losses in its construction loan portfolio.

The business banking unit was formed in 2006 to focus on loans to businesses located within the Bank's market area. These loans are generally personally guaranteed by the owners, and may be secured by the assets of the business. The interest rate on these loans is generally an adjustable rate based on a published index, usually the prime rate. These loans, while providing a higher rate of return to the Bank, also present a higher level of risk. The greater risk associated with business loans could require the Bank to increase its provision for loan losses, and to maintain an allowance for loan losses as a percentage of total loans in excess of the allowance currently maintained by the Bank. To date, the Bank has not incurred significant losses in its business loan portfolio.

The Bank's lending activities are subject to federal and state laws and regulations. See "— Regulation."

The following table sets forth the composition of the Bank's loan portfolio at the dates indicated.

	At December 31,				
	2007	2006	2005	2004	2003

Total loans due after one year	\$ 557,338	\$ 21,463	\$ 11,193	\$ 55,354	\$ 645,348

Multi-Family Residential Lending. Loans secured by multi-family residential properties were \$964.5 million, or 35.79% of gross loans, at December 31, 2007. The Bank's multi-family residential mortgage loans had an average principal balance of \$497,000 at December 31, 2007, and the largest multi-family residential mortgage loan held in the Bank's portfolio had a principal balance of \$11.2 million. The Bank offers both fixed-rate and adjustable rate multi-family residential mortgage loans, with maturities up to 30 years.

In underwriting multi-family residential mortgage loans, the Bank reviews the expected net operating income generated by the real estate collateral securing the loan, the age and condition of the collateral, the financial resources and income level of the borrower and the borrower's experience in owning or managing similar properties. The Bank typically requires debt service coverage of at least 125% of the monthly loan payment. The Bank generally originates these loans up to only 75% of the appraised value or the purchase price of the property, whichever is less. Any loan with a final loan-to-value ratio in excess of 75% must be approved by either the Board of Directors or its Executive Committee as an exception to policy. The Bank generally relies on the income generated by the property as the primary means by which the loan is repaid. However, personal guarantees may be obtained for additional security from these borrowers. The Bank typically orders an environmental report on its multifamily and commercial real estate loans.

Loans secured by multi-family residential property generally involve a greater degree of risk than residential mortgage loans and carry larger loan balances. The increased credit risk is a result of several factors, including the concentration of principal in a smaller number of loans and borrowers, the effects of general economic conditions on income producing properties and the increased difficulty in evaluating and monitoring these types of loans. Furthermore, the repayment of loans secured by multi-family residential property is typically dependent upon the successful operation of the related property. If the cash flow from the property is reduced, the borrower's ability to repay the loan may be impaired. Loans secured by multi-family residential property also may involve a greater degree of environmental risk. The Bank seeks to protect against this risk through obtaining an environmental report. See "—Asset Quality — Real Estate Owned."

The Bank's fixed-rate multi-family mortgage loans are originated for terms up to 15 years and are competitively priced based on market conditions and the Bank's cost of funds. The Bank originated and purchased \$72.1 million, \$47.0 million and \$44.3 million of fixed-rate multi-family mortgage loans in 2007, 2006 and 2005, respectively. At December 31, 2007, \$244.8 million, or 25.4%, of the Bank's multi-family mortgage loans consisted of fixed rate loans.

The Bank offers ARM loans with adjustment periods typically of five years and for terms of up to 30 years. Interest rates on ARM loans currently offered by the Bank are adjusted at the beginning of each adjustment period based upon a fixed spread above the FHLB-NY corresponding Regular Advance Rate. From time to time, the Bank may

originate ARM loans at an initial rate lower than the index as a result of a discount on the spread for the initial adjustment period. Multi-family adjustable-rate mortgage loans generally are not subject to limitations on interest rate increases either on an adjustment period or aggregate basis over the life of the loan. The Bank originated and purchased multi-family ARM loans totaling \$159.3 million, \$119.8 million and \$178.8 million during 2007, 2006 and 2005, respectively. At December 31, 2007, \$719.6 million, or 74.6%, of the Bank's multi-family mortgage loans consisted of ARM loans.

Commercial Real Estate Lending. Loans secured by commercial real estate were \$625.8 million, or 23.23% of the Bank's gross loans, at December 31, 2007. The Bank's commercial real estate mortgage loans are secured by improved properties such as office buildings, hotels/motels, nursing homes, small business facilities, strip shopping centers, warehouses, and, to a lesser extent, religious facilities. At December 31, 2007, the Bank's commercial real estate mortgage loans had an average principal balance of \$778,000, and the largest of such loans, which was secured by a multi-tenant shopping center, had a principal balance of \$11.5 million. Commercial real estate mortgage loans are generally originated in a range of \$100,000 to \$6.0 million. Commercial real estate mortgage loans are generally offered at adjustable rates tied to a market index for terms of five to 15 years, with adjustment periods from one to five years. Commercial real estate mortgage loans are also made at fixed interest rates for terms of seven, 10 or 15 years.

In underwriting commercial real estate mortgage loans, the Bank employs the same underwriting standards and procedures as are employed in underwriting multi-family residential mortgage loans.

Commercial real estate mortgage loans generally carry larger loan balances than one-to-four family residential mortgage loans and involve a greater degree of credit risk for the same reasons applicable to multi-family loans.

The Bank's fixed-rate commercial mortgage loans are originated for terms up to 20 years and are competitively priced based on market conditions and the Bank's cost of funds. The Bank originated and purchased \$28.4 million, \$20.5 million and \$17.7 million of fixed-rate commercial mortgage loans in 2007, 2006 and 2005, respectively. At December 31, 2007, \$149.8 million, or 23.9%, of the Bank's commercial mortgage loans consisted of fixed rate loans.

The Bank offers ARM loans with adjustment periods of one to five years and for terms of up to 15 years. Interest rates on ARM loans currently offered by the Bank are adjusted at the beginning of each adjustment period based upon a fixed spread above the FHLB-NY corresponding Regular Advance Rate. From time to time, the Bank may originate ARM loans at an initial rate lower than the index as a result of a discount on the spread for the initial adjustment period. Commercial adjustable-rate mortgage loans generally are not subject to limitations on interest rate increases either on an adjustment period or aggregate basis over the life of the loan. The Bank originated and purchased commercial ARM loans totaling \$140.0 million, \$133.4 million and \$85.4 million during 2007, 2006 and 2005, respectively. At December 31, 2007, \$476.1 million, or 76.1%, of the Bank's commercial mortgage loans consisted of ARM loans.

One-to-Four Family Mortgage Lending – Mixed-Use Properties. The Bank offers mortgage loans secured by one-to-four family mixed-use properties. These properties contain up to four residential dwelling units and a commercial unit. The Bank offers both fixed-rate and adjustable-rate one-to-four family mixed-use property mortgage loans with maturities of up to 30 years and a general maximum loan amount of \$1,000,000. Loan originations primarily result from applications received from mortgage brokers and mortgage bankers, existing or past customers, and persons who respond to Bank marketing efforts and referrals. One-to-four family mixed-use property mortgage loans were \$686.9 million, or 25.49% of gross loans, at December 31, 2007.

During the three-year period ended December 31, 2007, the Bank focused its origination efforts with respect to one-to-four family mortgage loans on mixed-use properties. The primary income-producing units of these properties are the residential dwelling units. One-to-four family mixed-use property mortgage loans generally have a higher interest rate than residential mortgage loans. One-to-four family mixed-use property mortgage loans also have a higher degree of risk than residential mortgage loans, as repayment of the loan is usually dependent on the income produced from renting the residential units and the commercial unit. At December 31, 2007, one-to-four family mixed-use property mortgage loans amounted to \$686.9 million, as compared to \$588.1 million at December 31, 2006, \$477.8 million at December 31, 2005, and \$332.8 million at December 31, 2004, representing an increase of \$354.1 million during the three-year period.

In underwriting one-to-four family mixed-use property mortgage loans, the Bank employs the same underwriting standards as are employed in underwriting multi-family residential mortgage loans.

The Bank's fixed-rate one-to-four family mixed-use property mortgage loans are originated for terms of up to 30 years and are competitively priced based on market conditions and the Bank's cost of funds. The Bank originated and purchased \$33.7 million, \$30.8 million and \$39.4 million of fixed-rate one-to-four family mixed-use property mortgage

loans in 2007, 2006 and 2005, respectively. At December 31, 2007, \$171.2 million, or 24.9%, of the Bank's one-to-four family mixed-use property mortgage loans consisted of fixed rate loans.

The Bank offers adjustable-rate one-to-four family mixed-use property mortgage loans with adjustment periods typically of five years and for terms of up to 30 years. Interest rates on ARM loans currently offered by the Bank are adjusted at the beginning of each adjustment period based upon a fixed spread above the FHLB-NY corresponding Regular Advance Rate. From time to time, the Bank may originate ARM loans at an initial rate lower than the index as a result of a discount on the spread for the initial adjustment period. One-to-four family mixed-use property adjustable-rate mortgage loans generally are not subject to limitations on interest rate increases either on an adjustment period or aggregate basis over the life of the loan. The Bank originated and purchased one-to-four family mixed-use property ARM loans totaling \$125.7 million, \$123.7 million and \$147.3 million during 2007, 2006 and 2005, respectively. At December 31, 2007, \$515.7 million, or 75.1%, of the Bank's one-to-four family mixed-use property mortgage loans consisted of ARM loans.

One-to-Four Family Mortgage Lending – Residential Properties. The Bank offers mortgage loans secured by one-to-four family residential properties, including townhouses and condominium units. For purposes of the description contained in this section, one-to-four family residential mortgage loans, co-operative apartment loans and home equity loans are collectively referred to herein as "residential mortgage loans." The Bank offers both fixed-rate and adjustable-rate residential mortgage loans with maturities of up to 30 years and a general maximum loan amount of \$750,000. Loan originations generally result from applications received from mortgage brokers and mortgage bankers, existing or past customers, and referrals. Residential mortgage loans were \$168.7 million, or 6.27% of gross loans, at December 31, 2007.

The Bank generally originates residential mortgage loans in amounts up to 80% of the appraised value or the sale price, whichever is less. The Bank may make residential mortgage loans with loan-to-value ratios of up to 90% of the appraised value of the mortgaged property; however, private mortgage insurance is required whenever loan-to-value ratios exceed 80% of the appraised value of the property securing the loan.

The Bank originates residential mortgage loans to self-employed individuals within the Bank's local community without verification of the borrower's level of income, provided that the borrower's stated income is considered reasonable for the borrower's type of business. These loans involve a higher degree of risk as compared to the Bank's other fully underwritten residential mortgage loans as there is a greater opportunity for self-employed borrowers to falsify or overstate their level of income and ability to service indebtedness. This risk is mitigated by the Bank's policy to limit the amount of one-to-four family residential mortgage loans to 80% of the appraised value of the property or the sale price, whichever is less. The Bank believes that its willingness to make such loans is an aspect of its commitment to be a community-oriented bank. The Bank originated \$2.4 million and \$0.9 million of these first mortgage loans during 2007 and 2006, respectively. The Bank did not originate any of these loans during 2005. The Bank also extended \$43.0 million in home equity lines of credit during 2007 without verification of the borrower's level of income.

The Bank's fixed-rate residential mortgage loans typically are originated for terms of 15 and 30 years and are competitively priced based on market conditions and the Bank's cost of funds. The Bank did not originate or purchase any 15-year fixed-rate residential mortgages in 2007. The Bank originated and purchased \$0.4 million and \$0.1 million of 15-year fixed-rate residential mortgage loans in 2006 and 2005, respectively. The Bank originated \$0.5 million of 30-year fixed-rate mortgages in 2007. The Bank did not originate or purchase any 30-year fixed rate residential mortgages in 2006 and 2005. These loans have been retained to provide flexibility in the management of the Company's interest rate sensitivity position. At December 31, 2007, \$70.8 million, or 41.9%, of the Bank's residential mortgage loans consisted of fixed rate loans.

The Bank offers ARM loans with adjustment periods of one, three, five, seven or ten years. Interest rates on ARM loans currently offered by the Bank are adjusted at the beginning of each adjustment period based upon a fixed spread above the average yield on United States treasury securities, adjusted to the U.S. Treasury constant maturity index as published weekly by the Federal Reserve Board. From time to time, the Bank may originate ARM loans at an initial rate lower than the U.S. Treasury constant maturity index as a result of a discount on the spread for the initial adjustment period. ARM loans generally are subject to limitations on interest rate increases of 2% per adjustment period and an aggregate adjustment of 6% over the life of the loan. The Bank originated and purchased adjustable rate residential mortgage loans totaling \$36.8 million, \$13.5 million and \$13.1 million during 2007, 2006 and 2005, respectively. At December 31, 2007, \$98.0 million, or 58.1%, of the Bank's residential mortgage loans consisted of ARM loans.

The retention of ARM loans in the Bank's portfolio helps reduce the Bank's exposure to interest rate risks. However, in an environment of rapidly increasing interest rates, it is possible for the interest rate increase to exceed the

maximum aggregate adjustment on one-to-four family residential ARM loans and negatively affect the spread between the Bank's interest income and its cost of funds.

ARM loans generally involve credit risks different from those inherent in fixed-rate loans, primarily because if interest rates rise, the underlying payments of the borrower rise, thereby increasing the potential for default. However, this potential risk is lessened by the Bank's policy of originating one-to-four family residential ARM loans with annual and lifetime interest rate caps that limit the increase of a borrower's monthly payment.

Home equity loans are included in the Bank's portfolio of residential mortgage loans. These loans are offered as adjustable-rate "home equity lines of credit" on which interest only is due for an initial term of 10 years and thereafter principal and interest payments sufficient to liquidate the loan are required for the remaining term, not to exceed 30 years. These loans also may be offered as fully amortizing closed-end fixed-rate loans for terms up to 15 years. All home equity loans are made on one-to-four family residential and condominium units, which are owner-occupied, and one-to-four family mixed-use properties, and are subject to an 80% loan-to-value ratio computed on the basis of the aggregate of the first mortgage loan amount outstanding and the proposed home equity loan. They are generally granted in amounts from \$25,000 to \$300,000. The underwriting standards for home equity loans are substantially the same as those for residential mortgage loans. At December 31, 2007, home equity loans totaled \$36.1 million, or 1.34%, of gross loans.

Construction Loans. The Bank's construction loans primarily have been made to finance the construction of one-to-four family residential properties, multi-family residential properties and residential condominiums. The Bank also, to a limited extent, finances the construction of commercial real estate. The Bank's policies provide that construction loans may be made in amounts up to 70% of the estimated value of the developed property and only if the Bank obtains a first lien position on the underlying real estate. In addition, the Bank generally requires personal guarantees on all construction loans. Construction loans are generally made with terms of two years or less. Advances are made as construction progresses and inspection warrants, subject to continued title searches to ensure that the Bank maintains a first lien position. The Bank made advances on construction loans of \$54.2 million, \$75.1 million and \$46.4 million during 2007, 2006 and 2005, respectively. Construction loans outstanding at December 31, 2007 totaled \$119.7 million, or 4.44%, of gross loans.

Construction loans involve a greater degree of risk than other loans because, among other things, the underwriting of such loans is based on an estimated value of the developed property, which can be difficult to ascertain in light of uncertainties inherent in such estimations. In addition, construction lending entails the risk that the project may not be completed due to cost overruns or changes in market conditions.

Small Business Administration Lending. These loans are extended to small businesses and are guaranteed by the SBA up to a maximum of 85% of the loan balance for loans with balances of \$150,000 or less, and to a maximum of 75% of the loan balance for loans with balances greater than \$150,000. The Bank also provides term loans and lines of credit up to \$350,000 under the SBA Express Program, on which the SBA provides a 50% guaranty. The maximum amount the SBA can guarantee is \$2,000,000. All SBA loans are underwritten in accordance with SBA Standard Operating Procedures and the Bank generally obtains personal guarantees and collateral, where applicable, from SBA borrowers. Typically, SBA loans are originated at a range of \$25,000 to \$2.0 million with terms ranging from three to 25 years. SBA loans are generally offered at adjustable rates tied to the prime rate (as published in the Wall Street Journal) with adjustment periods of one to three months. The Bank generally sells the guaranteed portion of certain SBA term loans in the secondary market and retains the servicing rights on these loans, collecting a servicing fee of approximately 1%. The Bank originated \$12.8 million, \$19.9 million, and \$12.2 million of SBA loans during 2007, 2006, and 2005, respectively. At December 31, 2007, SBA loans totaled \$18.9 million, representing 0.70% of gross loans.

Commercial Business and Other Lending. The Bank originates other loans for business, personal, or household purposes. Total commercial business and other loans outstanding at December 31, 2007 amounted to \$110.0 million, or 4.08% of gross loans. Business loans are personally guaranteed by the owners, and may also be secured by additional collateral, including equipment and inventory. Included in commercial business loans are loans made to owners of New York City taxi medallions. These loans, which totaled \$68.2 million at December 31, 2007, are secured through liens on the taxi medallions. The Bank originates taxi medallion loans up to 75% of the value of the taxi medallion. The maximum loan size for a business loan is \$5,000,000, with a maximum term of 25 years. The Bank originated \$92.2 million, \$49.9 million, and \$12.4 million of commercial business loans during 2007, 2006, and 2005 respectively. Consumer loans generally consist of passbook loans and overdraft lines of credit. Generally, unsecured consumer loans are limited to amounts of \$5,000 or less for terms of up to five years. The Bank offers credit cards to its customers

through a third party financial institution and receives an origination fee and transactional fees for processing such accounts, but does not underwrite or finance any portion of the credit card receivables.

The underwriting standards employed by the Bank for consumer and other loans include a determination of the applicant's payment history on other debts and assessment of the applicant's ability to meet payments on all of his or her obligations. In addition to the creditworthiness of the applicant, the underwriting process also includes a comparison of the value of the collateral, if any, to the proposed loan amount. Unsecured loans tend to have higher risk, and therefore command a higher interest rate.

Loan Approval Procedures and Authority. The Bank's Board of Directors-approved lending policies establish loan approval requirements for its various types of loan products. The Bank's Residential Mortgage Lending Policy (which applies to all one-to-four family mortgage loans, including residential and mixed-use property) establishes authorized levels of approval. One-to-four family mortgage loans that do not exceed \$750,000 require two signatures for approval, one of which must be from the President, Executive Vice President or a Senior Vice President (collectively, "Authorized Officers") and the other from a Senior Underwriter, Manager, Underwriter or Junior Underwriter in the Residential Mortgage Loan Department (collectively, "Loan Officers"). For one-to-four family mortgage loans from \$750,000 to \$1,000,000, three signatures are required for approval, at least two of which must be from the Authorized Officers, and the other one may be a Loan Officer. The Loan Committee, the Executive Committee or the full Board of Directors also must approve one-to-four family mortgage loans in excess of \$1,000,000. Pursuant to the Bank's Commercial Real Estate Lending Policy, all loans secured by commercial real estate and multi-family residential properties, must be approved by the President or the Executive Vice President upon the recommendation of the Commercial Loan Department Officer. Such loans in excess of \$1,000,000 also require Loan or Executive Committee or Board approval. In accordance with the Bank's Business Loan Policy, all business and SBA loans up to \$1,000,000, and commercial and industrial loans/professional mortgage loans up to \$1,500,000 must be approved by the Business Loan Committee, and ratified by the Management Loan Committee. Business and SBA loans in excess of \$1,000,000 up to \$2,000,000 must be approved by the Management Loan Committee and ratified by the Loan Committee of the Bank's Board of Directors. Commercial business and other loans require two signatures for approval, one of which must be from an Authorized Officer. The Bank's Construction Loan Policy requires that the Loan Committee or the Board of Directors of the Bank must approve all construction loans. Any loan, regardless of type, that deviates from the Bank's written loan policies must be approved by the Loan Committee or the Bank's Board of Directors.

For all loans originated by the Bank, upon receipt of a completed loan application, a credit report is ordered and certain other financial information is obtained. An appraisal of the real estate intended to secure the proposed loan is required. An independent appraiser designated and approved by the Bank currently performs such appraisals. The Bank's staff appraiser reviews the appraisals. The Bank's Board of Directors annually approves the independent appraisers used by the Bank and approves the Bank's appraisal policy. It is the Bank's policy to require borrowers to obtain title insurance and hazard insurance on all real estate first mortgage loans prior to closing. Borrowers generally are required to advance funds on a monthly basis together with each payment of principal and interest to a mortgage escrow account from which the Bank makes disbursements for items such as real estate taxes and, in some cases, hazard insurance premiums.

Loan Concentrations. The maximum amount of credit that the Bank can extend to any single borrower or related group of borrowers generally is limited to 15% of the Bank's unimpaired capital and surplus. Applicable law and regulations permit an additional amount of credit to be extended, equal to 10% of unimpaired capital and surplus, if the loan is secured by readily marketable collateral, which generally does not include real estate. See "Regulation." However, it is currently the Bank's policy not to extend such additional credit. At December 31, 2007, the Bank had no loans in excess of the maximum dollar amount of loans to one borrower that the Bank was authorized to make. At that date, the three largest concentrations of loans to one borrower consisted of loans secured by a combination of commercial real estate and multi-family income producing properties with an aggregate principal balance of \$30.4 million, \$28.0 million and \$23.0 million for each of the three borrowers, respectively.

Loan Servicing. At December 31, 2007, the Bank was servicing \$32.0 million of mortgage loans and \$17.0 million of SBA loans for others. The Bank's policy is to retain the servicing rights to the mortgage and SBA loans that it sells in the secondary market. In order to increase revenue, management intends to continue this policy.

Asset Quality

Loan Collection. When a borrower fails to make a required payment on a loan, the Bank takes a number of steps to induce the borrower to cure the delinquency and restore the loan to current status.

In the case of mortgage loans, personal contact is made with the borrower after the loan becomes 30 days delinquent. At that time, the Bank attempts to make arrangements with the borrower to either bring the loan to current status or begin making payments according to an agreed upon schedule. For the majority of delinquent loans, the borrower is able to bring the loan current within a reasonable time. When the borrower has indicated that he/she will be unable to bring the loan current, or due to other circumstances which, in management's opinion, indicate the borrower will be unable to bring the loan current within a reasonable time, or if the collateral value is deemed to have been impaired, the loan is classified as non-performing. All loans classified as non-performing, which includes all loans past due ninety days or more, are classified as non-accrual unless there is, in management's opinion, compelling evidence the borrower will bring the loan current in the immediate future. At December 31, 2007, there was one loan past due 90 days or more and still accruing interest.

Each non-performing loan is reviewed on an individual basis. Upon classifying a loan as non-performing, management reviews available information and conditions that relate to the status of the loan, including the estimated value of the loan's collateral and any legal considerations that may affect the borrower's ability to continue to make payments to the Bank. Based upon the available information, management will consider the sale of the loan or retention of the loan. If the loan is retained, the Bank may continue to work with the borrower to collect the amounts due or start foreclosure proceedings. If a foreclosure action is initiated and the loan is not brought current, paid in full, or refinanced before the foreclosure sale, the real property securing the loan generally is sold at foreclosure or by the Bank as soon thereafter as practicable.

Once the decision to sell a loan is made, management determines what would be considered adequate consideration to be obtained when that loan is sold, based on the facts and circumstances related to that loan. Investors and brokers are then contacted to seek interest in purchasing the loan. The Bank has been successful in finding buyers for its non-performing loans offered for sale that are willing to pay what it considers to be adequate consideration. Terms of the sale include cash due upon closing of the sale, no contingencies or recourse to the Bank, servicing is released to the buyer and time is of the essence. These sales usually close within a reasonably short time period.

This strategy of selling non-performing loans was implemented during 2003. This has allowed the Bank to optimize its return by quickly converting its non-performing loans to cash, which can then be reinvested in earning assets. This strategy also allows the Bank to avoid lengthy and costly legal proceedings that may occur with non-performing loans. The Bank sold forty-five delinquent mortgage loans totaling \$33.9 million, thirty-five delinquent mortgage loans totaling \$12.2 million, and eleven delinquent mortgage loans totaling \$3.1 million during the years ended December 31, 2007, 2006 and 2005, respectively. The Bank did not record any charges to the allowance for loan losses for the non-performing loans which were sold. The Bank realized gross gains of \$332,000 and no gross losses on the sale of these mortgage loans for the year ended December 31, 2007. The Bank realized gross gains of \$169,000 and gross losses of \$14,000 on the sale of these mortgage loans for the year ended December 31, 2006. The Bank did not realize any gross gains or losses on the sale of these mortgage loans for the year ended December 31, 2005. There can be no assurances that the Bank will continue this strategy in future periods, or if continued, it will be able to find buyers to pay adequate consideration.

On mortgage loans or loan participations purchased by the Bank, for which the seller retains the servicing rights, the Bank receives monthly reports with which it monitors the loan portfolio. Based upon servicing agreements with the servicers of the loans, the Bank relies upon the servicer to contact delinquent borrowers, collect delinquent amounts and initiate foreclosure proceedings, when necessary, all in accordance with applicable laws, regulations and the terms of the servicing agreements between the Bank and its servicing agents. At December 31, 2007, the Bank held \$12.2 million of loans that were serviced by others.

In the case of commercial business or other loans, the Bank generally sends the borrower a written notice of non-payment when the loan is first past due. In the event payment is not then received, additional letters and phone calls generally are made in order to encourage the borrower to meet with a representative of the Bank to discuss the delinquency. If the loan still is not brought current and it becomes necessary for the Bank to take legal action, which typically occurs after a loan is delinquent 90 days or more, the Bank may attempt to repossess personal or business property that secures an SBA loan, commercial business loan or consumer loan.

Delinquent Loans and Non-performing Assets. The Bank generally discontinues accruing interest on delinquent loans when a loan is 90 days past due or foreclosure proceedings have been commenced, whichever first occurs. At that time, previously accrued but uncollected interest is reversed from income. Loans in default 90 days or more as to their maturity date but not their payments, however, continue to accrue interest as long as the borrower continues to remit monthly payments.

The following table sets forth information regarding all non-accrual loans and loans which are past due 90 days or more and still accruing, at the dates indicated. During the years ended December 31, 2007, 2006 and 2005, the amounts of additional interest income that would have been recorded on non-accrual loans, had they been current, totaled \$256,000, \$144,000 and \$103,000, respectively. These amounts were not included in the Bank's interest income for the respective periods.

(Dollars in thousands)	At December 31,				
	2007	2006	2005	2004	2003

Non-performing assets to total assets	0.18%	0.11%	0.10%	0.04%	0.04%

Real Estate Owned (REO). The Bank aggressively markets any REO properties, when and if, they are acquired through foreclosure. At December 31, 2007, 2006 and 2005, the Bank did not own any such properties.

Environmental Concerns Relating to Loans. The Bank currently obtains environmental reports in connection with the underwriting of commercial real estate loans, and typically obtains environmental reports in connection with the underwriting of multi-family loans. For all other loans, the Bank obtains environmental reports only if the nature of the current or, to the extent known to the Bank, prior use of the property securing the loan indicates a potential environmental risk. However, the Bank may not be aware of such uses or risks in any particular case, and, accordingly, there is no assurance that real estate acquired by the Bank in foreclosure is free from environmental contamination or that, if any such contamination or other violation exists, the Bank will not have any liability therefor.

Allowance for Loan Losses

The Bank has established and maintains on its books an allowance for loan losses that is designed to provide a reserve against estimated losses inherent in the Bank's overall loan portfolio. The allowance is established through a provision for loan losses based on management's evaluation of the risk inherent in the various components of its loan portfolio and other factors, including historical loan loss experience (which is updated at least annually), changes in the composition and volume of the portfolio, collection policies and experience, trends in the volume of non-accrual loans and regional and national economic conditions. The determination of the amount of the allowance for loan losses includes estimates that are susceptible to significant changes due to changes in appraisal values of collateral, national and regional economic conditions and other factors. Management reviews the Bank's loan portfolio by separate categories with similar risk and collateral characteristics. Impaired loans are segregated and reviewed separately. All non-performing loans are classified impaired. Impaired loans secured by collateral are reviewed based on their collateral and the estimated time to recover the Bank's investment in the loan, and the estimate of the recovery anticipated. Specific reserves allocated to impaired loans were \$605,000 and \$316,000 at December 31, 2007 and 2006, respectively. For non-collateralized impaired loans, management estimates any recoveries that are anticipated for each loan. Specific reserves are allocated to impaired loans based on this review. In connection with the determination of the allowance, the market value of collateral ordinarily is evaluated by the Bank's staff appraiser; however, the Bank may from time to time obtain independent appraisals for significant properties. Current year charge-offs, charge-off trends, new loan production and current balance by particular loan categories are also taken into account in determining the appropriate amount of

allowance. The Board of Directors reviews and approves the adequacy of the allowance for loan losses on a quarterly basis.

In assessing the adequacy of the allowance, management also reviews the Bank's loan portfolio by separate categories which have similar risk and collateral characteristics; e.g. multi-family residential, commercial real estate, one-to-four family mixed-use property, one-to-four family residential, co-operative apartment, construction, SBA, commercial business, taxi medallion and consumer loans. General provisions are established against performing loans in the Bank's portfolio in amounts deemed prudent from time to time based on the Bank's qualitative analysis of the factors, including the historical loss experience and regional economic conditions. During the five-year period ended December 31, 2007, the Bank incurred total net charge-offs of \$701,000. This reflects a significant improvement over the loss experience of the 1990s. In addition, while the regional economy had slowed by the fourth quarter of 2007, the regional economy has improved since 2001, including significant increases in real estate values. The Bank's underwriting standards generally require a loan-to-value ratio of 75% at a time the loan is originated. Since real estate values have increased significantly since 2001, the loan-to-value ratios for loans originated in prior years have declined below the original 75% level. The rate at which mortgagors have been defaulting on their loans has declined, as the mortgagor's equity in the property has increased. The Bank has not been affected by the recent increase in defaults of sub-prime mortgages as the Bank does not originate, or hold in portfolio, sub-prime mortgages. As a result, the Bank has not incurred losses on mortgage loans in recent years. As a result of these improvements, and despite the increase in the loan portfolio and shift to loans with greater risk, the Bank has not considered it necessary to provide a provision for loan losses during any of the years in the five-year period ended December 31, 2007. Management has concluded, and the Board of Directors has concurred, that, during this time period, the allowance was sufficient to absorb losses inherent in the loan portfolio.

The Bank's determination as to the classification of its assets and the amount of its valuation allowances is subject to review by the OTS and the FDIC, which can require the establishment of additional general allowances or specific loss allowances or require charge-offs. Such authorities may require the Bank to make additional provisions to the allowance based on their judgments about information available to them at the time of their examination. An OTS policy statement provides guidance for OTS examiners in determining whether the levels of general valuation allowances for savings institutions are adequate. The policy statement requires that if a savings institution's general valuation allowance policies and procedures are deemed to be inadequate, recommendations for correcting deficiencies, including any examiner concerns regarding the level of the allowance, should be noted in the report of examination. Additional supervisory action may also be taken based on the magnitude of the observed shortcomings in the allowance process, including the materiality of any error in the reported amount of the allowance.

Management of the Bank believes that the current allowance for loan losses is adequate in light of current economic conditions, the composition of its loan portfolio and other available information and the Board of Directors concurs in this belief. Due to the acquisition of Atlantic Liberty in 2006, the allowance for loan losses was increased by Atlantic Liberty's allowance of \$753,000. The Bank however did not record any additional provision for loan losses for the years ended December 31, 2007, 2006 and 2005. At December 31, 2007, the total allowance for loan losses was \$6.6 million, representing 112.57% of each of non-performing loans and non-performing assets, compared to 225.72% for both of these ratios at December 31, 2006. The Bank continues to monitor and, as necessary, modify the level of its allowance for loan losses in order to maintain the allowance at a level which management considers adequate to provide for probable loan losses based on available information.

Many factors may require additions to the allowance for loan losses in future periods beyond those currently revealed. These factors include future adverse changes in economic conditions, changes in interest rates and changes in the financial capacity of individual borrowers (any of which may affect the ability of borrowers to make repayments on loans), changes in the real estate market within the Bank's lending area and the value of collateral, or a review and evaluation of the Bank's loan portfolio in the future. The determination of the amount of the allowance for loan losses includes estimates that are susceptible to significant changes due to changes in appraised values of collateral, national and regional economic conditions, interest rates and other factors. In addition, the Bank's increased emphasis on multi-family residential, commercial real estate and one-to-four family mixed-use property mortgage loans can be expected to increase the overall level of credit risk inherent in the Bank's loan portfolio. The greater risk associated with these loans, as well as construction loans and business loans, could require the Bank to increase its provisions for loan losses and to maintain an allowance for loan losses as a percentage of total loans that is in excess of the allowance currently maintained by the Bank. Provisions for loan losses are charged against net income. See "—Lending Activities" and "—Asset Quality."

The following table sets forth changes in, and the balance of, the Bank's allowance for loan losses.

Investment Activities

General. The investment policy of the Company, which is approved by the Board of Directors, is designed primarily to manage the interest rate sensitivity of its overall assets and liabilities, to generate a favorable return without incurring undue interest rate and credit risk, to complement the Bank's lending activities and to provide and maintain liquidity. In establishing its investment strategies, the Company considers its business and growth strategies, the economic environment, its interest rate risk exposure, its interest rate sensitivity "gap" position, the types of securities to be held, and other factors. See "Management's Discussion and Analysis of Financial Condition and Results of Operations — Overview—Management Strategy" in Item 7 of this Annual Report.

Federally chartered savings institutions have authority to invest in various types of assets, including U.S. government obligations, securities of various federal agencies, mortgage-backed and mortgage-related securities, certain certificates of deposit of insured banks and savings institutions, certain bankers acceptances, reverse repurchase agreements, loans of federal funds, and, subject to certain limits, corporate securities, commercial paper and mutual funds. The Company primarily invests in mortgage-backed securities, U. S. government obligations, and mutual funds which purchase these same instruments.

The Investment Committee of the Bank and the Company meets quarterly to monitor investment transactions and to establish investment strategy. The Board of Directors reviews the investment policy on an annual basis and investment activity on a monthly basis.

The Company classifies its investment securities as available for sale. Unrealized gains and losses (other than unrealized losses considered other than temporary) for available-for-sale securities are excluded from earnings and included in Accumulated Other Comprehensive Income (a separate component of equity), net of taxes. At December 31, 2007, the Company had \$440.1 million in securities available for sale which represented 13.1% of total assets. These securities had an aggregate market value at December 31, 2007 that was approximately 1.9 times the amount of the Company's equity at that date. The cumulative balance of unrealized net gains on securities available for sale was \$16,000, net of taxes, at December 31, 2007. As a result of the magnitude of the Company's holdings of securities available for sale, changes in interest rates could produce significant changes in the value of such securities and could produce significant fluctuations in the equity of the Company. See Note 4 of Notes to Consolidated Financial Statements, included in Item 8 of this Annual Report. The Company may from time to time sell securities and realize a loss if the proceeds of such sale may be reinvested in loans or other assets offering more attractive yields.

At December 31, 2007, there was one issuer's security, excluding government agencies or government sponsored agencies, that either alone, or together with any investments in the securities of any affiliate(s) of such issuer, exceeded 10% of the Company's equity. This security is a collateralized mortgage obligation issued by Residential Asset Securitization Trust 2006-A4IP, and is a senior fixed-rate pass-through whose credit enhancement is the securities subordinated to this security. The Company's amortized cost of this security as of December 31, 2007 was \$24.7 million, and the fair value of the security was \$24.4 million. The Company does not consider this investment to be other-than-temporarily impaired as of December 31, 2007.

The table below sets forth certain information regarding the amortized cost and market values of the Company's securities portfolio, interest bearing deposits and federal funds sold, at the dates indicated. Securities available for sale are recorded at market value. See Note 4 of Notes to Consolidated Financial Statements, included in Item 8 of this Annual Report.

Mortgage-backed securities. At December 31, 2007, the Company had \$362.7 million invested in mortgage-backed securities, of which \$13.5 million was invested in adjustable-rate mortgage-backed securities. The mortgage loans underlying these adjustable-rate securities generally are subject to limitations on annual and lifetime interest rate increases. The Company anticipates that investments in mortgage-backed securities may continue to be used in the future to supplement mortgage-lending activities. Mortgage-backed securities are more liquid than individual mortgage loans and may be used more easily to collateralize obligations of the Bank.

The following table sets forth the Company's mortgage-backed securities purchases, sales and principal repayments for the years indicated:

	For the years ended December 31,		
	2007	2006	2005
	<i>(In thousands)</i>

Sales of mortgage-backed securities	-	(36,220)	(28,643)
Principal repayments received on mortgage-backed securities	(48,232)	(50,739)	(87,915)
Net increase (decrease) in mortgage-backed securities	<u>73,878</u>	<u>(12,343)</u>	<u>(94,435)</u>
Balance at end of year	<u>\$ 362,729</u>	<u>\$ 288,851</u>	<u>\$ 301,194</u>

While mortgage-backed securities carry a reduced credit risk as compared to whole loans, such securities remain subject to the risk that a fluctuating interest rate environment, along with other factors such as the geographic distribution of the underlying mortgage loans, may alter the prepayment rate of such mortgage loans and so affect both the prepayment speed and value of such securities. The Company does not own any derivative instruments that are extremely sensitive to changes in interest rates.

The table below sets forth certain information regarding the amortized cost, fair value, annualized weighted average yields and maturities of the Company's debt and equity securities at December 31, 2007. The stratification of balances is based on stated maturities. Equity securities are shown as immediately maturing, except for preferred stocks with stated redemption dates, which are shown in the period they are scheduled to be redeemed. Assumptions for repayments and prepayments are not reflected for mortgage-backed securities. The Company carries these investments at their fair value in the consolidated financial statements.

Sources of Funds

General. Deposits, FHLB-NY borrowings, repurchase agreements, principal and interest payments on loans, mortgage-backed and other securities, and proceeds from sales of loans and securities are the Company's primary sources of funds for lending, investing and other general purposes.

Deposits. The Bank offers a variety of deposit accounts having a range of interest rates and terms. The Bank's deposits principally consist of savings accounts, money market accounts, demand accounts, NOW accounts and certificates of deposit. The Bank has a relatively stable retail deposit base drawn from its market area through its fourteen full service offices. The Bank seeks to retain existing depositor relationships by offering quality service and competitive interest rates, while keeping deposit growth within reasonable limits. It is management's intention to balance its goal to maintain competitive interest rates on deposits while seeking to manage its cost of funds to finance its strategies.

In November, 2006, the Bank launched "iGObanking.com[®]", an internet branch, offering savings accounts and certificates of deposit. This allows the Bank to compete on a national scale without the geographical constraints of physical locations. Since the number of U.S. households with accounts at Web-only banks has grown more than tenfold in the past six years, our strategy was to join the market place by creating a branch that offers clients the simplicity and flexibility of a virtual online bank, which is a division of a stable, traditional bank that was established in 1929. At December 31, 2007, total deposits for the internet branch were \$133.0 million.

In 2007, the Bank formed a new wholly owned subsidiary, Flushing Commercial Bank, a New York State chartered commercial bank, for the limited purpose of accepting municipal deposits and state funds in the State of New York. The commercial bank offers a full range of deposit products to municipalities and the State of New York, similar to the products currently being offered by the Bank. To date the operations of Flushing Commercial Bank have not been material.

The Bank's core deposits, consisting of savings accounts, NOW accounts, money market accounts, and non-interest bearing demand accounts, are typically more stable and lower costing than other sources of funding. However, the flow of deposits into a particular type of account is influenced significantly by general economic conditions, changes in prevailing money market and other interest rates, and competition. The Bank has seen an increase in its deposits in each of the past three years. While the nation's economy continued to expand in 2006 and 2007, the economy began to show signs of slowing growth in late 2007. The Bank saw an increase in its due to depositors during 2007 of \$258.6 million. The Federal Reserve's Federal Open Market Committee ("FOMC") began increasing short-term interest rates in the second half of 2004, and continued increasing short-term rates through June 2006. The FOMC held the short-term interest rates through September 2007, and then lowered short-term interest rates 100 basis through December 2007. The Bank responded by increasing interest rates paid on savings, money market and certificate of deposit accounts during 2005 and 2006. The Bank held rates through most of 2007, before being able to lower rates near the end of 2007. This resulted in new deposits being obtained at rates that were higher than the weighted average cost of existing deposits. The cost of deposits increased to 4.31% in the fourth quarter of 2007 from 3.97% in the fourth quarter of 2006 and 2.95% in the fourth quarter of 2005. While we are unable to predict the direction of future interest rate changes, if interest rates rise during 2008, the result could be continued increases in the Company's cost of deposits, which could reduce the Company's net interest margin. Similarly, if interest rates decline in 2008, the Company could see a decline in its cost of deposits, which could increase the Company's net interest margin.

Included in deposits are certificates of deposit with a balance of \$100,000 or more totaling \$318.5 million, \$298.9 million and \$255.3 million at December 31, 2007, 2006 and 2005, respectively.

The Bank utilizes brokered deposits as an additional funding source. Brokered deposits are marketed through national brokerage firms to their customers in \$1,000 increments. The Bank maintains only one account for the total deposit amount, while the detailed records of owners are maintained by the brokerage firms. The Depository Trust Company is used as the clearing house, maintaining each deposit under the name of CEDE & Co. The deposits are transferable just like a stock or bond investment and the customer can open the account with only a phone call, just like buying a stock or bond. This provides a large deposit for the Bank at a lower operating cost since the Bank only has one account to maintain versus several accounts with multiple interest and maturity checks. The Bank seeks to obtain brokered deposits primarily when the interest rate on these deposits is below the prevailing interest rate in its market.

Unlike non-brokered deposits, where the deposit amount can be withdrawn with a penalty for any reason, including increasing interest rates, a brokered deposit can only be withdrawn in the event of the death, or court declared mental incompetence, of the depositor. This allows the Bank to better manage the maturity of its deposits. Currently, the

rates offered by the Bank for brokered deposits are comparable to that offered for retail certificates of deposit of similar size and maturity.

The Bank also offers access to \$50 million per customer in FDIC insurance coverage through a Certificate of Deposit Account Registry Service ("CDARS®"). CDARS® is a deposit placement service. The Bank belongs to a network which arranges for placement of funds into certificate of deposit accounts issued by other member banks of the network in increments of less than \$100,000 to ensure that both principal and interest are eligible for full FDIC deposit insurance. This allows the Bank to accept deposits in excess of \$100,000 from a depositor, and place the deposits through the network to other member banks to provide full FDIC deposit insurance coverage. The Bank may receive deposits from other member banks in exchange for the deposits the Bank places into the network. The Bank may also obtain deposits from other network member banks without placing deposits into the network, or place deposits with other member banks without receiving deposits from other member banks. Depositors are allowed to withdraw funds, with a penalty, from these accounts at one or more of the member banks that hold the deposits.

Brokered deposits and funds obtained through the CDARS® network are classified as brokered deposits for financial reporting purposes. At December 31, 2007, the Bank has \$201.7 million classified as brokered deposits, with \$16.5 million obtained through the CDARS® network and \$185.2 million obtained through brokers.

The following table sets forth the distribution of the Bank's deposit accounts at the dates indicated and the weighted average nominal interest rates on each category of deposits presented.

Borrowings. Although deposits are the Bank's primary source of funds, the Bank also uses borrowings as an alternative and cost effective source of funds for lending, investing and other general purposes. The Bank is a member of, and is eligible to obtain advances from, the FHLB-NY. Such advances generally are secured by a blanket lien against the Bank's mortgage portfolio and the Bank's investment in the stock of the FHLB-NY. In addition, the Bank may pledge mortgage-backed securities to obtain advances from the FHLB-NY. See "— Regulation — Federal Home Loan Bank System." The maximum amount that the FHLB-NY will advance for purposes other than for meeting withdrawals fluctuates from time to time in accordance with the policies of the FHLB-NY. The Bank also enters into repurchase agreements with broker-dealers and the FHLB-NY. These agreements are recorded as financing transactions and the obligations to repurchase are reflected as a liability in the Company's consolidated financial statements. In addition, the Holding Company issued junior subordinated debentures with a total par of \$61.8 million in June and July 2007. These junior subordinated debentures are carried at fair value in the consolidated statement of financial position. The average cost of borrowed funds was 4.97%, 4.73% and 4.33% for the years ended December 31, 2007, 2006 and 2005, respectively. The average balances of borrowed funds were \$897.8 million, \$715.3 million and \$683.0 million for the same years, respectively.

The following table sets forth certain information regarding the Company's borrowed funds at or for the periods ended on the dates indicated.

Subsidiary Activities

At December 31, 2007, the Holding Company had four wholly owned subsidiaries: the Bank and the Trusts. In addition, the Bank had four wholly owned subsidiaries: Flushing Commercial Bank ("FCB"), FSB Properties, Inc. ("Properties"), Flushing Preferred Funding Corporation ("FPFC"), and Flushing Service Corporation.

(a) FCB was formed in 2007 for the limited purpose of accepting municipal deposits and state funds, including certain court ordered funds from New York State Courts, in the State of New York.

(b) Properties was formed in 1976 under the Bank's New York State leeway investment authority. The original purpose of Properties was to engage in joint venture real estate equity investments. The Bank discontinued these activities in 1986. The last joint venture in which Properties was a partner was dissolved in 1989. The last remaining property acquired by the dissolution of these joint ventures was disposed of in 1998.

(c) FPFC was formed in 1997 as a real estate investment trust for the purpose of acquiring, holding and managing real estate mortgage assets. FPFC also provides an additional vehicle for access by the Company to the capital markets for future opportunities.

(d) Flushing Service Corporation was formed in 1998 to market insurance products and mutual funds.

Personnel

At December 31, 2007, the Bank had 269 full-time employees and 56 part-time employees. None of the Bank's employees are represented by a collective bargaining unit, and the Bank considers its relationship with its employees to be good. At the present time, the Holding Company only employs certain officers of the Bank. These employees do not receive any extra compensation as officers of the Holding Company.

Omnibus Incentive Plan

The 2005 Omnibus Incentive Plan ("Omnibus Plan") became effective on May 17, 2005 after adoption by the Board of Directors and approval by the stockholders. The Omnibus Plan authorizes the Compensation Committee to grant a variety of equity compensation awards as well as long-term and annual cash incentive awards, all of which can be structured so as to comply with Section 162(m) of the Internal Revenue Code. As of December 31, 2007, there are 189,774 shares available under the full value award plan and 153,188 shares under the non-full value plan. The Company has applied the shares previously authorized by stockholders under the 1996 Stock Option Incentive Plan and the 1996 Restricted Stock Incentive Plan for use under the non-full value and full value plans, respectively, for future awards under the Omnibus Plan. All grants and awards under the 1996 Stock Option Incentive Plan and 1996 Restricted Stock Incentive Plan prior to the effective date of the Omnibus Plan remain outstanding as issued. The Company will continue to maintain separate pools of available shares for full value as opposed to non-full value awards, except that shares can be moved from the non-full value pool to the full value pool on a 3-for-1 basis. In April 2007 the Company removed 399,999 shares from the non-full value pool and moved those shares to the full value pool on a 3-for-1 basis resulting in 133,333 shares being added to the full value pool. The exercise price per share of a stock option grant may not be less than the fair market value of the common stock of the Company on the date of grant, and may not be repriced without the approval of the Company's stockholders. Options, stock appreciation rights, restricted stock, restricted stock units and other stock based awards granted under the Omnibus Plan are generally subject to a minimum vesting period of three years. The Omnibus Plan increased the annual grants to each non-employee director to 3,600 restricted stock units, while eliminating grants of stock options for non-employee directors. Prior to the approval of the 2005 Omnibus Plan non-employee directors were annually granted 1,687 restricted stock unit awards and 14,850 stock options. This change provided an expense benefit in 2006, as we began expensing stock options grants as required by SFAS No. 123 R, Share-Based Compensation.

For additional information concerning this plan, see "Note 9 of Notes to Consolidated Financial Statements" in Item 8 of this Annual Report.

FEDERAL, STATE AND LOCAL TAXATION

The following discussion of tax matters is intended only as a summary and does not purport to be a comprehensive description of the tax rules applicable to the Company.

Federal Taxation

General. The Company reports its income using a calendar year and the accrual method of accounting. The Company is subject to the federal tax laws and regulations which apply to corporations generally, as well as, since the enactment of the Small Business Job Protection Act of 1996 (the "Act"), those governing the Bank's deductions for bad debts, described below.

Bad Debt Reserves. Prior to the enactment of the Act, which was signed into law on August 20, 1996, savings institutions which met certain definitional tests primarily relating to their assets and the nature of their business ("qualifying thrifts"), such as the Bank, were allowed deductions for bad debts under methods more favorable than those granted to other taxpayers. Qualifying thrifts could compute deductions for bad debts using either the specific charge off method of Section 166 of the Internal Revenue Code (the "Code") or the reserve method of Section 593 of the Code. Section 1616(a) of the Act repealed the Section 593 reserve method of accounting for bad debts by qualifying thrifts, effective for taxable years beginning after 1995. Qualifying thrifts that are treated as large banks, such as the Bank, are required to use the specific charge off method, pursuant to which the amount of any debt may be deducted only as it actually becomes wholly or partially worthless.

Distributions. To the extent that the Bank makes "non-dividend distributions" to stockholders that are considered to result in distributions from its pre-1988 reserves or the supplemental reserve for losses on loans ("excess distributions"), then an amount based on the amount distributed will be included in the Bank's taxable income. Non-dividend distributions include distributions in excess of the Bank's current and post-1951 accumulated earnings and profits, as calculated for federal income tax purposes, distributions in redemption of stock and distributions in partial or complete liquidation. The amount of additional taxable income resulting from an excess distribution is an amount that when reduced by the tax attributable to the income is equal to the amount of the excess distribution. Thus, slightly more

than one and one-half times the amount of the excess distribution made would be includable in gross income for federal income tax purposes, assuming a 35% federal corporate income tax rate. See “Regulation — Restrictions on Dividends and Capital Distributions” for limits on the payment of dividends by the Bank. The Bank does not intend to pay dividends or make non-dividend distributions described above that would result in a recapture of any portion of its pre-1988 bad debt reserves.

Corporate Alternative Minimum Tax. The Code imposes an alternative minimum tax on corporations equal to the excess, if any, of 20% of alternative minimum taxable income (“AMTI”) over a corporation’s regular federal income tax liability. AMTI is equal to taxable income with certain adjustments. Generally, only 90% of AMTI can be offset by net operating loss carrybacks and carryforwards.

State and Local Taxation

New York State and New York City Taxation. The Company is subject to the New York State Franchise Tax on Banking Corporations in an annual amount equal to the greater of (1) 7.1% (7.5% for 2006 and 2005) of “entire net income” allocable to New York State during the taxable year or (2) the applicable alternative minimum tax. The alternative minimum tax is generally the greater of (a) 0.01% of the value of assets allocable to New York State with certain modifications, (b) 3% of “alternative entire net income” allocable to New York State or (c) \$250. Entire net income is similar to federal taxable income, subject to certain modifications, including that net operating losses arising during any taxable year prior to January 1, 2001 cannot be carried back or carried forward, and net operating losses arising during any taxable year beginning on or after January 1, 2001 cannot be carried back. Alternative entire net income is equal to entire net income without certain deductions which are allowable in the calculation of entire net income. The Company also is subject to a similarly calculated New York City tax of 9% on income allocated to New York City (although net operating losses cannot be carried back or carried forward regardless of when they arise) and similar alternative taxes. In addition, the Company is subject to a tax surcharge at a rate of 17% of the New York State Franchise Tax that is attributable to business activity carried on within the Metropolitan Commuter Transportation District.

Notwithstanding the repeal of the federal income tax provisions permitting bad debt deductions under the reserve method, New York State has enacted legislation maintaining the preferential treatment of additional loss reserves for qualifying real property and non-qualifying loans of qualifying thrifts for both New York State and New York City tax purposes. Calculation of the amount of additions to reserves for qualifying real property loans is limited to the larger of the amount derived by the percentage of taxable income method or the experience method. For these purposes, the applicable percentage to calculate the bad debt deduction under the percentage of taxable income method is 32% of taxable income, reduced by additions to reserves for non-qualifying loans, except that the amount of the addition to the reserve cannot exceed the amount necessary to increase the balance of the reserve for losses on qualifying real property loans at the close of the taxable year to 6% of the balance of the qualifying real property loans outstanding at the end of the taxable year. Under the experience method, the maximum addition to a loan reserve generally equals the amount necessary to increase the balance of the bad debt reserve at the close of the taxable year to the greater of (1) the amount that bears the same ratio to loans outstanding at the close of the taxable year as the total net bad debts sustained during the current and five preceding taxable years bears to the sum of the loans outstanding at the close of those six years, or (2) the balance of the bad debt reserve at the close of the “base year,” or, if the amount of loans outstanding has declined since the base year, the amount which bears the same ratio to the amount of loans outstanding at the close of the taxable year as the balance of the reserve at the close of the base year. For these purposes, the “base year” is the last taxable year beginning before 1988. The amount of additions to reserves for non-qualifying loans is computed under the experience method. In no event may the additions to reserves for qualifying real property loans be greater than the larger of the amount determined under the experience method or the amount which, when added to the additions to reserves for non-qualifying loans, equal the amount by which 12% of the total deposits or withdrawable accounts of depositors of the Bank at the close of the taxable year exceeds the sum of the Bank’s surplus, undivided profits and reserves at the beginning of such year.

Delaware State Taxation. As a Delaware holding company not earning income in Delaware, the Company is exempt from Delaware corporate income tax but is required to file an annual report with and pay an annual franchise tax to the State of Delaware.

REGULATION

General

The Holding Company is registered with the OTS as a savings and loan holding company and is subject to OTS regulations, examinations, supervision and reporting requirements. In addition, the OTS has enforcement authority over the Company and any non-savings institution subsidiaries it may form or acquire. Among other things, this authority

permits the OTS to restrict or prohibit activities that it determines may pose a serious risk to the Bank. As a publicly owned company, the Company is required to file certain reports with the Securities and Exchange Commission (“SEC”) under federal securities laws. The Bank is a member of the FHLB System. The Bank is subject to extensive regulation by the OTS, as its chartering agency, and the FDIC, as the insurer of the Bank’s deposits. The Bank is also subject to certain regulations promulgated by the other federal agencies. The Bank must file reports with the OTS and the FDIC concerning its activities and financial condition, in addition to obtaining regulatory approvals prior to entering into certain transactions such as mergers with or acquisitions of other savings institutions. The Bank is subject to periodic examinations by the OTS and the FDIC to examine whether the Bank is in compliance with various regulatory requirements. This regulation and supervision establishes a comprehensive framework of activities in which an institution can engage and is intended primarily to ensure the safe and sound operation of the Bank for the protection of the insurance fund and depositors. The regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities and examination policies, including policies with respect to the classification of assets and the establishment of an adequate allowance for possible loan losses for regulatory purposes. Any change in such regulation, whether by the OTS, the FDIC, other federal agencies or the United States Congress, could have a material adverse impact on the Company, the Bank and their operations.

The activities of federal savings institutions are governed primarily by the Home Owners’ Loan Act, as amended (“HOLA”) and, in certain respects, the Federal Deposit Insurance Act (“FDIA”). Most regulatory functions relating to deposit insurance and to the administration of conservatorships and receiverships of insured institutions are exercised by the FDIC. The Federal Deposit Insurance Corporation Improvement Act of 1991 (“FDICIA”), among other things, requires that federal banking regulators intervene promptly when a depository institution experiences financial difficulties, mandated the establishment of a risk-based deposit insurance assessment system, and required imposition of numerous additional safety and soundness operational standards and restrictions. FDICIA and the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (“FIRREA”) each contain provisions affecting numerous aspects of the operations and regulations of federal savings banks, and these laws empower the OTS and the FDIC, among other agencies, to promulgate regulations implementing their provisions.

Set forth below is a brief description of certain laws and regulations which relate to the regulation of the Bank and the Company. The description does not purport to be a comprehensive description of applicable laws, rules and regulations and is qualified in its entirety by reference to applicable laws, rules and regulations.

Holding Company Regulation

The Company is a unitary savings and loan holding company within the meaning of the HOLA. As such, the Company is required to register with the OTS and is subject to OTS regulations, examinations, supervision and reporting requirements. In addition, the OTS has enforcement authority over the Company and any non-savings institution subsidiaries it may form or acquire. Among other things, this authority permits the OTS to restrict or prohibit activities that it determines may pose a serious risk to the Bank. See “—Restrictions on Dividends and Capital Distributions.”

HOLA prohibits a savings and loan holding company, directly or indirectly, or through one or more subsidiaries, from (1) acquiring another savings institution or holding company thereof, without prior written approval of the OTS; (2) acquiring or retaining, with certain exceptions, more than 5% of a non-subsidiary savings institution, a non-subsidiary holding company, or a non-subsidiary company engaged in activities other than those permitted by HOLA; or (3) acquiring or retaining control of a depository institution that is not federally insured. In evaluating applications by holding companies to acquire savings institutions, the OTS will consider the financial and managerial resources and future prospects of the company and institution involved, the effect of the acquisition on the risk to the insurance funds, the convenience and needs of the community, and the impact of any competitive factors that may be involved.

As a unitary savings and loan holding company, the Company currently is not restricted as to the types of business activities in which it may engage, provided that the Bank continues to meet the qualified thrift lender (“QTL”) test. See “—Qualified Thrift Lender Test.” Upon any non-supervisory acquisition by the Company of another savings association or savings bank, the Company would become a multiple savings and loan holding company (if the acquired institution is held as a separate subsidiary) and would be subject to extensive limitations on the types of business activities in which it could engage. HOLA limits the activities of a multiple savings and loan holding company and its non-insured institution subsidiaries primarily to activities permissible for bank holding companies under Section 4(c)(8) of the Bank Holding Company Act, subject to the prior approval of the OTS, and activities authorized by OTS regulation.

The OTS is prohibited from approving any acquisition that would result in a multiple savings and loan holding company controlling savings institutions in more than one state, subject to two exceptions: (1) emergency acquisitions authorized by the FDIC and (2) the acquisition of a savings institution in another state if the laws of the state of the target savings institution specifically permit such acquisitions. Under New York law, reciprocal interstate acquisitions are

authorized for savings and loan holding companies and savings institutions. Certain states do not authorize interstate acquisitions under any circumstances; however, federal law authorizing acquisitions in supervisory cases preempts such state law.

Federal law generally provides that no “person” acting directly or indirectly or through or in concert with one or more other persons, may acquire “control,” as that term is defined in OTS regulations, of a federally insured savings institution without giving at least 60 days’ written notice to the OTS and providing the OTS an opportunity to disapprove the proposed acquisition. Such acquisitions of control may be disapproved if it is determined, among other things, that (1) the acquisition would substantially lessen competition; (2) the financial condition of the acquiring person might jeopardize the financial stability of the savings institution or prejudice the interests of its depositors; or (3) the competency, experience or integrity of the acquiring person or the proposed management personnel indicates that it would not be in the interest of the depositors or the public to permit the acquisition of control by such person.

Investment Powers

The Bank is subject to comprehensive regulation governing its investments and activities. Among other things, the Bank may invest in (1) residential mortgage loans, mortgage-backed securities, education loans and credit card loans in an unlimited amount, (2) non-residential real estate loans up to 400% of total capital, (3) commercial business loans up to 20% of total assets (however, amounts over 10% of total assets must be used only for small business loans) and (4) in general, consumer loans and highly rated commercial paper and corporate debt securities in the aggregate up to 35% of total assets. In addition, the Bank may invest up to 3% of its total assets in service corporations, an unlimited percentage of its assets in operating subsidiaries (which may only engage in activities permissible for the Bank itself) and under certain conditions may invest in finance subsidiaries. Other than investments in service corporations, operating subsidiaries, finance subsidiaries and certain government-sponsored enterprises, such as FHLMC and FNMA, the Bank generally is not permitted to make equity investments. See “— General — Investment Activities.” A service corporation in which the Bank may invest is permitted to engage in activities that a federal savings bank may conduct directly, other than taking deposits, as well as certain activities pre-approved by the OTS, which include providing certain support services for the institution; originating, investing in, selling, purchasing, servicing or otherwise dealing with specified types of loans and participations (principally loans that the parent institution could make); specified real estate activities, including limited real estate development; securities brokerage services; certain insurance brokerage activities; and other specified investments and services.

Real Estate Lending Standards

FDICIA requires each federal banking agency to adopt uniform regulations prescribing standards for extensions of credit which are either (1) secured by real estate, or (2) made for the purpose of financing the construction of improvements on real estate. In prescribing these standards, the banking agencies must consider the risk posed to the deposit insurance funds by real estate loans, the need for safe and sound operation of insured depository institutions and the availability of credit. The OTS and the other federal banking agencies adopted uniform regulations, effective March 19, 1993. The OTS regulation requires each savings association to establish and maintain written internal real estate lending standards consistent with safe and sound banking practices and appropriate to the size of the institution and the nature and scope of its real estate lending activities. The policy must also be consistent with accompanying OTS guidelines, which include maximum loan-to-value ratios for the following types of real estate loans: raw land (65%), land development (75%), nonresidential construction (80%), improved property (85%) and one-to-four family residential construction (85%). Owner-occupied one-to-four family mortgage loans and home equity loans do not have maximum loan-to-value ratio limits, but owner-occupied one-to-four family mortgage loans with a loan-to-value ratio at origination of 90% or greater are to be backed by private mortgage insurance or readily marketable collateral. Institutions are also permitted to make a limited amount of loans that do not conform to the proposed loan-to-value limitations so long as such exceptions are appropriately reviewed and justified. The guidelines also list a number of lending situations in which exceptions to the loan-to-value standard are justified.

Loans-to-One Borrower Limits

The Bank generally is subject to the same loans-to-one borrower limits that apply to national banks. With certain exceptions, total loans and extensions of credit outstanding at one time to one borrower (including certain related entities of the borrower) may not exceed, for loans not fully secured, 15% of the Bank’s unimpaired capital and unimpaired surplus, plus, for loans fully secured by readily marketable collateral, an additional 10% of the Bank’s unimpaired capital and unimpaired surplus. At December 31, 2007, the largest amount the Bank could lend to one borrower was approximately \$36.2 million, and at that date, the Bank’s largest aggregate amount of loans-to-one borrower was \$30.4 million, all of which were performing according to their terms. See “— General — Lending Activities.”

Insurance of Accounts

The deposits of the Bank are insured up to \$100,000 per depositor, excluding retirement accounts, which are insured up to \$250,000 per depositor, (as defined by federal law and regulations) by the FDIC. All of the Bank's deposits are presently insured by the FDIC under the Deposit Insurance Fund ("DIF"). Previously, the majority of the Bank's deposits were insured by the Bank Insurance Fund ("BIF"), and the remainder by the Savings Association Insurance Fund ("SAIF"). As insurer, the FDIC is authorized to conduct examinations of, and to require reporting by, insured institutions. It also may prohibit any insured institution from engaging in any activity the FDIC determines by regulation or order to pose a serious threat to the insurance fund. The FDIC also has the authority to initiate enforcement actions where the OTS has failed or declined to take such action after receiving a request to do so from the FDIC.

On February 8, 2006, as part of the Deficit Reduction Act of 2005, the Federal Deposit Insurance Reform Act of 2005 ("Deposit Act") was enacted. The Deposit Act required the FDIC to merge the BIF and SAIF into a new insurance fund, the DIF, no later than July 1, 2006. The funds were merged on March 31, 2006. The FDIC was also required to propose regulations to implement the Deposit Act's provisions. These regulations have been finalized and became effective January 1, 2007. Other major provisions of the Deposit Act include: (1) maintaining basic deposit insurance coverage at \$100,000, and increasing deposit insurance coverage to \$250,000 for certain retirement accounts, with increases for inflation each five years beginning in 2011, (2) giving the FDIC flexibility to manage the insurance fund by setting the designated reserve ratio between 1.15% and 1.50% (thereby eliminating the 1.25% trigger), (3) requiring all banks to be assessed premiums, (4) providing a one-time assessment credit of \$4.7 billion to banks and savings institutions in existence on December 31, 1996, that capitalized the FDIC in the 1990s to offset future premiums under a new risk-based assessment system, and (5) imposing a cap on the growth of the insurance fund by requiring a premium dividend to institutions when certain levels of the DIF are exceeded.

The FDIC utilizes a risk-based deposit insurance assessment system. Through December 31, 2006, under this system, the FDIC assigned each institution to one of three capital categories — "well capitalized," "adequately capitalized" and "undercapitalized" — which are defined in the same manner as the regulations establishing the prompt corrective action system under Section 38 of FDIA, as discussed below. These three categories were then divided into three subcategories which reflect varying levels of supervisory concern. The matrix so created resulted in nine assessment risk classifications. Effective January 1, 2007, the FDIC revised their risk-based deposit insurance assessment system, and placed institutions into four risk categories based upon supervisory and capital evaluations. Risk Category 1 is further subdivided based upon supervisory ratings and other risk measures to differentiate risk. At December 31, 2007, the Bank's annual assessment rate was 0.05%. This assessment rate for 2008 has not yet been determined. The Bank was provided a one-time assessment credit of \$1.1 million, which is being used to offset the FDIC assessment. During 2007, the Bank utilized \$1.0 million of this credit to offset the FDIC assessment. The Bank's assessment rate in effect from time to time will depend upon the risk category to which it is assigned. In addition, the FDIC is authorized to increase federal deposit insurance assessment rates to the extent necessary to protect the fund under current law. Any increase in deposit insurance assessment rates, as a result of a change in the category or subcategory to which the Bank is assigned or the exercise of the FDIC's authority to increase assessment rates generally, could have an adverse effect on the earnings of the Bank.

Under the FDIA, insurance of deposits may be terminated by the FDIC upon a finding that the institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC. The management of the Bank does not know of any practice, condition or violation that might lead to termination of deposit insurance.

On September 30, 1996, as part of an omnibus appropriations bill, the Deposit Insurance Funds Act of 1996 (the "Funds Act") was enacted. The Funds Act required BIF institutions, beginning January 1, 1997, to pay a portion of the interest due on the Finance Corporation ("FICO") bonds issued in connection with the savings and loan association crisis in the late 1980s, and required BIF institutions to pay their full pro rata share of the FICO payments starting the earlier of January 1, 2000 or the date at which no savings institution continues to exist. The Bank was required, as of January 1, 2000, to pay its full pro rata share of the FICO payments. The FICO assessment rate is subject to change. The Bank paid \$224,000, \$191,000 and \$179,000 for its share of the interest due on FICO bonds in 2007, 2006 and 2005, respectively.

Qualified Thrift Lender Test

Institutions regulated by the OTS are required to meet a QTL test to avoid certain restrictions on their operations. FDICIA and applicable OTS regulations require such institutions to maintain at least 65% of their portfolio assets (total assets less intangibles, properties used to conduct the institution's business and liquid assets not exceeding 20% of total assets) in "qualified thrift investments" on a monthly average basis in nine of every 12 months. Qualified thrift investments constitute primarily residential mortgage loans and related investments, including certain mortgage-backed and mortgage-related securities. A savings institution that fails the QTL test must either convert to a bank charter

or, in general, it will be prohibited from: (1) making an investment or engaging in any new activity not permissible for a national bank, (2) paying dividends not permissible under national bank regulations and (3) establishing any new branch office in a location not permissible for a national bank in the institution's home state. One year following the institution's failure to meet the QTL test, any holding company parent of the institution must register and be subject to supervision as a bank holding company. In addition, beginning three years after the institution failed the QTL test, the institution would be prohibited from retaining any investment or engaging in any activity not permissible for a national bank. At December 31, 2007 the Bank had maintained more than 65% of its "portfolio assets" in qualified thrift investments in at least nine of the preceding 12 months. Accordingly, on that date, the Bank had met the QTL test.

Under the Economic Growth and Paperwork Reduction Act of 1996 ("Regulatory Paperwork Reduction Act"), Congress modified and expanded investment authority under the QTL test. The Regulatory Paperwork Reduction Act amendments permit federal thrifts to invest in, sell, or otherwise deal in education and credit card loans without limitation and raised from 10% to 20% of total assets the aggregate amount of commercial, corporate, business, or agricultural loans or investments that may be made by a thrift, subject to a requirement that amounts in excess of 10% of total assets be used only for small business loans. In addition, the Regulatory Paperwork Reduction Act defines "qualified thrift investment" to include, without limit, education, small business, and credit card loans; and removes the 10% limit on personal, family, or household loans for purposes of the QTL test. The legislation also provides that a thrift meets the QTL test if it qualifies as a domestic building and loan association under the Code.

Transactions with Affiliates

Transactions between the Bank and any related party or "affiliate" are governed by Sections 23A and 23B of the Federal Reserve Act. An affiliate is generally any company or entity which controls, is controlled by or is under common control with the Bank, including the Company, the Trust, the Bank's subsidiaries, and any other qualifying subsidiary of the Bank or the Company that may be formed or acquired in the future. Generally, Sections 23A and 23B: (1) limit the extent to which the Bank or its subsidiaries may engage in "covered transactions" with any one affiliate to an amount equal to 10% of the Bank's capital stock and surplus, and impose an aggregate limit on all such transactions with all affiliates to an amount equal to 20% of such capital stock and surplus, and (2) require that all such transactions be on terms substantially the same, or at least as favorable, to the Bank or subsidiary as those provided to a non-affiliate. The term "covered transaction" includes the making of loans, purchase of assets, issuance of a guarantee and other similar types of transactions. Each loan or extension of credit to an affiliate by the Bank must be secured by collateral with a market value ranging from 100% to 130% (depending on the type of collateral) of the amount of credit extended. In addition, the Bank may not: (1) loan or otherwise extend credit to an affiliate, except to any affiliate which engages only in activities which are permissible for bank holding companies under Section 4(c) of the Bank Company Act, or (2) purchase or invest in any stocks, bonds, debentures, notes or similar obligations of any affiliates, except subsidiaries of the Bank.

In addition, the Bank is subject to Regulation O promulgated under Sections 22(g) and 22(h) of the Federal Reserve Act. Regulation O requires that loans by the Bank to a director, executive officer or to a holder of more than 10% of the Common Stock, and to certain affiliated interests of any such insider, may not, in the aggregate, exceed the Bank's loans-to-one borrower limit. Loans to insiders and their related interests must also be made on terms substantially the same as offered, and follow credit underwriting procedures that are not less stringent than those applied, in comparable transactions to other persons. Prior Board approval is required for certain loans. In addition, the aggregate amount of extensions of credit by the Bank to all insiders cannot exceed the institution's unimpaired capital and unimpaired surplus. These laws place additional restrictions on loans to executive officers of the Bank.

The Bank is in compliance with these regulations.

Restrictions on Dividends and Capital Distributions

The Bank is subject to OTS limitations on capital distributions, which include cash dividends, stock redemptions or repurchases, cash-out mergers, interest payments on certain convertible debt and some other distributions charged to the Bank's capital account. In general, the applicable regulation permits specified levels of capital distributions by a savings institution that meets at least its minimum capital requirements, so long as the OTS is provided with at least 30 days' advance notice and has no objection to the distribution.

Under OTS capital distribution regulations, an institution is not required to file an application with, or to provide a notice to, the OTS if neither the institution nor the proposed capital distribution meets any of the criteria for any such application or notice as provided below. An institution will be required to file an application with the OTS if the institution is not eligible for expedited treatment by the OTS; if the total amount of all its capital distributions for the applicable calendar year exceeds the net income for that year to date plus the retained net income (net income less capital distributions) for the preceding two years; if it would not be at least adequately capitalized following the distribution; or if its proposed capital distribution would violate a prohibition contained in any applicable statute, regulation, or

agreement between the association and the OTS. By contrast, only notice to the OTS is required for an institution that is not required to file an application as provided in the preceding sentence, if it would not be well capitalized following the distribution; if the association's proposed capital distribution would reduce the amount of or retire any part of its common or preferred stock or retire any part of debt instruments such as notes or debentures included in capital under OTS regulations; or if the association is a subsidiary of a savings and loan holding company. The Bank is a subsidiary of a savings and loan holding company and, therefore, is subject to the 30-day advance notice requirement. As of December 31, 2007, the Bank had \$29.0 million in retained earnings available to distribute to the Holding Company in the form of cash dividends.

Federal Home Loan Bank System

In connection with converting to a federal charter, the Bank became a member of the FHLB-NY, which is one of 12 regional FHLB's governed and regulated by the Federal Housing Finance Board. Each FHLB serves as a source of liquidity for its members within its assigned region. It is funded primarily from proceeds derived from the sale of consolidated obligations of the FHLB System. It makes loans to members (i.e., advances) in accordance with policies and procedures established by its Board of Directors.

As a member, the Bank is mandated to purchase and maintain membership stock in the FHLB-NY based on the asset size of the Bank. In addition, for all borrowing activity, the Bank is required to purchase shares of FHLB-NY non-marketable capital stock at par. Pursuant to this requirement, at December 31, 2007, the Bank was required to maintain \$42.7 million of FHLB-NY stock. The Bank was in compliance with this requirement at that time.

Assessments

Savings institutions are required by OTS regulations to pay assessments to the OTS to fund the operations of the OTS. The general assessment, paid on a semi-annual basis, as determined from time to time by the Director of the OTS, is computed upon the savings institution's total assets, including consolidated subsidiaries, as reported in the institution's latest quarterly thrift financial report. Based on the average balance of the Bank's total assets for the year ended December 31, 2007, the Bank's OTS assessments were \$498,000 for that period.

Branching

OTS regulations permit federally chartered savings institutions to branch nationwide to the extent allowed by federal statute. This permits federal savings associations to geographically diversify their loan portfolios and lines of business. The OTS authority preempts any state law purporting to regulate branching by federal savings institutions.

Community Reinvestment

Under the Community Reinvestment Act ("CRA"), as implemented by OTS regulations, the Bank has an obligation, consistent with its safe and sound operation, to help meet the credit needs of its entire community, including low and moderate income neighborhoods located in the community. The CRA does not establish specific lending requirements or programs for financial institutions nor does it limit an institution's discretion to develop the types of products and services that it believes are best suited to its particular community, consistent with the CRA. The CRA requires the OTS, in connection with its examination of a savings institution, to assess the institution's record of meeting the credit needs of its community and to take such record into account in its evaluation of certain applications by the institution. The methodology used by the OTS for determining an institution's compliance with the CRA focuses on three tests: (a) a lending test, to evaluate the institution's record of making loans in its service areas; (b) an investment test, to evaluate the institution's record of investing in community development projects, affordable housing, and programs benefiting low or moderate income individuals and businesses; and (c) a service test, to evaluate the range of the institution's services and the delivery of services through its branches, ATMs, and other offices. The Bank received a CRA rating of "Satisfactory" in its most recent completed CRA examination, which was completed as of March 5, 2007. Institutions that receive less than a satisfactory rating may face difficulties in securing approval for new activities or acquisitions. The CRA requires all institutions to make public disclosure of their CRA ratings.

Brokered Deposits

The FDIC has promulgated regulations implementing the FDICIA limitations on brokered deposits. Under the regulations, well-capitalized institutions are not subject to brokered deposit limitations, while adequately capitalized institutions are able to accept, renew or roll over brokered deposits only with a waiver from the FDIC and subject to restrictions on the interest rate which can be paid on such deposits. Undercapitalized institutions are not permitted to accept brokered deposits and may not solicit deposits by offering an effective yield that exceeds by more than 75 basis points the prevailing effective yields on insured deposits of comparable maturity in the institution's normal market area or in the market area in which such deposits are being solicited. Pursuant to the regulation, the Bank, as a well-

capitalized institution, may accept brokered deposits. At December 31, 2007, the Bank had \$201.7 million in brokered deposit accounts.

Capital Requirements

General. The Bank is required to maintain minimum levels of regulatory capital. Since FIRREA, capital requirements established by the OTS generally must be no less stringent than the capital requirements applicable to national banks. The OTS also is authorized to impose capital requirements in excess of these standards on a case-by-case basis.

Any institution that fails any of its applicable capital requirements is subject to possible enforcement actions by the OTS or the FDIC. Such actions could include a capital directive, a cease and desist order, civil money penalties, the establishment of restrictions on the institution's operations and the appointment of a conservator or receiver. The OTS' capital regulation provides that such actions, through enforcement proceedings or otherwise, could require one or more of a variety of corrective actions. See "—Prompt Corrective Action."

The OTS' capital regulations create three capital requirements: a tangible capital requirement, a leverage and core capital requirement and a risk-based capital requirement. At December 31, 2007, the Bank's capital levels exceeded applicable OTS capital requirements. The three OTS capital requirements are described below.

Tangible Capital Requirement. Under current OTS regulations, each savings institution must maintain tangible capital equal to at least 1.50% of its adjusted total assets (as defined by regulation). Tangible capital generally includes common stockholders' equity and retained income, and certain non-cumulative perpetual preferred stock and related income. In addition, all intangible assets, other than a limited amount of purchased mortgage servicing rights, must be deducted from tangible capital. Tangible capital also excludes adjustments to accumulated other comprehensive income recorded for postretirement benefits. At December 31, 2007, the Bank had \$13.9 million in goodwill and \$2.8 million in a core deposit intangible which were classified as intangible assets, and no purchased mortgage servicing rights. At that date, the Bank's tangible capital ratio was 7.27%.

In calculating adjusted total assets, adjustments are made to total assets to give effect to the exclusion of certain assets from capital and to appropriately account for the investments in and assets of both includable and non-includable subsidiaries.

Leverage and Core Capital Requirement. The current OTS requirement for leverage and core capital (commonly referred to as core capital) ranges between 3% and 5% of adjusted total assets. Savings institutions that receive the highest supervisory rating for safety and soundness are required to maintain a minimum core capital ratio of 3%, while the capital floor for all other savings institutions generally ranges from 4% to 5%, as determined by the OTS on a case by case basis. Core capital includes common stockholders' equity (including retained income), non-cumulative perpetual preferred stock and related surplus. At December 31, 2007, the Bank's core capital ratio was 7.27%.

OTS regulations limit the amount of servicing assets, together with purchased credit card receivables, includable in core capital to 100% of such capital, subject to limitations on fair value. At December 31, 2007, the Bank had \$294,000 in capitalized servicing rights and no purchased credit card receivables.

Risk-Based Requirement. The risk-based capital standard adopted by the OTS requires savings institutions to maintain a minimum ratio of total capital to risk-weighted assets of 8%. Total capital consists of core capital, defined above, and supplementary capital but excludes the effect of recognizing deferred taxes based upon future income after one year. Supplementary capital consists of certain capital instruments that do not qualify as core capital, and general valuation loan and lease loss allowances up to a maximum of 1.25% of risk-weighted assets. Supplementary capital may be used to satisfy the risk-based requirement only in an amount equal to the amount of core capital. In determining the risk-based capital ratios, total assets, including certain off-balance sheet items, are multiplied by a risk weight based on the risks inherent in the type of assets. The risk weights assigned by the OTS for significant categories of assets are (1) 0% for cash and securities issued by the federal government or unconditionally backed by the full faith and credit of the federal government; (2) 20% for securities (other than equity securities) issued by federal government sponsored agencies and mortgage-backed securities issued by, or fully guaranteed as to principal and interest by, the FNMA or the FHLMC, except for those classes with residual characteristics or stripped mortgage-related securities; (3) 50% for prudently underwritten permanent one-to-four family first lien mortgage loans and certain qualifying multi-family mortgage loans not more than 90 days delinquent and having a loan-to-value ratio of not more than 80% at origination unless insured to such ratio by an insurer approved by the FNMA or the FHLMC; and (4) 100% for all other loans and investments, including consumer loans, home equity loans, commercial loans, and one-to-four family residential real estate loans more than 90 days delinquent, and all repossessed assets or assets more than 90 days past due. At December 31, 2007, the Bank's risk-based capital ratio was 11.20%. Risk-based capital excludes the effect of recognizing deferred taxes based upon future income after one year.

Flushing Commercial Bank is required to maintain minimum levels of regulatory capital, which are similar to those of the Bank. At December 31, 2007, Flushing Commercial Bank exceeded its regulatory capital requirements.

Federal Reserve System

The Federal Reserve Board requires all depository institutions to maintain reserves against their transaction accounts (primarily NOW and checking accounts) and non-personal time deposits. At December 31, 2007, the Bank was in compliance with these requirements.

The balances maintained to meet the reserve requirements imposed by the Federal Reserve Board may be used to satisfy liquidity requirements imposed by the OTS. Because required reserves must be maintained in the form of vault cash or a non-interest-bearing account at a Federal Reserve Bank directly or through another bank, the effect of this reserve requirement is to reduce an institution's earning assets. The amount of funds necessary to satisfy this requirement has not had a material effect on the Bank's operations.

As a creditor and financial institution, the Bank is also subject to additional regulations promulgated by the FRB, including, without limitation, regulations implementing requirements of the Truth in Savings Act, the Expedited Funds Availability Act, the Equal Credit Opportunity Act and the Truth in Lending Act.

Financial Reporting

The Bank is required to submit independently audited annual reports to the FDIC and the OTS. These publicly available reports must include (a) annual financial statements prepared in accordance with generally accepted accounting principles and such other disclosure requirements as required by the FDIC or the OTS and (b) a report, signed by the Bank's chief executive officer and chief financial officer which contains statements about the adequacy of internal controls and compliance with designated laws and regulations, and attestations by independent auditors related thereto. The Bank is required to monitor the foregoing activities through an independent audit committee.

Standards for Safety and Soundness

The FDIA, as amended by the FDICIA and the Riegle Community Development and Regulatory Improvement Act of 1994 (the "Community Development Act"), requires each federal bank regulatory agency to establish safety and soundness standards for institutions under its authority. On July 10, 1995, the federal banking agencies, including the OTS, jointly released Interagency Guidelines Establishing Standards for Safety and Soundness and published a final rule establishing deadlines for submission and review of safety and soundness compliance plans. The guidelines, among other things, require savings institutions to maintain internal controls, information systems and internal audit systems that are appropriate to the size, nature and scope of the institution's business. The guidelines also establish general standards relating to loan documentation, credit underwriting, interest rate risk exposure, asset growth, and compensation, fees and benefits. Savings institutions are required to maintain safeguards to prevent the payment of excessive compensation to an executive officer, employee, director or principal shareholder. The OTS may determine that a savings institution is not in compliance with the safety and soundness guidelines and, upon doing so, may require the institution to submit an acceptable plan to achieve compliance with the guidelines. An institution must submit an acceptable compliance plan to the OTS within 30 days of receipt or request for such a plan. Failure to submit or implement a compliance plan may subject the institution to regulatory actions. Management believes that the Bank currently meets the standards adopted in the interagency guidelines.

Additionally, under FDICIA, as amended by the Community Development Act, federal banking agencies are required to establish standards relating to asset quality and earnings that the agencies determine to be appropriate. Effective October 1, 1998, the federal banking agencies, including the OTS, adopted guidelines relating to asset quality and earnings which require insured institutions to maintain systems, consistent with their size and the nature and scope of their operations, to identify problem assets and prevent deterioration in those assets as well as to evaluate and monitor earnings and insure that earnings are sufficient to maintain adequate capital and reserves.

Gramm-Leach-Bliley Act

The Gramm-Leach-Bliley Act (the "Modernization Act") was signed into law on November 12, 1999. Among other things, the Modernization Act permits qualifying bank holding companies to affiliate with securities firms and insurance companies and engage in other activities that are financial in nature or complementary thereto, as determined by the Federal Reserve Board. Subject to certain limitations, a national bank may, through a financial subsidiary, engage in similar activities. The Modernization Act also prohibits the creation or acquisition of new unitary savings and loan holding companies that are affiliated with non-banking firms, but "grandfathers" existing savings and loan holding companies, such as the Company. Grandfathered companies retain the existing powers available to unitary savings and loan holding companies. See "— Holding Company Regulation." Certain business combinations which were impermissible prior to the effective date of the Modernization Act are now possible. Management believes the

Modernization Act has led to some consolidation in the financial services industry and could lead to further consolidation, which, if completed, would likely result in an increase in the service offerings of our competitors. We cannot assure you that the Modernization Act will not result in further changes in the competitive environment in the Bank's market area or otherwise impact the Bank or the Holding Company.

In addition, the Modernization Act calls for heightened privacy protection of customer information gathered by financial institutions. The OTS has enacted regulations implementing the privacy protection provisions of the Modernization Act. Under the regulations, each financial institution is to (1) adopt procedures to protect customers' "non-public personal information", (2) disclose its privacy policy, including identifying to customers others with whom it shares "non-public personal information", at the time of establishing the customer relationship and annually thereafter, and (3) provide its customers with the ability to "opt-out" of having the financial institution share their personal information with affiliated third parties. The regulations became effective on November 13, 2000, with compliance voluntary prior to July 1, 2001. Management has reviewed and amended our privacy protection policy and believes we are in compliance with these regulations.

USA Patriot Act

On October 26, 2001, following the September 11, 2001 attacks, President Bush signed the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism (USA PATRIOT) Act of 2001 (the "Patriot Act") to enhance protections against money laundering and criminal laws against terrorist activities, and give law enforcement authorities greater investigative powers. Among other things, the Patriot Act (1) requires financial institutions that administer, maintain or manage private bank accounts or correspondent accounts for foreign persons to establish due diligence policies; (2) prohibits correspondent accounts with foreign shell banks; (3) permits sharing of information among financial institutions, regulators and law enforcement regarding persons engaged in terrorist or money laundering activities; (4) requires financial institutions to verify customer identification at account opening; (5) requires financial institutions to report suspicious activities; and (6) requires financial institutions to establish an anti-money laundering compliance program. Management believes we are in compliance with these regulations.

Prompt Corrective Action

Under Section 38 of the FDIA, as added by the FDICIA, each appropriate banking agency is required to take prompt corrective action to resolve the problems of insured depository institutions that do not meet minimum capital ratios. Such action must be accomplished at the least possible long-term cost to the appropriate deposit insurance fund.

The federal banking agencies, including the OTS, adopted substantially similar regulations to implement Section 38 of the FDIA. Under the regulations, an institution is deemed to be (1) "well capitalized" if it has total risk-based capital ratio of 10% or more, has a Tier 1 risk-based capital ratio of 6% or more, has a leverage capital ratio of 5% or more and is not subject to any order or final capital directive to meet and maintain a specific capital level for any capital measure, (2) "adequately capitalized" if it has a total risk-based capital ratio of 8% or more, a Tier 1 risk-based capital ratio of 4% or more and a leverage capital ratio of 4% or more (3% under certain circumstances) and does not meet the definition of "well capitalized," (3) "undercapitalized" if it has a total risk-based capital ratio that is less than 8%, a Tier 1 risk-based capital ratio that is less than 4% or a leverage capital ratio that is less than 4% (3% under certain circumstances), (4) "significantly undercapitalized" if it has a total risk-based capital ratio that is less than 6%, a Tier 1 risk-based capital ratio that is less than 3% or a leverage capital ratio that is less than 3%, and (5) "critically undercapitalized" if it has a ratio of tangible equity to total assets that is equal to or less than 2%. Section 38 of the FDIA and the regulations promulgated thereunder also specify circumstances under which a federal banking agency may reclassify a well capitalized institution as adequately capitalized and may require an adequately capitalized institution or an undercapitalized institution to comply with supervisory actions as if it were in the next lower category (except that the FDIC may not reclassify a significantly undercapitalized institution as critically undercapitalized). At December 31, 2007, the Bank met the criteria to be considered a "well capitalized" institution.

Federal Securities Laws

The Company's Common Stock is registered with the SEC under Section 12(b) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). The Company is subject to the information and reporting requirements, regulations governing proxy solicitations, insider trading restrictions and other requirements applicable to companies whose stock is registered under the Exchange Act.

Sarbanes-Oxley Act of 2002. The Sarbanes-Oxley Act of 2002 (the "2002 Act"), enacted on July 30, 2002, aims to increase the reliability of financial information by, among other things, (1) heightening accountability of Chief Executive Officers and Chief Financial Officers to issue accurate financial statements, (2) increasing the authority and independence of corporate audit committees, (3) creating a new regulatory entity to oversee the activities of accountants

that audit public companies, (4) prohibiting activities and relationships that may compromise the independence of auditors, (5) increasing required financial statement disclosures, and (6) providing tough new penalties for issuing noncompliant financial statements and for other violations related to securities laws.

In furtherance of the 2002 Act, the SEC has issued rules. Compliance with these rules, and the related corporate governance rules adopted by NASDAQ with the approval of the SEC, has, and will continue to, increase costs to the Company, including, but not limited to, fees to our independent accountants, consultants, legal fees and Board service fees, and may require additions to staff. To date, compliance with the 2002 Act has not had a material effect on the Company results of operations. We cannot assure you that compliance with the 2002 Act and its regulations will not have a material effect on the business or operations of the Company in the future.

AVAILABLE INFORMATION

We make available free of charge on or through our web site at www.flushingsavings.com our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC.

Item 1A. Risk Factors.

In addition to the other information contained in this Annual Report, the following factors and other considerations should be considered carefully in evaluating the Holding Company, the Bank and their business.

Changes in Interest Rates May Significantly Impact the Company's Financial Condition and Results of Operations

Like most financial institutions, the Company's results of operations depend to a large degree on its net interest income. When interest-bearing liabilities mature or reprice more quickly than interest-earning assets, a significant increase in market interest rates could adversely affect net interest income. Conversely, a significant decrease in market interest rates could result in increased net interest income. As a general matter, the Company seeks to manage its business to limit its overall exposure to interest rate fluctuations. However, fluctuations in market interest rates are neither predictable nor controllable and may have a material adverse impact on the operations and financial condition of the Company. Additionally, in a rising interest rate environment, a borrower's ability to repay adjustable rate mortgages can be negatively affected as payments increase at repricing dates.

Prevailing interest rates also affect the extent to which borrowers repay and refinance loans. In a declining interest rate environment, the number of loan prepayments and loan refinancings may increase, as well as prepayments of mortgage-backed securities. Call provisions associated with the Company's investment in U.S. government agency and corporate securities may also adversely affect yield in a declining interest rate environment. Such prepayments and calls may adversely affect the yield of the Company's loan portfolio and mortgage-backed and other securities as the Company reinvests the prepaid funds in a lower interest rate environment. However, the Company typically receives additional loan fees when existing loans are refinanced, which partially offset the reduced yield on the Company's loan portfolio resulting from prepayments. In periods of low interest rates, the Company's level of core deposits also may decline if depositors seek higher-yielding instruments or other investments not offered by the Company, which in turn may increase the Company's cost of funds and decrease its net interest margin to the extent alternative funding sources are utilized. An increasing interest rate environment would tend to extend the average lives of lower yielding fixed rate mortgages and mortgage-backed securities, which could adversely affect net interest income. In addition, depositors tend to open longer term, higher costing certificate of deposit accounts which could adversely affect the Bank's net interest income if rates were to subsequently decline. Additionally, adjustable rate mortgage loans and mortgage-backed securities generally contain interim and lifetime caps that limit the amount the interest rate can increase or decrease at repricing dates. Significant increases in prevailing interest rates may significantly affect demand for loans and the value of bank collateral. See "— Local Economic Conditions."

The Bank's Lending Activities Involve Risks that May Be Exacerbated Depending on the Mix of Loan Types

Multi-family residential, commercial real estate and one-to-four family mixed use property mortgage loans and commercial business loans (the increased origination of which is part of management's strategy), and construction loans, are generally viewed as exposing the lender to a greater risk of loss than fully underwritten one-to-four family residential mortgage loans and typically involve higher principal amounts per loan. Repayment of multi-family residential, commercial real estate and one-to-four family mixed-use property mortgage loans generally is dependent, in large part, upon sufficient income from the property to cover operating expenses and debt service. Repayment of commercial business loans is contingent on the successful operation of the related business. Repayment of construction loans is contingent upon the successful completion and operation of the project. Changes in local economic conditions and

government regulations, which are outside the control of the borrower or lender, also could affect the value of the security for the loan or the future cash flow of the affected properties.

In addition, the Bank, from time-to-time, originates one-to-four family residential mortgage loans without verifying the borrower's level of income. These loans involve a higher degree of risk as compared to the Bank's other fully underwritten one-to-four family residential mortgage loans. These risks are mitigated by the Bank's policy to generally limit the amount of one-to-four family residential mortgage loans to 80% of the appraised value or sale price, whichever is less, as well as charging a higher interest rate than when the borrower's income is verified. These loans are not as readily saleable in the secondary market as the Bank's other fully underwritten loans, either as whole loans or when pooled or securitized.

There can be no assurance that the Bank will be able to successfully implement its business strategies with respect to these higher-yielding loans. In assessing the future earnings prospects of the Bank, investors should consider, among other things, the Bank's level of origination of one-to-four family residential mortgage loans (including loans originated without verifying the borrowers income), the Bank's emphasis on multi-family residential, commercial real estate and one-to-four family mixed-use property mortgage loans, and commercial business and construction loans, and the greater risks associated with such loans. See "Business — Lending Activities" in Item 1 of this Annual Report.

The Markets in Which the Bank Operates Are Highly Competitive

The Bank faces intense and increasing competition both in making loans and in attracting deposits. The Bank's market area has a high density of financial institutions, many of which have greater financial resources, name recognition and market presence than the Bank, and all of which are competitors of the Bank to varying degrees. Particularly intense competition exists for deposits and in all of the lending activities emphasized by the Bank. The Bank's competition for loans comes principally from commercial banks, other savings banks, savings and loan associations, mortgage banking companies, insurance companies, finance companies and credit unions. Management anticipates that competition for mortgage loans will continue to increase in the future. The Bank's most direct competition for deposits historically has come from other savings banks, commercial banks, savings and loan associations and credit unions. In addition, the Bank faces competition for deposits from products offered by brokerage firms, insurance companies and other financial intermediaries, such as money market and other mutual funds and annuities. Consolidation in the banking industry and the lifting of interstate banking and branching restrictions have made it more difficult for smaller, community-oriented banks, such as the Bank, to compete effectively with large, national, regional and super-regional banking institutions. In November, 2006, the Bank launched an internet branch, "iGObanking.com[®]" a division of Flushing Savings Bank, to provide the Bank access to markets outside its geographic locations. The internet banking arena also has many larger financial institutions which have greater financial resources, name recognition and market presence than the Bank.

Notwithstanding the intense competition, the Bank has been successful in increasing its loan portfolios and deposit base. However, no assurances can be given that the Bank will be able to continue to increase its loan portfolios and deposit base, as contemplated by management's current business strategy.

The Company's Results of Operations May Be Adversely Affected by Changes in National and/or Local Economic Conditions

The Company's operating results are affected by national and local economic and competitive conditions, including changes in market interest rates, the strength of the local economy, government policies and actions of regulatory authorities. During 2007, the nation's economy was generally considered to be expanding, although the expansion had slowed by the fourth quarter of 2007. World events, particularly the "War on Terror" and the level of oil prices, continued to have an effect on the economy. The housing market in the United States saw a significant slowdown during 2007, and foreclosures of single family homes rose from the level seen in the past five years. These economic conditions can result in borrowers defaulting on their loans, or withdrawing their funds on deposit at the Bank to meet their financial obligations. While we have not seen a significant increase in delinquent loans, and have seen an increase in deposits, we cannot predict the effect of these economic conditions on the Company's financial condition or operating results.

A decline in the local economy, national economy or metropolitan area real estate market could adversely affect the financial condition and results of operations of the Company, including through decreased demand for loans or increased competition for good loans, increased non-performing loans and loan losses and resulting additional provisions for loan losses and for losses on real estate owned. Although management of the Bank believes that the current allowance for loan losses is adequate in light of current economic conditions, many factors could require additions to the allowance for loan losses in future periods above those currently maintained. These factors include: (1) adverse changes in economic conditions and changes in interest rates that may affect the ability of borrowers to make payments on loans, (2) changes in the financial capacity of individual borrowers, (3) changes in the local real estate market and the value of the Bank's loan collateral, and (4) future review and evaluation of the Bank's loan portfolio, internally or by regulators.

The amount of the allowance for loan losses at any time represents good faith estimates that are susceptible to significant changes due to changes in appraisal values of collateral, national and regional economic conditions, prevailing interest rates and other factors. See “Business — General — Allowance for Loan Losses” in Item 1 of this Annual Report.

Changes in Laws and Regulations Could Adversely Affect the Company’s Business

From time to time, legislation is enacted or regulations are promulgated that have the effect of increasing the cost of doing business, limiting or expanding permissible activities or affecting the competitive balance between banks and other financial institutions. Proposals to change the laws and regulations governing the operations and taxation of banks and other financial institutions are frequently made in Congress, in the New York legislature and before various bank regulatory agencies. No prediction can be made as to the likelihood of any major changes or the impact such changes might have on the Bank or the Company. For a discussion of regulations affecting the Company, see “Business — Regulation” and “Business—Federal, State and Local Taxation” in Item 1 of this Annual Report.

Certain Anti-Takeover Provisions May Increase the Costs to or Discourage an Acquiror

On September 5, 2006, the Board of Directors of the Holding Company renewed the Company’s Stockholder Rights Plan, (the “Rights Plan”), which was originally adopted on and had been in place since September 17, 1996 and had been scheduled to expire on September 30, 2006. The Rights Plan was designed to preserve long-term values and protect stockholders against inadequate offers and other unfair tactics to acquire control of the Holding Company. Under the Rights Plan, each stockholder of record at the close of business on September 30, 2006 received a dividend distribution of one right to purchase from the Holding Company one one-hundredth of a share of Series A junior participating preferred stock at a price of \$65. The rights will become exercisable only if a person or group acquires 15% or more of the Holding Company’s common stock or commences a tender or exchange offer which, if consummated, would result in that person or group owning at least 15% of the Common Stock (the “acquiring person or group”). In such case, all stockholders other than the acquiring person or group will be entitled to purchase, by paying the \$65 exercise price, Common Stock (or a common stock equivalent) with a value of twice the exercise price. In addition, at any time after such event, and prior to the acquisition by any person or group of 50% or more of the Common Stock, the Board of Directors may, at its option, require each outstanding right (other than rights held by the acquiring person or group) to be exchanged for one share of Common Stock (or one common stock equivalent). If a person or group becomes an acquiring person and the Holding Company is acquired in a merger or other business combination or sells more than 50% of its assets or earning power, each right will entitle all other holders to purchase, by payment of \$65 exercise price, common stock of the acquiring company with a value of twice the exercise price. The renewed rights plan expires on September 30, 2016.

The Rights Plan, as well as certain provisions of the Holding Company’s certificate of incorporation and bylaws, the Bank’s federal stock charter and bylaws, certain federal regulations and provisions of Delaware corporation law, and certain provisions of remuneration plans and agreements applicable to employees and officers of the Bank may have anti-takeover effects by discouraging potential proxy contests and other takeover attempts, particularly those which have not been negotiated with the Board of Directors. The Rights Plan and those other provisions, as well as applicable regulatory restrictions, may also prevent or inhibit the acquisition of a controlling position in the Common Stock and may prevent or inhibit takeover attempts that certain stockholders may deem to be in their or other stockholders’ interest or in the interest of the Holding Company, or in which stockholders may receive a substantial premium for their shares over then current market prices. The Rights Plan and those other provisions may also increase the cost of, and thus discourage, any such future acquisition or attempted acquisition, and would render the removal of the current Board of Directors or management of the Holding Company more difficult.

The Bank May Not Be Able To Successfully Implement Its New Commercial Business Banking Initiative

The Bank’s strategy includes a transition to a more “commercial-like” banking institution. The Bank has developed a complement of deposit, loan and cash management products to support this initiative, and intends to expand these product offerings. A business banking unit has been established to build relationships in order to obtain lower-costing deposits, generate fee income, and originate commercial business loans. The success of this initiative is dependent on developing additional product offerings, and building relationships to obtain the deposits and loans. There can be no assurance that the Bank will be able to successfully implement its business strategy with respect to this initiative.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

The Bank conducts its business through fourteen full-service branch offices and its internet branch, "iGObanking.com®". The Company's executive offices are located in Lake Success, in Nassau County, NY.

The Holding Company neither owns nor leases any property but instead uses the premises and equipment of the Bank.

Item 3. Legal Proceedings.

The Bank is involved in various legal actions arising in the ordinary course of its business which, in the aggregate, involve amounts which are believed by management to be immaterial to the financial condition, results of operations and cash flows of the Bank.

Item 4. Submission of Matters to a Vote of Security Holders.

None.

PART II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Flushing Financial Corporation Common Stock is traded on the NASDAQ Global Select Market[®] under the symbol "FFIC". As of December 31, 2007, the Company had approximately 807 shareholders of record, not including the number of persons or entities holding stock in nominee or street name through various brokers and banks. The Company's stock closed at \$16.05 on December 31, 2007. The following table shows the high and low sales price of the Common Stock during the periods indicated. Such prices do not necessarily reflect retail markups, markdowns, or commissions. See Note 11 of Notes to Consolidated Financial Statements in Item 8 of this Annual Report for dividend restrictions.

	2007			2006		
	High	Low	Dividend	High	Low	Dividend
First Quarter	\$ 17.77	\$ 15.30	\$ 0.12	\$ 17.55	\$ 14.87	\$ 0.11
Second Quarter	17.20	15.51	0.12	17.96	16.09	0.11
Third Quarter	18.68	14.41	0.12	17.97	16.30	0.11
Fourth Quarter	17.88	14.88	0.12	18.79	16.68	0.11

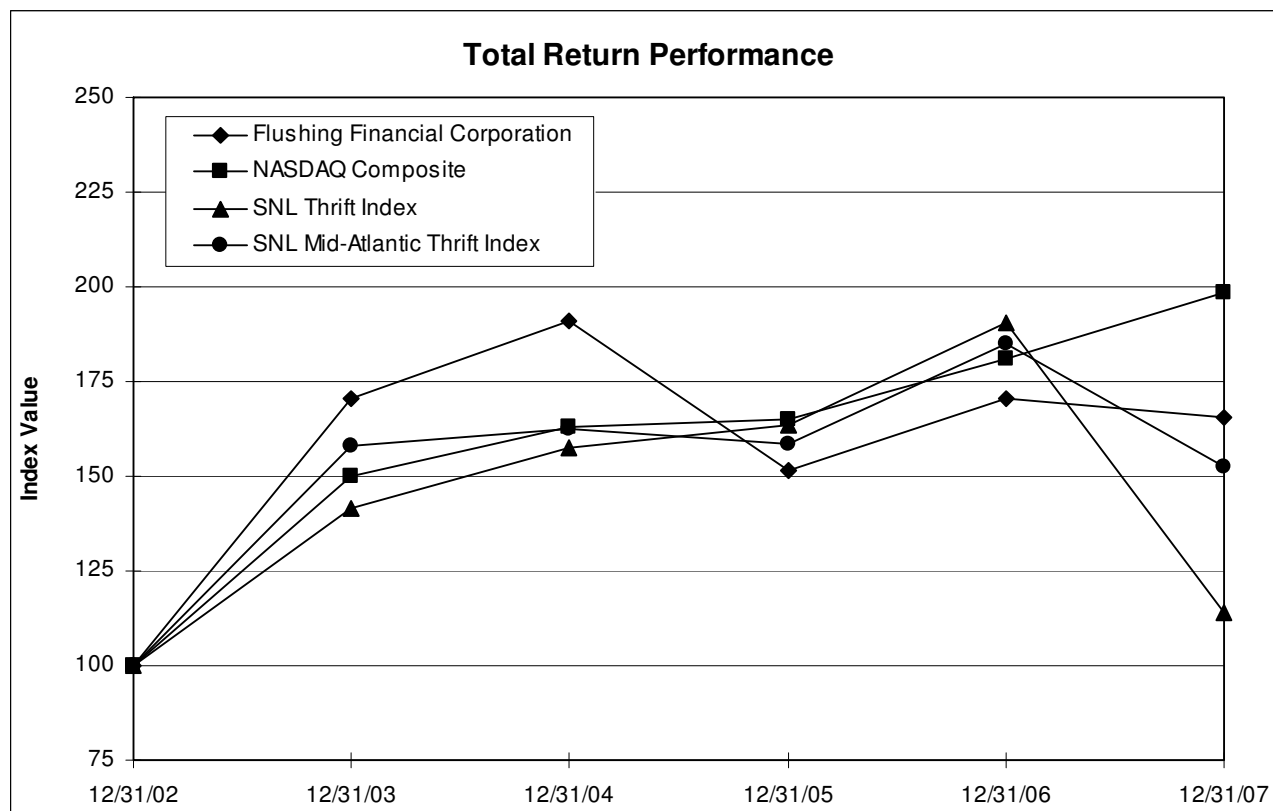

The following table sets forth information regarding the shares of common stock repurchased by the Company during the quarter ended December 31, 2007.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares That May Yet Be Purchased Under the Plans or Programs
October 1 to October 31, 2007	-	\$ -	-	362,050
November 1 to November 30, 2007	-	-	-	362,050
December 1 to December 31, 2007	-	-	-	362,050
Total	-	\$ -	-	

The current common stock repurchase program was approved by the Company's Board of Directors on August 17, 2004. This repurchase program authorized the repurchase of 1,000,000 common shares. The repurchase program does not have an expiration date or a maximum dollar amount that may be paid to repurchase the common shares. Stock repurchases under this program will be made from time to time, on the open market or in privately negotiated transactions, at the discretion of the management of the Company.

Stock Performance Graph

The following graph shows a comparison of cumulative total stockholder return on the Company's common stock since December 31, 2002 with the cumulative total returns of a broad equity market index as well as two published industry indices. The broad equity market index chosen was the Nasdaq Composite. The published industry indices chosen were the SNL Thrift Index and SNL Mid-Atlantic Thrift Index. The SNL Mid-Atlantic Thrift Index has been included in the Company's Stock Performance Graph because the Company believes it provides valuable comparative information reflecting the Company's geographic peer group. The SNL Thrift Index has been included in the Stock Performance because it uses a broader group of thrifts and therefore more closely reflects the Company's size. The Company believes that both geographic area and size are important factors in analyzing the Company's performance against its peers. The graph below reflects historical performance only, which is not indicative of possible future performance of the common stock.

The total return assumes \$100 invested on December 31, 2002 and all dividends reinvested through the end of the Company's fiscal year ended December 31, 2007. The performance graph above is based upon closing prices on the trading date specified.

<i>Index</i>	<i>Period Ending</i>

(5) Non-performing assets consist of non-performing loans, real estate owned and non-performing investment securities.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

General

Flushing Financial Corporation ("Holding Company"), a Delaware corporation, is the parent holding company for Flushing Savings Bank, FSB ("Bank"), a federally chartered stock savings bank. The Bank was organized in 1929 as a New York State chartered mutual savings bank. In 1994, the Bank converted to a federally chartered mutual savings bank and changed its name from Flushing Savings Bank to Flushing Savings Bank, FSB. The Bank converted to a federally chartered stock savings bank in 1995. As a federal savings bank, the Bank's primary regulator is the Office of Thrift Supervision ("OTS"). The Bank's deposits are insured to the maximum allowable amount by the Federal Deposit Insurance Corporation ("FDIC"). The Bank owns four subsidiaries: Flushing Commercial Bank, Flushing Preferred Funding Corporation, Flushing Service Corporation, and FSB Properties Inc.

The Holding Company also owns three special purpose business trusts, Flushing Financial Capital Trust II, Flushing Financial Capital Trust III, and Flushing Financial Capital Trust IV (the "Trusts"). The Trusts were formed during 2007, with each issuing \$20.0 million of floating rate capital securities. The Trusts invested the proceeds from the sale of the capital securities, and the issuance of their common stock, in \$61.8 million of junior subordinated debentures issued by the Holding Company. The Holding Company had owned Flushing Financial Capital Trust I ("Trust I"), which was formed in 2002. Trust I issued \$20.0 million of floating rate capital securities, and invested the proceeds from the sale of the capital securities, and the issuance of its common stock, in \$20.6 million of junior subordinated debentures issued by the Holding Company. The Holding Company redeemed the junior subordinated debentures issued to Trust I in July 2007. As a result, Trust I redeemed its outstanding capital securities and common stock, and was liquidated in July 2007. Prior to 2004, Trust I was included in the consolidated financial statements of the Company. Effective January 1, 2004, in accordance with the requirements of FASB Interpretation No. 46R, Trust I was deconsolidated. The Trusts are not included in the consolidated financial statements of the Company in accordance with the requirements of FASB Interpretation No. 46R.

The following discussion of financial condition and results of operations includes the collective results of the Holding Company and the Bank (collectively, the "Company"), but reflects principally the Bank's activities. Management views the Company as operating as a single unit, a community savings bank. Therefore, segment information is not provided.

On June 30, 2006, the Company acquired all of the outstanding common stock of Atlantic Liberty Financial Corporation ("Atlantic Liberty"), the parent holding company for Atlantic Liberty Savings, F.A., based in Brooklyn, New York. The aggregate purchase price was \$42.5 million, which consisted of \$14.7 million of cash, common stock valued at \$26.6 million, and \$1.3 million assigned to the fair value of Atlantic Liberty's outstanding stock options. Under the terms of the Agreement and Plan of Merger, dated December 20, 2005, Atlantic Liberty's shareholders received \$24.00 in cash, 1.43 Holding Company shares per Atlantic Liberty share owned, or a combination thereof, subject to aggregate allocation to all Atlantic Liberty's shareholders of 65% stock / 35% cash. In connection with the merger, the Company issued 1.6 million shares of common stock, the value of which was determined based on the closing price of the Company's common stock on the announcement date of December 21, 2005, and two days prior to and after the announcement date. The Company acquired two branches in prime areas of Brooklyn, New York, with \$186.9 million in assets, \$116.2 million in net loans and assumed \$106.8 million in deposits.

On November 27, 2006, the Bank launched a new internet branch, iGObanking.com®, a division of Flushing Savings Bank, FSB. iGObanking.com® provides the Bank access to markets outside its geographic locations.

During 2007, the Bank formed a wholly owned subsidiary, Flushing Commercial Bank, for the limited purpose of accepting municipal deposits and state funds in the State of New York. The commercial bank offers a full range of deposit products to municipalities and New York State, similar to the products currently being offered by the Bank, but will not make loans. To date, the operations of Flushing Commercial Bank have not been material.

Overview

The Bank's principal business is attracting retail deposits from the general public and investing those deposits together with funds generated from ongoing operations and borrowings, primarily in (1) originations and purchases of one-to-four family (focusing on mixed-use properties – properties that contain both residential dwelling units and commercial units), multi-family residential and commercial real estate mortgage loans; (2) construction loans, primarily for multi-family residential properties; (3) Small Business Administration ("SBA") loans and other small business loans; (4) mortgage loan surrogates such as mortgage-backed securities; and (5) U.S. government securities, corporate fixed-income securities and other marketable securities. The Bank also originates certain other consumer loans.

The Company's results of operations depend primarily on net interest income, which is the difference between the income earned on its interest-earning assets and the cost of its interest-bearing liabilities. Net interest income is the result of the Company's interest rate margin, which is the difference between the average yield earned on interest-earning assets and the average cost of interest-bearing liabilities, adjusted for the difference in the average balance of interest-earning assets as compared to the average balance of interest-bearing liabilities. The Company also generates non-interest income from loan fees, service charges on deposit accounts, mortgage servicing fees, and other fees, income earned on Bank Owned Life Insurance ("BOLI"), dividends on Federal Home Bank of New York ("FHLB-NY") stock and net gains and losses on sales of securities and loans. The Company's operating expenses consist principally of employee compensation and benefits, occupancy and equipment costs, other general and administrative expenses and income tax expense. The Company's results of operations also can be significantly affected by its periodic provision for loan losses and specific provision for losses on real estate owned. However, the Company has not recorded a provision since 1999.

Management Strategy. Management's strategy is to continue the Bank's focus as an institution serving consumers, businesses, and governmental units in its local markets. In furtherance of this objective, the Company intends to: (1) continue its emphasis on the origination of multi-family residential, commercial real estate and one-to-four family mixed-use property mortgage loans, (2) transition from a traditional thrift to a more 'commercial-like' banking institution, (3) increase its commitment to the multi-cultural marketplace, with a particular focus on the Asian community in Queens, (4) maintain asset quality, (5) manage deposit growth and maintain a low cost of funds, utilizing the internet to grow deposits, (6) cross sell to lending and deposit customers, (7) actively pursue deposits from local area government units, (8) manage interest rate risk, (9) explore new business opportunities, and (10) manage capital. There can be no assurance that the Company will be able to effectively implement this strategy. The Company's strategy is subject to change by the Board of Directors.

Multi-Family Residential, Commercial Real Estate and One-to-Four Family Lending. In recent years, the Company has emphasized the origination of higher-yielding multi-family residential, commercial real estate and one-to-four family mixed-use property mortgage loans. The Company expects to continue this emphasis on higher-yielding mortgage loan products.

The following table shows loan originations and purchases during 2007, and loan balances as of December 31, 2007.

	Loan Originations and Purchases	Loan Balances December 31, 2007	Percent of Gross Loans
		<i>(Dollars in thousands)</i>	
Multi-family residential	\$ 231,342	\$ 964,455	35.79 %
Commercial real estate	168,342	625,843	23.23
One-to-four family — mixed-use property	159,331	686,921	25.49
One-to-four family — residential	36,397	161,666	6.01
Co-operative apartment	828	7,070	0.26
Construction	54,151	119,745	4.44
Small Business Administration	12,840	18,922	0.70
Taxi Medallion	50,434	68,249	2.53
Commercial Business and Other	43,759	41,797	1.55
Total	<u>\$ 757,424</u>	<u>\$ 2,694,668</u>	<u>100.00 %</u>

The Company's increased emphasis on multi-family residential, commercial real estate and one-to-four family mixed-use property mortgage loans has increased the overall level of credit risk inherent in the Company's loan portfolio. The greater risk associated with multi-family, commercial real estate and one-to-four family mixed-use property mortgage loans could require the Company to increase its provisions for loan losses and to maintain an allowance for loan losses as a percentage of total loans in excess of the allowance currently maintained by the Company. To date, the Company has not experienced significant losses in its multi-family residential, commercial real estate and one-to-four family mixed-use property mortgage loan portfolios, and has determined that, at this time, additional provisions are not required.

Transition to a More 'Commercial-like' Banking Institution. The Bank established a business banking unit during 2006 staffed with a team of experienced commercial bankers. The Bank has developed a complement of deposit, loan and cash management products to support this initiative, and expanded these

product offerings during 2007. The business banking unit is responsible for building business relationships in order to obtain lower-costing deposits, generate fee income, and originate commercial business loans. Building these business relationships could provide the Bank with a lower-costing source of funds and higher-yielding adjustable-rate loans, which would help the Bank manage its interest-rate risk. Commercial business loans are generally viewed as having a higher risk than real estate loans, and could require the Bank to maintain an allowance for loan losses as a percentage of total loans in excess of the allowance currently maintained by the Company. To date, the Company has not experienced significant losses in its commercial business loan portfolio, and has determined that, at this time, additional provisions are not required.

Increase its Commitment to the Multi-Cultural Marketplace, with a Particular Focus on the Asian Community in Queens. The Bank serves many diverse communities in the metropolitan area. Branches are staffed with employees from their local neighborhoods who speak over 35 different languages, enabling residents of these neighborhoods to speak to our banking specialists in the language they are familiar with and the customs they are used to. The Bank is active in many community organizations. During 2006, the Bank established an Asian Advisory Board to help broaden the Bank's link to the community by providing guidance and fostering awareness of the Bank's active role in the local community.

Maintain Asset Quality. By adherence to its strict underwriting standards the Bank has been able to minimize net losses from impaired loans with net charge-offs of \$424,000 and \$81,000 for the years ended December 31, 2007 and 2006, respectively. The Company has maintained the strength of its loan portfolio, as evidenced by the Company's ratio of its allowance for loan losses to non-performing loans of 112.57% and 225.72% at December 31, 2007 and 2006, respectively. The Company seeks to maintain its loans in performing status through, among other things, strict collection efforts, and consistently monitoring non-performing assets in an effort to return them to performing status. To this end, management reviews the quality of loans and reports to the Loan Committee of the Board of Directors of the Bank on a monthly basis. The Company has sold and may continue to sell delinquent mortgage loans. The Bank sold forty-five delinquent mortgage loans totaling \$33.9 million and thirty-five delinquent mortgage loans totaling \$12.2 million during the years ended December 31, 2007 and 2006, respectively. The terms of these loan sales included cash due upon closing of the sale, no contingencies or recourse to the Bank, servicing is released to the buyer and time is of the essence. The Bank realized gross gains of \$332,000 and no gross losses on the sale of these loans in 2007. The Bank realized gross gains of \$169,000 and gross losses of \$14,000 on the sale of these loans in 2006. There can be no assurances that the Bank will continue this strategy in future periods, or if continued, we will be able to find buyers to pay adequate consideration. Non-performing assets amounted to \$5.9 million and \$3.1 million at December 31, 2007 and 2006, respectively. Non-performing assets as a percentage of total assets were 0.18% and 0.11% at December 31, 2007 and 2006, respectively.

Manage Deposit Growth and Maintain Low Cost of Funds, Utilizing the Internet to Grow Deposits. The Company has a relatively stable retail deposit base drawn from its market area through its full-service offices. Although the Company seeks to retain existing deposits and maintain depositor relationships by offering quality service and competitive interest rates to its customers, the Company also seeks to keep deposit growth within reasonable limits and its strategic plan. In November 2006, the Bank launched an internet branch, "iGObanking.com[®]" a division of Flushing Savings Bank, to compete for deposits from sources outside the geographic footprint of its full-service offices. During 2007, the Bank formed a wholly owned subsidiary, Flushing Commercial Bank, a New York State chartered commercial bank, for the limited purpose of accepting municipal deposits and state funds, including certain court ordered funds from New York State Courts, in the State of New York as an additional source of deposits. The Company also obtains deposits through brokers and the CDARS[®] network. Management intends to balance its goal to maintain competitive interest rates on deposits while seeking to manage its overall cost of funds to finance its strategies. The Company generally relies on its deposit base as its principal source of funding. In creating "iGObanking.com[®]", the Bank's strategy is to reduce our reliance on wholesale borrowings. In addition, the Bank is a member of the FHLB-NY, which provides it with a source of borrowing. The Bank also utilizes reverse purchase agreements, established with other financial institutions. These borrowings help the Company fund asset growth and increase net interest income. During 2007, the Company realized an increase in due to depositors of \$258.6 million and an increase in borrowed funds of \$240.1 million.

Cross Sell to Lending and Deposit Customers. A significant portion of the Bank's lending and deposit customers do not have both their loans and deposits with the Bank. The Bank intends to focus on obtaining additional deposits from its lending customers, and originating additional loans to its deposit customers. Product offerings were expanded in 2006 and 2007, and are expected to be further expanded in 2008 to accommodate perceived customer demands. In addition, specific employees have been identified who have been assigned

responsibilities of generating these additional deposits and loans by coordinating efforts between lending and deposit gathering departments.

Actively Pursue Deposits From Local Area Governmental Units. During 2007, the Bank formed a wholly owned subsidiary, Flushing Commercial Bank, a New York State chartered commercial bank, for the limited purpose of accepting municipal deposits and state funds, including certain court ordered funds from New York State Courts, in the State of New York. The commercial bank offers a full range of deposit products to municipalities and New York State, similar to the products currently being offered by the Bank, but does not make loans. To date, the operations of Flushing Commercial Bank have not been material.

Manage Interest Rate Risk. The Company seeks to manage its interest rate risk by actively reviewing the repricing and maturities of its interest rate sensitive assets and liabilities. The mix of loans originated by the Company (fixed or ARM) is determined in large part by borrowers' preferences and prevailing market conditions. The Company seeks to manage the interest rate risk of the loan portfolio by actively managing its security portfolio and borrowings. By adjusting the mix of fixed and adjustable rate securities, as well as the maturities of the securities, the Company has the ability to manage the combined interest rate sensitivity of its assets. See "- Interest Rate Sensitivity Analysis." Additionally, the Company seeks to balance the interest rate sensitivity of its assets by managing the maturities of its liabilities. During 2007 the Bank extended the maturity of borrowings as they matured, and focused on attracting longer-term certificates of deposit and brokered deposits. In addition, management's expectation is that the new deposits generated from our internet branch, "iGObanking.com[®]," will help to lessen our long standing dependency on wholesale borrowings.

Explore New Business Opportunities. The Company has in the past increased growth through acquisitions of financial institutions and branches of other financial institutions, and will continue to pursue growth through acquisitions that are, or are expected to be within a reasonable time frame, accretive to earnings, as well as evaluating the feasibility of opening additional branches. The Company has in the past opened new branches. In 2006, the Company completed the acquisition of Atlantic Liberty Savings and opened a branch in Bayside, Queens. Two branches were also opened in Queens in the first quarter of 2007. We plan to continue to seek and review potential acquisition opportunities that complement our current business, are consistent with our strategy to build a bank that is focused on the unique personal and small business banking needs of the multi-ethnic communities we serve, and will be accretive to earnings.

Manage Capital. The Bank faces several minimum capital requirements imposed by the OTS. These requirements limit the dividends the Bank is allowed to pay to the Holding Company, and can limit the annual growth of the Bank. As part of the strategy to find ways to best utilize its available capital, during 2007, the Holding Company continued its stock repurchase programs by repurchasing 38,000 shares of its common stock. At December 31, 2007, 362,050 shares remain to be repurchased under the current stock repurchase program. The Company had no shares held in treasury and had 21,321,564 shares outstanding at December 31, 2007.

Trends and Contingencies. The Company's operating results are significantly affected by national and local economic and competitive conditions, including changes in market interest rates, the strength of the local economy, government policies and actions of regulatory authorities. As short-term interest rates rose during the first half of 2006 and remained at those levels throughout most of 2007, we remained strategically focused on the origination of multi-family residential, commercial real estate and one-to-four family mixed-use property mortgage loans. As a result of this strategy, we were able to continue to achieve a higher yield on our mortgage portfolio than we would have otherwise experienced. We also established a business banking unit during the second half of 2006, and launched an internet branch in November 2006.

Prevailing interest rates affect the extent to which borrowers repay and refinance loans. In a declining interest rate environment, the number of loan prepayments and loan refinancings tends to increase, as do prepayments of mortgage-backed securities. Call provisions associated with the Company's investment in U.S. government agency and corporate securities may also adversely affect yield in a declining interest rate environment. Such prepayments and calls may adversely affect the yield of the Company's loan portfolio and mortgage-backed and other securities as the Company reinvests the prepaid funds in a lower interest rate environment. However, the Company typically receives additional loan fees when existing loans are refinanced, which partially offsets the reduced yield on the Company's loan portfolio resulting from prepayments. In periods of low interest rates, the Company's level of core deposits also may decline if depositors seek higher-yielding instruments or other investments not offered by the Company, which in turn may increase the Company's cost of funds and decrease its net interest margin to the extent alternative funding sources are utilized. By contrast, an increasing interest rate environment would tend to extend the average lives of lower yielding fixed rate mortgages and mortgage-backed securities, which could adversely affect net interest income. In addition, depositors tend to open longer term, higher costing certificate of deposit accounts which could adversely affect the

Bank's net interest income if rates were to subsequently decline. Additionally, adjustable rate residential mortgage loans and mortgage-backed securities generally contain interim and lifetime caps that limit the amount the interest rate can increase at re-pricing dates.

During the first half of 2006, the Federal Reserve's Federal Open Market Committee ("FOMC") increased short term interest rates through their meeting in June, while longer-term interest rates remained relatively stable. As a result, the yield curve flattened to the point where there was little difference between the rate on overnight funds and the rate on ten year bonds. During the second half of 2006 and through September 2007, the FOMC maintained the overnight rate, while longer term rates declined, resulting in an inverted yield curve. As a result, the Company's net interest margin declined as the spread between the rate the Company received on loans originated narrowed compared to the rate paid on new deposits. During the fourth quarter of 2007, the FOMC lowered the overnight interest rate by 100 basis points, and the treasury yield curve returned to a more normal slope by the end of 2007. Since demand remained strong for our higher-yielding loan products, we grew our loan portfolio \$377.4 million in 2007. We funded this growth with principal payments received on our securities portfolio, deposit growth, and borrowings. At December 31, 2007, we had loans in process of \$201.0 million.

The Bank also entered into several leveraged transactions in the second half of 2007. During September, the Bank purchased \$78.0 million of mortgage-backed securities and \$26.1 million of other securities in a series of transactions financed with borrowings. During the fourth quarter of 2007, the Bank purchased \$34.1 million of mortgage backed-securities and \$22.2 million of other securities in a series of transactions financed with borrowings. The spread, on a tax adjusted basis, between the securities purchased and the borrowings incurred is approximately 200 basis points. While these transactions reduce net interest margin, they increase net interest income.

During the year ended December 31, 2007, certificates of deposit increased \$64.4 million, while lower-costing core deposits increased \$194.1 million. To fund the strong demand for our loan products, the growth in deposits was augmented by an increase in borrowed funds. The total increase in borrowed funds during 2007 was \$240.1 million, including the borrowings incurred to fund the leverage transactions discussed above. The cost of funds rose to 4.54% in the fourth quarter of 2007 from 4.26% in the fourth quarter of 2006.

As a result of the growth in our higher-yielding loan portfolio, the yield on our total interest-earning assets increased 17 basis points during 2007 as compared to 2006. However, primarily as a result of the interest rate increases by the FOMC during 2005 and the first half of 2006, the cost of our total interest-bearing liabilities increased 48 basis points. This resulted in a decrease in our interest rate spread of 31 basis points to 2.23% for 2007 as compared to 2.54% for 2006. The net interest margin decreased 34 basis points to 2.44% for 2007 as compared to 2.78% for 2006. The net interest margin declined to 2.31% in the fourth quarter of 2007 as compared to 2.58% in the fourth quarter of 2006.

We are unable to predict the direction of future interest rate changes. However, the FOMC has reduced short-term interest rates since September 2007, and the treasury yield curve has returned to a more normal slope. Approximately 43% of the Company's certificates of deposit accounts and borrowed funds reprice or mature during the next year, which could result in a decrease in the cost of our interest-bearing liabilities. Also, in a decreasing interest rate environment, mortgage loans and mortgage-backed securities with higher rates tend to prepay, which could result in a reduction in the yield on our interest-earning assets.

During 2007, the nation's economy was generally considered to be expanding, although the expansion had slowed by the fourth quarter of 2007. World events, particularly the "War on Terror" and the level of oil prices, continued to have an effect on the economic recovery. The housing market in the United States saw a significant slowdown during 2007, and foreclosures of single family homes rose from the level seen in the past five years. These economic conditions can result in borrowers defaulting on their loans, or withdrawing their funds on deposit at the Bank to meet their financial obligations. While we have not seen a significant increase in delinquent loans, and have seen an increase in deposits, we cannot predict the effect of these economic conditions on the Company's financial condition or operating results.

Interest Rate Sensitivity Analysis

A financial institution's exposure to the risks of changing interest rates may be analyzed, in part, by examining the extent to which its assets and liabilities are "interest rate sensitive" and by monitoring the institution's interest rate sensitivity "gap." An asset or liability is said to be interest rate sensitive within a specific time period if it will mature or reprice within that time period. The interest rate sensitivity gap is defined as the difference between the amount of interest-earning assets maturing or repricing within a specific time period and the amount of interest-bearing liabilities maturing or repricing within that time period. A gap is considered positive when the amount of interest-earning assets maturing or repricing exceeds the amount of interest-bearing liabilities maturing or repricing within the same period. A gap is considered negative when the amount of interest-bearing liabilities maturing or repricing exceeds the amount of

interest-earning assets maturing or repricing within the same period. Accordingly, a positive gap may enhance net interest income in a rising rate environment and reduce net interest income in a falling rate environment. Conversely, a negative gap may enhance net interest income in a falling rate environment and reduce net interest income in a rising rate environment.

The table below sets forth the amounts of interest-earning assets and interest-bearing liabilities outstanding at December 31, 2007 which are anticipated by the Company, based upon certain assumptions, to reprice or mature in each of the future time periods shown. Except as stated below, the amount of assets and liabilities shown that reprice or mature during a particular period was determined in accordance with the earlier of the term to repricing or the contractual terms of the asset or liability. Prepayment assumptions for mortgage loans and mortgage-backed securities are based on the Bank's experience and industry averages, which generally range from 6% to 25%, depending on the contractual rate of interest and the underlying collateral. Money Market accounts and Savings accounts were assumed to have a withdrawal or "run-off" rate of 10% and 17%, respectively, based on the Bank's experience. While management bases these assumptions on actual prepayments and withdrawals experienced by the Company, there is no guarantee that these trends will continue in the future.

Interest Rate Sensitivity Gap Analysis at December 31, 2007							
	Three Months And Less	More Than Three Months To One Year	More Than One Year To Three Years	More Than Three Years To Five Years	More Than Five Years To Ten Years	More Than Ten Years	Total
<i>(Dollars in thousands)</i>

Cumulative net interest-earning assets as a percentage of interest-bearing liabilities	90.93%	91.88%	107.24%	108.40%	103.29%	103.69%	

(1) Consists of interest-earning deposits.

(2) Does not include non-interest bearing demand accounts totaling \$69.3million at December 31, 2007.

Certain shortcomings are inherent in the method of analysis presented in the foregoing table. For example, although certain assets and liabilities may have similar estimated maturities or periods to repricing, they may react in differing degrees to changes in market interest rates and may bear rates that differ in varying degrees from the rates that would apply upon maturity and reinvestment or upon repricing. Also, the interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other types may lag behind changes in market rates. Additionally, certain assets, such as ARM loans, have features that restrict changes in interest rates on a short-term basis and over the life of the asset. Further, in the event of a significant change in the level of interest

rates, prepayments on loans and mortgage-backed securities, and deposit withdrawal or “run-off” levels, would likely deviate materially from those assumed in calculating the above table. In the event of an interest rate increase, some borrowers may be unable to meet the increased payments on their adjustable-rate debt. The interest rate sensitivity analysis assumes that the nature of the Company’s assets and liabilities remains static. Interest rates may have an effect on customer preferences for deposits and loan products. Finally, the maturity and repricing characteristics of many assets and liabilities as set forth in the above table are not governed by contract but rather by management’s best judgment based on current market conditions and anticipated business strategies.

Interest Rate Risk

The Consolidated Financial Statements have been prepared in accordance with accounting principles generally accepted in the United States of America, which requires the measurement of financial position and operating results in terms of historical dollars without considering the changes in fair value of certain investments due to changes in interest rates. Generally, the fair value of financial investments such as loans and securities fluctuates inversely with changes in interest rates. As a result, increases in interest rates could result in decreases in the fair value of the Company’s interest-earning assets which could adversely affect the Company’s results of operations if such assets were sold, or, in the case of securities classified as available-for-sale, decreases in the Company’s stockholders’ equity, if such securities were retained.

The Company manages the mix of interest-earning assets and interest-bearing liabilities on a continuous basis to maximize return and adjust its exposure to interest rate risk. On a quarterly basis, management prepares the “Earnings and Economic Exposure to Changes in Interest Rate” report for review by the Board of Directors, as summarized below. This report quantifies the potential changes in net interest income and net portfolio value should interest rates go up or down (shocked) 200 basis points, assuming the yield curves of the rate shocks will be parallel to each other. The OTS currently places its focus on the net portfolio value ratio, focusing on a rate shock up or down of 200 basis points. The OTS uses the change in Net Portfolio Value Ratio to measure the interest rate sensitivity of the Company. Net portfolio value is defined as the market value of assets net of the market value of liabilities. The market value of assets and liabilities is determined using a discounted cash flow calculation. The net portfolio value ratio is the ratio of the net portfolio value to the market value of assets. All changes in income and value are measured as percentage changes from the projected net interest income and net portfolio value at the base interest rate scenario. The base interest rate scenario assumes interest rates at December 31, 2007. Various estimates regarding prepayment assumptions are made at each level of rate shock. Actual results could differ significantly from these estimates. At December 31, 2007, the Company is within the guidelines established by the Board of Directors for each interest rate level.

Change in Interest Rate	Projected Percentage Change In				Net Portfolio Value Ratio	
	Net Interest Income		Net Portfolio Value			
	2007	2006	2007	2006	2007	2006
-200 basis points	0.45	4.23	16.42	13.84	8.12	10.34
-100 basis points	1.62	4.63	10.29	8.61	7.82	10.05
Base interest rate	—	—	—	—	7.23	9.45
+100 basis points	-4.56	-3.29	-9.55	-11.02	6.68	8.62
+200 basis points	-10.32	-6.70	-21.14	-22.97	5.96	7.65

Analysis of Net Interest Income

Net interest income represents the difference between income on interest-earning assets and expense on interest-bearing liabilities. Net interest income depends upon the relative amount of interest-earning assets and interest-bearing liabilities and the interest rate earned or paid on them.

The following table sets forth certain information relating to the Company’s Consolidated Statements of Financial Condition and Consolidated Statements of Income for the years ended December 31, 2007, 2006 and 2005, and reflects the average yield on assets and average cost of liabilities for the periods indicated. Such yields and costs are derived by dividing income or expense by the average balance of assets or liabilities, respectively, for the periods shown. Average balances are derived from average daily balances. The yields include amortization of fees that are considered adjustments to yields.

	For the year ended December 31,								
	2007			2006			2005

Ratio of interest-earning assets to interest-bearing liabilities			<u>1.05 X</u>			<u>1.06 X</u>			<u>1.07 X</u>

(1) Average balances include non-accrual loans.

(2) Loan interest income includes loan fee income (which includes net amortization of deferred fees and costs, late charges, and prepayment penalties) of approximately \$3.7 million, \$3.8 million and \$4.2 million for the years ended December 31, 2007, 2006 and 2005, respectively.

(3) Interest rate spread represents the difference between the average rate on interest-earning assets and the average cost of interest-bearing liabilities.

(4) Net interest margin represents net interest income before the provision for loan losses divided by average interest-earning assets.

Rate/Volume Analysis

The following table presents the impact of changes in interest rates and in the volume of interest-earning assets and interest-bearing liabilities on the Company's interest income and interest expense during the periods indicated. Information is provided in each category with respect to (1) changes attributable to changes in volume (changes in volume multiplied by the prior rate), (2) changes attributable to changes in rate (changes in rate multiplied by the prior volume) and (3) the net change. The changes attributable to the combined impact of volume and rate have been allocated proportionately to the changes due to volume and the changes due to rate.

Comparison of Operating Results for the Years Ended December 31, 2007 and 2006

General. Diluted earnings per share decreased 10.5% to \$1.02 for the year ended December 31, 2007 from \$1.14 for the year ended December 31, 2006. Net income for the year ended December 31, 2007 was \$20.2 million, a decrease of \$1.5 million, or 6.7%, from the \$21.6 million earned in the year ended December 31, 2006. The year ended December 31, 2007 includes an after-tax other-than-temporary impairment charge of \$2.6 million, or \$0.13 per diluted share, related to the Company's investments in preferred stock of Freddie Mac and Fannie Mae. Net interest income for the year ended December 31, 2007 was \$70.9 million, an increase of \$3.2 million, or 4.8% from \$67.7 million for the year ended December 31, 2006. Non-interest income increased \$0.5 million, or 4.7%, as increases seen in most sources of income were partially offset by the other-than-temporary impairment charge. Non-interest expense increased \$7.3 million, or 17.2%, primarily due to expenditures related to the growth and expansion of the Bank.

Return on average assets decreased to 0.66% for the year ended December 31, 2007 from 0.84% for the year ended December 31, 2006. Return on average equity declined to 9.15% for the year ended December 31, 2007 from 11.14% for the year ended December 31, 2006.

Interest Income. Interest income increased \$35.2 million, or 22.2%, to \$193.6 million for the year ended December 31, 2007 from \$158.4 million for the year ended December 31, 2006. This is the result of a \$463.6 million increase in the average balance of interest-earning assets during 2007 compared to 2006, combined with a 17 basis point increase in the yield of interest-earning assets during 2007 compared to 2006. The increase in the yield of interest-earning assets is primarily due to an increase of \$451.6 million in the average balance of the higher-yielding loan portfolio to \$2,534.3 million. The yield on the mortgage loan portfolio increased six basis points to 6.87% for the year ended December 31, 2007 from 6.81% for the year ended December 31, 2006. The yield on the mortgage loan portfolio, excluding prepayment penalty income, increased nine basis points for the year ended December 31, 2007 compared to the year ended December 31, 2006. This increase is due to the average rate of 7.13% on new mortgage loans originated during

the year ended December 31, 2007 being above the average rate on both the loan portfolio and loans that were paid-in-full during the year. Excluding prepayment penalties from interest income, the yield on loans would have been 6.76% and 6.65%, and the yield on total interest-earning assets would have been 6.55% and 6.35%, in each case, for the years ended December 31, 2007 and 2006, respectively.

Interest income from securities increased \$2.2 million, as the average balance increased \$11.3 million for the year ended December 31, 2007 to \$352.0 million, combined with a 49 basis point increase in the yield to 5.08% during 2007 from 4.59% during 2006. The increase in the average balance of the securities portfolios is the result of several leverage transactions during the second half of 2007 that were completed to increase net interest income.

Interest Expense. Interest expense increased \$31.9 million to \$122.6 million, or 35.2%, for the year ended December 31, 2007, from \$90.7 million for the year ended December 31, 2006. An increase of \$471.5 million in the average balance of interest-bearing liabilities was combined with a 48 basis point rise in the cost of interest-bearing liabilities to 4.44% for the year ended December 31, 2007 from 3.96% for the year ended December 31, 2006. The increase in the cost of interest-bearing liabilities is primarily attributed to the Federal Reserve having raised the overnight interest rate at seventeen consecutive meetings through June 2006. Although the Federal Reserve had reduced the overnight rate by 100 basis points between September and December 2007, the prior increases resulted in an increase in our cost of funds, as new deposits were obtained at average rates higher than the average rate on existing deposits. The cost of certificate of deposits, savings accounts and money market accounts increased 51 basis points, 92 basis points and 48 basis points, respectively, for the year ended December 31, 2007 compared to the year ended December 31, 2006, resulting in an increase in the cost of due to depositors of 59 basis points for the year ended December 31, 2007 compared to the year ended December 31, 2006. The cost of borrowed funds also increased 24 basis points to 4.97% for the year ended December 31, 2007 as compared to the year ended December 31, 2006.

Net Interest Income. Net interest income for the year ended December 31, 2007 totaled \$70.9 million, an increase of \$3.2 million, or 4.8%, from \$67.7 million for 2006. The net interest spread declined 31 basis points to 2.23% for 2007 from 2.54% in 2006, as the yield on interest-earning assets increased 17 basis points while the cost of interest-bearing liabilities increased 48 basis points. The net interest margin decreased 34 basis points to 2.44% for the year ended December 31, 2007 from 2.78% for the year ended December 31, 2006. Excluding prepayment penalty income, the net interest margin would have been 2.32% and 2.63% for the years ended December 31, 2007 and 2006, respectively.

Provision for Loan Losses. There was no provision for loan losses for the years ended December 31, 2007 and 2006. In assessing the adequacy of the Company's allowance for loan losses, management considers the Company's historical loss experience, recent trends in losses, collection policies and collection experience, trends in the volume of non-performing loans, changes in the composition and volume of the gross loan portfolio, and local and national economic conditions. In recent years, the Bank has seen a significant improvement in its loss experience, and an improvement in local economic conditions and real estate values. As a result of these improvements, and despite the growth in the loan portfolio, primarily in multi-family residential, commercial, and one-to-four family mixed-use property mortgage loans, no adjustment to the allowance for loan losses was deemed necessary for the years ended December 31, 2007 and 2006. The ratio of non-performing loans to gross loans was 0.22% and 0.13% at December 31, 2007 and 2006, respectively. The allowance for loan losses as percentage of non-performing loans was 113% and 226% at December 31, 2007 and 2006, respectively. The ratio of allowance for loan losses to gross loans was 0.25% and 0.30% at December 31, 2007 and 2006, respectively. The Company experienced net charge-offs of \$424,000 and \$81,000 for the years ended December 31, 2007 and 2006, respectively.

Non-Interest Income. Non-interest income increased \$0.5 million, or 4.7%, for the year ended December 31, 2007 to \$10.3 million, as compared to \$9.8 million for the year ended December 31, 2006. This was primarily attributed to increases of \$0.2 million on BOLI due to the purchase of additional BOLI, \$1.0 million in dividends received on FHLB-NY stock, \$1.1 million in Other Income, and \$2.7 million attributed to changes in fair value of financial assets and financial liabilities carried at fair value under SFAS No. 159, which were partially offset by the other-than-temporary impairment charge of \$4.7 million to reduce the carrying amount of investments in preferred stock issues of Freddie Mac and Fannie Mae, two government sponsored entities, to the securities market value of \$28.2 million at December 31, 2007.

Non-Interest Expense. Non-interest expense was \$50.1 million for the year ended December 31, 2007, an increase of \$7.3 million, or 17.2%, from \$42.7 million for the year ended December 31, 2006. The increase from the comparable prior year period is primarily attributed to increases of: \$3.2 million in employee salary and benefit expenses related to additional employees for the additional branches, business banking initiative and the internet banking division, \$1.0 million in occupancy and equipment costs primarily related to increased rental expense, \$0.8 million in depreciation

primarily due to additional locations, \$1.1 million in professional services, \$1.0 million in data processing expense, and \$0.3 million in other operating expenses primarily related to the additional branches and employees. The efficiency ratio was 60.2% and 55.2% for the years ended December 31, 2007 and 2006, respectively.

Income Tax Provisions. Income tax expense for the year ended December 31, 2007 decreased \$2.2 million to \$10.9 million, compared to \$13.1 million for the year ended December 31, 2006. This decrease is primarily attributed to the decrease of \$3.6 million in income before income taxes. The effective tax rate decreased to 35.1% for the year ended December 31, 2007 from 37.7% for the year ended December 31, 2006. The decrease in the effective tax rate is due to the increased impact on income from tax preference items, primarily BOLI income.

Comparison of Operating Results for the Years Ended December 31, 2006 and 2005

General. Diluted earnings per share decreased 13.0% to \$1.14 for the year ended December 31, 2006 from \$1.31 for the year ended December 31, 2005. Net income for the year ended December 31, 2006 was \$21.6 million, a decrease of \$1.9 million, or 8.1%, from the \$23.5 million earned in the year ended December 31, 2005. Net interest income for the year ended December 31, 2006 was \$67.7 million, a decrease of \$0.5 million, or 0.7% from \$68.2 million for the year ended December 31, 2005. Non-interest income increased \$3.1 million, or 47.4%, as increases were seen in most sources of income. Non-interest expense increased \$6.5 million, or 17.9%, primarily due to expenditures related to the growth and expansion of the Bank.

Return on average assets decreased to 0.84% for the year ended December 31, 2006 from 1.07% for the year ended December 31, 2005. Return on average equity declined to 11.14% for the year ended December 31, 2006 from 14.27% for the year ended December 31, 2005.

Interest Income. Interest income increased \$25.9 million, or 19.6%, to \$158.4 million for the year ended December 31, 2006 from \$132.4 million for the year ended December 31, 2005. This was the result of a \$330.9 million increase in the average balance of interest-earning assets during 2006 compared to 2005, combined with a 21 basis point increase in the yield of interest-earning assets during 2006 compared to 2005. The increase in the yield of interest-earning assets was primarily due to an increase of \$371.8 million in the average balance of the higher-yielding loan portfolio to \$2,082.6 million, combined with a \$51.9 million decrease in the average balance of the lower-yielding securities portfolios. The yield on the mortgage loan portfolio increased four basis points to 6.81% for the year ended December 31, 2006 from 6.77% for the year ended December 31, 2005. The yield on the mortgage loan portfolio, excluding prepayment penalty income, increased 10 basis points for the year ended December 31, 2006 compared to the year ended December 31, 2005. This increase was due to the average rate of 7.37% on new mortgage loans originated during the year ended December 31, 2006 being above the average rate on both the loan portfolio and loans that were paid-in-full during the year. In an effort to increase the yield on interest-earning assets, we continued to fund a portion of the growth in the higher-yielding mortgage loan portfolio through repayments received on the lower-yielding securities portfolio. Excluding prepayment penalties from interest income, the yield on loans would have been 6.65% and 6.53%, and the yield on total interest-earning assets would have been 6.35% and 6.09%, in each case, for the years ended December 31, 2006 and 2005, respectively.

Interest income from securities decreased \$0.9 million, as the average balance declined \$51.9 million for the year ended December 31, 2006 to \$340.6 million, partially offset by a 39 basis point increase in the yield to 4.59% during 2006 from 4.20% during 2005. The decrease in the average balance of the securities portfolio was a result of the Bank's strategy to reduce the lower-yielding securities portfolio and shift these funds to the higher-yielding mortgage loan portfolio. Interest income from interest-earning deposits and federal funds sold increased \$0.6 million due to the increase in the average balance during 2006 compared to 2005, combined with an increase in the yield of 136 basis points for the year ended December 31, 2006 compared to the year ended December 31, 2005.

Interest Expense. Interest expense increased \$26.5 million to \$90.7 million, or 41.2%, for the year ended December 31, 2006, from \$64.2 million for the year ended December 31, 2005. An increase of \$318.0 million in the average balance of interest-bearing liabilities was combined with a 70 basis point rise in the cost of interest-bearing liabilities to 3.96% for the year ended December 31, 2006 from 3.26% for the year ended December 31, 2005. The increase in the cost of interest-bearing liabilities was primarily attributed to the Federal Reserve having raised the overnight interest rate at seventeen consecutive meetings through June 2006. Although the overnight rate remained at 5.25% for both the third and fourth quarters of 2006, the prior increases resulted in an increase in our cost of funds. The cost of certificate of deposits, savings accounts and money market accounts increased 77 basis points, 60 basis points and 147 basis points, respectively, for the year ended December 31, 2006 compared to the year ended December 31, 2005, resulting in an increase in the cost of due to depositors of 93 basis points for the year ended December 31, 2006 compared to the year ended December 31, 2005. The cost of borrowed funds also increased 40 basis points to 4.73% for the year ended December 31, 2006 as compared to the year ended December 31, 2005.

Net Interest Income. Net interest income for the year ended December 31, 2006 totaled \$67.7 million, a decrease of \$0.5 million, or 0.7%, from \$68.2 million for 2005. The net interest spread declined 49 basis points to 2.54% for 2006 from 3.03% in 2005, as the yield on interest-earning assets increased 21 basis points while the cost of interest-bearing liabilities increased 70 basis points. The net interest margin decreased 46 basis points to 2.78% for the year ended December 31, 2006 from 3.24% for the year ended December 31, 2005. Excluding prepayment penalty income, the net interest margin would have been 2.63% and 3.04% for the years ended December 31, 2006 and 2005, respectively.

Provision for Loan Losses. There was no provision for loan losses for the years ended December 31, 2006 and 2005. In assessing the adequacy of the Company's allowance for loan losses, management considered the Company's historical loss experience, recent trends in losses, collection policies and collection experience, trends in the volume of non-performing loans, changes in the composition and volume of the gross loan portfolio, and local and national economic conditions. In recent years, the Bank had seen a significant improvement in its loss experience, and an improvement in local economic conditions and real estate values. As a result of these improvements, and despite the growth in the loan portfolio, primarily in multi-family residential, commercial, and one-to-four family mixed-use property mortgage loans, no adjustment to the allowance for loan losses was deemed necessary for the years ended December 31, 2006 and 2005. The ratio of non-performing loans to gross loans was 0.13% at both December 31, 2006 and 2005. The allowance for loan losses as percentage of non-performing loans was 226% and 260% at December 31, 2006 and 2005, respectively. The ratio of allowance for loan losses to gross loans was 0.30% and 0.34% at December 31, 2006 and 2005, respectively. The Company experienced net charge-offs of \$81,000 and \$148,000 for the years ended December 31, 2006 and 2005, respectively.

Non-Interest Income. Non-interest income increased \$3.1 million, or 47.4%, for the year ended December 31, 2006 to \$9.8 million, as compared to \$6.6 million for the year ended December 31, 2005. This was attributed to increases of \$0.8 million in loan fees, \$0.5 million in dividends received on Federal Home Loan Bank of New York ("FHLB-NY") stock, \$0.4 million in BOLI dividends, and \$0.5 million in other income, and a \$0.7 million increase due to the prior year's loss on sale of securities due to a restructuring of the portfolio.

Non-Interest Expense. Non-interest expense was \$42.7 million for the year ended December 31, 2006, an increase of \$6.5 million, or 17.9%, from \$36.3 million for the year ended December 31, 2005. The increase from the prior year was primarily attributed to increases of: \$3.3 million in employee salary and benefit expenses related to additional employees for new branches, the business banking initiative, and the internet branch, and the expensing of stock options, \$1.4 million in occupancy and equipment costs primarily related to rental expense due to new branch leases (including the new branches which opened in the first quarter of 2007) and \$1.8 million in other operating expense primarily related to the amortization of core deposit intangible and non-compete contracts, and expenditures attributable to the growth of the Bank. The efficiency ratio was 55.2% and 48.0% for years ended December 31, 2006 and 2005, respectively. The increase in the efficiency ratio for 2006 was primarily related to the investments in: the new branches, the startup of iGObanking.com[®], and the business banking initiative. While each of these is expected contribute to future revenues, they did not produce revenues sufficient to maintain the prior year's efficiency ratio.

Income Tax Provisions. Income tax expense for the year ended December 31, 2006 decreased \$1.9 million to \$13.1 million, compared to \$15.1 million for the year ended December 31, 2005. This decrease was primarily attributed to the decrease of \$3.8 million in income before income taxes. The effective tax rate decreased to 37.7% for the year ended December 31, 2006 from 39.0% for the year ended December 31, 2005. The decrease in the effective tax rate was due to the increased impact on income from tax preference items, primarily BOLI income.

Liquidity, Regulatory Capital and Capital Resources

The Company's primary sources of funds are deposits, borrowings, principal and interest payments on loans, mortgage-backed and other securities, proceeds from sales of securities and loans. Deposit flows and mortgage prepayments, however, are greatly influenced by general interest rates, economic conditions and competition. At December 31, 2007, the Bank had an approved overnight line of credit of \$100.0 million with the FHLB-NY. In total, as of December 31, 2007, the Bank may borrow up to \$996.2 million from the FHLB-NY in Federal Home Loan advances and overnight lines of credit. As of December 31, 2007, the Bank had \$788.5 million in FHLB-NY advances outstanding. There were no funds outstanding at December 31, 2007 under the overnight line of credit. In addition, the Holding Company has \$61.2 million in junior subordinated debentures (which are included in Borrowed Funds) and the Bank had \$222.8 million in repurchase agreements to fund lending and investment opportunities. (See Note 7 of Notes to Consolidated Financial Statements in Item 8 of this Annual Report.) Management believes their available sources of funds are sufficient to fund current operations.

The Company's most liquid assets are cash and cash equivalents, which include cash and due from banks, overnight interest-earning deposits and federal funds sold with original maturities of 90 days or less. The level of these assets is dependent on the Company's operating, financing, lending and investing activities during any given period. At December 31, 2007, cash and cash equivalents totaled \$36.1 million, an increase of \$6.9 million from December 31, 2006. The Company also held marketable securities available for sale with a carrying value of \$440.1 million at December 31, 2007.

At December 31, 2007, the Company had commitments to extend credit (principally real estate mortgage loans) of \$79.9 million and open lines of credit for borrowers (principally construction loan and home equity loan lines of credit) of \$74.4 million. Since generally all of the loan commitments are expected to be drawn upon, the total loan commitments approximate future cash requirements, whereas the amounts of lines of credit may not be indicative of the Company's future cash requirements. The loan commitments generally expire in ninety days, while construction loan lines of credit mature within eighteen months and home equity loan lines of credit mature within ten years. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

The Company's total interest and operating expenses in 2007 were \$122.6 million and \$50.1 million, respectively. Certificate of deposit accounts that are scheduled to mature in one year or less as of December 31, 2007 totaled \$716.0 million.

The Company maintains three postretirement benefit plans for its employees: a noncontributory defined benefit pension plan which was frozen as of September 30, 2006, a contributory medical plan, and a noncontributory life insurance plan. The Company also maintains a noncontributory defined benefit plan for certain of its non-employee directors. The employee pension plan is the only plan that the Company has funded. During 2007, the Company did not make a contribution to the employee pension plan, and incurred cash expenditures of \$0.1 million for the medical and life insurance plans and \$0.1 million for the non-employee director plan. The Company expects to pay similar amounts for these plans in 2008. (See Note 10 of Notes to Consolidated Financial Statements in Item 8 of this Annual Report.)

The amounts reported in the Company's financial statements are obtained from reports prepared by independent actuaries, and are based on significant assumptions. The most significant assumption is the discount rate used to determine the accumulated postretirement benefit obligation ("APBO") for these plans. The APBO is the present value of projected benefits that employees and retirees have earned to date. The discount rate is a single rate at which the liabilities of the plans are discounted into today's dollars and could be effectively settled or eliminated. The discount rate used is based on the Citigroup Pension Liability Index, and reflects a rate which could be earned on bonds over a similar period that the Company anticipates the plans' liabilities will be paid. An increase in the discount rate would reduce the APBO, while a reduction in the discount rate would increase the APBO. During the past several years, when interest rates have been at historically low levels, the discount rate used for the Company's plans has declined from 7.25% for 2001 to 6.25% for 2007. This decline in the discount rate has resulted in an increase in the Company's APBO.

The Company's actuaries use several other assumptions that could have a significant impact on the Company's APBO and periodic expense for these plans. These assumptions include, but are not limited to, the rate of increase in future compensation levels, expected rate of return on plan assets, future increases in medical and life insurance premiums, turnover rates of employees, and life expectancy. The accounting standards for postretirement plans involve mechanisms that serve to limit the volatility of earnings by allowing changes in the value of plan assets and benefit obligations to be amortized over time when actual results differ from the assumptions used, there are changes in the assumptions used, or there are plan amendments. At December 31, 2007, the Company's employee pension plan has a \$1.9 million unrecognized loss. The non-employee director plan, and the medical and life insurance plans have a \$0.4 million and \$0.3 million unrecognized gain, respectively, due to experience different from what had been estimated and changes in actuarial assumptions. The pension plan's unrecognized loss is primarily attributed to the reduction in the discount rate over the past several years. The medical and insurance plans' unrecognized gain is attributed to a reduction in medical premiums. In addition, the non-employee director pension plan and the medical and life insurance plans have unrecognized past service liabilities of \$0.4 million and \$0.1 million, respectively, due to plan amendments in prior years. The net after tax effect of the unrecognized gains and losses associated with these plans has been recorded in accumulated other comprehensive income in stockholders' equity, resulting in a reduction of stockholders' equity of \$0.9 million as of December 31, 2007.

The change in the discount rate, the reduction in medical premiums, and the freezing of the employee defined benefit pension plan are the only significant changes made to the assumptions used for these plans for each of the years in the three years ended December 31, 2007. During this time period, the actual return on the employee pension plan's assets has approximated the assumed return used to determine the periodic pension expense.

The market value of the assets of the Company's employee pension plan is \$17.0 million at December 31, 2007, which is \$2.0 million more than the projected benefit obligation. The Company does not anticipate a change in the market value of these assets which would have a significant effect on liquidity, capital resources, or results of operations.

During 2007, funds provided by the Company's operating activities amounted to \$25.5 million. These funds, together with \$487.0 million provided by financing activities, were utilized to fund net investing activities of \$505.6 million. Funds provided by financing activities were primarily the result of growth in due to depositors of \$257.7 million and net borrowings of \$235.2 million. Principal payments and calls on loans and securities provided additional funds. The primary investment activity of the Company is the origination of loans, and the purchase of mortgage-backed securities. During 2007, the Bank had loan originations and purchases of \$757.4 million. In addition during 2007, the Company purchased \$204.6 million of mortgage-backed and other securities.

At the time of the Bank's conversion from a federally chartered mutual savings bank to a federally chartered stock savings bank, the Bank was required by the OTS to establish a liquidation account which is reduced as and to the extent that eligible account holders reduce their qualifying deposits. The balance of the liquidation account at December 31, 2007 was \$3.2 million. In the unlikely event of a complete liquidation of the Bank, each eligible account holder will be entitled to receive a distribution from the liquidation account. The Bank is not permitted to declare or pay a dividend or to repurchase any of its capital stock if the effect would be to cause the Bank's regulatory capital to be reduced below the amount required for the liquidation account. Unlike the Bank, the Holding Company is not subject to OTS regulatory restrictions on the declaration or payment of dividends to its stockholders, although the source of such dividends could depend upon dividend payments from the Bank. The Holding Company is subject, however, to the requirements of Delaware law, which generally limit dividends to an amount equal to the excess of its net assets (the amount by which total assets exceed total liabilities) over its stated capital or, if there is no such excess, to its net profits for the current and/or immediately preceding fiscal year.

Regulatory Capital Position. Under OTS capital regulations, the Bank is required to comply with each of three separate capital adequacy standards: tangible capital, leverage and core capital and total risk-based capital. Such classifications are used by the OTS and other bank regulatory agencies to determine matters ranging from each institution's semi-annual FDIC deposit insurance premium assessments, to approvals of applications authorizing institutions to grow their asset size or otherwise expand business activities. At December 31, 2007 and 2006, the Bank exceeded each of the three OTS capital requirements. (See Note 12 of Notes to Consolidated Financial Statements included in Item 8 of this Annual Report.)

Critical Accounting Policies

The Company's accounting policies are integral to understanding the results of operations and statement of financial condition. These policies are described in the Notes to Consolidated Financial Statements. Several of these policies require management's judgment to determine the value of the Company's assets and liabilities. The Company has established detailed written policies and control procedures to ensure consistent application of these policies. The Company has identified two accounting policies that require significant management valuation judgment: the allowance for loan losses and fair value of financial instruments.

Allowance for Loan Losses. An allowance for loan losses is provided to absorb probable estimated losses inherent in the loan portfolio. Management reviews the adequacy of the allowance for loan losses by reviewing all impaired loans on an individual basis. The remaining portfolio is evaluated based on the Company's historical loss experience, recent trends in losses, collection policies and collection experience, trends in the volume of non-performing loans, changes in the composition and volume of the gross loan portfolio, and local and national economic conditions. Judgment is required to determine how many years of historical loss experience are to be included when reviewing historical loss experience. A full credit cycle must be used, or loss estimates may be inaccurate. This evaluation is inherently subjective, as it requires estimates that are susceptible to significant revisions as more information becomes available.

Notwithstanding the judgment required in assessing the components of the allowance for loan losses, the Company believes that the allowance for loan losses is adequate to cover losses inherent in the loan portfolio. The policy has been applied on a consistent basis for all periods presented in the Consolidated Financial Statements.

Fair Value of Financial Instruments. Effective January 1, 2007, the Company adopted SFAS No. 157, "Fair Value Measurements", and SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities-Including an Amendment of FASB No. 115". (See Note 15 of Notes to Consolidated Financial Statements in Item 8 of this Annual Report.) SFAS No. 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, and establishes a framework for measuring fair value. SFAS No. 159 permits entities to choose to measure many financial instruments and

certain other items at fair value. Management selected the fair value option for certain investment securities, primarily mortgage-backed securities, and certain borrowed funds. Changes in the fair value of financial instruments for which the fair value election is made are recorded in the consolidated statements of income. Management selected, as of January 1, 2007, financial assets and financial liabilities with fair values of \$160.7 million and \$120.1 million, respectively, for the fair value option. The Company elected to measure at fair value junior subordinated debt (commonly known as trust preferred securities) with a face amount of \$61.8 million that was issued during 2007. The Company also elected to measure at fair value securities that were purchased during 2007 at a cost of \$21.4 million.

The securities portfolio also consists of mortgage-backed and other securities for which the fair value election was not selected. These securities are classified as Available for Sale and are carried at fair value in the consolidated statements of financial position, with changes in fair value recorded in Accumulated Other Comprehensive Income. If any decline in fair value for these securities is deemed other-than-temporary, the security is written down to a new cost basis with the resulting loss recorded in the consolidated statements of income. During 2007, the Company recorded an other-than-temporary impairment charge of \$4.7 million for certain preferred stocks.

Financial assets and financial liabilities reported at fair value are required to be measured based on the following alternatives: (1) quoted prices in active markets for identical financial instruments (level 1), (2) significant other observable inputs (level 2), or (3) significant unobservable inputs (level 3). Judgment is required in selecting the appropriate level to be used to determine fair value. The financial assets and financial liabilities for which the fair value election was made, and the majority of investments classified as Available for Sale, are measured using level 2 inputs, which requires judgment to determine the fair value. The preferred stocks for which an other-than-temporary impairment charge was recorded in 2007 were valued using a level 1 input.

Contractual Obligations

	Payments Due By Period				
	Total	Less Than 1 Year	1 - 3 Years	3 - 5 Years	More Than 5 Years
	<i>(In thousands)</i>				
Borrowed funds	\$ 1,072,551	\$ 248,973	\$ 399,217	\$ 256,361	\$ 168,000
Deposits	2,025,447	1,574,014	331,240	97,042	23,151
Loan commitments	154,321	154,321	-	-	-
Capital lease obligations	-	-	-	-	-
Operating lease obligations	24,889	2,695	5,558	4,726	11,910
Purchase obligations	11,659	3,311	4,174	4,174	-
Pension and other postretirement benefits	6,102	280	862	847	4,113
Deferred compensation plans	4,338	582	735	538	2,483
Total	\$ 3,299,307	\$ 1,984,176	\$ 741,786	\$ 363,688	\$ 209,657

The Company has significant obligations that arise in the normal course of business. The Company finances its assets with deposits and borrowed funds. The Company also uses borrowed funds to manage its interest-rate risk. The Company has the means to refinance these borrowings as they mature through its financing arrangements with the FHLB-NY and its ability to arrange repurchase agreements with broker-dealers and the FHLB-NY. (See Notes 6 and 7 of Notes to Consolidated Financial Statements in Item 8 of this Annual Report.)

The Company focuses its balance sheet growth on the origination of mortgage loans. At December 31, 2007, the Bank had commitments to extend credit and lines of credit of \$154.3 million for mortgage and other loans. These loans will be funded through principal and interest payments received on existing mortgage loans and mortgage-backed securities, growth in customer deposits, and, when necessary, additional borrowings. (See Note 13 of Notes to Consolidated Financial Statements in Item 8 of this Annual Report.)

At December 31, 2007, the Bank had fourteen branches, eight of which are leased. The Bank leases its branch locations primarily when it is not the sole tenant. Whether the Bank will purchase its future branch locations will depend in part on the availability of suitable locations and the availability of properties. In addition, the Bank leases its executive offices.

The Bank currently outsources its data processing, loan servicing and check processing functions. The Bank believes that this is the most cost effective method for obtaining these services. These arrangements are usually volume dependent and have varying terms. The contracts for these services usually include annual increases based on the increase in the consumer price index. The amounts shown above for purchase obligations represent the current term and volume of activity of these contracts. The Bank expects to renew these contracts as they expire.

The amounts shown for pension and other postretirement benefits reflect the Company's employee and directors' pension plans, the supplemental retirement benefits of its president, and amounts due under its plan for medical and life insurance benefits for retired employees. The amount shown in the "Less Than 1 Year" column represents the Company's current estimate for these benefits, some of which are based on information supplied by actuaries. The amounts shown in columns reflecting periods over one year represent the Company's current estimate based on the past year's actual disbursements and information supplied by actuaries, but do not include an estimate for the employee pension plan as we do not currently have an estimate for this plan. The amounts do not include an increase for possible future retirees or increases in health plan costs. The amount shown in the "More Than 5 Years" column represents the amount required to increase the total amount to the projected benefit obligation of the directors' plan and the medical and life insurance benefit plans, since these are unfunded plans. (See Note 10 of Notes to Consolidated Financial Statements in Item 8 of this Annual Report.)

The Bank provides a non-qualified deferred compensation plan for officers who have achieved the level of at least vice president. In addition to the amounts deferred by the officers, the Bank matches 50% of their contributions, generally up to a maximum of 5% of the officers' salary. These plans generally require the deferred balance to be credited with earnings at a rate earned by certain mutual funds. Employees do not receive a distribution from these plans until their employment is terminated. The amounts shown in the columns for less than five years represent the estimate of the amounts the Bank will contribute to a rabbi trust with respect to matching contributions under these plans, and the amounts to be paid from the rabbi trust to two executives who have retired. The amount shown in the "More Than 5 Years" column represents the current accrued liability for these plans, adjusted for the activity in the columns for less than five years. This expense is provided in the Consolidated Statements of Income, and the liability has been provided in the Consolidated Statements of Financial Condition.

Impact of New Accounting Standards

In July 2006, the Financial Accounting Standards Board ("FASB") issued FASB Interpretation 48 (FIN 48), "Accounting for Uncertainty in Income Taxes: an interpretation of SFAS No. 109". FIN 48 clarifies Statement of Financial Accounting Standards ("SFAS") No. 109, "Accounting for Income Taxes", by defining a criterion that an individual tax position would have to meet for some or all of the benefit of that position to be recognized in an entity's financial statements. Entities should evaluate a tax position to determine if it is more likely than not that a position will be sustained on examination by taxing authorities. FIN 48 defines more likely than not as "a likelihood of more than 50 percent". FIN 48 also requires certain disclosures, including the amount of unrecognized tax benefits that if recognized would change the effective tax rate, information concerning tax positions for which a significant increase or decrease in the unrecognized tax benefit liability is reasonably possible in the next 12 months, a tabular reconciliation of the beginning and ending balances of unrecognized tax benefits, and tax years that remain open for examination by major jurisdictions. FIN 48 is effective for fiscal years beginning after December 15, 2006. The adoption of FIN 48 did not have a material effect on the Company's results of operations or financial condition.

In February 2006, the FASB issued SFAS No. 155, "Accounting for Certain Hybrid Financial Instruments." The Statement amends SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities" and SFAS No.140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities." The Statement also resolves issues addressed in SFAS No. 133 Implementation Issue No. D1, "Application of Statement 133 to Beneficial Interest in Securitized Financial Assets." SFAS No. 155 permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation, clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS No. 133, establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain as embedded derivative requiring bifurcation, and clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives. The Statement eliminates the interim guidance in SFAS No. 133 Implementation Issue No. D1, which provided that beneficial interests in securitized financial assets are not subject to the provisions of SFAS No. 133. The Statement is effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006. The adoption of SFAS No. 155 did not have a material effect on the Company's results of operations or financial condition.

In September 2006 the FASB issued SFAS No. 157, "Fair Value Measurements." The Statement is effective for all financial statements issued for fiscal years beginning after November 15, 2007, with earlier adoption permitted. The Statement defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an

orderly transaction between market participants at the measurement date, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The early adoption of SFAS No. 159 required the early adoption of SFAS No. 157. Adoption of SFAS No. 157 did not have a material impact on the Company's results of operations or financial condition.

In September 2006, the FASB issued SFAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans." The Statement requires an employer that is a business entity and sponsors one or more single-employer defined benefit plans to: (1) recognize the funded status of a benefit plan – measured as the difference between plan assets at fair value and the benefit obligation – in its statement of financial position, with the corresponding credit or charge, net of taxes, upon initial adoption to Accumulated Other Comprehensive Income; (2) recognized as a component of Accumulated Other Comprehensive Income, net of tax, the gains or losses and prior service costs or credits that arise during the period but are not recognized as components of net periodic benefit cost pursuant to SFAS No. 87, "Employers' Accounting for Pensions", or SFAS No. 106, "Employers' Accounting for Postretirement Benefits Other Than Pensions"; (3) measure defined benefit plan assets and obligations as of the date of the employer's fiscal year end; and (4) expand disclosures in the notes to the financial statements about certain effects on net periodic benefit cost. The Statement also amends SFAS No. 132 (revised 2003), "Employers' Disclosures about Pensions and Other Postretirement Benefits", and SFAS No. 88, "Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans for Termination Benefits". An employer who has publicly traded equity securities, such as the Holding Company, is required to initially recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures as of the end of its fiscal year ending after December 15, 2006. For the Holding Company, this is for the year ended December 31, 2006. The requirement to measure plan assets and benefit obligations as of the date of the employer's fiscal year end is effective for fiscal years ending after December 15, 2008. The adoption of this statement resulted in a charge to Accumulated Other Comprehensive Income, and a corresponding reduction of stockholders' equity, of \$1.2 million, net of taxes, at December 31, 2006.

In February 2007, the FASB Issued SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities-Including an amendment of FASB No. 115". This Statement permits entities to choose to measure many financial instruments and certain other items at fair value. This statement is effective for the beginning of the first fiscal year that begins after November 15, 2007. Early adoption is permitted as of the beginning of an entity's fiscal year prior to the effective date, provided the election is made prior to the issuance of financial statements for that year or portion thereof, and the election is made within 120 days of the beginning of that fiscal year. Early adoption of SFAS No. 159 also requires the early adoption of SFAS No. 157. The impact of adopting this statement on the Company's consolidated financial statements is discussed in Note 15 of Notes to Consolidated Financial Statements in Item 8 of this Annual Report.

In May 2005, the FASB issued SFAS No. 154, "Accounting Changes and Error Corrections," which replaces APB Opinion No. 20, "Accounting Changes," and SFAS No. 3, "Reporting Accounting Changes in Interim Financial Statements," and changes the requirements for the accounting for and reporting of a change in accounting principle. SFAS No. 154 applies to all voluntary changes in accounting principle and to changes required by an accounting pronouncement when the pronouncement does not include specific transition provisions. SFAS No. 154 requires retrospective application of changes in accounting principle to prior periods' financial statements unless it is impracticable to determine either the period-specific effects or the cumulative effect of the change. APB Opinion No. 20 previously required that most voluntary changes in accounting principle be recognized by including the cumulative effect of the change in net income for the period of the change in accounting principle. SFAS No. 154 carries forward without change the guidance contained in APB Opinion No. 20 for reporting the correction of an error in previously issued financial statements and a change in accounting estimate. SFAS No. 154 also carries forward the guidance in APB Opinion No. 20 requiring justification of a change in accounting principle on the basis of preferability. SFAS No. 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005, with early adoption permitted. The adoption of SFAS No. 154 did not have a material impact on the Company's results of operations or financial condition.

On November 3, 2005, the FASB issued FASB Staff Position (FSP) Nos. FAS 115-1 and FAS 124-1, "The Meaning of Other-Than-Temporary Impairment and Its Application." This FSP addresses the determination as to when an investment is considered impaired, whether that impairment is other than temporary, and the measurement of an impairment loss. This FSP also includes accounting considerations subsequent to the recognition of an other-than-temporary impairment and requires certain disclosures about unrealized losses that have not been recognized as other-than-temporary impairments. The guidance in this FSP amends SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities," and No. 124, "Accounting for Certain Investments Held by Not-for-Profit Organizations," and APB Opinion No. 18, "The Equity Method of Accounting for Investments in Common Stock." This FSP is effective for reporting periods beginning after December 15, 2005. The adoption of this FSP did not have a material effect on the Company's results of operations or financial condition.

In September 2006, the FASB ratified the consensus reached by the Emerging Issues Task Force on Issue No. 06-4, “Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements.” The consensus reached in Issue No. 06-4 requires the accrual of a liability for the cost of the insurance policy during postretirement periods in accordance with SFAS No. 106, “Employers’ Accounting for Postretirement Benefits Other Than Pensions”, or APB Opinion 12, “Omnibus Opinion”, when an employer has effectively agreed to maintain a life insurance policy during the employee’s retirement. At December 31, 2007 the Company had endorsement split-dollar life insurance arrangements with forty-seven present or former employees, which currently provides approximately \$7.9 million of life insurance benefits to these employees. The amount of the benefit for each employee is based on the employee’s salary when their employment terminates. Issue No. 06-4 is effective for fiscal years beginning after December 15, 2007. Adoption of Issue No. 06-4 is not expected to have a material impact on the Company’s results of operations or financial condition.

In September 2006, the Staff of the Securities and Exchange Commission issued Staff Accounting Bulletin No. 108 (“SAB 108”), “Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements.” SAB 108 was issued to address diversity in practice in quantifying financial statement misstatements and the potential under current practice for the build up of improper amounts on the balance sheet, and to provide consistency between how registrants quantify financial statement misstatements. The techniques most commonly used in practice to accumulate and quantify misstatements are generally referred to as the “roll-over” and “iron curtain” approaches. The roll-over approach quantifies a misstatement based on the amount of the error originating in the current year statement. The iron curtain approach quantifies a misstatement based on the effects of correcting the misstatement existing in the balance sheet at the end of the current year, irrespective of when the misstatement originated. SAB 108 requires a “dual approach” that requires quantification of errors under both the roll-over and iron curtain methods. SAB 108 is effective for fiscal years ending after November 15, 2006. The adoption of SAB 108 did not have a material effect on the Company’s results of operations or financial condition.

In December 2007, the FASB issue SFAS No. 141R (revised 2007), “Business Combinations.” This statement replaces SFAS No. 141, “Business Combinations”, but retains the fundamental requirements in SFAS No. 141 that the acquisition method of accounting be used for all business combinations and for an acquirer to be identified for each business combination. This statement defines the acquirer as the entity that obtains control of one or more businesses in the business combination and establishes the acquisition date as the date that the acquirer achieves control. This statement requires an acquirer to recognize the assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at the acquisition date, measured at their fair values as of that date, with limited exceptions. This statement also requires that costs incurred to complete the acquisition, including restructuring costs, are to be recognized separately from the acquisition. This statement also requires an acquirer to recognize assets or liabilities arising from all other contingencies as of the acquisition date, measured at their acquisition-date fair values, only if they meet the definition of as asset or liability in FASB Concepts Statement No. 6, “Elements of Financial Statements.” This statement also provides specific guidance on the subsequent accounting for assets and liabilities arising from contingencies acquired or assumed in a business combination. SFAS No. 141R is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Early adoption is not permitted. Since this statement is effective for business combinations for which the Company is the acquirer that occur after December 31, 2008, the Company is unable, at this time, to determine the impact of this statement.

In December 2007, the FASB issued SFAS No. 160, “Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB No. 51.” This statement requires that ownership interests in subsidiaries held by parties other than the parent company be clearly identified, labeled, and presented in the consolidated statement of financial position within equity, but separate from the parent’s equity. This statement also requires the amount of consolidated net income attributable to the parent company and to the noncontrolling interest be clearly identified and presented on the face of the consolidated statement of income. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. Early adoption is not permitted. Adoption of SFAS No. 160 is not expected to have a material impact on the Company’s results of operations or financial condition.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

This information is contained in the section captioned “Interest Rate Risk” on page 51 and in Notes 13 and 14 of the Notes to Consolidated Financial Statements in Item 8 of this Annual Report.

Notes to Consolidated Financial Statements

For the years ended December 31, 2007, 2006 and 2005

1. Nature of Operations

Flushing Financial Corporation (the “Holding Company”), a Delaware business corporation, is a savings and loan holding company organized at the direction of its subsidiary, Flushing Savings Bank, FSB (the “Bank”), in connection with the Bank’s conversion from a mutual to capital stock form of organization. The Holding Company and its direct and indirect wholly-owned subsidiaries, the Bank, Flushing Commercial Bank, Flushing Preferred Funding Corporation, Flushing Service Corporation, and FSB Properties Inc., are collectively herein referred to as the “Company.”

The Bank’s principal business is attracting retail deposits from the general public and investing those deposits together with funds generated from ongoing operations and borrowings, primarily in (1) originations and purchases of one-to-four family (focusing on mixed-use properties – properties that contain both residential dwelling units and commercial units), multi-family residential and commercial real estate mortgage loans; (2) construction loans, primarily for multi-family residential properties; (3) Small Business Administration (“SBA”) loans and other small business loans; (4) mortgage loan surrogates such as mortgage-backed securities; and (5) U.S. government securities, corporate fixed-income securities and other marketable securities. The Bank also originates certain other consumer loans. The Bank primarily conducts its business through fourteen full-service banking offices, nine of which are located in Queens County, one in Nassau County, three in Kings County (Brooklyn), and one in New York County (Manhattan), New York. The Bank also operates “iGObanking.com[®]”, an internet branch, offering savings accounts and certificates of deposit.

2. Summary of Significant Accounting Policies

The accounting and reporting policies of the Company follow generally accepted accounting principles in the United States of America (“GAAP”). The policies which materially affect the determination of the Company’s financial position, results of operations and cash flows are summarized below.

Principles of consolidation:

The accompanying consolidated financial statements include the accounts of Flushing Financial Corporation and the following direct and indirect wholly-owned subsidiaries of the Holding Company: the Bank, Flushing Commercial Bank (“FCB”), Flushing Preferred Funding Corporation (“FPFC”), Flushing Service Corporation (“FSC”), and FSB Properties Inc. (“Properties”). FCB is a limited-purpose commercial bank formed to accept municipal deposits and state funds, including certain court ordered funds from New York State Courts, in the State of New York. FPFC is a real estate investment trust formed to hold a portion of the Bank’s mortgage loans to facilitate access to capital markets. FSC was formed to market insurance products and mutual funds. Properties is an inactive subsidiary whose purpose was to manage real estate properties and joint ventures.

Use of estimates:

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expenses during the reporting period. Actual results could differ from these estimates.

Cash and cash equivalents:

For the purpose of reporting cash flows, the Company defines cash and due from banks, overnight interest-earning deposits and federal funds sold with original maturities of 90 days or less as cash and cash equivalents. The Bank is required to maintain non-interest bearing cash reserves equal to a percentage of certain deposits. The reserve requirement totaled \$11.0 million and \$7.7 million at December 31, 2007 and 2006, respectively.

Securities available for sale:

Securities are classified as available for sale when management intends to hold the securities for an indefinite period of time or when the securities may be utilized for tactical asset/liability purposes and may be sold from time to time to effectively manage interest rate exposure and resultant prepayment risk and liquidity needs. Premiums and discounts are amortized or accreted, respectively, using the level-yield method. Realized gains and losses on the sales of securities are determined using the specific identification method. Unrealized gains and losses (other than unrealized losses considered other-than-temporary which are recognized in the Consolidated Statements of Income) on securities available for sale are excluded from earnings and reported as accumulated other comprehensive income, net of taxes. In estimating other-than-temporary impairment losses, management considers (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, if applicable, and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value.

Goodwill:

Goodwill is presumed to have an indefinite life and is tested annually, or when certain conditions are met, for impairment, rather than amortized. If the fair value of the reporting unit is greater than the goodwill amount, no further evaluation is required. If the fair value of the reporting unit is less than the goodwill amount, further evaluation would be required to compare the fair value of the reporting unit to the goodwill amount and determine if a write down is required. As of December 31, 2007, the annual impairment tests have not resulted in recognizing an impairment of goodwill.

Loans:

Loans are reported at their principal outstanding balance net of any unearned income, charge-offs, deferred loan fees and costs on originated loans and unamortized premiums or discounts on purchased loans. Interest on loans is recognized on the accrual basis. The accrual of income on loans is discontinued when certain factors, such as contractual delinquency of ninety days or more, indicate reasonable doubt as to the timely collectibility of such income. Interest previously recognized on non-accrual loans is reversed from interest income at the time the loan is placed on non-accrual status. A non-accrual loan can be returned to accrual status after the loan meets certain criteria. Subsequent cash payments received on non-accrual loans that do not meet the criteria are applied first as a reduction of principal until all principal is recovered and then subsequently to interest. Loan fees and certain loan origination costs are deferred. Net loan origination costs and premiums or discounts on loans purchased are amortized into interest income over the contractual life of the loans using the level-yield method. Prepayment penalties received on loans which pay in full prior to their scheduled maturity are included in interest income.

Allowance for loan losses:

The Company maintains an allowance for loan losses at an amount, which, in management's judgment, is adequate to absorb probable estimated losses inherent in the loan portfolio. Management's judgment in determining the adequacy of the allowance is based on evaluations of the collectibility of loans. This evaluation is inherently subjective, as it requires estimates that are susceptible to significant revisions as more information becomes available. In assessing the adequacy of the Company's allowance for loan losses, management considers the Company's historical loss experience, recent trends in losses, collection policies and collection experience, trends in the volume of non-performing loans, changes in the composition and volume of the gross loan portfolio, and local and national economic conditions. The Board of Directors reviews and approves management's evaluation of the adequacy of the allowance for loan losses on a quarterly basis.

A loan is considered impaired when, based upon current information, the Company believes it is probable that it will be unable to collect all amounts due, both principal and interest, according to the contractual terms of the loan. Impaired loans are measured based on the present value of the expected future cash flows discounted at the loan's effective interest rate or at the loan's observable market price or the fair value of the collateral if the loan is collateral dependent. Interest income on impaired loans is recorded on the cash basis. The Company reviews all non-accrual loans for impairment.

The allowance for loan losses is established through charges to earnings in the form of a provision for loan losses. Increases and decreases in the allowance other than charge-offs and recoveries are included in the provision for loan losses. When a loan or a portion of a loan is determined to be uncollectible, the portion deemed uncollectible is charged against the allowance, and subsequent recoveries, if any, are credited to the allowance.

Loans held for sale:

Loans held for sale are initially recorded at the principal amount outstanding net of deferred origination costs and fees and any premiums or discounts. Loans held for sale are carried at the lower of adjusted cost or market, which is computed by the aggregate method (unrealized losses are offset by unrealized gains). Net unrealized losses are recognized through a valuation allowance by charges to income. The Company did not have any loans held for sale as of December 31, 2007 and 2006.

Bank owned life insurance:

Bank owned life insurance ("BOLI") represents life insurance on the lives of certain employees who have provided positive consent allowing the Bank to be the beneficiary of such policies. BOLI is carried in the consolidated statements of financial position at its cash surrender value. Increases in the cash value of the policies, as well as proceeds received, are recorded in other non-interest income, and are not subject to income taxes.

Real estate owned:

Real estate owned consists of property acquired by foreclosure. These properties are carried at the lower of carrying amount or fair value (which is based on appraised value with certain adjustments) less estimated costs to sell (hereinafter defined as fair value). This determination is made on an individual asset basis. If the fair value is less than the carrying amount, the deficiency is recognized as a valuation allowance. Further decreases to fair value will be recorded in this valuation allowance through a provision for losses on real estate owned. The Company utilizes estimates of fair value to determine the amount of its valuation allowance. Actual values may differ from those estimates. The Company had no real estate owned as of or during the years ended December 31, 2007, 2006 and 2005.

Bank premises and equipment:

Bank premises and equipment are stated at cost, less depreciation accumulated on a straight-line basis over the estimated useful lives of the related assets (3 to 40 years). Leasehold improvements are amortized on a straight-line basis over the term of the related leases or the lives of the assets, whichever is shorter. Maintenance, repairs and minor improvements are charged to non-interest expense in the period incurred.

Federal Home Loan Bank Stock:

The Federal Home Loan Bank of New York ("FHLB-NY") has assigned to the Bank a mandated membership stock purchase, based on the Bank's asset size. In addition, for all borrowing activity, the Bank is required to purchase shares of FHLB-NY non-marketable capital stock at par. Such shares are redeemed by FHLB-NY at par with reductions in the Bank's borrowing levels. The Bank carries this investment at historical cost, as it does not consider the value of this investment to be impaired.

Securities sold under agreements to repurchase:

Securities sold under agreements to repurchase are accounted for as collateralized financing and are carried at amounts at which the securities will be subsequently reacquired as specified in the respective agreements. Interest incurred under these agreements is included in other interest expense.

Income Taxes:

Deferred income tax assets and liabilities are determined using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is determined based on the tax effects of the temporary differences between book and tax bases of the various balance sheet assets and liabilities, and gives current recognition to changes in tax rates and laws.

Stock compensation plans:

Prior to January 1, 2006, the Company accounted for stock-based compensation in accordance with APB Opinion No. 25, "Accounting for Stock Issued to Employees", which did not require compensation cost to be recognized for stock option grants, with the exception of certain circumstances. Effective January 1, 2006, the Company adopted Statement of Financial Accounting Standards ("SFAS") No. 123R, "Share-Based Payment." This statement revised SFAS No. 123, "Accounting for Stock Based Compensation", and superseded APB No. 25 and its related implementation guidance. SFAS No. 123R establishes fair value as the measurement objective in accounting for share-based payment arrangements and requires a fair-value-based measurement method in accounting for share-based payment transactions with employees. It also requires measurement of the cost of employee services received in exchange for an award of an equity instrument based on the grant date fair value of the award. That cost is recognized over the period during which an employee is required to provide service in exchange for the award. The requisite service period is usually the vesting period. The Company elected to adopt SFAS No. 123R using the modified prospective method, and, accordingly, financial statement amounts for the prior periods presented have not been restated to reflect the fair value method of expensing share-based compensation.

Segment Reporting:

Management views the Company as operating as a single unit, a community savings bank. Therefore, segment information is not provided.

Advertising Expense:

Costs associated with advertising are expensed as incurred. The Company recorded advertising expenses of \$1.7 million, \$0.9 million, and \$1.0 million for the years ended December 31, 2007, 2006 and 2005, respectively.

Earnings per share:

Basic earnings per share for the years ended December 31, 2007, 2006 and 2005 was computed by dividing net income by the total weighted average number of common shares outstanding, including only the vested portion of restricted stock and restricted stock unit awards. Diluted earnings per share includes the additional dilutive effect of stock options outstanding and the unvested portions of restricted stock and restricted stock unit awards during the period. The shares held in the Company's Employee Benefit Trust are not included in shares outstanding for purposes of calculating earnings per share.

Earnings per share has been computed based on the following, for the years ended December 31:

	<u>2007</u>	<u>2006</u>	<u>2005</u>
	<i>(In thousands, except per share data)</i>		
Net income, as reported	\$20,185	\$21,639	\$23,542
Divided by:			
Weighted average common shares outstanding	19,625	18,639	17,555
Weighted average common stock equivalents	<u>236</u>	<u>293</u>	<u>446</u>
Total weighted average common shares outstanding and common stock equivalents	<u>19,861</u>	<u>18,932</u>	<u>18,001</u>
Basic earnings per share	\$1.03	\$1.16	\$1.34
Diluted earnings per share	\$1.02	\$1.14	\$1.31

Common stock equivalents that are anti-dilutive are not included in the computation of diluted earnings per share. Options to purchase 483,475 shares, at an average exercise price of \$17.47, 275,750 shares, at an average exercise price of \$18.05 and 291,625 shares, at an average exercise price of \$18.03 were not included in the computation of diluted earnings per share for 2007, 2006 and 2005, respectively. Unvested restricted stock and restricted stock unit awards of 149,272 shares, at an average market price on the date of grant of \$17.11, 73,529 shares, at an average market price on the date of grant of \$18.10 and 92,825 shares, at an average market price on the date of grant of \$18.20 were not included in the computation of diluted earnings per share for 2007, 2006 and 2005, respectively.

3. Loans

The composition of loans is as follows at December 31:

	<u>2007</u>	<u>2006</u>
	<i>(In thousands)</i>	
Multi-family residential	\$ 964,455	\$ 870,912
Commercial real estate	625,843	519,552
One-to-four family — mixed-use property	686,921	588,092
One-to-four family — residential	161,666	161,889
Co-operative apartments	7,070	8,059
Construction	119,745	104,488
Small Business Administration	18,922	17,521
Taxi medallion	68,250	37,450
Commercial business and other	<u>41,796</u>	<u>13,449</u>
Gross loans	2,694,668	2,321,412
Unearned loan fees and deferred costs, net	<u>14,083</u>	<u>10,393</u>
Total loans	<u>\$ 2,708,751</u>	<u>\$ 2,331,805</u>

The total amount of loans on non-accrual status was \$5,140,000, \$3,126,000 and \$1,922,000, at December 31, 2007, 2006 and 2005, respectively. The total amount of loans classified as impaired was \$5,893,000, \$3,126,000 and \$2,452,000 at December 31, 2007, 2006 and 2005, respectively. The portion of the allowance for loan losses allocated to impaired loans was \$605,000 (9.1%), \$316,000 (4.5%) and \$231,000 (3.6%) at December 31, 2007, 2006 and 2005, respectively. The portion of the impaired loan amount above 100% of the loan-to-value ratio is charged off. The average balance of impaired loans was \$5,076,000, \$2,686,000 and \$1,802,000 for 2007, 2006 and 2005, respectively.

The following is a summary of interest foregone on non-accrual loans for the years ended December 31:

	<u>2007</u>	<u>2006</u>	<u>2005</u>
	<i>(In thousands)</i>		
Interest income that would have been recognized had the loans performed in accordance with their original terms	\$ 341	\$ 227	\$ 158
Less: Interest income included in the results of operations	<u>85</u>	<u>83</u>	<u>55</u>
Foregone interest	<u>\$ 256</u>	<u>\$ 144</u>	<u>\$ 103</u>

The following are changes in the allowance for loan losses for the years ended December 31:

	2007	2006	2005
	<i>(In thousands)</i>		
Balance, beginning of year	\$ 7,057	\$ 6,385	\$ 6,533
Provision for loan losses	-	-	-
Allowance from Atlantic Liberty acquisition	-	753	-
Charge-offs	(472)	(93)	(164)
Recoveries	48	12	16
Balance, end of year	<u>\$ 6,633</u>	<u>\$ 7,057</u>	<u>\$ 6,385</u>

4. Debt and Equity Securities

Investments in equity securities that have readily determinable fair values and all investments in debt securities are classified in one of the following three categories and accounted for accordingly: (1) trading securities, (2) securities available for sale and (3) securities held-to-maturity.

The Company did not hold any trading securities or securities held-to-maturity during the years ended December 31, 2007, 2006 and 2005. Securities available for sale are recorded at fair value. Securities classified as held-to-maturity would be stated at cost, adjusted for amortization of premium and accretion of discount using the level-yield method.

The amortized cost and fair value of the Company's securities, classified as available for sale at December 31, 2007 are as follows:

	Amortized Cost	Fair Value	Gross Unrealized Gains	Gross Unrealized Losses
	<i>(In thousands)</i>			
U.S. government agencies	\$ 4,406	\$ 4,406	\$ -	\$ -
Other	51,213	51,213	-	-
Mutual funds	21,752	21,752	-	-
Total other securities	<u>77,371</u>	<u>77,371</u>	<u>-</u>	<u>-</u>
REMIC and CMO	182,609	182,730	761	640
GNMA	11,464	11,663	199	-
FNMA	123,121	122,770	493	844
FHLMC	45,511	45,566	151	96
Total mortgage-backed securities	<u>362,705</u>	<u>362,729</u>	<u>1,604</u>	<u>1,580</u>
Total securities available for sale	<u>\$ 440,076</u>	<u>\$ 440,100</u>	<u>\$ 1,604</u>	<u>\$ 1,580</u>

The following table shows the Company's available for sale securities' gross unrealized losses and fair value, aggregated by category and length of time that individual securities have been in a continuous unrealized loss position, at December 31, 2007.

	Total		Less than 12 months		12 months or more	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	<i>(In thousands)</i>					
FNMA	\$ 43,407	\$ 844	\$ 144	\$ -	\$ 43,263	\$ 844
REMIC and CMO	93,903	640	88,481	603	5,422	37
FHLMC	4,926	96	-	-	4,926	96
Total mortgage-backed securities	<u>\$ 142,236</u>	<u>\$ 1,580</u>	<u>\$ 88,625</u>	<u>\$ 603</u>	<u>\$ 53,611</u>	<u>\$ 977</u>

The unrealized losses on the Company's investment in mortgage-backed securities were caused by interest rate increases. These securities were either issued by a U.S. government agency (GNMA), a government sponsored entity (FNMA or FHLMC) or were privately issued and carry a rating of AAA. It is expected that the securities would not be settled at a price less than the amortized cost of the Company's investment. Because the decline in market value is attributable to changes in interest rates and not credit quality, and because the Company has the ability and intent to hold these investments until a recovery of fair value, which may be maturity, the Company does not consider these investments to be other-than-temporarily impaired at December 31, 2007.

The Company has elected to carry \$164.0 million of its securities at fair value under SFAS No. 159 (See Note 15 of Notes to Consolidated Financial Statements). Since these securities are carried at fair value, they do not have any unrealized gains or losses as of December 31, 2007.

The amortized cost and estimated fair value of the Company's securities, classified as available for sale at December 31, 2007, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	Amortized Cost	Fair Value
	<i>(In thousands)</i>	
Due in one year or less	21,752	21,752
Due after one year through five years	-	-
Due after five years through ten years	11,802	11,802
Due after ten years	43,817	43,817
Total other securities	77,371	77,371
Mortgage-backed securities	362,705	362,729
Total securities available for sale	440,076	440,100

The amortized cost and fair value of the Company's securities classified as available for sale at December 31, 2006 were as follows:

	Amortized Cost	Fair Value	Gross Unrealized Gains	Gross Unrealized Losses
	<i>(In thousands)</i>			
U.S. government agencies	\$ 15,016	\$ 15,004	\$ 3	\$ 15
Mutual funds	21,224	20,645	-	579
Other	6,304	6,087	8	225
Total other securities	42,544	41,736	11	819
FNMA	135,458	131,192	277	4,543
REMIC and CMO	100,165	98,652	246	1,759
FHLMC	53,440	51,733	94	1,801
GNMA	7,199	7,274	79	4
Total mortgage-backed securities	296,262	288,851	696	8,107
Total securities available for sale	\$ 338,806	\$ 330,587	\$ 707	\$ 8,926

The following table shows the Company's available for sale securities gross unrealized losses and fair value, aggregated by category and length of time that individual securities have been in a continuous unrealized loss position, at December 31, 2006.

	Total		Less than 12 months		12 months or more	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
	<i>(In thousands)</i>					
U. S. government agencies	\$ 4,717	\$ 15	\$ 4,717	\$ 15	\$ -	\$ -
Mutual funds	20,645	579	-	-	20,645	579
Other	4,275	225	4,275	225	-	-
Total other securities	<u>29,637</u>	<u>819</u>	<u>8,992</u>	<u>240</u>	<u>20,645</u>	<u>579</u>
FNMA	113,076	4,543	732	-	112,344	4,543
REMIC and CMO	75,497	1,759	14,426	28	61,071	1,731
FHLMC	43,546	1,801	-	-	43,546	1,801
GNMA	4,756	4	4,756	4	-	-
Total mortgage-backed securities	<u>236,875</u>	<u>8,107</u>	<u>19,914</u>	<u>32</u>	<u>216,961</u>	<u>8,075</u>
Total securities available for sale	<u>\$ 266,512</u>	<u>\$ 8,926</u>	<u>\$ 28,906</u>	<u>\$ 272</u>	<u>\$ 237,606</u>	<u>\$ 8,654</u>

For the year ended December 31, 2007, there were no gross gains or losses realized on sales of securities available for sale. Gross gains of \$3,009,000 and gross losses of \$76,000 were recognized as Net Gain From Fair Value Adjustments for the year ended December 31, 2007. In addition, an other-than-temporary impairment write-down of \$4,710,000 was recorded during the year ended December 31, 2007 to reduce the carrying amount of investments in preferred stock issues of Freddie Mac and Fannie Mae, two government sponsored entities, to the securities market value of \$28.2 million at December 31, 2007. For the year ended December 31, 2006, gross gains of \$81,000 were realized on sales of securities available for sale; there were no losses realized on the sales of securities available for sale. For the year ended December 31, 2005, gross gains of \$508,000 and losses of \$1,155,000 were realized on sales of securities available for sale.

5. Bank Premises and Equipment, Net

Bank premises and equipment are as follows at December 31:

	2007	2006
	<i>(In thousands)</i>	
Land	\$ 3,551	\$ 3,551
Building and leasehold improvements	18,807	17,003
Equipment and furniture	15,944	14,451
Total	<u>38,302</u>	<u>35,005</u>
Less: Accumulated depreciation and amortization	<u>14,366</u>	<u>11,963</u>
Bank premises and equipment, net	<u>\$ 23,936</u>	<u>\$ 23,042</u>

6. Deposits

Total deposits at December 31, 2007 and 2006, and the weighted average rate on deposits at December 31, 2007, are as follows:

	2007	2006	Weighted Average Rate 2007
	<i>(Dollars in thousands)</i>		
Interest-bearing deposits:			
Certificate of deposit accounts	\$ 1,167,399	\$ 1,102,976	4.81 %
Savings accounts	354,746	262,980	2.82
Money market accounts	340,694	251,197	3.18
NOW accounts	70,817	47,181	2.16
Total interest-bearing deposits	1,933,656	1,664,334	
Non-interest bearing demand deposits	69,299	80,061	
Total due to depositors	2,002,955	1,744,395	
Mortgagors' escrow deposits	22,492	19,755	0.23
Total deposits	<u>\$ 2,025,447</u>	<u>\$ 1,764,150</u>	

The aggregate amount of time deposits with denominations of \$100,000 or more was \$318.5 million and \$298.9 million at December 31, 2007 and 2006, respectively. The Bank utilizes brokered deposits as an additional funding source. The aggregate amount of brokered deposits was \$201.7 million and \$144.9 million at December 31, 2007 and 2006, respectively.

Interest expense on deposits is summarized as follows for the years ended December 31:

	2007	2006	2005
	<i>(In thousands)</i>		
Certificate of deposit accounts	\$ 57,029	\$ 43,757	\$ 26,960
Savings accounts	7,574	4,031	2,225
Money market accounts	12,425	8,804	5,199
NOW accounts	913	202	216
Total due to depositors	77,941	56,794	34,600
Mortgagors' escrow deposits	76	63	57
Total interest expense on deposits	<u>\$ 78,017</u>	<u>\$ 56,857</u>	<u>\$ 34,657</u>

Scheduled remaining maturities of certificate of deposit accounts are summarized as follows for the years ended December 31:

	2007	2006
	<i>(In thousands)</i>	
Within 12 months	\$ 715,966	\$ 625,756
More than 12 months to 24 months	173,125	132,111
More than 24 months to 36 months	158,115	84,466
More than 36 months to 48 months	83,210	160,711
More than 48 months to 60 months	13,832	75,599
More than 60 months	23,151	24,333
Total certificate of deposit accounts	<u>\$ 1,167,399</u>	<u>\$ 1,102,976</u>

As of December 31, 2006, \$5.3 million of U. S. Treasury Bills were pledged as collateral for a deposit account.

7. Borrowed Funds and Securities Sold Under Agreements to Repurchase

Borrowed funds and securities sold under agreements to repurchase are summarized as follows at December 31:

	2007		2006	
	Amount	Weighted Average Rate	Amount	Weighted Average Rate
<i>(Dollars in thousands)</i>				
Repurchase agreements - adjustable rate:				
Due in 2009	\$ 10,000	5.46 %	\$ 10,000	5.77 %
Due in 2010	10,000	5.54	10,000	5.85
Due in 2013	20,000	4.69	20,000	4.87
Total repurchase agreements - adjustable rate	<u>40,000</u>	<u>5.09</u>	<u>40,000</u>	<u>5.34</u>
Repurchase agreements - fixed rate:

Junior subordinated debentures - adjustable rate				
Due in 2037	<u>61,228</u>	<u>7.03</u>	<u>20,619</u>	<u>9.02</u>
Total borrowings	<u>\$ 1,072,551</u>	<u>4.83 %</u>	<u>\$ 832,413</u>	<u>4.81 %</u>

Borrowed funds which have call provisions are summarized as follows at December 31, 2007:

	<u>Amount</u>	<u>Rate</u>	<u>Maturity Date</u>	<u>Call Date</u>
			<i>(Dollars in thousands)</i>	
Repurchase agreements - fixed rate	\$ 25,000	5.52 %	7/22/2009	On Demand
Repurchase agreements - fixed rate	18,000	4.71	4/19/2012	4/19/2010
Repurchase agreements - fixed rate	10,000	4.89	7/28/2016	7/28/2010
Repurchase agreements - fixed rate	20,000	4.25	9/19/2017	9/19/2010
Repurchase agreements - fixed rate	20,000	4.41	9/21/2017	9/21/2010
Repurchase agreements - fixed rate	18,000	4.48	10/10/2017	10/10/2010
Repurchase agreements - fixed rate	20,000	5.02	7/28/2016	7/28/2011
Repurchase agreements - Adjustable rate	10,000	4.86	6/27/2013	6/27/2008
Repurchase agreements - Adjustable rate	10,000	4.51	7/27/2013	7/27/2008
FHLB-NY advances - fixed rate	10,000	4.32	9/17/2017	9/17/2010
FHLB-NY advances - fixed rate	10,000	4.15	9/18/2017	9/18/2010
FHLB-NY advances - fixed rate	10,000	4.13	9/17/2017	9/17/2011
FHLB-NY advances - fixed rate	20,000	4.43	10/10/2017	10/10/2011
FHLB-NY advances - fixed rate	30,000	4.60	10/10/2017	10/10/2012

As part of the Company's strategy to finance investment opportunities and manage its cost of funds, the Company enters into repurchase agreements with broker-dealers and the FHLB-NY. These agreements are recorded as financing transactions and the obligations to repurchase are reflected as a liability in the consolidated financial statements. The securities underlying the agreements were delivered to the broker-dealers or the FHLB-NY who arranged the transaction. The securities remain registered in the name of the Company and are returned upon the maturity of the agreement. The Company retains the right of substitution of collateral throughout the terms of the agreements. All the repurchase agreements are collateralized by mortgage-backed securities. Information relating to these agreements at or for the years ended December 31 is as follows:

	<u>2007</u>	<u>2006</u>
	<i>(Dollars in thousands)</i>	
Book value of collateral	\$ 302,446	\$ 243,873
Estimated fair value of collateral	302,446	243,873
Average balance of outstanding agreements during the year	229,544	207,955
Maximum balance of outstanding agreements at a month end during the year	272,693	238,900
Average interest rate of outstanding agreements during the year	5.04%	4.70%

Pursuant to a blanket collateral agreement with the FHLB-NY, advances are secured by all of the Bank's stock in the FHLB-NY, certain qualifying mortgage loans, mortgage-backed and mortgage-related securities, and other securities not otherwise pledged in an amount at least equal to 110% of the advances outstanding.

The Holding Company has three trusts formed under the laws of the State of Delaware for the purpose of issuing capital and common securities, and investing the proceeds thereof in junior subordinated debentures of the Holding Company. Each of these trusts issued \$20.6 million of securities with a fixed-rate for the first five years, after which they will reset quarterly based on a spread over 3-month LIBOR. The securities are first callable at par after five years, and pay cumulative dividends. The Holding Company has guaranteed the payment of these trusts' obligations under their capital securities. The terms of the junior subordinated debentures are the same as those of the capital securities issued by the trusts. The junior subordinated debentures issued by the Holding Company are carried at fair value in the consolidated financial statements. The table below shows the terms of the securities issued by the trusts.

	<u>Flushing Financial Capital Trust II</u>	<u>Flushing Financial Capital Trust III</u>	<u>Flushing Financial Capital Trust IV</u>
Issue Date	June 20, 2007	June 21, 2007	July 3, 2007
Initial Rate	7.14%	6.89%	6.85%
First Reset Date	September 1, 2012	June 15, 2012	July 30, 2012
Spread over 3-month LIBOR	1.41%	1.44%	1.42%
Maturity Date	September 1, 2037	September 15, 2037	July 30, 2037

The Holding Company also had a trust formed under the laws of the State of Delaware for the purpose of issuing capital and common securities and investing the proceeds thereof in \$20.6 million of junior subordinated debentures of the Holding Company. On July 11, 2002, the Trust issued \$20.0 million of floating rate capital securities, which had a floating per annum rate of interest, reset quarterly, equal to 3.65% over 3-month LIBOR. The capital securities had a maturity date of October 7, 2032, and were first callable at par on July 7, 2007, at which time they were redeemed. The Holding Company had guaranteed the payment of the trust's obligations under its capital securities. The terms of the junior subordinated debentures were the same as those of the capital securities issued by the trust.

The consolidated financial statements do not include the securities issued by the trusts, but rather include the junior subordinated debentures of the Holding Company.

8. Income Taxes

Flushing Financial Corporation files consolidated Federal and combined New York State and New York City income tax returns with its subsidiaries, with the exception of the Trust and FPFC, which file separate Federal, New York State and New York City income tax returns as a trust and real estate investment trust, respectively. The Company remains subject to examination for its Federal and New York City income tax returns for the years ending on or after December 31, 2004, and for its New York State income tax returns for years ending on or after December 31, 2005. A deferred tax liability is recognized on all taxable temporary differences and a deferred tax asset is recognized on all deductible temporary differences and operating losses and tax credit carry-forwards. A valuation allowance is recognized to reduce the potential deferred tax asset if it is "more likely than not" that all or some portion of that potential deferred tax asset will not be realized. The Company must also take into account changes in tax laws or rates when valuing the deferred income tax amounts it carries on its Consolidated Statements of Financial Condition.

The Company's annual tax liability for New York State and New York City was the greater of a tax based on "entire net income", "alternative entire net income", "taxable assets" or a minimum tax. For the years ended December 31, 2007 and 2005, the Company's state tax was based on "alternative entire net income", with the city tax based on "entire net income." For the year ended December 31, 2006, the Company's state and city tax were based on "alternative entire net income."

Income tax provisions (benefits) are summarized as follows for the years ended December 31:

	2007	2006	2005
	<i>(In thousands)</i>		
Federal:			
Current	\$ 10,151	\$ 10,826	\$ 10,989
Deferred	(879)	(97)	907
Total federal tax provision	<u>9,272</u>	<u>10,729</u>	<u>11,896</u>
State and Local:			
Current	1,627	1,808	2,041
Deferred	31	581	1,114
Total state and local tax provision	<u>1,658</u>	<u>2,389</u>	<u>3,155</u>
Total income tax provision	<u>\$ 10,930</u>	<u>\$ 13,118</u>	<u>\$ 15,051</u>

The income tax provision in the Consolidated Statements of Income has been provided at effective rates of 35.1%, 37.7% and 39.0% for the years ended December 31, 2007, 2006 and 2005, respectively. The effective rates differ from the statutory federal income tax rate as follows for the years ended December 31:

	2007		2006		2005	
	<i>(Dollars in thousands)</i>					
Taxes at federal statutory rate	\$ 10,890	35.0 %	\$ 12,165	35.0 %	\$ 13,508	35.0 %
Increase (reduction) in taxes resulting from:						
State and local income tax, net of Federal income tax benefit	1,078	3.4	1,553	4.5	2,051	5.3
Other	(1,038)	(3.3)	(600)	(1.8)	(508)	(1.3)
Taxes at effective rate	<u>\$ 10,930</u>	<u>35.1 %</u>	<u>\$ 13,118</u>	<u>37.7 %</u>	<u>\$ 15,051</u>	<u>39.0 %</u>

The components of the income taxes attributable to income from operations and changes in equity are as follows for the years ended December 31:

	<u>2007</u>	<u>2006</u>	<u>2005</u>
		<i>(In thousands)</i>	
Income from operations	\$ 10,930	\$ 13,118	\$ 15,051
Equity:			
Change in fair value of securities available for sale	634	175	(3,127)
Adjustment required to recognize minimum pension liability prior to the adoption of SFAS No. 158	-	-	(28)
Adjustment required to recognize funded status of postretirement pension plans	-	(975)	-
Current year actuarial gains of postretirement plans	386	-	-
Amortization of actuarial gains and losses	121	-	-
Cumulative adjustment related to the adoption of SFAS No. 159	(1,721)	-	-
Compensation expense for tax purposes in excess of that recognized for financial reporting purposes	(439)	(1,479)	(1,752)
Total income taxes	<u>\$ 9,911</u>	<u>\$ 10,839</u>	<u>\$ 10,144</u>

The components of the net deferred tax asset are as follows at December 31:

	<u>2007</u>	<u>2006</u>
		<i>(In thousands)</i>
Deferred tax asset:		
Postretirement benefits	\$ 2,388	\$ 2,341
Stock based compensation	1,686	1,628
Unrealized losses on securities available for sale	-	3,501
Fair value adjustment on financial assets and financial liabilities carried at fair value	3,058	-
Other-than-temporary impairment charge	2,078	-
Adjustment required to recognize funded status of postretirement pension plans	730	1,237
Other	462	103
Deferred tax asset	<u>10,402</u>	<u>8,810</u>
Deferred tax liability:		
Allowance for loan losses	1,704	1,265
Depreciation	39	135
Core deposit intangibles	1,240	1,455
Valuation differences resulting from acquired assets and liabilities	3,236	3,554
Unrealized gains on securities available for sale	8	-
Other	1,526	1,180
Deferred tax liability	<u>7,753</u>	<u>7,589</u>
Net deferred tax asset included in other assets	<u>\$ 2,649</u>	<u>\$ 1,221</u>

The Company has recorded a net deferred tax asset of \$2,649,000. This represents the anticipated net federal, state and local tax benefits expected to be realized in future years upon the utilization of the underlying tax attributes comprising this balance. The Company has reported taxable income for federal, state, and local tax purposes in each of the past three years. In management's opinion, in view of the Company's previous, current and projected future earnings trend, it is more likely than not that the net deferred tax asset will be fully realized. Accordingly, no valuation allowance was deemed necessary for the net deferred tax asset at December 31, 2007 and 2006.

The Company adopted the provisions of FASB Interpretation No.48 (FIN 48), "Accounting for Uncertainty in Income Taxes", on January 1, 2007. The Company does not have uncertain tax positions that are deemed material, and did not recognize any adjustments for unrecognized tax benefits upon adoption of FIN 48. The Company's policy is to recognize interest and penalties on income taxes in operating expenses. During the three years ended December 31, 2007, the Company did not recognize any material amounts of interest or penalties on income taxes.

9. Stock Based Compensation

Effective January 1, 2006, the Company adopted Statement of Financial Accounting Standards (“SFAS”) No. 123R, “Share-Based Payment.” Prior to January 1, 2006, the Company accounted for stock-based compensation in accordance with APB Opinion No. 25, “Accounting for Stock Issued to Employees”, which did not require compensation cost to be recognized for stock option grants, with the exception of certain circumstances.

Assuming the Company had recognized compensation cost for stock-based compensation in accordance with SFAS No. 123R prior to January 1, 2006, net income and earnings per share would have been as indicated in the table below:

	2007	2006	2005
	<i>(Dollars in thousands, except per share data)</i>		
Net income, as reported	\$20,185	\$21,639	\$23,542
Add: Stock-based compensation expense included in reported net income, net of related tax effects	1,376	1,503	908
Deduct: Total stock-based compensation expense determined under fair value based method for all awards, net of related tax effects	<u>(1,376)</u>	<u>(1,503)</u>	<u>(1,559)</u>
Pro forma net income	<u>\$20,185</u>	<u>\$21,639</u>	<u>\$22,891</u>
Basic earnings per share:			
As reported	\$1.03	\$1.16	\$1.34
Pro forma	\$1.03	\$1.16	\$1.30
Diluted earnings per share:			
As reported	\$1.02	\$1.14	\$1.31
Pro forma	\$1.02	\$1.14	\$1.27

For the years ended December 31, 2007, 2006 and 2005, the Company’s net income, as reported, includes \$2.1 million, \$2.4 million and \$1.5 million, respectively, of stock-based compensation costs and \$0.7 million, \$0.9 million and \$0.6 million of income tax benefits related to the stock-based compensations plans.

The Company estimates the fair value of stock options using the Black-Scholes valuation model that uses the assumptions noted in the table below. Key assumptions used to estimate the fair value of stock options include the exercise price of the award, the expected option term, the expected volatility of the Company’s stock price, the risk-free interest rate over the options’ expected term and the annual dividend yield. The Company uses the fair value of the common stock on the date of award to measure compensation cost for restricted stock and restricted stock unit awards. Compensation cost is recognized over the vesting period of the award, using the straight line method. There were 95,200, 133,475 and 123,725 stock options granted for the years ended December 31, 2007, 2006 and 2005, respectively. There were 110,950, 121,425 and 125,200 restricted stock units granted for the years ended December 31, 2007, 2006 and 2005, respectively.

The following are the significant weighted assumptions relating to the valuation of the Company’s stock options granted for the periods indicated and exclude the Atlantic Liberty stock options, for the years ended December 31:

	2007 Grants	2006 Grants	2005 Grants
Dividend yield	3.60%	3.38%	2.24%
Expected volatility	28.75%	29.31%	21.48%
Risk-free interest rate	5.03%	5.10%	3.87%
Expected option life (years)	7 years	7 years	7 years

Holder of Atlantic Liberty stock options had the election to convert their options to Holding Company options or receive cash for the difference between their option price and \$24.00. Holders of 148,734 Atlantic Liberty options, with an exercise price of \$18.50, elected to receive 212,687 Holding Company options with an exercise price of \$12.94. This is considered a modification under SFAS 123R. No additional expense was recognized as the fair value of these options after this modification is less than the fair value before the modification, as the time period in which they can be exercised, and therefore their expected life, was reduced. The following are the significant assumptions relating to the valuation of the Atlantic Liberty stock options upon modification. As the merger occurred in 2006, 2007 and 2005 grants are not applicable.

	2006 Grants
Dividend yield	3.71%
Expected volatility	29.31%
Risk-free interest rate	5.13%
Expected option life (years)	3 years

The 2005 Omnibus Incentive Plan (“Omnibus Plan”) became effective on May 17, 2005 after adoption by the Board of Directors and approval by the stockholders. The Omnibus Plan authorizes the Compensation Committee to grant a variety of equity compensation awards as well as long-term and annual cash incentive awards, all of which can be structured so as to comply with Section 162(m) of the Internal Revenue Code. The Company has applied the shares previously authorized by stockholders under the 1996 Restricted Stock Incentive Plan and the 1996 Stock Option Incentive Plan for use as full value awards and non-full value awards, respectively, for future awards under the Omnibus Plan. As of December 31, 2007, there are 189,774 shares available for full value awards and 153,188 shares available for non-full value awards. To satisfy stock option exercises or fund restricted stock and restricted stock unit awards, shares are issued from treasury stock, if available, otherwise new shares are issued. All grants and awards under the 1996 Restricted Stock Incentive Plan and the 1996 Stock Option Incentive Plan prior to the effective date of the Omnibus Plan are still outstanding as issued. The Company will maintain separate pools of available shares for full value as opposed to non-full value awards, except that shares can be moved from the non-full value pool to the full value pool on a 3-for-1 basis. During the year ended December 31, 2007, 399,999 shares were transferred from the non-full value pool to the full value pool, which increased the full value pool by 133,333. The exercise price per share of a stock option grant may not be less than the fair market value of the common stock of the Company on the date of grant, and may not be repriced without the approval of the Company’s stockholders. Options, stock appreciation rights, restricted stock, restricted stock units and other stock based awards granted under the Omnibus Plan are generally subject to a minimum vesting period of three years with stock options having a 10-year contractual term. Other awards do not have a contractual term of expiration. Restricted stock unit awards include participants who have reached or are close to reaching retirement eligibility, at which time such awards fully vest. These amounts are included in stock-based compensation expense. The Omnibus Plan increased the annual grants to each outside director to 3,600 restricted stock units, while eliminating grants of stock options for outside directors. Prior to the approval of the Omnibus Plan, outside directors were annually granted 1,687 restricted stock unit awards and 14,850 stock options

Full Value Awards: The first pool is available for full value awards, such as restricted stock unit awards. The pool will be decreased by the number of shares granted as full value awards. The pool will be increased from time to time by the number of shares that are returned to or retained by the Company as a result of the cancellation, expiration, forfeiture or other termination of a full value award (under the Omnibus Plan or the 1996 Restricted Stock Incentive Plan); the settlement of such an award in cash; the delivery to the award holder of fewer shares than the number underlying the award, including shares which are withheld from full value awards; or the surrender of shares by an award holder in payment of the exercise price or taxes with respect to a full value award. The Omnibus Plan will allow the Company to transfer shares from the non-full value pool to the full value pool on a 3-for-1 basis, but does not allow the transfer of shares from the full value pool to the non-full value pool.

The following table summarizes the Company’s full value awards at or for the year ended December 31, 2007:

Full Value Awards	Shares	Weighted-Average Grant-Date Fair Value
Non-vested at December 31, 2006	194,295	\$ 16.77
Granted	110,950	16.62
Vested	(106,639)	16.42
Forfeited	(12,040)	16.71
Non-vested at December 31, 2007	<u>186,566</u>	<u>\$ 16.88</u>
Vested but unissued at December 31, 2007	<u>78,815</u>	<u>\$ 16.70</u>

As of December 31, 2007, there was \$2.6 million of total unrecognized compensation cost related to non-vested full value awards granted under the Omnibus Plan. That cost is expected to be recognized over a weighed-average period of 3.1 years. The total fair value of awards vested for the year ended December 31, 2007, 2006 and 2005 were \$1.8 million, \$1.9 million and \$1.5 million, respectively. The vested but unissued full value awards were made to employees and directors who are eligible for retirement. According to the terms of the Omnibus Plan, these employees and directors have no risk of forfeiture. These shares will be issued at the original contractual vesting dates.

Non-Full Value Awards: The second pool is available for non-full value awards, such as stock options. The pool will be increased from time to time by the number of shares that are returned to or retained by the Company as a result of the cancellation, expiration, forfeiture or other termination of a non-full value award (under the Omnibus Plan or the 1996 Stock Option Incentive Plan). The second pool will not be replenished by shares withheld or surrendered in payment of the exercise price or taxes, retained by the Company as a result of the delivery to the award hold of fewer shares than the number underlying the award, or the settlement of the award in cash.

The following table summarizes certain information regarding the non-full value awards, all of which have been granted as stock options, at or for the year ended December 31, 2007:

Non-Full Value Awards	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term	Aggregate Intrinsic Value (\$000) *
Outstanding at December 31, 2006	1,651,576	\$ 12.86		
Granted	95,200	16.65		
Exercised	(167,485)	9.20		
Forfeited	(16,235)	16.40		
Outstanding at December 31, 2007	<u>1,563,056</u>	<u>\$ 13.45</u>	<u>5.8 years</u>	<u>\$ 4,782</u>
Exercisable shares at December 31, 2007	<u>1,348,046</u>	<u>\$ 12.92</u>	<u>5.3 years</u>	<u>\$ 4,740</u>
Vested but unexercisable shares at December 31, 2007	<u>17,635</u>	<u>\$ 16.05</u>	<u>8.4 years</u>	<u>\$ 7</u>

* The intrinsic value of a stock option is the difference between the market value of the underlying stock and the exercise price of the option.

As of December 31, 2007, there was \$0.7 million of total unrecognized compensation cost related to unvested non-full value awards granted under the Omnibus Plan. That cost is expected to be recognized over a weighed-average period of 3.6 years. The vested but unexercisable non-full value awards were made to employees and directors who are eligible for retirement. According to the terms of the Omnibus Plan, these employees and directors have no risk of forfeiture. These shares will be exercisable at the original contractual vesting dates.

Cash proceeds, fair value received, tax benefits, and intrinsic value related to stock options exercised, and the weighted average grant date fair value for options granted, during the years ended December 31, 2007, 2006 and 2005 are provided in the following table:

(In thousands, except grant date fair value)	2007	2006	2005
Proceeds from stock options exercised	\$ 1,385	\$ 2,931	\$ 2,422
Fair value of shares received upon exercise of stock options	155	619	-
Tax benefit related to stock options exercised	435	1,428	1,751
Intrinsic value of stock options exercised	1,243	3,434	3,552
Grant date fair value at weighted average	4.30	5.52	4.47

Phantom Stock Plan: The Company maintains a non-qualified phantom stock plan as a supplement to its profit sharing plan for officers who have achieved the level of Vice President and above and completed one year of service. Awards are made under this plan on certain compensation not eligible for awards made under the profit sharing plan, due to the terms of the profit sharing plan and the Internal Revenue Code. Employees receive awards under this plan proportionate to the amount they would have received under the profit sharing plan, but for limits imposed by the profit sharing plan and the Internal Revenue Code. The awards are made as cash awards, and then converted to common stock equivalents (phantom shares) at the then current market value of the Company's common stock. Dividends are credited to each employee's account in the form of additional phantom shares each time the Company pays a dividend on its common stock. In the event of a change of control (as defined in this plan), an employee's interest is converted to a fixed dollar amount and deemed to be invested in the same manner as his interest in the Bank's non-qualified deferred compensation plan. Employees vest under this plan 20% per year for 5 years. Employees also become 100% vested upon a change of control. Employees receive their vested interest in this plan in the form of a cash lump sum payment or installments, as elected by the employee, after termination of employment. The Company adjusts its liability under this plan to the fair value of the shares at the end of each period.

Phantom Stock Plan	Shares	Fair Value
Outstanding at December 31, 2006	15,920	\$ 17.07
Granted	481	16.37
Forfeited	(9)	15.75
Distributions	(2,346)	16.73
Outstanding at December 31, 2007	<u>14,046</u>	<u>\$ 16.05</u>
Vested at December 31, 2007	<u>13,994</u>	<u>\$ 16.05</u>

The Company recorded stock-based compensation expense for the phantom stock plan of a credit of \$7,900 and \$86,000 for the years ended December 31, 2007 and 2005, respectively, and an expense of \$28,900 for the year ended December 31, 2006. The total fair value of the distributions from the phantom stock plan during the year ended December 31, 2007, 2006 and 2005 was \$39,300, \$84,100 and \$466,400, respectively.

10. Pension and Other Postretirement Benefit Plans

The Company sponsors qualified pension, 401(k), and profit sharing plans for its employees. The Company also sponsors postretirement health care and life insurance benefits plans for its employees, a non-qualified deferred compensation plan for officers who have achieved the level of at least vice president, and a non-qualified pension plan for its outside directors.

Effective December 31, 2006, the Company adopted SFAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans." The Statement requires recognition of the funded status of a benefit plan – measured as the difference between plan assets at fair value and the benefit obligation – in the statement of financial position, with the unrecognized credits and charges recognized, net of taxes, as a component of accumulated other comprehensive income. These credits or charges arose as a result of gains or losses and prior service costs or credits that arose during prior periods but were not recognized as components of net periodic benefit cost pursuant to SFAS No. 87, "Employers' Accounting for Pensions", or SFAS No. 106, "Employers' Accounting for Postretirement Benefits Other Than Pensions". The amounts recognized in accumulated other comprehensive income, on a pre-tax basis, consist of the following, as of December 31:

	Net Actuarial loss (gain)		Prior Service Cost		Total	
	2007	2006	2007	2006	2007	2006
	<i>(In thousands)</i>					
Employee Retirement Plan	\$ 1,872	\$ 2,789	\$ -	\$ -	\$ 1,872	\$ 2,789
Other Postretirement Benefit Plans	(251)	(614)	95	81	(156)	(533)
Atlantic Liberty Retirement Plan	(52)	10	-	-	(52)	10
Outside Directors Plan	(429)	(41)	419	560	(10)	519
Total	<u>\$ 1,140</u>	<u>\$ 2,144</u>	<u>\$ 514</u>	<u>\$ 641</u>	<u>\$ 1,654</u>	<u>\$ 2,785</u>

Amounts in accumulated other comprehensive income to be recognized as components of net periodic expense for these plans in 2008 are as follows:

	Net Actuarial loss (gain)	Prior Service Cost	Total
	<i>(In thousands)</i>		
Employee Retirement Plan	\$ 97	\$ -	\$ 97
Other Postretirement Benefit Plans	-	(14)	(14)
Atlantic Liberty Retirement Plan	-	-	-
Outside Directors Plan	(31)	40	9
	<u>\$ 66</u>	<u>\$ 26</u>	<u>\$ 92</u>

Employee Retirement Plan:

The Bank has a funded noncontributory defined benefit retirement plan covering substantially all of its salaried employees who were hired before September 1, 2005 (the "Retirement Plan"). The benefits are based on years of service and the employee's compensation during the three consecutive years out of the final ten years of service that produces the highest average. The Bank's funding policy is to contribute annually the amount recommended by the Retirement

Plan's actuary. The Bank's Retirement Plan invests in diversified equity and fixed-income funds, which are independently managed by a third party. Effective September 30, 2006, the Bank's Retirement Plan was frozen so that no employee may become a participant in the Retirement Plan on or after that date and no further benefits will accrue to any participants under the Retirement Plan after that date. As a result, the Company did not make a contribution to the Retirement Plan during the year ended December 31, 2007. Freezing the Retirement Plan resulted in a curtailment gain of \$1.7 million. This curtailment gain was not recognized in the Consolidated Statements of Income, but was instead used to reduce the unrecognized net loss from past experience different from that assumed and effects of changes in assumptions for the Retirement Plan. Effective October 1, 2006, the Bank added a new program to its 401(k) Plan to replace the Retirement Plan. The Retirement Plan was frozen to reduce annual operating expense. The Company uses a September 30 measurement date for the Retirement Plan.

The following table sets forth, for the Retirement Plan, the change in benefit obligation and assets, and for the Company, the amounts recognized in the Consolidated Statements of Financial Position at December 31:

	2007	2006
	<i>(In thousands)</i>	
Change in benefit obligation:		
Projected benefit obligation at beginning of year	\$ 14,817	\$ 16,009
Service cost	-	646
Interest cost	868	884
Actuarial (gain) loss	33	(397)
Curtailment gain	-	(1,695)
Benefits paid	(716)	(630)
Projected benefit obligation at end of year	<u>15,002</u>	<u>14,817</u>
Change in plan assets:		
Market value of assets at beginning of year	15,595	14,990
Actual return on plan assets	2,098	1,235
Employer contributions	-	-
Benefits paid	(716)	(630)
Market value of plan assets at end of year	<u>16,977</u>	<u>15,595</u>
Prepaid pension cost included in other assets	<u>\$ 1,975</u>	<u>\$ 778</u>

Assumptions used to determine the Retirement Plan's benefit obligations were:

	2007	2006
Weighted average discount rate	6.25%	6.00%
Rate of increase in future compensation levels	NA	NA
Expected long-term rate of return on assets	8.50%	8.50%

The accumulated benefit obligation for the Retirement Plan was \$15.0 million and \$14.8 million at December 31, 2007 and 2006, respectively.

The components of the net pension expense for the Retirement Plan are as follows for the years ended December 31:

	2007	2006	2005
		<i>(In thousands)</i>	
Service cost	\$ -	\$ 646	\$ 587
Interest cost	868	884	843
Amortization of unrecognized loss	135	325	161
Expected return on plan assets	(1,284)	(1,302)	(1,238)
Net pension expense	<u>(281)</u>	<u>553</u>	<u>353</u>
SFAS No. 158 recognition of deferred costs	-	2,789	-
Current year actuarial gain	(782)	-	-
Amortization of loss	(135)	-	-
Total recognized in other comprehensive income	<u>(917)</u>	<u>2,789</u>	<u>-</u>
Total recognized in net pension expense and other comprehensive income	<u>\$ (1,198)</u>	<u>\$ 3,342</u>	<u>\$ 353</u>

Assumptions used to develop periodic pension benefit expense for the Retirement Plan for the years ended December 31 were:

	2007	2006	2005
Weighted average discount rate	6.00%	5.63%	6.13%
Rate of increase in future compensation levels	NA	3.00%	3.25%
Expected long-term rate of return on assets	8.50%	8.50%	8.50%

The long-term rate-of-return on assets assumption was set based on historical returns earned by equities and fixed income securities, adjusted to reflect expectations of future returns as applied to the Retirement Plan's target allocation of asset classes. Equities and fixed income securities were assumed to earn real rates of return in the ranges of 5-9% and 2-6%, respectively. The long-term inflation rate was estimated to be 3%. When these overall return expectations are applied to the Retirement Plan's target allocation, the expected rate of return is determined to be 8.50%, which is roughly the midpoint of the range of expected return.

The Retirement Plan's weighted average asset allocations at December 31, by asset category, were:

	2007	2006
Equity securities	70%	73%
Debt securities	30%	27%

Retirement Plan assets are invested in six diversified investment funds of the RSI Retirement Trust (the "RSI Trust"), a no load series open-end mutual fund. The investment funds include four equity mutual funds and two bond mutual funds, each with its own investment objectives, investment strategies and risks, as detailed in the RSI Trust's prospectus. The RSI Trust has been given discretion by the Plan Sponsor to determine the appropriate strategic asset allocation versus plan liabilities, as governed by the RSI Trust's Statement of Investment Objectives and Guidelines (the "Guidelines").

The long-term investment objective is to be invested 65% in equity securities (equity mutual funds) and 35% in debt securities (bond mutual funds). If the plan's current liability is underfunded under the Guidelines, the bond fund portion may be temporarily increased up to 50% in order to lessen asset value volatility. When the plan's current liability is no longer underfunded, the bond fund portion will be decreased back to 35%. Asset rebalancing is performed at least annually, with interim adjustments made when the investment mix varies more than 10% from the target (i.e., a 20% target range).

The investment goal is to achieve investment results that will contribute to the proper funding of the Retirement Plan by exceeding the rate of inflation over the long-term. In addition, investment managers for the RSI Trust are expected to provide above average performance when compared to their peers. Performance volatility is also monitored. Risk/volatility is further managed by the distinct investment objectives of each of the RSI Trust's funds and the diversification within each fund.

The Bank does not expect to make a contribution to the Retirement Plan in 2008.

The following benefit payments, which reflect expected future service, are expected to be paid by the Retirement Plan:

For the year ending December 31:	Future Benefit Payments
	<i>(In thousands)</i>
2008	\$ 768
2009	818
2010	853
2011	902
2012	915
2013 – 2017	5,176

In connection with the Company's acquisition of Atlantic Liberty Savings on June 30, 2006, the Company acquired The Retirement Plan of Atlantic Liberty Savings, F.A. ("Atlantic Liberty Plan"), a non-contributory defined benefit pension plan, which was frozen effective as of June 30, 2006. As of that date, no employee will be permitted to commence participation and no further benefits will accrue to participants. No contributions were made to the Atlantic Liberty Plan during 2007 and 2006. The Atlantic Liberty Plan has not been merged with the Retirement Plan and is not material in amount.

Other Postretirement Benefit Plans:

The Company sponsors two unfunded postretirement benefit plans (the "Postretirement Plans") that cover all retirees who were full-time permanent employees with at least five years of service, and their spouses. One plan provides medical benefits through a 50% cost sharing arrangement. Effective January 1, 2000, the spouses of future retirees will be required to pay 100% of the premiums for their coverage. The other plan provides life insurance benefits and is noncontributory. Under these programs, eligible retirees receive lifetime medical and life insurance coverage for themselves and lifetime medical coverage for their spouses. The Company reserves the right to amend or terminate these plans at its discretion.

Comprehensive medical plan benefits equal the lesser of the normal plan benefit or the total amount not paid by Medicare. Life insurance benefits for retirees are based on annual compensation and age at retirement. As of December 31, 2007, the Company has not funded these plans. The Company uses a September 30 measurement date for these plans.

The following table sets forth, for the Postretirement Plans, the change in benefit obligation and assets, and for the Company, the amounts recognized in the Consolidated Statements of Financial Condition at December 31:

	2007	2006
	<i>(In thousands)</i>	
Change in benefit obligation:		
Projected benefit obligation at beginning of year	\$ 2,895	\$ 2,626
Service cost	123	113
Interest cost	170	145
Actuarial loss (gain)	338	(58)
Benefits paid	(101)	(83)
Plan Amendment	-	152
Projected benefit obligation at end of year	<u>3,425</u>	<u>2,895</u>
Change in plan assets:		
Market value of assets at beginning of year	-	-
Employer contributions	101	83
Benefits paid	(101)	(83)
Market value of plan assets at end of year	<u>-</u>	<u>-</u>
Accrued pension cost included in other liabilities	<u>\$ (3,425)</u>	<u>\$ (2,895)</u>

The accumulated benefit obligation for the Postretirement Plans was \$3.4 million and \$2.9 million at December 31, 2007 and 2006, respectively.

Assumptions used in determining the actuarial present value of the accumulated postretirement benefit obligations at December 31 are as follows:

	<u>2007</u>	<u>2006</u>
Rate of return on plan assets	N/A	N/A
Discount rate	6.25%	6.00%
Rate of increase in health care costs		
Initial	7.75%	9.00%
Ultimate (year 2011)	4.50%	4.50%
Annual rate of salary increase for life insurance	4.00%	3.50%

The resulting net periodic postretirement benefit expense consisted of the following components for the years ended December 31:

	<u>2007</u>	<u>2006</u>	<u>2005</u>
		<i>(In thousands)</i>	
Service cost	\$ 123	\$ 113	\$ 156
Interest cost	170	145	249
Amortization of unrecognized (gain) loss	(26)	(25)	64
Amortization of past service liability	(14)	(29)	(35)
Net postretirement benefit expense	<u>253</u>	<u>204</u>	<u>434</u>
SFAS No. 158 recognition of deferred credits	-	(533)	-
Current year actuarial gain	337	-	-
Amortization of actuarial gain	26	-	-
Amortization of prior service liability	14	-	-
Total recognized in other comprehensive income	<u>377</u>	<u>(533)</u>	<u>-</u>
Total recognized in net postretirement (benefit) expense and other comprehensive income	<u>\$ 630</u>	<u>\$ (329)</u>	<u>\$ 434</u>

Assumptions used to develop periodic postretirement benefit expense for the Postretirement Plans for the years ended December 31 were:

	<u>2007</u>	<u>2006</u>	<u>2005</u>
Rate of return on plans assets	NA	NA	NA
Discount rate	6.00%	5.63%	6.13%
Rate of increase in health care costs			
Initial	9.00%	9.50%	10.00%
Ultimate (year 2011)	4.50%	4.50%	4.25%
Annual rate of salary increases for life insurance	3.50%	3.00%	3.25%

The health care cost trend rate assumptions have a significant effect on the amounts reported. A one percentage point change in assumed health care trend rates would have the following effects:

	<u>Increase</u>	<u>Decrease</u>
	<i>(In thousands)</i>	
Effect on postretirement benefit obligation	\$266	\$(211)
Effect on total service and interest cost	23	(19)

The Company expects to pay benefits of \$108,000 under its Postretirement Plans in 2008.

The following benefit payments under the Postretirement Plan, which reflect expected future service, are expected to be paid

For the year ending December 31:	Future Benefit Payments
	<i>(In thousands)</i>
2008	\$ 108
2009	115
2010	123
2011	131
2012	141
2013 - 2017	820

Defined Contribution Plans:

The Holding Company maintains a profit sharing plan and the Bank maintains a 401(k) plan. Both plans are tax-qualified defined contribution plans which cover substantially all salaried employees who have one year of service. Currently, annual matching contributions under the Bank’s 401(k) plan equal 50% of the employee’s contributions, up to a maximum of 3% of the employee’s compensation. Effective October 1, 2006, the Bank added a program to the 401(k) plan, called the Defined Contribution Retirement Plan, under which the Bank contributes an amount equal to 4% of an eligible employee’s compensation. Contributions to the profit sharing plan are determined by the Holding Company’s board of directors in its discretion at or after the end of each year. Annual contributions under these plans are subject to the limits imposed under the Internal Revenue Code. Contributions by the Company into the 401(k) plan and profit sharing plan vest 20% per year over the employee's first five years of service. Contributions to these plans also 100% vest upon a change of control (as defined in the applicable plan). Compensation expense recorded by the Company for these plans amounted to \$1,336,000, \$1,017,000 and \$868,000 for the years ended December 31, 2007, 2006 and 2005, respectively.

As a result of the Atlantic Liberty acquisition, the Atlantic Liberty 401(k) Savings Plan was frozen effective June 30, 2006. As of that date, a participant no longer was permitted to commence participation or establish a compensation reduction agreement under this plan. In addition, as of the freeze date, all future before-tax, discretionary employer, matching, catch-up and rollover contributions ceased.

The Bank provides a non-qualified deferred compensation plan as an incentive for officers who have achieved the level of at least vice president and have at least one year of service. In addition to the amounts deferred by the officers, the Bank matches 50% of their contributions, generally up to a maximum of 5% of the officers’ salary. Matching contributions under this plan vest 20% per year for five years. They also become 100% vested upon a change of control (as defined in the plan). The Bank had also provided an additional non-contributory deferred compensation plan for its former president in the amount of 10% of his salary. Compensation expense recorded by the Company for these plans amounted to \$173,000, \$135,000 and \$172,000 for the years ended December 31, 2007, 2006 and 2005, respectively.

Employee Benefit Trust:

An Employee Benefit Trust (“EBT”) has been established to assist the Company in funding its benefit plan obligations. In connection with the Bank’s conversion to a federal stock savings bank in 1995, the EBT borrowed \$7,928,000 from the Company and used \$7,000 of cash received from the Bank to purchase 2,328,750 shares of the common stock of the Company. The loan will be repaid principally from the Company’s discretionary contributions to the EBT and dividend payments received on common stock held by the EBT, or may be forgiven by the Company, over a period of 30 years. At December 31, 2007, the loan had an outstanding balance of \$2,107,000, bearing a fixed interest rate of 6.22% per annum. The loan obligation of the EBT is considered unearned compensation and, as such, is recorded as a reduction of the Company’s stockholders’ equity. Both the loan obligation and the unearned compensation are reduced by the amount of loan repayments made by the EBT or forgiven by the Company. Shares purchased with the loan proceeds are held in a suspense account for contribution to specified benefit plans as the loan is repaid or forgiven. Shares released from the suspense account are used solely for funding matching contributions under the Bank’s 401(k) plan, contributions to the 401(k) plan for the Defined Contribution Retirement Program, and contributions to the Company’s profit-sharing plan. Since annual contributions are discretionary with the Company or dependent upon employee contributions, compensation payable under the EBT cannot be estimated. For the years ended December 31, 2007, 2006 and 2005, the Company funded \$111,000, \$914,000 and \$773,000, respectively, of employer contributions to the 401(k) and profit sharing plans from the EBT. The Company did not fund the contributions to the Defined Contribution Retirement Program or the Company’s profit-sharing plan for the year ended December 31, 2007 until January 2008, at which time the Company funded \$1,041,000 for these plans from the EBT.

Upon a change of control (as defined in the EBT), the EBT will terminate and any trust assets remaining after repayment of the Company's loan to the EBT and certain benefit plan contributions will be distributed to all full-time employees of the Company with at least one year of service, in proportion to their compensation over the four most recently completed calendar years plus the portion of the current year prior to the termination of the EBT.

The shares held in the suspense account are pledged as collateral and are reported as unallocated EBT shares in stockholders' equity. As shares are released from the suspense account, the Company reports compensation expense equal to the current market price of the shares, and the shares become outstanding for earnings per share computations. The EBT shares are as follows at December 31:

	<u>2007</u>	<u>2006</u>
Shares owned by Employee Benefit Trust, beginning balance	1,644,257	1,697,066
Shares released and allocated	(6,783)	(52,809)
Shares owned by Employee Benefit Trust, ending balance	<u>1,637,474</u>	<u>1,644,257</u>
Market value of unallocated shares.	<u>\$ 26,281,458</u>	<u>\$ 28,067,467</u>

Outside Director Retirement Plan:

The Bank has an unfunded noncontributory defined benefit Outside Director Retirement Plan (the "Directors' Plan"), which provides benefits to each non-employee director who became a non-employee director before January 1, 2004, who has at least five years of service as a non-employee director and whose years of service as a non-employee director plus age equals or exceeds 55. Benefits are also payable to a non-employee director who became a non-employee director before January 1, 2004 and whose status as a non-employee director terminates because of death or disability or who is a non-employee director upon a change of control (as defined in the Directors' Plan). Any person who becomes a non-employee director after January 1, 2004 is not eligible to participate in the Directors' Plan. An eligible director who terminates after November 22, 2005 will be paid an annual retirement benefit equal to \$48,000. Such benefit will be paid in equal monthly installments for the lesser of the number of months such director served as a non-employee director or 120 months. In the event of a termination of Board service due to a change of control, a non-employee director who has completed at least two years of service as a non-employee director will receive a cash lump sum payment equal to 120 months of benefit, and a non-employee director with less than two years service will receive a cash lump sum payment equal to a number of months of benefit equal to the number of months of his service as a non-employee director. In the event of the director's death, the surviving spouse will receive the equivalent benefit. No benefits will be payable to a director who is removed for cause. The Holding Company has guaranteed the payment of benefits under the Directors' Plan. Upon adopting the Directors' Plan, the Bank elected to immediately recognize the effect of adopting the Directors' Plan. Subsequent plan amendments are amortized as a past service liability. The Bank uses a September 30 measurement date for the Directors' Plan.

The following table sets forth, for the Directors' Plan, the change in benefit obligation and assets, and for the Company, the amounts recognized in the Consolidated Statements of Financial Condition at December 31:

	<u>2007</u>	<u>2006</u>
	<i>(In thousands)</i>	
Change in benefit obligation:		
Projected benefit obligation at beginning of year	\$ 2,558	\$ 3,142
Service cost	54	92
Interest cost	149	68
Actuarial loss (gain)	(388)	(597)
Benefits paid	(97)	(147)
Projected benefit obligation at end of year	<u>2,276</u>	<u>2,558</u>
Change in plan assets:		
Market value of assets at beginning of year	-	-
Employer contributions	97	147
Benefits paid	(97)	(147)
Market value of plan assets at end of year	<u>-</u>	<u>-</u>
Accrued pension cost included in other liabilities	<u>\$ (2,276)</u>	<u>\$ (2,558)</u>

The accumulated benefit obligation for the Directors' Plan was \$2.3 million and \$2.6 million at December 31, 2007 and 2006, respectively.

The components of the net pension expense for the Directors' Plan are as follows for the years ended December 31:

	2007	2006	2005
		<i>(In thousands)</i>	
Service cost	\$ 54	\$ 92	\$ 84
Interest cost	149	68	72
Amortization of unrecognized loss	-	17	12
Amortization of past service liability	141	148	148
Net pension expense	<u>344</u>	<u>325</u>	<u>316</u>
Recognize minimum pension liability	-	-	66
SFAS No. 158 recognition of deferred costs	-	519	-
Reverse effect of additional minimum liability	-	(572)	-
Current actuarial gain	(388)	-	-
Amortization of prior service cost	(141)	-	-
Total recognized in other comprehensive income	<u>(529)</u>	<u>(53)</u>	<u>66</u>
Total recognized in net pension expense and other comprehensive income	<u>\$ (185)</u>	<u>\$ 272</u>	<u>\$ 382</u>

Assumptions used to determine benefit obligations and periodic pension benefit expense for the Directors' Plan for the years ended December 31 were:

	2007	2006	2005
Weighted average discount rate for the benefit obligation	6.25%	6.00%	5.63%
Weighted average discount rate for periodic pension benefit expense	6.00%	5.63%	6.13%
Rate of increase in future compensation levels	NA	NA	NA

The following benefit payments under the Directors' Plan, which reflect expected future service, are expected to be paid:

For the year ending December 31:	Future Benefit Payments
	<i>(In thousands)</i>
2008	\$ 122
2009	254
2010	270
2011	244
2012	231
2013 – 2017	1,337

The Bank expects to make payments of \$122,000 under its Directors' Plan in 2008.

11. Stockholders' Equity

Dividend Restrictions:

In connection with the Bank's conversion from mutual to stock form in November 1995, a special liquidation account was established at the time of conversion, in accordance with the requirements of the Office of Thrift Supervision ("OTS"), which was equal to its capital as of June 30, 1995. The liquidation account is reduced as and to the extent that eligible account holders have reduced their qualifying deposits. Subsequent increases in deposits do not restore an eligible account holder's interest in the liquidation account. In the event of a complete liquidation of the Bank, each eligible account holder will be entitled to receive a distribution from the liquidation account in an amount proportionate to the current adjusted qualifying balances for accounts then held. As of December 31, 2007, the Bank's liquidation account was \$3.2 million, and was presented within retained earnings.

In addition to the restriction described above, Federal banking regulations place certain restrictions on dividends paid by the Bank to the Holding Company. The total amount of dividends which may be paid at any date is generally limited to the net income of the Bank for the current year and prior two years, less any dividends previously paid from those earnings. As of December 31, 2007, the Bank had \$29.0 million in retained earnings available to distribute to the Holding Company in the form of cash dividends.

In addition, dividends paid by the Bank to the Holding Company would be prohibited if the effect thereof would cause the Bank's capital to be reduced below applicable minimum capital requirements.

Stockholder Rights Plan:

The Holding Company has adopted a Shareholder Rights Plan under which each stockholder has one right to purchase from the Holding Company, for each share of common stock owned, one one-hundredth of a share of Series A junior participating preferred stock at a price of \$65. The rights will become exercisable only if a person or group acquires 15% or more of the Holding Company's common stock or commences a tender or exchange offer which, if consummated, would result in that person or group owning at least 15% of the Common Stock (the "acquiring person or group"). In such case, all stockholders other than the acquiring person or group will be entitled to purchase, by paying the \$65 exercise price, Common Stock (or a common stock equivalent) with a value of twice the exercise price. In addition, at any time after such event, and prior to the acquisition by any person or group of 50% or more of the Common Stock, the Board of Directors may, at its option, require each outstanding right (other than rights held by the acquiring person or group) to be exchanged for one share of Common Stock (or one common stock equivalent). If a person or group becomes an acquiring person and the Holding Company is acquired in a merger or other business combination or sells more than 50% of its assets or earning power, each right will entitle all other holders to purchase, by payment of \$65 exercise price, common stock of the acquiring company with a value of twice the exercise price. The rights plan expires on September 30, 2016.

Treasury Stock Transactions:

The Holding Company repurchased 38,000 shares in 2007 and 374,600 shares in 2006, of its outstanding common stock on the open market under its stock repurchase programs. In 2004, the Company approved a stock repurchase program, which authorized the purchase of an additional 1,000,000 shares. At December 31, 2007, 362,050 shares remain to be repurchased under this plan. At December 31, 2007 there were no shares held as Treasury Stock. As of December 31, 2006, there were 33,778 shares held as Treasury Stock.

12. Regulatory Capital

The Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA") imposes a number of mandatory supervisory measures on banks and thrift institutions. Among other matters, FDICIA established five capital zones or classifications (well-capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized). Such classifications are used by the OTS and other bank regulatory agencies to determine matters ranging from each institution's semi-annual FDIC deposit insurance premium assessments, to approvals of applications authorizing institutions to grow their asset size or otherwise expand business activities. Under OTS capital regulations, the Bank is required to comply with each of three separate capital adequacy standards. As of December 31, 2007, the Bank continues to be categorized as "well-capitalized" by the OTS under the prompt corrective action regulations and continues to exceed all regulatory capital requirements.

Set forth below is a summary of the Bank's compliance with OTS capital standards.

	December 31, 2007		December 31, 2006	
	Amount	Percent of Assets	Amount	Percent of Assets
<i>(Dollars in thousands)</i>				
Tangible capital:				
Capital level	\$241,503	7.27 %	\$194,585	6.91 %
Requirement	49,810	1.50	42,249	1.50
Excess	191,693	5.77	152,336	5.41
Leverage and Core (Tier I) capital:				
Capital level	\$241,503	7.27 %	\$194,585	6.91 %
Requirement	99,620	3.00	84,497	3.00
Excess	141,883	4.27	110,088	3.91
Total risk-based capital:				
Capital level	\$248,136	11.20 %	\$201,642	10.99 %
Requirement	179,603	8.00	146,736	8.00
Excess	68,533	3.20	54,906	2.99

13. Commitments and Contingencies

Commitments:

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and lines of credit. The instruments involve, to varying degrees, elements of credit and market risks in excess of the amount recognized in the consolidated financial statements.

The Company's exposure to credit loss in the event of nonperformance by the counterparty to the financial instrument for loan commitments and lines of credit is represented by the contractual amounts of these instruments.

Commitments to extend credit (principally real estate mortgage loans) and lines of credit (principally construction loans and home equity lines of credit) amounted to \$79.9 million and \$74.4 million, respectively, at December 31, 2007. Included in these commitments were \$53.6 million of fixed-rate commitments at a weighted average rate of 8.00%, and \$100.7 million of adjustable-rate commitments with a weighted average rate, as of December 31, 2007, of 7.49%. Since generally all of the loan commitments are expected to be drawn upon, the total loan commitments approximate future cash requirements, whereas the amounts of lines of credit may not be indicative of the Company's future cash requirements. The loan commitments generally expire in ninety days, while construction loan lines of credit mature within eighteen months and home equity lines of credit mature within ten years. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Commitments to extend credit are legally binding agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates and require payment of a fee. The Company evaluates each customer's creditworthiness on a case-by-case basis. Collateral held consists primarily of real estate.

The Trusts issued capital securities in June and July 2007 with a par value of \$61.9 million. The Holding Company has guaranteed the payment of the Trusts' obligations under these capital securities.

The Company's minimum annual rental payments for Bank premises due under non-cancelable leases are as follows:

	<u>Minimum Rental</u>
	<i>(In thousands)</i>
Years ended December 31:	
2008	\$ 2,695
2009	2,798
2010	2,760
2011	2,729
2012	1,997
Thereafter	11,910
Total minimum payments required	<u>\$ 24,889</u>

The leases have escalation clauses for operating expenses and real estate taxes. Certain lease agreements provide for increases in rental payments based upon increases in the consumer price index. Rent expense under these leases for the years ended December 31, 2007, 2006 and 2005 was approximately \$2.9 million, \$2.3 million and \$1.7 million, respectively.

Contingencies:

The Company is a defendant in various lawsuits. Management of the Company, after consultation with outside legal counsel, believes that the resolution of these various matters will not result in any material adverse effect on the Company's consolidated financial condition, results of operations or cash flows.

14. Concentration of Credit Risk

The Company's lending is concentrated in the metropolitan New York area. The Company evaluates each customer's creditworthiness on a case-by-case basis under the Company's established underwriting policies. The collateral obtained by the Company generally consists of first liens on one-to-four family residential, multi-family residential, and commercial real estate.

15. Disclosures About Fair Value of Financial Instruments

SFAS No. 107, "Disclosures About Fair Value of Financial Instruments", requires that the Company disclose the estimated fair values for certain of its financial instruments. Financial instruments include items such as loans, deposits, securities, commitments to lend and other items as defined in SFAS No. 107.

Effective January 1, 2007, the Company adopted SFAS No. 157, "Fair Value Measurements", and SFAS No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities-Including an amendment of FASB No. 115". SFAS No. 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. SFAS No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value. Management selected the fair value option for certain investment securities, primarily mortgage-backed securities, and certain borrowed funds. These financial instruments were chosen as the yield on the financial assets was a below-market yield, while the rate on the financial liabilities was an above-market rate. Management also considered the average duration of these instruments, which, for investment securities, was longer than the average for the portfolio of securities, and, for borrowings, primarily represented the longer-term borrowings of the Company. Choosing these instruments for the fair value option adjusted the carrying value of these financial assets and financial liabilities to their current fair value, and more closely aligns the financial performance of the Company with the economic value of these financial instruments. Management selected, as of January 1, 2007, financial assets and financial liabilities with fair values of \$160.7 million and \$120.1 million, respectively, for the fair value option. The selection of these financial assets and financial liabilities reduced the Company's one year interest-rate gap position, thereby reducing the Company's interest-rate risk position. Management believes that electing the fair value option allows them to better react to changes in interest rates. Management did not elect the fair value option for investment securities and borrowings with shorter duration, adjustable rates, and yields that approximated the then current market rate, as management believes that these financial assets and financial liabilities approximated their economic value. On a going-forward basis, the Company currently plans to carry the financial assets and financial liabilities which replace the above noted items at fair value, and will evaluate other purchases of investments and acquisition of new debt to determine if they should be carried at cost or fair value. The Company elected to measure at fair value junior subordinated debt (commonly know as trust preferred securities) with a face amount of \$61.9 million that was issued during 2007. The Company also elected to measure at fair value securities that were purchased during 2007 at a cost of \$21.4 million.

The effect on the financial assets and financial liabilities selected for the fair value option as of January 1, 2007 is shown in the following table:

	Prior to Adoption	Net Gain (Loss) upon Adoption <i>(in thousands)</i>	After Adoption
Mortgage-backed securities	\$ 138,881	\$ 534	\$ 139,415
Other securities	21,270	19	21,289
Accrued interest receivable	547	(547)	-
Other assets	561	(561)	-
Borrowed funds	(90,619)	(3,868)	(94,487)
Securities sold under agreements to repurchase	(25,000)	(581)	(25,581)
Other liabilities	(1,108)	1,108	-
Pretax cumulative effect of adoption		(3,896)	
Increase in deferred tax asset		1,721	
Cumulative effect on stockholders' equity		(2,175)	
Reclassification from accumulated other comprehensive loss		(3,636)	
Cumulative effect on retained earnings		<u>\$ (5,811)</u>	

The following table presents the financial assets and financial liabilities reported at fair value in the Consolidated Statement of Financial Position, and the changes in fair value included in the Consolidated Statement of Income, at or for the year ended December 31, 2007:

	Fair Value Measurements at December 31, 2007	Changes in Fair Values For Items Measured at Fair Value Pursuant to Election of the Fair Value Option Year Ended December 31, 2007
	<i>(in thousands)</i>	
Mortgage-backed securities	\$ 133,051	\$ 2,876
Other securities	30,986	57
Borrowed funds	135,621	91
Securities sold under agreements to repurchase	25,924	(339)
Net gain from fair value adjustments		<u>\$ 2,685</u>

Financial assets and financial liabilities reported at fair value are required to be measured based on either: (1) quoted prices in active markets for identical financial instruments (level 1), (2) significant other observable inputs (level 2), or (3) significant unobservable inputs (level 3). Each of the financial instruments reported at fair value were based on significant other observable inputs (level 2).

Included in the fair value of the financial assets and financial liabilities selected for the fair value option is the accrued interest receivable or payable for the related instrument. The Company continues to accrue, and report as interest income or interest expense in the Consolidated Statement of Income, the interest receivable or payable on the financial instruments selected for the fair value option at their respective contractual rates.

The borrowed funds and securities sold under agreements to repurchase have contractual principal amounts, as of December 31, 2007, of \$131,857,000 and \$25,000,000, respectively. The fair value of borrowed funds and securities sold under agreements to repurchase include accrued interest payable, as of December 31, 2007, of \$825,000 and \$276,000, respectively.

The Company generally holds its earning assets, other than securities available for sale, to maturity and settles its liabilities at maturity. However, fair value estimates are made at a specific point in time and are based on relevant market information. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular instrument. Accordingly, as assumptions change, such as interest rates and prepayments, fair value estimates change and these amounts may not necessarily be realized in an immediate sale.

Disclosure of fair value does not require fair value information for items that do not meet the definition of a financial instrument or certain other financial instruments specifically excluded from its requirements. These items include core deposit intangibles and other customer relationships, premises and equipment, leases, income taxes, foreclosed properties and equity.

Further, fair value disclosure does not attempt to value future income or business. These items may be material and accordingly, the fair value information presented does not purport to represent, nor should it be construed to represent, the underlying "market" or franchise value of the Company.

The following table sets forth the Company's assets and liabilities that are carried at fair value, and the method that was used to determine their fair value, at December 31, 2007:

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total
	<i>(In thousands)</i>			
Assets:				
Securities available for sale				
Mortgage-backed securities	\$ -	\$ 362,729	\$ -	\$ 362,729
Other securities	28,179	49,192	-	77,371
Total assets	\$ 28,179	\$ 411,921	\$ -	\$ 440,100
Liabilities:				
Borrowed funds				
Securities sold under agreements to repurchase	-	25,924	-	25,924
Total liabilities	\$ -	\$ 161,545	\$ -	\$ 161,545

The estimated fair value of each material class of financial instruments at December 31, 2007 and 2006 and the related methods and assumptions used to estimate fair value are as follows:

Cash and due from banks, overnight interest-earning deposits and federal funds sold, FHLB-NY stock, bank owned life insurance, interest and dividends receivable, mortgagors' escrow deposits and other liabilities:

The carrying amounts are a reasonable estimate of fair value.

Securities available for sale:

The estimated fair values of securities available for sale are contained in Note 4 of Notes to Consolidated Financial Statements. Fair value is based upon quoted market prices (level 1 input), where available. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities and adjusted for differences between the quoted instrument and the instrument being valued (level 2 input).

Loans:

The estimated fair value of loans, with carrying amounts of \$2,708,751,000 and \$2,331,805,000 at December 31, 2007 and 2006, respectively, was \$2,730,983,000 and \$2,348,007,000 at December 31, 2007 and 2006, respectively.

Fair value is estimated by discounting the expected future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and remaining maturities (level 2 input).

For non-accruing loans, fair value is generally estimated by discounting management's estimate of future cash flows with a discount rate commensurate with the risk associated with such assets (level 2 input).

Due to depositors:

The estimated fair value of due to depositors, with carrying amounts of \$2,002,955,000 and \$1,744,395,000 at December 31, 2007 and 2006, respectively, was \$2,015,355,000 and \$1,716,216,000 at December 31, 2007 and 2006, respectively.

The fair values of demand, passbook savings, NOW and money market deposits are, by definition, equal to the amount payable on demand at the reporting dates (i.e. their carrying value). The fair value of fixed-maturity certificates of deposits are estimated by discounting the expected future cash flows using the rates currently offered for deposits of similar remaining maturities (level 2 input).

Borrowed funds:

The estimated fair value of borrowed funds, with carrying amounts of \$1,072,551,000 and \$832,413,000 at December 31, 2007 and 2006, respectively, was \$1,087,674,000 and \$828,623,000 at December 31, 2007 and 2006, respectively.

The fair value of borrowed funds is estimated by discounting the contractual cash flows using interest rates in effect for borrowings with similar maturities and collateral requirements (level 2 input).

Other financial instruments:

The fair values of commitments to sell, lend or borrow are estimated using the fees currently charged or paid to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties or on the estimated cost to terminate them or otherwise settle with the counterparties at the reporting date. For fixed-rate loan commitments to sell, lend or borrow, fair values also consider the difference between current levels of interest rates and committed rates (where applicable).

At December 31, 2007 and 2006, the fair values of the above financial instruments approximate the recorded amounts of the related fees and were not considered to be material.

16. Recent Accounting Pronouncements

In July 2006, the Financial Accounting Standards Board (“FASB”) issued FASB Interpretation 48 (FIN 48), “Accounting for Uncertainty in Income Taxes: an interpretation of SFAS No. 109”. FIN 48 clarifies Statement of Financial Accounting Standards (“SFAS”) No. 109, “Accounting for Income Taxes”, by defining a criterion that an individual tax position would have to meet for some or all of the benefit of that position to be recognized in an entity’s financial statements. Entities should evaluate a tax position to determine if it is more likely than not that a position will be sustained on examination by taxing authorities. FIN 48 defines more likely than not as “a likelihood of more than 50 percent”. FIN 48 also requires certain disclosures, including the amount of unrecognized tax benefits that if recognized would change the effective tax rate, information concerning tax positions for which a significant increase or decrease in the unrecognized tax benefit liability is reasonably possible in the next 12 months, a tabular reconciliation of the beginning and ending balances of unrecognized tax benefits, and tax years that remain open for examination by major jurisdictions. FIN 48 is effective for fiscal years beginning after December 15, 2006. The adoption of FIN 48 did not have a material effect on the Company’s results of operations or financial condition.

In February 2006, the FASB issued SFAS No. 155, “Accounting for Certain Hybrid Financial Instruments.” The Statement amends SFAS No. 133, “Accounting for Derivative Instruments and Hedging Activities” and SFAS No.140, “Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities.” The Statement also resolves issues addressed in SFAS No. 133 Implementation Issue No. D1, “Application of Statement 133 to Beneficial Interest in Securitized Financial Assets.” SFAS No. 155 permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation, clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS No. 133, establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain as embedded derivative requiring bifurcation, and clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives. The Statement eliminates the interim guidance in SFAS No. 133 Implementation Issue No. D1, which provided that beneficial interests in securitized financial assets are not subject to the provisions of SFAS No. 133. The Statement is effective for all financial instruments acquired or issued after the beginning of an entity’s first fiscal year that begins after September 15, 2006. The adoption of SFAS No. 155 did not have a material effect on the Company’s results of operations or financial condition.

In September 2006 the FASB issued SFAS No. 157, “Fair Value Measurements.” The Statement is effective for all financial statements issued for fiscal years beginning after November 15, 2007, with earlier adoption permitted. The Statement defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The early adoption of SFAS No. 159 required the early adoption of SFAS No. 157. Adoption of SFAS No. 157 did not have a material impact on the Company’s results of operations or financial condition.

In September 2006, the FASB issued SFAS No. 158, “Employers’ Accounting for Defined Benefit Pension and Other Postretirement Plans.” The Statement requires an employer that is a business entity and sponsors one or more single-employer defined benefit plans to: (1) recognize the funded status of a benefit plan – measured as the difference between plan assets at fair value and the benefit obligation – in its statement of financial position, with the corresponding credit or charge, net of taxes, upon initial adoption to Accumulated Other Comprehensive Income; (2) recognized as a component of Accumulated Other Comprehensive Income, net of tax, the gains or losses and prior service costs or credits that arise during the period but are not recognized as components of net periodic benefit cost pursuant to SFAS

No. 87, “Employers’ Accounting for Pensions”, or SFAS No. 106, “Employers’ Accounting for Postretirement Benefits Other Than Pensions”; (3) measure defined benefit plan assets and obligations as of the date of the employer’s fiscal year end; and (4) expand disclosures in the notes to the financial statements about certain effects on net periodic benefit cost. The Statement also amends SFAS No. 132 (revised 2003), “Employers’ Disclosures about Pensions and Other Postretirement Benefits”, and SFAS No. 88, “Employers’ Accounting for Settlements and Curtailments of Defined Benefit Pension Plans for Termination Benefits”. An employer who has publicly traded equity securities, such as the Holding Company, is required to initially recognize the funded status of a defined benefit postretirement plan and to provide the required disclosures as of the end of its fiscal year ending after December 15, 2006. For the Holding Company, this is for the year ended December 31, 2006. The requirement to measure plan assets and benefit obligations as of the date of the employer’s fiscal year end is effective for fiscal years ending after December 15, 2008. The adoption of this statement resulted in a charge to Accumulated Other Comprehensive Income, and a corresponding reduction of stockholders’ equity, of \$1.2 million, net of taxes, at December 31, 2006.

In February 2007, the FASB Issued SFAS No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities-Including an amendment of FASB No. 115”. This Statement permits entities to choose to measure many financial instruments and certain other items at fair value. This statement is effective for the beginning of the first fiscal year that begins after November 15, 2007. Early adoption is permitted as of the beginning of an entity’s fiscal year prior to the effective date, provided the election is made prior to the issuance of financial statements for that year or portion thereof, and the election is made within 120 days of the beginning of that fiscal year. Early adoption of SFAS No. 159 also requires the early adoption of SFAS No. 157. The impact of adopting this statement on the Company’s consolidated financial statements is discussed in Note 15 of Notes to Consolidated Financial Statements in Item 8 of this Annual Report.

In May 2005, the FASB issued SFAS No. 154, “Accounting Changes and Error Corrections,” which replaces APB Opinion No. 20, “Accounting Changes,” and SFAS No. 3, “Reporting Accounting Changes in Interim Financial Statements,” and changes the requirements for the accounting for and reporting of a change in accounting principle. SFAS No. 154 applies to all voluntary changes in accounting principle and to changes required by an accounting pronouncement when the pronouncement does not include specific transition provisions. SFAS No. 154 requires retrospective application of changes in accounting principle to prior periods’ financial statements unless it is impracticable to determine either the period-specific effects or the cumulative effect of the change. APB Opinion No. 20 previously required that most voluntary changes in accounting principle be recognized by including the cumulative effect of the change in net income for the period of the change in accounting principle. SFAS No. 154 carries forward without change the guidance contained in APB Opinion No. 20 for reporting the correction of an error in previously issued financial statements and a change in accounting estimate. SFAS No. 154 also carries forward the guidance in APB Opinion No. 20 requiring justification of a change in accounting principle on the basis of preferability. SFAS No. 154 is effective for accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005, with early adoption permitted. The adoption of SFAS No. 154 did not have a material impact on the Company’s results of operations or financial condition.

On November 3, 2005, the FASB issued FASB Staff Position (FSP) Nos. FAS 115-1 and FAS 124-1, “The Meaning of Other-Than-Temporary Impairment and Its Application.” This FSP addresses the determination as to when an investment is considered impaired, whether that impairment is other than temporary, and the measurement of an impairment loss. This FSP also includes accounting considerations subsequent to the recognition of an other-than-temporary impairment and requires certain disclosures about unrealized losses that have not been recognized as other-than-temporary impairments. The guidance in this FSP amends SFAS No. 115, “Accounting for Certain Investments in Debt and Equity Securities,” and No. 124, “Accounting for Certain Investments Held by Not-for-Profit Organizations,” and APB Opinion No. 18, “The Equity Method of Accounting for Investments in Common Stock.” This FSP is effective for reporting periods beginning after December 15, 2005. The adoption of this FSP did not have a material effect on the Company’s results of operations or financial condition.

In September 2006, the FASB ratified the consensus reached by the Emerging Issues Task Force on Issue No. 06-4, “Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements.” The consensus reached in Issue No. 06-4 requires the accrual of a liability for the cost of the insurance policy during postretirement periods in accordance with SFAS No. 106, “Employers’ Accounting for Postretirement Benefits Other Than Pensions”, or APB Opinion 12, “Omnibus Opinion”, when an employer has effectively agreed to maintain a life insurance policy during the employee’s retirement. At December 31, 2007 the Company had endorsement split-dollar life insurance arrangements with forty-seven present or former employees, which currently provides approximately \$7.9 million of life insurance benefits to these employees. The amount of the benefit for each employee is based on the employee’s salary when their employment terminates. Issue No. 06-4 is effective for fiscal years beginning after December 15, 2007. Adoption of Issue No. 06-4 is not expected to have a material impact on the Company’s results of operations or financial condition.

In September 2006, the Staff of the Securities and Exchange Commission issued Staff Accounting Bulletin No. 108 (“SAB 108”), “Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements.” SAB 108 was issued to address diversity in practice in quantifying financial statement misstatements and the potential under current practice for the build up of improper amounts on the balance sheet, and to provide consistency between how registrants quantify financial statement misstatements. The techniques most commonly used in practice to accumulate and quantify misstatements are generally referred to as the “roll-over” and “iron curtain” approaches. The roll-over approach quantifies a misstatement based on the amount of the error originating in the current year statement. The iron curtain approach quantifies a misstatement based on the effects of correcting the misstatement existing in the balance sheet at the end of the current year, irrespective of when the misstatement originated. SAB 108 requires a “dual approach” that requires quantification of errors under both the roll-over and iron curtain methods. SAB 108 is effective for fiscal years ending after November 15, 2006. The adoption of SAB 108 did not have a material effect on the Company’s results of operations or financial condition.

In December 2007, the FASB issue SFAS No. 141R (revised 2007), “Business Combinations.” This statement replaces SFAS No. 141, “Business Combinations”, but retains the fundamental requirements in SFAS No. 141 that the acquisition method of accounting be used for all business combinations and for an acquirer to be identified for each business combination. This statement defines the acquirer as the entity that obtains control of one or more businesses in the business combination and establishes the acquisition date as the date that the acquirer achieves control. This statement requires an acquirer to recognize the assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at the acquisition date, measured at their fair values as of that date, with limited exceptions. This statement also requires that costs incurred to complete the acquisition, including restructuring costs, are to be recognized separately from the acquisition. This statement also requires an acquirer to recognize assets or liabilities arising from all other contingencies as of the acquisition date, measured at their acquisition-date fair values, only if they meet the definition of as asset or liability in FASB Concepts Statement No. 6, “Elements of Financial Statements.” This statement also provides specific guidance on the subsequent accounting for assets and liabilities arising from contingencies acquired or assumed in a business combination. SFAS No. 141R is effective for business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. Early adoption is not permitted. Since this statement is effective for business combinations for which the Company is the acquirer that occur after December 31, 2008, the Company is unable, at this time, to determine the impact of this statement.

In December 2007, the FASB issued SFAS No. 160, “Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB No. 51.” This statement requires that ownership interests in subsidiaries held by parties other than the parent company be clearly identified, labeled, and presented in the consolidated statement of financial position within equity, but separate from the parent’s equity. This statement also requires the amount of consolidated net income attributable to the parent company and to the noncontrolling interest be clearly identified and presented on the face of the consolidated statement of income. SFAS No. 160 is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. Early adoption is not permitted. Adoption of SFAS No. 160 is not expected to have a material impact on the Company’s results of operations or financial condition.

17. Quarterly Financial Data (unaudited)

Selected unaudited quarterly financial data for the fiscal years ended December 31, 2007 and 2006 is presented below:

	2007				2006			
	4th	3rd	2nd	1st	4th	3rd	2nd	1st
<i>(In thousands, except per share data)</i>								
Quarterly operating data:								
Interest income	\$ 52,404	\$ 48,996	\$ 47,371	\$ 44,791	\$ 43,153	\$ 41,473	\$ 37,546	\$ 36,212

18. Acquisition of Atlantic Liberty Financial Corporation

On June 30, 2006, the Company acquired 100 percent of the outstanding common stock of Atlantic Liberty Financial Corporation ("Atlantic Liberty"), the parent holding company for Atlantic Liberty Savings, F.A., based in Brooklyn, New York. The aggregate purchase price was \$42.5 million, which included \$14.7 million of cash, common stock valued at \$26.6 million, and \$1.3 million assigned to the fair value of Atlantic Liberty's outstanding stock options. The fair value assigned to the outstanding stock options was recorded as an adjustment in 2007. Under the terms of the Agreement and Plan of Merger, dated December 20, 2005, Atlantic Liberty's shareholders received \$24.00 in cash, 1.43 Holding Company shares per Atlantic Liberty share owned, or a combination thereof, subject to aggregate allocation to all Atlantic Liberty's shareholders of 65% stock / 35% cash. In connection with the merger, the Company issued 1.6 million shares of common stock, the value of which was determined based on the closing price of the Company's common stock on the announcement date of December 21, 2005, and two days prior to and after the announcement date.

The acquisition was accounted for as a purchase. The Company recorded goodwill (the excess of cost over the fair value of net assets acquired) of \$12.2 million in the transaction. In accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 142, goodwill is not being amortized in connection with this transaction. The Company estimates that none of the goodwill will be deductible for income tax purposes. The Company also recorded a core deposit intangible asset of \$3.5 million, which is being amortized using the straight-line method over 7.5 years, resulting in an annual expense of \$0.5 million. The results of Atlantic Liberty's operations have been included in the consolidated statement of income subsequent to June 30, 2006.

The purchase price has been allocated to the assets acquired and liabilities assumed using fair values as of the acquisition date. The Company acquired \$186.9 million in assets, which includes \$3.4 million of cash, \$116.2 million in net loans, \$34.9 million in securities, \$9.1 million in fixed assets and \$23.3 million in other assets, and assumed \$144.4 million in liabilities, which includes \$106.8 million in deposits, \$30.5 million in borrowed funds and \$7.1 in other liabilities.

As a result of the acquisition, the Bank now has branches on Montague Street and Avenue J in Brooklyn, two highly attractive markets.

Had the acquisition of Atlantic Liberty taken place on January 1, 2006, the Company's pro forma net income (unaudited) for the year ended December 31, 2006 would have been \$18.3 million, or \$0.93 per diluted share. Included in Atlantic Liberty's financial results were merger related expenses of \$3.4 million, on an after-tax basis. Excluding these merger related expenses, the Company's pro forma net income would have been \$21.7 million, or \$1.10 per diluted share. These results, which do not reflect cost savings that may be achieved, are not necessarily indicative of the actual results that would have occurred had the acquisition taken place on January 1, 2006.

19. Parent Company Only Financial Information

Earnings of the Bank are recognized by the Holding Company using the equity method of accounting. Accordingly, earnings of the Bank are recorded as increases in the Holding Company's investment, any dividends would reduce the Holding Company's investment in the Bank, and any changes in the Bank's unrealized gain or loss on securities available for sale, net of taxes, would increase or decrease, respectively, the Holding Company's investment in the Bank. The condensed financial statements for the Holding Company are presented below:

Report of Independent Registered Public Accounting Firm

Board of Directors and Shareholders
Flushing Financial Corporation

We have audited the accompanying consolidated statements of financial condition of Flushing Financial Corporation (a Delaware Corporation) and subsidiaries as of December 31, 2007 and 2006, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for each of the two years in the period ended December 31, 2007. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Flushing Financial Corporation and subsidiaries as of December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the two years in the period ended December 31, 2007 in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 15 to the consolidated financial statements, the Company has adopted Financial Accounting Standards Board Statement (FASB) No. 157, *Fair Value Measurements* and FASB No.159, *The Fair Value Option for Financial Assets and Financial Liabilities-Including an amendment of FASB No. 115* as of January 1, 2007. Also as discussed in Notes 9 and 10 to the consolidated financial statements, the Company adopted FASB No. 123(R), *Share Based Payments* and FASB No. 158, *Employers' Accounting for Defined Benefit Pension and Other Post Retirement Plans - an amendment of FASB Statements No. 87, 88, 106 and 132(R)* in 2006.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Flushing Financial Corporation's internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) and our report dated March 14, 2008 expressed an unqualified opinion.

Report of Independent Registered Public Accounting Firm

Board of Directors and Shareholders
Flushing Financial Corporation

We have audited Flushing Financial Corporation's (a Delaware Corporation) internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Flushing Financial Corporation's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on Flushing Financial Corporation's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Flushing Financial Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control—Integrated Framework* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated statements of financial condition of Flushing Financial Corporation (a Delaware Corporation) and subsidiaries as of December 31, 2007 and 2006 and the related consolidated statements of income, changes in stockholders' equity, and cash flows for each of the two years in the period ended December 31, 2007 and our report dated March 14, 2008 expressed an unqualified opinion.

/S/Grant Thornton LLP
New York, New York
March 14, 2008

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Directors of
Flushing Financial Corporation:

In our opinion, the consolidated statements of income, shareholders' equity and cash flows for the year ended December 31, 2005 present fairly, in all material respects, the results of their operations, changes in stockholders' equity and cash flows for the year ended December 31, 2005, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

On May 10, 2006, the Company's independent registered public accounting firm, PriceWaterhouseCoopers, LLP, ("PWC") was dismissed. The Company engaged Grant Thornton LLP, as its independent registered public accounting firm as of May 10, 2006. PWC's reports for the fiscal years ending December 31, 2005 and 2004 contained no adverse opinion or disclaimer of opinion and were not qualified or modified as to uncertainty, audit scope or accounting principle. During the two most recent fiscal years and through May 10, 2006, there have been no disagreements with PWC on any matter of accounting principles or practices, financial statements disclosure, or auditing scope of procedures, which disagreements, if not resolved to the satisfaction of PWC would have caused them to make reference to the subject matter of disagreement in connection with the Company's financial statements for such years. During the two most recent fiscal years and through May 10, 2006, there were no reportable events. The Audit Committee of the Company's Board of Directors has the sole authority to appoint or replace the external auditors and as such approved the dismissal of PWC as the Company's independent registered public accounting firm. The Company requested and received a letter from PWC dated May 12, 2006 and addressed to the SEC, stating that it agrees with the statements as outlined above.

Item 9A. Controls and Procedures.

Disclosure Controls and Procedures

The Company carried out, under the supervision and with the participation of the Company's management, including its Chief Executive Officer and Chief Financial Officer, an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this Annual Report. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of December 31, 2007, the design and operation of these disclosure controls and procedures were effective. During the period covered by this Annual Report, there have been no changes in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, and for performing an assessment of the effectiveness of internal control over financial reporting as of December 31, 2007. Internal control over financial reporting is defined in Rule 13a-15(f) or 15d-15(f) promulgated under the Securities Exchange Act of 1934 as a process designed by, or under the supervision of, the Company's principal executive and principal financial officers and effected by the Company's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management performed an assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2007 based upon criteria in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). Based on this assessment, management concluded that the Company's internal control over financial reporting was effective as of December 31, 2007 based on those criteria issued by COSO.

Grant Thornton, LLP, the Company's independent registered public accounting firm that audited the Company's consolidated financial statements included in this Annual Report on Form 10-K, has issued a report on the effectiveness of the Company's internal control over financial reporting as of December 31, 2007, as stated in their report which appears on page 105.

Dated March 14, 2008

Item 9B. Other Information.

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

Other than the disclosures below, information regarding the directors and executive officers of the Company appears in the Company's Proxy Statement for the Annual Meeting of Stockholders to be held May 20, 2008 ("Proxy Statement") under the captions "Board Nominees", "Continuing Directors", "Executive Officers Who Are Not Directors" and "Meeting and Committees of the Board of Directors – Audit Committee" and is incorporated herein by this reference. Information regarding Section 16(a) beneficial ownership appears in the Company's Proxy Statement under the caption "Section 16(a) Beneficial Ownership Reporting Compliance" and is incorporated herein by this reference.

Code of Ethics. The Company has adopted a Code of Business Conduct and Ethics that applies to all of its directors, officers and employees. This code is publicly available on the Company's website at <http://www.snl.com/Cache/1001137156.PDF?FID=1001137156&O=PDF&T=&D=&IID=102398&Y>. Any substantive amendments to the code and any grant of a waiver from a provision of the code requiring disclosure under applicable SEC or NASDAQ rules will be disclosed in a report on Form 8-K.

Audit Committee Financial Expert. The Board of Directors of the Company has determined that Louis C. Grassi, the Chairman of the Audit Committee, is an "audit committee financial expert" as defined under Item 401(h) of Regulation S-K, and that he is independent as defined under applicable NASDAQ listing standards. Mr. Grassi is a certified public accountant and a certified fraud examiner.

Item 11. Executive Compensation.

Information regarding executive compensation appears in the Proxy Statement under the caption "Executive Compensation" and is incorporated herein by this reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

Information regarding security ownership of certain beneficial owners appears in the Proxy Statement under the caption "Stock Ownership of Certain Beneficial Owners" and is incorporated herein by this reference.

Information regarding security ownership of management appears in the Proxy Statement under the caption "Stock Ownership of Management" and is incorporated herein by this reference.

The following table sets forth securities authorized for issuance under all equity compensation plans of the Company at December 31, 2007:

	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders	1,563,056	\$13.45	342,962 ⁽¹⁾
Equity compensation plans not approved by security holders	—	—	—
Total	<u>1,563,056</u>	<u>\$13.45</u>	<u>342,962⁽¹⁾</u>

(1) Consists of 153,188 shares available for future non-full value awards and 189,774 shares available for future full value awards.

Item 13. Certain Relationships and Related Transactions, and Director Independence.

Information regarding certain relationships and related transactions and directors independence, appears in the Proxy Statement under the captions “Compensation Committee Interlocks and Insider Participation” and “Related Party Transactions” and is incorporated herein by this reference.

Item 14. Principal Accounting Fees and Services.

Information regarding fees paid to the Company’s independent auditor appears in the Proxy Statement under the caption “Schedule of Fees to Independent Auditors” and is hereby incorporated by this reference.

PART IV

Item 15. Exhibits, Financial Statement Schedules.

(a) 1. Financial Statements

The following financial statements are included in Item 8 of this Annual Report and are incorporated herein by this reference:

- Consolidated Statements of Financial Condition at December 31, 2007 and 2006
- Consolidated Statements of Income for each of the three years in the period ended December 31, 2007
- Consolidated Statements of Changes in Stockholders’ Equity for each of the three years in the period ended December 31, 2007
- Consolidated Statements of Cash Flows for each of the three years in the period ended December 31, 2007
- Notes to Consolidated Financial Statements
- Report of Independent Registered Public Accounting Firm

2. Financial Statement Schedules

Financial Statement Schedules have been omitted because they are not applicable or the required information is shown in the Consolidated Financial Statements or Notes thereto included in Item 8 of this Annual Report and are incorporated herein by this reference.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) the Securities Exchange Act of 1934, the Company has duly caused this report, or amendment thereto, to be signed on its behalf by the undersigned, thereunto duly authorized, in New York, New York, on March 13, 2008.

FLUSHING FINANCIAL CORPORATION

By /S/JOHN R. BURAN
John R. Buran
President and CEO

POWER OF ATTORNEY

We, the undersigned directors and officers of Flushing Financial Corporation (the "Company") hereby severally constitute and appoint John R. Buran and David W. Fry as our true and lawful attorneys and agents, each acting alone and with full power of substitution and re-substitution, to do any and all things in our names in the capacities indicated below which said John R. Buran or David W. Fry may deem necessary or advisable to enable the Company to comply with the Securities Exchange Act of 1934, and any rules, regulations and requirements of the Securities and Exchange Commission, in connection with the report on Form 10-K, or amendment thereto, including specifically, but not limited to, power and authority to sign for us in our names in the capacities indicated below the report on Form 10-K, or amendment thereto; and we hereby approve, ratify and confirm all that said John R. Buran or David W. Fry shall do or cause to be done by virtue thereof.

Pursuant to the requirements of the Securities Exchange Act of 1934, this report on Form 10-K, or amendment thereto, has been signed by the following persons in the capacities and on the dates indicated.
